2814200000	Ammonia in aqueous solution
3819000000	Hydraulic brake fluids and other prepared liquids for hydraulic transmission, not containing or containing less than 70 percent by weight of petroleum oils or oils obtained from bituminous minerals

**SUPPLEMENT NO. 2 TO PART 754 -UNPROCESSED WESTERN RED CEDAR**

This table is a non-exhaustive list of 10-digit Harmonized System-based Schedule B commodity numbers that may apply to unprocessed western red cedar products subject to license requirements of §754.4 of this part. The 10-digit Harmonized System-based Schedule B commodity numbers and descriptions below are drawn from *Chapter 44 of the Schedule B 2014* found at <http://www.census.gov/foreign-trade/schedules/b/2014/c44.html> and the *AES 2014 Export Concordance* (December 30, 2013) <http://www.census.gov/foreign-trade/aes/documentlibrary/expaes.txt>. If there are any discrepancies between the information in this supplement and the information in the most current Schedule B, use the most current Schedule B commodity number on your Electronic Export Information filing in the Automated Export System.

Schedule B commodity number	Description
<b>Wood in the rough</b>	
4403100030	Poles, piles and posts; ‘treated’
4403100060	Wood in the rough; ‘treated’
4403200010	Not ‘treated;’ coniferous; poles, piles and posts
4403200055	Not ‘treated;’ coniferous; logs and timber; Western Red Cedar ( <i>Thuja Plicata</i> )
<b>‘Lumber’</b>	
4407100101	Coniferous; finger-jointed
4407100102	Coniferous; except finger-jointed; ‘treated’
4407100168	Coniferous; except finger-jointed; not ‘treated;’ Western Red Cedar ( <i>Thuja Plicata</i> ); ‘rough’
4407100169	Coniferous; except finger-jointed; not ‘treated;’ Western Red Cedar ( <i>Thuja Plicata</i> ); not ‘rough’

**Note 1:** *4403 heading in the Schedule B 2014 pertains to “wood in the rough, whether or not stripped of bark or sapwood, or roughly squared (not including lumber of heading 4407).”*

**Note 2:** *The 6-digit Harmonized System subheading 4403.10 and the 10-digit Harmonized System code 4407.10.0102 in Schedule B 2014 state that ‘treated’ means “treated with paint, stain, creosote or other preservatives.”*

**Note 3:** *The 4407 heading in the Schedule B 2014 refers to ‘lumber’ as “wood sawn or chipped lengthwise, sliced or peeled, whether or not planed, sanded or end-jointed, of a thickness exceeding 6mm (.236 inch).”*

**Note 4:** *Section IX – Chapter 44 of Schedule B 2014, Statistical Note 3 states, “for the purpose of heading 4407, the term “rough” includes wood that has been edged, resawn, crosscut or trimmed to smaller sizes but it does not include wood that has been dressed or surfaced by planing on one or more edges or faces or has been edge-glued or end-glued.”*

**SUPPLEMENT NO. 3 TO PART 754 – [Reserved]**

including any licensing requirements and conditions, within 30 days of the date of such determination by the President. The Secretary of Commerce shall consult with the Secretary of Energy in administering the provisions of this subsection.

(5) If the Secretary of Commerce finds that exporting oil under authority of this subsection has caused sustained material oil supply shortage or sustained oil prices significantly above world market levels and further finds that these supply shortages or price increases have caused or are likely to cause sustained material adverse employment effects in the United States, the Secretary of Commerce, in consultation with the Secretary of Energy, shall recommend, and the President may take, appropriate action concerning exports of this oil, which may include modifying or revoking authority to export such oil.

(6) Administrative action under this subsection is not subject to sections 551 and 553 through 559 of title 5, United States Code.

***MINERAL LANDS LEASING ACT***  
**30 U.S.C. 185(u)**

Limitations on export

Any domestically produced crude oil transported by pipeline over rights-of-way granted pursuant to this section, except such crude oil which is either exchanged in similar quantity for convenience or increased efficiency of transportation with persons or the government of an adjacent foreign state, or which is temporarily exported for convenience or increased efficiency of transportation across parts of an adjacent foreign state and reenters the United States, shall be subject to all of the limitations and licensing requirements of the Export Administration Act of 1979 (50 U.S.C. App. 2401 and following) and, in addition, before any crude oil subject this section may be exported

under the limitations and licensing requirements and penalty and enforcement provisions of the Export Administration Act of 1979 the President must make and publish an express finding that such exports will not diminish the total quantity or quality of petroleum available to the United States, and are in the national interest and are in accord with the provisions of the Export Administration Act of 1979: *Provided*, That the President shall submit reports to the Congress containing findings made under this section, and after the date of receipt of such report Congress shall have a period of sixty calendar days, thirty days of which Congress must have been in session, to consider whether exports under the terms of this section are in the national interest. If the Congress within this time period passes a concurrent resolution of disapproval stating disagreement with the President's finding concerning the national interest, further exports made pursuant to the aforementioned Presidential finding shall cease.

***NAVAL PETROLEUM RESERVES  
 PRODUCTION ACT***  
**10 § 7430(e)**

Any petroleum produced from the naval petroleum reserves, except such petroleum which is either exchanged in similar quantities for convenience or increased efficiency of transportation with persons or the government of an adjacent foreign state, or which is temporarily exported for convenience or increased efficiency of transportation across parts of an adjacent foreign state and reenters the United States, shall be subject to all of the limitations and licensing requirements of the Export Administration Act of 1979 (50 U.S.C. App. 2401 et seq.) and, in addition, before any petroleum subject to this section may be exported under the limitations and licensing requirement and penalty and enforcement provisions of the Export Administration Act of 1979, the President must make and publish an express finding that such exports will not diminish the total quality or

quantity of petroleum available to the United States and that such exports are in the national interest and are in accord with the Export Administration Act of 1979.

***OUTER CONTINENTAL SHELF LANDS  
ACT  
43 U.S.C. 1354***

***(a) Application of Export Administration provisions***

Except as provided in subsection (d) of this section, any oil or gas produced from the outer Continental Shelf shall be subject to the requirements and provisions of the Export Administration Act of 1969. Note that the Export Administration Act of 1969, referred to in paragraphs (a) and (b) of the Supplement, terminated on September 30, 1979, pursuant to the terms of that Act.

***(b) Condition precedent to exportation; express finding by President of no increase in reliance on imported oil or gas***

Before any oil or gas subject to this section may be exported under the requirements and provisions of the Export Administration Act of 1969, the President shall make and publish an express finding that such exports will not increase reliance on imported oil or gas, are in the national interest, and are in accord with the provisions of the Export Administration Act of 1969.

***(c) Report of findings by President to Congress; joint resolution of disagreement with findings of President***

The President shall submit reports to Congress containing findings made under this section, and after the date of receipt of such reports Congress shall have a period of sixty calendar days, thirty days of which Congress must have been in session, to consider whether export under the terms of this section are in the national interest. If the Congress within such time period passes a concurrent resolution of disapproval stating disagreement with the President's finding concerning the national interest, further exports made pursuant to such Presidential findings shall cease.

***(d) Exchange or temporary exportation of oil and gas for convenience or efficiency of transportation***

The provisions of this section shall not apply to any oil or gas which is either exchanged in similar quantity for convenience or increase efficiency of transportation with persons or the government of a foreign state, or which is temporarily exported for convenience or increased efficiency of transportation across parts of an adjacent foreign state and reenters the United States, or which is exchanged or exported pursuant to an existing international agreement.

**Table of Contents**

§ 756.1 SCOPE ..... 1

**§ 756.2 APPEAL FROM AN ADMINISTRATIVE ACTION** ..... 1

§ 756.3 JUDICIAL REVIEW OF AGENCY ACTION ..... 3

**§ 756.1 SCOPE**

Section 756.2 describes the procedures applicable to appeals from administrative actions taken under the Export Administration Act (EAA) or the Export Administration Regulations (EAR). (In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C). Section 756.3 describes the procedures under which the Bureau of Industry and Security (BIS) can safeguard national security information when agency action is under judicial review.

**§ 756.2 APPEAL FROM AN ADMINISTRATIVE ACTION**

**(a) Scope**

Any person directly and adversely affected by an administrative action taken by BIS may appeal to the Under Secretary for reconsideration of that administrative action. The following types of administrative actions are not subject to the appeals procedures described in this part:

- (1) Issuance, amendment, revocation, or appeal of a regulation.** (These requests may be submitted to BIS at any time.)
- (2) Denial or probation orders, civil penalties, sanctions, or other actions under parts 764 and 766 of the EAR, except that, any appeal from an action taken under § 766.25 and any appeal from an action taken in accordance with § 766.23 to make an action taken under § 766.25 applicable**

to a related person shall be subject to the appeals procedures described in this part.

**(3)** A decision on a request to remove or modify an Entity List entry made pursuant to § 744.16 of the EAR, a decision on a request to remove or modify an Unverified List entry made pursuant to § 744.15 of the EAR, or a request to remove or modify a Military End User entry made pursuant to § 744.21(b) of the EAR.

**(4)** A decision on whether License Exception Strategic Trade Authorization (STA) is available for “600 series” “end items” pursuant to § 740.20(g) of the EAR.

**(b) Review and appeal officials**

The Under Secretary may delegate to the Deputy Under Secretary for Industry and Security or to another BIS official the authority to review and decide the appeal. In addition, the Under Secretary may designate any employee of the Department of Commerce to be an appeals coordinator to assist in the review and processing of an appeal under this part. If such employee is not an employee of BIS, such designation may be made only with the concurrence of the head of the operating unit in which that employee is employed. The responsibilities of an appeals coordinator may include presiding over informal hearings.

**(c) Appeal procedures**

**(1) Filing.** An appeal under this part must be received by the

Under Secretary for Industry and Security  
Bureau of Industry and Security  
U.S. Department of Commerce, Room 3898  
14th Street and Pennsylvania Avenue, N.W.  
Washington, DC 20230

not later than 45 days after the date appearing on the written notice of administrative action.

**(2) Content of appeal.** The appeal must include a full written statement in support of appellant's position. The appeal must include a precise statement of why the appellant believes the administrative action has a direct and adverse effect and should be reversed or modified. The Under Secretary may request additional information that would be helpful in resolving the appeal, and may accept additional submissions. The Under Secretary will not ordinarily accept any submission filed more than 30 days after the filing of the appeal or of any requested submission.

**(3) Request for informal hearing.** In addition to the written statement submitted in support of an appeal, an appellant may request, in writing, at the time an appeal is filed, an opportunity for an informal hearing. The Under Secretary may grant or deny a request for an informal hearing. Any hearings will be held in the District of Columbia unless the Under Secretary determines, based upon good cause shown, that another location would be better.

**(4) Informal hearing procedures.**

**(i) Presentations.** The Under Secretary shall provide an opportunity for the appellant to make an oral presentation based on the materials previously submitted by the appellant or made available by the Department in connection with the administrative action. The Under Secretary may require that any facts in controversy be covered by an affidavit or testimony given under oath or affirmation.

**(ii) Evidence.** The rules of evidence prevailing in courts of law do not apply, and all evidentiary material deemed by the Under Secretary to be relevant and material to the proceeding, and not unduly repetitious, will be received and considered.

**(iii) Procedural questions.** The Under Secretary has the authority to limit the number of people attending the hearing, to impose any time

or other limitations deemed reasonable, and to determine all procedural questions.

**(iv) Transcript.** A transcript of an informal hearing shall not be made, unless the Under Secretary determines that the national interest or other good cause warrants it, or the appellant requests a transcript. If the appellant requests a transcript, the appellant will be responsible for paying all expenses related to production of the transcript.

**(v) Report.** Any person designated by the Under Secretary to conduct an informal hearing shall submit a written report containing a summary of the hearing and recommend action to the Under Secretary.

**(d) Decisions**

**(1) Determination of appeals.** In addition to the documents specifically submitted in connection with the appeal, the Under Secretary shall consider any recommendations, reports, or relevant documents available to BIS in determining the appeal, but shall not be bound by any such recommendation, nor prevented from considering any other information, or consulting with any other person or groups, in making a determination. The Under Secretary may adopt any other procedures deemed necessary and reasonable for considering an appeal. The Under Secretary shall decide an appeal within a reasonable time after receipt of the appeal. The decision shall be issued to the appellant in writing and contain a statement of the reasons for the action.

**(2) Effect of the determination.** The decision of the Under Secretary shall be final.

**(e) Effect of appeal**

Acceptance and consideration of an appeal shall not affect any administrative action, pending or in effect, unless the Under Secretary, upon request

by the appellant and with opportunity for response, grants a stay.

**§ 756.3 JUDICIAL REVIEW OF AGENCY ACTION**

**(a) Definition**

For purposes of this section, the term *agency action* has the same meaning given such term in 5 U.S.C. 551(13), *i.e.*, includes the whole or a part of an agency rule, order, license, sanction, relief, or the equivalent or denial thereof, or failure to act.

**(b) Classified national security information**

In any judicial review of any agency action under the EAR, if such action was based in whole or in part on classified national security information as defined in Executive Order 13526 (December 29, 2009), such information may be submitted to the reviewing court *ex parte* and *in camera*. This paragraph (b) does not confer or imply any right to review in any tribunal, judicial or otherwise.

This used to say "(SED)" in an earlier version.

There are **2 types** of export transactions: "Exports" vs. "Routed Exports". Know your responsibilities in either case.

**§ 758.11 EXPORT CLEARANCE REQUIREMENTS FOR FIREARMS AND RELATED ITEMS ..... 14**

### **§ 758.1 THE ELECTRONIC EXPORT INFORMATION (EEI) FILING TO THE AUTOMATED EXPORT SYSTEM (AES)**

#### *(a) The Electronic Export Information (EEI) filing to the Automated Export System (AES)*

The EEI is used by the Bureau of Census to collect trade statistics and by the Bureau of Industry and Security for export control purposes. The EEI collects basic information such as the names and addresses of the parties to a transaction; the Export Control Classification Number (ECCN) (when required), the Schedule B number or Harmonized Tariff Schedule of the United States (HTS) number, the description, quantity and value of the items exported; and the license authority for the export. **The EEI is a statement to the United States Government that the transaction occurred as described.**

#### *(b) When is an EEI filing required to be filed in the AES*

Except when the export of items subject to the EAR is to take place electronically or in an otherwise intangible form, you must file EEI in the AES with the United States Government for items subject to the EAR, including exports by U.S. mail, in the following situations:

- (1) For all exports of items subject to the EAR that are destined to a country in Country Group E:1 or E:2 of Supplement No. 1 to Part 740 of the EAR regardless of value;
- (2) For all exports subject to the EAR that require submission of a license application, regardless of value or destination;
- (3) For all exports of 9x515 or "600 series" items enumerated or otherwise described in paragraphs .a through .x of a 9x515 or "600 series" ECCN regardless of value or destination, including exports to Canada;

(4) For all exports under license exception Strategic Trade Authorization (STA);

(5) For all exports of commodities and mass market software subject to the EAR when the value of the commodities or mass market software classified under a single Schedule B Number (or HTS) is over \$2,500, except as exempted by the Foreign Trade Regulations (FTR) in 15 CFR Part 30 and referenced in paragraph (c) of this section;

(6) For all exports of items subject to the EAR that will be transhipped through Canada to a third destination, where the export would require EEI or license if shipped directly to the final destination from the United States (see 15 CFR 30.36(b)(2) of the FTR);

(7) For all items exported under authorization Validated End-User (VEU);

(8) For all exports of tangible items subject to the EAR where parties to the transaction, as described in § 748.5(d) through (f) of the EAR, are listed on the Unverified List (Supplement No. 6 to part 744 of the EAR), regardless of value or destination; or

(9) For all exports, except for exports authorized under License Exception BAG, as set forth in §740.14 of the EAR, of items controlled under ECCNs 0A501.a or .b, shotguns with a barrel length less than 18 inches controlled under ECCN 0A502, or ammunition controlled under ECCN 0A505 except for .c, regardless of value or destination, including exports to Canada.

(10) For all exports of items on the Commerce Control List to the People's Republic of China, Russia, or Venezuela, regardless of value, unless the export may be made under the exemption listed under paragraph (c)(4) of this section.

**NOTE 1 TO PARAGRAPH (b)(10):** Paragraph (b)(10) applies to exports to Hong Kong, as this destination is considered a part of the People's

*Republic of China under the EAR, even if the AES requirements state that the destination filed in EEI is to be listed as Hong Kong.*

→ (c) Exemptions

A complete list of exemptions from the EEI filing requirement is set forth in the 15 CFR 30.35 through 30.40 of the FTR. Some of these FTR exemptions have elements in common with certain EAR license exceptions. An FTR exemption may be narrower than an EAR license exception. The following references are provided in order to direct you to the FTR exemptions that relate to EAR license exceptions:

(1) License Exception Baggage (BAG), as set forth in §740.14 of the EAR. See 15 CFR 30.37(x) of the FTR;

*Note 1 to paragraph (c)(1): See the export clearance requirements for exports of firearms controlled under ECCNs 0A501.a or .b, shotguns with a barrel length less than 18 inches controlled under ECCN 0A502, or ammunition controlled under ECCN 0A505, authorized under License Exception BAG, as set forth in §740.14 of the EAR.*

(2) License Exception Gift Parcels and Humanitarian Donations (GFT), as set forth in § 740.12 of the EAR. See 15 CFR 30.37(h) of the FTR;

(3) License Exception Aircraft and Vessels (AVS), as set forth in § 740.15 of the EAR. See 15 CFR 30.37(o) (5) of the FTR;

(4) License Exception Governments and International Organizations (GOV), as set forth in § 740.11 of the EAR. See 15 CFR 30.39 and 30.40 of the FTR;

(5) License Exception Technology and Software Under Restriction (TSR), as set forth in § 740.6 of the EAR. See 15 CFR 30.37(f) of the FTR; or

(6) License Exception Temporary Imports, Exports, and Reexports (TMP) “tools of trade”, as set forth in § 740.9(a)(1) of the EAR. See 15 CFR 30.37(b) of the FTR.

***(d) Notation on export documents for exports exempt from EEI filing requirements***

When an exemption from filing the EEI applies, the export authority (license exception or NLR) of all the items must be entered on the loading document (e.g., Cargo Declaration, manifest, bill of lading, (master) air waybill) by the person responsible for preparing the document, see 15 CFR 30.35 of the FTR. This requirement is intended to parallel the Bureau of Census requirement, so that notations as to the basis for the EEI exemption and the license authority are entered in the same place and manner (see 15 CFR 30.45(e) and (f) of the FTR for detailed requirements). The loading document must be available for inspection by government officials, along with the items, prior to lading on the carrier.

***(e) Filing the Electronic Export Information (EEI) to the AES***

The person who files the EEI to the AES must be in the United States at the time of filing. The person who transmits the EEI to the AES must be a certified AES participant in accordance with 15 CFR 30.5 of the FTR. The person who transmits EEI to the AES, whether exporter (U.S. principal party in interest) or agent, is responsible for the truth, accuracy, and completeness of the EEI, except insofar as that person can demonstrate that he or she reasonably relied on information furnished by others.

***(f) The EEI is an export control document***

The EEI is a statement to the United States Government. The EEI is an export control document as defined in Part 772 of the EAR. False statements made thereon may be a violation of § 764.2(g) of the EAR. When EEI is filed to

the AES, the filer of the EEI represents the following:

(1) Export of the items described on the EEI filing is authorized under the terms and conditions of a license issued by BIS; is in accordance with the terms and conditions of a license exception; is authorized under “NLR” as no license is required for the shipment; or is not subject to the EAR;

(2) Statements on the EEI filing are in conformity with the contents of any license issued by BIS, with the possible exception of the USPPPI and USPPPI identification blocks in routed transactions or any name change approved by BIS in writing in accordance with § 750.7(c)(2) of the EAR; and

(3) All information shown on the EEI filing is true, accurate, and complete.

***(g) Export control information on the EEI filing in AES***

For each item on the EEI filing, you must report the license authority (license number, License Exception symbol, or No License Required (NLR) designator), the Export Control Classification Number (ECCN) (when required), and the item description in the designated blocks. The item description must be stated in Commerce Control List (CCL) terms. If those terms are inadequate to meet the Bureau of Census requirements, the FTR requires that you give enough additional detail to permit verification of the Schedule B Number (or Harmonized Tariff Schedule of the United States (HTS) number). See 15 CFR Part 30, Appendix B, Part III of the FTR for license codes.

(1) **Exports under a license.** When exporting under the authority of a license, you must report on the EEI filing to the AES the license code that corresponds to the license, license number, the ECCN, and an item description identical to the item description on the license.

Read this paragraph re AES/EEI filings carefully, and note two cases:

- "NLR" + "Subject to the EAR" but "No ECCN applies" = EAR99
- "ECCN applies" but "no license requirement"

## Export Clearance Requirements and Authorities

Part 758-page 4

**(2) Exports under a license exception.** You must report on any required EEI filing to the AES the ECCN and the correct License Exception symbol (e.g., LVS, GBS, CIV) for the License Exception(s) and the license code/license exception code that corresponds to the license exception under which you are exporting. **Items temporarily in the United States meeting the provisions of License Exception TMP, under § 740.9(b)(3), are exempted from entering the ECCN. See also § 740.1(d) of the EAR.**

**(3) No License Required (NLR) exports.** You must report on any required EEI filing to the AES the correct license code/license exception code when using the "NLR" designation for the items that are subject to the EAR but not listed on the Commerce Control List (CCL) (i.e., items are designated as EAR99) (FTR license code "C33"), and when the items to be exported are listed on the CCL but are not subject to a license requirement. In addition, you must enter the correct ECCN on any required EEI filing for all items being exported under the NLR provisions that have a reason for control other than or in addition to anti-terrorism (AT), unless the items are destined to China, Russia, or Venezuela. For items destined to China, Russia, or Venezuela, you must enter the correct ECCN on any required EEI filing regardless of reason for control.

**(4) Exports of firearms and related items.** This paragraph (g)(4) includes two separate requirements under paragraphs (g)(4)(i) and (ii) of this section that are used to better identify exports of certain end item firearms under the EAR. Paragraph (g)(4)(i) of this section is limited to certain EAR authorizations. Paragraph (g)(4)(ii) of this section applies to all EAR authorizations that require EEI filing in AES.

**(i) Identifying end item firearms by manufacturer, model, caliber, and serial number in the EEI filing in AES.** For any export authorized under License Exception TMP or a BIS license authorizing a temporary export of items controlled under ECCNs 0A501.a or .b,

or shotguns with a barrel length less than 18 inches controlled under ECCN 0A502, in addition to any other required data for the associated EEI filing, you must report the manufacturer, model, caliber, and serial number of the exported items. The requirements of this paragraph (g)(4)(i) also apply to any other export authorized under a BIS license that includes a condition or proviso on the license requiring the submission of this information specified in paragraph (g) of this section when the EEI is filed in AES.

**(ii) Identifying end item firearms by "items" level classification or other control descriptor in the EEI filing in AES.** For any export of items controlled under ECCNs 0A501.a or .b, or shotguns with a barrel length less than 18 inches controlled under ECCN 0A502, in addition to any other required data for the associated EEI filing, you must include the six character ECCN classification (i.e., 0A501.a, or 0A501.b), or for shotguns controlled under 0A502 the phrase "0A501 barrel length less than 18 inches" as the first text to appear in the Commodity description block in the EEI filing in AES. (See § 743.4(h) of the EAR for the use of this information for conventional arms reporting).

*Note 2 to paragraph (g)(4): If a commodity described in paragraph (g)(4) of this section is exported under License Exception TMP under § 740.9(a)(6) of the EAR for inspection, test, calibration, or repair is not consumed or destroyed in the normal course of authorized temporary use abroad, the commodity must be disposed of or retained in one of the ways specified in § 740.9(a)(14)(i), (ii), or (iii) of the EAR. For example, if a commodity described in paragraph (g)(4) was destroyed while being repaired after being exported under § 740.9(a)(6), the commodity described in paragraph (g)(4) would not be required to be returned. If the entity doing the repair returned a replacement of the commodity to the exporter from the United States, the import would not require an EAR authorization. The entity that*

*exported the commodity described in paragraph (g)(4) and the entity that received the commodity would need to document this as part of their recordkeeping related to this export and subsequent import to the United States.*

States Government in the manner prescribed by the Bureau of Census Foreign Trade Regulations (15 CFR Part 30).

**§ 758.2 AUTOMATED EXPORT SYSTEM (AES)**

**(h) Power of attorney or other written authorization**

In a “power of attorney” or other written authorization, authority is conferred upon an agent to perform certain specified acts or kinds of acts on behalf of a principal.

The Bureau of the Census’ Foreign Trade Regulations (FTR) (15 CFR Part 30) contain provisions for filing Electronic Export Information (EEI) using the Automated Export System (AES). In order to use AES, you must apply directly to the Bureau of the Census (Census Bureau) for certification and approval (see 15 CFR 30.5(a) of the FTR). Two electronic filing options (predeparture and postdeparture) are available for transmitting EEI. Predeparture filing requires that all information be reported in AES prior to export (15 CFR 30.4(a) and (b) of the FTR). Postdeparture filing is available only for approved companies (approved by the Census Bureau, U.S. Customs and Border Protection, and BIS) and requires no information to be transmitted prior to export with complete information reported postdeparture no later than five (5) calendar days after the date of exportation (15 CFR 30.4(c) of the FTR).

**(1)** An agent must obtain a power of attorney or other written authorization in the following circumstances:

**(a) Census Bureau’s postdeparture application process**

**(i)** An agent that represents a foreign principal party in interest in a routed transaction must obtain a power of attorney or other written authorization that sets forth his authority; and

Exporters, or agents applying on behalf of an exporter, may apply for postdeparture privileges by submitting a Letter of Intent to the Bureau of Census (Census Bureau) in accordance with 15 CFR 30.5(a) of the FTR. The Census Bureau will distribute the Letter of Intent to BIS and other agencies participating in the postdeparture approval process. Any agency may notify the Census Bureau that an applicant has failed to meet its acceptance standards, and the Census Bureau will provide a denial letter to the applicant naming the denying agency. If the Census Bureau receives neither notification of denial, nor a request for an extension from the agency within 30 days of the date of referral of the letter of intent to the agency, the applicant is

**(ii)** An agent that applies for a license on behalf of a principal party in interest must obtain a power of attorney or other written authorization that sets forth the agent’s authority to apply for the license on behalf of the principal.

**Note 3 to paragraph (h)(1):** *The Bureau of Census Foreign Trade Regulations impose additional requirements for a power of attorney or other written authorization. See 15 CFR 30.3(f) of the FTR.*

**(2)** This requirement for a power of attorney or other written authorization is a legal requirement aimed at ensuring that the parties to a transaction negotiate and understand their responsibilities. The absence of a power of attorney or other written authorization does not prevent BIS from using other evidence to establish the existence of an agency relationship for purposes of imposing liability.

**(i) Filing the Electronic Export Information (EEI).** The EEI must be filed with the United

deemed to be approved by that agency. (15 CFR 30.5(c) of the FTR).

**(b) BIS postdeparture evaluation criteria**

BIS will consider the grounds for denial of postdeparture filing status set forth in 15 CFR 30.5(c)(1) of the FTR, as well as the additional grounds for denial set forth in this paragraph.

(1) Applicants have not been approved for postdeparture filing privileges by the Census Bureau or other agency;

(2) Any party to the export transaction is contained on BIS's Denied Party, Entity Lists, [SDN], or Unverified List;

(3) Exports are destined to a country in Country Group E:1 or E:2 (Supplement No.1 to Part 740 of the EAR);

(4) Exports are made under License Exception Strategic Trade Authorization (STA); are made under Authorization Validated End User (VEU); or are of 9x515 or "600 series" items.

(5) Exports containing items that require a BIS license or have an ECCN controlled for reasons other than Anti-Terrorism only or Encryption Items.

**(c) Contacts for assistance**

(1) For additional information on the AES in general, please contact the Foreign Trade Division, U.S. Census Bureau, (800) 549-0595, ext. 1.

(2) For information about BIS's postdeparture approval process for items subject to the EAR, contact: Director, Office of Technology Evaluation, Bureau of Industry and Security, (202) 482-4933, facsimile: (202) 482-5361.

**§ 758.3 RESPONSIBILITIES OF PARTIES TO THE TRANSACTION**

All parties that participate in transactions subject to the EAR must comply with the EAR. Parties are free to structure transactions as they wish, and to delegate functions and tasks as they deem necessary, as long as the transaction complies with the EAR. However, acting through a forwarding or other agent, or delegating or re delegating authority, does not in and of itself relieve anyone of responsibility for compliance with the EAR.

**(a) Export transactions**

The U.S. principal party in interest is the exporter, except in certain routed transactions. The exporter must determine licensing authority (License, License Exception, or NLR), and obtain the appropriate license or other authorization. The exporter may hire forwarding or other agents to perform various tasks, but doing so does not necessarily relieve the exporter of compliance responsibilities.

**(b) Routed export transactions**

All provisions of the EAR, including the end-use and end-user controls found in part 744 of the EAR, and the General Prohibitions found in part 736 of the EAR, apply to routed export transactions. The U.S. principal party in interest is the exporter and must determine licensing authority (License, License Exception, or NLR), and obtain the appropriate license or other authorization, unless the U.S. principal party in interest obtains from the foreign principal party in interest a writing wherein the foreign principal party in interest expressly assumes responsibility for determining licensing requirements and obtaining license authority, making the U.S. agent of the foreign principal party in interest the exporter for EAR purposes. One writing may cover multiple transactions between the same principals. See §748.4(a)(3) of the EAR.

See §758.3(d) on following page

**(c) Information sharing requirements**

In routed export transactions where the foreign principal party in interest assumes responsibility for determining and obtaining licensing authority, the U.S. principal party in interest must, upon request, provide the foreign principal party in interest and its forwarding or other agent with the correct Export Control Classification Number (ECCN), or with sufficient technical information to determine classification. In addition, the U.S. principal party in interest must provide the foreign principal party in interest or the foreign principal's agent any information that it knows will affect the determination of license authority, see §758.1(g) of the EAR.

**(d) Power of attorney or other written authorization**

In routed export transactions, a forwarding or other agent that represents the foreign principal party in interest, or who applies for a license on behalf of the foreign principal party in interest, must obtain a power of attorney or other written authorization from the foreign principal party in interest to act on its behalf. See §748.4(b)(2) and §758.1(h) of the EAR.

**§ 758.4 USE OF EXPORT LICENSE****(a) License valid for shipment from any port**

An export license issued by BIS authorizes exports from any port of export in the United States unless the license states otherwise. Items that leave the United States at one port, cross adjacent foreign territory, and reenter the United States at another port before being exported to a foreign country, are treated as exports from the last U.S. port of export.

**(b) Shipments against expiring license**

Any item requiring a license that has not departed from the final U.S. port of export by midnight of the expiration date on an export license may not be exported under that license unless the shipment meets the requirements of paragraphs (b)(1) or (2) of this section.

**(1) BIS grants an extension; or**

**(2) Prior to midnight on the date of expiration on the license, the items:**

**(i) Were laden aboard the vessel;**

**(ii) Were located on a pier ready for loading and not for storage, and were booked for a vessel that was at the pier ready for loading; or**

**(iii) The vessel was expected to be at the pier for loading before the license expired, but exceptional and unforeseen circumstances delayed it, and BIS or the U.S. Customs Service makes a judgment that undue hardship would result if a license extension were required.**

**(c) Reshipment of undelivered items**

If the consignee does not receive an export made under a license because the carrier failed to deliver it, the exporter may reship the same or an identical item, subject to the same limitations as to quantity and value as described on the license, to the same consignee and destination under the same license. If an item is to be reshipped to any person other than the original consignee, the shipment is considered a new export and requires a new license. Before reshipping, satisfactory evidence of the original export and of the delivery failure, together with a satisfactory explanation of the delivery failure, must be submitted by the exporter to the following address:

Operations Division  
Bureau of Industry and Security  
U.S. Department of Commerce, Room 2099B  
14th Street & Pennsylvania Avenue, NW  
Washington, D.C. 20230

**(d) Exports against license with approved name changes.**

If you are exporting against a license with approved name changes under § 750.7(c)(2) of the EAR, prior to using that export license you are required to include in the respective name field in AES (e.g., in the USPPPI name field in AES), the new name followed by the original name in this format “[new name] f.k.a. [original name].” This reporting requirement would be completed by the authorized filer of the electronic export information (EEI) in AES. Although not required, the exporter may include a copy of the BIS written response approving the non-material name changes in accordance with § 750.7(c)(2) of the EAR. If the items have already been exported against the license by the time the name changes are approved, you are not required to report this additional information in AES, but you still must follow the recordkeeping requirements in part 762 of the EAR.

**§ 758.5 CONFORMITY OF DOCUMENTS AND UNLOADING OF ITEMS****(a) Purpose**

The purpose of this section is to prevent items licensed for export from being diverted while in transit or thereafter. It also sets forth the duties of the parties when the items are unloaded in a country other than that of the ultimate consignee or end user as stated on the export license.

**(b) Conformity of documents**

When a license is issued by BIS, the information entered on related export control documents (e.g., Electronic Export Information (EEI) filing, bill of lading or air waybill) must be consistent with the license.

**(c) Issuance of the bill of lading or air waybill**

**(1) Ports in the country of the ultimate consignee or end user.** No person may issue a bill of lading or air waybill that provides for delivery of licensed items to any foreign port located outside the country of an intermediate consignee, ultimate consignee, or end user named on the BIS license and in the EEI filing.

**(2) Optional ports of unloading.**

**(i) Licensed items.** No person may issue a bill of lading or air waybill that provides for delivery of licensed items to optional ports of unloading unless all the optional ports are within the country of ultimate destination or are included on the BIS license and in the EEI filing.

**(ii) Unlicensed items.** For shipments of items that do not require a license, the exporter may designate optional ports of unloading in EEI filing and on other export control documents, so long as the optional ports are in countries to which the items could also have been exported without a license.

**(d) Delivery of items**

No person may deliver items to any country other than the country of an intermediate consignee, ultimate consignee, or end user named on the BIS license and EEI filing without prior written authorization from BIS, except for reasons beyond the control of the carrier (such as acts of God, perils of the sea, damage to the carrier, strikes, war, political disturbances or insurrection).

**(e) Procedures for unscheduled unloading**

**(1) Unloading in country where no license is required.** When items are unloaded in a country to which the items could be exported without a license issued by BIS, no notification to BIS is required. However, any persons disposing of the items must continue to comply with the terms and

conditions of any License Exception, and with any other relevant provisions of the EAR.

**(2) Unloading in a country where a license is required.**

(i) When items are unloaded in a country to which the items would require a BIS license, no person may effect delivery or entry of the items into the commerce of the country where unloaded without prior written approval from BIS. The carrier, in ensuring that the items do not enter the commerce of the country, may have to place the items in custody, or under bond or other guaranty. In addition, the carrier must inform the exporter and BIS of the unscheduled unloading in a time frame that will enable the exporter to submit its report within 10 days from the date of unscheduled unloading. The exporter must within 10 days of the unscheduled unloading report the facts to and request authorization for disposition from BIS using either: mail, fax, or E-mail. The report to BIS must include:

(A) A copy of the manifest of the diverted cargo;

(B) Identification of the place of unloading;

(C) Statement that explains why the unloading was necessary; and

(D) A proposal for disposition of the items and a request for authorization for such disposition from BIS.

**(ii) Contact information.**

U.S. Department of Commerce,  
Bureau of Industry and Security,  
Office of Exporter Services,  
Room 2099B,  
14th and Pennsylvania Avenue, NW.,  
Washington, D.C. 20230;  
phone number 202-482-0436;  
facsimile number 202-482-3322; and  
E-Mail address: [rp2@bis.doc.gov](mailto:rp2@bis.doc.gov).

**§ 758.6 DESTINATION CONTROL  
STATEMENT AND OTHER  
INFORMATION FURNISHED TO  
CONSIGNEES**

(a) The exporter must incorporate the following information as an integral part of the commercial invoice whenever items on the Commerce Control List are shipped (*i.e.*, exported in tangible form), unless the shipment (*i.e.*, the tangible export) may be made under License Exception BAG or GFT (see part 740 of the EAR) or the item is designated as EAR99:

(1) The following statement: “These items are controlled by the U.S. Government and authorized for export only to the country of ultimate destination for use by the ultimate consignee or end-user(s) herein identified. They may not be resold, transferred, or otherwise disposed of, to any other country or to any person other than the authorized ultimate consignee or end-user(s), either in their original form or after being incorporated into other items, without first obtaining approval from the U.S. government or as otherwise authorized by U.S. law and regulations” and

(2) The ECCN(s) for any 9x515 or “600 series” “items” being shipped (*i.e.*, exported in tangible form).

**Note 1 to paragraph (a).** In paragraph (a)(1), the term ‘authorized’ includes exports, reexports and transfers (in-country) designated under No License Required (NLR).

**Note 2 to paragraph (a).** The phrase ‘country of ultimate destination’ means the country specified on the commercial invoice where the ultimate consignee or end user will receive the items as an “export.”

**Note 3 to paragraph (a):** The phrase ‘or as otherwise authorized by U.S. law and

regulations' is included because the EAR contain specific exemptions from licensing (e.g., EAR license exceptions and NLR designations) and do not control the reexport of foreign-made items containing less than a de minimis amount of controlled content. See § 734.4 and Supplement No. 2 to part 748.

**(b)** [Reserved]

**§758.7 AUTHORITIES OF THE BUREAU OF INDUSTRY AND SECURITY, OFFICE OF EXPORT ENFORCEMENT (OEE)**

**(a) Actions to assure compliance with export laws and regulations**

OEE officials and any other officials of the United States designated by OEE are authorized and directed to take appropriate action to enforce the authorities granted to the Secretary under the laws and regulations of the United States, including ECRA, 13 U.S.C. 305, 22 U.S.C. 401, 50 U.S.C. 1701 *et seq.*, the EAR, and the Foreign Trade Regulations (FTR) (15 CFR Part 30). This includes, but is not limited to, assuring that:

- (1) Exports, reexports, and transfers (in-country) without a license issued by BIS are either outside the scope of the license requirements of the EAR or authorized by a license exception and comply with the terms of the license exception;
- (2) Exports, reexports, transfers (in-country) purporting to be authorized by licenses issued by BIS are, in fact, so authorized and the transaction complies with the terms of the license;
- (3) Accurate EEI filings have been made for exports as required by this part, the FTR, and other federal regulations; and
- (4) The activities of U.S. persons, wherever located, which are subject to a license requirement pursuant to § 744.6 of the EAR, are authorized by and comply with the terms of a BIS license.

**(b) Types of actions**

In carrying out the authorities granted to, and exercised by, the Secretary pursuant to ECRA, 13 U.S.C. 305, 22 U.S.C. 401, 50 U.S.C. 1701 *et seq.*, the EAR, the FTR, and other applicable laws and regulations of the United States, including the authority to control the export, reexport, and transfer (in-country) of items, in any form, subject to the jurisdiction of the United States, whether by U.S. or foreign persons; control the activities of U.S. persons, wherever located, as described in § 744.6 of the EAR; ensure compliance with export controls; monitor shipments and other means of transfer; conduct investigations; and issue orders, OEE officials and any other officials of the United States designated by OEE are authorized to take the types of enforcement actions described below.

**(1) Inspection, search, and detention of items.**

**(i) Purpose of inspection, search, and detention.** All items subject to export laws and regulations administered or enforced by the Secretary that have been, are being, or are about to be exported, reexported, or transferred (in-country) are subject to inspection, search, and detention. The scope of inspection may include, but is not limited to, item identification; technical appraisal (analysis) or both; verifying the accuracy of the EEI filing, or if there is no EEI filing, the air waybill, bill of lading or other loading document covering the item about to be exported, reexported, or transferred (in-country); and verifying the value and quantity of such item.

**(ii) Place of inspection, search, and detention.** Inspection, search, and detention may take place at any location inside or outside of the United States, to include, but not limited to, the borders of the United States, all ports of exit, the premises of freight forwarders, bonded warehouses, foreign trade zones, and manufacturing, transportation, and storage facilities.

**(iii) Technical identification.** Where, in the judgment of the official making the inspection, the item cannot be properly identified, a sample may be taken for more detailed examination or for laboratory analysis.

**(A) Obtaining samples.** The sample will be obtained by the official making the inspection in accordance with the provisions for sampling imported merchandise. The size of the sample will be the minimum representative amount necessary for identification or analysis. This will depend on such factors as the physical condition of the material (whether solid, liquid, or gas) and the size and shape of the container.

**(B) Notification.** When a sample is taken, the exporter, reexporter, or transferor, or their agent(s), and the ultimate consignee will be notified by letter from an OEE official, documenting the port of export, reexport, or other place of inspection, date of sampling, BIS license number (if any) or other authorization, invoice number, quantity of sample taken, description of item, marks and packing case numbers, and manufacturer's number for the item. A copy of the letter will be placed in the container that had been opened by the inspecting official, and a copy will be retained by the inspecting official's office.

**(C) Disposal of samples.** Samples will be disposed of in accordance with the U.S. Customs and Border Protection procedure for imported commodities.

**(2) Inspection and production of books, records, and other information.** OEE officials are authorized to require any person subject to export laws and regulations administered or enforced by the Secretary, including, but not limited to, exporters, reexporters, transferors, or their agent(s), and owners and operators of carriers or their agents, as well as intermediate consignees, ultimate consignees, and end users, and their agent(s) to produce for inspection and copying any books, records and other information, including, but not limited to, invoices, orders, letters of credit, inspection reports, technical documentation, packing lists,

shipping documents and instructions, and correspondence.

**(3) Questioning of individuals.** OEE officials are authorized to question any person, including, but not limited to, the owner or operator of a carrier and the carrier's agent(s), as well as the exporter, reexporter, transferor (in-country), or their agent(s).

**(4) Prohibiting lading.** OEE officials may prevent the lading of items on a conveyance.

**(5) Inspection, search, and detention of conveyance.** OEE officials are authorized to inspect, search, and detain any conveyance at any time to determine whether items have been, are being, or are about to be exported, reexported, or transferred (in-country). Inspection, search, and detention of a conveyance may take place at any location inside or outside of the United States, to include, but not limited to, the borders of the United States, all ports of exit, the premises of freight forwarders, bonded warehouses, foreign trade zones, and manufacturing, transportation, and storage facilities.

**(6) Seizure of property.** OEE officials are authorized to seize any property, tangible or intangible, when there is probable cause to believe that such property is subject to administrative forfeiture (nonjudicial civil forfeiture or summary forfeiture), civil judicial forfeiture, or criminal forfeiture. Seizures of property subject to forfeiture may take place at any location inside or outside of the United States, to include, but not limited to, the borders of the United States, all ports of exit, the premises of freight forwarders, bonded warehouses, foreign trade zones, and manufacturing, transportation, and storage facilities.

**(7) Administrative Forfeiture Authority.** OEE is authorized to initiate administrative forfeiture (nonjudicial civil forfeiture or summary forfeiture) proceedings and forfeit property in accordance with the procedures set forth in 18 U.S.C. 981(d) and the Customs laws (19 U.S.C. 1602 *et seq.*).

**(8) Enforcement Activity.**

(i) All BIS actions taken to implement, administer, and enforce the authorities granted to the Secretary shall be conducted pursuant to the U.S. Constitution and all applicable laws and regulations, including judicially recognized exceptions to the requirement for a search warrant under the Fourth Amendment, for example, consent of the person to be searched, exigent circumstances, searches incident to a lawful arrest, and border searches.

(ii) BIS may enter into any such agreements (e.g., memoranda of understanding) with other Federal agencies as deemed necessary by BIS to execute the authorities set forth in this part in a lawful and orderly manner.

(iii) BIS shall issue additional guidance as necessary to ensure the lawful and orderly execution of the Secretary's authorities.

(iv) Nothing in this section is intended to limit or abridge BIS law enforcement officers from exercising their lawful authority in carrying out their official duties.

**§ 758.8 RETURN OR UNLOADING OF CARGO*****(a) Carrier***

As used in this section, the term "carrier" includes a connecting or on-forwarding carrier, as well as the owner, charterer, agent, master, or any other person in possession, control, or charge of the vessel, aircraft, vehicle, or other kind of conveyance, whether such person is located in the United States or in a foreign country.

***(b) Ordering return or unloading of shipment***

In order to ensure compliance with export laws and regulations administered or enforced by the

Secretary, OEE officials, or any other official of the United States designated by OEE, may, with respect to a particular export, reexport, or transfer (in-country), order any carrier to return or unload the shipment. For the purpose of this section, furnishing a copy of the order to any person included within the definition of carrier will be sufficient notice of the order to the carrier. The carrier must, as ordered:

(1) Unload the shipment and make it available to OEE officials for search and inspection; or

(2) Return the shipment to the United States or cause it to be returned; or

(3) Unload the shipment at a port of call and take steps to assure that it is placed in custody under bond or other guaranty not to enter the commerce of any foreign country without the prior approval of BIS.

***(c) Requirements regarding shipment to be unloaded***

The provisions of §§ 758.5(d) and (e) of this part, relating to reporting, notification to BIS, and the prohibition against unauthorized delivery or entry of the item into a foreign country shall apply also when items are unloaded at a port of call, as provided in paragraph (b)(3) of this section.

***(d) Notification***

Upon discovery by any person included within the term "carrier," as defined in paragraph (a) of this section, that a violation of the export laws and regulations administered or enforced by the Secretary has occurred, is occurring, or is about to occur with respect to a shipment on board, or otherwise in the possession or control of the carrier, such person must immediately notify both:

(1) The Office of Export Enforcement at the following address: Room H-4508, U.S.

Department of Commerce, 14<sup>th</sup> Street and Constitution Ave., N.W., Washington, DC 20230, Telephone: (202) 482-1208, Facsimile: (202) 482-0964; and

(2) The person in actual possession or control of the shipment.

### **§ 758.9 OTHER APPLICABLE LAWS AND REGULATIONS**

The provisions of this part 758 apply only to exports, reexports, and transfers (in-country), as well as the activities of U.S. persons described in § 744.6 of the EAR, which are subject to the export laws and regulations administered or enforced by the Secretary. Nothing contained in this part shall relieve any person from complying with any other law of the United States or rules and regulations issued thereunder, including those governing EEI filings to AES, manifests, or any other applicable rules and regulations.

### **§ 758.10 ENTRY CLEARANCE REQUIREMENTS FOR TEMPORARY IMPORTS**

**(a) Scope.** This section specifies the temporary import entry clearance requirements for firearms “subject to the EAR” that are on the United States Munitions Import List (USMIL, 27 CFR 447.21), except for firearms “subject to the EAR” that are temporarily brought into the United States by nonimmigrant aliens under the provisions of Department of Justice regulations at 27 CFR part 478 (*See* § 740.14(e) of the EAR for information on the export of these firearms “subject to the EAR”). These firearms are controlled in ECCN 0A501.a or .b or shotguns with a barrel length less than 18 inches controlled in ECCN 0A502. Items that are temporarily exported under the EAR must have met the export clearance requirements specified in § 758.1.

(1) An authorization under the EAR is *not* required for the temporary import of “items” that are “subject to the EAR,” including for “items” “subject to the EAR” that are on the USMIL. Temporary imports of firearms described in this section must meet the entry clearance requirements specified in paragraph (b) of this section.

(2) Permanent imports are regulated by the Attorney General under the direction of the Department of Justice’s Bureau of Alcohol, Tobacco, Firearms and Explosives (see 27 CFR parts 447, 478, 479, and 555).

**(b) EAR procedures for temporary imports and subsequent exports.** To the satisfaction of U.S. Customs and Border Protection, the temporary importer must comply with the following procedures:

(1) At the time of entry into the U.S. of the temporary import:

(i) Provide one of the following statements specified in paragraph (b)(1)(i)(A), (B), or (C) of this section to U.S. Customs and Border Protection:

(A) “This shipment is being temporarily imported in accordance with the EAR. This shipment will be exported in accordance with and under the authority of License Exception TMP (15 CFR 740.9(b)(5));”

(B) “This shipment is being temporarily imported in accordance with the EAR. This shipment will be exported in accordance with and under the authority of License Exception RPL (15 CFR 740.10(b));” or

(C) “This shipment is being temporarily imported in accordance with the EAR. This shipment will be exported in accordance with and under the authority of BIS license number (provide the license number) (15 CFR 750.7(a) and 758.4);”

(ii) Provide to U.S. Customs and Border Protection an invoice or other appropriate import-related documentation (or electronic equivalents) that includes a complete list and description of the firearms being temporarily imported, including their model, make, caliber, serial numbers, quantity, and U.S. dollar value;

(iii) Provide (if temporarily imported for a trade show, exhibition, demonstration, or testing) to U.S. Customs and Border Protection the relevant invitation or registration documentation for the event and an accompanying letter that details the arrangements to maintain effective control of the firearms while they are in the United States; or

(iv) Provide (if temporarily imported for servicing or replacement) to U.S. Customs and Border Protection the name, address and contact information (telephone number and/or email) of the organization or individual in the U.S. that will be receiving the item for servicing or replacement).

*Note 1 to paragraph (b)(1): In accordance with the exclusions in License Exception TMP under § 740.9(b)(5) of the EAR, the entry clearance requirements in § 758.1(b)(9) do not permit the temporary import of: firearms controlled in ECCN 0A501.a or .b that are shipped from or manufactured in a Country Group D:5 country; or that are shipped from or manufactured in Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan (except for any firearm model controlled by 0A501 that is specified under Annex A in Supplement No. 4 to part 740 of the EAR); or shotguns with a barrel length less than 18 inches controlled in ECCN 0A502 that are shipped from or manufactured in a Country Group D:5 country, or from Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan, because of the exclusions in License Exception TMP under § 740.9(b)(5).*

*Note 2 to paragraph (b)(1): In accordance with the exclusions in License Exception RPL under § 740.10(b)(4) and Supplement No. 2 to part 748, paragraph (z), of the EAR, the entry clearance requirements in § 758.1(b)(9) do not permit the temporary import of: firearms controlled in ECCN 0A501.a or .b that are shipped from or manufactured in Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan (except for any firearm model controlled by 0A501 that is specified under Annex A in Supplement No. 4 to part 740 of the EAR); or shotguns with a barrel length less than 18 inches controlled in ECCN 0A502 that are shipped from or manufactured in Russia, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Turkmenistan, Ukraine, or Uzbekistan, because of the exclusions in License Exception RPL under § 740.10(b)(4) and Supplement No. 2 to part 748, paragraph (z), of the EAR.*

(2) At the time of export, in accordance with the U.S. Customs and Border Protection procedures, the eligible exporter, or an agent acting on the filer's behalf, must as required under § 758.1(b)(9) file the export information with CBP by filing EEI in AES, noting the applicable EAR authorization as the authority for the export, and provide, upon request by CBP, the entry document number or a copy of the CBP document under which the "item" subject to the EAR" on the USMIL was temporarily imported. See also the additional requirements in § 758.1(g)(4).

### **§ 758.11 EXPORT CLEARANCE REQUIREMENTS FOR FIREARMS AND RELATED ITEMS**

(a) *Scope.* The export clearance requirements of this section apply to all exports of commodities controlled under ECCNs 0A501.a or .b, shotguns with a barrel length less than 18 inches controlled under ECCN 0A502, or ammunition controlled under ECCN 0A505 except for .c, regardless of value or destination, including exports to Canada,

that are authorized under License Exception BAG, as set forth in §740.14 of the EAR.

**(b) Required form.** Prior to making any export described in paragraph (a) of this section, the exporter is required to submit a properly completed Department of Homeland Security, CBP Form 4457, (Certificate of Registration for Personal Effects Taken Abroad) (OMB Control Number 1651-0010), to the U.S. Customs and Border Protection (CBP), pursuant to 19 CFR 148.1, and as required by this section.

**(1) Where to obtain the form?** The CBP Certification of Registration Form 4457 can be found on the following CBP website: <https://www.cbp.gov/document/forms/form-4457-certificate-registration-personal-effects-taken-abroad>.

**(2) Required “description of articles” for firearms to be included on the CBP Form 4457.** For all exports of firearms controlled under ECCNs 0A501.a or .b, or shotguns with a barrel

length less than 18 inches controlled under ECCN 0A502, the exporter must provide to CBP the serial number, make, model, and caliber for each firearm being exported by entering this information under the “Description of Articles” field of the CBP Form 4457, Certificate of Registration for Personal Effects Taken Abroad.

**(c) Where to find additional information on the CBP Form 4457?** See the following CBP website page for additional information: [https://help.cbp.gov/app/answers/detail/a\\_id/323/~travelling-outside-of-the-u.s---temporarily-taking-a-firearm%2C-rifle%2C-gun%2C](https://help.cbp.gov/app/answers/detail/a_id/323/~travelling-outside-of-the-u.s---temporarily-taking-a-firearm%2C-rifle%2C-gun%2C).

**(d) Return of items exported pursuant to this section.** The exporter when returning with a commodity authorized under License Exception BAG and exported pursuant this section, is required to present a copy of the CBP Form 4457, Certificate of Registration for Personal Effects Taken Abroad) (OMB Control Number 1651-0010), to CBP, pursuant to 19 CFR 148.1, and as required by this section.

**§ 760.1 DEFINITIONS**

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C.

**(a) Definition of “Person”**

For purposes of this part, the term “*person*” means any individual, or any association or organization, public or private, which is organized, permanently established, resident, or registered to do business, in the United States or any foreign country. This definition of “*person*” includes both the singular and plural and, in addition, includes:

- (1) Any partnership, corporation, company, branch, or other form of association or organization, whether organized for profit or non-profit purposes;
- (2) Any government, or any department, agency, or commission of any government;
- (3) Any trade association, chamber of commerce, or labor union;
- (4) Any charitable or fraternal organization; and
- (5) Any other association or organization not specifically listed in paragraphs (a)(1) through (4) of this section.

**(b) Definition of “United States Person”**

(1) This part applies to United States persons. For purposes of this part, the term “*United States person*” means any person who is a United States resident or national, including individuals, domestic concerns, and “controlled in fact” foreign subsidiaries, affiliates, or other permanent foreign establishments of domestic concerns. This definition of “*United States*

Return to "U.S. Person" in § 772.

**Restrictive Trade Practices or Boycotts**

**Part 760—page 2**

*person*” includes both the singular and plural and, in addition, includes:

(i) The government of the United States or any department, agency, or commission thereof;

(ii) The government of any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, or any subdivision, department, agency, or commission of any such government;

(iii) Any partnership, corporation, company, association, or other entity organized under the laws of paragraph (b)(1)(i) or (ii) of this section;

(iv) Any foreign concern’s subsidiary, partnership, affiliate, branch, office, or other permanent establishment in any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States; and

(v) Any domestic concern’s foreign subsidiary, partnership, affiliate, branch, office, or other permanent foreign establishment which is controlled in fact by such domestic concern. (See paragraph (c) of this section on “Definition of “Controlled in Fact.”)

(2) The term **“domestic concern”** means any partnership, corporation, company, association, or other entity of, or organized under the laws of, any jurisdiction named in paragraph (b)(1)(i) or (ii) of this section, or any permanent domestic establishment of a foreign concern.

(3) The term **“foreign concern”** means any partnership, corporation, company, association, or other entity of, or organized under the laws of, any jurisdiction other than those named in paragraph (b)(1)(i) or (ii) of this section.

(4) The term **“United States person”** does not include an individual United States national who is resident outside the United States and who is either employed permanently or temporarily by

a non-United States person or assigned to work as an employee for, and under the direction and control of, a non-United States person.

**EXAMPLES OF “UNITED STATES PERSON”**

The following examples are intended to give guidance in determining whether a person is a “United States person.” They are illustrative, not comprehensive.

(i) U.S. bank A has a branch office in foreign country P. Such branch office is a United States person, because it is a permanent foreign establishment of a domestic concern.

(ii) Ten foreign nationals establish a manufacturing plant, A, in the United States, incorporating the plant under New York law.

A is a United States person, because it is a corporation organized under the laws of one of the states of the United States.

(iii) A, a foreign corporation, opens an office in the United States for purposes of soliciting U.S. orders. The office is not separately incorporated.

A’s U.S. office is a United States person, because it is a permanent establishment, in the United States, of a foreign concern.

(iv) A, a U.S. individual, owns stock in foreign corporation B.

A is a United States person. However, A is not a “domestic concern,” because the term “domestic concern” does not include individuals.

(v) A, a foreign national resident in the United States, is employed by B, a foreign corporation.

A is a United States person, because he is resident in the United States.

A **\*\*United States person \*\*employee of a foreign entity is \*\*presumed \*\*compromised**

"A" is a **United States person** **employee of a foreign entity** is **presumed** **compromised**

**Controlled in Fact**

#### Restrictive Trade Practices or Boycotts

Part 760—page 3

(vi) A, a foreign national, who is resident in a foreign country and is employed by a foreign corporation, makes occasional visits to the United States, for purposes of exploring business opportunities.

A is not a United States person, because he is not a United States resident or national.

(vii) A is an association of U.S. firms organized under the laws of Pennsylvania for the purpose of expanding trade.

A is a United States person, because it is an association organized under the laws of one of the states of the United States.

(viii) At the request of country Y, A, an individual employed by U.S. company B, is assigned to company C as an employee. C is a foreign company owned and controlled by country Y. A, a U.S. national who will reside in Y, has agreed to the assignment provided he is able to retain his insurance, pension, and other benefits. Accordingly, company B has agreed to keep A as an employee in order to protect his employee benefits, and company C has agreed to pay for A's salary. At all times while he works for C, A will be under C's direction and control.

A is not a United States person while under C's direction and control, because he will be resident outside the United States and assigned as an employee to a non-United States person. The arrangement designed to protect A's insurance, pension, and other benefits does not destroy his status as an employee of C so long as he is under the direction and control of C.

(ix) A, a U.S. citizen, has resided in Europe for three years, where he is a self-employed consultant for United States and foreign companies in the communications industry.

A is a United States person, because he is a U.S. national and because he is not a resident outside the United States who is employed by other than a United States person.

#### (c) Definition of "Controlled in Fact"

(1) This part applies to any domestic concern's foreign subsidiary, partnership, affiliate, branch, office, or other permanent foreign establishment which is "controlled in fact" by such domestic concern. "Control in fact" consists of the authority or ability of a domestic concern to establish the general policies or to control day-to-day operations of its foreign subsidiary, partnership, affiliate, branch, office, or other permanent foreign establishment.

(2) A foreign subsidiary or affiliate of a domestic concern will be presumed to be controlled in fact by that domestic concern, subject to rebuttal by competent evidence, when:

(i) The domestic concern beneficially owns or controls (whether directly or indirectly) more than 50 percent of the outstanding voting securities of the foreign subsidiary or affiliate;

(ii) The domestic concern beneficially owns or controls (whether directly or indirectly) 25 percent or more of the voting securities of the foreign subsidiary or affiliate, if no other person owns or controls (whether directly or indirectly) an equal or larger percentage;

(iii) The foreign subsidiary or affiliate is operated by the domestic concern pursuant to the provisions of an exclusive management contract;

(iv) A majority of the members of the board of directors of the foreign subsidiary or affiliate are also members of the comparable governing body of the domestic concern;

(v) The domestic concern has authority to appoint the majority of the members of the board of directors of the foreign subsidiary or affiliate; or

(vi) The domestic concern has authority to appoint the chief operating officer of the foreign subsidiary or affiliate.

(3) A brokerage firm or other person which holds simple record ownership of securities for the convenience of clients will not be deemed to control the securities.

(4) A domestic concern which owns, directly or indirectly, securities that are immediately convertible at the option of the holder or owner into voting securities is presumed to own or control those voting securities.

(5) A domestic concern's foreign branch office or other unincorporated permanent foreign establishment is deemed to be controlled in fact by such domestic concern under all circumstances.

#### EXAMPLES OF "CONTROLLED IN FACT"

The following examples are intended to give guidance in determining the circumstances in which a foreign subsidiary, affiliate, or other permanent foreign establishment of a domestic concern is "controlled in fact." They are illustrative, not comprehensive.

(i) Company A is incorporated in a foreign country. Fifty-one percent of the voting stock of A is owned by U.S. company B.

A is presumed to be controlled in fact by B. This presumption may be rebutted by competent evidence showing that control does not, in fact, lie with B.

(ii) Company A is incorporated in a foreign country. Ten percent of the voting stock of A is owned by U.S. company B. A has an exclusive management contract with B pursuant to which A is operated by B.

As long as such contract is in effect, A is presumed to be controlled in fact by B. This presumption may be rebutted by competent evidence showing that control does not, in fact, lie with B.

(iii) Company A is incorporated in a foreign country. Ten percent of the voting stock of A is owned by U.S. company B. A has 10 persons on its board of directors. Six of those persons are also members of the board of directors of U.S. company B.

A is presumed to be controlled in fact by B. This presumption may be rebutted by competent evidence showing that control does not, in fact, lie with B.

(iv) Company A is incorporated in a foreign country. Thirty percent of the voting securities of A is owned by U.S. company B and no other person owns or controls an equal or larger share.

A is presumed to be controlled in fact by B. This presumption may be rebutted by competent evidence showing that control does not, in fact, lie with B.

(v) Company A is incorporated in a foreign country. In A's articles of incorporation, U.S. company B has been given authority to appoint A's board of directors.

A is presumed to be controlled in fact by B. This presumption may be rebutted by competent evidence showing that control does not, in fact, lie with B.

(vi) Company A is a joint venture established in a foreign country, with equal participation by U.S. company B and foreign company C. U.S. Company B has authority to appoint A's chief operating officer.

A is presumed to be controlled in fact by B. This presumption may be rebutted by competent evidence showing that control does not, in fact, lie with B.

(vii) Same as (vi), except that B has no authority to appoint A's chief operating officer.

B is not presumed to control A, absent other facts giving rise to a presumption of control.

(viii) Company A is incorporated in a foreign country. U.S. companies B, C, and D each own 20 percent of A's voting securities and regularly cast their votes in concert.

A is presumed to be controlled in fact by B, C, and D, because these companies are acting in concert to control A.

(ix) U.S. bank B located in the United States has a branch office, A, in a foreign country. A is not separately incorporated.

A is deemed to be controlled in fact by B, because A is a branch office of a domestic concern.

(x) Company A is incorporated in a foreign country. Fifty-one percent of the voting stock of A is owned by company B, which is incorporated in another foreign country. Fifty-one percent of the voting stock of B is owned by C, a U.S. company.

Both A and B are presumed to be controlled in fact by C. The presumption of C's control over B may be rebutted by competent evidence showing that control over B does not, in fact, lie with C. The presumption of B's control over A (and thus C's control over A) may be rebutted by competent evidence showing that control over A does not, in fact, lie with B.

(xi) B, a U.S. individual, owns 51 percent of the voting securities of A, a manufacturing company incorporated and located in a foreign country.

A is not "controlled in fact" under this part, because it is not controlled by a "domestic concern."

***(d) Definition of "Activities in the Interstate or Foreign Commerce of the United States"***

**ACTIVITIES INVOLVING UNITED STATES PERSONS LOCATED IN THE UNITED STATES**

(1) For purposes of this part, the activities of a United States person located in the United States are in the interstate or foreign commerce of the United States if they involve the sale, purchase, or transfer of goods or services (including information) between:

(i) Two or more of the several States (including the District of Columbia);

(ii) Any State (including the District of Columbia) and any territory or possession of the United States;

(iii) Two or more of the territories or possessions of the United States; or

(iv) A State (including the District of Columbia), territory or possession of the United States and any foreign country.

(2) For purposes of this part, the export of goods or services from the United States and the import of goods or services into the United States are activities in United States commerce. In addition, the action of a domestic concern in specifically directing the activities of its controlled in fact foreign subsidiary, affiliate, or other permanent foreign establishment is an activity in United States commerce.

(3) Activities of a United States person located in the United States may be in United States commerce even if they are part of or ancillary to activities outside United States commerce. However, the fact that an ancillary activity is in United States commerce does not, in and of itself, mean that the underlying or related activity is in United States commerce.

(4) Hence, the action of a United States bank located in the United States in providing financing from the United States for a foreign transaction that is not in United States commerce

is nonetheless itself in United States commerce. However, the fact that the financing is in United States commerce does not, in and of itself, make the underlying foreign transaction an activity in United States commerce, even if the underlying transaction involves a foreign company that is a “United States person” within the meaning of this part.

(5) Similarly, the action of a United States person located in the United States in providing financial, accounting, legal, transportation, or other ancillary services to its controlled in fact foreign subsidiary, affiliate, or other permanent foreign establishment in connection with a foreign transaction is in United States commerce. But the provision of such ancillary services will not, in and of itself, bring the foreign transaction of such subsidiary, affiliate, or permanent foreign establishment into United States commerce.

#### ACTIVITIES OF CONTROLLED IN FACT FOREIGN SUBSIDIARIES, AFFILIATES, AND OTHER PERMANENT FOREIGN ESTABLISHMENTS

(6) Any transaction between a controlled in fact foreign subsidiary, affiliate, or other permanent foreign establishment of a domestic concern and a person located in the United States is an activity in United States commerce.

(7) Whether a transaction between such a foreign subsidiary, affiliate, or other permanent foreign establishment and a person located outside the United States is an activity in United States commerce is governed by the following rules.

#### ACTIVITIES IN UNITED STATES COMMERCE

(8) A transaction between a domestic concern’s controlled in fact foreign subsidiary, affiliate, or other permanent foreign establishment and a

person outside the United States, involving goods or services (including information but not including ancillary services) acquired from a person in the United States is in United States commerce under any of the following circumstances:

(i) If the goods or services were acquired for the purpose of filling an order from a person outside the United States;

(ii) If the goods or services were acquired for incorporation into, refining into, reprocessing into, or manufacture of another product for the purpose of filling an order from a person outside the United States;

(iii) If the goods or services were acquired for the purpose of fulfilling or engaging in any other transaction with a person outside the United States; or

(iv) If the goods were acquired and are ultimately used, without substantial alteration or modification, in filling an order from, or fulfilling or engaging in any other transaction with, a person outside the United States (whether or not the goods were originally acquired for that purpose). If the goods are indistinguishable as to origin from similar foreign-trade goods with which they have been mingled in a stockpile or inventory, the subsequent transaction involving the goods is presumed to be in United States commerce unless, at the time of filling the order, the foreign-origin inventory on hand was sufficient to fill the order.

(9) For purposes of this section, goods or services are considered to be acquired for the purpose of filling an order from or engaging in any other transaction with a person outside the United States where:

(i) They are purchased by the foreign subsidiary, affiliate, or other permanent foreign establishment upon the receipt of an order from

or on behalf of a customer with the intention that the goods or services are to go to the customer;

(ii) They are purchased by the foreign subsidiary, affiliate, or other permanent foreign establishment to meet the needs of specified customers pursuant to understandings with those customers, although not for immediate delivery; or

(iii) They are purchased by the foreign subsidiary, affiliate, or other permanent foreign establishment based on the anticipated needs of specified customers.

(10) If any non-ancillary part of a transaction between a domestic concern's controlled foreign subsidiary, affiliate, or other permanent foreign establishment and a person outside the United States is in United States commerce, the entire transaction is in United States commerce. For example, if such a foreign subsidiary is engaged in filling an order from a non-United States customer both with goods acquired from the United States and with goods acquired elsewhere, the entire transaction with that customer is in United States commerce.

#### ACTIVITIES OUTSIDE UNITED STATES COMMERCE

(11) A transaction between a domestic concern's controlled foreign subsidiary, affiliate, or other permanent foreign establishment and a person outside the United States, not involving the purchase, sale, or transfer of goods or services (including information) to or from a person in the United States, is not an activity in United States commerce.

(12) The activities of a domestic concern's controlled foreign subsidiary, affiliate, or other permanent foreign establishment with respect to goods acquired from a person in the United States are not in United States commerce where:

(i) They were acquired without reference to a specific order from or transaction with a person outside the United States; and

(ii) They were further manufactured, incorporated into, refined into, or reprocessed into another product.

(13) The activities of a domestic concern's controlled foreign subsidiary, affiliate, or other permanent foreign establishment with respect to services acquired from a person in the United States are not in United States commerce where:

(i) They were acquired without reference to a specific order from or transaction with a person outside the United States; or

(ii) They are ancillary to the transaction with the person outside the United States.

(14) For purposes of this section, services are "ancillary services" if they are provided to a controlled foreign subsidiary, affiliate, or other permanent foreign establishment primarily for its own use rather than for the use of a third person. These typically include financial, accounting, legal, transportation, and other services, whether provided by a domestic concern or an unrelated entity.

(15) Thus, the provision of the project financing by a United States bank located in the United States to a controlled foreign subsidiary unrelated to the bank is an ancillary service which will not cause the underlying transaction to be in United States commerce. By contrast, where a domestic concern, on behalf of its controlled foreign subsidiary, gives a guaranty of performance to a foreign country customer, that is a service provided to the customer and, as such, brings that subsidiary's transaction with the customer into United States commerce. Similarly, architectural or engineering services provided by a domestic concern in connection with its controlled foreign subsidiary's construction project in a third country are

services passed through to the subsidiary's customer and, as such, bring that subsidiary's foreign transaction into United States commerce.

#### GENERAL

(16) Regardless of whether the subsequent disposition of goods or services from the United States is in United States commerce, the original acquisition of goods or services from a person in the United States is an activity in United States commerce subject to this part. Thus, if a domestic concern's controlled foreign subsidiary engages in a prohibited refusal to do business in stocking its inventory with goods from the United States, that action is subject to this part whether or not subsequent sales from that inventory are.

(17) In all the above, goods and services will be considered to have been acquired from a person in the United States whether they were acquired directly or indirectly through a third party, where the person acquiring the goods or services knows or expects, at the time he places the order, that they will be delivered from the United States.

#### LETTERS OF CREDIT

(18) Implementation of a letter of credit in the United States by a United States person located in the United States, including a permanent United States establishment of a foreign concern, is an activity in United States commerce.

(19) Implementation of a letter of credit outside the United States by a United States person located outside the United States is in United States commerce where the letter of credit (a) specifies a United States address for the beneficiary, (b) calls for documents indicating shipment from the United States, or (c) calls for documents indicating that the goods are of United States origin.

(20) See §760.2(f) of this part on "Letters of Credit" to determine the circumstances in which paying, honoring, confirming, or otherwise implementing a letter of credit is covered by this part.

#### EXAMPLES OF ACTIVITIES IN THE INTERSTATE OR FOREIGN COMMERCE OF THE UNITED STATES

The following examples are intended to give guidance in determining the circumstances in which an activity is in the interstate or foreign commerce of the United States. They are illustrative, not comprehensive.

##### UNITED STATES PERSON LOCATED IN THE UNITED STATES

(i) U.S. company A exports goods from the United States to a foreign country. A's activity is in U.S. commerce, because A is exporting goods from the United States.

(ii) U.S. company A imports goods into the United States from a foreign country. A's activity is in U.S. commerce, because A is importing goods into the United States.

(iii) U.S. engineering company A supplies consulting services to its controlled foreign subsidiary, B. A's activity is in U.S. commerce, because A is exporting services from the United States.

(iv) U.S. company A supplies consulting services to foreign company B. B is unrelated to A or any other U.S. person.

A's activity is in U.S. commerce even though B, a foreign-owned company located outside the United States, is not subject to this part, because A is exporting services from the United States.

(v) Same as (iv), except A is a bank located in the United States and provides a construction loan to B.

A's activity is in U.S. commerce even though B is not subject to this part, because A is exporting financial services from the United States.

(vi) U.S. company A issues policy directives from time to time to its controlled foreign subsidiary, B, governing the conduct of B's activities with boycotting countries.

A's activity in directing the activities of its foreign subsidiary, B, is an activity in U.S. commerce.

**FOREIGN SUBSIDIARIES, AFFILIATES,  
AND OTHER PERMANENT FOREIGN  
ESTABLISHMENTS OF DOMESTIC  
CONCERNS**

(i) A, a controlled foreign subsidiary of U.S. company B, purchases goods from the United States.

A's purchase of goods from the United States is in U.S. commerce, because A is importing goods from the United States. Whether A's subsequent disposition of these goods is in U.S. commerce is irrelevant. Similarly, the fact that A purchased goods from the United States does not, in and of itself, make any subsequent disposition of those goods an activity in U.S. commerce.

(ii) A, a controlled foreign subsidiary of U.S. company B, receives an order from boycotting country Y for construction materials. A places an order with U.S. company B for the materials.

A's transaction with Y is an activity in U.S. commerce, because the materials are purchased from the United States for the purpose of filling the order from Y.

(iii) A, a controlled foreign subsidiary of U.S. company B, receives an order from boycotting country Y for construction materials. A places an order with U.S. company B for some of the

materials, and with U.S. company C, an unrelated company, for the rest of the materials.

A's transaction with Y is an activity in U.S. commerce, because the materials are purchased from the United States for the purpose of filling the order from Y. It makes no difference whether the materials are ordered from B or C.

(iv) A, a controlled foreign subsidiary of U.S. company B, is in the wholesale and retail appliance sales business. A purchases finished air conditioning units from the United States from time to time in order to stock its inventory. A's inventory is also stocked with air conditioning units purchased outside the United States. A receives an order for air conditioning units from Y, a boycotting country. The order is filled with U.S.-origin units in A's inventory.

A's transaction with Y is in U.S. commerce, because its U.S.-origin goods are resold without substantial alteration.

(v) Same as (iv), except that A is in the chemicals distribution business. Its U.S.-origin goods are mingled in inventory with foreign-origin goods.

A's sale to Y of unaltered goods from its general inventory is presumed to be in U.S. commerce unless A can show that at the time of the sale the foreign-origin inventory on hand was sufficient to cover the shipment to Y.

(vi) A, a foreign subsidiary of U.S. company B, receives an order from boycotting country Y for computers. A places an order with U.S. company B for some of the components; with U.S. company C, an unrelated company, for other components; and with foreign company D for the rest of the components. A then assembles the computers and ships them to Y.

A's transaction with Y is an activity in U.S. commerce, because some of the components are acquired from the United States for purposes of filling an order from Y.

(vii) Same as (vi), except A purchases all the components from non-U.S. sources.

A's transaction with Y is not an activity in U.S. commerce, because it involves no export of goods from the United States. It makes no difference whether the technology A uses to manufacture computers was originally acquired from its U.S. parent.

(viii) A, a controlled foreign subsidiary of U.S. company B, manufactures computers. A stocks its general components and parts inventory with purchases made at times from the United States and at times from foreign sources. A receives an order from Y, a boycotting country, for computers. A fills that order by manufacturing the computers using materials from its general inventory.

A's transaction with Y is not in U.S. commerce, because the U.S.-origin components are not acquired for the purpose of meeting the anticipated needs of specified customers in Y. It is irrelevant that A's operations may be based on U.S.-origin technology.

(ix) Same as (viii), except that in anticipation of the order from Y, A orders and receives the necessary materials from the United States.

A's transaction with Y is in U.S. commerce, because the U.S.-origin goods were acquired for the purpose of filling an anticipated order from Y.

(x) A, a controlled foreign subsidiary of U.S. company B, manufactures typewriters. It buys typewriter components both from the United States and from foreign sources. A sells its output in various places throughout the world, including boycotting country Y. Its sales to Y vary from year to year, but have averaged approximately 20 percent of sales for the past five years. A expects that its sales to Y will remain at approximately that level in the years

ahead although it has no contracts or orders from Y on hand.

A's sales of typewriters to Y are not in U.S. commerce, because the U.S. components are not acquired for the purpose of filling an order from Y. A general expectancy of future sales is not an "order" within the meaning of this section.

(xi) U.S. company A's corporate counsel provides legal advice to B, its controlled foreign subsidiary, on the applicability of this Part to B's transactions.

While provision of this legal advice is itself an activity in U.S. commerce, it does not, in and of itself, bring B's activities into U.S. commerce.

(xii) A, a controlled foreign subsidiary of U.S. company B, is in the general construction business. A enters into a contract with boycotting country Y to construct a power plant in Y. In preparing engineering drawings and specifications, A uses the advice and assistance of B.

A's transaction with Y is in U.S. commerce, because B's services are used for purposes of fulfilling the contract with Y. B's services are not ancillary services, because the engineering services in connection with construction of the power plant are part of the services ultimately provided to Y by A.

(xiii) Same as (xii), except that A gets no engineering advice or assistance from B. However, B's corporate counsel provides legal advice to A regarding the structure of the transaction. In addition, B's corporate counsel draws up the contract documents.

A's transaction with Y is not in U.S. commerce. The legal services provided to A are ancillary services, because they are not part of the services provided to Y by A in fulfillment of its contract with Y.

(xiv) A, a controlled foreign subsidiary of U.S. company B, enters into a contract to construct an apartment complex in boycotting country Y. A will fulfill its contract completely with goods and services from outside the United States. Pursuant to a provision in the contract, B guarantees A's performance of the contract.

A's transaction with Y is in U.S. commerce, because B's guaranty of A's performance involves the acquisition of services from the United States for purposes of fulfilling the transaction with Y, and those services are part of the services ultimately provided to Y.

(xv) Same as (xiv), except that the guaranty of A's performance is supplied by C, a non-U.S. person located outside the United States. However, unrelated to any particular transaction, B from time to time provides general financial, legal, and technical services to A.

A's transaction with Y is not in U.S. commerce, because the services acquired from the United States are not acquired for purposes of fulfilling the contract with Y.

(xvi) A, a foreign subsidiary of U.S. company B, has a contract with boycotting country Y to conduct oil drilling operations in that country. In conducting these operations, A from time to time seeks certain technical advice from B regarding the operation of the drilling rigs.

A's contract with Y is in U.S. commerce, because B's services are sought for purposes of fulfilling the contract with Y and are part of the services ultimately provided to Y.

(xvii) A, a controlled foreign subsidiary of U.S. company B, enters into a contract to sell typewriters to boycotting country Y. A is located in non-boycotting country P. None of the components are acquired from the United States. A engages C, a U.S. shipping company, to transport the typewriters from P to Y.

A's sales to Y are not in U.S. commerce, because in carrying A's goods, C is providing an ancillary service to A and not a service to Y.

(xviii) Same as (xvii), except that A's contract with Y calls for title to pass to Y in P. In addition, the contract calls for A to engage a carrier to make delivery to Y.

A's sales to Y are in U.S. commerce, because in carrying Y's goods, C is providing a service to A which is ultimately provided to Y.

(xix) A, a controlled foreign subsidiary of U.S. company B, has general product liability insurance with U.S. company C. Foreign-origin goods sold from time to time by A to boycotting country Y are covered by the insurance policy.

A's sales to Y are not in U.S. commerce, because the insurance provided by C is an ancillary service provided to A which is not ultimately provided to Y.

(xx) A, a controlled foreign subsidiary of U.S. company B, manufactures automobiles abroad under a license agreement with B. From time to time, A sells such goods to boycotting country Y.

A's sales to Y are not in U.S. commerce, because the rights conveyed by the license are not acquired for the specific purpose of engaging in transactions with Y.

**(e) "Intent"**

**(1)** This part prohibits a United States person from taking or knowingly agreeing to take certain specified actions with intent to comply with, further, or support an unsanctioned foreign boycott.

**(2)** A United States person has the intent to comply with, further, or support an unsanctioned foreign boycott when such a boycott is at least one of the reasons for that person's decision whether to take a particular prohibited action.

So long as that is at least one of the reasons for that person's action, a violation occurs regardless of whether the prohibited action is also taken for non-boycott reasons. Stated differently, the fact that such action was taken for legitimate business reasons does not remove that action from the scope of this part if compliance with an unsanctioned foreign boycott was also a reason for the action.

(3) Intent is a necessary element of any violation of any of the prohibitions under §760.2. It is not sufficient that one take action that is specifically prohibited by this part. It is essential that one take such action with intent to comply with, further, or support an unsanctioned foreign boycott. Accordingly, a person who inadvertently, without boycott intent, takes a prohibited action, does not commit any violation of this part.

(4) Intent in this context means the reason or purpose for one's behavior. It does not mean that one has to agree with the boycott in question or desire that it succeed or that it be furthered or supported. But it does mean that the reason why a particular prohibited action was taken must be established.

(5) Reason or purpose can be proved by circumstantial evidence. For example, if a person receives a request to supply certain boycott information, the furnishing of which is prohibited by this part, and he knowingly supplies that information in response, he clearly intends to comply with that boycott request. It is irrelevant that he may disagree with or object to the boycott itself. Information will be deemed to be furnished with the requisite intent if the person furnishing the information knows that it was sought for boycott purposes. On the other hand, if a person refuses to do business with someone who happens to be blacklisted, but the reason is because that person produces an inferior product, the requisite intent does not exist.

(6) Actions will be deemed to be taken with intent to comply with an unsanctioned foreign boycott if the person taking such action knew that such action was required or requested for boycott reasons. On the other hand, the mere absence of a business relationship with a blacklisted person or with or in a boycotted country does not indicate the existence of the requisite intent.

(7) In seeking to determine whether the requisite intent exists, all available evidence will be examined.

#### EXAMPLES OF "INTENT"

The following examples are intended to illustrate the factors which will be considered in determining whether the required intent exists. They are illustrative, not comprehensive.

(i) U.S. person A does business in boycotting country Y. In selecting firms to supply goods for shipment to Y, A chooses supplier B because B's products are less expensive and of higher quality than the comparable products of supplier C. A knows that C is blacklisted, but that is not a reason for A's selection of B.

A's choice of B rather than C is not action with intent to comply with Y's boycott, because C's blacklist status is not a reason for A's action.

(ii) Same as (i), except that A chooses B rather than C in part because C is blacklisted by Y.

Since C's blacklist status is a reason for A's choice, A's action is taken with intent to comply with Y's boycott.

(iii) U.S. person A bids on a tender issued by boycotting country Y. A inadvertently fails to notice a prohibited certification which appears in the tender document. A's bid is accepted.

A's action in bidding was not taken with intent to comply with Y's boycott, because the boycott was not a reason for A's action.

(iv) U.S. bank A engages in letter of credit transactions, in favor of U.S. beneficiaries, involving the shipments of U.S. goods to boycotting country Y. As A knows, such letters of credit routinely contain conditions requiring prohibited certifications. A fails to take reasonable steps to prevent the implementation of such letters of credit. A receives for implementation a letter of credit which in fact contains a prohibited condition but does not examine the letter of credit to determine whether it contains such a condition.

Although Y's boycott may not be a specific reason for A's action in implementing the letter of credit with a prohibited condition, all available evidence shows that A's action was taken with intent to comply with the boycott, because A knows or should know that its procedures result in compliance with the boycott.

(v) U.S. bank A engages in letter of credit transactions, in favor of U.S. beneficiaries, involving the shipment of U.S. goods to boycotting country Y. As A knows, the documentation accompanying such letters of credit sometimes contains prohibited certifications. In accordance with standard banking practices applicable to A, it does not examine such accompanying documentation. A receives a letter of credit in favor of a U.S. beneficiary. The letter of credit itself contains no prohibited conditions. However, the accompanying documentation, which A does not examine, does contain such a condition.

All available evidence shows that A's action in implementing the letter of credit was not taken with intent to comply with the boycott, because A has no affirmative obligation to go beyond applicable standard banking practices in implementing letters of credit.

(vi) A, a U.S. company, is considering opening a manufacturing facility in boycotted country X. A already has such a facility in boycotting country Y. After exploring the possibilities in X, A concludes that the market does not justify the move. A is aware that if it did open a plant in X, Y might object because of Y's boycott of X. However Y's possible objection is not a reason for A's decision not to open a plant in X.

A's decision not to proceed with the plant in X is not action with intent to comply with Y's boycott, because Y's boycott of X is not a reason for A's decision.

(vii) Same as (vi), except that after exploring the business possibilities in X, A concludes that the market does justify the move to X. However, A does not open the plant because of Y's possible objections due to Y's boycott of X.

A's decision not to proceed with the plant in X is action taken with intent to comply with Y's boycott, because Y's boycott is a reason for A's decision.

(viii) A, a U.S. chemical manufacturer, receives a "boycott questionnaire" from boycotting country Y asking, among other things, whether A has any plants located in boycotted country X. A, which has never supported Y's boycott of X, responds to Y's questionnaire, indicating affirmatively that it does have plants in X and that it intends to continue to have plants in X.

A's responding to Y's questionnaire is deemed to be action with intent to comply with Y's boycott because A knows that the questionnaire is boycott-related. It is irrelevant that A does not also wish to support Y's boycott.

(ix) U.S. company A has a manufacturing facility in boycotted country X. A receives an invitation to bid on a construction project in boycotting country Y. The invitation states that all bidders must complete a boycott questionnaire and send it in with the bid. The

questionnaire asks for information about A's business relationships with X. Regardless of whether A's bid is successful, A intends to continue its business in X undiminished and in fact is exploring and intends to continue exploring an expansion of its activities in X without regard to Y's boycott.

A may not answer the questionnaire, because, despite A's intentions with regard to its business operations in X, Y's request for completion of the questionnaire is for boycott purposes and by responding, A's action would be taken with intent to comply with Y's boycott.

## **§ 760.2 PROHIBITIONS**

### *(a) Refusals to do business*

#### PROHIBITION AGAINST REFUSALS TO DO BUSINESS

(1) No United States person may: refuse, knowingly agree to refuse, require any other person to refuse, or knowingly agree to require any other person to refuse, to do business with or in a boycotted country, with any business concern organized under the laws of a boycotted country, with any national or resident of a boycotted country, or with any other person, when such refusal is pursuant to an agreement with the boycotting country, or a requirement of the boycotting country, or a request from or on behalf of the boycotting country.

(2) Generally, a refusal to do business under this section consists of action that excludes a person or country from a transaction for boycott reasons. This includes a situation in which a United States person chooses or selects one person over another on a boycott basis or takes action to carry out another person's boycott-based selection when he knows or has reason to know that the other person's selection is boycott-based.

(3) Refusals to do business which are prohibited by this section include not only specific refusals, but also refusals implied by a course or pattern of conduct. There need not be a specific offer and refusal to constitute a refusal to do business; a refusal may occur when a United States person has a financial or commercial opportunity and declines for boycott reasons to consider or accept it.

(4) A United States person's use of either a boycott-based list of persons with whom he will not deal (a so-called "blacklist") or a boycott-based list of persons with whom he will deal (a so-called "whitelist") constitutes a refusal to do business.

(5) An agreement by a United States person to comply generally with the laws of the boycotting country with which it is doing business or an agreement that local laws of the boycotting country shall apply or govern is not, in and of itself, a refusal to do business. Nor, in and of itself, is use of a contractual clause explicitly requiring a person to assume the risk of loss of non-delivery of his products a refusal to do business with any person who will not or cannot comply with such a clause. (But see §760.4 of this part on "Evasion.")

(6) If, for boycott reasons, a United States general manager chooses one supplier over another, or enters into a contract with one supplier over another, or advises its client to do so, then the general manager's actions constitute a refusal to do business under this section. However, it is not a refusal to do business under this section for a United States person to provide management, procurement, or other pre-award services for another person so long as the provision of such pre-award services is customary for that firm (or industry of which the firm is a part), without regard to the boycotting or non-boycotting character of the countries in which they are performed, and the United States person, in providing such services, does not act to exclude a person or country from the transaction for boycott reasons, or otherwise

take actions that are boycott-based. For example, a United States person under contract to provide general management services in connection with a construction project in a boycotting country may compile lists of qualified bidders for the client if that service is a customary one and if persons who are qualified are not excluded from that list because they are blacklisted.

(7) With respect to post-award services, if a client makes a boycott-based selection, actions taken by the United States general manager or contractor to carry out the client's choice are themselves refusals to do business if the United States contractor knows or has reason to know that the client's choice was boycott-based. (It is irrelevant whether the United States contractor also provided pre-award services.) Such actions include entering into a contract with the selected supplier, notifying the supplier of the client's choice, executing a contract on behalf of the client, arranging for inspection and shipment of the supplier's goods, or taking any other action to effect the client's choice. (But see §760.3(d) on "Compliance with Unilateral Selection" as it may apply to post-award services.)

(8) An agreement is not a prerequisite to a violation of this section since the prohibition extends to actions taken pursuant not only to agreements but also to requirements of, and requests from or on behalf of, a boycotting country.

(9) Agreements under this section may be either express or implied by a course or pattern of conduct. There need not be a direct request from a boycotting country for action by a United States person to have been taken pursuant to an agreement with or requirement of a boycotting country.

(10) This prohibition, like all others, applies only with respect to a United States person's activities in the interstate or foreign commerce of the United States and only when such activities are undertaken with intent to comply

with, further, or support an unsanctioned foreign boycott. The mere absence of a business relationship with or in the boycotted country, with any business concern organized under the laws of the boycotted country, with national(s) or resident(s) of the boycotted country, or with any other person does not indicate the existence of the required intent.

#### EXAMPLES OF REFUSALS AND AGREEMENTS TO REFUSE TO DO BUSINESS

The following examples are intended to give guidance in determining the circumstances in which, in a boycott situation, a refusal to do business or an agreement to refuse to do business is prohibited. They are illustrative, not comprehensive.

#### REFUSALS TO DO BUSINESS

(i) A, a U.S. manufacturer, receives an order for its products from boycotting country Y. To fill that order, A solicits bids from U.S. companies B and C, manufacturers of components used in A's products. A does not, however, solicit bids from U.S. companies D or E, which also manufacture such components, because it knows that D and E are restricted from doing business in Y and that their products are, therefore, not importable into that country.

Company A may not refuse to solicit bids from D and E for boycott reasons, because to do so would constitute a refusal to do business with those persons.

(ii) A, a U.S. exporter, uses company B, a U.S. insurer, to insure the shipment of its goods to all its overseas customers. For the first time, A receives an order for its products from boycotting country Y. Knowing that B is on the blacklist of Y, A arranges with company C, a non-blacklisted

U.S. insurer, to insure the shipment of its goods to Y.

A's action constitutes a refusal to do business with B.

(iii) A, a U.S. exporter, purchases all its liability insurance from company B, a U.S. company that does business in boycotted country X. A wishes to expand its operations into country Y, the boycotting country. Before doing so, A decides to switch from insurer B to insurer C in anticipation of a request from Y that A sever its relations with B as a condition of doing business in Y.

A may not switch insurers for this reason, because doing so would constitute a refusal to do business with B.

(iv) U.S. company A exports goods to boycotting country Y. In selecting vessels to transport the goods to Y, A chooses only from among carriers which call at ports in Y.

A's action is not a refusal to do business with carriers which do not call at ports in Y.

(v) A, a U.S. bank with a branch office in boycotting country Y, sends representatives to boycotted country X to discuss plans for opening a branch office in X. Upon learning of these discussions, an official of the local boycott office in Y advises A's local branch manager that if A opens an office in X it will no longer be allowed to do business in Y. As a result of this notification, A decides to abandon its plans to open a branch in X.

Bank A may not abandon its plans to open a branch in X as a result of Y's notification, because doing so would constitute a refusal to do business in boycotted country X.

(vi) A, a U.S. company that manufactures office equipment, has been restricted from doing business in boycotting country Y because of its business dealings with boycotted country X. In

an effort to have itself removed from Y's blacklist, A ceases its business in X.

A's action constitutes a refusal to do business in boycotted country X.

(vii) A, a U.S. computer company, does business in boycotting country Y. A decides to explore business opportunities in boycotted country X. After careful analysis of possible business opportunities in X, A decides, solely for business reasons, not to market its products in X.

A's decision not to proceed is not a refusal to do business, because it is not based on boycott considerations. A has no affirmative obligation to do business in X.

(viii) A, a U.S. oil company with operations in boycotting country Y, has regularly purchased equipment from U.S. petroleum equipment suppliers B, C, and D, none of whom is on the blacklist of Y. Because of its satisfactory relationship with B, C, and D, A has not dealt with other suppliers, including supplier E, who is blacklisted by Y.

A's failure affirmatively to seek or secure business with blacklisted supplier E is not a refusal to do business with E.

(ix) Same as (viii), except U.S. petroleum equipment supplier E, a company on boycotting country Y's blacklist, offers to supply U.S. oil company A with goods comparable to those provided by U.S. suppliers B, C, and D. A, because it has satisfactory, established relationships with suppliers B, C, and D, does not accept supplier E's offer.

A's refusal of supplier E's offer is not a refusal to do business, because it is based solely on non-boycott considerations. A has no affirmative obligation to do business with E.

(x) A, a U.S. construction company, enters into a contract to build an office complex in

boycotting country Y. A receives bids from B and C, U.S. companies that are equally qualified suppliers of electrical cable for the project. A knows that B is blacklisted by Y and that C is not. A accepts C's bid, in part because C is as qualified as the other potential supplier and in part because C is not blacklisted.

A's decision to select supplier C instead of blacklisted supplier B is a refusal to do business, because the boycott was one of the reasons for A's decision.

(xi) A, a U.S. general contractor, has been retained to construct a highway in boycotting country Y. A circulates an invitation to bid to U.S. manufacturers of road-building equipment. One of the conditions listed in the invitation to bid is that, in order for A to obtain prompt service, suppliers will be required to maintain a supply of spare parts and a service facility in Y. A includes this condition solely for commercial reasons unrelated to the boycott. Because of this condition, however, those suppliers on Y's blacklist do not bid, since they would be unable to satisfy the parts and services requirements.

A's action is not a refusal to do business, because the contractual condition was included solely for legitimate business reasons and was not boycott-based.

(xii) Company A, a U.S. oil company, purchases drill bits from U.S. suppliers for export to boycotting country Y. In its purchase orders, A includes a provision requiring the supplier to make delivery to A's facilities in Y and providing that title to the goods does not pass until delivery has been made. As is customary under such an arrangement, the supplier bears all risks of loss, including loss from fire, theft, perils of the sea, and inability to clear customs, until title passes.

Insistence on such an arrangement does not constitute a refusal to do business, because this requirement is imposed on all suppliers whether

they are blacklisted or not. (But see §760.4 on "Evasion".)

(xiii) A, a U.S. engineering and construction company, contracts with a government agency in boycotting country Y to perform a variety of services in connection with the construction of a large industrial facility in Y. Pursuant to this contract, A analyzes the market of prospective suppliers, compiles a suggested bidders list, analyzes the bids received, and makes recommendations to the client. The client independently selects and awards the contract to supplier C for boycott reasons. All of A's services are performed without regard to Y's blacklist or any other boycott considerations, and are the type of services A provides clients in both boycotting and non-boycotting countries.

A's actions do not constitute a refusal to do business, because, in the provision of pre-award services, A has not excluded the other bidders and because A customarily provides such services to its clients.

(xiv) Same as (xiii), except that in compiling a list of prospective suppliers, A deletes suppliers he knows his client will refuse to select because they are blacklisted. A knows that including the names of blacklisted suppliers will neither enhance their chances of being selected nor provide his client with a useful service, the function for which he has been retained.

A's actions, which amount to furnishing a so-called "whitelist", constitute refusals to do business, because A's pre-award services have not been furnished without regard to boycott considerations.

(xv) A, a U.S. construction firm, provides its boycotting country client with a permissible list of prospective suppliers, B, C, D, and E. The client independently selects and awards the contract to C, for boycott reasons, and then requests A to advise C of his selection, negotiate the contract with C, arrange for the shipment,

and inspect the goods upon arrival. A knows that C was chosen by the client for boycott reasons.

A's action in complying with his client's direction is a refusal to do business, because A's post-award actions carry out his client's boycott-based decision. (Note: Whether A's action comes within the unilateral selection exception depends upon factors discussed in §760.3(d) of this part).

(xvi) Same as (xv), except that A is building the project on a turnkey basis and will retain title until completion. The client instructs A to contract only with C.

A's action in contracting with C constitutes a refusal to do business, because it is action that excludes blacklisted persons from the transaction for boycott reasons. (Note: Whether A's action comes within the unilateral selection exception depends upon factors discussed in §760.3(d) of this part).

(xvii) A, a U.S. exporter of machine tools, receives an order for drill presses from boycotting country Y. The cover letter from Y's procurement official states that A was selected over other U.S. manufacturers in part because A is not on Y's blacklist.

A's action in filling this order is not a refusal to do business, because A has not excluded anyone from the transaction.

(xviii) A, a U.S. engineering firm under contract to construct a dam in boycotting country Y, compiles, on a non-boycott basis, a list of potential heavy equipment suppliers, including information on their qualifications and prior experience. A then solicits bids from the top three firms on its list--B, C, and D--because they are the best qualified. None of them happens to be blacklisted. A does not solicit bids from E, F, or G, the next three firms on the list, one of whom is on Y's blacklist.

A's decision to solicit bids from only B, C, and D, is not a refusal to do business with any person, because the solicited bidders were not selected for boycott reasons.

(xix) U.S. bank A receives a letter of credit in favor of U.S. beneficiary B. The letter of credit requires B to certify that he is not blacklisted. B meets all other conditions of the letter of credit but refuses to certify as to his blacklist status. A refuses to pay B on the letter of credit solely because B refuses to certify as to his blacklist status.

A has refused to do business with another person pursuant to a boycott requirement or request.

(xx) U.S. bank A receives a letter of credit in favor of U.S. beneficiary B. The letter of credit requires B to provide a certification from the steamship line that the vessel carrying the goods is not blacklisted. B seeks payment from A and meets all other conditions of the letter of credit but refuses or is unable to provide the certification from the steamship line about the vessel's blacklist status. A refuses to pay B on the letter of credit solely because B cannot or will not provide the certification.

A has required another person to refuse to do business pursuant to a boycott requirement or request by insisting that B obtain such a certificate. (Either A or B may request an amendment to the letter of credit substituting a certificate of vessel eligibility, however. See Example (xxi) below).

(xxi) U.S. bank A receives a letter of credit from a bank in boycotting country Y in favor of U.S. beneficiary B. The letter of credit requires B to provide a certification from the steamship line that the vessel carrying the goods is eligible to enter the ports in Y. B seeks payment from A and meets all other conditions of the letter of credit. A refuses to pay B solely because B cannot or will not provide the certification.

A has neither refused, nor required another person to refuse, to do business with another person pursuant to a boycott requirement or request because a request for a vessel eligibility certificate to be furnished by the steamship line is not a prohibited condition. (See Supplement No. 1 to this part, paragraph (I)(B), “Shipping Certificate”.)

(xxii) U.S. bank A confirms a letter of credit in favor of U.S. beneficiary B. The letter of credit contains a requirement that B certify that he is not blacklisted. B presents the letter of credit to U.S. bank C, a correspondent of bank A. B does not present the certificate of blacklist status to bank C, but, in accordance with these rules, bank C pays B, and then presents the letter of credit and documentation to bank A for reimbursement. Bank A refuses to reimburse bank C because the blacklist certification of B is not included in the documentation.

A has required another person to refuse to do business with a person pursuant to a boycott requirement or request by insisting that C obtain the certificate from B.

(xxiii) U.S. bank A receives a letter of credit in favor of U.S. beneficiary B. The letter of credit requires B to certify that he is not blacklisted. B fails to provide such a certification when he presents the documents to A for payment. A notifies B that the certification has not been submitted.

A has not refused to do business with another person pursuant to a boycott requirement by notifying B of the omitted certificate. A may not refuse to pay on the letter of credit, however, if B states that B will not provide such a certificate.

(xxiv) U.S. bank A receives a letter of credit in favor of U.S. beneficiary B from the issuing bank for the purpose of confirmation, negotiation or payment. The letter of credit requires B to certify that he is not blacklisted. A notifies B that it is contrary to the policy of A to

handle letters of credit containing this condition and that, unless an amendment is obtained deleting this condition, A will not implement the letter of credit. A has not refused to do business with another person pursuant to a boycott requirement, because A has indicated its policy against implementing the letter of credit containing the term without regard to B’s ability or willingness to furnish such a certificate.

#### AGREEMENTS TO REFUSE TO DO BUSINESS

(i) A, a U.S. construction firm, is retained by an agency of boycotting country Y to build a primary school. The proposed contract contains a clause stating that A “may not use goods or services in the project that are produced or provided by any person restricted from having a business relationship with country Y by reason of Y’s boycott against country X”.

A’s action in entering into such a contract would constitute an agreement to refuse to do business, because it is an agreement to exclude blacklisted persons from the transaction. A may, however, renegotiate this clause so that it does not contain terms prohibited by this part.

(ii) A, a U.S. manufacturer of commercial refrigerators and freezers, receives an invitation to bid from boycotting country Y. The tender states that the bidder must agree not to deal with companies on Y’s blacklist. A does not know which companies are on the blacklist; however, A submits a bid without taking exception to the boycott conditions. A’s bid makes no commitment regarding not dealing with certain companies.

At the point when A submits its bid without taking exception to the boycott request in Y’s tender, A has agreed to refuse to do business with blacklisted persons, because the terms of Y’s tender require A to agree to refuse to do business.

(iii) A, a U.S. construction firm, is offered a contract to perform engineering and construction services in connection with a project located in boycotting country Y. The contract contains a clause stating that, in the event of a contract dispute, the laws of Y will apply.

A may enter into the contract. Agreement that the laws of boycotting country Y will control in resolving a contract dispute is not an agreement to refuse to do business.

(iv) Same as (iii), except that the contract contains a clause that A and its employees will comply with the laws of boycotting country Y. A knows that Y has a number of boycott laws.

Such an agreement is not, in and of itself, an agreement to refuse to do business. If, however, A subsequently refuses to do business with someone because of the laws of Y, A's action would be a refusal to do business.

(v) Same as (iv), except that the contract contains a clause that A and its employees will comply with the laws of boycotting country Y, "including boycott laws."

A's agreeing, without qualification, to comply with local boycott laws constitutes an agreement to refuse to do business.

(vi) Same as (v), except that A inserts a proviso "except insofar as Y's laws conflict with U.S. laws," or words to that effect. Such an agreement is not an agreement to refuse to do business.

(vii) A, a U.S. general contractor, is retained to construct a pipeline in boycotting country Y. A provision in the proposed contract stipulates that in purchasing equipment, supplies, and services A must give preference to companies located in host country Y. A may agree to this contract provision. Agreeing to a "buy local" contract provision is not an agreement to refuse to do business, because A's agreement is not made for boycott reasons.

(viii) A, a U.S. exporter planning to sell retail goods to customers in boycotting country Y, enters into a contract to purchase goods wholesale from B, a U.S. appliance manufacturer. A's contract with B includes a provision stipulating that B may not use components or services of blacklisted companies in the manufacture of its appliances.

A's contract constitutes a refusal to do business, because it would require another person, B, to refuse to do business with other persons for boycott reasons. B may not agree to such a contract, because it would be agreeing to refuse to do business with other persons for boycott reasons.

(ix) Same as (viii), except that A and B reach an implicit understanding that B will not use components or services of blacklisted companies in the manufacture of goods to be exported to Y. In the manufacture of appliances to be sold to A for export to non-boycotting countries, B uses components manufactured by blacklisted companies. The actions of both A and B constitute agreement to refuse to do business. The agreement is implied by their pattern of conduct.

(x) Boycotting country Y orders goods from U.S. company B. Y opens a letter of credit with foreign bank C in favor of B. The letter of credit specifies that negotiation of the letter of credit with a bank that appears on the country X boycott blacklist is prohibited. U.S. bank A, C's correspondent bank, advises B of the letter of credit. B presents documentation to bank A seeking to be paid on the letter of credit, without amending or otherwise taking exception to the boycott condition. B has agreed to refuse to do business with blacklisted banks because, by presenting the letter of credit for payment, B has accepted all of its terms and conditions.

*(b) Discriminatory actions*

PROHIBITIONS AGAINST TAKING

## DISCRIMINATORY ACTIONS

(1) No United States person may:

(i) Refuse to employ or otherwise discriminate against any individual who is a United States person on the basis of race, religion, sex, or national origin;

(ii) Discriminate against any corporation or other organization which is a United States person on the basis of the race, religion, sex, or national origin of any owner, officer, director, or employee of such corporation or organization;

(iii) Knowingly agree to take any of the actions described in paragraph (b)(1)(i) and (ii) of this section; or

(iv) Require or knowingly agree to require any other person to take any of the actions described in paragraph (b)(1)(i) and (ii) of this section.

(2) This prohibition shall apply whether the discriminatory action is taken by a United States person on its own or in response to an agreement with, request from, or requirement of a boycotting country. This prohibition, like all others, applies only with respect to a United States person's activities in the interstate or foreign commerce of the United States and only when such activities are undertaken with intent to comply with, further, or support an unsanctioned foreign boycott.

(3) The section does not supersede or limit the operation of the civil rights laws of the United States.

EXAMPLES OF  
DISCRIMINATORY ACTIONS

The following examples are intended to give guidance in determining the circumstances in which the taking of particular discriminatory actions is prohibited. They are illustrative, not comprehensive.

(i) U.S. construction company A is awarded a contract to build an office complex in boycotting country Y. A, believing that employees of a particular religion will not be permitted to work in Y because of Y's boycott against country X, excludes U.S. persons of that religion from consideration for employment on the project.

A's refusal to consider qualified U.S. persons of a particular religion for work on the project in Y constitutes a prohibited boycott-based discriminatory action against U.S. persons on the basis of religion.

(ii) Same as (i), except that a clause in the contract provides that "no persons of country X origin are to work on this project."

A's agreement constitutes a prohibited boycott-based agreement to discriminate against U.S. persons, among others, on the basis of national origin.

(iii) Same as (i), except that a clause in the contract provides that "no persons who are citizens, residents, or nationals of country X are to work on this project."

A's agreement does not constitute a boycott-based agreement to discriminate against U.S. persons on the basis of race, religion, sex, or national origin, because the clause requires exclusion on the basis of citizenship, residency, and nationality only.

(iv) U.S. construction company A enters into a contract to build a school in boycotting country Y. Y's representative orally tells A that no persons of country X origin are to work on the project.

A may not comply, because to do so would constitute discrimination on the basis of national origin. It makes no difference that A learned of Y's requirement orally. It makes no difference how A learns about Y's discriminatory requirement.

(v) Boycotting country Y tenders an invitation to bid on a construction project in Y. The tender requires that the successful bidder's personnel will be interviewed and that persons of a particular religious faith will not be permitted to work on the project. Y's requirement is based on its boycott of country X, the majority of whose citizens are of that particular faith.

Agreement to this provision in the tender document by a U.S. person would constitute a prohibited agreement to engage in boycott-based discrimination against U.S. persons of a particular religion.

(vi) Same as (v), except that the tender specifies that "women will not be allowed to work on this project."

Agreement to this provision in the tender by a U.S. person does not constitute a prohibited agreement to engage in boycott-based discrimination, because the restriction against employment of women is not boycott-based. Such an agreement may, however, constitute a violation of U.S. civil rights laws.

(vii) A is a U.S. investment banking firm. As a condition of participating in an underwriting of securities to be issued by boycotting country Y, A is required to exclude investment banks owned by persons of a particular faith from participation in the underwriting. Y's requirement is based on its boycott of country X, the majority of whose citizens are of that particular faith. A's agreement to such a provision constitutes a prohibited agreement to engage in boycott-based discrimination against U.S. persons on the basis of religion. Further, if A requires others to agree to such a condition, A would be acting to require another person to engage in such discrimination.

(viii) U.S. company A is asked by boycotting country Y to certify that A will not use a six-pointed star on the packaging of its products to be imported into Y. The requirement is part

of the enforcement effort by Y of its boycott against country X. A may not so certify. The six-pointed star is a religious symbol, and the certification by A that it will not use such a symbol constitutes a statement that A will not ship products made or handled by persons of that religion.

(ix) Same as (viii), except that A is asked to certify that no symbol of boycotted country X will appear on the packaging of its products imported into Y. Such a certification conveys no statement about any person's religion and, thus, does not come within this prohibition.

**(c) *Furnishing information about race, religion, sex, or national origin***

**PROHIBITION AGAINST FURNISHING INFORMATION ABOUT RACE, RELIGION, SEX, OR NATIONAL ORIGIN**

**(1) No United States person may:**

(i) Furnish information about the race, religion, sex, or national origin of any United States person;

(ii) Furnish information about the race, religion, sex, or national origin of any owner, officer, director, or employee of any corporation or other organization which is a United States person;

(iii) Knowingly agree to furnish information about the race, religion, sex, or national origin of any United States person; or

(iv) Knowingly agree to furnish information about the race, religion, sex, or national origin of any owner, officer, director, or employee of any corporation or other organization which is a United States person.

**(2) This prohibition shall apply whether the information is specifically requested or is offered voluntarily by the United States person. It shall also apply whether the information**

requested or volunteered is stated in the affirmative or the negative.

(3) Information about the place of birth of or the nationality of the parents of a United States person comes within this prohibition, as does information in the form of code words or symbols which could identify a United States person's race, religion, sex, or national origin.

(4) This prohibition, like all others, applies only with respect to a United States person's activities in the interstate or foreign commerce of the United States and only when such activities are undertaken with intent to comply with, further, or support an unsanctioned foreign boycott.

#### EXAMPLES OF THE PROHIBITION AGAINST FURNISHING DISCRIMINATORY INFORMATION

The following examples are intended to give guidance in determining the circumstances in which the furnishing of discriminatory information is prohibited. They are illustrative, not comprehensive.

(i) U.S. company A receives a boycott questionnaire from boycotting country Y asking whether it is owned or controlled by persons of a particular faith, whether it has any persons on its board of directors who are of that faith, and what the national origin of its president is. The information is sought for purposes of enforcing Y's boycott against country X, and A knows or has reason to know that the information is sought for that reason.

A may not answer the questionnaire, because A would be furnishing information about the religion and national origin of U.S. persons for purposes of complying with or supporting Y's boycott against X.

(ii) U.S. company A, located in the United States, is asked by boycotting country Y to certify that A has no persons of a particular

national origin on its board of directors. A knows that Y's purpose in asking for the certification is to enforce its boycott against country X.

A may not make such a certification, because A would be furnishing information about the national origin of U.S. persons for purposes of complying with or supporting Y's boycott against X.

(iii) U.S. company A believes that boycotting country Y will select A's bid over those of other bidders if A volunteers that it has no shareholders, officers, or directors of a particular national origin. A's belief is based on its knowledge that Y generally refuses, as part of its boycott against country X, to do business with companies owned, controlled, or managed by persons of this particular national origin.

A may not volunteer this information, because it would be furnishing information about the national origin of U.S. persons for purposes of complying with or supporting Y's boycott against X.

(iv) U.S. company A has a contract to construct an airport in boycotting country Y. Before A begins work, A is asked by Y to identify the national origin of its employees who will work on the site. A knows or has reason to know that Y is seeking this information in order to enforce its boycott against X.

A may not furnish this information, because A would be providing information about the national origin of U.S. persons for purposes of complying with or supporting Y's boycott against X.

(v) Same as (iv), except that in order to assemble its work force on site in Y, A sends visa forms to its employees and asks that the forms be returned to A for transmittal to Y's consulate or embassy. A, itself, furnishes no information about its employees, but merely transmits the visa forms back and forth.

In performing the ministerial function of transmitting visa forms, A is not furnishing information about any U.S. person's race, religion, sex, or national origin.

(vi) Same as (iv), except that A is asked by Y to certify that none of its employees in Y will be women, because Y's laws prohibit women from working.

Such a certification does not constitute a prohibited furnishing of information about any U.S. person's sex, since the reason the information is sought has nothing to do with Y's boycott of X.

(vii) U.S. company A is considering establishing an office in boycotting country Y. In order to register to do business in Y, A is asked to furnish information concerning the nationalities of its corporate officers and board of directors.

A may furnish the information about the nationalities of its officers and directors, because in so doing A would not be furnishing information about the race, religion, sex, or national origin of any U.S. person.

***(d) Furnishing information about business relationships with boycotted countries or black-listed persons***

**PROHIBITION AGAINST FURNISHING  
INFORMATION ABOUT BUSINESS  
RELATIONSHIPS WITH BOYCOTTED  
COUNTRIES OR BLACKLISTED PERSONS**

(1) No United States person may furnish or knowingly agree to furnish information concerning his or any other person's past, present or proposed business relationships:

- (i) With or in a boycotted country;
- (ii) With any business concern organized under the laws of a boycotted country;

(iii) With any national or resident of a boycotted country; or

(iv) With any other person who is known or believed to be restricted from having any business relationship with or in a boycotting country.

(2) This prohibition shall apply:

(i) Whether the information pertains to a business relationship involving a sale, purchase, or supply transaction; legal or commercial representation; shipping or other transportation transaction; insurance; investment; or any other type of business transaction or relationship; and

(ii) Whether the information is directly or indirectly requested or is furnished on the initiative of the United States person.

(3) This prohibition does not apply to the furnishing of normal business information in a commercial context. Normal business information may relate to factors such as financial fitness, technical competence, or professional experience, and may be found in documents normally available to the public such as annual reports, disclosure statements concerning securities, catalogs, promotional brochures, and trade and business handbooks. Such information may also appear in specifications or statements of experience and qualifications.

(4) Normal business information furnished in a commercial context does not cease to be such simply because the party soliciting the information may be a boycotting country or a national or resident thereof. If the information is of a type which is generally sought for a legitimate business purpose (such as determining financial fitness, technical competence, or professional experience), the information may be furnished even if the information could be used, or without the knowledge of the person supplying the information is intended to be used,

for boycott purposes. However, no information about business relationships with blacklisted persons or boycotted countries, their residents or nationals, may be furnished in response to a boycott request, even if the information is publicly available. Requests for such information from a boycott office will be presumed to be boycott-based.

(5) This prohibition, like all others, applies only with respect to a United States person's activities in the interstate or foreign commerce of the United States and only when such activities are undertaken with intent to comply with, further, or support an unsanctioned foreign boycott.

#### EXAMPLES CONCERNING FURNISHING OF INFORMATION

The following examples are intended to give guidance in determining the circumstances in which the furnishing of information is prohibited. They are illustrative, not comprehensive.

(i) U.S. contractor A is considering bidding for a contract to build a dam in boycotting country Y. The invitation to bid, which appears in a trade journal, specifies that each bidder must state that he does not have any offices in boycotted country X. A knows or has reason to know that the requirement is boycott-based.

A may not make this statement, because it constitutes information about A's business relationships with X.

(ii) U.S. contractor A is considering bidding for a contract to construct a school in boycotting country Y. Each bidder is required to submit copies of its annual report with its bid. Since A's annual report describes A's worldwide operations, including the countries in which it does business, it necessarily discloses whether A has business relations with boycotted country X. A has no reason to know that its report is being sought for boycott purposes.

A, in furnishing its annual report, is supplying ordinary business information in a commercial context.

(iii) Same as (ii), except that accompanying the invitation to bid is a questionnaire from country Y's boycott office asking each bidder to supply a copy of its annual report.

A may not furnish the annual report despite its public availability, because it would be furnishing information in response to a questionnaire from a boycott office.

(iv) U.S. company A is on boycotting country Y's blacklist. For reasons unrelated to the boycott, A terminates its business relationships with boycotted country X. In exploring other marketing areas, A determines that boycotting country Y offers great potential. A is requested to complete a questionnaire from a central boycott office which inquires about A's business relations with X.

A may not furnish the information, because it is information about A's business relationships with a boycotted country.

(v) U.S. exporter A is seeking to sell its products to boycotting country Y. A is informed by Y that, as a condition of sale, A must certify that it has no salesmen in boycotted country X. A knows or has reason to know that the condition is boycott-based.

A may not furnish the certification, because it is information about A's business relationships in a boycotted country.

(vi) U.S. engineering company A receives an invitation to bid on the construction of a dam in boycotting country Y. As a condition of the bid, A is asked to certify that it does not have any offices in boycotted country X. A is also asked to furnish plans for other dams it has designed.

A may not certify that it has no office in X, because this is information about its business relationships in a boycotted country. A may submit plans for other dams it has designed, because this is furnishing normal business information, in a commercial context, relating to A's technical competence and professional experience.

(vii) U.S. company A, in seeking to expand its exports to boycotting country Y, sends a sales representative to Y for a one week trip. During a meeting in Y with trade association representatives, A's representative desires to explain that neither A nor any companies with which A deals has any business relationship with boycotted country X. The purpose of supplying such information is to ensure that A does not get blacklisted.

A's representative may not volunteer this information even though A, for reasons unrelated to the boycott, does not deal with X, because A's representative would be volunteering information about A's business relationships with X for boycott reasons.

(viii) U.S. company A is asked by boycotting country Y to furnish information concerning its business relationships with boycotted country X. A, knowing that Y is seeking the information for boycott purposes, refuses to furnish the information asked for directly, but proposes to respond by supplying a copy of its annual report which lists the countries with which A is presently doing business. A does not happen to be doing business with X.

A may not respond to Y's request by supplying its annual report, because A knows that it would be responding to a boycott-based request for information about its business relationships with X.

(ix) U.S. company A receives a letter from a central boycott office asking A to "clarify" A's operations in boycotted country X. A intends to continue its operations in X, but fears that not

responding to the request will result in its being placed on boycotting country Y's blacklist. A knows or has reason to know that the information is sought for boycott reasons.

A may not respond to this request, because the information concerns its business relationships with a boycotted country.

(x) U.S. company A, in the course of negotiating a sale of its goods to a buyer in boycotting country Y, is asked to certify that its supplier is not on Y's blacklist.

A may not furnish the information about its supplier's blacklist status, because this is information about A's business relationships with another person who is believed to be restricted from having any business relationship with or in a boycotting country.

(xi) U.S. company A has a manufacturing plant in boycotted country X and is on boycotting country Y's blacklist. A is seeking to establish operations in Y, while expanding its operations in X. A applies to Y to be removed from Y's blacklist. A is asked, in response, to indicate whether it has manufacturing facilities in X.

A may not supply the requested information, because A would be furnishing information about its business relationships in a boycotted country.

(xii) U.S. bank A plans to open a branch office in boycotting country Y. In order to do so, A is required to furnish certain information about its business operations, including the location of its other branch offices. Such information is normally sought in other countries where A has opened a branch office, and A does not have reason to know that Y is seeking the information for boycott reasons.

A may furnish this information, even though in furnishing it A would disclose information about its business relationships in a boycotted country,

because it is being furnished in a normal business context and A does not have reason to know that it is sought for boycott reasons.

(xiii) U.S. architectural firm A responds to an invitation to submit designs for an office complex in boycotting country Y. The invitation states that all bidders must include information concerning similar types of buildings they have designed. A has not designed such buildings in boycotted country X. Clients frequently seek information of this type before engaging an architect.

A may furnish this information, because this is furnishing normal business information, in a commercial context, relating to A's technical competence and professional experience.

(xiv) U.S. oil company A distributes to potential customers promotional brochures and catalogs which give background information on A's past projects. A does not have business dealings with boycotted country X. The brochures, which are identical to those which A uses throughout the world, list those countries in which A does or has done business. In soliciting potential customers in boycotting country Y, A desires to distribute copies of its brochures.

A may do so, because this is furnishing normal business information, in a commercial context, relating to professional experience.

(xv) U.S. company A is interested in doing business with boycotting country Y. A wants to ask Y's Ministry of Trade whether, and if so why, A is on Y's blacklist or is otherwise restricted for boycott reasons from doing business with Y.

A may make this limited inquiry, because it does not constitute furnishing information.

(xvi) U.S. company A is asked by boycotting country Y to certify that it is not owned by subjects or nationals of boycotted country X and that it is not resident in boycotted country X.

A may not furnish the certification, because it is information about A's business relationships with or in a boycotted country, or with nationals of a boycotted country.

(xvii) U.S. company A, a manufacturer of certain patented products, desires to register its patents in boycotting country Y. A receives a power of attorney form required to register its patents. The form contains a question regarding A's business relationships with or in boycotted country X. A has no business relationships with X and knows or has reason to know that the information is sought for boycott reasons.

A may not answer the question, because A would be furnishing information about its business relationships with or in a boycotted country.

(xviii) U.S. company A is asked by boycotting country Y to certify that it is not the mother company, sister company, subsidiary, or branch of any blacklisted company, and that it is not in any way affiliated with any blacklisted company.

A may not furnish the certification, because it is information about whether A has a business relationship with another person who is known or believed to be restricted from having any business relationship with or in a boycotting country.

**(e) Information concerning association with charitable and fraternal organizations**

PROHIBITION AGAINST FURNISHING  
INFORMATION ABOUT ASSOCIATIONS  
WITH CHARITABLE AND FRATERNAL  
ORGANIZATIONS

(1) No United States person may furnish or knowingly agree to furnish information about whether any person is a member of, has made contributions to, or is otherwise associated with or involved in the activities of any charitable or

fraternal organization which supports a boycotted country.

(2) This prohibition shall apply whether:

(i) The information concerns association with or involvement in any charitable or fraternal organization which (a) has, as one of its stated purposes, the support of a boycotted country through financial contributions or other means, or (b) undertakes, as a major organizational activity, to offer financial or other support to a boycotted country;

(ii) The information is directly or indirectly requested or is furnished on the initiative of the United States person; or

(iii) The information requested or volunteered concerns membership in, financial contributions to, or any other type of association with or involvement in the activities of such charitable or fraternal organization.

(3) This prohibition does not prohibit the furnishing of normal business information in a commercial context as defined in paragraph (d) of this section.

(4) This prohibition, like all others, applies only with respect to a United States person's activities in the interstate or foreign commerce of the United States and only when such activities are undertaken with intent to comply with, further, or support an unsanctioned foreign boycott.

#### EXAMPLES OF PROHIBITION AGAINST FURNISHING INFORMATION ABOUT ASSOCIATIONS WITH CHARITABLE OR FRATERNAL ORGANIZATIONS

The following examples are intended to give guidance in determining the circumstances in which the furnishing of information concerning associations with charitable or fraternal organizations is prohibited. They are illustrative, not comprehensive.

(i) U.S. engineering firm A receives an invitation to bid from boycotting country Y. The invitation includes a request to supply information concerning any association which A's officers have with charitable organization B, an organization which is known by A to contribute financial support to boycotted country X. A knows or has reason to know that the information is sought for boycott reasons.

A may not furnish the information.

(ii) U.S. construction company A, in an effort to establish business dealings with boycotting country Y, proposes to furnish information to Y showing that no members of its board of directors are in any way associated with charitable organizations which support boycotted country X. A's purpose is to avoid any possibility of its being blacklisted by Y.

A may not furnish the information, because A's purpose in doing so is boycott-based. It makes no difference that no specific request for the information has been made by Y.

(iii) A, a citizen of the United States, is applying for a teaching position in a school in boycotting country Y. In connection with his application, A furnishes a resume which happens to disclose his affiliation with charitable organizations. A does so completely without reference to Y's boycott and without knowledge of any boycott requirement of Y that pertains to A's application for employment.

The furnishing of a resume by A is not a boycott-related furnishing of information about his association with charitable organizations which support boycotted country X.

#### **(f) Letters of credit**

#### PROHIBITION AGAINST IMPLEMENTING LETTERS OF CREDIT CONTAINING PROHIBITED CONDITIONS OR REQUIREMENTS

(1) No United States person may pay, honor, confirm, or otherwise implement a letter of credit which contains a condition or requirement compliance with which is prohibited by this part, nor shall any United States person, as a result of the application of this section, be obligated to pay, honor or otherwise implement such a letter of credit.

(2) For purposes of this section, “implementing” a letter of credit includes:

(i) Issuing or opening a letter of credit at the request of a customer;

(ii) Honoring, by accepting as being a valid instrument of credit, any letter of credit;

(iii) Paying, under a letter of credit, a draft or other demand for payment by the beneficiary;

(iv) Confirming a letter of credit by agreeing to be responsible for payment to the beneficiary in response to a request by the issuer;

(v) Negotiating a letter of credit by voluntarily purchasing a draft from a beneficiary and presenting such draft for reimbursement to the issuer or the confirmer of the letter of credit; and

(vi) Taking any other action to implement a letter of credit.

(3) In the standard international letter of credit transaction facilitating payment for the export of goods from the United States, a bank in a foreign country may be requested by its customer to issue a revocable or irrevocable letter of credit in favor of the United States exporter. The customer usually requires, and the letter of credit provides, that the issuing (or a confirming) bank will make payment to the beneficiary against the bank’s receipt of the documentation specified in the letter of credit. Such documentation usually includes commercial and consular invoices, a bill of

lading, and evidence of insurance, but it may also include other required certifications or documentary assurances such as the origin of the goods and information relating to the carrier or insurer of the shipment.

Banks usually will not accept drafts for payment unless the documents submitted therewith comply with the terms and conditions of the letter of credit.

(4) A United States person is not prohibited under this section from advising a beneficiary of the existence of a letter of credit in his favor, or from taking ministerial actions to dispose of a letter of credit which it is prohibited from implementing.

(5) Compliance with this section shall provide an absolute defense in any action brought to compel payment of, honoring of, or other implementation of a letter of credit, or for damages resulting from failure to pay or otherwise honor or implement the letter of credit. This section shall not otherwise relieve any person from any obligations or other liabilities he may incur under other laws or regulations, except as may be explicitly provided in this section.

#### LETTERS OF CREDIT TO WHICH THIS SECTION APPLIES

(6) This prohibition, like all others, applies only with respect to a United States person’s activities taken with intent to comply with, further, or support an unsanctioned foreign boycott. In addition, it applies only when the transaction to which the letter of credit applies is in United States commerce and the beneficiary is a United States person.

#### IMPLEMENTATION OF LETTERS OF CREDIT IN THE UNITED STATES

(7) A letter of credit implemented in the United States by a United States person located in the United States, including a permanent United

States establishment of a foreign bank, will be presumed to apply to a transaction in United States commerce and to be in favor of a United States beneficiary where the letter of credit specifies a United States address for the beneficiary. These presumptions may be rebutted by facts which could reasonably lead the bank to conclude that the beneficiary is not a United States person or that the underlying transaction is not in United States commerce.

(8) Where a letter of credit implemented in the United States by a United States person located in the United States does not specify a United States address for the beneficiary, the beneficiary will be presumed to be other than a United States person. This presumption may be rebutted by facts which could reasonably lead the bank to conclude that the beneficiary is a United States person despite the foreign address.

#### IMPLEMENTATION OF LETTERS OF CREDIT OUTSIDE THE UNITED STATES

(9) A letter of credit implemented outside the United States by a United States person located outside the United States will be presumed to apply to a transaction in United States commerce and to be in favor of a United States beneficiary where the letter of credit specifies a United States address for the beneficiary and calls for documents indicating shipment from the United States or otherwise indicating that the goods are of United States origin. These presumptions may be rebutted by facts which could reasonably lead the bank to conclude that the beneficiary is not a United States person or that the underlying transaction is not in United States commerce.

(10) Where a letter of credit implemented outside the United States by a United States person located outside the United States does not specify a United States address for the beneficiary, the beneficiary will be presumed to be other than a United States person. In addition, where such a letter of credit does not call for documents indicating shipment from the United States or otherwise indicating that the

goods are of United States origin, the transaction to which it applies will be presumed to be outside United States commerce. The presumption that the beneficiary is other than a United States person may be rebutted by facts which could reasonably lead the bank to conclude that the beneficiary is a United States person. The presumption that the transaction to which the letter of credit applies is outside United States commerce may be rebutted by facts which could reasonably lead the bank to conclude that the underlying transaction is in United States commerce.

#### EXAMPLES OF THE PROHIBITION AGAINST IMPLEMENTING LETTERS OF CREDIT

The following examples are intended to give guidance in determining the circumstances in which this section applies to the implementation of a letter of credit and in which such implementation is prohibited. They are illustrative, not comprehensive.

#### IMPLEMENTATION OF LETTERS OF CREDIT IN UNITED STATES COMMERCE

(i) A, a U.S. bank located in the United States, opens a letter of credit in the United States in favor of B, a foreign company located outside the United States. The letter of credit specifies a non-U.S. address for the beneficiary.

The beneficiary is presumed to be other than a U.S. person, because it does not have a U.S. address. The presumption may be rebutted by facts showing that A could reasonably conclude that the beneficiary is a U.S. person despite the foreign address.

(ii) A, a branch of a foreign bank located in the United States, opens a letter of credit in favor of B, a foreign company located outside the United States. The letter of credit specifies a non-U.S. address for the beneficiary.

The beneficiary is presumed to be other than a U.S. person, because it does not have a U.S. address. The presumption may be rebutted by facts showing that A could reasonably conclude that the beneficiary is a U.S. person despite the foreign address.

(iii) A, a U.S. bank branch located outside the United States, opens a letter of credit in favor of B, a person with a U.S. address. The letter of credit calls for documents indicating shipment of goods from the United States.

The letter of credit is presumed to apply to a transaction in U.S. commerce and to be in favor of a U.S. beneficiary because the letter of credit specifies a U.S. address for the beneficiary and calls for documents indicating that the goods will be shipped from the United States. These presumptions may be rebutted by facts showing that A could reasonably conclude that the beneficiary is not a U.S. person or that the underlying transaction is not in U.S. commerce.

(iv) A, a U.S. bank branch located outside the United States, opens a letter of credit which specifies a beneficiary, B, with an address outside the United States and calls for documents indicating that the goods are of U.S.-origin. A knows or has reason to know that although B has an address outside the United States, B is a U.S. person.

The letter of credit is presumed to apply to a transaction in U.S. commerce, because the letter of credit calls for shipment of U.S.-origin goods. In addition, the letter of credit is presumed to be in favor of a beneficiary who is a U.S. person, because A knows or has reason to know that the beneficiary is a U.S. person despite the foreign address.

(v) A, a U.S. bank branch located outside the United States, opens a letter of credit which specifies a beneficiary with a U.S. address. The letter of credit calls for documents indicating shipment of foreign-origin goods.

The letter of credit is presumed to be in favor of a U.S. beneficiary but to apply to a transaction outside U.S. commerce, because it calls for documents indicating shipment of foreign-origin goods. The presumption of non-U.S. commerce may be rebutted by facts showing that A could reasonably conclude that the underlying transaction involves shipment of U.S.-origin goods or goods from the United States.

#### PROHIBITION AGAINST IMPLEMENTING LETTERS OF CREDIT

(i) Boycotting country Y orders goods from U.S. company B. Y opens a letter of credit with foreign bank C in favor of B. The letter of credit specifies as a condition of payment that B certify that it does not do business with boycotted country X. Foreign bank C forwards the letter of credit it has opened to U.S. bank A for confirmation.

A may not confirm or otherwise implement this letter of credit, because it contains a condition with which a U.S. person may not comply.

(ii) Same as (i), except U.S. bank A desires to advise the beneficiary, U.S. company B, of the letter of credit.

A may do so, because advising the beneficiary of the letter of credit (including the term which prevents A from implementing it) is not implementation of the letter of credit.

(iii) Same as (i), except foreign bank C sends a telegram to U.S. bank A stating the major terms and conditions of the letter of credit. The telegram does not reflect the boycott provision. Subsequently, C mails to A documents setting forth the terms and conditions of the letter of credit, including the prohibited boycott condition.

A may not further implement the letter of credit after it receives the documents, because they reflect the prohibited boycott condition in the letter of credit. A may advise the beneficiary

and C of the existence of the letter of credit (including the boycott term), and may perform any essentially ministerial acts necessary to dispose of the letter of credit.

(iv) Same as (iii), except that U.S. company B, based in part on information received from U.S. bank A, desires to obtain an amendment to the letter of credit which would eliminate or nullify the language in the letter of credit which prevents A from paying or otherwise implementing it.

Either company B or bank A may undertake, and the other may cooperate and assist in, this endeavor. A could then pay or otherwise implement the revised letter of credit, so long as the original prohibited boycott condition is of no force or effect.

(v) Boycotting country Y requests a foreign bank in Y to open a letter of credit to effect payment for goods to be shipped by U.S. supplier B, the beneficiary of the letter of credit. The letter of credit contains prohibited boycott clauses. The foreign bank forwards a copy of the letter of credit to its branch office A, in the United States.

A may advise the beneficiary but may not implement the letter of credit, because it contains prohibited boycott conditions.

(vi) Boycotting country Y orders goods from U.S. company B. U.S. bank A is asked to implement, for the benefit of B, a letter of credit which contains a clause requiring documentation that the goods shipped are not of boycotted country X origin.

A may not implement the letter of credit with a prohibited condition, and may accept only a positive certificate of origin as satisfactory documentation. (See §760.3(c) on “Import and Shipping Document Requirements.”)

(vii) [Reserved]

(viii) B is a foreign bank located outside the United States. B maintains an account with U.S. bank A, located in the United States. A letter of credit issued by B in favor of a U.S. beneficiary provides that any negotiating bank may obtain reimbursement from A by certifying that all the terms and conditions of the letter of credit have been met and then drawing against B’s account. B notifies A by cable of the issuance of a letter of credit and the existence of reimbursement authorization; A does not receive a copy of the letter of credit.

A may reimburse any negotiating bank, even when the underlying letter of credit contains a prohibited boycott condition, because A does not know or have reason to know that the letter of credit contains a prohibited boycott condition.

(ix) Same as (viii), except that foreign bank B forwards a copy of the letter of credit to U.S. bank A, which then becomes aware of the prohibited boycott clause.

A may not thereafter reimburse a negotiating bank or in any way further implement the letter of credit, because it knows of the prohibited boycott condition.

(x) Boycotting country Y orders goods from U.S. exporter B and requests a foreign bank in Y to open a letter of credit in favor of B to cover the cost. The letter of credit contains a prohibited boycott clause. The foreign bank asks U.S. bank A to advise and confirm the letter of credit. Through inadvertence, A does not notice the prohibited clause and confirms the letter of credit. A thereafter notices the clause and then refuses to honor B’s draft against the letter of credit. B sues bank A for payment.

A has an absolute defense against the obligation to make payment under this letter of credit. (Note: Examples (ix) and (x) do not alter any other obligations or liabilities of the parties under appropriate law.)

(xi) [Reserved]

(xii) Boycotting country Y orders goods from U.S. company B. A letter of credit which contains a prohibited boycott clause is opened in favor of

B by a foreign bank in Y. The foreign bank asks U.S. bank A to advise and confirm the letter of credit, which it forwards to A.

A may advise B that it has received the letter of credit (including the boycott term), but may not confirm the letter of credit with the prohibited clause.

(xiii) Same as (xii), except U.S. bank A fails to tell B that it cannot process the letter of credit. B requests payment.

A may not pay. If the prohibited language is eliminated or nullified as the result of renegotiation, A may then pay or otherwise implement the revised letter of credit.

(xiv) U.S. bank A receives a letter of credit in favor of U.S. beneficiary B. The letter of credit requires B to certify that he is not blacklisted.

A may implement such a letter of credit, but it may not insist that the certification be furnished, because by so insisting it would be refusing to do business with a blacklisted person in compliance with a boycott.

(xv) A, a U.S. bank located in the U.S. opens a letter of credit in favor of U.S. beneficiary B for B's sale of goods to boycotting country Y. The letter of credit contains no boycott conditions, but A knows that Y customarily requires the seller of goods to certify that it has dealt with no blacklisted supplier. A, therefore, instructs B that it will not make payment under the letter of credit unless B makes such a certification.

A's action in requiring the certification from B constitutes action to require another person to refuse to do business with blacklisted persons.

(xvi) A, a U.S. bank located in the U.S., opens a letter of credit in favor of U.S. beneficiary B for B's sale of goods to boycotting country Y. The letter of credit contains no boycott conditions, but A has actual knowledge that B has agreed to supply a certification to Y that it has not dealt with blacklisted firms, as a condition of receiving the letter of credit in its favor.

A may not implement the letter of credit, because it knows that an implicit condition of the credit is a condition with which B may not legally comply.

(xvii) Boycotting country Y orders goods from U.S. company B. Y opens a letter of credit with foreign bank C in favor of B. The letter of credit includes the statement, "Do not negotiate with blacklisted banks." C forwards the letter of credit it has opened to U.S. bank A for confirmation.

A may not confirm or otherwise implement this letter of credit, because it contains a condition with which a U.S. person may not comply.

### **§ 760.3 EXCEPTIONS TO PROHIBITIONS**

#### ***(a) Import requirements of a boycotting country***

#### **COMPLIANCE WITH IMPORT REQUIREMENTS OF A BOYCOTTING COUNTRY**

(1) A United States person, in supplying goods or services to a boycotting country, or to a national or resident of a boycotting country, may comply or agree to comply with requirements of such boycotting country which prohibit the import of:

(i) Goods or services from the boycotted country;

(ii) Goods produced or services provided by any business concern organized under the laws of the boycotted country; or

(iii) Goods produced or services provided by nationals or residents of the boycotted country.

(2) A United States person may comply or agree to comply with such import requirements whether or not he has received a specific request to comply. By its terms, this exception applies only to transactions involving imports into a boycotting country. A United States person may not, under this exception, refuse on an across-the-board basis to do business with a boycotted country or a national or resident of a boycotted country.

(3) In taking action within the scope of this exception, a United States person is limited in the types of boycott-related information he can supply. (See §760.2(d) of this part on “Furnishing Information About Business Relationships with Boycotted Countries or Blacklisted Persons” and paragraph (c) of this section on “Import and Shipping Document Requirements.”)

#### EXAMPLES OF COMPLIANCE WITH IMPORT REQUIREMENTS OF A BOYCOTTING COUNTRY

The following examples are intended to give guidance in determining the circumstances in which compliance with the import requirements of a boycotting country is permissible. They are illustrative, not comprehensive.

(i) A, a U.S. manufacturer, receives an order from boycotting country Y for its products. Country X is boycotted by country Y, and the import laws of Y prohibit the importation of goods produced or manufactured in X. In filling this type of order, A would usually include some component parts produced in X.

For the purpose of filling this order, A may substitute comparable component parts in place

of parts produced in X, because the import laws of Y prohibit the importation of goods manufactured in X.

(ii) Same as (i), except that A’s contract with Y expressly provides that in fulfilling the contract A “may not include parts or components produced or manufactured in boycotted country X.”

A may agree to and comply with this contract provision, because Y prohibits the importation of goods from X. However, A may not furnish negative certifications regarding the origin of components in response to import and shipping document requirements.

(iii) A, a U.S. building contractor, is awarded a contract to construct a plant in boycotting country Y. A accepts bids on goods required under the contract, and the lowest bid is made by B, a business concern organized under the laws of X, a country boycotted by Y. Y prohibits the import of goods produced by companies organized under the laws of X.

For purposes of this contract, A may reject B’s bid and accept another, because B’s goods would be refused entry into Y because of Y’s boycott against X.

(iv) Same as (iii), except that A also rejects the low bid by B for work on a construction project in country M, a country not boycotted by Y.

This exception does not apply, because A’s action is not taken in order to comply with Y’s requirements prohibiting the import of products from boycotted country X.

(v) A, a U.S. management consulting firm, contracts to provide services to boycotting country Y. Y requests that A not employ residents or nationals of boycotted country X to provide those services.

A may agree, as a condition of the contract, not to have services furnished by nationals or residents of X, because importation of such services is prohibited by Y.

(vi) A, a U.S. company, is negotiating a contract to supply machine tools to boycotting country Y. Y insists that the contract contain a provision whereby A agrees that none of the machine tools will be produced by any business concern owned by nationals of boycotted country X, even if the business concern is organized under the laws of a non-boycotted country.

A may not agree to this provision, because it is a restriction on the import of goods produced by business concerns owned by nationals of a boycotted country even if the business concerns themselves are organized under the laws of a non-boycotted country.

***(b) Shipment of goods to a boycotting country***

**COMPLIANCE WITH REQUIREMENTS  
REGARDING THE SHIPMENT OF GOODS  
TO A BOYCOTTING COUNTRY**

(1) A United States person, in shipping goods to a boycotting country, may comply or agree to comply with requirements of that country which prohibit the shipment of goods:

(i) On a carrier of the boycotted country; or

(ii) By a route other than that prescribed by the boycotting country or the recipient of the shipment.

(2) A specific request that a United States person comply or agree to comply with requirements concerning the use of carriers of a boycotted country is not necessary if the United States person knows, or has reason to know, that the use of such carriers for shipping goods to the boycotting country is prohibited by requirements of the boycotting country. This exception applies

whether a boycotting country or the purchaser of the shipment:

(i) Explicitly states that the shipment should not pass through a port of the boycotted country; or

(ii) Affirmatively describes a route of shipment that does not include a port in the boycotted country.

(3) For purposes of this exception, the term “carrier of a boycotted country” means a carrier which flies the flag of a boycotted country or which is owned, chartered, leased, or operated by a boycotted country or by nationals or residents of a boycotted country.

**EXAMPLES OF COMPLIANCE WITH THE  
SHIPPING REQUIREMENTS  
OF A BOYCOTTING COUNTRY**

The following examples are intended to give guidance in determining the circumstances in which compliance with import and shipping document requirements of a boycotting country is permissible. They are illustrative, not comprehensive.

(i) A is a U.S. exporter from whom boycotting country Y is importing goods. Y directs that the goods not pass through a port of boycotted country X.

A may comply with Y’s shipping instructions, because they pertain to the route of shipment of goods being shipped to Y.

(ii) A, a U.S. fertilizer manufacturer, receives an order from boycotting country Y for fertilizer. Y specifies in the order that A may not ship the fertilizer on a carrier of boycotted country X.

A may comply with this request, because it pertains to the carrier of a boycotted country.

(iii) B, a resident of boycotting country Y, orders textile goods from A, a U.S. distributor, specifying that the shipment must not be made on a carrier owned or leased by nationals of boycotted country X and that the carrier must not pass through a port of country X enroute to Y.

A may comply or agree to comply with these requests, because they pertain to the shipment of goods to Y on a carrier of a boycotted country and the route such shipment will take.

(iv) Boycotting country Y orders goods from A, a U.S. retail merchant. The order specifies that the goods shipped by A “may not be shipped on a carrier registered in or owned by boycotted country X.”

A may agree to this contract provision, because it pertains to the carrier of a boycotted country.

(v) Boycotting country Y orders goods from A, a U.S. pharmaceutical company, and requests that the shipment not pass through a port of country P, which is not a country boycotted by Y.

This exception does not apply in a non-boycotting situation. A may comply with the shipping instructions of Y, because in doing so he would not violate any prohibition of this part.

(vi) Boycotting country Y orders goods from A, a U.S. manufacturer. The order specifies that goods shipped by A “must not be shipped on vessels blacklisted by country Y”.

A may not agree to comply with the this condition because it is not a restriction limited to the use of carriers of the boycotted country.

***(c) Import and shipping document requirements***

**COMPLIANCE WITH IMPORT AND SHIPPING DOCUMENT REQUIREMENTS**

**OF A BOYCOTTING COUNTRY**

(1) A United States person, in shipping goods to a boycotting country, may comply or agree to comply with import and shipping document requirements of that country, with respect to:

(i) The country or origin of the goods;

(ii) The name and nationality of the carrier;

(iii) The route of the shipment;

(iv) The name, residence, or address of the supplier of the shipment;

(v) The name, residence, or address of the provider of other services.

(2) Such information must be stated in positive, non-blacklisting, non-exclusionary terms except for information with respect to the names or nationalities of carriers or routes of shipment, which may continue to be stated in negative terms in conjunction with shipments to a boycotting country, in order to comply with precautionary requirements protecting against war risks or confiscation.

**EXAMPLES OF COMPLIANCE WITH IMPORT AND SHIPPING DOCUMENT REQUIREMENTS**

The following examples are intended to give guidance in determining the circumstances in which compliance with the import requirements of a boycotting country is permissible. They are illustrative, not comprehensive.

(i) Boycotting country Y contracts with A, a U.S. petroleum equipment manufacturer, for certain equipment. Y requires that goods being imported into Y must be accompanied by a certification that the goods being supplied did not originate in boycotted country X.

A may not supply such a certification in negative terms but may identify instead the

country of origin of the goods in positive terms only.

(ii) Same as (i), except that Y requires that the shipping documentation accompanying the goods specify the country of origin of the goods.

A may furnish the information.

(iii) [Reserved]

(iv) A, a U.S. apparel manufacturer, has contracted to sell certain of its products to B, a national of boycotting country Y. The form that must be submitted to customs officials of Y requires the shipper to certify that the goods contained in the shipment have not been supplied by “blacklisted” persons.

A may not furnish the information in negative terms but may certify, in positive terms only, the name of the supplier of the goods.

(v) Same as (iv), except the customs form requires certification that the insurer and freight forwarder used are not “blacklisted.”

(viii) Same as (vi), except that the contract requires that the shipping documents certify the name of the carrier being used.

A may, at any time, supply or agree to supply the requested documentation regarding the name of the carrier, either in negative or positive terms.

(ix) Same as (vi), except that the contract requires a certification that the carrier will not call at a port in boycotted country X before making delivery in Y.

Such a certification, which is a reasonable requirement to protect against war risks or confiscation, may be furnished at any time.

(x) Same as (vi), except that the contract requires that the shipping documents indicate the name of the insurer and freight forwarder.

A may not comply with the request but may supply a certification stating, in positive terms only, the names of the insurer and freight forwarder.

(vi) A, a U.S. petrochemical manufacturer, executes a sales contract with B, a resident of boycotting country Y. A provision of A’s contract with B requires that the bill of lading and other shipping documents contain certifications that the goods have not been shipped on a “blacklisted” carrier.

A may not agree to supply a certification that the carrier is not “blacklisted” but may certify the name of the carrier in positive terms only.

(vii) Same as (vi), except that the contract requires certification that the goods will not be shipped on a carrier which flies the flag of, or is owned, chartered, leased, or operated by boycotted country X, or by nationals or residents of X.

Such a certification, which is a reasonable requirement to protect against war risks or confiscation, may be furnished at any time.

A may comply at any time, because the statement is not required to be made in negative or blacklisting terms.

(xi) A, a U.S. exporter, is negotiating a contract to sell bicycles to boycotting country Y. Y insists that A agree to certify that the goods will not be shipped on a vessel which has ever called at a port in boycotted country X.

As distinguished from a certification that goods will not be shipped on a vessel which will call enroute at a port of boycotted country X, such a certification is not a reasonable requirement to protect against war risks or confiscation, and, hence, may not be supplied.

(xii) Same as (xi), except that Y insists that A agree to certify that the goods will not be

shipped on a carrier that is ineligible to enter Y's waters.

Such a certification, which is not a reasonable requirement to protect against war risks or confiscation may not be supplied.

*(d) Unilateral and Specific Selection*

COMPLIANCE WITH UNILATERAL AND  
SPECIFIC SELECTION

(1) A United States person may comply or agree to comply in the normal course of business with the unilateral and specific selection by a boycotting country, a national of a boycotting country, or a resident of a boycotting country (including a United States person who is a bona fide resident of a boycotting country) of carriers, insurers, suppliers of services to be performed within the boycotting country, or specific goods, provided that with respect to services, it is necessary and customary that a not insignificant part of the services be performed within the boycotting country. With respect to goods, the items, in the normal course of business, must be identifiable as to their source or origin at the

(3) In order for this exception to apply, the selection with which a United States person wishes to comply must be unilateral and specific.

(4) A "specific" selection is one which is stated in the affirmative and which specifies a particular supplier of goods or services.

(5) A "unilateral" selection is one in which the discretion in making the selection is exercised by the boycotting country buyer. If the United States person who receives a unilateral selection has provided the buyer with any boycott-based assistance (including information for purposes of helping the buyer select someone on a boycott basis), then the buyer's selection is not unilateral, and compliance with that selection by a United States person does not come within this exception.

time of their entry into the boycotting country by (a) uniqueness of design or appearance or (b) trademark, trade name, or other identification normally on the items themselves, including their packaging.

(2) This exception pertains to what is permissible for a United States person who is the recipient of a unilateral and specific selection of goods or services to be furnished by a third person. It does not pertain to whether the act of making such a selection is permitted; that question is covered, with respect to United States persons, in paragraph (g) of this section on "Compliance with Local Law." Nor does it pertain to the United States person who is the recipient of an order to supply its own goods or services. Nothing in this part prohibits or restricts a United States person from filling an order himself, even if he is selected by the buyer on a boycott basis (e.g., because he is not blacklisted), so long as he does not himself take any action prohibited by this part.

UNILATERAL AND SPECIFIC CHARACTER  
OF THE SELECTION

(6) The provision of so-called "pre-selection" or "pre-award" services, such as providing lists of qualified suppliers, subcontractors, or bidders, does not, in and of itself, destroy the unilateral character of a selection, provided such services are not boycott-based. Lists of qualified suppliers, for example, must not exclude anyone because he is blacklisted. Moreover, such services must be of the type customarily provided in similar transactions by the firm (or industry of which the firm is a part) as measured by the practice in non-boycotting as well as boycotting countries. If such services are not customarily provided in similar transactions or such services are provided in such a way as to exclude blacklisted persons from participating in a transaction or diminish their opportunity for such participation, then the services may not be provided without destroying the unilateral character of any subsequent selection.

### SELECTION TO BE MADE BY BOYCOTTING COUNTRY RESIDENT

(7) In order for this exception to be available, the unilateral and specific selection must have been made by a boycotting country, or by a national or resident of a boycotting country. Such a resident may be a United States person. For purposes of this exception, a United States person will be considered a resident of a boycotting country only if he is a bona fide resident. A United States person may be a bona fide resident of a boycotting country even if such person's residency is temporary.

(8) Factors that will be considered in determining whether a United States person is a bona fide resident of a boycotting country include:

- (i) Physical presence in the country;
- (ii) Whether residence is needed for legitimate business reasons;
- (iii) Continuity of the residency;
- (iv) Intent to maintain the residency;
- (v) Prior residence in the country;
- (vi) Size and nature of presence in the country;
- (vii) Whether the person is registered to do business or incorporated in the country;
- (viii) Whether the person has a valid work visa; and
- (ix) Whether the person has a similar presence in both boycotting and non-boycotting foreign countries in connection with similar business activities.

Note to paragraph (d)(8) of this section: No one of the factors is dispositive. All the circumstances will be examined closely to

ascertain whether there is, in fact, a bona fide residency. Residency established solely for purposes of avoidance of the application of this part, unrelated to legitimate business needs, does not constitute bona fide residency.

(9) The boycotting country resident must be the one actually making the selection. If a selection is made by a non-resident agent, parent, subsidiary, affiliate, home office or branch office of a boycotting country resident, it is not a selection by a resident within the meaning of this exception.

(10) A selection made solely by a bona fide resident and merely transmitted by another person to a United States person for execution is a selection by a bona fide resident within the meaning of this exception.

### DUTY OF INQUIRY

(11) If a United States person receives, from another person located in the United States, what may be a unilateral selection by a boycotting country customer, and knows or has reason to know that the selection is made for boycott reasons, he has a duty to inquire of the transmitting person to determine who actually made the selection. If he knows or has reason to know that the selection was made by other than a boycotting country, or a national or resident of a boycotting country, he may not comply. A course or pattern of conduct which a United States person recognizes or should recognize as consistent with boycott restrictions will create a duty to inquire.

(12) If the United States person does not know or have reason to know that the selection it receives is boycott-based, its compliance with such a selection does not offend any prohibition and this exception is not needed.

### SELECTION OF SERVICES

(13) This exception applies only to compliance with selections of certain types of suppliers of

services-carriers, insurers, and suppliers of services to be performed “within the boycotting country.” Services to be performed wholly within the United States or wholly within any country other than the boycotting country are not covered.

(14) For purposes of this part, services are to be performed “within the boycotting country” only if they are of a type which would customarily be performed by suppliers of those services within the country of the recipient of those services, and if the part of the services performed within the boycotting country is a necessary and not insignificant part of the total services performed.

(15) What is “customary and necessary” for these purposes depends on the usual practice of the supplier of the services (or the industry of which he is a part) as measured by the practice in non-boycotting as well as boycotting countries, except where such practices are instituted to accommodate this part.

#### SELECTION OF GOODS

(16) This exception applies only to compliance with selections of certain types of goods--goods that, in the normal course of business, are identifiable as to their source or origin at the time of their entry into the boycotting country. The definition of “specifically identifiable goods” is the same under this section as it is in paragraph (g) of this section on “Compliance with Local Law.”

(17) Goods “specifically identifiable” in the normal course of business are those items which at the time of their entry into a boycotting country are identifiable as to source or origin by uniqueness of design or appearance; or trademark, trade name, or other identification normally on the items themselves, including their packaging. Goods are “specifically identifiable” in the normal course of business if their source or origin is ascertainable by inspection of the items themselves, including their packaging, regardless of whether

inspection takes place. Goods are not considered to be “specifically identifiable” in the normal course of business if a trademark, trade name, or other form of identification not normally present is added to the items themselves, including their packaging, to accommodate this part.

#### GENERAL

(18) If a unilateral selection meets the conditions described in paragraph (d) of this section, the United States person receiving the unilateral selection may comply or agree to comply, even if he knows or has reason to know that the selection was boycott-based. However, no United States person may comply or agree to comply with any unilateral selection if he knows or has reason to know that the purpose of the selection is to effect discrimination against any United States person on the basis of race, religion, sex, or national origin.

#### EXAMPLES OF COMPLIANCE WITH A UNILATERAL SELECTION

The following examples are intended to give guidance in determining what constitutes a unilateral selection and the circumstances in which compliance with such a selection is permissible. They are illustrative, not comprehensive.

#### SPECIFIC AND UNILATERAL SELECTION

(i) A, a U.S. manufacturer of road-grading equipment, is asked by boycotting country Y to ship goods to Y on U.S. vessel B, a carrier which is not blacklisted by Y. A knows or has reason to know that Y’s selection of B is boycott-based.

A may comply with Y’s request, or may agree to comply as a condition of the contract, because the selection is specific and unilateral.

(ii) A, a U.S. contractor building an industrial facility in boycotting country Y is asked by B, a

resident of Y, to use C as the supplier of air conditioning equipment to be used in the facility. C is not blacklisted by country Y. A knows or has reason to know that B's request is boycott-based.

A may comply with B's request, or may agree to comply as a condition of the contract, because the selection of C is specific and unilateral.

(iii) A, a U.S. manufacturer of automotive equipment, is asked by boycotting country Y not to ship its goods to Y on U.S. carriers, B, C, or D. Carriers B, C, and D are blacklisted by boycotting country Y. A knows or has reason to know that Y's request is boycott-based.

A may not comply or agree to comply with Y's request, because no specific selection of any particular carrier has been made.

(iv) A, a U.S. exporter shipping goods ordered by boycotting country Y, is provided by Y with a list of eligible U.S. insurers from which A may choose in insuring the shipment of its goods. A knows or has reason to know that the list was compiled on a boycott basis.

A may not comply or agree to comply with Y's request that A choose from among the eligible insurers, because no specific selection of any particular insurer has been made.

(v) A, a U.S. aircraft manufacturer, is negotiating to sell aircraft to boycotting country Y. During the negotiations, Y asks A to identify the company which normally manufactures the engines for the aircraft. A responds that they are normally manufactured by U.S. engine manufacturer B. B is blacklisted by Y. In making the purchase, Y specifies that the engines for the aircraft should be supplied by U.S. engine manufacturer C.

A may comply or agree to comply with Y's selection of C, because Y's selection is unilateral and specific.

(vi) A, a U.S. construction firm, is retained by an agency of boycotting country Y to build a pipeline. Y requests A to suggest qualified engineering firms to be used on-site in the construction of the pipeline. It is customary for A, regardless of where it conducts its operations, to identify qualified engineering firms to its customers so that its customers may make their own selection of the firm to be engaged. Choice of engineering firm is customarily a prerogative of the customer. A provides a list of five engineering firms, B-F, excluding no firm because it may be blacklisted, and then confers with and gives its recommendations to Y. A recommends C, because C is the best qualified. Y then selects B, because C is blacklisted.

A may comply with Y's selection of B, because the boycott-based decision is made by Y and is unilateral and specific. Since A's pre-award services are of the kind customarily provided in these situations, and since they are provided without reference to the boycott, they do not destroy the unilateral character of Y's selection.

(vii) A, a U.S. aircraft manufacturer, has an order to supply a certain number of planes to boycotting country Y. In connection with the order, Y asks A to supply it with a list of qualified aircraft tire manufacturers so that Y can select the tires to be placed on the planes. This is a highly unusual request, since, in A's worldwide business operations, choice of tires is customarily made by the manufacturer, not the customer. Nonetheless, A supplies a list of tire manufacturers, B, C, D, and E. Y chooses tire manufacturer B because B is not blacklisted. Had A, as is customary, selected the tires, company C would have been chosen. C happens to be blacklisted, and A knows that C's blacklist status was the reason for Y's selection of B.

A's provision of a list of tire manufacturers for Y to choose from destroys the unilateral character of Y's selection, because such a pre-selection service is not customary in A's worldwide business operations.

(viii) A, a U.S. aircraft manufacturer, receives an order from U.S. company C, which is located in the United States, for the sale of aircraft to company D, a U.S. affiliate of C. D is a bona fide resident of boycotting country Y. C instructs A that “in order to avoid boycott problems,” A must use engines that are manufactured by company B, a company that is not blacklisted by Y. Engines built by B are unique in design and also bear B’s trade name.

Since A has reason to know that the selection is boycott-based, he must inquire of C whether the selection was in fact made by D. If C informs A that the selection was made by D, A may comply.

(ix) Same as (viii), except that C initially states that the designation was unilaterally and specifically made by D.

A may accept C’s statement without further investigation and may comply with the selection, because C merely transmitted D’s unilateral and specific selection.

(x) Same as (ix), except that C informs A that it, C, has selected B on behalf of or as an agent of its affiliated company resident in the boycotting country.

A may not comply with this selection, because the decision was not made by a resident of the boycotting country.

(xi) A, a U.S. management consulting firm, is advising boycotting country Y on the selection of a contracting firm to construct a plant for the manufacture of agricultural chemicals. As is customary in its business, A compiles a list of potential contractors on the basis of its evaluation of the capabilities of the respective candidates to perform the job. A has knowledge that company B is blacklisted, but provides Y with the names of companies B, C, D, and E, listing them in order of their qualifications. Y instructs A to negotiate with C.

A may comply with Y’s instruction, because Y’s selection is unilateral and specific.

(xii) A, a U.S. exporter, is asked by boycotting country Y not to ship goods on carriers B, C, or D, which are owned by nationals of and are registered in country P, a country not boycotted by Y.

A may comply or agree to comply with Y’s request even though the selection is not specific, because A does not know or have reason to know that the request is boycott-based. (NOTE: In example (xii), A has violated no prohibition, because it does not know or have reason to know that Y’s instruction is boycott-based. Therefore, A could not act with the requisite intent to comply with the boycott.)

(xiii) A, a U.S. construction company, receives a contract to construct a hotel in boycotting country Y. As part of the contract, A is required to furnish Y with lists of qualified suppliers of various specifically identifiable items. A compiles lists of various qualified suppliers wholly without reference to the boycott, and thereafter Y instructs A to negotiate with, enter into contracts with, and arrange for delivery from each of the suppliers which Y designates. A knows that Y’s choices are made on a boycott basis.

A may comply with Y’s selections and carry out these post-award services for Y, because Y’s selections were unilateral and specific and A’s pre-award services were provided without reference to Y’s boycott.

#### EXAMPLES OF BOYCOTTING COUNTRY BUYER

(The factors in determining whether a United States person is a “bona fide resident” of a boycotting country are the same as in paragraph (g) of this section on “Compliance with Local Law.” See also the examples in that section.)

(i) A, a U.S. exporter, is asked by B, a U.S. person who is a bona fide resident of boycotting country Y, to ship goods on U.S. carrier C. C is not blacklisted by Y, and A knows that B has chosen on a boycott basis in order to comply with Y's boycott laws.

A may comply or agree to comply with B's request, because B is a bona fide resident of Y.

(ii) A is a U.S. computer company whose subsidiary, B, is a bona fide resident of boycotting country Y. A receives an order from B for specific, identifiable products manufactured by company C in connection with a computer which B is installing in Y.

A may comply or agree to comply with B's unilateral and specific selection, so long as the discretion was in fact exercised by B, not A. (NOTE: Unilateral selection transactions involving related United States persons will be scrutinized carefully to ensure that the selection was in fact made by the bona fide resident of the boycotting country.)

(iii) A, a U.S. engineering firm, has chief engineer B as its resident engineer on a dam construction site in boycotting country Y. B's presence at the site is necessary in order to ensure proper supervision of the project. In order to comply with local law, B selects equipment supplier C rather than D, who is blacklisted, and directs A to purchase certain specific equipment from C for use in the project.

A may comply with this unilateral selection, because the decision was made by a bona fide resident of Y.

(As noted above, unilateral selections involving related United States persons will be scrutinized carefully to ensure that the selection was in fact made by the bona fide resident of the boycotting country.)

(iv) B, a branch of U.S. bank A, is located in boycotting country Y. B is in need of office supplies and asks the home office in New York

to make the necessary purchases. A contacts C, a U.S. company in the office supply business, and instructs C to purchase various items from certain specific companies and ship them directly to B. In order to avoid any difficulties for B with respect to Y's boycott laws, A is careful to specify only non-blacklisted companies or suppliers. C knows that that was A's purpose. C may not comply with A's instruction, because the selection of suppliers was not made by a resident of a boycotting country.

(v) Same as (iv), except that A has given standing instructions to B that whenever it needs office supplies, it should specify certain suppliers designated by A. To avoid running afoul of Y's boycott laws, A's designations consist exclusively of non-blacklisted firms. A receives an order from B with the suppliers designated in accordance with A's instructions.

A may not comply with B's selection, because the selection was not in fact made by a bonafide resident of the boycotting country, but by a person located in the United States.

#### EXAMPLES OF SUPPLIERS OF SERVICES

(i) A, a U.S. manufacturer, is asked by boycotting country Y to ship goods to Y on U.S. vessel B, a carrier which is not blacklisted by Y.

A may comply or agree to comply with Y's request, because compliance with the unilateral and specific selection of carriers is expressly permitted under this exception.

(ii) A, a U.S. exporter shipping goods ordered by C, a national of boycotting country Y, is asked by C to insure the shipment through U.S. insurer B.

A may comply or agree to comply with C's request, because compliance with the unilateral and specific selection of an insurer is expressly permitted under this exception.

(iii) A, a U.S. construction company, is hired by C, an agency of the government of boycotting country Y, to build a power plant in Y. C specifies that A should subcontract the foundation work to U.S. contractor B. Part of the foundation design work will be done by B in the United States.

A may comply or agree to comply with Y's designation, because a necessary and not insignificant part of B's services are to be performed within the boycotting country, and such services are customarily performed on-site.

(iv) A, a U.S. contractor, is engaged by boycotting country Y to build a power plant. Y specifies that U.S. architectural firm B should be retained by A to design the plant. In order to design the plant, it is essential that B's personnel visit and become familiar with the site, although the bulk of the design and drawing work will be done in the United States.

A may comply or agree to comply with Y's unilateral and specific selection of architectural firm B, because a necessary and not insignificant part of B's services are to be performed within Y, and such on-site work is customarily involved in the provision of architectural services. The fact that the bulk of the actual work may be performed in the United States is irrelevant since the part to be performed within Y is necessary to B's effective performance.

(v) Same as (iv), except that Y specifies that the turbine for the power plant should be designed by U.S. engineer C. It is neither customary nor necessary for C to visit the site in order to do any of his work, but C has informed A that he would probably want to visit the site in Y if he were selected for the job.

A may not comply or agree to comply with Y's request, because, in the normal course of business, it is neither customary nor necessary for engineer C's services to be performed in Y.

(vi) A, a U.S. aircraft manufacturer, receives a contract from boycotting country Y to manufacture jet engines for Y's use. Y specifies that the engines should be designed by U.S. industrial engineering firm B.

A may not comply or agree to comply with Y's request, because, in the normal course of business, the services will not be performed in Y.

(vii) U.S. company A has a contract to supply specially designed road graders to boycotting country Y. Y has instructed A that it should engage engineering firm B in the design work rather than engineering firm C, which A normally uses, because C is blacklisted. When A contacts B, B informs A that one of B's personnel customarily visits the location in which any equipment B designs is used after it is in use, in order to determine how good a design job B has done. Such visits are necessary from B's point of view to provide a check on the quality of its work, and they are necessary from Y's point of view because they make it possible for Y to discuss possible design changes should deficiencies be detected.

A may not comply with Y's selection of B, because the services which B would perform in Y are an insignificant part of the total services to be performed by B.

#### EXAMPLES OF SPECIFICALLY IDENTIFIABLE GOODS

(The test of what constitutes "specifically identifiable goods" under this exception also applies to the term "specifically identifiable goods" as used in paragraph (g) of this section on "Compliance with Local Law.")

(i) A, a U.S. contractor, is constructing an apartment complex, on a turnkey basis, for boycotting country Y. Y instructs A to use only kitchen appliances manufactured by U.S. company B in completing the project. The

appliances normally bear the manufacturer's name and trademark.

A may comply with Y's selection of B, because Y's unilateral and specific selection is of goods identifiable as to source or origin in the normal course of business at the time of their entry into Y.

(ii) Same as (i), except that Y directs A to use lumber manufactured only by U.S. company C. In the normal course of business, C neither stamps its name on the lumber nor identifies itself as the manufacturer on the packaging. In addition, normal export packaging does not identify the manufacturer.

A may not comply with Y's selection, because the goods selected are not identifiable by source or origin in the normal course of business at the time of their entry into Y.

(iii) B, a U.S. contractor who is a bona fide resident of boycotting country Y, is engaged in building roads. B retains the services of A, a U.S. engineering firm, to assist it in procuring construction equipment. B directs A to purchase road graders only from manufacturer C because other road grader manufacturers which A might use are blacklisted. C's road graders normally bear C's insignia.

A may comply with B's selection of C, because the goods selected are identifiable by source or origin in the normal course of business at the time of their entry into Y.

(iv) A, a U.S. company, manufactures computer-operated machine tools. The computers are mounted on a separate bracket on the side of the equipment and are readily identifiable by brand name imprinted on the equipment. There are five or six U.S. manufacturers of such computers which will function interchangeably to operate the machine tools manufactured by A. B, a resident of boycotting country Y, contracts to buy the machine tools manufactured by A on the

condition that A incorporate, as the computer drive, a computer manufactured by U.S. company C. B's designation of C is made to avoid boycott problems which could be caused if computers manufactured by some other company were used.

A may comply with B's designation of C, because the goods selected are identifiable by source or origin in the normal course of business at the time of their entry into Y.

(v) A, a U.S. wholesaler of electronic equipment, receives an order from B, a U.S. manufacturer of radio equipment, who is a bona fide resident of boycotting country Y. B orders a variety of electrical components and specifies that all transistors must be purchased from company C, which is not blacklisted by Y. The transistors requested by B do not normally bear the name of the manufacturer; however, they are typically shipped in cartons, and C's name and logo appear on the cartons.

A may comply with B's selection, because the goods selected by B are identifiable as to source or origin in the normal course of business at the time of their entry into Y by virtue of the containers or packaging used.

(vi) A, a U.S. computer manufacturer, receives an order for a computer from B, a university in boycotting country Y. B specifies that certain integrated circuits incorporated in the computer must be supplied by U.S. electronics company C. These circuits are incorporated into the computer and are not visible without disassembling the computer.

A may not comply or agree to comply with B's specific selection of these components, because they are not identifiable as to their source or origin in the normal course of business at the time of their entry into Y.

(vii) A, a U.S. clothing manufacturer, receives an order for shirts from B, a retailer resident in boycotting country Y. B specifies that the shirts

are to be manufactured from cotton produced by U.S. farming cooperative C. Such shirts will not identify C or the source of the cotton.

A may not comply or agree to comply with B's designation, because the cotton is not identifiable as to source or origin in the normal course of business at the time of entry into Y.

(viii) A, a U.S. contractor, is retained by B, a construction firm located in and wholly-owned by boycotting country Y, to assist B in procuring construction materials. B directs A to purchase a range of materials, including hardware, tools, and trucks, all of which bear the name of the manufacturer stamped on the item. In addition, B directs A to purchase steel beams manufactured by U.S. company C. The name of manufacturer C normally does not appear on the steel itself or on its export packaging.

A may comply with B's selection of the hardware, tools, and trucks, because they are identifiable as to source or origin in the normal course of business at the time of entry into Y. A may not comply with B's selection of steel beams, because the goods are not identifiable as to source or origin by trade name, trademark, uniqueness or packaging at the time of their entry into Y.

#### EXAMPLE OF DISCRIMINATION ON BASIS OF RACE, RELIGION, SEX, OR NATIONAL ORIGIN

(i) A, a U.S. paper manufacturer, is asked by boycotting country Y to ship goods to Y on U.S. vessel B. Y states that the reason for its choice of B is that, unlike U.S. vessel C, B is not owned by persons of a particular faith.

A may not comply or agree to comply with Y's request, because A has reason to know that the purpose of the selection is to effect religious discrimination against a United States person.

#### *(e) Shipment and transshipment of exports pursuant to a boycotting country's requirements*

#### COMPLIANCE WITH A BOYCOTTING COUNTRY'S REQUIREMENTS REGARDING SHIPMENT AND TRANS-SHIPMENT OF EXPORTS

(1) A United States person may comply or agree to comply with the export requirements of a boycotting country with respect to shipments or transshipments of exports to:

- (i) A boycotted country;
- (ii) Any business concern of a boycotted country;
- (iii) Any business concern organized under the laws of a boycotted country; or
- (iv) Any national or resident of a boycotted country.

(2) This exception permits compliance with restrictions which a boycotting country may place on direct exports to a boycotted country; on indirect exports to a boycotted country (i.e., those that pass via third parties); and on exports to residents, nationals, or business concerns of, or organized under the laws of, a boycotted country, including those located in third countries.

(3) This exception also permits compliance with restrictions which a boycotting country may place on the route of export shipments when the restrictions are reasonably related to preventing the export shipments from coming into contact with or under the jurisdiction of the boycotted country. This exception applies whether a boycotting country or the vendor of the shipment:

- (i) Explicitly states that the shipment should not pass through the boycotted country enroute to its final destination; or

(ii) Affirmatively describes a route of shipment that does not include the boycotted country.

(4) A United States person may not, under this exception, refuse on an across-the-board basis to do business with a boycotted country or a national or resident of a boycotted country.

EXAMPLES OF COMPLIANCE  
WITH A BOYCOTTING COUNTRY'S  
REQUIREMENTS REGARDING SHIPMENT  
OR TRANSSHIPMENT OF EXPORTS

The following examples are intended to give guidance in determining the circumstances in which compliance with the export requirements of a boycotting country is permissible. They are illustrative, not comprehensive.

(i) A, a U.S. petroleum company, exports petroleum products to 20 countries, including the United States, from boycotting country Y. Country Y's export regulations require that products not be exported from Y to boycotted country X.

A may agree to and comply with Y's regulations with respect to the export of goods from Y to X.

(ii) Same as (i), except that Y's export regulations require that goods not be exported from boycotting country Y to any business concern organized under the laws of boycotted country X.

A may agree to and comply with Y's regulations with respect to the export of goods from Y to a business concern organized under the laws of X, even if such concern is located in a country not involved in Y's boycott of X.

(iii) B, the operator of a storage facility in country M, contracts with A, a U.S. carrier, for the shipment of certain goods manufactured in boycotting country Y. A's contract with B contains a provision stating that the goods to be

transported may not be shipped or transshipped to boycotted country X. B informs A that this provision is a requirement of C, the manufacturer of goods who is a resident of boycotting country Y. Country M is not boycotted by Y.

A may agree to and comply with this provision, because such a provision is required by the export regulations of boycotting country Y in order to prevent shipment of Y-origin goods to a country boycotted by Y.

(iv) A, a U.S. petroleum refiner located in the United States, purchases crude oil from boycotting country Y. A has a branch operation in boycotted country X. Y requires, as a condition of sale, that A agree not to ship or transship the crude oil or products refined in Y to A's branch in X.

A may agree to and comply with these requirements, because they are export requirements of Y designed to prevent Y-origin products from being shipped to a boycotted country.

(v) A, a U.S. company, has a petrochemical plant in boycotting country Y. As a condition of securing an export license from Y, A must agree that it will not ship or permit transshipment of any of its output from the plant in Y to any companies which Y lists as being owned by nationals of boycotted country X.

A may agree to this condition, because it is a restriction designed to prevent Y-origin products from being exported to a business concern of boycotted country X or to nationals of boycotted country X.

(vi) Same as (v), except that the condition imposed on A is that Y-origin goods may not be shipped or permitted to be transshipped to any companies which Y lists as being owned by persons whose national origin is X.

A may not agree to this condition, because it is a restriction designed to prevent Y-origin goods from being exported to persons of a particular national origin rather than to residents or nationals of a particular boycotted country.

(vii) A, a U.S. petroleum company, exports petroleum products to 20 countries, including the United States, from boycotting country Y. Y requires, as a condition of sale, that A not ship the products to be exported from Y to or through boycotted country X.

A may agree to and comply with this requirement because it is an export requirement of Y designed to prevent Y-origin products from coming into contact with or under the jurisdiction of a boycotted country.

(viii) Same as (vii), except that boycotting country Y's export regulations require that products to be exported from Y not pass through a port of boycotted country X.

A may agree to and comply with Y's regulations prohibiting Y-origin exports from passing through a port at boycotted country X, because they are export requirements of Y designed to prevent Y-origin products from coming into contact with or under the jurisdiction of a boycotted country.

(ix) Same as (vii), except that Y's export regulations require that A not transship the exported products "in or at" boycotted country X.

A may agree to and comply with Y's regulations with respect to the transshipment of goods "in or at" X, because they are export requirements of Y designed to prevent Y-origin products from coming into contact with or under the jurisdiction of a boycotted country.

***(f) Immigration, passport, visa, or employment requirements of a boycotting country***

COMPLIANCE WITH IMMIGRATION,

PASSPORT, VISA,  
OR EMPLOYMENT REQUIREMENTS  
OF A BOYCOTTING COUNTRY

(1) A United States individual may comply or agree to comply with the immigration, passport, visa, or employment requirements of a boycotting country, and with requests for information from a boycotting country made to ascertain whether such individual meets requirements for employment within the boycotting country, provided that he furnishes information only about himself or a member of his family, and not about any other United States individual, including his employees, employers, or co-workers.

(2) For purposes of this section, a "United States individual" means a person who is a resident or national of the United States. "Family" means immediate family members, including parents, siblings, spouse, children, and other dependents living in the individual's home.

(3) A United States person may not furnish information about its employees or executives, but may allow any individual to respond on his own to any request for information relating to immigration, passport, visa, or employment requirements. A United States person may also perform any ministerial acts to expedite processing of applications by individuals. These include informing employees of boycotting country visa requirements at an appropriate time; typing, translation, messenger and similar services; and assisting in or arranging for the expeditious processing of applications. All such actions must be undertaken on a non-discriminatory basis.

(4) A United States person may proceed with a project in a boycotting country even if certain of its employees or other prospective participants in a transaction are denied entry for boycott reasons. But no employees or other participants may be selected in advance in a manner designed to comply with a boycott.

EXAMPLES OF COMPLIANCE WITH  
IMMIGRATION, PASSPORT, VISA, OR  
EMPLOYMENT REQUIREMENTS OF A  
BOYCOTTING COUNTRY

The following examples are intended to give guidance in determining the circumstances in which compliance with immigration, passport, visa, or employment requirements is permissible. They are illustrative, not comprehensive.

•(i) A, a U.S. individual employed by B, a U.S. manufacturer of sporting goods with a plant in boycotting country Y, wishes to obtain a work visa so that he may be assigned to the plant in Y. Country Y's immigration laws specify that anyone wishing to enter the country or obtain a visa to work in the country must supply information about his religion. This information is required for boycott purposes.

A may furnish such information, because it is required by Y's immigration laws.

(ii) Same as (i), except that A is asked to supply such information about other employees of B.

A may not supply this information, because it is not information about himself or his family.

(iii) A, a U.S. building contractor, has been awarded a construction contract to be performed in boycotting country Y. Y's immigration laws require that individuals applying for visas must indicate race, religion, and place of birth. The information is sought for boycott purposes. To avoid repeated rejections of applications for work visas by A's employees, A desires to furnish to country Y a list of its prospective and current employees and required information about each so that Y can make an initial screening.

A may not furnish such a list, because A would be furnishing information about the race, religion, and national origin of its employees.

(iv) Same as (iii), except that A selects for work on the project those of its current employees whom it believes will be granted work visas from boycotting country Y.

A may not make a selection from among its employees in a manner designed to comply with the boycott-based visa requirements of Y, but must allow all eligible employees to apply for visas. A may later substitute an employee who obtains the necessary visa for one who has had his application rejected.

(v) Same as (iii), except that A selects employees for the project and then allows each employee individually to apply for his own visa. Two employees' applications are rejected, and A then substitutes two other employees who, in turn, submit their own visa applications.

A may take such action, because in so doing A is not acting in contravention of any prohibition of this part.

(vi) Same as (v), except that A arranges for the translation, typing and processing of its employees' applications, and transmits all the applications to the consulate of boycotting country Y.

A may take such ministerial actions, because in so doing A is not itself furnishing information with respect to race, religion, sex, or national origin, but is merely transmitting information furnished by its individual employees.

(vii) A, a U.S. contractor, selects U.S. subcontractor B to perform certain engineering services in connection with A's project in boycotting country Y. The work visa application submitted by the employee whom B has proposed as chief engineer of this project is rejected by Y because his national origin is of boycotted country X. Subcontractor B thereupon withdraws.

A may continue with the project and select another subcontractor, because A is not acting in contravention of any prohibition of this part.

**(g) Compliance with local law**

(1) This exception contains two parts. The first covers compliance with local law with respect to a United States person's activities exclusively within a foreign country; the second covers compliance with local import laws by United States persons resident in a foreign country. Under both parts of this exception, local laws are laws of the host country, whether derived from statutes, regulations, decrees, or other official sources having the effect of law in the host country. This exception is not available for compliance with presumed policies or understandings of policies unless those policies are reflected in official sources having the effect of law.

(2) Both parts of this exception apply only to United States persons resident in a foreign country. For purposes of this exception, a United States person will be considered to be a resident of a foreign country only if he is a bona fide resident. A United States person may be a bona fide resident of a foreign country even if such person's residency is temporary.

(3)(i) Factors that will be considered in determining whether a United States person is a bona fide resident of a foreign country include:

- (A) Physical presence in the country;
- (B) Whether residence is needed for legitimate business reasons;
- (C) Continuity of the residency;
- (D) Intent to maintain the residency;
- (E) Prior residence in the country;
- (F) Size and nature of presence in the country;

(G) Whether the person is registered to do business or incorporated in the country;

(H) Whether the person has a valid work visa; and

(I) Whether the person has a similar presence in both boycotting and non-boycotting foreign countries in connection with similar business activities.

(ii) No one of the factors in paragraph (g)(3) of this section is dispositive. All the circumstances involved will be closely examined to ascertain whether there is, in fact, bona fide residency. Residency established solely for purposes of avoidance of the application of this part, unrelated to legitimate business needs, does not constitute bona fide residency.

**EXAMPLES OF BONA FIDE RESIDENCY**

The following examples are intended to give guidance in determining the circumstances in which a United States person may be a bona fide resident of a foreign country. For purposes of illustration, each example discusses only one or two factors, instead of all relevant factors. They are illustrative, not comprehensive.

(i) A, a U.S. radio manufacturer located in the United States, receives a tender to bid on a contract to supply radios for a hotel to be built in boycotting country Y. After examining the proposal, A sends a bid from its New York office to Y.

A is not a resident of Y, because it is not physically present in Y.

(ii) Same as (i), except that after receiving the tender, A sends its sales representative to Y. A does not usually have sales representatives in countries when it bids from the United States, and this particular person's presence in Y is not necessary to enable A to make the bid.

A is not a bona fide resident of Y, because it has no legitimate business reasons for having its sales representative resident in Y.

(iii) A, a U.S. bank, wishes to establish a branch office in boycotting country Y. In pursuit of that objective, A's personnel visit Y to make the necessary arrangements. A intends to establish a permanent branch office in Y after the necessary arrangements are made.

A's personnel in Y are not bona fide residents of Y, because A does not yet have a permanent business operation in Y.

(iv) Same as (iii), except A's personnel are required by Y's laws to furnish certain non-discriminatory boycott information in order to establish a branch in Y.

In these limited circumstances, A's personnel may furnish the non-discriminatory boycott information necessary to establish residency to the same extent a U.S. person who is a bona fide resident in that country could. If this information could not be furnished in such limited circumstances, the exception would be available only to firms resident in a boycotting country before January 18, 1978.

(v) A, a U.S. construction company, receives an invitation to build a power plant in boycotting country Y. After receipt of the invitation, A's personnel visit Y in order to survey the site and make necessary analyses in preparation for submitting a bid. The invitation requires that otherwise prohibited boycott information be furnished with the bid.

A's personnel in Y are not bona fide residents of Y, because A has no permanent business operation in Y. Therefore, A's personnel may not furnish the prohibited information.

(vi) Same as (v), except that A is considering establishing an office in boycotting country Y. A's personnel visit Y in order to register A to do business in that country. A intends to establish

ongoing construction operations in Y. A's personnel are required by Y's laws to furnish certain non-discriminatory boycott information in order to register A to do business or incorporate a subsidiary in Y.

In these limited circumstances, A's personnel may furnish non-discriminatory boycott information necessary to establish residency to the same extent a U.S. person who is a bona fide resident in that country could. If this information could not be furnished in such limited circumstances, the exception would be available only to firms resident in a boycotting country before January 18, 1978.

(vii) A, a subsidiary of U.S. oil company B, is located in boycotting country Y. A has been engaged in oil explorations in Y for a number of years.

A is a bona fide resident of Y, because of its pre-existing continuous presence in Y for legitimate business reasons.

(viii) Same as (vii), except that A has just been established in Y and has not yet begun operations.

A is a bona fide resident of Y, because it is present in Y for legitimate business reasons and it intends to reside continuously.

(ix) U.S. company A is a manufacturer of prefabricated homes. A builds a plant in boycotting country Y for purposes of assembling components made by A in the United States and shipped to Y.

A's personnel in Y are bona fide residents of Y, because A's plant in Y is established for legitimate business reasons, and it intends to reside continuously.

(x) U.S. company A has its principal place of business in the United States. A's sales agent visits boycotting country Y from time to time for purposes of soliciting orders.

A's sales agent is not a bona fide resident of Y, because such periodic visits to Y are insufficient to establish a bona fide residency.

(xi) A, a branch office of U.S. construction company B, is located in boycotting country Y. The branch office has been in existence for a number of years and has been performing various management services in connection with B's construction operations in Y.

A is a bona fide resident of Y, because of its longstanding presence in Y and its conduct of ongoing operations in Y.

(xii) U.S. construction company A has never done any business in boycotting country Y. It is awarded a contract to construct a hospital in Y, and preparatory to beginning construction, sends its personnel to Y to set up operations.

A's personnel are bona fide residents of Y, because they are present in Y for the purposes of carrying out A's legitimate business purposes; they intend to reside continuously; and residency is necessary to conduct their business.

(xiii) U.S. company A manufactures furniture. All its sales in foreign countries are conducted from its offices in the United States. From time to time A has considered opening sales offices abroad, but it has concluded that it is more efficient to conduct sales operations from the United States. Shortly after the effective date of this part, A sends a sales representative to boycotting country Y to open an office in and solicit orders from Y. It is more costly to conduct operations from that office than to sell directly from the United States, but A believes that if it establishes a residence in Y, it will be in a better position to avoid conflicts with U.S. law in its sales to Y.

A's sales representative is not a bona fide resident of Y, because the residency was established to avoid the application of this part and not for legitimate business reasons.

(xiv) Same as (xiii), except that it is in fact more efficient to have a sales office in Y. In fact, without a sales office in Y, A would find it difficult to explore business opportunities in Y. A is aware, however, that residency in Y would permit its sales representative to comply with Y's boycott laws.

A's sales representative is a bona fide resident of Y, because A has a legitimate business reason for establishing a sales office in Y.

(xv) U.S. company B is a computer manufacturer. B sells computers and related programming services tailored to the needs of individual clients. Because of the complex nature of the product, B must have sales representatives in any country where sales are made. B has a sales representative, A, in boycotting country Y. A spends two months of the year in Y, and the rest of the year in other countries. B has a permanent sales office from which A operates while in Y, and the sales office is stocked with brochures and other sales materials.

A is a bona fide resident of Y, because his presence in Y is necessary to carry out B's legitimate business purposes; B maintains a permanent office in Y; and B intends to continue doing business in Y in the future.

(xvi) A, a U.S. construction engineering company, is engaged by B, a U.S. general contracting company, to provide services in connection with B's contract to construct a hospital complex in boycotting country Y. In order to perform those services, A's engineers set up a temporary office in a trailer on the construction site in Y. A's work is expected to be completed within six months.

A's personnel in Y are bona fide residents of Y, because A's on-site office is necessary to the performance of its services for B, and because A's personnel are continuously there.

(xvii) A, a U.S. company, sends one of its representatives to boycotting country Y to explore new sales possibilities for its line of transistor radios. After spending several weeks in Y, A's representative rents a post office box in Y, to which all persons interested in A's products are directed to make inquiry.

A is not a bona fide resident of Y, because rental of a post office box is not a sufficient presence in Y to constitute residency.

(xviii) A, a U.S. computer company, has a patent and trademark registered in the United States. In order to obtain registration of its patent and trademark in boycotting country Y, A is required to furnish certain non-discriminatory boycott information.

A may not furnish the information, because A is not a bona fide resident of Y.

***(h) Activities exclusively within a foreign country***

(1) Any United States person who is a bona fide resident of a foreign country, including a boycotting country, may comply or agree to comply with the laws of that country with respect to his activities exclusively within that country. These activities include:

(i) Entering into contracts which provide that local law applies or governs, or that the parties will comply with such laws;

(ii) Employing residents of the host country;

(iii) Retaining local contractors to perform work within the host country;

(iv) Purchasing or selling goods or services from or to residents of the host country; and

(v) Furnishing information within the host country.

(2) Activities exclusively within the country do not include importing goods or services from outside the host country, and, therefore, this part of the exception does not apply to compliance with import laws in connection with importing goods or services.

**EXAMPLES OF PERMISSIBLE COMPLIANCE WITH LOCAL LAW WITH RESPECT TO ACTIVITIES EXCLUSIVELY WITHIN A FOREIGN COUNTRY**

The following examples are intended to give guidance in determining the circumstances in which compliance with local law is permissible. They are illustrative, not comprehensive.

**ACTIVITIES EXCLUSIVELY WITHIN A FOREIGN COUNTRY**

(i) U.S. construction company A, a bona fide resident of boycotting country Y, has a contract to build a school complex in Y. Pursuant to Y's boycott laws, the contract requires A to refuse to purchase supplies from certain local merchants. While Y permits such merchants to operate within Y, their freedom of action in Y is constrained because of their relationship with boycotted country X.

A may enter into the contract, because dealings with local merchants are activities exclusively within Y.

(ii) A, a banking subsidiary of U.S. bank B, is a bona fide resident of boycotting country Y. From time to time, A purchases office supplies from the United States.

A's purchase of office supplies is not an activity exclusively within Y, because it involves the import of goods from abroad.

(iii) A, a branch of U.S. bank B, is a bona fide resident of boycotting country Y. Under Y's boycott laws, A is required to supply information about whether A has any dealings with boycotted country X. A compiles and

furnishes the information within Y and does so of its own knowledge.

A may comply with that requirement, because in compiling and furnishing the information within Y, based on its own knowledge, A is engaging in an activity exclusively within Y.

(iv) Same as (iii), except that A is required to supply information about B's dealings with X. From its own knowledge and without making any inquiry of B, A compiles and furnishes the information.

A may comply with that requirement, because in compiling and furnishing the information within Y, based on its own knowledge, A is engaging in an activity exclusively within Y.

(v) Same as (iv), except that in making its responses, A asks B to compile some of the information.

A may not comply, because the gathering of the necessary information takes place partially outside Y.

(vi) U.S. company A has applied for a license to establish a permanent manufacturing facility in boycotting country Y. Under Y's boycott law, A must agree, as a condition of the license, that it will not sell any of its output to blacklisted foreign firms.

A may not comply, because the agreement would govern activities of A which are not exclusively within Y.

#### DISCRIMINATION AGAINST UNITED STATES PERSONS

(i) A, a subsidiary of U.S. company B, is a bona fide resident of boycotting country Y. A manufactures air conditioners in its plant in Y. Under Y's boycott laws, A must agree not to hire nationals of boycotted country X.

A may agree to the restriction and may abide by it with respect to its recruitment of individuals within Y, because the recruitment of such individuals is an activity exclusively within Y. However, A cannot abide by this restriction with respect to its recruitment of individuals outside Y, because this is not an activity exclusively within Y.

(ii) Same as (i), except that pursuant to Y's boycott laws, A must agree not to hire anyone who is of a designated religion.

A may not agree to this restriction, because the agreement calls for discrimination against U.S. persons on the basis of religion. It makes no difference whether the recruitment of the U.S. persons occurs within or without Y. (NOTE: The exception for compliance with local law does not apply to boycott-based refusals to employ U.S. persons on the basis of race, religion, sex, or national origin even if the activity is exclusively within the boycotting country.)

#### (i) *Compliance with local import law*

(1) Any United States person who is a bona fide resident of a foreign country, including a boycotting country, may, in importing goods, materials or components into that country, comply or agree to comply with the import laws of that country, provided that:

(i) The items are for his own use or for his use in performing contractual services within that country; and

(ii) In the normal course of business, the items are identifiable as to their source or origin at the time of their entry into the foreign country by:

(a) Uniqueness of design or appearance; or

(b) Trademark, trade name, or other identification normally on the items themselves, including their packaging.

(2) The factors that will be considered in determining whether a United States person is a bona fide resident of a foreign country are those set forth in paragraph (g) of this section. Bona fide residence of a United States company's subsidiary, affiliate, or other permanent establishment in a foreign country does not confer such residence on such United States company. Likewise, bona fide residence of a United States company's employee in a foreign country does not confer such residence on the entire company.

(3) A United States person who is a bona fide resident of a foreign country may take action under this exception through an agent outside the country, but the agent must act at the direction of the resident and not exercise his own discretion. Therefore, if a United States person resident in a boycotting country takes action to comply with a boycotting country's import law with respect to the importation of qualified goods, he may direct his agent in the United States on the action to be taken, but the United States agent himself may not exercise any discretion.

(4) For purposes of this exception, the test that governs whether goods or components of goods are specifically identifiable is identical to the test applied in paragraph (d) of this section on "Compliance With Unilateral and Specific Selection" to determine whether they are identifiable as to their source or origin in the normal course of business.

(5) The availability of this exception for the import of goods depends on whether the goods are intended for the United States person's own use at the time they are imported. It does not depend upon who has title to the goods at the time of importation into a foreign country.

(6) Goods are for the United States person's own use (including the performance of contractual services within the foreign country) if:

(i) They are to be consumed by the United States person;

(ii) They are to remain in the United States person's possession and to be used by that person;

(iii) They are to be used by the United States person in performing contractual services for another;

(iv) They are to be further manufactured, incorporated into, refined into, or reprocessed into another product to be manufactured for another; or

(v) They are to be incorporated into, or permanently affixed as a functional part of, a project to be constructed for another.

(7) Goods acquired to fill an order for such goods from another are not for the United States person's own use. Goods procured for another are not for one's own use, even if the furnishing of procurement services is the business in which the United States person is customarily engaged. Nor are goods obtained for simple resale acquired for one's own use, even if the United States person is engaged in the retail business. Likewise, goods obtained for inclusion in a turnkey project are not for one's own use if they are not customarily incorporated into, or do not customarily become permanently affixed as a functional part of the project.

(8) This part of the local law exception does not apply to the import of services, even when the United States person importing such services is a bona fide resident of a boycotting country and is importing them for his own use. In addition, this exception is available for a United States person who is a bona fide resident of a foreign country only when the individual or entity actually present within that country takes action through the exercise of his own discretion.

(9) Use of this exception will be monitored and continually reviewed to determine whether its

continued availability is consistent with the national interest. Its availability may be limited or withdrawn as appropriate. In reviewing the continued availability of this exception, the effect that the inability to comply with local import laws would have on the economic and other relations of the United States with boycotting countries will be considered.

**(10)** A United States person who is a bona fide resident of a foreign country may comply or agree to comply with the host country's import laws even if he knows or has reason to know that particular laws are boycott-related. However, no United States person may comply or agree to comply with any host country law which would require him to discriminate against any United States person on the basis of race, religion, sex, or national origin, or to supply information about any United States person's race, religion, sex, or national origin.

#### EXAMPLES OF PERMISSIBLE COMPLIANCE WITH LOCAL IMPORT LAW

The following examples are intended to give guidance in determining the circumstances in which compliance with local import law is permissible. They are illustrative, not comprehensive.

##### COMPLIANCE BY A BONA FIDE RESIDENT

(i) A, a subsidiary of U.S. company B, is a bona fide resident of boycotting country Y and is engaged in oil drilling operations in Y. In acquiring certain large, specifically identifiable products for carrying out its operations in Y, A chooses only from non-blacklisted firms because Y's import laws prohibit the importation of goods from blacklisted firms. However, with respect to smaller items, B makes the selection on behalf of A and sends them to A in Y.

A may choose from non-blacklisted firms, because it is a U.S. person who is a bona fide resident in Y. However, because B is not

resident in Y, B cannot make boycott-based selections to conform with Y's import laws prohibiting the importation of goods from blacklisted firms.

(ii) Same as (i), except that after making its choices on the larger items, A directs B to carry out its instructions by entering into appropriate contracts and making necessary shipping arrangements.

B may carry out A's instructions provided that A, a bona fide resident of Y, has in fact made the choice and B is exercising no discretion, but is acting only as A's agent. (NOTE: Such transactions between related companies will be scrutinized carefully. A must in fact exercise the discretion and make the selections. If the discretion is exercised by B, B would be in violation of this part.)

(iii) U.S. construction company A has a contract to build a school in boycotting country Y. A's employees set up operations in Y for purposes of commencing construction. A's employees in Y advise A's headquarters in the United States that Y's import laws prohibit importation of goods manufactured by blacklisted firms. A's headquarters then issues invitations to bid only to non-blacklisted firms for certain specifically identifiable goods.

A's headquarters' choice of non-blacklisted suppliers is not a choice made by a U.S. person who is a bona fide resident of Y, because the discretion in issuing the bids was exercised in the United States, not in Y.

(iv) Same as (iii), except that A's employees in Y actually make the decision regarding to whom the bids should be issued.

The choices made by A's employees are choices made by U.S. persons who are bona fide residents of Y, because the discretion in choosing was exercised solely in Y. (NOTE: Choices purportedly made by employees of U.S. companies who are resident in boycotting

countries will be carefully scrutinized to ensure that the discretion was exercised entirely in the boycotting country.)

#### SPECIFICALLY IDENTIFIABLE GOODS

The test and examples as to what constitutes specifically identifiable goods are identical to those applicable under paragraph (d) of this section on “Compliance With Unilateral Selection.”

#### IMPORTS FOR U.S. PERSON’S OWN USE WITHIN BOYCOTTING COUNTRY

(i) A, a subsidiary of U.S. company B, is a bona fide resident of boycotting country Y. A plans to import computer operated machine tools to be installed in its automobile plant in boycotting country Y. The computers are mounted on a separate bracket on the side of the equipment and are readily identifiable by brand name. A orders the tools from U.S. supplier C and specifies that C must incorporate computers manufactured by D, a non-blacklisted company. A would have chosen computers manufactured by E, except that E is blacklisted, and Y’s import laws prohibit the importation of goods manufactured by blacklisted firms.

A may refuse to purchase E’s computers, because A is importing the computers for its own use in its manufacturing operations in Y.

(ii) A, a subsidiary of U.S. company B, is a bona fide resident of boycotting country Y. To meet the needs of its employees in Y, A imports certain specifically identifiable commissary items for sale, such as cosmetics; and canteen items, such as candy. In selecting such items for importation into Y, A chooses items made only by non-blacklisted firms, because Y’s import laws prohibit importation of goods from blacklisted firms.

A may import these items only from non-blacklisted firms, because the importation

of goods for consumption by A’s employees is an importation for A’s own use.

(iii) A, a U.S. construction company which is a bona fide resident of boycotting country Y, has a contract to build a hospital complex for the Ministry of Health in Y. Under the contract, A will be general manager of the project with discretion to choose all subcontractors and suppliers. The complex is to be built on a turnkey basis, with A retaining title to the property and bearing all financial risk until the complex is conveyed to Y. In choosing specifically identifiable goods for import, such as central air conditioning units and plate glass, A excludes blacklisted suppliers in order to comply with Y’s import laws. These goods are customarily incorporated into, or permanently affixed as a functional part of, the project.

A may refuse to deal with blacklisted suppliers of specifically identifiable goods, because importation of goods by a general contractor to be incorporated into a construction project in Y is an importation of goods for A’s own use.

(iv) Same as (iii), except that, in addition, in choosing U.S. architects and engineers to work on the project, A excludes blacklisted firms, because Y’s import laws prohibit the use of services rendered by blacklisted persons.

A may not refuse to deal with blacklisted architectural or engineering firms, because this exception does not apply to the import of services. It is irrelevant that, at some stage, the architectural or engineering drawings or plans may be brought to the site in Y. This factor is insufficient to transform such services into “goods” for purposes of this exception.

(v) Same as (iii), except that the project is to be completed on a “cost plus” basis, with Y making progress payments to A at various stages of completion.

A may refuse to deal with blacklisted suppliers of specifically identifiable goods, because the

importation of goods by A to be incorporated in a project A is under contract to complete is an importation of goods for its own use. The terms of payment are irrelevant.

(vi) A, a U.S. construction company which is a bona fide resident of boycotting country Y, has a contract for the construction of an office building in Y on a turnkey basis. In choosing goods to be used or included in the office complex, A orders wallboard, office partitions, and lighting fixtures from non-blacklisted manufacturers. A likewise orders desks, office chairs, typewriters, and office supplies from non-blacklisted manufacturers.

Because they are customarily incorporated into or permanently affixed as a functional part of an office building, the wallboard, office partitions, and lighting fixtures are for A's own use, and A may select non-blacklisted suppliers of these goods in order to comply with Y's import laws. Because they are not customarily incorporated into or permanently affixed to the project, the desks, office chairs, typewriters, and office supplies are not for A's own use, and A may not make boycott-based selections of the suppliers of these goods.

(vii) A, a U.S. company engaged in the business of selling automobiles, is a bona fide resident of boycotting country Y. In ordering automobiles from time to time for purposes of stocking its inventory, A purchases from U.S. manufacturer B, but not U.S. manufacturer C, because C is blacklisted. Retail sales are subsequently made from this inventory.

A's import of automobiles from B is not an import for A's own use, because the importation of items for general inventory in a retail sales operation is not an importation for one's own use.

(viii) A, a U.S. company engaged in the manufacture of pharmaceutical products, is a bona fide resident of boycotting country Y. In importing chemicals for incorporation into the

pharmaceutical products, A purchases from U.S. supplier B, but not U.S. supplier C, because C is blacklisted.

A may import chemicals from B rather than C, because the importation of specifically identifiable items for incorporation into another product is an importation for one's own use.

(ix) A, a U.S. management company which is a bona fide resident of boycotting country Y, has a contract with the Ministry of Education in Y to purchase supplies for Y's school system. From time to time, A purchases goods from abroad for delivery to various schools in Y.

A's purchase of goods for Y's school system does not constitute an importation of goods for A's own use, because A is acting as a procurement agent for another. A, therefore, cannot make boycott-based selections of suppliers of such school supplies.

(x) A, a U.S. company which is a bona fide resident of boycotting country Y, has a contract to make purchases for Y in connection with a construction project in Y. A is not engaged in the construction of, or in any other activity in connection with, the project. A's role is merely to purchase goods for Y and arrange for their delivery to Y.

A is not purchasing goods for its own use, because A is acting as a procurement agent for Y. A, therefore, cannot make boycott selections of suppliers of such goods.

(xi) A, a U.S. company which is a bona fide resident of boycotting country Y, imports specifically identifiable goods into Y for exhibit by A at a trade fair in Y. In selecting goods for exhibit, A excludes items made by blacklisted firms.

A's import of goods for its exhibit at a trade fair constitutes an import for A's own use. However, A may not sell in Y those goods it imported for exhibit.

(xii) A is a bona fide resident of boycotting countries Y and Z. In compliance with Y's boycott laws, A chooses specifically identifiable goods for its oil drilling operations in Y and Z by excluding blacklisted suppliers. The goods are first imported into Y. Those purchased for A's use in Z are then transhipped to Z.

In selecting those goods for importation into Y, A is making an import selection for its own use, even though A may use some of the imported goods in Z. Further, the subsequent shipment from Y to Z of those goods purchased for use in Z is an import into Z for A's own use.

#### **§ 760.4 EVASION**

(a) No United States person may engage in any transaction or take any other action, either independently or through any other person, with intent to evade the provisions of this part. Nor may any United States person assist another United States person to violate or evade the provisions of this part.

(b) The exceptions set forth in §760.3(a) through (i) do not permit activities or agreements (express or implied by a course of conduct, including a pattern of responses) which are otherwise prohibited by this part and which are not within the intent of such exceptions. However, activities within the coverage and intent of the exceptions set forth in this part do not constitute evasion regardless of how often such exceptions are utilized.

(c) Use of any artifice, device or scheme which is intended to place a person at a commercial disadvantage or impose on him special burdens because he is blacklisted or otherwise restricted for boycott reasons from having a business relationship with or in a boycotting country will be regarded as evasion for purposes of this part.

(d) Unless permitted under one of the exceptions, use of risk of loss provisions that expressly impose a financial risk on another

because of the import laws of a boycotting country may constitute evasion. If they are introduced after January 18, 1978, their use will be presumed to constitute evasion. This presumption may be rebutted by a showing that such a provision is in customary usage without distinction between boycotting and non-boycotting countries and that there is a legitimate non-boycott reason for its use. On the other hand, use of such a provision by a United States person subsequent to January 18, 1978 is presumed not to constitute evasion if the provision had been customarily used by that person prior to January 18, 1978.

(e) Use of dummy corporations or other devices to mask prohibited activity will also be regarded as evasion. Similarly, it is evasion under this part to divert specific boycotting country orders from a United States parent to a foreign subsidiary for purposes of complying with prohibited boycott requirements. However, alteration of a person's structure or method of doing business will not constitute evasion so long as the alteration is based on legitimate business considerations and is not undertaken solely to avoid the application of the prohibitions of this part. The facts and circumstances of an arrangement or transaction will be carefully scrutinized to see whether appearances conform to reality.

#### **EXAMPLES**

The following examples are intended to give guidance to persons in determining circumstances in which this section will apply. They are illustrative, not comprehensive.

(i) A, a U.S. insurance company, receives a request from boycotting country Y asking whether it does business in boycotted country X. Because furnishing such information is prohibited, A declines to answer and as a result is placed on Y's blacklist. The following year, A's annual report contains new information about A's worldwide operations, including a list of all countries in which A does business. A

then mails a copy of its annual report, which has never before contained such information, to officials of the government of country Y.

Absent some business justification unrelated to the boycott for changing the annual report in this fashion, A's action constitutes evasion of this part.

(ii) A, a U.S. construction firm resident in boycotting country Y, orders lumber from U.S. company B. A unilaterally selects B in part because U.S. lumber producer C is blacklisted by Y and C's products are therefore not importable. In placing its order with B, A requests that B stamp its name or logo on the lumber so that A "can be certain that it is, in fact, receiving B's products." B does not normally so stamp its lumber, and A's purpose in making the request is to appear to fit within the unilateral selection exception of this part.

Absent additional facts justifying A's action, A's action constitutes evasion of this part.

(iii) A, a U.S. company, has been selling sewing machines to boycotting country Y for a number of years. A receives a request for a negative certificate of origin from a new customer. A is aware that furnishing such certificates are prohibited; therefore, A arranges to have all future shipments run through a foreign corporation in a third country which will affix the necessary negative certificate before forwarding the machines on to Y.

A's action constitutes evasion of this part, because it is a device to mask prohibited activity carried out on A's behalf.

(iv) A, a U.S. company, has been selling calculators to distributor B in country C for a number of years and routinely supplies positive certificates of origin. A receives an order from country Y which requires negative certificates of origin. A arranges to make all future sales to distributor B in country C. A knows B will step in and make the sales to Y which A would

otherwise have made directly. B will make the necessary negative certifications. A's warranty, which it will continue to honor, runs to the purchaser in Y.

A's action constitutes evasion, because the diverting of orders to B is a device to mask prohibited activity carried out on A's behalf.

(v) A, a U.S. company, is negotiating a long-term contract with boycotting country Y to meet all Y's medical supply needs. Y informs A that before such a contract can be concluded, A must complete Y's boycott questionnaire. A knows that it is prohibited from answering the questionnaire so it arranges for a local agent in Y to supply the necessary information.

A's action constitutes evasion of this part, because it is a device to mask prohibited activity carried out on A's behalf.

(vi) A, a U.S. contractor which has not previously dealt with boycotting country Y, is awarded a construction contract by Y. Because it is customary in the construction industry for a contractor to establish an on-site facility for the duration of the project, A establishes such an office, which satisfies the requirements for bona fide residency. Thereafter, A's office in Y takes a number of actions permitted under the compliance with local law exception.

A's actions do not constitute evasion, because A's facility in Y was established for legitimate business reasons.

(vii) A, a controlled foreign subsidiary of U.S. company B, is located in non-boycotting country M. A and B both make machine tools for sale in their respective marketing regions. B's marketing region includes boycotting country Y. After assessing the requirements of this part, B decides that it can no longer make machines for sale in Y. Instead, A decides to expand its facilities in M in order to service the Y market.

The actions of A and B do not constitute evasion, because there is a legitimate business reason for their actions. It is irrelevant that the effect may be to place sales which would otherwise have been subject to this part beyond the reach of this part.

(viii) A, a U.S. manufacturer, from time to time receives purchase orders from boycotting country Y which A fills from its plant in the United States. A knows that it is about to receive an order from Y which contains a request for a certification which A is prohibited from furnishing under this part. In order to permit the certification to be made, A diverts the purchase order to its foreign subsidiary.

A's diversion of the purchase order constitutes evasion of this part, because it is a device to mask prohibited activity carried out on A's behalf.

(ix) A, a U.S. company, is engaged in assembling drilling rigs for shipment to boycotting country Y. Because of potential difficulties in securing entry into Y of materials supplied by blacklisted firms, A insists that blacklisted firms take a 15 percent discount on all materials which they supply to A. As a result, no blacklisted firms are willing to transact with A.

A's insistence on the discount for materials supplied by blacklisted firms constitutes evasion of this part, because it is a device or scheme which is intended to place a special burden on blacklisted firms because of Y's boycott.

(x) Same as (ix), except that shortly after January 18, 1978, A, a U.S. company, insists that its suppliers sign contracts which provide that even after title passes from the supplier to A, the supplier will bear the risk of loss and indemnify A if goods which the supplier has furnished are denied entry into Y for boycott reasons.

A's action constitutes evasion of this part, because it is a device or scheme which is intended to place a special burden on blacklisted persons because of Y's boycott.

(xi) Same as (x), except that A customarily insisted on such an arrangement with its supplier prior to January 18, 1978.

A's action is presumed not to constitute evasion, because use of this contractual arrangement was customary for A prior to January 18, 1978.

(xii) A, a U.S. company, has a contract to supply automobile sub-assembly units to boycotting country Y. Shortly after January 18, 1978, A insists that its suppliers sign contracts which provide that even after title passes to A, the supplier will bear the risk of loss and indemnify A if goods which the supplier has furnished are denied entry into boycotting country Y for any reason.

A's insistence on this arrangement is presumed to constitute evasion, because it is a device which is intended to place a special burden on blacklisted firms because of Y's boycott. The presumption may be rebutted by competent evidence showing that use of such an arrangement is customary without regard to the boycotting or non-boycotting character of the country to which it relates and that there is a legitimate non-boycott business reason for its use.

(xiii) Same as (vii), except that A requires that all suppliers make in-country delivery.

A's action does not constitute evasion, because it is an ordinary commercial practice to require in-country delivery of goods.

(xiv) Same as (xii), except that A requires that title remain with the supplier until delivery in Y has been made.

A's action does not constitute evasion, because it is ordinary commercial practice to require that title remain with the supplier until delivery has been made. This example is distinguishable from example (xii), because in example (xii) A had insisted on an extraordinary arrangement designed to require that the risk of loss remain with the supplier even after title had passed to A.

(xv) U.S. bank A is contacted by U.S. company B to finance B's transaction with boycotting country Y. Payment will be effected through a letter of credit in favor of B at its U.S. address. A knows that the letter of credit will contain restrictive boycott conditions which would bar its implementation by A if the beneficiary were a U.S. person. A advises B of the boycott condition and suggests to B that the beneficiary should be changed to C, a shell corporation in non-boycotting country M. The beneficiary is changed accordingly.

The actions of both A and B constitute evasion of this part, because the arrangement is a device to mask prohibited activities.

(xvi) Same as (xv), except that U.S. company B, the beneficiary of the letter of credit, arranges to change the beneficiary to B's foreign subsidiary so that A can implement the letter of credit. A knows that this has been done.

A's implementation of the letter of credit in the face of its knowledge of B's action constitutes evasion of this part, because A's action is part of a device to mask prohibited activity by both parties.

(xvii) U.S. bank A, located in the United States, is contacted by foreign company B to finance B's transaction with boycotting country Y. B is a controlled subsidiary of a U.S. company. The transaction which is to be financed with a letter of credit payable to B at its foreign address, requires B to certify that none of its board members are of a particular religious faith. Since B cannot legally furnish the certificate, it asks A to convey the necessary

information to Y through A's bank branch in Y. Such information would be furnished wholly outside the letter of credit transaction.

A's action constitutes evasion of this part, because it is undertaken to assist B's violation of this part.

(xviii) U.S. bank A is asked by foreign corporation B to implement a letter of credit in favor of B so that B might perform under its long-term contract with boycotting country Y. Under the terms of the letter of credit, B is required to certify that none of its suppliers is blacklisted. A knows that it cannot implement a letter of credit with this condition, so it tells B to negotiate the elimination of this requirement from the letter of credit and instead supply the certification to Y directly.

A's suggestion to B that it provide the negative certification to Y directly constitutes evasion of this part, because A is taking an action through another person to mask prohibited activity on A's part.

## **§ 760.5 REPORTING REQUIREMENTS**

### *(a) Scope of reporting requirements*

(1) A United States person who receives a request to take any action which has the effect of furthering or supporting a restrictive trade practice or boycott fostered or imposed by a foreign country against a country friendly to the United States or against any United States person must report such request to the Department of Commerce in accordance with the requirements of this section. Such a request may be either written or oral and may include a request to furnish information or enter into or implement an agreement. It may also include a solicitation, directive, legend or instruction that asks for information or that asks that a United States person take or refrain from taking a particular action. Such a request shall be reported regardless of whether the action requested is prohibited or permissible under this

part, except as otherwise provided by this section.

(2) For purposes of this section, a request received by a United States person is reportable if he knows or has reason to know that the purpose of the request is to enforce, implement, or otherwise further, support, or secure compliance with an unsanctioned foreign boycott or restrictive trade practice.

(i) A request received by a United States person located in the United States is reportable if it is received in connection with a transaction or activity in the interstate or foreign commerce of the United States, as determined under §760.1(d)(1) through (5) and (18) of this part.

(ii) A request received by a United States person located outside the United States (that is, a foreign subsidiary, partnership, affiliate, branch, office, or other permanent foreign establishment which is controlled in fact by any domestic concern, as determined under §760.1(c) of this part) is reportable if it is received in connection with a transaction or activity in the interstate or foreign commerce of the United States, as determined under §760.1(d)(6) through (17) and (19) of this part.

(iii) A request such as a boycott questionnaire, unrelated to a particular transaction or activity, received by any United States person is reportable when such person has or anticipates a business relationship with or in a boycotting country involving the sale, purchase or transfer of goods or services (including information) in the interstate or foreign commerce of the United States, as determined under §760.1(d) of this part.

(3) These reporting requirements apply to all United States persons. They apply whether the United States person receiving the request is an exporter, bank or other financial institution, insurer, freight forwarder, manufacturer, or any other United States person subject to this part.

(4) The acquisition of information about a boycotting country's boycott requirements through the receipt or review of books, pamphlets, legal texts, exporters' guidebooks and other similar publications does not constitute receipt of a reportable request for purposes of this section. In addition, a United States person who receives an unsolicited invitation to bid, or similar proposal, containing a boycott request has not received a reportable request for purposes of this section where he does not respond to the invitation to bid or other proposal.

(5) Because of the use of certain terms for boycott and non-boycott purposes; because of Congressional mandates to provide clear and precise guidelines in areas of inherent uncertainty; and because of the Department's commitment to minimize paperwork and reduce the cost of reporting where it will not impair the Department's ability to continue to monitor foreign boycotts, the following specific requests are not reportable:

(i) A request to refrain from shipping goods on a carrier which flies the flag of a particular country or which is owned, chartered, leased or operated by a particular country or by nationals or residents of a particular country, or a request to certify to that effect.

(ii) A request to ship goods via a prescribed route, or a request to refrain from shipping goods via a proscribed route, or a request to certify to either effect.

(iii) A request to supply an affirmative statement or certification regarding the country of origin of goods.

(iv) A request to supply an affirmative statement or certification regarding the name of the supplier or manufacturer of the goods shipped or the name of the provider of services.

(v) A request to comply with the laws of another country except where the request

expressly requires compliance with that country's boycott laws.

(vi) A request to an individual to supply information about himself or a member of his family for immigration, passport, visa, or employment purposes.

(vii) A request to supply an affirmative statement or certification indicating the destination of exports or confirming or otherwise indicating that such cargo will be unloaded or discharged at a particular destination.

(viii) A request to supply a certificate by the owner, master, charterer, or any employee thereof, that a vessel, aircraft, truck or any other mode of transportation is eligible, otherwise eligible, permitted, or allowed to enter, or not restricted from entering, a particular port, country, or group of countries pursuant to the laws, rules, or regulations of that port, country, or group of countries.

(ix) A request to supply a certificate from an insurance company stating that the insurance company has a duly authorized agent or representative within a boycotting country and/or the name and address of such agent.

(x) A request to comply with a term or condition of a transaction that provides that the vendor bear the risk of loss and indemnify the purchaser if the vendor's goods are denied entry into a country for any reason ("risk of loss clause") if such clause was in use by the purchaser prior to January 18, 1978.

(6) No United States person may engage in any transaction or take any other action, either independently or through any other person, with intent to evade the provisions of this part.

(7) From time to time the Department will survey domestic concerns for purposes of determining the worldwide scope of boycott requests received by their controlled foreign

subsidiaries and affiliates with respect to their activities outside United States commerce. This pertains to requests which would be reportable under this section but for the fact that the activities to which the requests relate are outside United States commerce. The information requested will include the number and nature of non-reportable boycott requests received, the action(s) requested, the actions(s) taken in response and the countries in which the requests originate. The results of such surveys, including the names of those surveyed, will be made public.

*(b) Manner of reporting*

(1) Each reportable request must be reported. However, if more than one document (such as an invitation to bid, purchase order, or letter of credit) containing the same boycott request is received as part of the same transaction, only the first such request need be reported. Individual shipments against the same purchase order or letter of credit are to be treated as part of the same transaction. Each different boycott request associated with a given transaction must be reported, regardless of how or when the request is received.

(2) Each United States person actually receiving a reportable request must report that request. However, such person may designate someone else to report on his behalf. For example, a United States company, if authorized, may report on behalf of its controlled foreign subsidiary or affiliates; a freight forwarder, if authorized, may report on behalf of the exporter; and a bank, if authorized, may report on behalf of the beneficiary of a letter of credit. If a person designated to report a request received by another receives an identical request directed to him in connection with the same transaction, he may file one report on behalf of himself and the other person.

(3) Where a person is designated to report on behalf of another, the person receiving the request remains liable for any failure to report or

for any representations made on his behalf. Further, anyone reporting on behalf of another is not relieved of his own responsibility for reporting any boycott request which he receives, even if it is an identical request in connection with the same transaction.

(4) Reports may be submitted by mail or electronically. Mailed paper reports must be submitted in duplicate to:

Report Processing Staff  
Office of Antiboycott Compliance  
U.S. Department of Commerce, Room 6098  
Washington, D.C. 20230

Electronic reports must be submitted in duplicate, by following the prompts on the screen, through the Office of Antiboycott Compliance webpage of the BIS website, <http://bis.doc.gov/index.php/enforcement/oac?id=300>.

Each submission, whether paper or electronic, must be made in accordance with the following requirements:

(i) Where the person receiving the request is a United States person located in the United States, each report of requests must be postmarked or electronically date-stamped by the last day of the month following the calendar quarter in which the request was received (e.g., April 30 for the quarter consisting of January, February, and March).

(ii) Where the person receiving the request is a United States person located outside the United States, each report of requests must be postmarked or electronically date-stamped by the last day of the second month following the calendar quarter in which the request was received (e.g., May 31 for the quarter consisting of January, February, and March).

(5) Mailed paper reports may, at the reporting person's option, be submitted on either a single transaction form (Form BIS-621P, Report of

Request for Restrictive Trade Practice or Boycott, Single Transaction, (revised 10-89)) or on a multiple transaction form (Form BIS-6051P, Report of Request for Restrictive Trade Practice or Boycott, Multiple Transactions, (revised 10-89)).

Electronic reports may be submitted only on the single transaction form, which will electronically reproduce the reporting person's identifying information to facilitate reporting of multiple transactions.

(6) Reports, whether submitted on the paper single transaction form or on the paper multiple transaction form, or submitted electronically, must contain entries for every applicable item on the form, including whether the reporting person intends to take or has taken the action requested. If the reporting person has not decided what action he will take by the time the report is required to be filed, he must later report the action he decides to take within 10 business days after deciding. In addition, anyone filing a report on behalf of another must so indicate and identify that other person.

(7) Each report of a boycott request, whether submitted by mail or electronically, must be accompanied by two copies of the relevant page(s) of any document(s) in which the request appears (*see*, paragraph (c)(2) of this section). For mail submissions, the relevant pages shall be attached in paper format to the report form; for electronic submissions, the relevant pages shall be attached in PDF format to the electronic submission. Reports, whether paper or electronic, may also be accompanied by any additional information relating to the request as the reporting person desires to provide concerning his response to the request. For electronic submissions, such additional information should be provided as a PDF attachment.

(8) Records containing information relating to a reportable boycott request, including a copy of any document(s) in which the request appears, must be maintained by the recipient for a five-year period after receipt of the request. The Department may require that these materials be submitted to it or that it have access to them at any time within that period. (See part 762 of the EAR for additional recordkeeping requirements.)

*(c) Disclosure of information.*

(1) Reports of requests received on or after October 7, 1976, as well as any accompanying documents filed with the reports, have been and will continue to be made available for public inspection and copying, except for certain proprietary information. With respect to reports of requests received on or after August 1, 1978, if the person making the report certifies that a United States person to whom the report relates would be placed at a competitive disadvantage because of the disclosure of information regarding the quantity, description, or value of any articles, materials, and supplies, including related technical data and other information, whether contained in a report or in any accompanying document(s), such information will not be publicly disclosed except upon failure by the reporting entity to edit the public inspection copy of the accompanying document(s) as provided by paragraph (c)(2) of this section, unless the Secretary of Commerce determines that the disclosure would not place the United States person involved at a competitive disadvantage or that it would be contrary to the national interest to withhold the information. In the event the Secretary of Commerce considers making such a determination concerning competitive disadvantage, appropriate notice and an opportunity for comment will be given before any such proprietary information is publicly disclosed. In no event will requests of reporting persons to withhold any information contained

in the report other than that specified in this paragraph be honored.

(2) Because a copy of any document(s) accompanying the report will be made available for public inspection and copying, one copy must be submitted intact and another copy must be edited by the reporting entity to delete the same information which it certified in the report would place a United States person at a competitive disadvantage if disclosed. In addition, the reporting entity may delete from this copy information that is considered confidential and that is not required to be contained in the report (e.g., information related to foreign consignee). This copy should be conspicuously marked with the legend “Public Inspection Copy.” With respect to documents accompanying reports received by the Department on or after July 1, 1979, the public inspection copy will be made available as submitted whether or not it has been appropriately edited by the reporting entity as provided by this paragraph.

(3) Reports and accompanying documents which are available to the public for inspection and copying are located in the:

BIS Freedom of Information Records  
Inspection Facility, Room 4525  
Department of Commerce  
14th Street and Constitution Avenue, N.W.  
Washington, D.C. 20230

Requests to inspect such documents should be addressed to that facility.

(4) The Secretary of Commerce will periodically transmit summaries of the information contained in the reports to the Secretary of State for such action as the Secretary of State, in consultation with the Secretary of Commerce, may deem appropriate for carrying out the policies in section 8(b)(2) of the Export Administration Act of 1979.

EXAMPLES

The following examples are intended to give guidance in determining what is reportable. They are illustrative, not comprehensive.

(i) A, a U.S. manufacturer, is shipping goods to boycotting country Y and is asked by Y to certify that it is not blacklisted by Y's boycott office. The request to A is reportable, because it is a request to A to comply with Y's boycott requirements.

(ii) A, a U.S. manufacturing company, receives an order for tractors from boycotting country Y. Y's order specifies that the tires on the tractors be made by B, another U.S. company. A believes Y has specified B as the tire supplier because otherwise A would have used tires made by C, a blacklisted company, and Y will not take shipment of tractors containing tires made by blacklisted companies.

A must report Y's request for tires made by B, because A has reason to know that B was chosen for boycott reasons.

(iii) Same as (ii), except A knows that Y's request has nothing to do with the boycott but simply reflects Y's preference for tires made by B.

Y's request is not reportable, because it is unrelated to Y's boycott.

(iv) Same as (ii), except A neither knows nor has reason to know why Y has chosen B.

Y's request is not reportable, because A neither knows nor has reason to know that Y's request is based on Y's boycott.

(v) A, a controlled foreign subsidiary of U.S. company B, is a resident of boycotting country Y. A is a general contractor. After being supplied by A with a list of competent subcontractors, A's customer instructs A to use subcontractor C on the project. A believes that

C was chosen because, among other things, the other listed subcontractors are blacklisted.

The instruction to A by its customer that C be used on the project is reportable, because it is a request to comply with Y's boycott requirements.

(vi) A, a controlled foreign subsidiary of U.S. company B, is located in non-boycotting country P. A receives an order for washing machines from boycotting country Y. Y instructs A that a negative certificate of origin must accompany the shipment. The washing machines are made wholly in P, without U.S. components.

Y's instruction to A regarding the negative certificate of origin is not reportable, because the transaction to which it relates is not in U.S. commerce.

(vii) Same as (vi), except that A obtains components from the United States for the purpose of filling the order from Y. Y's instruction to A regarding the negative certificate of origin is reportable, because the transaction to which it relates is in U.S. commerce.

(viii) A, a U.S. construction company, receives in the mail an unsolicited invitation to bid on a construction project in boycotting country Y. The invitation to bid requires those who respond to certify that they do not have any plants or branch offices in boycotted country X. A does not respond.

A's receipt of the unsolicited invitation to bid is not reportable, because the request does not relate to any present or anticipated business of A with or in Y.

(ix) Same as (viii), except that A receives a boycott questionnaire from a central boycott office. A does not do business in any of the boycotting countries involved, and does not anticipate doing any business in those countries. A does not respond.

A's receipt of the boycott questionnaire is not reportable, because it does not relate to any present or anticipated business by A with or in a boycotting country.

(x) A, a U.S. manufacturer, is seeking markets in which to expand its exports. A sends a representative to boycotting country Y to explore Y's potential as a market for A's products. A's representative discusses its products but does not enter into any contracts on that trip. A does, however, hope that sales will materialize in the future. Subsequently, A receives a boycott questionnaire from Y.

A's receipt of the boycott questionnaire is reportable, because the request relates to A's anticipated business with or in a boycotting country. For purposes of determining whether a report is required, it makes no difference whether A responds to the questionnaire, and it makes no difference that actual sales contracts are not in existence or do not materialize.

(xi) Same as (x), except that A's representative enters into a contract to sell A's products to a buyer in boycotting country Y. Subsequently, A receives a boycott questionnaire from Y.

A's receipt of the boycott questionnaire is reportable, because it relates to A's present business with or in a boycotting country. For purposes of determining whether a report is required, it makes no difference whether A responds to the questionnaire.

(xii) A, a U.S. freight forwarder, purchases an exporter's guidebook which includes the import requirements of boycotting country Y. The guidebook contains descriptions of actions which U.S. exporters must take in order to make delivery of goods to Y.

A's acquisition of the guidebook is not reportable, because he has not received a request from anyone.

(xiii) A, a U.S. freight forwarder, is arranging for the shipment of goods to boycotting country Y at the request of B, a U.S. exporter. B asks A to assume responsibility to assure that the documentation accompanying the shipment is in compliance with Y's import requirements. A examines an exporters' guidebook, determines that Y's import regulations require a certification that the insurer of the goods is not blacklisted and asks U.S. insurer C for such a certification.

B's request to A is reportable by A, because it constitutes a request to comply with Y's boycott as of the time A takes action to comply with Y's boycott requirements in response to the request. A's request to C is reportable by C.

(xiv) A, a U.S. freight forwarder, is arranging for the shipment of U.S. goods to boycotting country Y. The manufacturer supplies A with all the necessary documentation to accompany the shipment. Among the documents supplied by the manufacturer is his certificate that he himself is not blacklisted. A transmits the documentation supplied by the manufacturer.

A's action in merely transmitting documents received from the manufacturer is not reportable, because A has received no request to comply with Y's boycott.

(xv) Same as (xiv), except that A is asked by U.S. exporter B to assume the responsibility to assure that the necessary documentation accompanies the shipment whatever that documentation might be. B forwards to A a letter of credit which requires that a negative certificate of origin accompany the bill of lading. A supplies a positive certificate of origin.

Both A and B must report receipt of the letter of credit, because it contains a request to both of them to comply with Y's boycott.

(xvi) Same as (xiv), except that the manufacturer fails to supply a required negative certificate of origin, and A is subsequently asked by a consular official of Y to see to it that the certificate is supplied. A supplies a positive certificate of origin.

The consular official's request to A is reportable by A, because A was asked to comply with Y's boycott requirements by supplying the negative certificate of origin.

(xvii) A, a U.S. manufacturer, is shipping goods to boycotting country Y. Arrangements have been made for freight forwarder B to handle the shipment and secure all necessary shipping certifications. B notes that the letter of credit requires that the manufacturer supply a negative certificate of origin and B asks A to do so. A supplies a positive certificate of origin.

B's request to A is reportable by A, because A is asked to comply with Y's boycott requirements by providing the negative certificate.

(xviii) A, a controlled foreign subsidiary of U.S. company B, is a resident of boycotting country Y. A is engaged in oil exploration and drilling operations in Y. In placing orders for drilling equipment to be shipped from the United States, A, in compliance with Y's laws, selects only those suppliers who are not blacklisted.

A's action in choosing non-blacklisted suppliers is not reportable, because A has not received a request to comply with Y's boycott in making these selections.

(xix) A, a controlled foreign subsidiary of U.S. company B, is seeking permission to do business in boycotting country Y. Before being granted such permission, A is asked to sign an agreement to comply with Y's boycott laws.

The request to A is reportable, because it is a request that expressly requires compliance with Y's boycott law and is received in connection with A's anticipated business in Y.

(xx) A, a U.S. bank, is asked by a firm in boycotting country Y to confirm a letter of credit in favor of B, a U.S. company. The letter of credit calls for a certificate from B that the goods to be supplied are not produced by a firm blacklisted by Y. A informs B of the letter of credit, including its certification condition, and sends B a copy.

B must report the certification request contained in the letter of credit, and A must report the request to confirm the letter of credit containing the boycott condition, because both are being asked to comply with Y's boycott.

(xxi) Same as (xx), except that the letter of credit calls for a certificate from the beneficiary that the goods will not be shipped on a vessel that will call at a port in boycotted country X before making delivery in Y.

The request is not reportable, because it is a request of a type deemed by this section to be in common use for non-boycott purposes.

(xxii) A, a U.S. company, receives a letter of credit from boycotting country Y stating that on no condition may a bank blacklisted by Y be permitted to negotiate the credit.

A's receipt of the letter of credit is reportable, because it contains a request to A to comply with Y's boycott requirements.

(xxiii) A, a U.S. bank, receives a demand draft from B, a U.S. company, in connection with B's shipment of goods to boycotting country Y. The draft contains a directive that it is valid in all countries except boycotted country X.

A's receipt of the demand draft is reportable, because it contains a request to A to comply with Y's boycott requirements.

(xxiv) A, a U.S. exporter, receives an order from boycotting country Y. On the order is a

legend that A's goods, invoices, and packaging must not bear a six-pointed star or other symbol of boycotted country X.

A's receipt of the order is reportable, because it contains a request to comply with Y's boycott requirements.

(xxv) Same as (xxiv), except the order contains a statement that goods exported must not represent part of war reparations to boycotted country X.

A's receipt of the order is reportable, because it contains a request to A to comply with Y's boycott requirements.

(xxvi) A, a U.S. contractor, is negotiating with boycotting country Y to build a school in Y. During the course of the negotiations, Y suggests that one of the terms of the construction contract be that A agree not to import materials produced in boycotted country X. It is A's company policy not to agree to such a contractual clause, and A suggests that instead it agree that all of the necessary materials will be obtained from U.S. suppliers. Y agrees to A's suggestion and a contract is executed.

A has received a reportable request, but, for purposes of reporting, the request is deemed to be received when the contract is executed.

(xxvii) Same as (xxvi), except Y does not accept A's suggested alternative clause and negotiations break off.

A's receipt of Y's request is reportable. For purposes of reporting, it makes no difference that A was not successful in the negotiations. The request is deemed to be received at the time the negotiations break off.

(xxviii) A, a U.S. insurance company, is insuring the shipment of drilling equipment to boycotting country Y. The transaction is being financed by a letter of credit which requires that A certify that it is not blacklisted by Y. Freight

forwarder B asks A to supply the certification in order to satisfy the requirements of the letter of credit.

The request to A is reportable by A, because it is a request to comply with Y's boycott requirements.

(xxix) A, a U.S. manufacturer, is engaged from time-to-time in supplying drilling rigs to company B in boycotting country Y. B insists that its suppliers sign contracts which provide that, even after title passes from the supplier to B, the supplier will bear the risk of loss and indemnify B if goods which the supplier has furnished are denied entry into Y for whatever reason. A knows or has reason to know that this contractual provision is required by B because of Y's boycott, and that B has been using the provision since 1977. A receives an order from B which contains such a clause.

B's request is not reportable by A, because the request is deemed to be not reportable by these regulations if the provision was in use by B prior to January 18, 1978.

(xxx) Same as (xxix), except that A does not know when B began using the provision.

Unless A receives information from B that B introduced the term prior to January 18, 1978, A must report receipt of the request.

(xxxi) A, a U.S. citizen, is a shipping clerk for B, a U.S. manufacturing company. In the course of his employment, A receives an order for goods from boycotting country Y. The order specifies that none of the components of the goods is to be furnished by blacklisted firms.

B must report the request received by its employee, A, acting in the scope of his employment. Although A is a U.S. person, such an individual does not have a separate obligation to report requests received by him in his capacity as an employee of B.

(xxxii) U.S. exporter A is negotiating a transaction with boycotting country Y. A knows that at the conclusion of the negotiations he will be asked by Y to supply certain boycott-related information and that such a request is reportable. In an effort to forestall the request and thereby avoid having to file a report, A supplies the information in advance.

A is deemed to have received a reportable request.

(xxxiii) A, a controlled foreign affiliate of U.S. company B, receives an order for computers from boycotting country Y and obtains components from the United States for the purpose of filling the order. Y instructs A that a negative certificate of origin must accompany the shipment.

Y's instruction to A regarding the negative certificate of origin is reportable by A. Moreover, A may designate B or any other person to report on its behalf. However, A remains liable for any failure to report or for any representations made on its behalf.

(xxxiv) U.S. exporter A, in shipping goods to boycotting country Y, receives a request from the customer in Y to state on the bill of lading that the vessel is allowed to enter Y's ports. The request further states that a certificate from the owner or master of the vessel to that effect is acceptable.

The request A received from his customer in Y is not reportable because it is a request of a type deemed to be not reportable by these regulations. (A may not make such a statement on the bill of lading himself, if he knows or has reason to know it is requested for a boycott purpose.)

(xxxv) U.S. exporter A, in shipping goods to boycotting country Y, receives a request from the customer in Y to furnish a certificate from the owner of the vessel that the vessel is permitted to call at Y's ports.

The request A received from his customer in Y is not reportable because it is a request of a type deemed to be not reportable by these regulations.

(xxxvi) U.S. exporter A, in shipping goods to boycotting country Y, receives a request from the customer in Y to furnish a certificate from the insurance company indicating that the company has a duly authorized representative in country Y and giving the name of that representative.

The request A received from his customer in Y is not reportable if it was received after the effective date of these rules, because it is a request of a type deemed to be not reportable by these regulations.

**SUPPLEMENT NO. 1 TO PART 760 - INTERPRETATIONS**

It has come to the Department's attention that some U.S. persons are being or may be asked to comply with new boycotting country requirements with respect to shipping and insurance certifications and certificates of origin. It has also come to the Department's attention that some U.S. persons are being or may be asked to agree to new contractual provisions in connection with certain foreign government or foreign government agency contracts. In order to maximize its guidance with respect to section 8 of the Export Administration Act of 1979, as amended (50 U.S.C. app. 2407) and part 760 of the EAR, the Department hereby sets forth its views on these certifications and contractual clauses.<sup>1</sup>

I. CERTIFICATIONS

§760.2(d) of this part prohibits a U.S. person from furnishing or knowingly agreeing to furnish:

“Information concerning his or any other person's past, present or proposed business relationships:

- (i) With or in a boycotted country;
- (ii) With any business concern organized under the laws of a boycotted country;
- (iii) With any national or resident of a boycotted country; or
- (iv) With any other person who is known or believed to be restricted from having any business relationship with or in a boycotting country.”

---

<sup>1</sup> The Department originally issued this interpretation pursuant to the Export Administration Amendments Act of 1979 (Public Law 95-52) and the regulations on restrictive trade practices and boycotts (15 CFR 369) published on January 25, 1978 (43 FR 3508) and contained in the 15 CFR edition revised as of January 1, 1979.

This prohibition, like all others under part 760, applies only with respect to a U.S. person's activities in the interstate or foreign commerce of the United States and only when such activities are undertaken with intent to comply with, further, or support an unsanctioned foreign boycott. (§760.2(d)(5) of this part.)

This prohibition does not apply to the furnishing of normal business information in a commercial context. (§760.2(d)(3) of this part). Normal business information furnished in a commercial context does not cease to be such simply because the party soliciting the information may be a boycotting country or a national or resident thereof. If the information is of a type which is generally sought for a legitimate business purpose (such as determining financial fitness, technical competence, or professional experience), the information may be furnished even if the information could be used, or without the knowledge of the person supplying the information is intended to be used, for boycott purposes. (§760.2(d)(4) of this part).

The new certification requirements and the Department's interpretation of the applicability of part 760 thereto are as follows:

A. *Certificate of origin.* A certificate of origin is to be issued by the supplier or exporting company and authenticated by the exporting country, attesting that the goods exported to the boycotting country are of purely indigenous origin, and stating the name of the factory or the manufacturing company. To the extent that the goods as described on the certificate of origin are not solely and exclusively products of their country of origin indicated thereon, a declaration must be appended to the certificate of origin giving the name of the supplier/manufacturer and declaring:

“The undersigned, \_\_\_\_\_, does hereby declare on behalf of the above-named

supplier/manufacturer, that certain parts or components of the goods described in the attached certificate of origin are the products of such country or countries, other than the country named therein as specifically indicated hereunder:

*Country of origin and percentage of value of parts or components relative to total shipment*

- 1. \_\_\_\_\_.
- 2. \_\_\_\_\_.
- 3. \_\_\_\_\_.

Dated: \_\_\_\_\_.

Signature \_\_\_\_\_.

Sworn to before me, this \_\_\_\_\_ day of \_\_\_\_\_, 20\_\_\_. Notary Seal.”

INTERPRETATION

It is the Department’s position that furnishing a positive certificate of origin, such as the one set out above, falls within the exception contained in §760.3(c) of this part for compliance with the import and shipping document requirements of a boycotting country. See §760.3(c) of this part and examples (i) and (ii) thereunder.

*B. Shipping certificate.* A certificate must be appended to the bill of lading stating: (1) Name of vessel; (2) Nationality of vessel; and (3) Owner of vessel, and declaring:

“The undersigned does hereby declare on behalf of the owner, master, or agent of the above-named vessel that said vessel is not registered in the boycotted country or owned by nationals or residents of the boycotted country and will not call at or pass through

any boycotted country port enroute to its boycotting country destination.

“The undersigned further declares that said vessel is otherwise eligible to enter into the ports of the boycotting country in conformity with its laws and regulations.

Sworn to before me, this \_\_\_\_\_ day of \_\_\_\_\_, 20\_\_\_. Notary Seal.”

INTERPRETATION

It is the Department’s position that furnishing a certificate, such as the one set out above, stating: (1) The name of the vessel, (2) The nationality of the vessel, and (3) The owner of the vessel and further declaring that the vessel: (a) Is not registered in a boycotted country, (b) Is not owned by nationals or residents of a boycotted country, and (c) Will not call at or pass through a boycotted country port enroute to its destination in a boycotting country falls within the exception contained in §760.3(c) for compliance with the import and shipping document requirements of a boycotting country. See §760.3(c) and examples (vii), (viii), and (ix) thereunder.

It is also the Department’s position that the owner, charterer, or master of a vessel may certify that the vessel is “eligible” or “otherwise eligible” to enter into the ports of a boycotting country in conformity with its laws and regulations. Furnishing such a statement pertaining to one’s own eligibility offends no prohibition under this part 760. See §760.2(f), example (xiv).

On the other hand, where a boycott is in force, a declaration that a vessel is “eligible” or “otherwise eligible” to enter the ports of the boycotting country necessarily conveys the information that the vessel is not blacklisted or otherwise restricted from having a business relationship with the boycotting country. See §760.3(c), examples (vi), (xi), and (xii). Where a person other than the vessel’s owner, charterer, or master furnishes such a statement, that is

tantamount to his furnishing a statement that he is not doing business with a blacklisted person or is doing business only with non-blacklisted persons. Therefore, it is the Department's position that furnishing such a certification (which does not reflect customary international commercial practice) by anyone other than the owner, charterer, or master of a vessel would fall within the prohibition set forth in §760.2(d) unless it is clear from all the facts and circumstances that the certification is not required for a boycott reason. See §760.2(d)(3) and (4). See also Part A., "Permissible Furnishing of Information," of Supplement No. 5 to this part.

*C. Insurance certificate.* A certificate must be appended to the insurance policy stating: (1) Name of insurance company; (2) Address of its principal office; and (3) Country of its incorporation, and declaring:

"The undersigned, \_\_\_\_\_, does hereby certify on behalf of the above-named insurance company that the said company has a duly qualified and appointed agent or representative in the boycotting country whose name and address appear below:

Name of agent/representative and address in the boycotting country.

Sworn to before me this \_\_\_\_ day of \_\_\_\_\_, 20 \_\_\_\_\_. Notary Seal."

#### INTERPRETATION

It is the Department's position that furnishing the name of the insurance company falls within the exception contained in §760.3(c) for compliance with the import and shipping document requirements of a boycotting country. See §760.3(c)(1)(v) and examples (v) and (x) thereunder. In addition, it is the Department's position that furnishing a certificate, such as the one set out above, stating the address of the

insurance company's principal office and its country of incorporation offends no prohibition under this part 760 unless the U.S. person furnishing the certificate knows or has reason to know that the information is sought for the purpose of determining that the insurance company is neither headquartered nor incorporated in a boycotted country. See §760.2(d)(1)(i).

It is also the Department's position that the insurer, himself, may certify that he has a duly qualified and appointed agent or representative in the boycotting country and may furnish the name and address of his agent or representative. Furnishing such a statement pertaining to one's own status offends no prohibition under this part 760. See §760.2(f), example (xiv).

On the other hand, where a boycott is in force, a declaration that an insurer "has a duly qualified and appointed agent or representative" in the boycotting country necessarily conveys the information that the insurer is not blacklisted or otherwise restricted from having a business relationship with the boycotting country. See §760.3(c), example (v). Therefore, it is the Department's position that furnishing such a certification by anyone other than the insurer would fall within the prohibition set forth in §760.2(d) unless it is clear from all the facts and circumstances that the certification is not required for a boycott reason. See §760.2(d)(3) and (4).

#### II. CONTRACTUAL CLAUSES

The new contractual requirements and the Department's interpretation of the applicability of part 760 thereto are as follows:

*A. Contractual clause regarding import laws of boycotting country.* "In connection with the performance of this contract the Contractor/Supplier acknowledges that the import and customs laws and regulations of the boycotting country shall apply to the furnishing and shipment of any products or components

thereof to the boycotting country. The Contractor/Supplier specifically acknowledges that the aforementioned import and customs laws and regulations of the boycotting country prohibit, among other things, the importation into the boycotting country of products or components thereof: (1) Originating in the boycotted country; (2) Manufactured, produced, or furnished by companies organized under the laws of the boycotted country; and (3) Manufactured, produced, or furnished by nationals or residents of the boycotted country.”

#### INTERPRETATION

It is the Department’s position that an agreement, such as the one set out in the first sentence above, that the import and customs requirements of a boycotting country shall apply to the performance of a contract does not, in and of itself, offend any prohibition under this part 760. See §760.2(a)(5) and example (iii) under “Examples of Agreements To Refuse To Do Business.” It is also the Department’s position that an agreement to comply generally with the import and customs requirements of a boycotting country does not, in and of itself, offend any prohibition under this part 760. See §760.2(a)(5) and examples (iv) and (v) under “Examples of Agreements To Refuse To Do Business.” In addition, it is the Department’s position that an agreement, such as the one set out in the second sentence above, to comply with the boycotting country’s import and customs requirements prohibiting the importation of products or components: (1) Originating in the boycotted country; (2) Manufactured, produced, or furnished by companies organized under the laws of the boycotted country; or (3) Manufactured, produced, or furnished by nationals or residents of the boycotted country falls within the exception contained in §760.3(a) for compliance with the import requirements of a boycotting country. See §760.3(a) and example (ii) thereunder.

The Department notes that a United States person may not furnish a negative certification regarding the origin of goods or their components even though the certification is furnished in response to the import and shipping document requirements of the boycotting country. See §760.3(c) and examples (i) and (ii) thereunder, and §760.3(a) and example (ii) thereunder.

B. *Contractual clause regarding unilateral and specific selection.* “The Government of the boycotting country (or the First Party), in its exclusive power, reserves its right to make the final unilateral and specific selection of any proposed carriers, insurers, suppliers of services to be performed within the boycotting country, or of specific goods to be furnished in accordance with the terms and conditions of this contract.”

#### INTERPRETATION

It is the Department’s position that an agreement, such as the one set out above, falls within the exception contained in §760.3(d) of this part for compliance with unilateral selections. However, the Department notes that whether a U.S. person may subsequently comply or agree to comply with any particular selection depends upon whether that selection meets all the requirements contained in §760.3(d) of this part for compliance with unilateral selections. For example, the particular selection must be unilateral and specific, particular goods must be specifically identifiable as to their source or origin at the time of their entry into the boycotting country, and all other requirements contained in §760.3(d) of this part must be observed.

**SUPPLEMENT NO. 2 TO PART 760 - INTERPRETATION**

The Department hereby sets forth its views on whether the furnishing of certain shipping and insurance certificates in compliance with boycotting country requirements violates the provisions of section 8 of the Export Administration Act of 1979, as amended (50 U.S.C. app. 2407) and part 760 of the EAR<sup>1</sup>, as follows:

(i) “The owner, charterer or master of a vessel may certify that the vessel is ‘eligible’ or ‘otherwise eligible’ to enter into the ports of a boycotting country in conformity with its laws and regulations;”

(ii) “The insurer, himself, may certify that he has a duly qualified and appointed agent or representative in the boycotting country and may furnish the name and address of his agent or representative.”

Furnishing such certifications by anyone other than:

(i) The owner, charterer or master of a vessel, or

(ii) The insurer would fall within the prohibition set forth in §760.2(d) of this part, “unless it is clear from all the facts and circumstances that these certifications are not required for a boycott reason.” See §760.2(d)(3) and (4) of this part.

The Department has received from the Kingdom of Saudi Arabia a clarification that the shipping and insurance certifications are required by Saudi Arabia in order to:

---

<sup>1</sup> The Department originally issued this interpretation on April 21, 1978 (43 FR 16969) pursuant to the Export Administration Amendments Act of 1977 (Public Law 95-52) and the regulations on restrictive trade practices and boycotts (15 CFR 369) published on January 25, 1978 (43 FR 3508) and contained in the 15 CFR edition revised as of January 1, 1979.

(i) Demonstrate that there are no applicable restrictions under Saudi laws or regulations pertaining to maritime matters such as the age of the ship, the condition of the ship, and similar matters that would bar entry of the vessel into Saudi ports; and

(ii) Facilitate dealings with insurers by Saudi Arabian importers whose ability to secure expeditious payments in the event of damage to insured goods may be adversely affected by the absence of a qualified agent or representative of the insurer in Saudi Arabia. In the Department’s judgment, this clarification constitutes sufficient facts and circumstances to demonstrate that the certifications are not required by Saudi Arabia for boycott reasons.

On the basis of this clarification, it is the Department’s position that any United States person may furnish such shipping and insurance certificates required by Saudi Arabia without violating §760.2(d) of this part. Moreover, under these circumstances, receipts of requests for such shipping and insurance certificates from Saudi Arabia are not reportable.

It is still the Department’s position that furnishing such a certificate pertaining to one’s own eligibility offends no prohibition under part 760. See §760.2(f) of this part, example (xiv). However, absent facts and circumstances clearly indicating that the certifications are required for ordinary commercial reasons as demonstrated by the Saudi clarification, furnishing certifications about the eligibility or blacklist status of any other person would fall within the prohibition set forth in §760.2(d) of this part, and receipts of requests for such certifications are reportable.

It also remains the Department’s position that where a United States person asks an insurer or carrier of the exporter’s goods to self-certify, such request offends no prohibition under this part. However, where a United States person asks anyone other than an insurer or carrier of

**Restrictive Trade Practices or Boycotts**

the exporter's goods to self-certify, such requests will be considered by the Department as evidence of the requesting person's refusal to do business with those persons who cannot or will not furnish such a self-certification. For example, if an exporter-beneficiary of a letter of credit asks his component suppliers to self-certify, such a request will be considered as evidence of his refusal to do business with those component suppliers who cannot or will not furnish such a self-certification.

**Supplement No. 2 to Part 760—page 2**

The Department wishes to emphasize that notwithstanding the fact that self-certifications are permissible, it will closely scrutinize the activities of all United States persons who provide such self-certifications, including insurers and carriers, to determine that such persons have not taken any prohibited actions or entered into any prohibited agreements in order to be able to furnish such certifications.

**SUPPLEMENT NO. 3 TO PART 760 - INTERPRETATION**

Pursuant to Article 2, Annex II of the Peace Treaty between Egypt and Israel, Egypt's participation in the Arab economic boycott of Israel was formally terminated on January 25, 1980. On the basis of this action, it is the Department's position that certain requests for information, action or agreement which were considered boycott-related by implication now cannot be presumed boycott-related and thus would not be prohibited or reportable under the Regulations. For example, a request that an exporter certify that the vessel on which it is shipping its goods is eligible to enter Arab Republic of Egypt ports has been considered a boycott-related request that the exporter could not comply with because Egypt has a boycott in force against Israel (see 43 FR 16969, April 21, 1978 or the 15 CFR edition revised as of January 1, 1979). Such a request after January 25, 1980 would not be presumed boycott-related because the underlying boycott requirement/basis for the

certification has been eliminated. Similarly, a U.S. company would not be prohibited from complying with a request received from Egyptian government officials to furnish the place of birth of employees the company is seeking to take to Egypt, because there is no underlying boycott law or policy that would give rise to a presumption that the request was boycott-related.

U.S. persons are reminded that requests that are on their face boycott-related or that are for action obviously in furtherance or support of an unsanctioned foreign boycott are subject to the Regulations, irrespective of the country or origin. For example, requests containing references to "blacklisted companies", "Israel boycott list", "non-Israeli goods" or other phrases or words indicating boycott purpose would be subject to the appropriate provisions of the Department's antiboycott regulations.

**SUPPLEMENT NO. 4 TO PART 760 - INTERPRETATION**

The question has arisen how the definition of U.S. commerce in the antiboycott regulations (15 CFR part 760) applies to a shipment of foreign-made goods when U.S.-origin spare parts are included in the shipment. Specifically, if the shipment of foreign goods falls outside the definition of U.S. commerce, will the inclusion of U.S.-origin spare parts bring the entire transaction into U.S. commerce?

Section 760.1(d)(12) provides the general guidelines for determining when U.S.-origin goods shipped from a controlled in fact foreign subsidiary are outside U.S. commerce. The two key tests of that provision are that the goods were “(i) ... acquired without reference to a specific order from or transaction with a person outside the United States; and (ii) ... further manufactured, incorporated into, refined into, or reprocessed into another product.” Because the application of these two tests to spare parts does not conclusively answer the U.S. commerce question, the Department is presenting this clarification.

In the cases brought to the Department's attention, an order for foreign-origin goods was placed with a controlled in fact foreign subsidiary of a United States company. The foreign goods contained components manufactured in the United States and in other countries, and the order included a request for extras of the U.S. manufactured components (spare parts) to allow the customer to repair the item. Both the foreign manufactured product and the U.S. spare parts were to be shipped from the general inventory of the foreign subsidiary. Since the spare parts, if shipped by themselves, would be in U.S. commerce as that term is defined in the Regulations, the question was whether including them with the foreign manufactured item would bring the entire shipment into U.S. commerce. The Department has decided that it will not and presents the following specific guidance.

As used above, the term “spare parts” refers to parts of the quantities and types normally and customarily ordered with a product and kept on hand in the event they are needed to assure prompt repair of the product. Parts, components or accessories that improve or change the basic operations or design characteristics, for example, as to accuracy, capability or productivity, are not spare parts under this definition.

Inclusion of U.S.-origin spare parts in a shipment of products which is otherwise outside U.S. commerce will not bring the transaction into U.S. commerce if the following conditions are met:

- (I) The parts included in the shipment are acquired from the United States by the controlled in fact foreign subsidiary without reference to a specific order from or transaction with a person outside the United States;
- (II) The parts are identical to the corresponding United States-origin parts which have been manufactured, incorporated into or reprocessed into the completed product;
- (III) The parts are of the quantity and type normally and customarily ordered with the completed product and kept on hand by the firm or industry of which the firm is a part to assure prompt repair of the product; and
- (IV) The parts are covered by the same order as the completed product and are shipped with or at the same time as the original product.

The Department emphasizes that unless each of the above conditions is met, the inclusion of United States-origin spare parts in an order for a foreign-manufactured or assembled product will bring the entire transaction into the interstate or foreign commerce of the United States for purposes of part 760.

**SUPPLEMENT NO. 5 TO PART 760 - INTERPRETATION***A. Permissible Furnishing of Information*

The information outlined below may be furnished in response to boycott-related requests from boycotting countries or others. This information is, in the view of the Department, not prohibited by the Regulations. Thus, a person does not have to qualify under any of the exceptions to be able to make the following statements. Such statements can be made, however, only by the person indicated and under the circumstances described. These statements should not be used as a point of departure or analogy for determining the permissibility of other types of statements. The Department's view that these statements are not contrary to the prohibitions contained in antiboycott provisions of the Regulations is limited to the specific statement in the specific context indicated.

1. A U.S. person may always provide its own name, address, place of incorporation (“nationality”), and nature of business.

2. A U.S. person may state that it is not on a blacklist, or restricted from doing business in a boycotting country. A company may not make that statement about its subsidiaries or affiliates--only about itself. A U.S. person may not say that there is no reason for it to be blacklisted. To make that statement would provide directly or by implication information that may not be provided. A U.S. person may inquire about the reasons it is blacklisted if it learns that it is on a blacklist (see §760.2(d) of this part example (xv)).

3. A U.S. person may describe in detail its past dealings with boycotting countries; may state in which boycotting countries its trademarks are registered; and may specify in which boycotting countries it is registered or qualified to do business. In general, a U.S. person is free to furnish any information it wishes about the nature and extent of its commercial dealings with boycotting countries.

4. A U.S. person may state that many U.S. firms or individuals have similar names and that it believes that it may be confused with a similarly named entity. A U.S. person may not state that it does or does not have an affiliation or relationship with such similarly named entity.

5. A U.S. person may state that the information requested is a matter of public record in the United States. However, the person may not direct the inquirer to the location of that information, nor may the U.S. person provide or cause to be provided such information.

*B. Availability of the Compliance with Local Law Exception to Establish a Foreign Branch*

Section 760.3(g), the Compliance With Local Law exception, permits U.S. persons, who are bona fide residents of a boycotting country, to take certain limited, but otherwise prohibited, actions, if they are required to do so in order to comply with local law.

Among these actions is the furnishing of non-discriminatory information. Examples (iv) through (vi) under “Examples of Bona Fide Residency” indicate that a company seeking to become a bona fide resident within a boycotting country may take advantage of the exception for the limited purpose of furnishing information required by local law to obtain resident status. Exactly when and how this exception is available has been the subject of a number of inquiries. It is the Department's view that the following conditions must be met for a non-resident company to be permitted to furnish otherwise prohibited information for the limited purpose of seeking to become a bona fide resident:

1. The company must have a legitimate business reason for seeking to establish a branch or other resident operation in the boycotting country.

### **Restrictive Trade Practices or Boycotts**

(Removal from the blacklist does not constitute such a reason.)

2. The local operation it seeks to establish must be similar or comparable in nature and operation to ones the company operates in other parts of the world, unless local law or custom dictates a significantly different form.
3. The person who visits the boycotting country to furnish the information must be the official whose responsibility ordinarily includes the creation and registration of foreign operations (i.e., the chairman of the board cannot be flown in to answer boycott questions unless the chairman of the board is the corporate official who ordinarily goes into a country to handle foreign registrations).
4. The information provided must be that which is ordinarily known to the person establishing

### **Supplement No. 5 to Part 760—page 2**

the foreign branch. Obviously, at the time of establishment, the foreign branch will have no information of its own knowledge. Rather, the information should be that which the responsible person has of his own knowledge, or that he would have with him as incidental and necessary to the registration and establishment process. As a general rule, such information would not include such things as copies of agreements with boycotted country concerns or detailed information about the person's dealings with blacklisted concerns.

5. It is not necessary that documents prepared in compliance with this exception be drafted or executed within the boycotting country. The restrictions on the type of information which may be provided and on who may provide it apply regardless of where the papers are prepared or signed.

**SUPPLEMENT NO. 6 TO PART 760 - INTERPRETATION**

The antiboycott regulations prohibit knowing agreements to comply with certain prohibited requests and requirements of boycotting countries, regardless of how these terms are stated. Similarly, the reporting rules require that a boycott related “solicitation, directive, legend or instruction that asks for information or that asks that a United States person take or refrain from taking a particular action” be reported. Questions have frequently arisen about how particular requirements in the form of directive or instructions are viewed under the antiboycott regulations, and we believe that it will add clarity to the regulations to provide a written interpretation of how three of these terms are treated under the law. The terms in question appear frequently in letters of credit, but may also be found on purchase orders or other shipping or sale documents. They have been brought to the attention of the Department by numerous persons. The terms are, or are similar to, the following: (1) Goods of boycotted country origin are prohibited; (2) No six-pointed stars may be used on the goods, packing or cases; (3) Neither goods nor packing shall bear any symbols prohibited in the boycotting country.

***(a) Goods of boycotted country origin prohibited***

This term is very common in letters of credit from Kuwait and may also appear from time-to-time in invitations to bid, contracts, or other trade documents. It imposes a condition or requirement compliance with which is prohibited, but permitted by an exception under the Regulations (see §760.2(a) and §760.3(a)). It is reportable by those parties to the letter of credit or other transaction that are required to take or refrain from taking some boycott related action by the request. Thus the bank must report the request because it is a term or condition of the letter of credit that it is handling, and the exporter-beneficiary must report the request because the exporter determines the origin of the

goods. The freight forwarder does not have to report this request because the forwarder has no role or obligation in selecting the goods. However, the freight forwarder would have to report a request to furnish a certificate that the goods do not originate in or contain components from a boycotted country. See §760.5, examples (xii)-(xvii).

***(b) No six-pointed stars may be used on the goods, packing or cases***

This term appears from time-to-time on documents from a variety of countries. The Department has taken the position that the six-pointed star is a religious symbol. See §760.2(b), example (viii) of this part. Agreeing to this term is prohibited by the Regulations and not excepted because it constitutes an agreement to furnish information about the religion of a U.S. person. See §760.2(c) of this part. If a person proceeds with a transaction in which this is a condition at any stage of the transaction, that person has agreed to the condition in violation of the Regulations. It is not enough to ignore the condition. Exception must affirmatively be taken to this term or it must be stricken from the documents of the transaction. It is reportable by all parties to the transaction that are restricted by it. For example, unlike the situation described in (a) above, the freight forwarder would have to report this request because his role in the transaction would involve preparation of the packing and cases. The bank and exporter would both have to report, of course, if it were a term in a letter of credit. Each party would be obligated affirmatively to seek an amendment or deletion of the term.

***(c) Neither goods nor packaging shall bear any symbols prohibited in the boycotting country***

This term appears from time-to-time in letters of credit and shipping documents from Saudi Arabia. In our view, it is neither prohibited, nor

**Restrictive Trade Practices or Boycotts**

reportable because it is not boycott-related. There is a wide range of symbols that are prohibited in Saudi Arabia for a variety of reasons, many having to do with that nation's cultural and religious beliefs. On this basis, we

**Supplement No. 6 to Part 760—page 2**

do not interpret the term to be boycott related. See §760.2(a)(5) and §760.5(a)(5)(v) of this part.

**SUPPLEMENT NO. 7 TO PART 760 - INTERPRETATION***Prohibited refusal to do business.*

When a boycotting country rejects for boycott-related reasons a shipment of goods sold by a United States person, the United States person selling the goods may return them to its inventory or may re-ship them to other markets (the United States person may not return them to the original supplier and demand restitution). The U.S. person may then make a non-boycott based selection of another supplier and provide the goods necessary to meet its obligations to the boycotting customer in that particular transaction without violating §760.2(a) of this part. If the United States person receives another order from the same boycotting country for similar goods, the Department has determined that a boycott-based refusal by a United States person to ship goods from the supplier whose goods were previously rejected would constitute a prohibited refusal to do business under §760.2(a) of this part. The Department will presume that filling such an order with alternative goods is evidence of the person's refusal to deal with the original supplier.

The Department recognizes the limitations this places on future transactions with a boycotting country once a shipment of goods has been rejected. Because of this, the Department wishes to point out that, when faced with a boycotting country's refusal to permit entry of the particular goods, a United States person may state its obligation to abide by the requirements of United States law and indicate its readiness to comply with the unilateral and specific selection of goods by the boycotting country in accordance with §760.3(d). That section provides, in pertinent part, as follows:

“A United States person may comply or agree to comply in the normal course of business with the unilateral and specific selection by a boycotting country ... of ... specific goods, ... provided that ... with respect to goods, the items,

in the normal course of business, are identifiable as to their source or origin at the time of their entry into the boycotting country by (a) uniqueness of design or appearance or (b) trademark, trade name, or other identification normally on the items themselves, including their packaging.”

The United States person may also provide certain services in advance of the unilateral selection by the boycotting country, such as the compilation of lists of qualified suppliers, so long as such services are customary to the type of business the United States person is engaged in, and the services rendered are completely non-exclusionary in character (i.e., the list of qualified suppliers would have to include the supplier whose goods had previously been rejected by the boycotting country, if they were fully qualified). See §760.2(a)(6) of this part for a discussion of the requirements for the provision of these services.

The Department wishes to emphasize that the unilateral selection exception in §760.3(d) of this part will be construed narrowly, and that all its requirements and conditions must be met, including the following:

- Discretion for the selection must be exercised by a boycotting country; or by a national or resident of a boycotting country;
- The selection must be stated in the affirmative specifying a particular supplier of goods;
- While a permissible selection may be boycott based, if the United States person knows or has reason to know that the purpose of the selection is to effect discrimination against any United States person on the basis of race, religion, sex, or national origin, the person may not comply under any circumstances.

The Department cautions United States persons confronted with the problem or concern over the

**Restrictive Trade Practices or Boycotts**

**Supplement No. 7 to Part 760—page 2**

boycott-based rejection of goods shipped to a boycotting country that the adoption of devices such as “risk of loss” clauses, or conditions that make the supplier financially liable if his or her goods are rejected by the boycotting country for boycott reasons are presumed by the Department

to be evasion of the statute and regulations, and as such are prohibited by §760.4 of this part, unless adopted prior to January 18, 1978. See §760.4(d) of this part.

**SUPPLEMENT NO. 8 TO PART 760 - INTERPRETATION***Definition of Interstate or Foreign Commerce of the United States*

When United States persons (as defined by the antiboycott regulations) located within the United States purchase or sell goods or services located outside the United States, they have engaged in an activity within the foreign commerce of the United States. Although the goods or services may never physically come within the geographic boundaries of the several states or territories of the United States, legal ownership or title is transferred from a foreign nation to the United States person who is located in the United States. In the case of a purchase, subsequent resale would also be within United States commerce.

It is the Department's view that the terms “sale” and “purchase” as used in the regulations are not limited to those circumstances where the goods or services are physically transferred to the person who acquires title. The EAR define the activities that serve as the transactional basis for U.S. commerce as those involving the “sale, purchase, or transfer” of goods or services. In the Department's view, as used in the antiboycott regulations, “transfer” contemplates physical

movement of the goods or services between the several states or territories and a foreign country, while “sale” and “purchase” relate to the movement of ownership or title.

**This interpretation applies only to those circumstances in which the person located within the United States buys or sells goods or services for its own account.** Where the United States person is engaged in the brokerage of foreign goods, i.e., bringing foreign buyers and sellers together and assisting in the transfer of the goods, the sale or purchase itself would not ordinarily be considered to be within U.S. commerce. The brokerage service, however, would be a service provided from the United States to the parties and thus an activity within U.S. commerce and subject to the antiboycott laws. See §760.1(d)(3).

The Department cautions that United States persons who alter their normal pattern of dealing to eliminate the passage of ownership of the goods or services to or from the several states or territories of the United States in order to avoid the application of the antiboycott regulations would be in violation of §760.4 of this part.

**SUPPLEMENT NO. 9 TO PART 760 - INTERPRETATION***Activities Exclusively Within a Boycotting Country--Furnishing Information*

§760.3(h) of this part provides that a United States person who is a bona fide resident of a boycotting country may comply with the laws of that country with respect to his or her activities exclusively within the boycotting country. Among the types of conduct permitted by this exception is “furnishing information within the host country” §760.3(h)(1)(v) of this part. For purposes of the discussion which follows, the Department is assuming that the person in question is a bona fide resident of the boycotting country as defined in §760.3(g), and that the information to be provided is required by the laws or regulations of the boycotting country, as also defined in §760.3(g) of this part. The only issue this interpretation addresses is under what circumstances the provision of information is “an activity exclusively within the boycotting country.”

The activity of “furnishing information” consists of two parts, the acquisition of the information and its subsequent transmittal. Under the terms of this exception, the information may not be acquired outside the country for the purpose of responding to the requirement for information imposed by the boycotting country. Thus, if an American company which is a bona fide resident of a boycotting country is required to provide information about its dealings with other U.S. firms, the company may not ask its parent corporation in the United States for that information, or make any other inquiry outside the boundaries of the boycotting country. The information must be provided to the boycotting country authorities based on information or knowledge available to the company and its personnel located within the boycotting country at the time the inquiry is received. See §760.3, (h) of this part, examples (iii), (iv), and (v).. Much of the information in the company's possession (transaction and corporate records) may have actually originated outside the

boycotting country, and much of the information known to the employees may have been acquired outside the boycotting country. This will not cause the information to fall outside the coverage of this exception, if the information was sent to the boycotting country or acquired by the individuals in normal commercial context prior to and unrelated to a boycott inquiry or purpose. It should be noted that if prohibited information (about business relations with a boycotted country, for example) has been forwarded to the affiliate in the boycotting country in anticipation of a possible boycott inquiry from the boycotting country government, the Department will not regard this as information within the knowledge of the bona fide resident under the terms of the exception. However, if the bona fide resident possesses the information prior to receipt of a boycott-related inquiry and obtained it in a normal commercial context, the information can be provided pursuant to this exception notwithstanding the fact that, at some point, the information came into the boycotting country from the outside.

The second part of the analysis of “furnishing information” deals with the limitation on the transmittal of the information. It can only be provided within the boundaries of the boycotting country. The bona fide resident may only provide the information to the party that the boycotting country law requires (directly or through an agent or representative within the country) so long as that party is located within the boycotting country. This application of the exception is somewhat easier, since it is relatively simple to determine if the information is to be given to somebody within the country.

Note that in discussing what constitutes furnishing information “exclusively within” the boycotting country, the Department does not address the nature of the transaction or activity that the information relates to. It is the Department's position that the nature of the transaction, including the inception or

completion of the transaction, is not material in analyzing the availability of this exception.

For example, if a shipment of goods imported into a boycotting country is held up at the time of entry, and information from the bona fide resident within that country is legally required to free those goods, the fact that the information may relate to a transaction that began outside the boycotting country is not material. The availability of the exception will be judged based on the activity of the bona fide resident within the country. If the resident provides that information of his or her own knowledge, and provides it to appropriate parties located exclusively within the country, the exception permits the information to be furnished.

Factual variations may raise questions about the application of this exception and the effect of this interpretation. In an effort to anticipate some of these, the Department has set forth below a number of questions and answers. They are incorporated as a part of this interpretation.

1. Q Under this exception, can a company which is a U.S. person and a bona fide resident of the boycotting country provide information to the local boycott office?

A Yes, if local law requires the company to provide this information to the boycott office and all the other requirements are met.

2. Q If the company knows that the local boycott office will forward the information to the Central Boycott Office, may it still provide the information to the local boycott office?

A Yes, if it is required by local law to furnish the information to the local boycott office and all the other requirements are met. The

company has no control over what happens to the information after it is provided to the proper authorities. (There is obvious potential for evasion here, and the Department will examine such occurrences closely.)

3. Q Can a U.S. person who is a bona fide resident of Syria furnish information to the Central Boycott Office in Damascus?

A No, unless the law in Syria specifically requires information to be provided to the Central Boycott Office the exception will not apply. Syria has a local boycott office responsible for enforcing the boycott in that country.

4. Q If a company which is a U.S. person and a bona fide resident of the boycotting country has an import shipment held up in customs of the boycotting country, and is required to provide information about the shipment to get it out of customs, may the company do so?

A Yes, assuming all other requirements are met. The act of furnishing the information is the activity taking place exclusively within the boycotting country. The fact that the information is provided corollary to a transaction that originates or terminates outside the boycotting country is not material.

5. Q If the U.S. person and bona fide resident of the boycotting country is shipping goods out of the boycotting country, and is required to certify to customs officials of the country at the time of export that the goods are not of Israeli origin, may he do so even though the certification relates to an export transaction?

A Yes, assuming all other requirements are met. See number 4 above.

**SUPPLEMENT NO. 10 TO PART 760 - INTERPRETATION**

(a) The words “Persian Gulf” cannot appear on the document.

This term is common in letters of credit from Kuwait and may be found in letters of credit from Bahrain. Although more commonly appearing in letters of credit, the term may also appear in other trade documents.

It is the Department’s view that this term reflects a historical dispute between the Arabs and the Iranians over geographic place names which in no way relates to existing economic boycotts. Thus, the term is neither prohibited nor reportable under the Regulations.

(b) Certify that goods are of U.S.A. origin and *contain no foreign parts*.

This term appears periodically on documents from a number of Arab countries. It is the Department’s position that the statement is a positive certification of origin and, as such, falls within the exception contained in §760.3(c) of this part for compliance with the import and shipping document requirements of a boycotting country. Even though a negative phrase is

contained within the positive clause, the phrase is a non-exclusionary, non-blacklisting statement. In the Department’s view, the additional phrase does not affect the permissible status of the positive certificate, nor does it make the request reportable §760.5(a)(5)(iii) of this part.

(c) Legalization of documents by any Arab consulate except Egyptian Consulate permitted.

This term appears from time to time in letters of credit but also may appear in various other trade documents requiring legalization and thus is not prohibited, and a request to comply with the statement is not reportable. Because a number of Arab states do not have formal diplomatic relations with Egypt, they do not recognize Egyptian embassy actions. The absence of diplomatic relations is the reason for the requirement. In the Department’s view this does not constitute an unsanctioned foreign boycott or embargo against Egypt under the terms of the Export Administration Act. Thus the term is not prohibited, and a request to comply with the statement is not reportable.

**SUPPLEMENT NO. 11 TO PART 760 - INTERPRETATION***Definition of Unsolicited Invitation to Bid*

§760.5(a)(4) of this part states in part:

“In addition, a United States person who receives an unsolicited invitation to bid, or similar proposal, containing a boycott request has not received a reportable request for purposes of this section where he does not respond to the invitation to bid or other proposal.”

The Regulations do not define “unsolicited” in this context. Based on review of numerous situations, the Department has developed certain criteria that it applies in determining if an invitation to bid or other proposal received by a U.S. person is in fact unsolicited.

The invitation is not unsolicited if, during a commercially reasonable period of time preceding the issuance of the invitation, a representative of the U.S. person contacted the company or agency involved for the purpose of promoting business on behalf of the company.

The invitation is not unsolicited if the U.S. person has advertised the product or line of products that are the subject of the invitation in periodicals or publications that ordinarily circulate to the country issuing the invitation during a commercially reasonable period of time preceding the issuance of the invitation.

The invitation is not unsolicited if the U.S. person has sold the same or similar products to the company or agency issuing the invitation within a commercially reasonable period of time before the issuance of the current invitation.

The invitation is not unsolicited if the U.S. person has participated in a trade mission to or trade fair in the country issuing the invitation within a commercially reasonable period of time before the issuance of the invitation.

Under §760.5(a)(4) of this part, the invitation is regarded as not reportable if the U.S. person receiving it does not respond. The Department has determined that a simple acknowledgment of the invitation does not constitute a response for purposes of this rule. However, an acknowledgment that requests inclusion for future invitations will be considered a response, and a report is required.

Where the person in receipt of an invitation containing a boycott term or condition is undecided about a response by the time a report would be required to be filed under the regulations, it is the Department’s view that the person must file a report as called for in the Regulations. The person filing the report may indicate at the time of filing that he has not made a decision on the boycott request but must file a supplemental report as called for in the regulations at the time a decision is made (§760.5(b)(6)).

**SUPPLEMENT NO. 12 TO PART 760 - INTERPRETATION**

The Department has taken the position that a U.S. person as defined by §760.1(b) of this part may not make use of an agent to furnish information that the U.S. person is prohibited from furnishing pursuant to §760.2(d) of this part.

Example (v) under §760.4 of this part (Evasion) provides:

“A, a U.S. company, is negotiating a long-term contract with boycotting country Y to meet all of Y’s medical supply needs. Y informs A that before such a contract can be concluded, A must complete Y’s boycott questionnaire. A knows that it is prohibited from answering the questionnaire so it arranges for a local agent in Y to supply the necessary information.

A’s action constitutes evasion of this part, because it is a device to mask prohibited activity carried out on A’s behalf.”

This interpretation deals with the application of the Regulations to a commercial agent registration requirement imposed by the government of Saudi Arabia. The requirement provides that nationals of Saudi Arabia seeking to register in Saudi Arabia as commercial agents or representatives of foreign concerns must furnish certain boycott-related information about the foreign concern prior to obtaining approval of the registration.

The requirement has been imposed by the Ministry of Commerce of Saudi Arabia, which is the government agency responsible for regulation of commercial agents and foreign commercial registrations. The Ministry requires the agent or representative to state the following:

“Declaration: I, the undersigned, hereby declare, in my capacity as (blank) that (name and address of foreign principal) is not presently on the blacklist of the Office for the Boycott of Israel and that it and all its branches, if any, are bound

by the decisions issued by the Boycott Office and do not (1) participate in the capital of, (2) license the manufacture of any products or grant trademarks or tradeware license to, (3) give experience or technical advice to, or (4) have any other relationship with other companies which are prohibited to be dealt with by the Boycott Office. Signed (name of commercial agent/representative/distributor).”

It is the Department’s view that under the circumstances specifically outlined in this interpretation relating to the nature of the requirement, a U.S. person will not be held responsible for a violation of this part when such statements are provided by its commercial agent or representative, even when such statements are made with the full knowledge of the U.S. person.

*Nature of the requirement.* For a boycott-related commercial registration requirement to fall within the coverage of this interpretation it must have the following characteristics:

1. The requirement for information imposed by the boycotting country applies to a national or other subject of the boycotting country qualified under the local laws of that country to function as a commercial representative within that country;
2. The registration requirement relates to the registration of the commercial agent’s or representative’s authority to sell or distribute goods within the boycotting country acquired from the foreign concern;
3. The requirement is a routine part of the registration process and is not applied selectively based on boycott-related criteria;
4. The requirement applies only to a commercial agent or representative in the boycotting country and does not apply to the foreign concern itself; and

5. The requirement is imposed by the agency of the boycotting country responsible for regulating commercial agencies.

The U.S. person whose agent is complying with the registration requirement continues to be subject to all the terms of the Regulations, and may not provide any prohibited information to the agent for purposes of the agent's compliance with the requirement.

In addition, the authority granted to the commercial agent or representative by the U.S. person must be consistent with standard commercial practices and not involve any grants of authority beyond those incidental to the commercial sales and distributorship responsibilities of the agent.

Because the requirement does not apply to the U.S. person, no reporting obligation under §760.5 of this part would arise.

This interpretation, like all others issued by the Department discussing applications of the antiboycott provisions of the Export Administration Regulations, should be read narrowly. Circumstances that differ in any material way from those discussed in this notice will be considered under the applicable provisions of the Regulations. Persons are particularly advised not to seek to apply this interpretation to circumstances in which U.S. principals seek to use agents to deal with boycott-related or potential blacklisting situations.

**SUPPLEMENT NO. 13 TO PART 760 - INTERPRETATION**

**SUMMARY**

This interpretation considers boycott-based contractual language dealing with the selection of suppliers and subcontractors. While this language borrows terms from the “unilateral and specific selection” exception contained in §760.3(d), it fails to meet the requirements of that exception. Compliance with the requirements of the language constitutes a violation of the regulatory prohibition of boycott-based refusals to do business.

**REGULATORY BACKGROUND**

Section 760.2(a) of this part prohibits U.S. persons from refusing or knowingly agreeing to refuse to do business with other persons when such refusal is pursuant to an agreement with, requirement of, or request of a boycotting country. That prohibition does not extend to the performance of management, procurement or other pre-award services, however, notwithstanding knowledge that the ultimate selection may be boycott-based. To be permissible such services: (1) must be customary for the firm or industry involved and (2) must not exclude others from the transaction or involve other actions based on the boycott. See §760.2(a)(6) of this part, “Refusals to Do Business”, and example (xiii).

A specific exception is also made in the Regulations for compliance (and agreements to comply) with a unilateral and specific selection of suppliers or subcontractors by a boycotting country buyer. See §760.3(d) of this part. In Supplement No. 1 to part 760, the following form of contractual language was said to fall within that exception for compliance with unilateral and specific selection:

“The Government of the boycotting country (or the First Party), in its exclusive power, reserves its right to make the final unilateral and specific selection of any proposed carriers,

insurers, suppliers of services to be performed within the boycotting country, or of specific goods to be furnished in accordance with the terms and conditions of this contract.”

The Department noted that the actual steps necessary to comply with any selection made under this agreement would also have to meet the requirements of §760.3(d) to claim the benefit of that exception. In other words, the discretion in selecting would have to be exercised exclusively by the boycotting country customer and the selection would have to be stated in the affirmative, naming a particular supplier. See §760.3(d)(4) and (5) of this part.

**ANALYSIS OF ADDITIONAL CONTRACTUAL LANGUAGE**

The Office of Antiboycott Compliance has learned of the introduction of a contractual clause into tender documents issued by boycotting country governments. This clause is, in many respects, similar to that dealt with in Supplement No. 1 to part 760, but several critical differences exist.

The clause states:

*BOYCOTT OF  
[NAME OF BOYCOTTED COUNTRY]*

In connection with the performance of this Agreement, Contractor acknowledges that the import and customs laws and regulations of boycotting country apply to the furnishing and shipment of any products or components thereof to boycotting country. The Contractor specifically acknowledges that the aforementioned import and customs laws and regulations of boycotting country prohibit, among other things, the importation into boycotting country of products or components thereof: (A) Originating in boycotted country (B) Manufactured, produced and furnish by companies organized under the laws of

boycotted country and (C) Manufactured, produced or furnished by Nationals or Residents of boycotted country.

The Government, in its exclusive power, reserves its right to make the final unilateral and specific selection of any proposed Carriers, Insurers, Suppliers of Services to be performed within boycotting country or of specific goods to be furnished in accordance with the terms and conditions of this Contract.

To assist the Government in exercising its right under the preceding paragraph, Contractor further agrees to provide a complete list of names and addresses of all his Sub-Contractors, Suppliers, Vendors and Consultants and any other suppliers of the service for the project.

The title of this clause makes clear that its provisions are intended to be boycott-related. The first paragraph acknowledges the applicability of certain boycott-related requirements of the boycotting country's laws in language reviewed in part 760, Supplement No. 1, Part II.B. and found to constitute a permissible agreement under the exception contained in §760.3(a) of this part for compliance with the import requirements of a boycotting country. The second and third paragraphs together deal with the procedure for selecting subcontractors and suppliers of services and goods and, in the context of the clause as a whole, must be regarded as motivated by boycott considerations and intended to enable the boycotting country government to make boycott-based selections, including the elimination of blacklisted subcontractors and suppliers.

The question is whether the incorporation into these paragraphs of some language from the "unilateral and specific selection" clause approved in Supplement No. 1 to part 760 suffices to take the language outside §760.2(a) of this part's prohibition on boycott-based agreements to refuse to do business. While the first sentence of this clause is consistent with the

language discussed in Supplement No. 1 to part 760, the second sentence significantly alters the effect of this clause. The effect is to draw the contractor into the decision-making process, thereby destroying the unilateral character of the selection by the buyer. By agreeing to submit the names of the suppliers it plans to use, the contractor is agreeing to give the boycotting country buyer, who has retained the right of final selection, the ability to reject, for boycott-related reasons, any supplier the contractor has already chosen. Because the requirement appears in the contractual provision dealing with the boycott, the buyer's rejection of any supplier whose name is given to the buyer pursuant to this provision would be presumed to be boycott-based. By signing the contract, and thereby agreeing to comply with all of its provisions, the contractor must either accept the buyer's rejection of any supplier, which is presumed to be boycott-based because of the context of this provision, or breach the contract.

In these circumstances, the contractor's method of choosing its subcontractors and suppliers, in anticipation of the buyer's boycott-based review, cannot be considered a permissible pre-award service because of the presumed intrusion of boycott-based criteria into the selection process. Thus, assuming all other jurisdictional requirements necessary to establish a violation of part 760 are met, the signing of the contract by the contractor constitutes a violation of §760.2(a) of this part because he is agreeing to refuse to do business for boycott reasons.

The apparent attempt to bring this language within the exception for compliance with unilateral and specific selections is ineffective. The language does not place the discretion to choose suppliers in the hands of the boycotting country buyer but divides this discretion between the buyer and his principal contractor. Knowing that the buyer will not accept a boycotted company as supplier or subcontractor, the contractor is asked to use his discretion in selecting a single supplier or subcontractor for each element of the contract. The boycotting

**Restrictive Trade Practices or Boycotts**

country buyer exercises discretion only through accepting or rejecting the selected supplier or contractor as its boycott policies require. In these circumstances it cannot be said that the buyer is exercising right of unilateral and specific selection which meets the criteria of

**Supplement No. 13 to Part 760—page 3**

§760.3(d). For this reason, agreement to the contractual language discussed here would constitute an agreement to refuse to do business with any person rejected by the buyer and would violate §760.2(a) of this part.

**SUPPLEMENT NO. 14 TO PART 760 - INTERPRETATION**

*(a) Contractual clause concerning import, customs and boycott laws of a boycotting country*

The following language has appeared in tender documents issued by a boycotting country:

“Supplier declares his knowledge of the fact that the import, Customs and boycott laws, rules and regulations of [name of boycotting country] apply in importing to [name of boycotting country].”

Supplier declares his knowledge of the fact that under these laws, rules and regulations, it is prohibited to import into [name of the boycotting country] any products or parts thereof that originated in [name of boycotted country]; were manufactured, produced or imported by companies formed under the laws of [name of boycotted country]; or were manufactured, produced or imported by nationals or residents of [name of boycotted country].”

Agreeing to the above contractual language is a prohibited agreement to refuse to do business, under §760.2(a) of this part. The first paragraph requires broad acknowledgment of the application of the boycotting country’s boycott laws, rules and regulations. Unless this language is qualified to apply only to boycott restrictions with which U.S. persons may comply, agreement to it is prohibited. See §760.2(a) of this part, examples (v) and (vi) under “Agreements to Refuse to Do Business.”

The second paragraph does not limit the scope of the boycott restrictions referenced in the first paragraph. It states that the boycott laws include restrictions on goods originating in the boycotted country; manufactured, produced or supplied by companies organized under the laws of the boycotted country; or manufactured, produced or supplied by nationals or residents of the boycotted country. Each of these restrictions

is within the exception for compliance with the import requirements of the boycotting country (§760.3(a) of this part). However, the second paragraph’s list of restrictions is not exclusive. Since the boycott laws generally include more than what is listed and permissible under the antiboycott law, U.S. persons may not agree to the quoted clause. For example, a country’s boycott laws may prohibit imports of goods manufactured by blacklisted firms. Except as provided by §760.3(g) of this part, agreement to and compliance with this boycott restriction would be prohibited under the antiboycott law.

The above contractual language is distinguished from the contract clause determined to be permissible in supplement 1, Part II, A, by its acknowledgment that the boycott requirements of the boycotting country apply. Although the first sentence of the Supplement 1 clause does not exclude the possible application of boycott laws, it refers only to the import and customs laws of the boycotting country without mentioning the boycott laws as well. As discussed fully in Supplement No. 1 to part 760, compliance with or agreement to the clause quoted there is, therefore, permissible.

The contract clause quoted above, as well as the clause dealt with in Supplement No. 1 to part 760, part II, A, is reportable under §760.5(a)(1) of this part.

*(b) Letter of credit terms removing blacklist certificate requirement if specified vessels used*

The following terms frequently appear on letters of credit covering shipment to Iraq:

“Shipment to be effected by Iraqi State Enterprise for Maritime Transport Vessels or by United Arab Shipping Company (SAB) vessels, if available.

If shipment is effected by any of the above company's [sic] vessels, black list certificate or evidence to that effect is not required."

These terms are not reportable and compliance with them is permissible.

The first sentence, a directive to use Iraqi State Enterprise for Maritime Transport or United Arab Shipping vessels, is neither reportable nor prohibited because it is not considered by the Department to be boycott-related. The apparent reason for the directive is Iraq's preference to have cargo shipped on its own vessels (or, as in the case of United Arab Shipping, on vessels owned by a company in part established and owned by the Iraqi government). Such "cargo preference" requirements, calling for the use of an importing or exporting country's own ships, are common throughout the world and are imposed for non-boycott reasons. (See §760.2(a) of this part, example (vii) AGREEMENTS TO REFUSE TO DO BUSINESS.)

In contrast, if the letter of credit contains a list of vessels or carriers that appears to constitute a boycott-related whitelist, a directive to select a vessel from that list would be both reportable and prohibited. When such a directive appears in conjunction with a term removing the blacklist certificate requirement if these vessels are used, the Department will presume that beneficiaries, banks and any other U.S. person receiving the letter of credit know that there is a boycott-related purpose for the directive.

The second sentence of the letter of credit language quoted above does not, by itself, call for a blacklist certificate and is not therefore, reportable. If a term elsewhere on the letter of credit imposes a blacklist certificate requirement, then that other term would be reportable.

***(c) Information not related to a particular transaction in U.S. commerce***

Under §760.2 (c), (d) and (e), of this part U.S. persons are prohibited, with respect to their activities in U.S. commerce, from furnishing certain information. It is the Department's position that the required nexus with U.S. commerce is established when the furnishing of information itself occurs in U.S. commerce. Even when the furnishing of information is not itself in U.S. commerce, however, the necessary relationship to U.S. commerce will be established if the furnishing of information relates to particular transactions in U.S. commerce or to anticipated transactions in U.S. commerce. See, e.g. §760.2(d), examples (vii), (ix) and (xii) of this part.

The simplest situation occurs where a U.S. person located in the United States furnishes information to a boycotting country. The transfer of information from the United States to a foreign country is itself an activity in U.S. commerce. See §760.1(d)(1)(iv) of this part. In some circumstances, the furnishing of information by a U.S. person located outside the United States may also be an activity in U.S. commerce. For example, the controlled foreign subsidiary of a domestic concern might furnish to a boycotting country information the subsidiary obtained from the U.S.-located parent for that purpose. The subsidiary's furnishing would, in these circumstances, constitute an activity in U.S. commerce. See §760.1(d)(8) of this part.

Where the furnishing of information is not itself in U.S. commerce, the U.S. commerce requirement may be satisfied by the fact that the furnishing is related to an activity in U.S. foreign or domestic commerce. For example, if a shipment of goods by a controlled-in-fact foreign subsidiary of a U.S. company to a boycotting country gives rise to an inquiry from the boycotting country concerning the subsidiary's relationship with another firm, the Department regards any responsive furnishing of information by the subsidiary as related to the shipment giving rise to the inquiry. If the shipment is in U.S. foreign or domestic

commerce, as defined by the regulations, then the Department regards the furnishing to be related to an activity in U.S. commerce and subject to the antiboycott regulations, whether or not the furnishing itself is in U.S. commerce.

In some circumstances, the Department may regard a furnishing of information as related to a broader category of present and prospective transactions. For example, if a controlled-in-fact foreign subsidiary of a U.S. company is requested to furnish information about its commercial dealings and it appears that failure to respond will result in its blacklisting, any responsive furnishing of information will be regarded by the Department as relating to all of the subsidiary's present and anticipated business activities with the inquiring boycotting country. Accordingly, if any of these present or anticipated business activities are in U.S. commerce, the Department will regard the furnishing as related to an activity in U.S. commerce and subject to the antiboycott regulations.

In deciding whether anticipated business activities will be in U.S. commerce, the

Department will consider all of the surrounding circumstances. Particular attention will be given to the history of the U.S. person's business activities with the boycotting country and others, the nature of any activities occurring after a furnishing of information occurs and any relevant economic or commercial factors which may affect these activities.

For example, if a U.S. person has no activities with the boycotting country at present but all of its other international activities are in U.S. commerce, as defined by the Regulations, then the Department is likely to regard any furnishing of information by that person for the purpose of securing entry into the boycotting country's market as relating to anticipated activities in U.S. commerce and subject to the antiboycott regulations. Similarly, if subsequent to the furnishing of information to the boycotting country for the purpose of securing entry into its markets, the U.S. person engages in transactions with that country which are in U.S. commerce, the Department is likely to regard the furnishing as related to an activity in U.S. commerce and subject to the antiboycott regulations.

**SUPPLEMENT NO. 15 TO PART 760 - INTERPRETATION**

Sections 760.2 (c), (d), and (e) of this part prohibit United States persons from furnishing certain types of information with intent to comply with, further, or support an unsanctioned foreign boycott against a country friendly to the United States. The Department has been asked whether prohibited information may be transmitted--that is, passed to others by a United States person who has not directly or indirectly authored the information--without such transmission constituting a furnishing of information in violation of §760.2 (c), (d), and (e) of this part. Throughout this interpretation, "transmission" is defined as the passing on by one person of information initially authored by another. The Department believes that there is no distinction in the EAR between transmitting (as defined above) and furnishing prohibited information under the EAR and that the transmission of prohibited information with the requisite boycott intent is a furnishing of information violative of the EAR. At the same time, however, the circumstances relating to the transmitting party's involvement will be carefully considered in determining whether that party intended to comply with, further, or support an unsanctioned foreign boycott.

The EAR does not deal specifically with the relationship between transmitting and furnishing. However, the restrictions in the EAR on responses to boycott-related conditions, both by direct and indirect actions and whether by primary parties or intermediaries, indicate that U.S. persons who simply transmit prohibited information are to be treated the same under the EAR as those who both author and furnish prohibited information. This has been the Department's position in enforcement actions it has brought.

The few references in the EAR to the transmission of information by third parties are consistent with this position. Two examples, both relating to the prohibition against the furnishing of information about U.S. persons'

race, religion, sex, or national origin (§760.2(c) of this part), deal explicitly with transmitting information. These examples (§760.2(c) of this part, example (v), and §760.3(f) of this part, example (vi)) show that, in certain cases, when furnishing certain information is permissible, either because it is not within a prohibition or is excepted from a prohibition, transmitting it is also permissible. These examples concern information that may be furnished by individuals about themselves or their families. The examples show that employers may transmit to a boycotting country visa applications or forms containing information about an employee's race, religion, sex, or national origin if that employee is the source of the information and authorizes its transmission. In other words, within the limits of ministerial action set forth in these examples, employees' actions in transmitting information are protected by the exception available to the employee. The distinction between permissible and prohibited behavior rests not on the definitional distinction between furnishing and transmitting, but on the excepted nature of the information furnished by the employee. The information originating from the employee does not lose its excepted character because it is transmitted by the employer.

The Department's position regarding the furnishing and transmission of certificates of one's own blacklist status rests on a similar basis and does not support the contention that third parties may transmit prohibited information authored by another. Such self-certifications do not violate any prohibitions in the EAR (see Supplement Nos. 1(I)(B), 2, and 5(A)(2); §760.2(f), example (xiv)). It is the Department's position that it is not prohibited for U.S. persons to transmit such self-certifications completed by others. Once again, because furnishing the self-certification is not prohibited, third parties who transmit the self-certifications offend no prohibition. On the other hand, if a third party authored information about another's blacklist

status, the act of transmitting that information would be prohibited.

A third example in the EAR (§760.5, example (xiv) of this part), which also concerns a permissible transmission of boycott-related information, does not support the theory that one may transmit prohibited information authored by another. This example deals with the reporting requirements in §760.5 of this part--not the prohibitions--and merely illustrates that a person who receives and transmits a self-certification has not received a reportable request.

It is also the Department's position that a U.S. person violates the prohibitions against furnishing information by transmitting prohibited information even if that person has received no reportable request in the transaction. For example, where documents accompanying a letter of credit contain prohibited information, a negotiating bank that transmits the documents, with the requisite boycott intent, to an issuing bank has not received a reportable request, but has furnished prohibited information.

While the Department does not regard the suggested distinction between transmitting and

furnishing information as meaningful, the facts relating to the third party's involvement may be important in determining whether that party furnished information with the required intent to comply with, further, or support an unsanctioned foreign boycott. For example, if it is a standard business practice for one participant in a transaction to obtain and pass on, without examination, documents prepared by another party, it might be difficult to maintain that the first participant intended to comply with a boycott by passing on information contained in the unexamined documents. Resolution of such intent questions, however, depends upon an analysis of the individual facts and circumstances of the transaction and the Department will continue to engage in such analysis on a case-by-case basis.

This interpretation, like all others issued by the Department discussing applications of the antiboycott provisions of the EAR, should be read narrowly. Circumstances that differ in any material way from those discussed in this interpretation will be considered under the applicable provisions of the Regulations.

**SUPPLEMENT NO. 16 TO PART 760 - INTERPRETATION**

Pursuant to Articles 5, 7, and 26 of the Treaty of Peace between the State of Israel and the Hashemite Kingdom of Jordan and implementing legislation enacted by Jordan, Jordan's participation in the Arab economic boycott of Israel was formally terminated on August 16, 1995.

On the basis of this action, it is the Department's position that certain requests for information, action or agreement from Jordan which were considered boycott-related by implication now cannot be presumed boycott-related and thus would not be prohibited or reportable under the regulations. For example, a request that an exporter certify that the vessel on which it is shipping its goods is eligible to enter Hashemite Kingdom of Jordan ports has been considered a boycott-related request that the exporter could not comply with because Jordan has had a boycott in force against Israel. Such a request from Jordan after August 16, 1995 would not be presumed boycott-related because the

underlying boycott requirement/basis for the certification has been eliminated. Similarly, a U.S. company would not be prohibited from complying with a request received from Jordanian government officials to furnish the place of birth of employees the company is seeking to take to Jordan because there is no underlying boycott law or policy that would give rise to a presumption that the request was boycott-related.

U.S. persons are reminded that requests that are on their face boycott-related or that are for action obviously in furtherance or support of an unsanctioned foreign boycott are subject to the regulations, irrespective of the country of origin. For example, requests containing references to "blacklisted companies", "Israel boycott list", "non-Israeli goods" or other phrases or words indicating boycott purpose would be subject to the appropriate provisions of the Department's antiboycott regulations.

### § 762.1 SCOPE

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C.

#### (a) **Transactions subject to this part**

The recordkeeping provisions of this part apply to the following transactions:

- (1) Transactions involving restrictive trade practices or boycotts described in part 760 of the EAR;
- (2) Exports of commodities, software, or technology from the United States and any known reexports, transshipment, or diversions of items exported from the United States;
- (3) Exports to Canada, if, at any stage in the transaction, it appears that a person in a country other than the United States or Canada has an interest therein, or that the item involved is to be reexported, transshipped, or diverted from Canada to another foreign country; or
- (4) Any other transactions subject to the EAR, including, but not limited to, the prohibitions against servicing, forwarding and other actions

for or on behalf of end-users of proliferation concern contained in §§736.2(b)(7) and 744.6 of the EAR. This part also applies to all negotiations connected with those transactions, except that for export control matters a mere preliminary inquiry or offer to do business and negative response thereto shall not constitute negotiations, unless the inquiry or offer to do business proposes a transaction that a reasonably prudent exporter would believe likely lead to a violation of the EAA, the EAR or any order, license or authorization issued thereunder.

#### (b) **Persons subject to this part**

Any person subject to the jurisdiction of the United States who, as principal or agent (including a forwarding agent), participates in any transaction described in paragraph (a) of this section, and any person in the United States or abroad who is required to make and maintain records under any provision of the EAR, shall keep and maintain all records described in §762.2 of this part that are made or obtained by that person and shall produce them in a manner provided by §762.7 of this part.

### § 762.2 RECORDS TO BE RETAINED

#### (a) **Records required to be retained**

The records required to be retained under this part 762 include the following:

- (1) Export control documents as defined in part 772 of the EAR, except parties submitting documents electronically to BIS via the SNAP-R system are not required to retain copies of documents so submitted;
- (2) Memoranda;
- (3) Notes;
- (4) Correspondence;
- (5) Contracts;
- (6) Invitations to bid;
- (7) Books of account;
- (8) Financial records;

The term "subject to the EAR" includes goods classified under either an ECCN or under EAR99

(9) Restrictive trade practice or boycott documents and reports;

(10) Notification from BIS of an application being returned without action; notification by BIS of an application being denied; notification by BIS of the results of a commodity classification or encryption review request conducted by BIS;

(11) The serial number, make, model, and caliber for any firearm controlled in ECCN 0A501.a and for shotguns with barrel length less than 18 inches controlled in 0A502 that have been exported. The “exporter” or any other party to the transaction (*see* § 758.3 of the EAR), that creates or receives such records is a person responsible for retaining this record; and

(12) Other records pertaining to the types of transactions described in §762.1(a) of this part, which are made or obtained by a person described in §762.1(b) of this part.

**(b) Records retention references**

Paragraph (a) of this section describes records that are required to be retained. Other parts, sections, or supplements of the EAR which require the retention of records or contain recordkeeping provisions, include, but are not limited to the following:

- (1) §732.6, Steps for other requirements;
- (2) §734.4(g), *de minimis* calculation (method);
- (3) Part 736, General Prohibitions;
- (4) §740.1, Introduction (to License Exceptions);
- (5) § 740.9(a)(3)(i)(B), Tools of trade: temporary exports, reexports, and transfers (in country) of technology by U.S. persons (TMP);
- (6) §740.10(c), Servicing and replacement of parts and equipment (RPL);
- (7) § 740.11(b)(2)(iii) and (iv), Exports, reexports and transfers (in-country) made for or on behalf of a department or agency of the U.S. Government and Items exported

at the direction of the U.S. Department of Defense (GOV);

- (8) §740.12, Humanitarian donations (GFT);
- (9) §740.13(h), Technology and software—unrestricted (TSU);
- (10) § 740.20(g), Responses to License Exception STA eligibility requests for “600 series” end items (STA);
- (11) §743.1, Wassenaar reports;
- (12) §743.2, High Performance Computers;
- (13) § 743.4(c)(1) and (c)(2), Conventional arms reporting;
- (14) §745.1, Annual reports;
- (15) §745.2, End-use certificates;
- (16) §746.3 Iraq;
- (17) [Reserved];
- (18) §748.1(d)(2), Procedure for requesting authorization to file paper applications, notifications, or requests;
- (19) §748.4(b), Disclosure of parties on license applications and the power of attorney;
- (20) §748.6, General instructions for license applications;
- (21) §748.9, Support documents for license applications;
- (22) §748.10, PRC End-User Statement;
- (23) §748.11, Statement by Ultimate Consignee and Purchaser;
- (24) §748.12, Firearms Convention (FC) Import Certificate;
- (25) [RESERVED]
- (26) Supplement No. 2 to Part 748 paragraph (c)(2), Security Safeguard Plan requirement;
- (27) §750.7, Issuance of license and acknowledgment of conditions;
- (28) §750.8, Revocation or suspension of license;
- (29) §750.9, Duplicate licenses;
- (30) §750.10, Transfer of licenses for export;
- (31) – (39) [Reserved]
- (40) §754.4, Unprocessed western red cedar;
- (41) §758.1 and §758.2, Automated Export System record;
- (42) §758.1(h), Record and proof of agent's authority;
- (43) §758.3(b), Routed Export Transactions;
- (44) §758.6, Destination control statements;

- (45) §760.5, Reporting requirements;
- (46) §762.2, Records to be retained;
- (47) §764.2, Violations;
- (48) §764.5, Voluntary self-disclosure;
- (49) §766.10, Subpoenas;
- (50) § 772.2, “Specially designed” definition, note to paragraphs (b)(4), (b)(5), and (b)(6);
- (51) § 740.20, note to paragraph (c)(1), License Exception STA prior approval on a BIS or DDTTC license (STA);
- (52) § 744.15(b), UVL statement as well as any logs or records created for multiple exports, reexports, and transfers (in-country);
- (53) § 750.7(c)(2), Notification of name change by advisory opinion request; and
- (54) § 748.13 Certain Hong Kong import and export licenses.

*(c) Special recordkeeping requirement*

**(1) Libya.** Persons in receipt of a specific license granted by the Department of the Treasury’s Office of Foreign Assets Control (OFAC) for the export to Libya of any item subject to the EAR must maintain a record of those items transferred to Libya pursuant to such specific license and record when the items are consumed or destroyed in the normal course of their use in Libya, reexported to a third country not requiring further authorization from BIS, or returned to the United States. This requirement applies only to items subject to a license requirement under the EAR for export to Libya as of April 29, 2004. These records must include the following information:

- (i) Date of export or reexport and related details (including means of transport);
- (ii) Description of items (including ECCN) and value of items in U.S. Dollars;
- (iii) Description of proposed end-use and locations in Libya where items are intended to be used;

(iv) Parties other than specific OFAC licensee who may be given temporary access to the items; and

(v) Date of consumption or destruction, if the items are consumed or destroyed in the normal course of their use in Libya, or the date of reexport to a third country not requiring further authorization from BIS, or return to the United States.

(2) [RESERVED].

**§ 762.3 RECORDS EXEMPT FROM RECORDKEEPING REQUIREMENTS**

(a) The following types of records have been determined to be exempt from the recordkeeping requirement procedures:

- (1) Export information page;
- (2) Special export file list;
- (3) Vessel log from freight forwarder;
- (4) Inspection certificate;
- (5) Warranty certificate, except for a warranty certificate issued for an address located outside the United States for any firearm controlled in ECCN 0A501.a and for shotguns with barrel length less than 18 inches controlled in 0A502;
- (6) Guarantee certificate;
- (7) Packing material certificate;
- (8) Goods quality certificate;
- (9) Notification to customer of advance meeting;
- (10) Letter of indemnity;
- (11) Financial release form;
- (12) Financial hold form;
- (13) Export parts shipping problem form;
- (14) Draft number log;
- (15) Expense invoice mailing log;
- (16) Financial status report;
- (17) Bank release of guarantees;
- (18) Cash sheet;
- (19) Commission payment back-up;
- (20) Commissions payable worksheet;

- (21) Commissions payable control;
- (22) Check request forms;
- (23) Accounts receivable correction form;
- (24) Check request register;
- (25) Commission payment printout;
- (26) Engineering fees invoice;
- (27) Foreign tax receipt;
- (28) Individual customer credit status;
- (29) Request for export customers code forms;
- (30) Acknowledgement for receipt of funds;
- (31) Escalation development form;
- (32) Summary quote;
- (33) Purchase order review form;
- (34) Proposal extensions;
- (35) Financial proposal to export customers; and
- (36) Sales summaries.

(b) [RESERVED]

#### § 762.4 ORIGINAL RECORDS REQUIRED

The regulated person must maintain the original records in the form in which that person receives or creates them unless that person meets all of the conditions of §762.5 of this part relating to reproduction of records. If the original record does not meet the standards of legibility and readability described in §762.5 of this part and the regulated person intends to rely on that record to meet the recordkeeping requirements of the EAR, that person must retain the original record. With respect to documents that BIS issues to a party in SNAP-R, either an electronically stored copy in a format that makes the document readable with software possessed by that party or a paper print out of the complete document is deemed to be an original record for purposes of this section.

#### § 762.5 REPRODUCTION OF ORIGINAL RECORDS

(a) The regulated person may maintain reproductions instead of the original records

provided all of the requirements of paragraph (b) of this section are met.

(b) In order to maintain the records required by §762.2 of this part, the regulated persons defined in §762.1 of this part may use any photographic, photostatic, miniature photographic, micrographic, automated archival storage, or other process that completely, accurately, legibly and durably reproduces the original records (whether on paper, microfilm, or through electronic digital storage techniques). The process must meet all of the following requirements, which are applicable to all systems:

(1) The system must be capable of reproducing all records on paper.

(2) The system must record and be able to reproduce all marks, information, and other characteristics of the original record, including both obverse and reverse sides of paper documents in legible form.

(3) When displayed on a viewer, monitor, or reproduced on paper, the records must exhibit a high degree of legibility and readability. (For purposes of this section, legible and legibility mean the quality of a letter or numeral that enable the observer to identify it positively and quickly to the exclusion of all other letters or numerals. Readable and readability mean the quality of a group of letters or numerals being recognized as complete words or numbers.)

(4) The system must preserve the initial image (including both obverse and reverse sides of paper documents) and record all changes, who made them and when they were made. This information must be stored in such a manner that none of it may be altered once it is initially recorded.

(5) The regulated person must establish written procedures to identify the individuals who are responsible for the operation, use and maintenance of the system.

(6) The regulated person must establish written procedures for inspection and quality assurance of records in the system and document the implementation of those procedures.

(7) The system must be complete and contain all records required to be kept by this part or the regulated person must provide a method for correlating, identifying and locating records relating to the same transaction(s) that are kept in other record keeping systems.

(8) The regulated person must keep a record of where, when, by whom, and on what equipment the records and other information were entered into the system.

(9) Upon request by the Office of Export Enforcement, the Office of Antiboycott Compliance, or any other agency of competent jurisdiction, the regulated person must furnish, at the examination site, the records, the equipment and, if necessary, knowledgeable personnel for locating, reading, and reproducing any record in the system.

**(c) *Requirements applicable to systems based on the storage of digital images***

For systems based on the storage of digital images, the system must provide accessibility to any digital image in the system. With respect to records of transactions, including those involving restrictive trade practices or boycott requirements or requests. The system must be able to locate and reproduce all records relating to a particular transaction based on any one of the following criteria:

- (1) The name(s) of the parties to the transaction;
- (2) Any country(ies) connected with the transaction; or
- (3) A document reference number that was on any original document.

**(d) *Requirements applicable to a system based on photographic processes***

For systems based on photographic, photostatic, or miniature photographic processes, the regulated person must maintain a detailed index of all records in the system that is arranged in such a manner as to allow immediate location of any particular record in the system.

**§ 762.6 PERIOD OF RETENTION**

**(a) *Five year retention period***

All records required to be kept by the EAR must be retained for five years from the latest of the following times:

- (1) The export from the United States of the item involved in the transaction to which the records pertain or the provision of financing, transporting or other service for or on behalf of end-users of proliferation concern as described in §§736.2(b)(7) and 744.6 of the EAR;
- (2) Any known reexport, transshipment, or diversion of such item;
- (3) Any other termination of the transaction, whether formally in writing or by any other means; or
- (4) In the case of records of pertaining to transactions involving restrictive trade practices or boycotts described in part 760 of the EAR, the date the regulated person receives the boycott-related request or requirement.

**(b) *Destruction or disposal of records***

If the Bureau of Industry and Security or any other government agency makes a formal or informal request for a certain record or records, such record or records may not be destroyed or disposed of without the written authorization of the agency concerned. This prohibition applies to records pertaining to voluntary disclosures

**Recordkeeping**

**Part 762--page 6**

made to BIS in accordance with § 764.5(c)(4)(ii) and other records even if such records have been retained for a period of time exceeding that required by paragraph (a) of this section.

Office of Antiboycott Compliance are authorized to issue subpoenas requiring persons to appear and testify, or to produce books, records, and other writings. In instances where a person does not comply with a subpoena, the Department of Commerce may petition a district court to have the subpoena enforced.

**§ 762.7 PRODUCING AND INSPECTING RECORDS**

**(a) *Persons located in the United States***

**(b) *Persons located outside of the United States***

Persons located in the United States may be asked to produce books, records, and other information that are required to be kept by any provision of the EAR, or any license, order, or authorization issued thereunder and to make them available for inspection and copying by any authorized official of the BIS, or any other official of the United States designated by BIS, without any charge or expense to such official. OEE and the Office of Antiboycott Compliance encourage voluntary cooperation with such requests. When voluntary cooperation is not forthcoming, OEE and the

Persons located outside of the United States that are required to keep books, records, and other information by any provision of the EAR or by any license, order, or authorization issued thereunder shall produce all books, records, and other information required to be kept, or reproductions thereof, and make them available for inspection and copying upon request by an authorized official of BIS without any charge or expense to such official. BIS may designate any other official of the United States to exercise the authority of BIS under this subsection.

**§ 764.1 INTRODUCTION**

In this part, references to the EAR are references to [15 CFR chapter VII](#), subchapter C. This part specifies conduct that constitutes a violation of the ECRA and/or the EAR and the sanctions that may be imposed for such violations. Antiboycott violations are described in part 760 of the EAR, and the violations and sanctions specified in part 764 also apply to conduct relating to part 760, unless otherwise stated. This part describes administrative sanctions that may be imposed by BIS. This part also describes criminal sanctions that may be imposed by a [United States](#) court and other sanctions that are neither administrative nor criminal pursuant to sections 11A, B, and C of the Export Administration Act EAA and other statutes. Information is provided on how to report and disclose violations. Finally, this part

identifies protective administrative measures that BIS may take in the exercise of its regulatory authority.

**§ 764.2 VIOLATIONS**

*(a) Engaging in prohibited conduct*

No person may engage in any transaction or take any other action prohibited by or contrary to, or refrain from engaging in any transaction or take any other action required by ECRA, the EAR, or any order, license or authorization issued thereunder.

*(b) Causing, aiding, or abetting a violation*

No person may cause or aid, abet, counsel, command, induce, procure, permit, or approve the doing of any act prohibited, or the omission of any act required, by ECRA, the EAR, or any order, license or authorization issued thereunder.

*(c) Solicitation and attempt*

No person may solicit or attempt a violation of ECRA, the EAR, or any order, license, or authorization issued thereunder.

*(d) Conspiracy*

No person may conspire or act in concert with one or more persons in any manner or for any purpose to bring about or to do any act that constitutes a violation of ECRA, the EAR, or any order, license, or authorization issued thereunder.

*(e) Acting with knowledge of a violation*

No person may order, buy, remove, conceal, store, use, sell, loan, dispose of, transfer, transport, finance, forward, or otherwise service, in whole or in part, or conduct negotiations to facilitate such activities with respect to, any item that has been, is being, or is about to be exported, reexported, or transferred (in-country), or that is otherwise subject to the EAR, with knowledge that a violation of ECRA, the EAR, or any order, license, or authorization issued thereunder, has occurred, is about to occur, or is intended to occur in connection with the item.

**\*\*must disclose any \*\*material fact in any application. Also see p. 828.**

**\*\*Penalties \*\*Penalty  
\*\*Fines \*\*Sanctions**

**Enforcement and Protective Measures**

**Part 764-page 2**

**(f) [RESERVED]**

**(g) Misrepresentation and concealment of facts**

**(1) No person may make any false or misleading representation, statement, or certification, or falsify or conceal any material fact, either directly to BIS or an official of any other United States agency, or indirectly through any other person:**

**(i) In the course of an investigation or other action subject to the EAR; or**

**(ii) In connection with the preparation, submission, issuance, use, or maintenance of any "export control document" or any report filed or required to be filed pursuant to the EAR; or**

**(iii) For the purpose of or in connection with effecting an export, reexport, transfer (in-country) or other activity subject to the EAR.**

**(2) All representations, statements, and certifications made by any person are deemed to be continuing in effect. Every person who has made any representation, statement, or certification must notify BIS, and any other relevant agency, in writing, of any change of any material fact or intention from that previously represented, stated, or certified, immediately upon receipt of any information that would lead a reasonably prudent person to know that a change of material fact or intention has occurred or may occur in the future.**

**(h) Evasion**

No person may engage in any transaction or take any other action with intent to evade the provisions of ECRA, the EAR, or any order, license or authorization issued thereunder.

**(i) Failure to comply with reporting, recordkeeping requirements**

No person may fail or refuse to comply with any reporting or recordkeeping requirement of ECRA, the EAR, or of any order, license, or authorization issued thereunder.

**(j) License alteration**

Except as specifically authorized in the EAR or in writing by BIS, no person may alter any license, authorization, export control document, or order issued under ECRA or the EAR.

**(k) Acting contrary to the terms of a denial order**

No person may take any action that is prohibited by a denial order or a temporary denial order issued by BIS to prevent imminent violations of ECRA, the EAR, or any order, license or authorization issued thereunder.

**§ 764.3 SANCTIONS**

**(a) Administrative**

Violations of ECRA, the EAR, or any order, license or authorization issued thereunder are subject to the administrative sanctions described in this section and to any other liability, sanction, or penalty available under law. The protective administrative measures that are described in § 764.6 of this part are distinct from administrative sanctions.

**(1) Civil monetary penalty.**

**(i)** A civil monetary penalty not to exceed the amount set forth in ECRA may be imposed for each violation, and in the event that any provision of the EAR is continued or revised by IEEPA or any other authority, the maximum monetary civil penalty for each violation shall be that provided by such other authority.

**(ii)** The payment of any civil penalty may be made a condition, for a period not exceeding two years after the imposition of such penalty, to the granting, restoration, or continuing validity of any export license, license exception, permission, or privilege granted or to be granted to the person upon whom such penalty is imposed.

**(iii)** The payment of any civil penalty may be deferred or suspended in whole or in part during any probation period that may be imposed. Such deferral or suspension shall not bar the collection

**All \*\*representations and \*\*statements by an applicant are \*\*binding and deemed by BIS to be \*\*continuing in effect".**

**Note:** Compared to the previous version of "Criminal penalties," (from Oct 15, 2013), this is MUCH simpler, a short paragraph vs the previous whole page.

## Enforcement and Protective Measures

Part 764-page 3

of the penalty if the conditions of the deferral, suspension, or probation are not fulfilled.

**(2) Denial of export privileges.** An order may be issued that restricts the ability of the named persons to engage in exports, reexports, and transfers (in-country) involving items subject to the EAR, or that restricts access by named persons to items subject to the EAR. An order denying export privileges may be imposed either as a sanction for a violation of ECRA, the EAR, or any other statute set forth at 50 U.S.C. 4819(e)(1)(B); or as a protective administrative measure described in §§ 764.6(c) or (d) of this part. An order denying export privileges may suspend or revoke any or all outstanding licenses issued under the EAR to a person named in the denial order or in which such person has an interest; may deny or restrict exports, reexports, and transfers (in-country) by or to such person of any item subject to the EAR; and may restrict dealings in which that person may benefit from any export, reexport, or transfer (in-country) of such items. The standard terms of a denial order are set forth in supplement no. 1 to this part. A non-standard denial order, narrower in scope, may be issued. Authorization to engage in actions otherwise prohibited by a denial order may be given by the Office of Exporter Services, in consultation with the Office of Export Enforcement, upon a written request by a person named in the denial order or by a person seeking permission to deal with a named person. Submit such requests to: Bureau of Industry and Security, Office of Exporter Services, Room 2099b, U.S. Department of Commerce, 14<sup>th</sup> Street and Pennsylvania, Ave., NW, Washington, DC 20230.

**(3) Exclusion from practice.** Any person acting as an attorney, accountant, consultant, freight forwarder, or in any other representative capacity for any license application or other matter before BIS may be excluded by order from any or all such activities before BIS.

### **(b) Criminal**

Whoever willfully commits, willfully attempts to commit, or willfully conspires to commit, or aids and abets in the commission of, an unlawful act described in 50 U.S.C. 4819(a) shall be fined not more than \$1,000,000; and in the case of the individual, shall be imprisoned for not more than 20 years, or both.

### **(c) Other sanctions**

Conduct that violates ECRA, the EAR, or any order, license, or authorization issued thereunder, and other conduct specified in §§ 11A, B, and C of the EAA may be subject to sanctions or other measures in addition to criminal and administrative sanctions under ECRA or the EAR. These include, but are not limited to, the following:

**(1) Statutory sanctions.** Statutorily-mandated sanctions may be imposed on account of specified conduct related to weapons proliferation. Such statutory sanctions are not civil or criminal penalties, but restrict imports and procurement (See § 11A of the EAA, Multilateral Export Control Violations, and § 11C of the EAA, Chemical and Biological Weapons Proliferation), or restrict export licenses (See § 11B of the EAA, Missile Proliferation Violations, and the [Iran-Iraq Arms Non-Proliferation Act of 1992](#)).

#### **(2) Other sanctions and measures.**

**(i) Seizure and forfeiture.** Any property seized pursuant to export laws and regulations administered or enforced by the Secretary is subject to forfeiture. (50 U.S.C. 4819(d) and 4820(j); 22 U.S.C. 401; and 13 U.S.C. 305).

#### **(ii) Actions by other agencies.**

**(A)** The Department of State may not issue licenses or approvals for the export or reexport of defense articles and defense services controlled under the Arms Export Control Act to persons convicted of criminal offenses specified at 22 U.S.C. 2778(g)(1)(A), or to persons denied export privileges by BIS or another agency; and may deny such licenses or approvals where the applicant is indicted for, or any party to the export

is convicted of, those specified criminal offenses. (22 CFR 126.7(a) and 127.11(a)).

(B) The Department of Defense, among other agencies, may suspend the right of any person to contract with the United States Government based on export control violations. (Federal Acquisition Regulations § 9.407-2).

**§ 764.4 REPORTING OF VIOLATIONS**

*(a) Where to report*

If a person learns that an export control violation of the EAR has occurred or may occur, that person may notify:

Office of Export Enforcement  
 Bureau of Industry and Security  
 U.S. Department of Commerce  
 14th Street and Constitution Avenue, N.W.  
 Room H-4520  
 Washington, D.C. 20230  
 Tel: (202) 482-1208  
 Fax: (202) 482-0964

or, for violations of part 760 of the EAR:

Office of Antiboycott Compliance  
 Bureau of Industry and Security  
 U.S. Department of Commerce  
 14th Street and Constitution Avenue, N.W.  
 Room H-6099C  
 Washington, D.C. 20230  
 Tel: (202) 482-2381  
 Fax: (202) 482-0913

*(b) Failure to report violations*

Failure to report potential violations may result in the unwarranted issuance of licenses or exports without the required licenses to the detriment of the interests of the United States.

*(c) Reporting requirement distinguished*

The reporting provisions in paragraph (a) of this section are not “reporting requirements” within the meaning of §764.2(i) of this part.

*(d) Formerly embargoed destinations.*

Reporting requirements for activities within the scope of §764.2(e) that involve items subject to the EAR which may have been illegally exported or reexported to Libya prior to the lifting of the comprehensive embargo on Libya are found in §764.7 of the EAR.

**§ 764.5 VOLUNTARY SELF-DISCLOSURE**

*(a) General policy*

BIS strongly encourages disclosure to OEE if you believe that you may have violated the EAR, or any order, license or authorization issued thereunder. Voluntary self-disclosure is a mitigating factor in determining what administrative sanctions, if any, will be sought by OEE.

*(b) Limitations*

- (1) The provisions of this section do not apply to disclosures of violations relating to part 760 of the EAR.
- (2) The provisions of this section apply only when information is provided to OEE for its review in determining whether to take administrative action under part 766 of the EAR for violations of the export control provisions of the EAR.
- (3) The provisions of this section apply only when information is received by OEE for review prior to the time that OEE, or any other agency of the United States Government, has learned the same or substantially similar information from another source and has commenced an investigation or inquiry in connection with that information.

**\*\*VSD  
 general  
 violations**

The "Narrative Account" (i.e. Phase II final report) due with 180 days of the date of the "Initial Notification" (i.e. Phase I preliminary notification).

## Enforcement and Protective Measures

Part 764-page 5

(4) While voluntary self-disclosure is a mitigating factor in determining what administrative sanctions, if any, will be sought by OEE, it is a factor that is considered together with all other factors in a case. The weight given to voluntary self-disclosure is solely within the discretion of OEE, and the mitigating effect of voluntary self-disclosure may be outweighed by aggravating factors. Voluntary self-disclosure does not prevent transactions from being referred to the Department of Justice for criminal prosecution. In such a case, OEE would notify the Department of Justice of the voluntary self-disclosure, but the consideration of that factor is within the discretion of the Department of Justice.

(5) A firm will not be deemed to have made a disclosure under this section unless the individual making the disclosure did so with the full knowledge and authorization of the firm's senior management.

(6) The provisions of this section do not, nor should they be relied on to, create, confer, or grant any rights, benefits, privileges, or protection enforceable at law or in equity by any person, business, or entity in any civil, criminal, administrative, or other matter.

### (c) Information to be provided

**(1) General.** Any person wanting to disclose information that constitutes a voluntary self-disclosure should, in the manner outlined below, initially notify OEE as soon as possible after violations are discovered, and then conduct a thorough review of all export-related transactions where violations are suspected.

### (2) Initial notification.

#### (i) Manner and content of initial notification.

The initial notification should be in writing and be sent to the address in paragraph (c)(7) of this section. The notification should include the name

of the person making the disclosure and a brief description of the suspected violations, and should designate a contact person regarding the initial notification and provide that contact person's current business street address, email address, and telephone number. The notification should describe the general nature and extent of the violations. OEE recognizes that there may be situations where it will not be practical to make an initial notification in writing. For example, written notification may not be practical if a shipment leaves the United States without the required license, yet there is still an opportunity to prevent acquisition of the items by unauthorized persons. In such situations, OEE should be contacted promptly at the office listed in paragraph (c)(7) of this section.

**(ii) Initial notification date.** For purposes of calculating when a complete narrative account must be submitted under paragraph (c)(2)(iii) of this section, the initial notification date is the date the notification is received by OEE. OEE will notify the disclosing party in writing of the date that it receives the initial notification. At OEE's discretion, such writing from OEE may be on paper, or in an email message or facsimile transmission from OEE, or by any other method for the transmission of written communications. Where it is not practical to make an initial notification in writing, the person making the notification should confirm the oral notification in writing as soon as possible.

#### (iii) Timely completion of narrative accounts.

The narrative account required by paragraph (c)(3) of this section must be received by OEE within 180 days of the initial notification date for purposes of paragraph (b)(3) of this section, absent an extension from the Director of OEE. If the person making the initial notification subsequently completes and submits to OEE the narrative account required by paragraph (c)(3) of this section such that OEE receives it within 180 days of the initial notification date, or within the additional time, if any, granted by the Director of OEE pursuant to paragraph (c)(2)(iv) of this

Go to Phase II  
"Narrative  
Account" at §

section, the disclosure, including violations disclosed in the narrative account that were not expressly mentioned in the initial notification, will be deemed to have been made on the initial notification date for purposes of paragraph (b)(3) of this section if the initial notification was made in compliance with paragraphs (c)(1) and (2) of this section. Failure to meet the deadline (either the initial 180-day deadline or an extended deadline granted by the Director of OEE) would not be an additional violation of the EAR, but such failure may reduce or eliminate the mitigating impact of the voluntary disclosure under Supplement No. 1 to this part. For purposes of determining whether the deadline has been met under this paragraph, a complete narrative account must contain all of the pertinent information called for in paragraphs (c)(3), (c)(4), and (c)(5) of this section, and the voluntary self-disclosure must otherwise meet the requirements of this section.

**(iv) *Deadline extensions.*** The Director of OEE may extend the 180-day deadline upon a determination in his or her discretion that U.S. Government interests would be served by an extension or that the person making the initial notification has shown that more than 180 days is reasonably needed to complete the narrative account.

**(A) *Conditions for extension.*** The Director of OEE in his or her discretion may place conditions on the approval of an extension. For example, the Director of OEE may require that the disclosing person agree to toll the statute of limitations with respect to violations disclosed in the initial notification or discovered during the review for or preparation of the narrative account, and/or require the disclosing person to undertake specified interim remedial compliance measures.

**(B) *Contents of Request.***

**(I)** In most instances 180 days should be adequate to complete the narrative account. Requests to extend the 180-day deadline set forth

in paragraph (c)(2)(iii) of this section will be determined by the Director of OEE pursuant to his or her authority under this paragraph (c)(2)(iv) based upon his consideration and evaluation of U.S. Government interests and the facts and circumstances surrounding the request and any related investigations. Such requests should show specifically that the person making the request:

**(i)** Began its review promptly after discovery of the violations;

**(ii)** Has been conducting its review and preparation of the narrative account as expeditiously as can be expected, consistent with the need for completeness and accuracy;

**(iii)** Reasonably needs the requested extension despite having begun its review promptly after discovery of the violations and having conducted its review and preparation of the narrative account as expeditiously as can be expected consistent with the need for completeness and accuracy; and

**(iv)** Has considered whether interim compliance or other corrective measures may be needed and has undertaken such measures as appropriate to prevent recurring or additional violations.

**(2)** Such requests also should set out a proposed timeline for completion and submission of the narrative account that is reasonable under the applicable facts and circumstances, and should also designate a contact person regarding the request and provide that contact person's current business street address, email address, and telephone number. Requests may also include additional information that the person making the request reasonably believes is pertinent to the request under the applicable facts and circumstances.

**(C) *Timing of requests.*** Requests for an extension should be made before the 180-day deadline and as soon as possible once a disclosing

person determines that it will be unable to meet the deadline or the extended deadline where an extension previously has been granted, and possesses the information needed to prepare an extension request in accordance with paragraph (c)(2)(iv)(B) of this section. Requests for extension that are not received before the deadline for completing the narrative account has passed will not be considered. Parties who request an extension shortly before the deadline incur the risk that the Director of OEE will be unable to consider the request, determine whether or not to grant the extension, and communicate his or her decision before the deadline, and that any subsequently submitted narrative account will be considered untimely under paragraph (c)(2)(iii) of this section.

**(3) Narrative account.** After the initial notification, a thorough review should be conducted of all export-related transactions where possible violations are suspected. OEE recommends that the review cover a period of five years prior to the date of the initial notification. **If your review goes back less than five years, you risk failing to discover violations that may later become the subject of an investigation. Any violations not voluntarily disclosed do not receive consideration under this section.** However, the failure to make such disclosures will not be treated as a separate violation unless some other section of the EAR or other provision of law requires disclosure. Upon completion of the review, OEE should be furnished with a narrative account that sufficiently describes the suspected violations so that their nature and gravity can be assessed. The narrative account should also describe the nature of the review conducted and measures that may have been taken to minimize the likelihood that violations will occur in the future. The narrative account should include:

(i) The kind of violation involved, for example a shipment without the required license or dealing with a party denied export privileges;

(ii) An explanation of when and how the violations occurred;

(iii) The complete identities and addresses of all individuals and organizations, whether foreign or domestic, involved in the activities giving rise to the violations;

(iv) License numbers;

(v) The description, quantity, value in U.S. dollars and ECCN or other classification of the items involved; and

(vi) A description of any mitigating circumstances.

#### **(4) Supporting documentation.**

(i) The narrative account should be accompanied by copies of documents that explain and support it, including:

(A) Licensing documents such as licenses, license applications, import certificates and end-user statements;

(B) Shipping documents such as Shipper's Export Declarations, air waybills and bills of lading; and

(C) Other documents such as letters, facsimiles, telexes and other evidence of written or oral communications, internal memoranda, purchase orders, invoices, letters of credit and brochures.

(ii) Any relevant documents not attached to the narrative account must be retained by the person making the disclosure until OEE requests them, or until a final decision on the disclosed information has been made. After a final decision, the documents should be maintained in accordance with the recordkeeping rules in part 762 of the EAR.

**(5) Certification.** A certification must be submitted stating that all of the representations

Go to Phase I  
"Initial  
Notification" at  
§ 764(c)(2)

made in connection with the voluntary self-disclosure are true and correct to the best of that person's knowledge and belief. Certifications made by a corporation or other organization should be signed by an official of the corporation or other organization with the authority to do so. Section 764.2(g) of this part, relating to false or misleading representations, applies in connection with the disclosure of information under this section.

**(6) Oral presentations.** OEE believes that oral presentations are generally not necessary to augment the written narrative account and supporting documentation. If the person making the disclosure believes otherwise, a request for a meeting should be included with the disclosure.

**(7) Where to make voluntary self-disclosures.** The information constituting a voluntary self-disclosure or any other correspondence pertaining to a voluntary self-disclosure may be submitted to:

Director, Office of Export Enforcement  
1401 Constitution, Ave.  
Room H4514  
Washington, DC 20230  
Tel: (202) 482 5036  
Facsimile: (202) 482-5889

**(d) Action by the Office of Export Enforcement**

After OEE has been provided with the required narrative and supporting documentation, it will acknowledge the disclosure by letter, provide the person making the disclosure with a point of contact, and take whatever additional action, including further investigation, it deems appropriate. As quickly as the facts and circumstances of a given case permit, OEE may take any of the following actions:

(1) Inform the person making the disclosure that, based on the facts disclosed, it plans to take no action;

(2) Issue a warning letter;

(3) Issue a proposed charging letter pursuant to §766.18 of the EAR and attempt to settle the matter;

(4) Issue a charging letter pursuant to §766.3 of the EAR if a settlement is not reached; and/or

(5) Refer the matter to the Department of Justice for criminal prosecution.

**(e) Criteria**

Supplement No. 1 to part 766 describes how BIS typically exercises its discretion regarding whether to pursue an administrative enforcement case under part 766 and what administrative sanctions to seek in settling such a case.

**(f) Treatment of unlawfully exported items after voluntary self-disclosure**

(1) Any person taking certain actions with knowledge that a violation of the EAA or the EAR has occurred has violated §764.2(e) of this part. Any person who has made a voluntary self-disclosure knows that a violation may have occurred. Therefore, at the time that a voluntary self-disclosure is made, the person making the disclosure may request permission from BIS to engage in the activities described in §764.2(e) of this part that would otherwise be prohibited. If the request is granted by the Office of Exporter Services in consultation with OEE, future activities with respect to those items that would otherwise violate §764.2(e) of this part will not constitute violations. However, even if permission is granted, the person making the voluntary self-disclosure is not absolved from liability for any violations disclosed nor relieved of the obligation to obtain any required reexport authorizations.

(2) A license to reexport items that are the subject of a voluntary self-disclosure, and that have been exported contrary to the provisions of the EAA or

the EAR, may be requested from BIS in accordance with the provisions of part 748 of the EAR. If the applicant for reexport authorization knows that the items are the subject of a voluntary self-disclosure, the request should state that a voluntary self-disclosure was made in connection with the export of the commodities for which reexport authorization is sought.

### **§ 764.6 PROTECTIVE ADMINISTRATIVE MEASURES**

#### ***(a) License Exception limitation***

As provided in §740.2(b) of the EAR, all License Exceptions are subject to revision, suspension, or revocation.

#### ***(b) Revocation or suspension of licenses***

As provided in §750.8 of the EAR, all licenses are subject to revision, suspension, or revocation.

#### ***(c) Temporary denial orders***

BIS may, in accordance with §766.24 of the EAR, issue an order temporarily denying export privileges when such an order is necessary in the public interest to prevent the occurrence of an imminent violation.

#### ***(d) Denial based on criminal conviction***

BIS may, in accordance with §766.25 of the EAR, issue an order denying the export privileges of any person who has been convicted of an offense specified in §11(h) of the EAA.

### **§ 764.7 ACTIVITIES INVOLVING ITEMS THAT MAY HAVE BEEN ILLEGALLY EXPORTED OR REEXPORTED TO LIBYA.**

#### ***(a) Introduction.***

As set forth in §764.2(e) of this part, and restated in General Prohibition Ten at §736.2(b)(10) of the EAR, no person (including a non-U.S. Third Party) may order, buy, remove, conceal, store, use, sell, loan, dispose of, transfer, finance, forward, or otherwise service, in whole or in part, any item subject to the EAR with knowledge that a violation has occurred, or will occur, in connection with the item. This section addresses the application of §764.2(e) of this part to activities involving items subject to the EAR that may have been illegally exported or reexported to Libya before the comprehensive embargo on Libya ended (April 29, 2004) (“installed base” items).

#### ***(b) Libya***

**(1) Activities involving installed base items in Libya for which no license is required.** Subject to the reporting requirement set forth in paragraph (b)(1)(ii) of this section, activities within the scope of §764.2(e) of this part involving installed base items described in paragraph (b)(1)(i) of this section that are located in Libya and that were exported or reexported before April 29, 2004 do not require a license from BIS.

**(i) Scope.** An installed base item is within the scope of paragraph (b)(1) of this section if:

**(A)** It is not on the Commerce Control List in Supplement No.1 to Part 774 of the EAR;

**(B)** It is on the Commerce Control List, but is authorized for export or reexport pursuant to a License Exception to Libya; or

**(C)** It is on the Commerce Control List and controlled only for AT reasons or for NS and AT reasons only, and is not listed on the Wassenaar Arrangement’s Sensitive List (Annex 1) or Very Sensitive List (Annex 2) posted on the Wassenaar Arrangement’s web site ([www.wassenaar.org](http://www.wassenaar.org)) at the Control Lists web page.

**NOTE 1 TO PARAGRAPH (b)(1)(i):** An item being exported or reexported to Libya may require

*a license based on the classification of the item to be exported or reexported regardless of whether the item will be used in connection with an installed base item. See paragraph (b)(4) of this section.*

**NOTE 2 TO PARAGRAPH (b)(1)(i):** *Not all items listed on the Wassenaar Arrangement's Annex 1, Sensitive List, and Annex 2, Very Sensitive List, fall under the export licensing jurisdiction of the Department of Commerce. Please refer to the Commerce Control List for additional jurisdictional information related to those items. Also, if you do not have access to the internet to review the Wassenaar Arrangement's Sensitive List and Very Sensitive List, please contact the Office of Exporter Services, Division of Exporter Counseling for assistance at telephone number (202) 482-4811.*

**(ii) Reporting requirement.** Any person engaging in activity described in paragraph (b)(1) of this section must submit to BIS's Office of Export Enforcement (OEE) a report including all known material facts with respect to how the installed base item arrived in Libya. The report must be submitted to OEE at the address identified in §764.4(a) of the EAR within ninety (90) days of the first activity relating to the installed base item in Libya. A report may address more than one activity and/or more than one installed base item. An additional report must be submitted if any new material information regarding the export or reexport to Libya of the installed base item is discovered.

**(2) Licensing procedure for activities involving installed base items in Libya.**

**(i) License requirement.** Any person seeking to undertake activities within the scope of §764.2(e) of the EAR with respect to any installed base item located in Libya and not described in paragraph (b)(1)(i) of this section must obtain a license from BIS prior to engaging in any such activities. License applications should be submitted in accordance with §§ 748.1, 748.4 and

748.6 of the EAR and should fully describe the relevant activity within the scope of §764.2(e) of this part which is the basis of the application. License applications should include all known material facts as to how the installed base item originally was exported or reexported to Libya. This section also applies if you know that an item to be exported or reexported to a third party will be used on an installed base item not described in paragraph (b)(1)(i) of this section.

**(ii) Licensing policy.** BIS will review license applications submitted pursuant to paragraph (b)(2)(i) of this section on a case-by-case basis. Favorable consideration will be given for those applications related to civil end-uses in Libya. Applications related to military, police, intelligence, or other sensitive end-uses in Libya will be subject to a general policy of denial.

**(3) Exclusion.** The provisions of this section are not applicable to any activities within the scope of §764.2(e) of the EAR undertaken with respect to an installed base item in Libya by a person who was party to the original illegal export or reexport of the related installed base item to Libya. Such persons should voluntarily self-disclose violations pursuant to the procedures set forth in §764.5 of this part, which in some cases may allow activities related to unlawfully exported or reexported items to be undertaken based on permission from BIS.

**(4) Relationship to other Libya License Requirements.** Notwithstanding this section, a license may be required pursuant to another provision of the EAR to engage in activity involving Libya. If a license is required pursuant to another section of the EAR, and the transaction also involves activity within the scope of §764.2(e) of this part related to an installed base item in Libya, this information should be specified on the license application. Such applications must also include all known information as to how the installed base item originally arrived in Libya. If granted, the license for the proposed transaction will also authorize the related activity within the scope of §764.2(e) of this part.

**\*\*VSD  
boycott  
violations**

## **§ 764.8 VOLUNTARY SELF-DISCLOSURES FOR BOYCOTT VIOLATIONS.**

This section sets forth procedures for disclosing violations of part 760 of the EAR - Restrictive Trade Practices or Boycotts and violations of part 762 - Recordkeeping - with respect to records related to part 760. In this section, these provisions are referred to collectively as the “antiboycott provisions”. This section also describes BIS’s policy regarding such disclosures.

### **(a) General policy**

BIS strongly encourages disclosure to the Office of Antiboycott Compliance (OAC) if you believe that you may have violated the antiboycott provisions. Voluntary self-disclosures are a mitigating factor with respect to any enforcement action that OAC might take.

### **(b) Limitations**

**(1)** This section does not apply to disclosures of violations relating to provisions of the EAR other than the antiboycott provisions. Section 764.5 of this part describes how to prepare disclosures of violations of the EAR other than the antiboycott provisions.

**(2)** The provisions of this section apply only when information is provided to OAC for its review in determining whether to take administrative action under parts 764 and 766 of the EAR for violations of the antiboycott provisions.

**(3) Timing.** The provisions of this section apply only if OAC receives the voluntary self-disclosure as described in paragraph (c)(2) of this section before it commences an investigation or inquiry in connection with the same or

substantially similar information it received from another source.

**(i) Mandatory Reports.** For purposes of this section, OAC’s receipt of a report required to be filed under § 760.5 of the EAR that discloses that a person took an action prohibited by part 760 of the EAR constitutes the receipt of information from another source.

**(ii) Requests for Advice.** For purposes of this section, a violation that is revealed to OAC by a person who is seeking advice, either by telephone or e-mail, about the antiboycott provisions does not constitute the receipt of information from another source. Such revelation also does not constitute a voluntary self-disclosure or initial notification of a voluntary self-disclosure for purposes of this section.

**(4)** Although a voluntary self-disclosure is a mitigating factor in determining what administrative sanctions, if any, will be sought by BIS, it is a factor that is considered together with all other factors in a case. The weight given to voluntary self-disclosure is solely within the discretion of BIS, and the mitigating effect of voluntary self-disclosure may be outweighed by aggravating factors. Voluntary self-disclosure does not prevent transactions from being referred to the Department of Justice for criminal prosecution. In such a case, BIS would notify the Department of Justice of the voluntary self-disclosure, but the decision as to how to consider that factor is within the discretion of the Department of Justice.

**(5)** A firm will not be deemed to have made a disclosure under this section unless the individual making the disclosure did so with the full knowledge and authorization of the firm’s senior management or of a person with authority to make such disclosures on behalf of the firm.

**(6)** The provisions of this section do not, nor should they be relied on to, create, confer, or grant any rights, benefits, privileges, or protection

enforceable at law or in equity by any person, business, or entity in any civil, criminal, administrative, or other matter.

**(c) Information to be provided**

**(1) General.** Any person wanting to disclose information that constitutes a voluntary self-disclosure should, in the manner outlined below, initially notify OAC as soon as possible after violations are discovered, and then conduct a thorough review of all transactions where violations of the antiboycott provisions are suspected.

**(2) Initial notification.** The initial notification must be in writing and be sent to the address in § 764.8(c)(7) of this part. The notification should include the name of the person making the disclosure and a brief description of the suspected violations. The notification should describe the general nature and extent of the violations. If the person making the disclosure subsequently completes the narrative account required by § 764.8(c)(3) of this part, the disclosure will be deemed to have been made on the date of the initial notification for purposes of § 764.8(b)(3) of this part.

**(3) Narrative account.** After the initial notification, a thorough review should be conducted of all business transactions where possible antiboycott provision violations are suspected. OAC recommends that the review cover a period of five years prior to the date of the initial notification. If your review goes back less than five years, you risk failing to discover violations that may later become the subject of an investigation. Any violations not voluntarily disclosed do not receive the same mitigation as the violations voluntarily self-disclosed under this section. However, the failure to make such disclosures will not be treated as a separate violation unless some other section of the EAR or other provision of law enforced by BIS requires disclosure. Upon completion of the review, OAC should be furnished with a narrative account that

sufficiently describes the suspected violations so that their nature and gravity can be assessed. The narrative account should also describe the nature of the review conducted and measures that may have been taken to minimize the likelihood that violations will occur in the future. The narrative account should include:

(i) The kind of violation involved, for example, the furnishing of a certificate indicating that the goods supplied did not originate in a boycotted country;

(ii) An explanation of when and how the violations occurred, including a description of activities surrounding the violations (*e.g.*, contract negotiations, sale of goods, implementation of letter of credit, bid solicitation);

(iii) The complete identities and addresses of all individuals and organizations, whether foreign or domestic, involved in the activities giving rise to the violations; and

(iv) A description of any mitigating factors.

**(4) Supporting documentation.**

(i) The narrative account should be accompanied by copies of documents that explain and support it, including:

(A) Copies of boycott certifications and declarations relating to the violation, or copies of documents containing prohibited language or prohibited requests for information;

(B) Other documents relating to the violation, such as letters, facsimiles, telexes and other evidence of written or oral communications, negotiations, internal memoranda, purchase orders, invoices, bid requests, letters of credit and brochures;

(ii) Any relevant documents not attached to the narrative account must be retained by the person making the disclosure until the latest of the following: the documents are supplied to OAC;

BIS informs the disclosing party that it will take no action; BIS issues a warning letter for the violation; BIS issues an order that constitutes the final agency action in the matter and all avenues for appeal are exhausted; or the documents are no longer required to be kept under part 762 of the EAR.

**(5) Certification.** A certification must be submitted stating that all of the representations made in connection with the voluntary self-disclosure are true and correct to the best of that person's knowledge and belief. Certifications made by a corporation or other organization should be signed by an official of the corporation or other organization with the authority to do so. Section 764.2(g) of this part relating to false or misleading representations applies in connection with the disclosure of information under this section.

**(6) Oral presentations.** OAC believes that oral presentations are generally not necessary to augment the written narrative account and supporting documentation. If the person making the disclosure believes otherwise, a request for a meeting should be included with the disclosure.

**(7) Where to make voluntary self-disclosures.** The information constituting a voluntary self-disclosure or any other correspondence pertaining to a voluntary self-disclosure should be submitted to: Office of Antiboycott Compliance, 14<sup>th</sup> and Pennsylvania Ave., NW., Room 6098, Washington, DC 20230, tel: (202) 482-2381, facsimile: (202) 482-0913.

**(d) Action by the Office of Antiboycott Compliance.**

After OAC has been provided with the required narrative and supporting documentation, it will acknowledge the disclosure by letter, provide the person making the disclosure with a point of contact, and take whatever additional action, including further investigation, it deems appropriate. As quickly as the facts and circumstances of a given case permit, BIS may take any of the following actions:

- (1) Inform the person making the disclosure that, based on the facts disclosed, it plans to take no action;
- (2) Issue a warning letter;
- (3) Issue a proposed charging letter and attempt to settle the matter pursuant to § 766.18 of the EAR;
- (4) Issue a charging letter pursuant to § 766.3 of the EAR if a settlement is not reached or BIS otherwise deems appropriate; and/or
- (5) Refer the matter to the Department of Justice for criminal prosecution.

**(e) Criteria.**

Supplement No. 2 to part 766 of the EAR describes how BIS typically exercises its discretion regarding whether to pursue an antiboycott administrative enforcement case under part 766 and what administrative sanctions to seek in settling such a case.

**SUPPLEMENT NO. 1 TO PART 764 - STANDARD TERMS OF ORDERS DENYING EXPORT PRIVILEGES**

*(a) General*

(1) Orders denying export privileges may be “standard” or “non-standard.” This Supplement specifies terms of the standard order denying export privilege with respect to denial orders issued after March 25, 1996. Denial orders issued prior to March 25, 1996 are to be construed, insofar as possible, as having the same scope and effect as the standard denial order. All denial orders are published in the *Federal Register*. The failure by any person to comply with any denial order is a violation of the Export Administration Regulations (EAR) (see §764.2(k) of this part). BIS provides a list of persons currently subject to denial orders on its Web site at <http://www.bis.doc.gov>.

(2) Each denial order shall include:

(i) The name and address of any denied persons and any related persons subject to the denial order;

(ii) The basis for the denial order, such as final decision following charges of violation, settlement agreement, section 11(h) of the EAA, or temporary denial order request;

(iii) The period of denial, the effective date of the order, whether and for how long any portion of the denial of export privileges is suspended, and any conditions of probation; and

(iv) Whether any or all outstanding licenses issued under the EAR to the person(s) named in the denial order or in which such person(s) has an interest, are suspended or revoked.

Denial orders issued prior to March 25, 1996, are to be construed, insofar as possible, as having the same scope and effect as the standard denial order.

The introduction to each denial order shall be specific to that order, and shall include: (1) The name and address of any denied persons and any related persons subject to the denial order; (2) the basis for the denial order, such as final decision following charges of violation, settlement agreement, §11(h) of the EAA, or temporary denial order request; (3) the period of denial, the effective date of the order, whether and for how long any portion of the denial of export privileges is suspended, and any conditions of probation; and (4) whether any or all outstanding licenses issued under the EAR to the person(s) named in the denial order or in which such person(s) has an interest, are suspended or revoked.

*(b) Standard Denial Order Terms*

The following are the standard terms for imposing periods of export denial. Some orders also contain other terms, such as those that impose civil penalties, or that suspend all or part of the penalties or period of denial.

“It is therefore ordered:

First, that [the denied person(s)] may not, directly or indirectly, participate in any way in any transaction involving any commodity, software or technology (hereinafter collectively referred to as “item”) exported or to be exported from the United States that is subject to the Export Administration Regulations (EAR), or in any other activity subject to the EAR, including, but not limited to:

- A. Applying for, obtaining, or using any license, license exception, or export control document;
- B. Carrying on negotiations concerning, or ordering, buying, receiving, using, selling, delivering, storing, disposing of,

forwarding, transporting, financing, or otherwise servicing in any way, any transaction involving any item exported or to be exported from the United States that is subject to the EAR, or in any other activity subject to the EAR; or

- C. Benefiting in any way from any transaction involving any item exported or to be exported from the United States that is subject to the EAR, or in any other activity subject to the EAR.

Second, that no person may, directly or indirectly, do any of the following:

- A. Export, reexport, or transfer (in-country) to or on behalf of the denied person any item subject to the EAR;
- B. Take any action that facilitates the acquisition or attempted acquisition by a denied person of the ownership, possession, or control of any item subject to the EAR that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby a denied person acquires or attempts to acquire such ownership, possession or control;
- C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the denied person of any item subject to the EAR that has been exported from the United States;

- D. Obtain from the denied person in the United States any item subject to the EAR with knowledge or reason to know that the item will be, or is intended to be, exported from the United States; or

- E. Engage in any transaction to service any item subject to the EAR that has been or will be exported from the United States and which is owned, possessed or controlled by a denied person, or service any item, of whatever origin, that is owned, possessed or controlled by a denied person if such service involves the use of any item subject to the EAR that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

Third, that, after notice and opportunity for comment as provided in § 766.23 of the EAR, any person, firm, corporation, or business organization related to the denied person by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services may also be made subject to the provisions of this order.

This order, which constitutes the final agency action in this matter, is effective [DATE OF ISSUANCE].”

**§ 766.1 SCOPE**

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. This part describes the procedures for imposing administrative sanctions for violations of the Export Administration Act of 1979, as amended (the EAA), the Export Administration Regulations (EAR), or any order, license or authorization issued thereunder. Parts 760 and 764 of the EAR specify those actions that constitute violations, and part 764 describes the

sanctions that apply. In addition to describing the procedures for imposing sanctions, this part describes the procedures for imposing temporary denial orders to prevent imminent violations of the EAA, the EAR, or any order, license or authorization issued thereunder. This part also describes the procedures for taking the discretionary protective administrative action of denying the export privileges of persons who have been convicted of violating any of the statutes, including the EAA, listed in section 11(h) of the EAA. Nothing in this part shall be construed as applying to or limiting other administrative or enforcement action relating to the EAA or the EAR, including the exercise of any investigative authorities conferred by the EAA. This part does not confer any procedural rights or impose any requirements based on the Administrative Procedure Act for proceedings charging violations under the EAA, except as expressly provided for in this part.

## § 766.2 DEFINITIONS

As used in this part, the following definitions apply:

*Administrative law judge.* The person authorized to conduct hearings in administrative enforcement proceedings brought under the EAA or to hear appeals from the imposition of temporary denial orders. The term “judge” may be used for brevity when it is clear that the reference is to the administrative law judge.

*Assistant Secretary.* The Assistant Secretary for Export Enforcement, Bureau of Industry and Security.

*Bureau of Industry and Security (BIS).* Bureau of Industry and Security, U.S. Department of Commerce (formerly the Bureau of Export Administration) and all of its component units, including, in particular for purposes of this part, the Office of Antiboycott Compliance, the Office

of Export Enforcement, and the Office of Exporter Services.

*Final decision.* A decision or order assessing a civil penalty, denial of export privileges or other sanction, or otherwise disposing of or dismissing a case, which is not subject to further review under this part, but which is subject to collection proceedings or judicial review in an appropriate Federal district court as authorized by law.

*Initial decision.* A decision of the administrative law judge in proceedings involving violations relating to part 760 of the EAR, which is subject to appellate review by the Under Secretary of Commerce for Industry and Security, but which becomes the final decision in the absence of such an appeal.

*Party.* BIS and any person named as a respondent under this part.

*Recommended decision.* A decision of the administrative law judge in proceedings involving violations other than those relating to part 760 of the EAR, which is subject to review by the Under Secretary of Commerce for Industry and Security, who issues a written order affirming, modifying or vacating the recommended decision.

*Respondent.* Any person named as the subject of a charging letter, proposed charging letter, temporary denial order, or other order proposed or issued under this part.

*Under Secretary.* The Under Secretary for Industry and Security, United States Department of Commerce.

## § 766.3 INSTITUTION OF ADMINISTRATIVE ENFORCEMENT PROCEEDINGS

### (a) Charging letters

The Director of the Office of Export Enforcement (OEE) or the Director of the Office of Antiboycott Compliance (OAC), as appropriate, or such other Department of Commerce official as may be designated by the Assistant Secretary of Commerce for Export Enforcement, may begin administrative enforcement proceedings under this part by issuing a charging letter in the name of BIS. Supplements Nos. 1 and 2 to this part describe how BIS typically exercises its discretion regarding the issuance of charging letters. The charging letter shall constitute the formal complaint and will state that there is reason to believe that a violation of the EAA, the EAR, or any order, license or authorization issued thereunder, has occurred. It will set forth the essential facts about the alleged violation, refer to the specific regulatory or other provisions involved, and give notice of the sanctions available under part 764 of the EAR. The charging letter will inform the respondent that failure to answer the charges as provided in §766.6 of this part will be treated as a default under §766.7 of this part, that the respondent is entitled to a hearing if a written demand for one is requested with the answer, and that the respondent may be represented by counsel, or by other authorized representative who has a power of attorney to represent the respondent. A copy of the charging letter shall be filed with the administrative law judge, which filing shall toll the running of the applicable statute of limitations. Charging letters may be amended or supplemented at any time before an answer is filed, or, with permission of the administrative law judge, afterwards. BIS may unilaterally withdraw charging letters at any time, by notifying the respondent and the administrative law judge.

***(b) Notice of issuance of charging letter instituting administrative enforcement proceeding***

A respondent shall be notified of the issuance of a charging letter, or any amendment or supplement thereto:

- (1) By sending a copy by registered or certified mail or by express mail or commercial courier or delivery service addressed to the respondent at the respondent's last known address;
  - (2) By leaving a copy with the respondent or with an officer, a managing or general agent, or any other agent authorized by appointment or by law to receive service of process for the respondent; or
  - (3) By leaving a copy with a person of suitable age and discretion who resides at the respondent's last known dwelling.
- (4) Delivery of a copy of the charging letter, if made in the manner described in paragraph (b)(2) or (3) of this section, shall be evidenced by a certificate of service signed by the person making such service, stating the method of service and the identity of the person with whom the charging letter was left. The certificate of service shall be filed with the administrative law judge.
- (c) The date of service of notice of the issuance of a charging letter instituting an administrative enforcement proceeding, or service of notice of the issuance of a supplement or amendment to a charging letter, is the date of its delivery, or of its attempted delivery, by any means described in paragraph (b)(1) of this section.

#### **§ 766.4 REPRESENTATION**

A respondent individual may appear and participate in person, a corporation by a duly authorized officer or employee, and a partnership by a partner. If a respondent is represented by counsel, counsel shall be a member in good standing of the bar of any State, Commonwealth or Territory of the United States, or of the District of Columbia, or be licensed to practice law in the

country in which counsel resides if not the United States. A respondent personally, or through counsel or other representative, shall file a notice of appearance with the administrative law judge. BIS will be represented by the Office of Chief Counsel for Industry and Security, U.S. Department of Commerce.

### **§ 766.5 FILING AND SERVICE OF PAPERS OTHER THAN CHARGING LETTER**

#### ***(a) Filing***

All papers to be filed shall be addressed to:

EAR Administrative Enforcement Proceedings  
U.S. Coast Guard, ALJ Docketing Center  
40 S. Gay Street  
Baltimore, Maryland 21202-4022

or such other place as the administrative law judge may designate. Filing by United States mail, first class postage prepaid, by express or equivalent parcel delivery service, or by hand delivery, is acceptable. Filing by mail from a foreign country shall be by airmail. In addition, the administrative law judge may authorize filing of papers by facsimile or other electronic means, provided that a hard copy of any such paper is subsequently filed. A copy of each paper filed shall be simultaneously served on each party.

#### ***(b) Service***

Service shall be made by personal delivery or by mailing one copy of each paper to each party in the proceeding. Service by delivery service or facsimile, in the manner set forth in paragraph (a) of this section, is acceptable. Service on BIS shall be addressed to the

Chief Counsel for Industry and Security  
Room H-3839  
U.S. Department of Commerce

14th Street and Constitution Avenue, N.W.  
Washington, D.C. 20230

Service on a respondent shall be to the address to which the charging letter was sent or to such other address as respondent may provide. When a party has appeared by counsel or other representative, service on counsel or other representative shall constitute service on that party.

#### ***(c) Date***

The date of filing or service is the day when the papers are deposited in the mail or are delivered in person, by delivery service, or by facsimile.

#### ***(d) Certificate of service***

A certificate of service signed by the party making service, stating the date and manner of service, shall accompany every paper, other than the charging letter, filed and served on parties.

#### ***(e) Computing period of time***

In computing any period of time prescribed or allowed by this part or by order of the administrative law judge or the Under Secretary, the day of the act, event, or default from which the designated period of time begins to run is not to be included. The last day of the period so computed is to be included unless it is a Saturday, a Sunday, or a legal holiday (as defined in Rule 6(a) of the Federal Rules of Civil Procedure), in which case the period runs until the end of the next day which is neither a Saturday, a Sunday, nor a legal holiday. Intermediate Saturdays, Sundays, and legal holidays are excluded from the computation when the period of time prescribed or allowed is seven days or less.

### **§ 766.6 ANSWER AND DEMAND FOR HEARING**

#### ***(a) When to answer***

The respondent must answer the charging letter within 30 days after being served with notice of the issuance of a charging letter instituting an administrative enforcement proceeding, or within 30 days of notice of any supplement or amendment to a charging letter, unless time is extended under §766.16 of this part.

***(b) Contents of answer***

The answer must be responsive to the charging letter and must fully set forth the nature of the respondent's defense or defenses. The answer must admit or deny specifically each separate allegation of the charging letter; if the respondent is without knowledge, the answer must so state and will operate as a denial. Failure to deny or controvert a particular allegation will be deemed an admission of that allegation. The answer must also set forth any additional or new matter the respondent believes supports a defense or claim of mitigation. Any defense or partial defense not specifically set forth in the answer shall be deemed waived, and evidence thereon may be refused, except for good cause shown.

***(c) Demand for hearing***

If the respondent desires a hearing, a written demand for one must be submitted with the answer. Any demand by BIS for a hearing must be filed with the administrative law judge within 30 days after service of the answer. Failure to make a timely written demand for a hearing shall be deemed a waiver of the party's right to a hearing, except for good cause shown. If no party demands a hearing, the matter will go forward in accordance with the procedures set forth in §766.15 of this part.

***(d) English language required***

The answer, all other papers, and all documentary evidence must be submitted in English, or translations into English must be filed and served at the same time.

## § 766.7 DEFAULT

***(a) General***

Failure of the respondent to file an answer within the time provided constitutes a waiver of the respondent's right to appear and contest the allegations in the charging letter. In such event, the administrative law judge, on BIS's motion and without further notice to the respondent, shall find the facts to be as alleged in the charging letter and render an initial or recommended decision containing findings of fact and appropriate conclusions of law and issue or recommend an order imposing appropriate sanctions. The decision and order shall be subject to review by the Under Secretary in accordance with the applicable procedures set forth in §766.21 or §766.22 of this part.

***(b) Petition to Set Aside Default***

**(1) Procedure.** Upon petition filed by a respondent against whom a default order has been issued, which petition is accompanied by an answer meeting the requirements of §766.6(b) of this part, the Under Secretary may, after giving all parties an opportunity to comment, and for good cause shown, set aside the default and vacate the order entered thereon and remand the matter to the administrative law judge for further proceedings.

**(2) Time limits.** A petition under this section must be made within one year of the date of entry of the order which the petition seeks to have vacated.

## § 766.8 SUMMARY DECISION

At any time after a proceeding has been initiated, a party may move for a summary decision disposing of some or all of the issues. The administrative law judge may render an initial or recommended decision and issue or recommend

an order if the entire record shows, as to the issue(s) under consideration:

- (a) That there is no genuine issue as to any material fact; and
- (b) That the moving party is entitled to a summary decision as a matter of law.

## § 766.9 DISCOVERY

### *(a) General*

The parties are encouraged to engage in voluntary discovery regarding any matter, not privileged, which is relevant to the subject matter of the pending proceeding. The provisions of the Federal Rules of Civil Procedure relating to discovery apply to the extent consistent with this part and except as otherwise provided by the administrative law judge or by waiver or agreement of the parties. The administrative law judge may make any order which justice requires to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense. These orders may include limitations on the scope, method, time and place of discovery, and provisions for protecting the confidentiality of classified or otherwise sensitive information.

### *(b) Interrogatories and requests for admission or production of documents*

A party may serve on any party interrogatories, requests for admission, or requests for production of documents for inspection and copying, and a party concerned may apply to the administrative law judge for such enforcement or protective order as that party deems warranted with respect to such discovery. The service of a discovery request shall be made at least 20 days before the scheduled date of the hearing unless the administrative law judge specifies a shorter time

period. Copies of interrogatories, requests for admission and requests for production of documents and responses thereto shall be served on all parties, and a copy of the certificate of service shall be filed with the administrative law judge. Matters of fact or law of which admission is requested shall be deemed admitted unless, within a period designated in the request (at least 10 days after service, or within such additional time as the administrative law judge may allow), the party to whom the request is directed serves upon the requesting party a sworn statement either denying specifically the matters of which admission is requested or setting forth in detail the reasons why the party to whom the request is directed cannot truthfully either admit or deny such matters.

### *(c) Depositions*

Upon application of a party and for good cause shown, the administrative law judge may order the taking of the testimony of any person by deposition and the production of specified documents or materials by the person at the deposition. The application shall state the purpose of the deposition and set forth the facts sought to be established through the deposition.

### *(d) Enforcement*

The administrative law judge may order a party to answer designated questions, to produce specified documents or things or to take any other action in response to a proper discovery request. If a party does not comply with such an order, the administrative law judge may make a determination or enter any order in the proceeding as the judge deems reasonable and appropriate. The judge may strike related charges or defenses in whole or in part or may take particular facts relating to the discovery request to which the party failed or refused to respond as being established for purposes of the proceeding in accordance with the contentions of the party seeking discovery. In addition, enforcement by a

district court of the United States may be sought under section 12(a) of the EAA.

## § 766.10 SUBPOENAS

### *(a) Issuance*

Upon the application of any party, supported by a satisfactory showing that there is substantial reason to believe that the evidence would not otherwise be available, the administrative law judge will issue subpoenas requiring the attendance and testimony of witnesses and the production of such books, records or other documentary or physical evidence for the purpose of the hearing, as the judge deems relevant and material to the proceedings, and reasonable in scope.

### *(b) Service*

Subpoenas issued by the administrative law judge may be served in any of the methods set forth in §766.5(b) of this part.

### *(c) Timing*

Applications for subpoenas must be submitted at least 10 days before the scheduled hearing or deposition, unless the administrative law judge determines, for good cause shown, that extraordinary circumstances warrant a shorter time.

## § 766.11 MATTER PROTECTED AGAINST DISCLOSURE

### *(a) Protective measures*

It is often necessary for BIS to receive and consider information and documents that are sensitive from the standpoint of national security, foreign policy, business confidentiality, or investigative concern, and that are to be protected against disclosure. Accordingly, and without limiting the discretion of the administrative law judge to give effect to any other applicable

privilege, it is proper for the administrative law judge to limit discovery or introduction of evidence or to issue such protective or other orders as in the judge's judgment may be consistent with the objective of preventing undue disclosure of the sensitive documents or information. Where the administrative law judge determines that documents containing the sensitive matter need to be made available to a respondent to avoid prejudice, the judge may direct BIS to prepare an unclassified and nonsensitive summary or extract of the documents. The administrative law judge may compare the extract or summary with the original to ensure that it is supported by the source document and that it omits only so much as must remain classified or undisclosed. The summary or extract may be admitted as evidence in the record.

### *(b) Arrangements for access*

If the administrative law judge determines that this procedure is unsatisfactory and that classified or otherwise sensitive matter must form part of the record in order to avoid prejudice to a party, the judge may provide the parties opportunity to make arrangements that permit a party or a representative to have access to such matter without compromising sensitive information. Such arrangements may include obtaining security clearances, obtaining a national interest determination under §12(c) of the EAA, or giving counsel for a party access to sensitive information and documents subject to assurances against further disclosure, including a protective order, if necessary.

## § 766.12 PREHEARING CONFERENCE

*(a)* The administrative law judge, on the judge's own motion or on request of a party, may direct the parties to participate in a prehearing conference, either in person or by telephone, to consider:

- (1) Simplification of issues;
- (2) The necessity or desirability of amendments to pleadings;
- (3) Obtaining stipulations of fact and of documents to avoid unnecessary proof; or
- (4) Such other matters as may expedite the disposition of the proceedings.

(b) The administrative law judge may order the conference proceedings to be recorded electronically or taken by a reporter, transcribed and filed with the judge.

(c) If a prehearing conference is impracticable, the administrative law judge may direct the parties to correspond with the judge to achieve the purposes of such a conference.

(d) The administrative law judge will prepare a summary of any actions agreed on or taken pursuant to this section. The summary will include any written stipulations or agreements made by the parties.

## § 766.13 HEARINGS

### (a) *Scheduling*

The administrative law judge, by agreement with the parties or upon notice to all parties of not less than 30 days, will schedule a hearing. All hearings will be held in Washington, D.C., unless the administrative law judge determines, for good cause shown, that another location would better serve the interests of justice.

### (b) *Hearing procedure*

Hearings will be conducted in a fair and impartial manner by the administrative law judge, who may limit attendance at any hearing or portion thereof to the parties, their representatives and witnesses if the judge deems this necessary or advisable in

order to protect sensitive matter (see §766.11 of this part) from improper disclosure. The rules of evidence prevailing in courts of law do not apply, and all evidentiary material deemed by the administrative law judge to be relevant and material to the proceeding and not unduly repetitious will be received and given appropriate weight.

### (c) *Testimony and record*

Witnesses will testify under oath or affirmation. A verbatim record of the hearing and of any other oral proceedings will be taken by reporter or by electronic recording, transcribed and filed with the administrative law judge. A respondent may examine the transcript and may obtain a copy by paying any applicable costs. Upon such terms as the administrative law judge deems just, the judge may direct that the testimony of any person be taken by deposition and may admit an affidavit or declaration as evidence, provided that any affidavits or declarations have been filed and served on the parties sufficiently in advance of the hearing to permit a party to file and serve an objection thereto on the grounds that it is necessary that the affiant or declarant testify at the hearing and be subject to cross-examination.

### (d) *Failure to appear*

If a party fails to appear in person or by counsel at a scheduled hearing, the hearing may nevertheless proceed, and that party's failure to appear will not affect the validity of the hearing or any proceedings or action taken thereafter.

## § 766.14 INTERLOCUTORY REVIEW OF RULINGS

(a) At the request of a party, or on the judge's own initiative, the administrative law judge may certify to the Under Secretary for review a ruling

that does not finally dispose of a proceeding, if the administrative law judge determines that immediate review may hasten or facilitate the final disposition of the matter.

(b) Upon certification to the Under Secretary of the interlocutory ruling for review, the parties will have 10 days to file and serve briefs stating their positions, and five days to file and serve replies, following which the Under Secretary will decide the matter promptly.

### § 766.15 PROCEEDING WITHOUT A HEARING

If the parties have waived a hearing, the case will be decided on the record by the administrative law judge. Proceeding without a hearing does not relieve the parties from the necessity of proving the facts supporting their charges or defenses. Affidavits or declarations, depositions, admissions, answers to interrogatories and stipulations may supplement other documentary evidence in the record. The administrative law judge will give each party reasonable opportunity to file rebuttal evidence.

### § 766.16 PROCEDURAL STIPULATIONS; EXTENSION OF TIME

#### (a) *Procedural stipulations*

Unless otherwise ordered, a written stipulation agreed to by all parties and filed with the administrative law judge will modify any procedures established by this part.

#### (b) *Extension of time*

(1) The parties may extend any applicable time limitation, by stipulation filed with the administrative law judge before the time limitation expires.

(2) The administrative law judge may, on the judge's own initiative or upon application by any party, either before or after the expiration of any applicable time limitation, extend the time within which to file and serve an answer to a charging letter or do any other act required by this part.

### § 766.17 DECISION OF THE ADMINISTRATIVE LAW JUDGE

#### (a) *Predecisional matters*

Except for default proceedings under §766.7 of this part, the administrative law judge will give the parties reasonable opportunity to submit the following, which will be made a part of the record:

- (1) Exceptions to any ruling by the judge or to the admissibility of evidence proffered at the hearing;
- (2) Proposed findings of fact and conclusions of law;
- (3) Supporting legal arguments for the exceptions and proposed findings and conclusions submitted; and
- (4) A proposed order.

#### (b) *Decision and order*

After considering the entire record in the proceeding, the administrative law judge will issue a written decision.

(1) **Initial decision.** For proceedings charging violations relating to part 760 of the EAR, the decision rendered shall be an initial decision. The decision will include findings of fact, conclusions of law, and findings as to whether there has been a violation of the EAA, the EAR, or any order, license or authorization issued thereunder. If the administrative law judge finds that the evidence

of record is insufficient to sustain a finding that a violation has occurred with respect to one or more charges, the judge shall order dismissal of the charges in whole or in part, as appropriate. If the administrative law judge finds that one or more violations have been committed, the judge may issue an order imposing administrative sanctions, as provided in part 764 of the EAR. The decision and order shall be served on each party, and shall become effective as the final decision of the Department 30 days after service, unless an appeal is filed in accordance with §766.21 of this part.

**(2) Recommended decision.** For proceedings not involving violations relating to part 760 of the EAR, the decision rendered shall be a recommended decision. The decision will include recommended findings of fact, conclusions of law, and findings as to whether there has been a violation of the EAA, the EAR or any order, license or authorization issued thereunder. If the administrative law judge finds that the evidence of record is insufficient to sustain a recommended finding that a violation has occurred with respect to one or more charges, the judge shall recommend dismissal of any such charge. If the administrative law judge finds that one or more violations have been committed, the judge shall recommend an order imposing administrative sanctions, as provided in part 764 of the EAR, or such other action as the judge deems appropriate. The administrative law judge shall immediately certify the record, including the original copy of the recommended decision and order, to the Under Secretary for review in accordance with §766.22 of this part. The administrative law judge shall also immediately serve the recommended decision on all parties. Because of the time limits established in the EAA for review by the Under Secretary, service upon parties shall be by personal delivery, express mail or other overnight carrier.

***(c) Suspension of sanctions***

Any order imposing administrative sanctions may provide for the suspension of the sanction imposed, in whole or in part and on such terms of probation or other conditions as the administrative law judge or the Under Secretary may specify. Any suspension order may be modified or revoked by the signing official upon application of BIS showing a violation of the probationary terms or other conditions, after service on the respondent of notice of the application in accordance with the service provisions of §766.3 of this part, and with such opportunity for response as the responsible signing official in his/her discretion may allow. A copy of any order modifying or revoking the suspension shall also be served on the respondent in accordance with the provisions of §766.3 of this part.

***(d) Time for decision***

Administrative enforcement proceedings not involving violations relating to part 760 of the EAR shall be concluded, including review by the Under Secretary under §766.22 of this part, within one year of the submission of a charging letter, unless the administrative law judge, for good cause shown, extends such period. The charging letter will be deemed to have been submitted to the administrative law judge on the date the respondent files an answer or on the date BIS files a motion for a default order pursuant to §766.7(a) of this part, whichever occurs first.

**§ 766.18 SETTLEMENT**

***(a) Cases may be settled before service of a charging letter***

In cases in which settlement is reached before service of a charging letter, a proposed charging letter will be prepared, and a settlement proposal consisting of a settlement agreement and order will be submitted to the Assistant Secretary for approval and signature. If the Assistant Secretary does not approve the proposal, he/she will notify

the parties and the case will proceed as though no settlement proposal had been made. If the Assistant Secretary approves the proposal, he/she will issue an appropriate order, and no action will be required by the administrative law judge.

*(b) Cases may also be settled after service of a charging letter*

(1) If the case is pending before the administrative law judge, the judge shall stay the proceedings for a reasonable period of time, usually not to exceed 30 days, upon notification by the parties that they have entered into good faith settlement negotiations. The administrative law judge may, in his/her discretion, grant additional stays. If settlement is reached, a proposal will be submitted to the Assistant Secretary for approval and signature. If the Assistant Secretary approves the proposal, he/she will issue an appropriate order, and notify the administrative law judge that the case is withdrawn from adjudication. If the Assistant Secretary does not approve the proposal, he/she will notify the parties and the case will proceed to adjudication by the administrative law judge as though no settlement proposal had been made.

(2) If the case is pending before the Under Secretary under §766.21 or §766.22 of this part, the parties may submit a settlement proposal to the Under Secretary for approval and signature. If the Under Secretary approves the proposal, he/she will issue an appropriate order. If the Under Secretary does not approve the proposal, the case will proceed to final decision in accordance with §766.21 or §766.22 of this part, as appropriate.

(c) Any order disposing of a case by settlement may suspend the administrative sanction imposed, in whole or in part, on such terms of probation or other conditions as the signing official may specify. Any such suspension may be modified or revoked by the signing official, in accordance with the procedures set forth in §766.17(c) of this part.

(d) Any respondent who agrees to an order imposing any administrative sanction does so solely for the purpose of resolving the claims in the administrative enforcement proceeding brought under this part. This reflects the fact that BIS has neither the authority nor the responsibility for instituting, conducting, settling, or otherwise disposing of criminal proceedings. That authority and responsibility are vested in the Attorney General and the Department of Justice.

(e) Cases that are settled may not be reopened or appealed.

(f) Supplements Nos. 1 and 2 to this part describe how BIS typically exercises its discretion regarding the terms under which it is willing to settle particular cases.

## § 766.19 REOPENING

The respondent may petition the administrative law judge within one year of the date of the final decision, except where the decision arises from a default judgment or from a settlement, to reopen an administrative enforcement proceeding to receive any relevant and material evidence which was unknown or unobtainable at the time the proceeding was held. The petition must include a summary of such evidence, the reasons why it is deemed relevant and material, and the reasons why it could not have been presented at the time the proceedings were held. The administrative law judge will grant or deny the petition after providing other parties reasonable opportunity to comment. If the proceeding is reopened, the administrative law judge may make such arrangements as the judge deems appropriate for receiving the new evidence and completing the record. The administrative law judge will then issue a new initial or recommended decision and order, and the case will proceed to final decision and order in accordance with §766.21 or §766.22 of this part, as appropriate.

*(c) Availability of documents***§ 766.20 RECORD FOR DECISION  
AND AVAILABILITY OF  
DOCUMENTS***(a) General*

The transcript of hearings, exhibits, rulings, orders, all papers and requests filed in the proceedings and, for purposes of any appeal under §766.21 of this part or review under §766.22 of this part, the decision of the administrative law judge and such submissions as are provided for by §§766.21 and 766.22 of this part, will constitute the record and the exclusive basis for decision. When a case is settled after the service of a charging letter, the record will consist of any and all of the foregoing, as well as the settlement agreement and the order. When a case is settled before service of a charging letter, the record will consist of the proposed charging letter, the settlement agreement and the order.

*(b) Restricted access*

On the judge's own motion, or on the motion of any party, the administrative law judge may direct that there be a restricted access portion of the record for any material in the record to which public access is restricted by law or by the terms of a protective order entered in the proceedings. A party seeking to restrict access to any portion of the record is responsible for submitting, at the time specified in §766.20(c)(2) of this part, a version of the document proposed for public availability that reflects the requested deletion. The restricted access portion of the record will be placed in a separate file and the file will be clearly marked to avoid improper disclosure and to identify it as a portion of the official record in the proceedings. The administrative law judge may act at any time to permit material that becomes declassified or unrestricted through passage of time to be transferred to the unrestricted access portion of the record.

**(1) Scope.**

(i) For proceedings started on or after October 12, 1979, all charging letters, answers, initial and recommended decisions, and orders disposing of a case will be made available for public inspection in the BIS Freedom of Information Records Inspection Facility, U.S. Department of Commerce, Room H-6624, 14th Street and Pennsylvania Avenue, N.W., Washington, D.C. 20230. The complete record for decision, as defined in paragraphs (a) and (b) of this section will be made available on request. In addition, all decisions of the Under Secretary on appeal pursuant to §766.22 of this part and those final orders providing for denial, suspension or revocation of export privileges shall be published in the *Federal Register*.

(ii) For proceedings started before October 12, 1979, the public availability of the record for decision will be governed by the applicable regulations in effect when the proceedings were begun.

**(2) Timing.**

(i) *Antiboycott cases.* For matters relating to part 760 of the EAR, documents are available immediately upon filing, except for any portion of the record for which a request for segregation is made. Parties that seek to restrict access to any portion of the record under paragraph (b) of this section must make such a request, together with the reasons supporting the claim of confidentiality, simultaneously with the submission of material for the record.

(ii) *Other cases.* In all other cases, documents will be available only after the final administrative disposition of the case. In these cases, parties desiring to restrict access to any portion of the record under paragraph (b) of this section must assert their claim of confidentiality,

together with the reasons for supporting the claim, before the close of the proceeding.

## § 766.21 APPEALS

### *(a) Grounds*

For proceedings charging violations relating to part 760 of the EAR, a party may appeal to the Under Secretary from an order disposing of a proceeding or an order denying a petition to set aside a default or a petition for reopening, on the grounds:

- (1) That a necessary finding of fact is omitted, erroneous or unsupported by substantial evidence of record;
- (2) That a necessary legal conclusion or finding is contrary to law;
- (3) That prejudicial procedural error occurred, or
- (4) That the decision or the extent of sanctions is arbitrary, capricious or an abuse of discretion. The appeal must specify the grounds on which the appeal is based and the provisions of the order from which the appeal is taken.

### *(b) Filing of appeal*

An appeal from an order must be filed with the Office of the Under Secretary for Export Administration, Bureau of Industry and Security, U.S. Department of Commerce, Room H-3898, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, within 30 days after service of the order appealed from. If the Under Secretary cannot act on an appeal for any reason, the Under Secretary will designate another Department of Commerce official to receive and act on the appeal.

### *(c) Effect of appeal*

The filing of an appeal shall not stay the operation of any order, unless the order by its express terms so provides or unless the Under Secretary, upon application by a party and with opportunity for response, grants a stay.

### *(d) Appeal procedure*

The Under Secretary normally will not hold hearings or entertain oral argument on appeals. A full written statement in support of the appeal must be filed with the appeal and be simultaneously served on all parties, who shall have 30 days from service to file a reply. At his/her discretion, the Under Secretary may accept new submissions, but will not ordinarily accept those submissions filed more than 30 days after the filing of the reply to the appellant's first submission.

### *(e) Decisions*

The decision will be in writing and will be accompanied by an order signed by the Under Secretary giving effect to the decision. The order may either dispose of the case by affirming, modifying or reversing the order of the administrative law judge or may refer the case back to the administrative law judge for further proceedings.

## § 766.22 REVIEW BY UNDER SECRETARY

### *(a) Recommended decision*

For proceedings not involving violations relating to part 760 of the EAR, the administrative law judge shall immediately refer the recommended decision and order to the Under Secretary. Because of the time limits provided under the EAA for review by the Under Secretary, service of the recommended decision and order on the parties, all papers filed by the parties in response, and the final decision of the Under Secretary must be by personal delivery, facsimile, express mail

or other overnight carrier. If the Under Secretary cannot act on a recommended decision and order for any reason, the Under Secretary will designate another Department of Commerce official to receive and act on the recommendation.

**(b) Submissions by parties**

Parties shall have 12 days from the date of issuance of the recommended decision and order in which to submit simultaneous responses. Parties thereafter shall have eight days from receipt of any response(s) in which to submit replies. Any response or reply must be received within the time specified by the Under Secretary.

**(c) Final decision**

Within 30 days after receipt of the recommended decision and order, the Under Secretary shall issue a written order affirming, modifying or vacating the recommended decision and order of the administrative law judge. If he/she vacates the recommended decision and order, the Under Secretary may refer the case back to the administrative law judge for further proceedings. Because of the time limits, the Under Secretary's review will ordinarily be limited to the written record for decision, including the transcript of any hearing, and any submissions by the parties concerning the recommended decision.

**(d) Delivery**

The final decision and implementing order shall be served on the parties and will be publicly available in accordance with §766.20 of this part.

**§ 766.23 RELATED PERSONS**

**(a) General**

In order to prevent evasion, certain types of orders under this part may be made applicable not only to the respondent, but also to other persons

then or thereafter related to the respondent by ownership, control, position of responsibility, affiliation, or other connection in the conduct of trade or business. Orders that may be made applicable to related persons include those that deny or affect export privileges, including temporary denial orders, and those that exclude a respondent from practice before BIS.

**(b) Procedures**

If BIS has reason to believe that a person is related to the respondent and that an order that is being sought or that has been issued should be made applicable to that person in order to prevent evasion of the order, BIS shall, except in an *ex parte* proceeding under §766.24(a) of this part, give that person notice in accordance with §766.5(b) of this part and an opportunity to oppose such action. If the official authorized to issue the order against the respondent finds that the order should be made applicable to that person in order to prevent evasion of the order that official shall issue or amend the order accordingly.

**(c) Appeals**

Any person named by BIS in an order as related to the respondent may appeal that action. The sole issues to be raised and ruled on in any such appeal are whether the person so named is related to the respondent and whether the order is justified in order to prevent evasion.

(1) A person named as related to the respondent in an order issued pursuant to §766.25 may file an appeal with the Under Secretary for Industry and Security pursuant to part 756 of the EAR.

(2) A person named as related to the respondent in an order issued pursuant to other provisions of this part may file an appeal with the administrative law judge.

(i) If the order made applicable to the related person is for a violation related to part 760 of the

EAR, the related person may file an appeal with the administrative law judge. The related person may appeal the initial decision and order of the administrative law judge to the Under Secretary in accordance with the procedures set forth in §766.21.

(ii) If the order made applicable to the related person is issued pursuant to §766.24 of this part to prevent an imminent violation, the recommended decision and order of the administrative law judge shall be reviewed by the Under Secretary in accordance with the procedures set forth in §766.24(e) of this part.

(iii) If the order made applicable to the related person is for a violation of the EAR not related to part 760 of the EAR and not issued pursuant to §766.24 of this part, the recommended decision and order of the administrative law judge shall be reviewed by the Under Secretary in accordance with the procedures set forth in §766.22 of this part.

## § 766.24 TEMPORARY DENIALS

### (a) General

The procedures in this section apply to temporary denial orders issued on or after July 12, 1985. For temporary denial orders issued on or before July 11, 1985, the proceedings will be governed by the applicable regulations in effect at the time the temporary denial orders were issued. Without limiting any other action BIS may take under the EAR with respect to any application, order, license or authorization issued under the EAA, BIS may ask the Assistant Secretary to issue a temporary denial order on an *ex parte* basis to prevent an imminent violation, as defined in this section, of the EAA, the EAR, or any order, license or authorization issued thereunder. The temporary denial order will deny export privileges to any person named in the order as provided for in §764.3(a)(2) of the EAR.

### (b) Issuance

(1) The Assistant Secretary may issue an order temporarily denying to a person any or all of the export privileges described in part 764 of the EAR upon a showing by BIS that the order is necessary in the public interest to prevent an imminent violation of the EAA, the EAR, or any order, license or authorization issued thereunder.

(2) The temporary denial order shall define the imminent violation and state why it was issued without a hearing. Because all denial orders are public, the description of the imminent violation and the reasons for proceeding on an *ex parte* basis set forth therein shall be stated in a manner that is consistent with national security, foreign policy, business confidentiality, and investigative concerns.

(3) A violation may be “imminent” either in time or in degree of likelihood. To establish grounds for the temporary denial order, BIS may show either that a violation is about to occur, or that the general circumstances of the matter under investigation or case under criminal or administrative charges demonstrate a likelihood of future violations. To indicate the likelihood of future violations, BIS may show that the violation under investigation or charges is significant, deliberate, covert and/or likely to occur again, rather than technical or negligent, and that it is appropriate to give notice to companies in the United States and abroad to cease dealing with the person in U.S.-origin items in order to reduce the likelihood that a person under investigation or charges continues to export or acquire abroad such items, risking subsequent disposition contrary to export control requirements. Lack of information establishing the precise time a violation may occur does not preclude a finding that a violation is imminent, so long as there is sufficient reason to believe the likelihood of a violation.

(4) The temporary denial order will be issued for a period not exceeding 180 days.

(5) Notice of the issuance of a temporary denial order on an *ex parte* basis shall be given in accordance with §766.5(b) of this part upon issuance.

**(c) Related persons**

A temporary denial order may be made applicable to related persons in accordance with §766.23 of this part.

**(d) Renewal**

(1) If, no later than 20 days before the expiration date of a temporary denial order, BIS believes that renewal of the denial order is necessary in the public interest to prevent an imminent violation, BIS may file a written request setting forth the basis for its belief, including any additional or changed circumstances, asking that the Assistant Secretary renew the temporary denial order, with modifications, if any are appropriate, for an additional period not exceeding 180 days. BIS's request shall be delivered to the respondent, or any agent designated for this purpose, in accordance with §766.5(b) of this part, which will constitute notice of the renewal application.

(2) **Non-resident respondents.** To facilitate timely notice of renewal requests, a respondent not a resident of the United States may designate a local agent for this purpose and provide written notification of such designation to BIS in the manner set forth in §766.5(b) of this part.

**(3) Hearing.**

(i) A respondent may oppose renewal of a temporary denial order by filing with the Assistant Secretary a written submission, supported by appropriate evidence, to be received not later than seven days before the expiration date of such order. For good cause shown, the Assistant Secretary may consider submissions received not later than five days before the

expiration date. The Assistant Secretary ordinarily will not allow discovery; however, for good cause shown in respondent's submission, he/she may allow the parties to take limited discovery, consisting of a request for production of documents. If requested by the respondent in the written submission, the Assistant Secretary shall hold a hearing on the renewal application. The hearing shall be on the record and ordinarily will consist only of oral argument. The only issue to be considered on BIS's request for renewal is whether the temporary denial order should be continued to prevent an imminent violation as defined herein.

(ii) Any person designated as a related person may not oppose the issuance or renewal of the temporary denial order, but may file an appeal in accordance with §766.23(c) of this part.

(iii) If no written opposition to BIS's renewal request is received within the specified time, the Assistant Secretary may issue the order renewing the temporary denial order without a hearing.

(4) A temporary denial order may be renewed more than once.

**(e) Appeals**

**(1) Filing.**

(i) A respondent may, at any time, file an appeal of the initial or renewed temporary denial order with the administrative law judge.

(ii) The filing of an appeal shall stay neither the effectiveness of the temporary denial order nor any application for renewal, nor will it operate to bar the Assistant Secretary's consideration of any renewal application.

(2) **Grounds.** A respondent may appeal on the grounds that the finding that the order is necessary in the public interest to prevent an imminent violation is unsupported.

**(3) Appeal procedure.** A full written statement in support of the appeal must be filed with the appeal together with appropriate evidence, and be simultaneously served on BIS, which shall have seven days from receipt to file a reply. Service on the administrative law judge shall be addressed to U.S. Coast Guard, ALJ Docketing Center, 40 S. Gay Street, Baltimore, Maryland, 21202-4022. Service on BIS shall be as set forth in §766.5(b) of this part. The administrative law judge normally will not hold hearings or entertain oral argument on appeals.

**(4) Recommended Decision.** Within 10 working days after an appeal is filed, the administrative law judge shall submit a recommended decision to the Under Secretary, and serve copies on the parties, recommending whether the issuance or the renewal of the temporary denial order should be affirmed, modified or vacated.

**(5) Final decision.** Within five working days after receipt of the recommended decision, the Under Secretary shall issue a written order accepting, rejecting or modifying the recommended decision. Because of the time constraints, the Under Secretary's review will ordinarily be limited to the written record for decision, including the transcript of any hearing. The issuance or renewal of the temporary denial order shall be affirmed only if there is reason to believe that the temporary denial order is required in the public interest to prevent an imminent violation of the EAA, the EAR, or any order, license or other authorization issued under the EAA.

**(f) Delivery**

A copy of any temporary denial order issued or renewed and any final decision on appeal shall be published in the *Federal Register* and shall be delivered to BIS and to the respondent, or any agent designated for this purpose, and to any related person in the same manner as provided in

§766.5 of this part for filing for papers other than a charging letter.

**§ 766.25 ADMINISTRATIVE ACTION  
DENYING EXPORT PRIVILEGES**

**(a) General**

The Director of the Office of Export Enforcement (OEE), in consultation with the Director of the Office of Exporter Services, may deny the export privileges of any person who has been convicted of a violation of any of the statutes set forth at 50 U.S.C. 4819(e)(1)(B), including any regulation, license, or order issued pursuant to such statutes.

**(b) Procedure**

Upon notification that a person has been convicted of a violation of one or more of the provisions specified in paragraph (a) of this section, the Director of OEE, in consultation with the Director of the Office of Exporter Services, will determine whether to deny such person export privileges, including but not limited to applying for, obtaining, or using any license, License Exception, or export control document; or participating in or benefitting in any way from any export or export-related transaction subject to the EAR. Before taking action to deny a person export privileges under this section, the Director of OEE will provide the person written notice of the proposed action and an opportunity to comment through a written submission, unless exceptional circumstances exist. In reviewing the response, the Director of OEE will consider any relevant or mitigating evidence why these privileges should not be denied. Upon final determination, the Director of OEE will notify by letter each person denied export privileges under this section.

**(c) Criteria**

In determining whether and for how long to deny U.S. export privileges to a person previously

convicted of one or more of the statutes set forth in paragraph (a) of this section, the Director of OEE may take into consideration any relevant information, including, but not limited to, the seriousness of the offense involved in the criminal prosecution, the nature and duration of the criminal sanctions imposed, and whether the person has undertaken any corrective measures.

***(d) Duration***

Any denial of export privileges under this section shall not exceed 10 years from the date of the conviction of the person who is subject to the denial.

***(e) Effect***

Any person denied export privileges under this section will be considered a “person denied export privileges” for purposes of §736.2(b)(4) (General Prohibition 4 - Engage in actions prohibited by a denial order) and §764.2(k) of the EAR.

***(f) Publication***

The orders denying export privileges under this section are published in the *Federal Register* when issued, and, for the convenience of the public, information about those orders may be included in compilations maintained by BIS on a Web site and as a supplement to the unofficial edition of the EAR available by subscription from the Government Printing Office.

***(g) Appeal***

An appeal of an action under this section will be pursuant to part 756 of the EAR.

***(h) Applicability to related person***

The Director of OEE, in consultation with the Director of the Office of Exporter Services, may take action in accordance with § 766.23 of this part to make applicable to related persons an order that is being sought or that has been issued under this section.

**SUPPLEMENT NO. 1 TO PART 766 - GUIDANCE ON CHARGING AND PENALTY DETERMINATIONS IN SETTLEMENT OF ADMINISTRATIVE ENFORCEMENT CASES****Introduction**

This Supplement describes how the Office of Export Enforcement (OEE) at the Bureau of Industry and Security (BIS) responds to apparent violations of the Export Administration Regulations (EAR) and, specifically, how OEE makes penalty determinations in the settlement of civil administrative enforcement cases under part 764 of the EAR. This guidance does not apply to enforcement cases for violations under part 760 of the EAR—Restrictive Trade Practices or Boycotts. Supplement No. 2 to part 766 continues to apply to civil administrative enforcement cases involving part 760 violations.

Because many administrative enforcement cases are resolved through settlement, the process of settling such cases is integral to the enforcement program. OEE carefully considers each settlement offer in light of the facts and circumstances of the case, relevant precedent, and OEE's objective to achieve in each case an appropriate penalty and deterrent effect. In settlement negotiations, OEE encourages parties to provide, and will give serious consideration to, information and evidence that parties believe are relevant to the application of this guidance to their cases, to whether a violation has in fact occurred, or to whether they have an affirmative defense to potential charges.

This guidance does not confer any right or impose any obligation regarding what penalties OEE may seek in litigating a case or what posture OEE may take toward settling a case. Parties do not have a right to a settlement offer or particular settlement terms from OEE, regardless of settlement positions OEE has taken in other cases.

**I. Definitions**

**Note:** See also: Definitions contained in § 766.2 of the EAR.

*Apparent violation* means conduct that constitutes an actual or possible violation of the Export Administration Act of 1979, the International Emergency Economic Powers Act, the EAR, other statutes administered or enforced by BIS, as well as executive orders, regulations, orders, directives, or licenses issued pursuant thereto.

**Applicable schedule amount** means:

1. \$1,000 with respect to a transaction valued at less than \$1,000;
2. \$10,000 with respect to a transaction valued at \$1,000 or more but less than \$10,000;
3. \$25,000 with respect to a transaction valued at \$10,000 or more but less than \$25,000;
4. \$50,000 with respect to a transaction valued at \$25,000 or more but less than \$50,000;
5. \$100,000 with respect to a transaction valued at \$50,000 or more but less than \$100,000;
6. \$170,000 with respect to a transaction valued at \$100,000 or more but less than \$170,000;
7. \$250,000 with respect to a transaction valued at \$170,000 or more.

*Note to definition of applicable schedule amount.* The applicable schedule amount may be adjusted in accordance with U.S. law, e.g., the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Pub. L. 114-74, sec. 701).

*Transaction value* means the U.S. dollar value of a subject transaction, as demonstrated by commercial invoices, bills of lading, signed Customs declarations, AES filings or similar documents. Where the transaction value is not otherwise ascertainable, OEE may consider the market value of the items that were the subject of the transaction and/or the economic benefit derived by the Respondent from the transaction, in determining transaction value. In situations involving a lease of U.S.-origin items, the transaction value will generally be the value of the lease. For purposes of these Guidelines, “transaction value” will not necessarily have the same meaning, nor be applied in the same manner, as that term is used for import valuation purposes at 19 CFR 152.103.

*Voluntary self-disclosure* means the selfinitiated notification to OEE of an apparent violation as described in and satisfying the requirements of § 764.5 of the EAR.

## II. Types of Responses to Apparent Violations

OEE, among other responsibilities, investigates apparent violations of the EAR, or any order, license or authorization issued thereunder. When it appears that such a violation may have occurred, OEE investigations may lead to no action, a warning letter or an administrative enforcement proceeding. A violation may also be referred to the Department of Justice for criminal prosecution. The type of enforcement action initiated by OEE will depend primarily on the nature of the violation. Depending on the facts and circumstances of a particular case, an OEE investigation may lead to one or more of the following actions:

**A. No Action.** If OEE determines that there is insufficient evidence to conclude that a violation has occurred, determines that a violation did not occur and/or, based on an analysis of the Factors outlined in Section III of these Guidelines, concludes that the conduct does not rise to a level warranting an administrative response, then no

action will be taken. In such circumstances, if the investigation was initiated by a voluntary self-disclosure (VSD), OEE will issue a letter (a no-action letter) indicating that the investigation is being closed with no administrative action being taken. OEE may issue a no-action letter in non-voluntarily disclosed cases at its discretion. A no-action determination by OEE represents OEE’s disposition of the apparent violation, unless OEE later learns of additional information regarding the same or similar transactions or other relevant facts. A no-action letter is not a final agency action with respect to whether a violation occurred.

**B. Warning Letter.** If OEE determines that a violation may have occurred but a civil penalty is not warranted under the circumstances, and believes that the underlying conduct could lead to a violation in other circumstances and/or that a Respondent does not appear to be exercising due diligence in assuring compliance with the statutes, executive orders, and regulations that OEE enforces, OEE may issue a warning letter. A warning letter may convey OEE’s concerns about the underlying conduct and/ or the Respondent’s compliance policies, practices, and/or procedures. It may also address an apparent violation of a technical nature, where good faith efforts to comply with the law and cooperate with the investigation are present, or where the investigation commenced as a result of a voluntary self-disclosure satisfying the requirements of § 764.5 of the EAR, provided that no aggravating factors exist. In the exercise of its discretion, OEE may determine in certain instances that issuing a warning letter, instead of bringing an administrative enforcement proceeding, will achieve the appropriate enforcement result. A warning letter will describe the apparent violation and urge compliance. A warning letter represents OEE’s enforcement response to and disposition of the apparent violation, unless OEE later learns of additional information concerning the same or similar apparent violations. A warning letter does not constitute a final agency action with respect to

whether a violation has occurred.

**C. *Administrative enforcement case.*** If OEE determines that a violation has occurred and, based on an analysis of the Factors outlined in Section III of these Guidelines, concludes that the Respondent's conduct warrants a civil monetary penalty or other administrative sanctions, OEE may initiate an administrative enforcement case. The issuance of a charging letter under § 766.3 of the EAR initiates an administrative enforcement proceeding. Charging letters may be issued when there is reason to believe that a violation has occurred. Cases may be settled before or after the issuance of a charging letter. *See* § 766.18 of the EAR. OEE may prepare a proposed charging letter which could result in a case being settled before issuance of an actual charging letter. *See* § 766.18(a) of the EAR. If a case does not settle before issuance of a charging letter and the case proceeds to adjudication, the resulting charging letter may include more violations than alleged in the proposed charging letter, and the civil monetary penalty amounts assessed may be greater than those provided for in Section IV of these Guidelines. Civil monetary penalty amounts for cases settled before the issuance of a charging letter will be determined as discussed in Section IV of these Guidelines. A civil monetary penalty may be assessed for each violation. The maximum amount of such a penalty per violation is stated in § 764.3(a)(1), subject to adjustments under the Federal Civil Penalties Inflation Adjustment Act of 1990 (28 U.S.C. 2461), which are codified at 15 CFR 6.4. OEE will afford the Respondent an opportunity to respond to a proposed charging letter. Responses to charging letters following the institution of an enforcement proceeding under part 766 of the EAR are governed by § 766.3 of the EAR.

**D. *Civil Monetary Penalty.*** OEE may seek a civil monetary penalty if OEE determines that a violation has occurred and, based on the Factors outlined in Section III of these Guidelines, concludes that the Respondent's conduct warrants a monetary penalty. Section IV of these

Guidelines will guide the agency's exercise of its discretion in determining civil monetary penalty amounts.

**E. *Criminal Referral.*** In appropriate circumstances, OEE may refer the matter to the Department of Justice for criminal prosecution. Apparent violations referred for criminal prosecution also may be subject to a civil monetary penalty and/or other administrative sanctions or action by BIS.

**F. *Other Administrative Sanctions or Actions.*** In addition to or in lieu of other administrative actions, OEE may seek sanctions listed in § 764.3 of the EAR. BIS may also take the following administrative actions, among other actions, in response to an apparent violation:

*License Revision, Suspension or Revocation.* BIS authorizations to engage in a transaction pursuant to a license or license exception may be revised, suspended or revoked in response to an apparent violation as provided in §§ 740.2(b) and 750.8 of the EAR.

*Denial of Export Privileges.* An order denying a Respondent's export privileges may be issued, as described in § 764.3(a)(2) of the EAR. Such a denial may extend to all export privileges, as set out in the standard terms for denial orders in Supplement No. 1 to part 764 of the EAR, or may be narrower in scope (*e.g.*, limited to exports of specified items or to specified destinations or customers). A denial order may also be suspended in whole or in part in accordance with § 766.18(c).

*Exclusion from practice.* Under § 764.3(a)(3) of the EAR, any person acting as an attorney, accountant, consultant, freight forwarder or other person who acts in a representative capacity in any matter before BIS may be excluded from practicing before BIS.

*Training and Audit Requirements.* In appropriate cases, OEE may require as part of a settlement

agreement that the Respondent provide training to employees as part of its compliance program, adopt other compliance measures, and/or be subject to internal or independent audits by a qualified outside person. In those cases, OEE may suspend or defer a portion or all of the penalty amount if the suspended amount is applied to comply with such requirements.

**G. Suspension or Deferral.** In appropriate cases, payment of a civil monetary penalty may be suspended or deferred during a probationary period under a settlement agreement and order. If the terms of the settlement agreement or order are not adhered to by the Respondent, then suspension or deferral may be revoked and the full amount of the penalty imposed. *See* § 764.3(a)(1)(iii) of the EAR. In determining whether suspension or deferral is appropriate, OEE may consider, for example, whether the Respondent has demonstrated a limited ability to pay a penalty that would be appropriate for such violations, so that suspended or deferred payment can be expected to have sufficient deterrent value, and whether, in light of all of the circumstances, such suspension or deferral is necessary to make the financial impact of the penalty consistent with the impact of penalties on other parties who committed similar violations. OEE may also take into account when determining whether or not to suspend or defer a civil penalty whether the Respondent will apply a portion or all of the funds suspended or deferred to audit, compliance, or training that may be required under a settlement agreement and order, or the matter is part of a “global settlement” as discussed in more detail below.

### **III. Factors Affecting Administrative Sanctions**

Many apparent violations are isolated occurrences, the result of a good-faith misinterpretation, or involve no more than simple negligence or carelessness. In such instances, absent the presence of aggravating factors, the matter frequently may be addressed with a no

action determination letter or, if deemed necessary, a warning letter. Where the imposition of an administrative penalty is deemed appropriate, as a general matter, OEE will consider some or all of the following Factors in determining the appropriate sanctions in administrative cases, including the appropriate amount of a civil monetary penalty where such a penalty is sought and is imposed as part of a settlement agreement and order. These factors describe circumstances that, in OEE’s experience, are commonly relevant to penalty determinations in settled cases. Factors that are considered exclusively aggravating, such as willfulness, or exclusively mitigating, such as situations where remedial measures were taken, are set forth below. This guidance also identifies General Factors—which can be either mitigating or aggravating—such as the presence or absence of an internal compliance program at the time the apparent violations occurred. Other relevant Factors may also be considered at the agency’s discretion.

While some violations of the EAR have a degree of knowledge or intent as an element of the offense, OEE may regard a violation of any provision of the EAR as knowing or willful if the facts and circumstances of the case support that conclusion. For example, evidence that a corporate entity had knowledge at a senior management level may mean that a higher penalty may be appropriate. OEE will also consider, in accordance with Supplement No. 3 to part 732 of the EAR, the presence of any red flags that should have alerted the Respondent that a violation was likely to occur. The aggravating factors identified in the Guidelines do not alter or amend § 764.2(e) or the definition of “knowledge” in § 772.1, or other provisions of parts 764 and 772 of the EAR. If the violations are of such a nature and extent that a monetary fine alone represents an insufficient penalty, a denial or exclusion order may also be imposed to prevent future violations of the EAR.

#### *Aggravating Factors*

**A. *Willful or Reckless Violation of Law.*** OEE will consider a Respondent's apparent willfulness or recklessness in violating, attempting to violate, conspiring to violate, or causing a violation of the law. Generally, to the extent the conduct at issue appears to be the result of willful conduct—a deliberate intent to violate, attempt to violate, conspire to violate, or cause a violation of the law—the OEE enforcement response will be stronger. Among the factors OEE may consider in evaluating apparent willfulness or recklessness are:

**1. *Willfulness.*** Was the conduct at issue the result of a decision to take action with the knowledge that such action would constitute a violation of U.S. law? Did the Respondent know that the underlying conduct constituted, or likely constituted, a violation of U.S. law at the time of the conduct?

**2. *Recklessness/gross negligence.*** Did the Respondent demonstrate reckless disregard or gross negligence with respect to compliance with U.S. regulatory requirements or otherwise fail to exercise a minimal degree of caution or care in avoiding conduct that led to the apparent violation? Were there warning signs that should have alerted the Respondent that an action or failure to act would lead to an apparent violation?

**3. *Concealment.*** Was there a deliberate effort by the Respondent to hide or purposely obfuscate its conduct in order to mislead OEE, federal, state, or foreign regulators, or other parties involved in the conduct, about an apparent violation?

**Note:** Failure to voluntarily disclose an apparent violation to OEE does not constitute concealment.

**4. *Pattern of Conduct.*** Did the apparent violation constitute or result from a pattern or practice of conduct or was it relatively isolated and atypical in nature? In determining both whether to bring charges and, once charges are brought, whether

to treat the case as egregious, OEE will be mindful of certain situations where multiple recurring violations resulted from a single inadvertent error, such as misclassification. However, for cases that settle before filing of a charging letter with an Administrative Law Judge, OEE will generally charge only the most serious violation per transaction. If OEE issues a proposed charging letter and subsequently files a charging letter with an Administrative Law Judge because a mutually agreeable settlement cannot be reached, OEE will continue to reserve its authority to proceed with all available charges in the charging letter based on the facts presented. When determining a penalty, each violation is potentially chargeable.

**5. *Prior Notice.*** Was the Respondent on notice, or should it reasonably have been on notice, that the conduct at issue, or similar conduct, constituted a violation of U.S. law?

**6. *Management Involvement.*** In cases of entities, at what level within the organization did the willful or reckless conduct occur? Were supervisory or managerial level staff aware, or should they reasonably have been aware, of the willful or reckless conduct?

**B. *Awareness of Conduct at Issue: The Respondent's awareness of the conduct giving rise to the apparent violation.*** Generally, the greater a Respondent's actual knowledge of, or reason to know about, the conduct constituting an apparent violation, the stronger the OEE enforcement response will be. In the case of a corporation, awareness will focus on supervisory or managerial level staff in the business unit at issue, as well as other senior officers and managers. Among the factors OEE may consider in evaluating the Respondent's awareness of the conduct at issue are:

**1. *Actual Knowledge.*** Did the Respondent have actual knowledge that the conduct giving rise to an apparent violation took place, and remain willfully blind to such conduct, and fail to take

remedial measures to address it? Was the conduct part of a business process, structure or arrangement that was designed or implemented with the intent to prevent or shield the Respondent from having such actual knowledge, or was the conduct part of a business process, structure or arrangement implemented for other legitimate reasons that consequently made it difficult or impossible for the Respondent to have actual knowledge?

**2. Reason to Know.** If the Respondent did not have actual knowledge that the conduct took place, did the Respondent have reason to know, or should the Respondent reasonably have known, based on all readily available information and with the exercise of reasonable due diligence, that the conduct would or might take place?

**3. Management Involvement.** In the case of an entity, was the conduct undertaken with the explicit or implicit knowledge of senior management, or was the conduct undertaken by personnel outside the knowledge of senior management? If the apparent violation was undertaken without the knowledge of senior management, was there oversight intended to detect and prevent violations, or did the lack of knowledge by senior management result from disregard for its responsibility to comply with applicable regulations and laws?

**C. Harm to Regulatory Program Objectives: The actual or potential harm to regulatory program objectives caused by the conduct giving rise to the apparent violation.** This factor would be present where the conduct in question, in purpose or effect, substantially implicated national security, foreign policy or other essential interests protected by the U.S. export control system, in view of such factors as the reason for controlling the item to the destination in question; the sensitivity of the item; the prohibitions or restrictions against the recipient of the item; and the licensing policy concerning the transaction (such as presumption of approval or denial). OEE, in its discretion, may consult with other

U.S. agencies or with licensing and enforcement authorities of other countries in making its determination. Among the factors OEE may consider in evaluating the harm to regulatory program objectives are:

**1. Implications for U.S. National Security: The impact that the apparent violation had or could potentially have on the national security of the United States.** For example, if a particular export could undermine U.S. military superiority or endanger U.S. or friendly military forces or be used in a military application contrary to U.S. interests, OEE would consider the implications of the apparent violation to be significant.

**2. Implications for U.S. Foreign Policy: The effect that the apparent violation had or could potentially have on U.S. foreign policy objectives.** For example, if a particular export is, or is likely to be, used by a foreign regime to monitor communications of its population in order to suppress free speech and persecute dissidents, OEE would consider the implications of the apparent violation to be significant.

### General Factors

\*\*general factors

**D. Individual Characteristics: The particular circumstances and characteristics of a Respondent.** Among the factors OEE may consider in evaluating individual characteristics are:

**1. Commercial Sophistication: The commercial sophistication and experience of the Respondent.** Is the Respondent an individual or an entity? If an individual, was the conduct constituting the apparent violation for personal or business reasons?

**2. Size and Sophistication of Operations: The size of a Respondent's business operations, where such information is available and relevant.** At the time of the violation, did the Respondent have any previous export experience and was the Respondent familiar with export

practices and requirements? Qualification of the Respondent as a small business or organization for the purposes of the Small Business Regulatory Enforcement Fairness Act, as determined by reference to the applicable standards of the Small Business Administration, may also be considered.

**3. Volume and Value of Transactions:** *The total volume and value of transactions undertaken by the Respondent on an annual basis, with attention given to the volume and value of the apparent violations as compared with the total volume and value of all transactions.* Was the quantity and/or value of the exports high, such that a greater penalty may be necessary to serve as an adequate penalty for the violation or deterrence of future violations, or to make the penalty proportionate to those for otherwise comparable violations involving exports of lower quantity or value?

**4. Regulatory History:** *The Respondent's regulatory history, including OEE's issuance of prior penalties, warning letters, or other administrative actions (including settlements), other than with respect to antiboycott matters under part 760 of the EAR.* OEE will generally only consider a Respondent's regulatory history for the five years preceding the date of the transaction giving rise to the apparent violation. When an acquiring firm takes reasonable steps to uncover, correct, and voluntarily disclose or cause the voluntary self-disclosure to OEE of conduct that gave rise to violations by an acquired business before the acquisition, OEE typically will not take such violations into account in applying these factors in settling other violations by the acquiring firm.

**5. Other illegal conduct in connection with the export.** Was the transaction in support of other illegal conduct, for example the export of firearms as part of a drug smuggling operation, or illegal exports in support of money laundering?

**6. Criminal Convictions.** Has the Respondent

been convicted of an export related criminal violation?

**Note:** Where necessary to effective enforcement, the prior involvement in export violation(s) of a Respondent's owners, directors, officers, partners, or other related persons may be imputed to a Respondent in determining whether these criteria are satisfied.

**E. Compliance Program:** *The existence, nature and adequacy of a Respondent's risk based BIS compliance program at the time of the apparent violation.* OEE will take account of the extent to which a Respondent complies with the principles set forth in BIS's Export Management System (EMS) Guidelines. Information about the EMS Guidelines can be accessed through the BIS Web site at [www.bis.doc.gov](http://www.bis.doc.gov). In this context, OEE will also consider whether a Respondent's export compliance program uncovered a problem, thereby preventing further violations, and whether the Respondent has taken steps to address compliance concerns raised by the violation, to include the submission of a VSD and steps to prevent reoccurrence of the violation that are reasonably calculated to be effective.

#### Mitigating Factors

**\*\*mitigating factors**

**F. Remedial Response:** *The Respondent's corrective action taken in response to the apparent violation.* Among the factors OEE may consider in evaluating the remedial response are:

1. The steps taken by the Respondent upon learning of the apparent violation. Did the Respondent immediately stop the conduct at issue? Did the Respondent undertake to file a VSD?

2. In the case of an entity, the processes followed to resolve issues related to the apparent violation. Did the Respondent discover necessary information to ascertain the causes and extent of the apparent violation, fully and expeditiously? Was senior management fully informed? If so,

when?

3. In the case of an entity, whether it adopted new and more effective internal controls and procedures to prevent the occurrence of similar apparent violations. If the entity did not have a BIS compliance program in place at the time of the apparent violation, did it implement one upon discovery of the apparent violation? If it did have a BIS compliance program, did it take appropriate steps to enhance the program to prevent the recurrence of similar violations? Did the entity provide the individual(s) and/ or managers responsible for the apparent violation with additional training, and/or take other appropriate action, to ensure that similar violations do not occur in the future?

4. Where applicable, whether the Respondent undertook a thorough review to identify other possible violations.

***G. Exceptional Cooperation with OEE: The nature and extent of the Respondent's cooperation with OEE, beyond those actions set forth in Factor F.*** Among the factors OEE may consider in evaluating exceptional cooperation are:

1. Did the Respondent provide OEE with all relevant information regarding the apparent violation at issue in a timely, comprehensive and responsive manner (whether or not voluntarily self-disclosed), including, if applicable, overseas records?

2. Did the Respondent research and disclose to OEE relevant information regarding any other apparent violations caused by the same course of conduct?

3. Did the Respondent provide substantial assistance in another OEE investigation of another person who may have violated the EAR?

4. Has the Respondent previously made substantial voluntary efforts to provide

information (such as providing tips that led to enforcement actions against other parties) to federal law enforcement authorities in support of the enforcement of U.S. export control regulations?

5. Did the Respondent enter into a statute of limitations tolling agreement, if requested by OEE (particularly in situations where the apparent violations were not immediately disclosed or discovered by OEE, in particularly complex cases, and in cases in which the Respondent has requested and received additional time to respond to a request for information from OEE)? If so, the Respondent's entering into a tolling agreement will be deemed a mitigating factor.

**Note:** A Respondent's refusal to enter into a tolling agreement will not be considered by OEE as an aggravating factor in assessing a Respondent's cooperation or otherwise under the Guidelines.

***H. License Was Likely To Be Approved.*** Would an export license application have likely been approved for the transaction had one been sought? Would the export have qualified for a License Exception? Some license requirements sections in the EAR also set forth a licensing policy (*i.e.*, a statement of the policy under which license applications will be evaluated), such as a general presumption of denial or case by case review. OEE may also consider the licensing history of the specific item to that destination and if the item or end-user has a history of export denials.

*Other Relevant Factors Considered on a Case-by-Case Basis*

***I. Related Violations.*** Frequently, a single export transaction can give rise to multiple violations. For example, an exporter who inadvertently misclassifies an item on the Commerce Control List may, as a result of that error, export the item without the required export license and file

Electronic Export Information (EEI) to the Automated Export System (AES) that both misstates the applicable Export Control Classification Number (ECCN) and erroneously identifies the export as qualifying for the designation “NLR” (no license required) or cites a license exception that is not applicable. In so doing, the exporter commits three violations: one violation of § 764.2(a) of the EAR for the unauthorized export and two violations of § 764.2(g) of the EAR for the two false statements on the EEI filing to the AES. OEE will consider whether the violations stemmed from the same underlying error or omission, and whether they resulted in distinguished or separate harm. OEE generally does not charge multiple violations on a single export, and would not consider the existence of such multiple violations as an aggravating factor in and of itself. It is within OEE’s discretion to charge separate violations and settle the case for a penalty that is less than would be appropriate for unrelated violations under otherwise similar circumstances, or to charge fewer violations and pursue settlement in accordance with that charging decision. OEE generally will consider inadvertent, compounded clerical errors as related and not separate infractions when deciding whether to bring charges and in determining if a case is egregious.

**J. Multiple Unrelated Violations.** In cases involving multiple unrelated violations, OEE is more likely to seek a denial of export privileges and/or a greater monetary penalty than OEE would otherwise typically seek. For example, repeated unauthorized exports could warrant a denial order, even if a single export of the same item to the same destination under similar circumstances might warrant just a civil monetary penalty. OEE takes this approach because multiple violations may indicate serious compliance problems and a resulting greater risk of future violations. OEE may consider whether a Respondent has taken effective steps to address compliance concerns in determining whether multiple violations warrant a denial order in a particular case.

**K. Other Enforcement Action.** Other enforcement actions taken by federal, state, or local agencies against a Respondent for the apparent violation or similar apparent violations, including whether the settlement of alleged violations of BIS regulations is part of a comprehensive settlement with other federal, state, or local agencies. Where an administrative enforcement matter under the EAR involves conduct giving rise to related criminal or civil charges, OEE may take into account the related violations, and their resolution, in determining what administrative sanctions are appropriate under part 766 of the EAR. A criminal conviction indicates serious, willful misconduct and an accordingly high risk of future violations, absent effective administrative sanctions. However, entry of a guilty plea can be a sign that a Respondent accepts responsibility for complying with the EAR and will take greater care to do so in the future. In appropriate cases where a Respondent is receiving substantial criminal penalties, OEE may find that sufficient deterrence may be achieved by lesser administrative sanctions than would be appropriate in the absence of criminal penalties. Conversely, OEE might seek greater administrative sanctions in an otherwise similar case where a Respondent is not subjected to criminal penalties. The presence of a related criminal or civil disposition may distinguish settlements among civil penalty cases that appear otherwise to be similar. As a result, the factors set forth for consideration in civil penalty settlements will often be applied differently in the context of a “global settlement” of both civil and criminal cases, or multiple civil cases, and may therefore be of limited utility as precedent for future cases, particularly those not involving a global settlement.

**L. Future Compliance/Deterrence Effect: The impact an administrative enforcement action may have on promoting future compliance with the regulations by a Respondent and similar parties, particularly those in the same industry**

*sector.*

***M. Other Factors That OEE Deems Relevant.***

On a case-by-case basis, in determining the appropriate enforcement response and/or the amount of any civil monetary penalty, OEE will consider the totality of the circumstances to ensure that its enforcement response is proportionate to the nature of the violation.

**IV. Civil Penalties**

***A. Determining What Sanctions Are Appropriate in a Settlement.***

OEE will review the facts and circumstances surrounding an apparent violation and apply the Factors Affecting Administrative Sanctions in Section III above in determining the appropriate sanction or sanctions in an administrative case, including the appropriate amount of a civil monetary penalty where such a penalty is sought and imposed. Penalties for settlements reached after the initiation of litigation will usually be higher than those described by these guidelines.

***B. Amount of Civil Penalty.***

***1. Determining Whether a Case is Egregious.*** In those cases in which a civil monetary penalty is considered appropriate, OEE will make a determination as to whether a case is deemed “egregious” for purposes of the base penalty calculation. If a case is determined to be egregious, OEE also will also determine the appropriate base penalty amount within the range of base penalty amounts prescribed in paragraphs IV.B.2.a.iii and iv below. These determinations will be based on an analysis of the applicable factors. In making these determinations, substantial weight will generally be given to Factors A (“willful or reckless violation of law”), B (“awareness of conduct at issue”), C (“harm to regulatory program objectives”), and D (“individual characteristics”), with particular emphasis on Factors A, B, and C. A case will be considered an “egregious case” where the analysis of the applicable factors, with a focus on

Factors A, B, and C, indicates that the case represents a particularly serious violation of the law calling for a strong enforcement response. A determination by OEE that a case is “egregious” must have the concurrence of the Assistant Secretary of Commerce for Export Enforcement.

***2. Monetary Penalties in Egregious Cases and Non-Egregious Cases.***

The civil monetary penalty amount shall generally be calculated as follows, except that neither the base penalty amount nor the penalty amount will exceed the applicable statutory maximum:

a. Base Category Calculation and Voluntary Self-Disclosures.

i. In a non-egregious case, if the apparent violation is disclosed through a voluntary self-disclosure, the base penalty amount shall be one-half of the transaction value, capped at a maximum base penalty amount of \$125,000 per violation.

ii. In a non-egregious case, if the apparent violation comes to OEE’s attention by means other than a voluntary self-disclosure, the base penalty amount shall be the “applicable schedule amount,” as defined above (capped at a maximum base penalty amount of \$250,000 per violation).

iii. In an egregious case, if the apparent violation is disclosed through a voluntary self-disclosure, the base penalty amount shall be an amount up to one-half of the statutory maximum penalty applicable to the violation.

The following matrix represents the base penalty amount of the civil monetary penalty for each category of violation:

**BASE PENALTY MATRIX**

Egregious Case?

Voluntary Self-Disclosure ?	NO	YES
	(1) One-Half of the Transaction Value (capped at \$125,000 per violation)	(3) Up to One-Half of the Applicable Statutory Maximum
	NO	YES
	(2) Applicable Schedule Amount (capped at \$250,000 per violation)	(4) Up to the Applicable Statutory Maximum

**Note to paragraph IV.B.2.** The dollar values that appear in IV.B.2.a.i and .ii, and in the Base Penalty Matrix may be adjusted in accordance with U.S. law, e.g., the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Pub. L. 114–74, sec. 701).

b. Adjustment for Applicable Relevant Factors.

In non-egregious cases the base penalty amount of the civil monetary penalty may be adjusted to reflect applicable Factors for Administrative Action set forth in Section III of these Guidelines. In egregious cases the base penalty amount of the civil monetary penalty will be set based on applicable Factors for Administrative Action set forth in Section III of these Guidelines. A Factor may result in a lower or higher penalty amount depending upon whether it is aggravating or mitigating or otherwise relevant to the circumstances at hand. Mitigating factors may be combined for a greater reduction in penalty, but mitigation will generally not exceed 75 percent of the base penalty, except in the case of VSDs, where full suspension is possible with conditions in certain nonegregious cases. Subject to this limitation, as a general matter, in those cases where the following Mitigating Factors are

present, OEE will adjust the base penalty amount in the following manner:

In cases involving exceptional cooperation with OEE as set forth in Mitigating Factor G, but no voluntary self-disclosure as defined in § 764.5 of the EAR, the base penalty amount generally will be reduced between 25 and 40 percent. Exceptional cooperation in cases involving voluntary self-disclosure may also be considered as a further mitigating factor. In cases involving a Respondent’s first violation, the base penalty amount generally will be reduced by up to 25 percent. An apparent violation generally will be considered a “first violation” if the Respondent has not been convicted of an export-related criminal violation or been subject to a BIS final order in five years, preceding the date of the transaction giving rise to the apparent violation. A group of substantially similar apparent violations addressed in a single Charging Letter shall be considered as a single violation for purposes of this subsection. In those cases where a prior Charging Letter within the preceding five years involved conduct of a substantially different nature from the apparent violation at issue, OEE may consider the apparent violation at issue a “first violation.” Warning Letters issued within the preceding five years are not factored into account for purposes of determining eligibility for “first offense” mitigation. When an acquiring firm takes reasonable steps to uncover, correct, and disclose or cause to be disclosed to OEE conduct that gave rise to violations by an acquired business before the acquisition, OEE typically will not take such violations into account as an aggravating factor in settling other violations by the acquiring firm.

iii. In cases involving charges pertaining to transactions where a license exception would have been available or a license would likely have been approved had one been sought as set forth in Mitigating Factor H, the base penalty amount generally will be reduced by up to 25 percent.

In all cases, the penalty amount will not exceed

the applicable statutory maximum. Similarly, while mitigating factors may be combined for a greater reduction in penalty, mitigation will generally not exceed 75 percent of the base penalty, except in the case of VSDs, where full suspension is possible with conditions in certain

nonegregious cases.

*C. Settlement Procedures.* The procedures relating to the settlement of administrative enforcement cases are set forth in § 766.18 of the EAR.

**SUPPLEMENT NO. 2 TO PART 766 - GUIDANCE ON CHARGING AND PENALTY DETERMINATIONS IN SETTLEMENT OF ADMINISTRATIVE ENFORCEMENT CASES INVOLVING ANTIBOYCOTT MATTERS**

**(a) Introduction**

**(1) Scope.** This Supplement describes how the Office of Antiboycott Compliance (OAC) responds to violations of part 760 of the EAR “Restrictive Trade Practices or Boycotts” and to violations of part 762 “Recordkeeping” when the recordkeeping requirement pertains to part 760 (together referred to in this supplement as the “antiboycott provisions”). It also describes how BIS makes penalty determinations in the settlement of administrative enforcement cases brought under parts 764 and 766 of the EAR involving violations of the antiboycott provisions. This supplement does not apply to enforcement cases for violations of other provisions of the EAR.

**(2) Policy Regarding Settlement.** Because many administrative enforcement cases are resolved through settlement, the process of settling such cases is integral to the enforcement program. BIS carefully considers each settlement offer in light of the facts and circumstances of the case, relevant precedent, and BIS’s objective to achieve in each case an appropriate level of penalty and deterrent effect. In settlement negotiations, BIS encourages parties to provide, and will give serious consideration to, information and evidence that the parties believe is relevant to the application of this guidance to their cases, to whether a violation has in fact occurred, and to whether they have a defense to potential charges.

**(3) Limitation.** BIS’s policy and practice is to treat similarly situated cases similarly, taking into consideration that the facts and combination of mitigating and aggravating factors are different in each case. However, this guidance does not confer any right or impose any obligation regarding what posture or penalties BIS may seek

in settling or litigating a case. Parties do not have a right to a settlement offer or particular settlement terms from BIS, regardless of settlement postures BIS has taken in other cases.

**(b) Responding to Violations**

OAC within BIS investigates possible violations of Section 8 of the Export Administration Act of 1979, as amended (“Foreign Boycotts”), the antiboycott provisions of EAR, or any order or authorization related thereto. When BIS has reason to believe that such a violation has occurred, BIS may issue a warning letter or initiate an administrative enforcement proceeding. A violation may also be referred to the Department of Justice for criminal prosecution.

**(1) Issuing a warning letter.** Warning letters represent BIS’s belief that a violation has occurred. In the exercise of its discretion, BIS may determine in certain instances that issuing a warning letter, instead of bringing an administrative enforcement proceeding, will fulfill the appropriate enforcement objective. A warning letter will fully explain the violation.

(i) BIS may issue warning letters where:

(A) the investigation commenced as a result of a voluntary self-disclosure satisfying the requirements of § 764.8 of the EAR; or

(B) the party has not previously committed violations of the antiboycott provisions.

(ii) BIS may also consider the category of violation as discussed in paragraph (d)(2) of this supplement in determining whether to issue a warning letter or initiate an enforcement proceeding. A violation covered by Category C

(failure to report or late reporting of receipt of boycott requests) might warrant a warning letter rather than initiation of an enforcement proceeding.

(iii) BIS will not issue a warning letter if it concludes, based on available information, that a violation did not occur.

(iv) BIS may reopen its investigation of a matter should it receive additional evidence or if it appears that information previously provided to BIS during the course of its investigation was incorrect.

**(2) Pursuing an administrative enforcement case.** The issuance of a charging letter under § 766.3 of this part initiates an administrative proceeding.

(i) Charging letters may be issued when there is reason to believe that a violation has occurred. Cases may be settled before or after the issuance of a charging letter. See § 766.18 of this part.

(ii) Although not required to do so by law, BIS may send a proposed charging letter to a party to inform the party of the violations that BIS has reason to believe occurred and how BIS expects that those violations would be charged. Issuance of the proposed charging letter provides an opportunity for the party and BIS to consider settlement of the case prior to the initiation of formal enforcement proceedings.

**(3) Referring for criminal prosecution.** In appropriate cases, BIS may refer a case to the Department of Justice for criminal prosecution, in addition to pursuing an administrative enforcement action.

**(c) Types of administrative sanctions**

Administrative enforcement cases generally are settled on terms that include one or more of three administrative sanctions:

**(1)** A monetary penalty may be assessed for each violation as provided in § 764.3(a)(1) of the EAR;

*Note to paragraph (c)(1): The maximum penalty is subject to adjustments under the Federal Civil Penalties Adjustment Act of 1990 (28 USC 2461, note (2000)), which are codified at 15 CFR § 6.4. For violations that occurred before March 9, 2006, the maximum monetary penalty per violation is \$11,000. For violations occurring on or after March 9, 2006, the maximum monetary penalty per violation is \$50,000.*

**(2)** An order denying a party's export privileges under the EAR may be issued, under § 764.3(a)(2) of the EAR; or

**(3)** Exclusion from practice under § 764.3(a)(3) of the EAR.

**(d) How BIS determines what sanctions are appropriate in a settlement**

**(1) General Factors.** BIS looks to the following general factors in determining what administrative sanctions are appropriate in each settlement.

(i) *Degree of seriousness.* In order to violate the antiboycott provisions of the EAR, a U.S. person does not need to have actual "knowledge" or a reason to know, as that term is defined in § 772.1 of the EAR, of relevant U.S. laws and regulations. Typically, in cases that do not involve knowing violations, BIS will seek a settlement for payment of a civil penalty (unless the matter is resolved with a warning letter). However, in cases involving knowing violations, conscious disregard of the antiboycott provisions, or other such serious violations (e.g., furnishing prohibited information in response to a boycott questionnaire with knowledge that such furnishing is in violation of the EAR), BIS is more likely to seek a denial of export privileges or an exclusion from practice, and/or a greater

monetary penalty as BIS considers such violations particularly egregious.

(ii) *Category of violations.* In connection with its activities described in paragraph (a)(1) of this supplement, BIS recognizes three categories of violations under the antiboycott provisions of the EAR. (See § 760.2, § 760.4 and § 760.5 of the EAR for examples of each type of violation other than recordkeeping). These categories reflect the relative seriousness of a violation, with Category A violations typically warranting the most stringent penalties, including up to the maximum monetary penalty, a denial order and/or an exclusion order. Through providing these categories in this penalty guidelines notice, BIS hopes to give parties a general sense of how it views the seriousness of various violations. This guidance, however, does not confer any right or impose any obligation as to what penalties BIS may impose based on its review of the specific facts of a case.

(A) The Category A violations and the sections of the EAR that set forth their elements are:

(1) Discriminating against U.S. persons on the basis of race, religion, sex, or national origin - § 760.2(b);

(2) Refusing to do business or agreeing to refuse to do business - § 760.2(a);

(3) Furnishing information about race, religion, sex, or national origin of U.S. persons including, but not limited to, providing information in connection with a boycott questionnaire about the religion of employees - § 760.2(c);

(4) Evading the provisions of part 760 - § 760.4;

(5) Furnishing information about business relationships with boycotted countries or blacklisted persons - § 760.2(d); and

(6) Implementing letters of credit - § 760.2(f).

(B) The Category B violations and the sections of the EAR that set forth their elements are:

(1) Furnishing information about associations with charitable or fraternal organizations which support a boycotted country - § 760.2(e); and

(2) Making recordkeeping violations - part 762.

(C) The Category C violation and the section of the EAR that sets forth its elements is: Failing to report timely receipt of boycott requests - § 760.5.

(iii) *Violations arising out of related transactions.* Frequently, a single transaction can give rise to multiple violations. Depending on the facts and circumstances, BIS may choose to impose a smaller or greater penalty per violation. In exercising its discretion, BIS typically looks to factors such as whether the violations resulted from conscious disregard of the requirements of the antiboycott provisions; whether they stemmed from the same underlying error or omission; and whether they resulted in distinguishable or separate harm. The three scenarios set forth below are illustrative of how BIS might view transactions that lead to multiple violations.

(A) *First scenario.* An exporter enters into a sales agreement with a company in a boycotting country. In the course of the negotiations, the company sends the exporter a request for a signed statement certifying that the goods to be supplied do not originate in a boycotted country. The exporter provides the signed certification. Subsequently, the exporter fails to report the receipt of the request. The exporter has committed two violations of the antiboycott

provisions, first, a violation of § 760.2(d) for furnishing information concerning the past or present business relationships with or in a boycotted country, and second, a violation of § 760.5 for failure to report the receipt of a request to engage in a restrictive trade practice or boycott. Although the supplier has committed two violations, BIS may impose a smaller mitigated penalty on a per violation basis than if the violations had stemmed from two separate transactions.

(B) *Second scenario.* An exporter receives a boycott request to provide a statement that the goods at issue in a sales transaction do not contain raw materials from a boycotted country and to include the signed statement along with the invoice. The goods are shipped in ten separate shipments. Each shipment includes a copy of the invoice and a copy of the signed boycott-related statement. Each signed statement is a certification that has been furnished in violation of § 760.2(d)'s bar on the furnishing of prohibited business information. Technically, the exporter has committed ten separate violations of § 760.2(d) and one violation of § 760.5 for failure to report receipt of the boycott request. Given that the violations arose from a single boycott request, however, BIS may treat the violations as related and impose a smaller penalty than it would if the furnishing had stemmed from ten separate requests.

(C) *Third scenario.* An exporter has an ongoing relationship with a company in a boycotting country. The company places three separate orders for goods on different dates with the exporter. In connection with each order, the company requests the exporter to provide a signed statement certifying that the goods to be supplied do not originate in a boycotted country. The exporter provides a signed certification with each order of goods that it ships to the company. BIS has the discretion to penalize the furnishing of each of these three items of information as a separate violation of § 760.2(d) of the EAR for furnishing information concerning past or present

business relationships with or in a boycotted country.

(iv) *Multiple violations from unrelated transactions.* In cases involving multiple unrelated violations, BIS is more likely to seek a denial of export privileges, an exclusion from practice, and/or a greater monetary penalty than in cases involving isolated incidents. For example, the repeated furnishing of prohibited boycott-related information about business relationships with or in boycotted countries during a long period of time could warrant a denial order, even if a single instance of furnishing such information might warrant only a monetary penalty. BIS takes this approach because multiple violations may indicate serious compliance problems and a resulting risk of future violations. BIS may consider whether a party has taken effective steps to address compliance concerns in determining whether multiple violations warrant a denial or exclusion order in a particular case.

(v) *Timing of settlement.* Under § 766.18 of this part, settlement can occur before a charging letter is served, while a case is before an administrative law judge, or while a case is before the Under Secretary for Industry and Security under § 766.22 of this part. However, early settlement—for example, before a charging letter has been filed—has the benefit of freeing resources for BIS to deploy in other matters. In contrast, for example, the BIS resources saved by settlement on the eve of an adversary hearing under § 766.13 of this part are fewer, insofar as BIS has already expended significant resources on discovery, motions practice, and trial preparation. Given the importance of allocating BIS resources to maximize enforcement of the EAR, BIS has an interest in encouraging early settlement and will take this interest into account in determining settlement terms.

(vi) *Related criminal or civil violations.* Where an administrative enforcement matter under the antiboycott provisions involves

conduct giving rise to related criminal charges, BIS may take into account the related violations and their resolution in determining what administrative sanctions are appropriate under part 766 of the EAR. A criminal conviction indicates serious, willful misconduct and an accordingly high risk of future violations, absent effective administrative sanctions. However, entry of a guilty plea can be a sign that a party accepts responsibility for complying with the antiboycott provisions and will take greater care to do so in the future. In appropriate cases where a party is receiving substantial criminal penalties, BIS may find that sufficient deterrence may be achieved by lesser administrative sanctions than would be appropriate in the absence of criminal penalties. Conversely, BIS might seek greater administrative sanctions in an otherwise similar case where a party is not subjected to criminal penalties. The presence of a related criminal or civil disposition may distinguish settlements among civil penalty cases that appear to be otherwise similar. As a result, the factors set forth for consideration in civil penalty settlements will often be applied differently in the context of a “global settlement” of both civil and criminal cases, or multiple civil cases involving other agencies, and may therefore be of limited utility as precedent for future cases, particularly those not involving a global settlement.

(vii) *Familiarity with the Antiboycott Provisions.* Given the scope and detailed nature of the antiboycott provisions, BIS will consider whether a party is an experienced participant in the international business arena who may possess (or ought to possess) familiarity with the antiboycott laws. In this respect, the size of the party’s business, the presence or absence of a legal division or corporate compliance program, and the extent of prior involvement in business with or in boycotted or boycotting countries, may be significant.

**(2) Specific mitigating and aggravating factors.** In addition to the general factors described in paragraph (d)(1) of this supplement,

BIS also generally looks to the presence or absence of the specific mitigating and aggravating factors in this paragraph in determining what sanctions should apply in a given settlement. These factors describe circumstances that, in BIS’s experience, are commonly relevant to penalty determinations in settled cases. However, this listing of factors is not exhaustive and BIS may consider other factors that may further indicate the blameworthiness of a party’s conduct, the actual or potential harm associated with a violation, the likelihood of future violations, and/or other considerations relevant to determining what sanctions are appropriate. The assignment of mitigating or aggravating factors will depend upon the attendant circumstances of the party’s conduct. Thus, for example, one prior violation should be given less weight than a history of multiple violations, and a previous violation reported in a voluntary self-disclosure by a party whose overall compliance efforts are of high quality should be given less weight than previous violation(s) not involving such mitigating factors. Some of the mitigating factors listed in this paragraph are designated as having “great weight.” When present, such a factor should ordinarily be given considerably more weight than a factor that is not so designated.

(i) *Specific mitigating factors.*

(A) *Voluntary self-disclosure.* (GREAT WEIGHT) The party has made a voluntary self-disclosure of the violation, satisfying the requirements of § 764.8 of the EAR.

(B) *Effective compliance program.* (GREAT WEIGHT)

(1) *General policy or program pertaining to Antiboycott Provisions.* BIS will consider whether a party’s compliance efforts uncovered a problem, thereby preventing further violations, and whether the party has taken steps to address compliance concerns raised by the violation, including steps to prevent recurrence of the

violation, that are reasonably calculated to be effective. The focus is on the party's demonstrated compliance with the antiboycott provisions. Whether a party has an effective export compliance program covering other provisions of the EAR is not relevant as a mitigating factor. In the case of a party that has done previous business with or in boycotted countries or boycotting countries, BIS will examine whether the party has an effective antiboycott compliance program and whether its overall antiboycott compliance efforts have been of high quality. BIS may deem it appropriate to review the party's internal business documents relating to antiboycott compliance (e.g., corporate compliance manuals, employee training materials).

(2) *Compliance with reporting and recordkeeping requirements.* In the case of a party that has received reportable boycott requests in the past, BIS may examine whether the party complied with the reporting and recordkeeping requirements of the antiboycott provisions.

(C) *Limited business with or in boycotted or boycotting countries.* The party has had little to no previous experience in conducting business with or in boycotted or boycotting countries. Prior to the current enforcement proceeding, the party had not engaged in business with or in such countries, or had only transacted such business on isolated occasions. BIS may examine the volume of business that the party has conducted with or in boycotted or boycotting countries as demonstrated by the size and dollar amount of transactions or the percentage of a party's overall business that such business constitutes.

(D) *History of compliance with the Antiboycott Provisions of the EAR.*

(1) BIS will consider it to be a mitigating factor if:

(i) The party has never been convicted of a criminal violation of the antiboycott provisions;

(ii) In the past 5 years, the party has not entered into a settlement or been found liable in a boycott-related administrative enforcement case with BIS or another U.S. government agency;

(iii) In the past 3 years, the party has not received a warning letter from BIS relating to the antiboycott provisions; or

(iv) In the past 5 years, the party has not otherwise violated the antiboycott provisions.

(2) Where necessary to ensure effective enforcement, the prior involvement in violations of the antiboycott provisions of a party's owners, directors, officers, partners, or other related persons may be imputed to a party in determining whether these criteria are satisfied. When an acquiring firm takes reasonable steps to uncover, correct, and disclose to BIS conduct that gave rise to violations that the acquired business committed before the acquisition, BIS typically will not take such violations into account in applying this factor in settling other violations by the acquiring firm.

(E) *Exceptional cooperation with the investigation.* The party has provided exceptional cooperation to OAC during the course of the investigation.

(F) *Clarity of request to furnish prohibited information or take prohibited action.* The party responded to a request to furnish information or take action that was ambiguously worded or vague.

(G) *Violations arising out of a party's "passive" refusal to do business in connection with an agreement.* The party has acquiesced in or abided by terms or conditions that constitute a prohibited refusal to do business (e.g., responded to a tender document that contains prohibited language by sending a bid). See "active"

agreements to refuse to do business in paragraph (d)(2)(ii)(I) of this supplement.

(H) *Isolated occurrence of violation.* The violation was an isolated occurrence. (Compare to long duration or high frequency of violations as an aggravating factor in paragraph (d)(2)(ii)(F) of this supplement.)

(ii) *Specific Aggravating Factors.*

(A) *Concealment or obstruction.* The party made a deliberate effort to hide or conceal the violation. (GREAT WEIGHT)

(B) *Serious disregard for compliance responsibilities.* (GREAT WEIGHT) There is evidence that the party's conduct demonstrated a serious disregard for responsibilities associated with compliance with the antiboycott provisions (e.g.: knowing violation of party's own compliance policy or evidence that a party chose to treat potential penalties as a cost of doing business rather than develop a compliance policy).

(C) *History of compliance with the Antiboycott Provisions.*

(I) BIS will consider it to be an aggravating factor if:

(i) The party has been convicted of a criminal violation of the antiboycott provisions;

(ii) In the past 5 years, the party has entered into a settlement or been found liable in a boycott-related administrative enforcement case with BIS or another U.S. government agency;

(iii) In the past 3 years, the party has received a warning letter from BIS relating to the antiboycott provisions; or

(iv) In the past 5 years, the party has otherwise violated the antiboycott provisions.

(2) Where necessary to ensure effective enforcement, the prior involvement in violations of the antiboycott provisions of a party's owners, directors, officers, partners, or other related persons may be imputed to a party in determining whether these criteria are satisfied.

(3) When an acquiring firm takes reasonable steps to uncover, correct, and disclose to BIS conduct that gave rise to violations that the acquired firm committed before being acquired, BIS typically will not take such violations into account in applying this factor in settling other violations by the acquiring firm.

(D) *Familiarity with the type of transaction at issue in the violation.* For example, in the case of a violation involving a letter of credit or related financial document, the party routinely pays, negotiates, confirms, or otherwise implements letters of credit or related financial documents in the course of its standard business practices.

(E) *Prior history of business with or in boycotted countries or boycotting countries.* The party has a prior history of conducting business with or in boycotted and boycotting countries. BIS may examine the volume of business that the party has conducted with or in boycotted and boycotting countries as reflected by the size and dollar amount of transactions or the percentage of a party's overall business that such business constitutes.

(F) *Long duration or high frequency of violations.* Violations that occur at frequent intervals or repeated violations occurring over an extended period of time may be treated more seriously than a single violation or related violations that are committed within a brief period of time, particularly if the violations are committed by a party with a history of business with or in boycotted and boycotting countries. (Compare to isolated occurrence of violation in paragraph (d)(2)(i)(H) of this supplement.)

(G) *Clarity of request to furnish prohibited information or take prohibited action.* The request to furnish information or take other prohibited action (e.g., enter into agreement to refuse to do business with a boycotted country or entity blacklisted by a boycotting country) is facially clear as to its intended purpose.

(H) *Violation relating to specific information concerning an individual entity or individual.* The party has furnished prohibited information about business relationships with specific companies or individuals.

(I) *Violations relating to “active” conduct concerning an agreement to refuse to do business.* The party has taken action that involves altering, editing, or enhancing prohibited terms or language in an agreement to refuse to do business, including a letter of credit, or drafting a clause or provision including prohibited terms or language in the course of negotiating an agreement to refuse to do business, including a letter of credit. See “passive” agreements to refuse to do business in paragraph (d)(2)(i)(G) of this supplement.

***(e) Determination of Scope of Denial or Exclusion Order.***

In deciding whether and what scope of denial or exclusion order is appropriate, the following factors are particularly relevant: the presence of mitigating or aggravating factors of great weight; the degree of seriousness involved; the extent to which senior management participated in or was aware of the conduct in question; the number of violations; the existence and seriousness of prior violations; the likelihood of future violations

(taking into account relevant efforts to comply with the antiboycott provisions); and whether a civil monetary penalty can be expected to have a sufficient deterrent effect.

***(f) How BIS Makes Suspension and Deferral Decisions.***

**(1) Civil Penalties.** In appropriate cases, payment of a civil monetary penalty may be deferred or suspended. See § 764.3(a)(1)(iii) of the EAR. In determining whether suspension or deferral is appropriate, BIS may consider, for example, whether the party has demonstrated a limited ability to pay a penalty that would be appropriate for such violations, so that suspended or deferred payment can be expected to have sufficient deterrent value, and whether, in light of all the circumstances, such suspension or deferral is necessary to make the impact of the penalty consistent with the impact of BIS penalties on other parties who committed similar violations.

**(2) Denial of Export Privileges and Exclusion from Practice.** In deciding whether a denial or exclusion order should be suspended, BIS may consider, for example, the adverse economic consequences of the order on the party, its employees, and other persons, as well as on the national interest in maintaining or promoting the competitiveness of U.S. businesses. An otherwise appropriate denial or exclusion order will be suspended on the basis of adverse economic consequences only if it is found that future violations of the antiboycott provisions are unlikely and if there are adequate measures (usually a substantial civil monetary penalty) to achieve the necessary deterrent effect.

**SUPPLEMENT NO. 2 TO PART 768 - ITEMS ELIGIBLE FOR EXPEDITED LICENSING PROCEDURES..... 1**

**§ 768.1 INTRODUCTION**

In this part, references to the Export Administration Regulations (EAR) are references to 15 CFR chapter VII, subchapter C.

**(a) Authority**

Pursuant to sections 5(f) and 5(h) of the Export Administration Act (EAA), the Under Secretary of Commerce for Export Administration directs the Bureau of Industry and Security (BIS) in gathering and analyzing all the evidence

necessary for the Secretary to determine foreign availability.

**(b) Scope**

This part applies only to the extent that items are controlled for national security purposes. This part does not apply to encryption items that were formerly controlled on the U.S. Munitions List and that were transferred to the Commerce Control List consistent with E.O. 13026 of November 15, 1996 (61 FR 58767) and pursuant to the Presidential Memorandum of that date, which shall not be subject to any mandatory foreign availability review procedures.

**(c) Types of programs**

There are two general programs of foreign availability:

**(1) Foreign availability to controlled countries.** In this category are denied license assessments (*see* §§768.4(b) and 768.7 of this part) and decontrol assessments (*see* §§768.4(c) and 768.7 of this part).

**(2) Foreign availability to non-controlled countries.** In this category are denied license assessments, decontrol assessments, and evaluations of eligibility for expedited licensing (*see* §768.8 of this part).

**(d) Definitions**

The following are definitions of terms used in this part 768:

*Allegation.* See foreign availability submission.

*Assessment.* An evidentiary analysis that BIS conducts concerning the foreign availability of a given item based on the assessment criteria, data gathered by BIS, and the data and recommendations submitted by the Departments of Defense and State and other relevant

departments and agencies, TAC committees, and industry.

*Assessment criteria.* Statutorily established criteria that must be assessed for the Secretary to make a determination with respect to foreign availability. They are, available-in-fact, from a non-U.S. source, in sufficient quantity so as to render the control ineffective, and of comparable quality. (See §768.6 of this part).

*Available-in-fact.* An item is available-in-fact to a country if it is produced within the country or if it may be obtained by that country from a third country. Ordinarily, items will not be considered available-in-fact to non-controlled countries if the items are available only under a validated national security license or a comparable authorization from a country that maintains export controls on such items cooperatively with the United States.

*Claimant.* Any party who makes a foreign availability submission, excluding TACs.

*Comparable quality.* An item is of comparable quality to an item controlled under the EAR if it possesses the characteristics specified in the Commerce Control List (CCL) for that item and is alike in key characteristics that include, but are not limited to: (1) function; (2) technological approach; (3) performance thresholds; (4) maintainability and service life; and (5) any other attribute relevant to the purpose for which the control was placed on the item.

*Controlled countries.* Albania, Armenia, Azerbaijan, Belarus, Bulgaria, Cambodia, Cuba, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Laos, Latvia, Lithuania, Moldova, Mongolia, North Korea, Romania, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan, Vietnam and the People's Republic of China.

*Decontrol.* Removal of license requirements under the EAR.

*Decontrol assessment.* An assessment of the foreign availability of an item to a country or countries for purposes of determining whether decontrol is warranted. Such assessments may be conducted after BIS receives a foreign availability submission or a TAC certification, or by the Secretary's own initiative.

*Denied license assessment.* A foreign availability assessment conducted as a result of a claimant's allegation of foreign availability for an item (or items) that BIS has denied or has issued a letter of intent to deny a license. If the Secretary determines that foreign availability exists, BIS's approval of a license will be limited to the items, countries, and quantities in the allegation.

*Determination.* The Secretary's decision that foreign availability within the meaning of the EAA does or does not exist. (See §768.7 of this part).

*Expedited licensing procedure eligibility evaluation.* An evaluation that BIS initiates for the purpose of determining whether an item is eligible for the expedited licensing procedure. (See §768.8 of this part).

*Expedited licensing procedures.* Under expedited licensing procedures, BIS reviews and processes a license application for the export of an eligible item to a non-controlled country within statutory time limits. Licenses are deemed approved unless BIS denies within the statutory time limits (See §768.8 of this part).

*Foreign availability submission (FAS).* An allegation of foreign availability a claimant makes, supported by reasonable evidence, and submits to BIS. (See §768.5 of this part).

*Item.* Any commodity, software, or technology.

*Items eligible for non-controlled country expedited licensing procedures.* The items described in Supplement No. 2 to this part 768

are eligible for the expedited license procedures (See §768.8 of this part).

*National Security Override (NSO).* A Presidential decision to maintain export controls on an item notwithstanding its foreign availability as determined under the EAA. The President's decision is based on his/her determination that the absence of the controls would prove detrimental to the national security of the United States. Once the President makes such a decision, the President must actively pursue negotiations to eliminate foreign availability with the governments of the sources of foreign availability. (See §768.7 of this part).

*Non-controlled countries.* Any country not defined as a controlled country by this section.

*Non-U.S. source/foreign source.* A person located outside the jurisdiction of the United States (as defined in part 772 of the EAR).

*Reasonable evidence.* Relevant information that is credible.

*Reliable evidence.* Relevant information that is credible and dependable.

*Secretary.* As used in this part, the Secretary refers to the Secretary of Commerce or his/her designee.

*Similar quality.* An item is of similar quality to an item that is controlled under the EAR if it is substantially alike in key characteristics that may include, but are not limited to: (1) function; (2) technological approach; (3) performance thresholds; (4) maintainability and service life; and (5) any other attribute relevant to the purpose for which the control was placed on the item.

*Sufficient quantity.* The amount of an item that would render the U.S. export control, or the denial of the license in question, ineffective in achieving its purpose. For a controlled country, it is the quantity that meets the military needs of

that country so that U.S. exports of the item to that country would not make a significant contribution to its military potential.

*Technical Advisory Committee (TAC).* A Committee created under section 5(h) of the EAA that advises and assists the Secretary of Commerce, the Secretary of Defense, and any other department, agency, or official of the Government of the United States to which the President delegates authority under the EAA on export control matters related to specific areas of controlled items.

*TAC certification.* A statement that a TAC submits to BIS, supported by reasonable evidence, documented as in a FAS, that foreign availability to a controlled country exists for an item that falls within the TAC's area of technical expertise.

## § 768.2 FOREIGN AVAILABILITY DESCRIBED

### (a) Foreign availability

Foreign availability exists when the Secretary determines that an item is comparable in quality to an item subject to U.S. national security export controls, and is available-in-fact to a country, from a non-U.S. source, in sufficient quantities to render the U.S. export control of that item or the denial of a license ineffective. For a controlled country, such control or denial is "ineffective" when maintaining such control or denying a specific license would not restrict the availability of items that would make a significant contribution to the military potential of the controlled country or combination of countries detrimental to the national security of the United States (see sections 5(a) and 3(2)(A) of the EAA).

### (b) Types of foreign availability

There are two types of foreign availability:

- (1) Foreign availability to a controlled country; and
- (2) Foreign availability to a non-controlled country.

**Note to paragraph (b) of this section:** See §768.7 of this part for delineation of the foreign availability assessment procedures, and §768.6 of this part for the criteria used in determining foreign availability.

### § 768.3 FOREIGN AVAILABILITY ASSESSMENT

#### (a) Foreign availability assessment

A foreign availability assessment is an evidentiary analysis that BIS conducts to assess the foreign availability of a given item according to the assessment criteria, based on data submitted by a claimant, the data gathered by BIS, and the data and recommendations submitted by the Departments of Defense and State and other relevant departments and agencies, TAC committees, and industry. BIS uses the results of the analysis in formulating its recommendation to the Secretary on whether foreign availability exists for a given item. If the Secretary determines that foreign availability exists, the Secretary will decontrol the item for national security reasons or approve the license in question if there is no foreign policy reason to deny the license, unless the President exercises a National Security Override (*see* §768.7 of this part). The effect of any such determination on the effectiveness of foreign policy controls may be considered independent of this part.

#### (b) Types of assessments

There are two types of foreign availability assessments:

- (1) Denied license assessment; and

- (2) Decontrol assessment.

#### (c) Expedited licensing procedures

See §768.8 of this part for the evaluation of eligibility of an item for the expedited licensing procedures.

### § 768.4 INITIATION OF AN ASSESSMENT

#### (a) Assessment request

To initiate an assessment, each claimant or TAC must submit a FAS or a TAC Certification to BIS. TACs are authorized to certify foreign availability only to controlled countries. Claimants can allege foreign availability for either controlled or non-controlled countries.

#### (b) Denied license assessment

A claimant whose license application BIS has denied, or for which it has issued a letter of intent to deny on national security grounds, may request that BIS initiate a denied license assessment by submitting a Foreign Availability Submission (FAS) within 90 days after denial of the license. As part of its submission, the claimant must request that the specified license application be approved on the grounds of foreign availability. The evidence must relate to the particular export as described on the license application and to the alleged comparable item. If foreign availability is found, the Secretary will approve the license for the specific items, countries, and quantities listed on the application. The denied license assessment procedure, however, is not intended to result in the removal of the U.S. export control on an item by incrementally providing a country with amounts that, taken together, would constitute a sufficient quantity of an item. The Secretary will not approve on foreign availability grounds a denied license if the approval of such license would itself render the U.S. export control ineffective in achieving its purpose. In the case

of a positive determination, the Secretary will determine whether a decontrol assessment is warranted. If so, then BIS will initiate a decontrol assessment.

*(c) Decontrol assessment*

(1) Any claimant may at any time request that BIS initiate a decontrol assessment by a FAS to BIS alleging foreign availability to any country or countries.

(2) A TAC may request that BIS initiate a decontrol assessment at any time by submitting a TAC Certification to BIS that there is foreign availability to a controlled country for items that fall within the area of the TAC's technical expertise.

(3) The Secretary, on his/her own initiative, may initiate a decontrol assessment.

*(d) BIS mailing address*

All foreign availability submissions and TAC certifications should be submitted to:

- Department of Commerce  
Bureau of Industry and Security  
Room H-1093  
14th Street and Pennsylvania Avenue, NW  
Washington, DC 20230

**§ 768.5 CONTENTS OF FOREIGN  
AVAILABILITY SUBMISSIONS AND  
TECHNICAL ADVISORY  
COMMITTEE CERTIFICATIONS**

(a) All foreign availability submissions must contain, in addition to information on product or technology alleged to be available from foreign sources, at least:

(1) The name of the claimant;

(2) The claimant's mailing and business address;

(3) The claimant's telephone number; and

(4) A contact point and telephone number.

(b) Foreign availability submissions and TAC certifications should contain as much evidence as is available to support the claim, including, but not limited to:

(1) Product names and model designations of the items alleged to be comparable;

(2) Extent to which the alleged comparable item is based on U.S. technology;

(3) Names and locations of the non-U.S. sources and the basis for claiming that the item is a non-U.S. source item;

(4) Key performance elements, attributes, and characteristics of the items on which a qualitative comparison may be made;

(5) Non-U.S. source's production quantities and/or sales of the alleged comparable items and marketing efforts;

(6) Estimated market demand and the economic impact of the control;

(7) Product names, model designations, and value of U.S. controlled parts and components incorporated in the items alleged to be comparable; and

(8) The basis for the claim that the item is available-in-fact to the country or countries for which foreign availability is alleged.

(c) Supporting evidence of foreign availability may include, but is not limited to, the following:

(1) Foreign manufacturers' catalogs, brochures, operation or maintenance manuals;

- (2) Articles from reputable trade and technical publications;
- (3) Photographs;
- (4) Depositions based on eyewitness accounts; and
- (5) Other credible evidence.

*Note to paragraph (c) of this section: See Supplement No. 1 to part 768 for additional examples of supporting evidence.*

(d) Upon receipt of a FAS or TAC certification, BIS will review it to determine whether there is sufficient evidence to support the belief that foreign availability may exist. If BIS determines the FAS or TAC certification is lacking in supporting evidence, BIS will seek additional evidence from appropriate sources, including the claimant or TAC. BIS will initiate the assessment when it determines that it has sufficient evidence that foreign availability may exist. Claimant and TAC certified assessments will be deemed to be initiated as of the date of such determination.

(e) Claimants and TACs are advised to review the foreign availability assessment criteria described in §768.6 of this part and the examples of evidence described in Supplement No. 1 to part 768 when assembling supporting evidence for inclusion in the FAS or TAC certification.

**§ 768.6 CRITERIA**

BIS will evaluate the evidence contained in a FAS or TAC certification and all other evidence gathered in the assessment process in accordance with certain criteria that must be met before BIS can recommend a positive determination to the Secretary. The criteria are defined in §768.1(d) of this part. In order to initiate an assessment, each FAS and TAC certification should address

each of these criteria. The criteria are statutorily prescribed and are:

- (a) Available-in-fact;
- (b) Non-U.S. source;
- (c) Sufficient quantity; and
- (d) Comparable quality.

**§ 768.7 PROCEDURES**

**(a) Initiation of an assessment**

(1) Once BIS accepts a FAS or TAC certification of foreign availability, BIS will notify the claimant or TAC that it is initiating the assessment.

(2) BIS will publish a *Federal Register* notice of the initiation of any assessment.

(3) BIS will notify the Departments of Defense and State, the intelligence community, and any other departments, agencies and their contractors that may have information concerning the item on which BIS has initiated an assessment. Each such department, agency, and contractor shall provide BIS all relevant information concerning the item. BIS will invite interested departments and agencies to participate in the assessment process (*see* paragraph (e) of this section).

**(b) Data gathering**

BIS will seek and consider all available information that bears upon the presence or absence of foreign availability, including but not limited to that evidence described in §768.5(b) and (c) of this part. As soon as BIS initiates the assessment, it will seek evidence relevant to the assessment, including an analysis of the military needs of a selected country or countries, technical analysis, and intelligence information from the Departments of Defense and State, and other U.S.

agencies. Evidence is particularly sought from: industry sources worldwide; other U.S. organizations; foreign governments; commercial, academic and classified data bases; scientific and engineering research and development organizations; and international trade fairs.

**(c) Analysis**

BIS will conduct its analysis by evaluating whether the reasonable and reliable evidence that is relevant to each of the foreign availability criteria provides a sufficient basis to recommend a determination that foreign availability does or does not exist.

**(d) Recommendation and determination**

(1) Upon completion of each assessment, BIS, on the basis of its analysis, will recommend that the Secretary make a determination either that there is or that there is not foreign availability, whichever the evidence supports. The assessment upon which BIS bases its recommendation will accompany the recommendation to the Secretary.

(2) BIS will recommend on the basis of its analysis that the Secretary determine that foreign availability exists to a country when the available evidence demonstrates that an item of comparable quality is available-in-fact to the country, from non-U.S. sources, in sufficient quantity so that continuation of the existing national security export control, or denial of the license application in question on national security grounds, would be ineffective in achieving its purpose. For a controlled country, such control or denial is "ineffective" when comparable items are available-in-fact from foreign sources in sufficient quantities so that maintaining such control or denying a license would not be effective in restricting the availability of items that would make a significant contribution to the military potential of any country or combination of countries

detrimental to the national security of the United States.

(3) The Secretary will make the determination of foreign availability on the basis of the BIS assessment and recommendation; the Secretary's determination will take into account the evidence provided to BIS, the recommendations of the Secretaries of Defense and State and any other interested agencies, and any other information that the Secretary considers relevant.

(4) For all decontrol and denied license assessments (under section 5(f)(3) of the EAA) initiated by a FAS, the Secretary will make a determination within 4 months of the initiation of the assessment and will notify the claimant. The Secretary will submit positive determinations for review to the appropriate departments and agencies.

(5) The deadlines for determinations based on self-initiated and TAC-initiated assessments are different from the deadlines for claimant-initiated assessments (see paragraphs (f)(2) and (f)(3) of this section).

**(e) Interagency review**

BIS will notify all appropriate U.S. agencies and Departments upon the initiation of an assessment and will invite their participation in the assessment process. BIS will provide all interested agencies and departments an opportunity to review source material, draft analyses and draft assessments immediately upon their receipt or production. For claimant-initiated assessments, BIS will provide a copy of all positive recommendations and assessments to interested agencies and departments for their review following the Secretary's determination of foreign availability. For self-initiated and TAC-initiated assessments, BIS will provide all interested agencies an opportunity to review and comment on the assessment.

**(f) Notification**

(1) No later than 5 months after the initiation of an assessment based on a FAS (claimant assessments), the Secretary will inform the claimant in writing and will submit for publication in the *Federal Register* a notice that:

(i) Foreign availability exists, and

(A) The requirement of a license has been removed or the license application in question has been approved; or

(B) The President has determined that for national security purposes the export controls must be maintained or the license application must be denied, notwithstanding foreign availability, and that appropriate steps to eliminate the foreign availability are being initiated; or

(C) In the case of an item controlled multilaterally under the former COCOM regime, the U.S. Government will conduct any necessary consultations concerning the proposed decontrol or approval of the license with the former COCOM regime for a period of up to 4 months from the date of the publication of the determination in the *Federal Register* (the U.S. Government may remove the license requirement for exports to non-controlled countries pending completion of the former COCOM regime review process); or

(ii) Foreign availability does not exist.

(2) For all TAC certification assessments, the Secretary will make a foreign availability determination within 90 days following initiation of the assessment. BIS will prepare and submit a report to the TAC and to the Congress stating that:

(i) The Secretary has found foreign availability and has removed the license requirement; or

(ii) The Secretary has found foreign availability, but has recommended to the President that negotiations be undertaken to eliminate the foreign availability; or

(iii) The Secretary has not found foreign availability.

(3) There is no statutory deadline for assessments self-initiated by the Secretary or for the resulting determination. However, BIS will make every effort to complete such assessments and determinations promptly.

**(g) Foreign availability to controlled countries**

When the Secretary determines that an item controlled for national security reasons is available to a controlled country and the President does not issue a National Security Override (NSO), BIS will submit the determination to the Department of State, along with a draft proposal for the multilateral decontrol of the item or for the former COCOM regime approval of the license. The Department of State will submit the proposal or the license for former COCOM regime review. The former COCOM regime will have up to 4 months for review of the proposal.

**(h) Foreign availability to non-controlled countries**

If the Secretary determines that foreign availability to non-controlled countries exists, the Secretary will decontrol the item for export to all non-controlled countries where it is found to be available, or approve the license in question, unless the President exercises a National Security Override.

**(i) Negotiations to eliminate foreign availability**

(1) The President may determine that an export control must be maintained notwithstanding the existence of foreign availability. Such a determination is called a National Security Override (NSO) and is based on the President's decision that the absence of the control would prove detrimental to the United States national security. Unless extended (as described in paragraph (i)(7) of this section), an NSO is effective for 6 months. Where the President invokes an NSO, the U.S. Government will actively pursue negotiations with the government of any source country during the 6 month period to eliminate the availability.

(2) There are two types of National Security Overrides:

(i) An NSO of a determination of foreign availability resulting from an assessment initiated pursuant to section 5(f) of the EAA (claimant and self-initiated assessments); and

(ii) An NSO of a determination of foreign availability resulting from an assessment initiated pursuant to section 5(h) of the EAA (TAC-certification assessments).

(3) For an NSO resulting from an assessment initiated under section 5(f) of the EAA, the Secretary of any agency may recommend that the President exercise the authority under the EAA to retain the controls or deny the license notwithstanding the finding of foreign availability.

(4) For an NSO resulting from an assessment initiated under section 5(h) of the EAA, the Secretary of Commerce may recommend that the President exercise the authority under the EAA to retain the controls notwithstanding the finding of foreign availability.

(5) Under an NSO resulting from an assessment initiated under section 5(f) of the EAA, the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on

International Relations of the House of Representatives will be notified of the initiation of the required negotiations. The notice will include an explanation of the national security interest that necessitates the retention of controls.

(6) Under an NSO resulting from an assessment initiated under section 5(f) of the EAA, BIS will publish notices in the *Federal Register* consisting of:

(i) The Secretary's determination of foreign availability;

(ii) The President's decision to exercise the NSO;

(iii) A concise statement of the basis for the President's decision; and

(iv) An estimate of the economic impact of the decision.

(7) The 6 month effective period for an NSO may be extended up to an additional 12 months if, prior to the end of the 6 months, the President certifies to Congress that the negotiations are progressing, and determines that the absence of the controls would continue to be detrimental to the United States national security.

(8) After the conclusion of negotiations, BIS will retain the control only to the extent that foreign availability is eliminated. If foreign availability is not eliminated, BIS will decontrol the item by removing the requirement for a license for the export of the item to the destinations covered by the assessment. To the extent that the negotiations are successful and the foreign availability is eliminated, BIS will remove the license requirement for the export of the item to any country that has agreed to eliminate foreign availability.

**(j) Changes in foreign availability**

If BIS becomes aware of conditions, including new evidence, that affect a previous determination that foreign availability exists or does not exist, BIS may review the conditions. If BIS finds that the foreign availability previously determined no longer exists, or that foreign availability not earlier found now does exist, BIS will make a recommendation to the Secretary of Commerce for the appropriate changes in the control. The Secretary of Commerce will make a determination, and BIS will publish a *Federal Register* notice of the determination.

**§ 768.8 ELIGIBILITY OF EXPEDITED LICENSING PROCEDURES FOR NON-CONTROLLED COUNTRIES**

(a) BIS determines the eligibility of an item for expedited licensing procedures on the basis of an evaluation of the foreign availability of the item. Eligibility is specific to the items and the countries to which they are found to be available.

(b) BIS will initiate an eligibility evaluation:

- (1) On its own initiative;
- (2) On receipt of a FAS; or
- (3) On receipt of a TAC certification.

(c) Upon initiation of an eligibility evaluation following receipt of either a FAS or TAC certification, BIS will notify the claimant or TAC of the receipt and initiation of an evaluation and publish a *Federal Register* notice of the initiation of the evaluation.

(d) The criteria for determining eligibility for expedited licensing procedures are:

(1) The item must be available-in-fact to the specified non-controlled country from a foreign source;

(2) The item must be of a quality similar to that of the U.S.-controlled item; and

(3) The item must be available-in-fact to the specified non-controlled country without effective restrictions.

(e) Within 30 days of initiation of the evaluation, the Secretary of Commerce will make a determination of foreign availability on the basis of the BIS evaluation and recommendation, taking into consideration the evidence the Secretaries of Defense, State, and other interested agencies provide to BIS and any other information that the Secretary considers relevant.

(f) Within 30 days of the receipt of the FAS or TAC certification, BIS will publish the Secretary's determination in the *Federal Register*, that the item will or will not be eligible for expedited licensing procedures to the stated countries and, where appropriate, amend Supplement No. 2 to part 768.

(g) Following completion of a self-initiated evaluation, BIS will be notified of the Secretary's determination and, where appropriate, Supplement No. 2 to part 768 will be amended.

(h) Foreign availability submissions and TAC certifications to initiate an expedited licensing procedure evaluation must be clearly designated on their face as a request for expedited licensing procedure and must specify the items, quantities and countries alleged eligible. Submissions and certifications should be sent to:

- Department of Commerce  
Bureau of Industry and Security  
Room H-1093  
14th Street and Pennsylvania Avenue, NW  
Washington, DC 20230

**§ 768.9 APPEALS OF NEGATIVE  
FOREIGN AVAILABILITY  
DETERMINATIONS**

Appeals of negative determinations will be conducted according to the standards and procedures described in part 756 of the EAR. A Presidential decision (NSO) to deny a license or continue controls notwithstanding a determination of foreign availability is not subject to appeal.

**§ 768.10 REMOVAL OF CONTROLS  
ON LESS SOPHISTICATED ITEMS**

Where the Secretary has removed national security controls on an item for foreign availability reasons, the Secretary will also remove controls on similar items that are controlled for national security reasons and whose functions, technological approach, performance thresholds, and other attributes that form the basis for national security export controls do not exceed the technical parameters of the item that BIS has decontrolled for foreign availability reasons.

**SUPPLEMENT NO. 1 TO PART 768 - EVIDENCE OF FOREIGN AVAILABILITY**

This Supplement provides a list of examples of evidence that the Bureau of Industry and Security (BIS) has found to be useful in conducting assessments of foreign availability. A claimant submitting evidence supporting a claim of foreign availability should review this list for suggestions as evidence is collected. Acceptable evidence indicating possible foreign availability is not limited to these examples, nor is any one of these examples, usually, in and of itself, necessarily sufficient to meet a foreign availability criterion. A combination of several types of evidence for each criterion usually is required. A Foreign Availability Submission (FAS) should include as much evidence as possible on all four of the criteria listed below. BIS combines the submitted evidence with the evidence that it collects from other sources. BIS evaluates all evidence, taking into account factors that may include, but are not limited to: information concerning the source of the evidence, corroborative or contradictory indications, and experience concerning the reliability or reasonableness of such evidence. BIS will assess all relevant evidence to determine whether each of the four criteria has been met. Where possible, all information should be in writing. If information is based on third party documentation, the submitter should provide such documentation to BIS. If information is based on oral statements a third party made, the submitter should provide a memorandum of the conversation to BIS if the submitter cannot obtain a written memorandum from the source. BIS will amend this informational list as it identifies new examples of evidence.

*(a) Examples of evidence of foreign availability*

The following are intended as examples of evidence that BIS will consider in evaluating foreign availability. BIS will evaluate all evidence according to the provisions in §768.7(c) of this part in order for it to be used in support of

a foreign availability determination. This list is illustrative only.

**(1) Available-in-fact:**

(i) Evidence of marketing of an item in a foreign country (*e.g.*, an advertisement in the media of the foreign country that the item is for sale there);

(ii) Copies of sales receipts demonstrating sales to foreign countries;

(iii) The terms of a contract under which the item has been or is being sold to a foreign country;

(iv) Information, preferably in writing, from an appropriate foreign government official that the government will not deny the sale of an item it produces to another country in accordance with its laws and regulations;

(v) Information, preferably in writing, from a named company official that the company legally can and would sell an item it produces to a foreign country;

(vi) Evidence of actual shipments of the item to foreign countries (*e.g.*, shipping documents, photographs, news reports);

(vii) An eyewitness report of such an item in operation in a foreign country, providing as much information as available, including where possible the make and model of the item and its observed operating characteristics;

(viii) Evidence of the presence of sales personnel or technical service personnel in a foreign country;

(ix) Evidence of production within a foreign country;

(x) Evidence of the item being exhibited at a trade fair in a foreign country, particularly for the purpose of inducing sales of the item to the foreign country;

(xi) A copy of the export control laws or regulations of the source country, showing that the item is not controlled; or

(xii) A catalog or brochure indicating the item is for sale in a specific country.

**(2) Foreign (non-U.S.) source:**

(i) Names of foreign manufacturers of the item including, if possible, addresses and telephone numbers;

(ii) A report from a reputable source of information on commercial relationships that a foreign manufacturer is not linked financially or administratively with a U.S. company;

(iii) A list of the components in the U.S. item and foreign item indicating model numbers and their sources;

(iv) A schematic of the foreign item identifying its components and their sources;

(v) Evidence that the item is a direct product of foreign technology (*e.g.*, a patent law suit lost by a U.S. producer, a foreign patent);

(vi) Evidence of indigenous technology, production facilities, and the capabilities at those facilities; or

(vii) Evidence that the parts and components of the item are of foreign origin or are exempt from U.S. licensing requirements by the parts and components provision §732.4 of the EAR.

**(3) Sufficient quantity:**

(i) Evidence that foreign sources have the item in serial production;

(ii) Evidence that the item or its product is used in civilian applications in foreign countries;

(iii) Evidence that a foreign country is marketing in the specific country an item of its indigenous manufacture;

(iv) Evidence of foreign inventories of the item;

(v) Evidence of excess capacity in a foreign country's production facility;

(vi) Evidence that foreign countries have not targeted the item or are not seeking to purchase it in the West;

(vii) An estimate by a knowledgeable source of the foreign country's needs; or

(viii) An authoritative analysis of the worldwide market (*i.e.*, demand, production rate for the item for various manufacturers, plant capacities, installed tooling, monthly production rates, orders, sales and cumulative sales over 5-6 years).

**(4) Comparable quality:**

(i) A sample of the foreign item;

(ii) Operation or maintenance manuals of the U.S. and foreign items;

(iii) Records or a statement from a user of the foreign item;

(iv) A comparative evaluation, preferably in writing, of the U.S. and foreign items by, for example, a western producer or purchaser of the item, a recognized expert, a reputable trade publication, or independent laboratory;

(v) A comparative list identifying, by manufacturers and model numbers, the key performance components and the materials used

in the item that qualitatively affect the performance of the U.S. and foreign items;

(vi) Evidence of the interchangeability of U.S. and foreign items;

(vii) Patent descriptions for the U.S. and foreign items;

(viii) Evidence that the U.S. and foreign items meet a published industry, national, or international standard;

(ix) A report or eyewitness account, by deposition or otherwise, of the foreign item's operation;

(x) Evidence concerning the foreign manufacturers' corporate reputation;

(xi) Comparison of the U.S. and foreign end item(s) made from a specific commodity, tool(s), device(s), or technical data; or

(xii) Evidence of the reputation of the foreign item including, if possible, information on maintenance, repair, performance, and other pertinent factors.

## Table of Contents

§ 770.1 INTRODUCTION ..... 1

§ 770.2 ITEM INTERPRETATIONS..... 1

§ 770.3 INTERPRETATIONS RELATED TO EXPORTS OF TECHNOLOGY AND SOFTWARE TO DESTINATIONS IN COUNTRY GROUP D:1..... 7

### **§ 770.1 INTRODUCTION**

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. This part provides commodity, technology, and software interpretations. These interpretations clarify the scope of controls where such scope is not readily apparent from the Commerce Control List (CCL) (see Supplement No. 1 to part 774 of the EAR) and other provisions of the Export Administration Regulations.

### **§ 770.2 ITEM INTERPRETATIONS**

#### **(a) Interpretation 1: Anti-friction bearing or bearing systems and specially designed parts**

(1) Anti-friction bearings or bearing systems shipped as spares or replacements are classified under Export Control Classification Number (ECCN) 2A001 (ball, roller, or needle-roller bearings and parts). This applies to separate shipments of anti-friction bearings or bearing systems and antifriction bearings or bearing systems shipped with machinery or equipment for which they are intended to be used as spares or replacement parts.

(2) An anti-friction bearing or bearing system physically incorporated in a segment of a machine or in a complete machine prior to shipment loses its identity as a bearing. In this scenario, the machine or segment of machinery

containing the bearing is the item subject to export control requirements.

(3) An anti-friction bearing or bearing system not incorporated in a segment of a machine prior to shipment, but shipped as a component of a complete unassembled (knocked-down) machine, is considered a component of a machine. In this scenario, the complete machine is the item subject to export license requirements.

#### **(b) Interpretation 2: Classification of "parts" of machinery, equipment, or other items**

(1) **An assembled machine or unit of equipment is being exported.** In instances where one or more assembled machines or units of equipment are being exported, the individual component parts that are physically incorporated into the machine or equipment do not require a license. The license or general exception under which the complete machine or unit of equipment is exported will also cover its component parts, provided that the parts are normal and usual components of the machine or equipment being exported, or that the physical incorporation is not used as a device to evade the requirement for a license.

(2) **Parts are exported as spares, replacements, for resale, or for stock.** In instances where parts are exported as spares, replacements, for resale, or for stock, a license is required only if the appropriate entry for the part specifies that a license is required for the intended destination.

#### **(c) [RESERVED]**

#### **(d) Interpretation 4: Telecommunications equipment and systems**

Control equipment for paging systems (broadcast radio or selectively signalled receiving systems) is defined as circuit switching equipment in Category 5 of the CCL.

**(e) Interpretation 5: Numerical control systems.**

**(1) Classification of “Numerical Control” Units.** “Numerical control” units for machine tools, regardless of their configurations or architectures, are controlled by their functional characteristics as described in ECCN 2B001.a. “Numerical control” units include computers with add-on “motion control boards”. A computer with add-on “motion control boards” for machine tools may be controlled under ECCN 2B001.a even when the computer alone without “motion control boards” is not subject to licensing requirements under Category 4 and the “motion control boards” are not controlled under ECCN 2B001.b.

**(2) Export documentation requirement.**

(i) When preparing a license application for a numerical control system, the machine tool and the control unit are classified separately. If either the machine tool or the control unit requires a license, then the entire unit requires a license. If either a machine tool or a control unit is exported separately from the system, the exported component is classified on the license application without regard to the other parts of a possible system.

(ii) When preparing the Electronic Export Information (EEI) on the Automated Export System (AES), a system being shipped complete (i.e., machine and control unit), should be reported under the Schedule B number for each machine. When either a control unit or a machine is shipped separately, it should be reported under the Schedule B number appropriate for the individual item being exported.

**(f) Interpretation 6: “Parts,” “accessories,” and equipment exported as scrap**

“Parts,” “accessories,” or equipment that are being shipped as scrap should be described on the EEI filing to the AES in sufficient detail to be

identified under the proper ECCN. When commodities declared as “parts,” “accessories,” or equipment are shipped in bulk, or are otherwise not packaged, packed, or sorted in accordance with normal trade practices, the Customs Officer may require evidence that the shipment is not scrap. Such evidence may include, but is not limited to, bills of sale, orders and correspondence indicating whether the commodities are scrap or are being exported for use as “parts,” “accessories,” or equipment.

**(g) Interpretation 7: Scrap arms, ammunition, and implements of war**

Arms, ammunition, and implements of war, as defined in the U.S. Munitions List, and are under the jurisdiction of the U.S. Department of State (22 CFR parts 120 through 130), except for the following, which are under the jurisdiction of the Department of Commerce:

**(1)** Cartridge and shell cases that have been rendered useless beyond the possibility of restoration to their original identity by means of excessive heating, flame treatment, mangling, crushing, cutting, or by any other method are “scrap”.

**(2)** Cartridge and shell cases that have been sold by the armed services as “scrap”, whether or not they have been heated, flame-treated, mangled, crushed, cut, or reduced to scrap by any other method.

**(3)** Other commodities that may have been on the U.S. Munitions List are “scrap”, and therefore under the jurisdiction of the Department of Commerce, if they have been rendered useless beyond the possibility of restoration to their original identity only by means of mangling, crushing, or cutting. When in doubt as to whether a commodity covered by the Munitions List has been rendered useless, exporters should consult the Directorate of Defense Trade Controls, U.S. Department of State, Washington, D.C. 20520, or the Exporter Counseling

**Interpretations**

Division, Office of Exporter Services, Room 1099A, U.S. Department of Commerce, Washington, D.C. 20230, before reporting a shipment as metal scrap.

**(k) Interpretation 11: Precursor chemicals**

The following chemicals are controlled by ECCN 1C350. The appropriate Chemical Abstract Service Registry (C.A.S.) number and synonyms, (i.e., alternative names) are included to help you determine whether or not your chemicals are controlled by this entry.

**(1)** (C.A.S. #1341-49-7) Ammonium hydrogen bifluoride

- Acid ammonium fluoride
- Ammonium bifluoride
- Ammonium difluoride
- Ammonium hydrofluoride
- Ammonium hydrogen bifluoride
- Ammonium hydrogen difluoride
- Ammonium monohydrogen difluoride

**(2)** (C.A.S. #7784-34-1) Arsenic trichloride

- Arsenic (III) chloride
- Arsenous chloride
- Fuming liquid arsenic
- Trichloroarsine

**(3)** (C.A.S. #76-93-7) Benzilic acid  
alpha.,alpha.-Diphenyl-.alpha.-hydroxyacetic acid

- Diphenylglycolic acid
- .alpha.,.alpha.-Diphenylglycolic acid
- Diphenylhydroxyacetic acid
- .alpha.-Hydroxy-2,2-diphenylacetic acid
- 2-Hydroxy-2,2-diphenylacetic acid
- .alpha.-Hydroxy-.alpha.-phenylbenzeneacetic acid
- Hydroxydiphenylacetic acid

- (4)** (C.A.S. #107-07-3) 2-Chloroethanol
- 2-Chloro-1-ethanol
- Chloroethanol
- 2-Chloroethyl alcohol
- Ethene chlorohydrin
- Ethylchlorohydrin
- Ethylene chlorohydrin
- Ethylene chlorohydrin
- Glycol chlorohydrin
- Glycol monochlorohydrin
- 2-Hydroxyethyl chloride

**(5)** (C.A.S. #78-38-6) Diethyl ethylphosphonate  
Ethylphosphonic acid diethyl ester

**(6)** (C.A.S. #15715-41-0) Diethyl methylphosphonite  
Diethoxymethylphosphine  
Diethyl methanephosphonite  
0,0-Diethyl methylphosphonite  
Methyldiethoxyphosphine  
Methylphosphonous acid diethyl ester

**(7)** (C.A.S. #2404-03-7) Diethyl-N,  
N-dimethylphosphoro- amidate  
N,N-Dimethyl-O,O'-diethyl phosphoramidate  
Diethyl dimethylphosphoramidate  
Dimethylphosphoramidic acid diethyl ester

**(8)** (C.A.S. #762-04-9) Diethyl phosphite  
Diethoxyphosphine oxide  
Diethyl acid phosphite  
Diethyl hydrogen phosphite  
Diethyo phosphonate  
Hydrogen diethyl phosphite

**(9)** (C.A.S. #100-37-8) N,  
N-Diethylethanolamine  
N,N-Diethyl-2-aminoethanol  
Diethyl (2-hydroxyethyl) amine  
N,N-Diethyl-N-(.beta.-hydroxyethyl) amine  
N,N-Diethyl-2-hydroxyethylamine  
Diethylaminoethanol  
2-(Diethylamino) ethanol  
2-(Diethylamino)ethyl alcohol  
N,N-Diethylmonoethanolamine  
(2-Hydroxyethyl) diethylamine

- 2-Hydroxytriethylamine
- (10) (C.A.S. #5842-07-9)  
N,N-Diisopropyl-.beta.-aminoethane thiol  
2-(Diisopropylamino) ethanethiol  
Diisopropylaminoethanethiol  
.beta.-Diisopropylaminoethanethiol  
2-(bis(1-Methylethyl)amino) ethanethiol
- (11) (C.A.S. #4261-68-1) N,  
N-Diisopropyl-.2-aminoethyl chloride  
hydrochloride
- (12) (C.A.S. #96-80-0)  
N,N-Diisopropyl-.beta.-aminoethanol  
N,N-Diisopropyl-2-aminoethanol  
2-(Diisopropylamino) ethanol  
(N,N-Diisopropylamino) ethanol  
2-(Diisopropylamino) ethyl alcohol  
N,N-Diisopropylethanolamine
- (13) (C.A.S. #96-79-7)  
N,N-Diisopropyl-.beta.-aminoethyl chloride  
2-Chloro-N,N-diisopropylethanamine  
1-Chloro-N,N-diisopropylaminoethane  
2-Chloro-N,N-diisopropylethylamine  
N-(2-chloroethyl)-N-(1-methylethyl)-2-prop  
anamine  
N-(2-Chloroethyl) diisopropylamine  
N,N-Diisopropyl-2-chloroethylamine  
1-(Diisopropylamino)-2-cholorethane  
2-(Diisopropylamino)ethyl chloride  
Diisopropylaminoethyl chloride  
.beta.-Diisopropylaminoethyl chloride
- (14) (C.A.S. #108-18-9) Diisopropylamine  
N,N-Diisopropylamine  
N-(1-Methylethyl)-2-propanamine
- (15) (C.A.S. #6163-75-3) Dimethyl  
ethylphosphonate  
Dimethyl ethanephosphonate  
Ethylphosphonic acid dimethyl ester
- (16) (C.A.S. #756-79-6) Dimethyl  
methylphosphonate  
Dimethoxymethyl phosphine oxide
- Dimethyl methanephosphonate  
Methanephosphonic acid dimethyl ester  
Methylphosphonic acid dimethyl ester
- (17) (C.A.S. #868-85-9) Dimethyl phosphite  
Dimethoxyphosphine oxide  
Dimethyl acid phosphite  
Dimethyl hydrogen phosphite  
Dimethyl phosphonate  
Hydrogen dimethyl phosphite  
Methyl phosphate
- (18) (C.A.S. #124-40-3) Dimethylamine  
N-Methyl methanamine
- (19) (C.A.S. #506-59-2) Dimethylamine  
hydrochloride  
Dimethylammonium chloride  
N-Methyl methanamine hydrochloride
- (20) [RESERVED]
- (21) (C.A.S. #1498-40-4) Ethylphosphonous  
dichloride  
Dichloroethylphosphine  
Ethyl phosphonous dichloride  
Ethyl dichlorophosphine
- (22) (C.A.S. #430-78-4) Ethylphosphonus  
difluoride  
Ethyl difluorophosphine
- (23) (C.A.S. #1066-50-8) Ethylphosphonyl  
dichloride  
Dichloroethylphosphine oxide  
Ethanephosphonyl chloride  
Ethylphosphinic dichloride  
Ethylphosphonic acid dichloride  
Ethylphosphonic dichloride
- (24) [RESERVED]
- (25) (C.A.S. #7664-39-3) Hydrogen fluoride  
Anhydrous hydrofluoric acid  
Fluorhydric acid  
Fluorine monohydride  
Hydrofluoric acid gas

- (26) (C.A.S. #3554-74-3)  
 3-Hydroxyl-1-methylpiperidine  
 3-Hydroxy-N-methylpiperidine  
 1-Methyl-3-hydroxypiperidine  
 N-Methyl-3-hydroxypiperidine  
 1-Methyl-3-piperidinol  
 N-Methyl-3-piperidinol
- (27) (C.A.S. #76-89-1) Methyl benzilate  
 Benzilic acid methyl ester  
 .alpha.-Hydroxy-.alpha.-phenylbenzeneacetic acid methyl ester  
 Methyl .alpha.-phenylmandelate  
 Methyl diphenylglycolate
- (28) [RESERVED]

 Phosphoroylchloride  
 Phosphoroyltrichloride  
 Phosphorus chloride oxide  
 Phosphorus monoxide trichloride  
 Phosphorus oxide trichloride  
 Phosphorus oxytrichloride  
 Phosphorus trichloride oxide  
 Phosphoryl trichloride  
 Trichlorophosphine oxide  
 Trichlorophosphorus oxide
- (33) (C.A.S. #10026-13-8) Phosphorus pentachloride  
 Pentachlorophosphorane  
 Pentachlorophosphorus  
 Phosphoric chloride  
 Phosphorus(V) chloride  
 Phosphorus perchloride
- (34) (C.A.S. #1314-80-3) Phosphorus pentasulfide  
 Diphosphorus pentasulfide  
 Phosphoric sulfide  
 Phosphorus persulfide  
 Phosphorus sulfide
- (35) (C.A.S. #7719-12-2) Phosphorus trichloride  
 Phosphorus chloride  
 Trichlorophosphine
- (36) C.A.S. #75-97-8) Pinacolone  
 tert-Butyl methyl ketone  
 2,2-Dimethyl-3-butanone  
 3,3-Dimethyl-2-butanone  
 2,2-Dimethylbutanone  
 3,3-Dimethylbutanone  
 1,1-Dimethylethyl methyl ketone  
 Methyl tert-butyl ketone  
 Pinacolin  
 Pinacoline  
 1,1,1-Trimethylacetone
- (37) (C.A.S. #464-07-3) Pinacolyl alcohol  
 tert-Butyl methyl carbinol  
 2,2-Dimethyl-3-butanol  
 3,3-Dimethyl-2-butanol  
 1-Methyl-2,2-dimethylpropanol
- (38) (C.A.S. #151-50-8) Potassium cyanide
- (39) (C.A.S. #7789-23-3) Potassium fluoride  
 Potassium monofluoride
- (40) (C.A.S. #7789-29-9) Potassium hydrogen fluoride  
 Hydrogen potassium difluoride  
 Hydrogen potassium fluoride  
 Potassium acid fluoride  
 Potassium bifluoride  
 Potassium hydrogen difluoride  
 Potassium monohydrogen difluoride
- (41) (C.A.S. #1619-34-7) 3-Quinuclidinol  
 1-Azabicyclo(2.2.2)octan-3-ol  
 3-Hydroxyquinuclidine

- (42) (C.A.S. #3731-38-2) 3-Quinuclidinone  
1-Azabicyclo(2.2.2)octan-3-one  
3-Oxyquinuclidine  
Quinuclidone
- (43) (C.A.S.) #1333-83-1) Sodium bifluoride  
Sodium hydrogen difluoride  
Sodium hydrogen fluoride
- (44) (C.A.S. #143-33-9) Sodium cyanide
- (45) (C.A.S. #7681-49-4) Sodium fluoride  
Sodium monofluoride
- (46) (C.A.S. #1313-82-2) Sodium sulfide  
Disodium monosulfide  
Disodium sulfide  
Sodium monosulfide  
Sodium sulphide
- (47) (C.A.S. #10025-67-9) Sulfur Monochloride
- (48) (C.A.S. #10545-99-0) Sulfur dichloride
- (49) (C.A.S. #111-48-8) Thiodiglycol  
Bis(2-hydroxyethyl) sulfide  
Bis(2-hydroxyethyl) thioether  
Di(2-hydroxyethyl) sulfide  
Diethanol sulfide  
2,2'-Dithiobis-(ethanol)  
3-Thiapentane-1,5-diol  
2,2'-Thiobisethanol  
2,2'-Thiodiethanol  
Thiodiethylene glycol  
2,2'-Thiodiglycol
- (50) C.A.S. #7719-09-7) Thionyl chloride  
Sulfinyl chloride  
Sulfinyl dichloride  
Sulfur chloride oxide  
Sulfur oxychloride  
Sulfurous dichloride  
Sulfurous oxychloride  
Thionyl dichloride
- (51) (C.A.S. #102-71-6) Triethanolamine  
Alkanolamine 244

Nitrilotriethanol  
2,2,2"-Nitrilotriethanol  
2,2,2"-Nitrilotris(ethanol)  
TEA  
TEA(amino alcohol)  
Tri(2-hydroxyethyl)amine  
Triethanolamin  
Tris(.beta.-hydroxyethyl)amine  
Tris(2-hydroxyethyl)amine  
Trolamine

(52) (C.A.S. #637-39-8) Triethanolamine hydrochloride

(53) (C.A.S. #122-52-1) Triethyl phosphite  
Phosphorous acid triethyl ester  
Triethoxyphosphine  
Tris(ethoxy)phosphine

(54) (C.A.S. #121-45-9) Trimethyl phosphite  
Phosphorus acid trimethyl ester  
Trimethoxyphosphine

**(D) Interpretation 12: Computers**

(1) Digital computers or computer systems classified under ECCN 4A003.b or .c, that qualify for “No License Required” (NLR) must be evaluated on the basis of Adjusted Peak Performance (APP) alone, to the exclusion of all other technical parameters. Digital computers or computer systems classified under ECCN 4A003.b or .c that qualify for License Exception APP must be evaluated on the basis of APP, to the exclusion of all other technical parameters. Assemblies performing analog-to-digital conversions are evaluated under Category 3—Electronics, ECCN 3A002.h.

(2) Related equipment classified under ECCN 4A003.g may be exported or reexported under License Exceptions GBS or CIV. When related equipment is exported or reexported as part of a computer system, NLR or License Exception APP is available for the computer system and the related equipment, as appropriate.

**(m) Interpretation 13: Encryption commodities and software controlled for EI reasons**

Encryption commodities and software controlled for EI reasons under ECCNs 5A002, 5A004 and 5D002 may be pre-loaded on a laptop, handheld device or other computer or equipment and exported under the tools of trade provision of License Exception TMP or the personal use exemption under License Exception BAG, subject to the terms and conditions of such License Exceptions. Neither License Exception TMP nor License Exception BAG contains a reporting requirement. Like other “information security” “software,” components, “electronic assemblies” or modules, the control status of encryption commodities and software is determined in Category 5 - Part 2 even if they are bundled, commingled or incorporated in a computer or other equipment. However, commodities and software specially designed for medical end use that incorporate an item in Category 5 - Part 2 are not controlled in Category 5 - Part 2. See paragraph (a) of Supplement No. 3 to part 774 (Statements of Understanding) of the EAR.

**(n) Interpretation 14: Unfinished “600 series” commodities**

Forgings, castings, and other unfinished products, such as extrusions and machined bodies, that have reached a stage in manufacturing where they are clearly identifiable by mechanical properties, material composition, geometry, or function as commodities controlled by any Product Group A (“End Items,” “Equipment,” “Accessories,” “Attachments,” “Parts,” “Components” and “Systems”) “600 series” ECCN are controlled in that “600 series” ECCN.

**§ 770.3 INTERPRETATIONS RELATED TO EXPORTS OF TECHNOLOGY AND SOFTWARE TO DESTINATIONS IN COUNTRY GROUP D:1**

**(a) Introduction**

This section is intended to provide you additional guidance on how to determine whether your technology or software would be eligible for a License Exception, may be exported under NLR, or require a license, for export to Country Group D:1.

**(b) Scope of licenses**

The export of technology and software under a license is authorized only to the extent specifically indicated on the face of the license. The only technology and software related to equipment exports that may be exported without a license is technology described in §§734.7 through 734.11 of the EAR; operating technology and software described in §740.13(a) of the EAR; sales technology described in §740.13(b) of the EAR; and software updates described in §740.13(c) of the EAR.

**(c) Commingled technology and software**

**(1) U.S.-origin technology** does not lose its U.S.-origin when it is redrawn, used, consulted, or otherwise commingled abroad in any respect with other technology of any other origin. Therefore, any subsequent or similar technical data prepared or engineered abroad for the design, construction, operation, or maintenance of any plant or equipment, or part thereof, which is based on or utilizes any U.S.-origin technology, is subject to the EAR in the same manner as the original U.S.-origin technology, including license requirements, unless the commingled technology is not subject to the EAR by reason of the *de minimis* exclusions described in §734.4 of the EAR.

Interpretation (n) was introduced as of 12-31-2016, to comport with the ITAR definition of "Defense Article" at § 120.6 of the ITAR, regarding \*\*castings & \*\*forgings.

(2) U.S.-origin software that is incorporated into or commingled with foreign-origin software does not lose its U.S.-origin. Such commingled software is subject to the EAR in the same manner as the original U.S.-origin software, including license requirements, unless the commingled software is not subject to the EAR by reason of the *de minimis* exclusions described in §734.4 of the EAR.

**(d) Certain License Exception**

The following questions and answers are intended to further clarify the scope of technology and software eligible for a License Exception.

**(1)(i) Question 1.**

**(A)** Our engineers, in installing or repairing equipment, use techniques (experience as well as proprietary knowledge of the internal componentry or specifications of the equipment) that exceed what is provided in the standard manuals or instructions (including training) given to the customer. In some cases, it is also a condition of the license that such information provided to the customer be constrained to the minimum necessary for normal installation, maintenance and operation situations.

**(B) Can we send an engineer (with knowledge and experience) to the customer site to perform the installation or repair, under the provisions of License Exception TSU for operation technology and software described in §740.13(a) of the EAR, if it is understood that he is restricted by our normal business practices to performing the work without imparting the knowledge or technology to the customer personnel?**

**(ii) Answer 1.** Export of technology includes release of U.S.-origin data in a foreign

country, and “release” includes “application to situations abroad of personal knowledge or technical experience acquired in the United States.” As the release of technology in the circumstances described here would exceed that permitted under the License Exception TSU for operation technology and software described in §740.13(a) of the EAR, a license would be required even though the technician could apply the data without disclosing it to the customer.

**(2)(i) Question 2.** We plan, according to our normal business practices, to train customer engineers to maintain equipment that we have exported under a license, License Exception, or NLR. The training is contractual in nature, provided for a fee, and is scheduled to take place in part in the customer's facility and in part in the U.S. Can we now proceed with this training at both locations under a License Exception?

**(ii) Answer 2.** (A) Provided that this is your normal training, and involves technology contained in your manuals and standard instructions for the exported equipment, and meets the other requirements of License Exception TSU for operation technology and software described in §740.13(a), the training may be provided within the limits of those provisions of License Exception TSU. The location of the training is not significant, as the export occurs at the time and place of the actual transfer or imparting of the technology to the customer's engineers.

**(B)** Any training beyond that covered under the provisions of License Exception TSU for operation technology and software described in §740.13(a), but specifically represented in your license application as required for this customer installation, and in fact authorized on the face of the license or a separate technology license, may not be undertaken while the license is suspended or revoked.

This principle that a technician merely "using" technology abroad is an export -- even if he never discloses it to anyone -- also appeared in Part 734 Suppl 1. [Click to see.](#)

## §772.1

**DEFINITIONS OF TERMS AS USED IN  
THE EXPORT ADMINISTRATION  
REGULATIONS (EAR)**

The following are definitions of terms as used in the Export Administration Regulations (EAR). In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. Those terms in quotation marks refer to terms used on the Commerce Control List (CCL) (Supplement No. 1 to part 774 of the EAR). Parenthetical references following the terms in quotation marks (i.e., (Cat 5)) refer to the CCL category in which that term is found. If a term is used in only one Export Control Classification Number (ECCN) on the CCL, then that term will *not* appear in this part, but will be defined in the Related Definitions paragraph in the List of Items Controlled Section of that ECCN.

*600 series.* ECCNs in the “xY6zz” format on the Commerce Control List (CCL) that control items on the CCL that were previously controlled on the U.S. Munitions List or that are covered by the Wassenaar Arrangement Munitions List (WAML). The “6” indicates the entry is a munitions entry on the CCL. The “x” represents the CCL category and “Y” the CCL product group. The “600 series” constitutes the munitions ECCNs within the larger CCL.

**600 Series Major Defense Equipment or MDE.** Any item listed in ECCN 9A610.a, 9A619.a, 9A619.b or 9A619.c, having a nonrecurring research and development cost of more than \$50,000,000 or a total production cost of more than \$200,000,000.

**NOTE TO “600 SERIES MAJOR DEFENSE EQUIPMENT:”** For the most current list of MDE, see Appendix 1, (Nonrecurring Cost Recoupment Charges for Major Defense Equipment) to DoD 5105.38-M, “Security Assistance Management Manual (SAMM),” dated 04/30/2012, available online at

<http://www.dsca.osd.mil/samm/ESAMM/Appendix01.htm>.

*Access information.* Information that allows access to encrypted technology or encrypted software in an unencrypted form. Examples include decryption keys, network access codes, and passwords.

*Accessories.* These are associated items for any “component,” “end item,” or “system,” and which are not necessary for their operation, but which enhance their usefulness or effectiveness. For example, for a riding lawnmower, “accessories” and “attachments” will include the bag to capture the cut grass, and a canopy to protect the operator from the sun and rain. For purposes of this definition, “accessories” and “attachments” are the same.

*“Accuracy”.* (Cat 2, 3, 6, 7 and 8) “Accuracy” is usually measured in terms of inaccuracy. It is defined as the maximum deviation, positive or negative, of an indicated value from an accepted standard or true value.

*“Active flight control systems”.* (Cat 7)--Function to prevent undesirable “aircraft” and “missile” motions or structural loads by autonomously processing outputs from multiple sensors and then providing necessary preventive commands to effect automatic control.

*“Active pixel”.* (Cat 6)--A minimum (single) element of the solid state array that has a photoelectric transfer function when exposed to light (electromagnetic) radiation.

*“Adaptive control”.* (Cat 2)--A control system that adjusts the response from conditions detected during the operation (Ref. ISO 2806-1980).

*“Adjusted Peak Performance” (APP).* (Cat 4) An adjusted peak rate at which “digital computers” perform 64-bit or larger floating point additions and multiplications. The formula to calculate APP is contained in a

technical note at the end of Category 4 of the Commerce Control List.

*Advisory Committee on Export Policy (ACEP).* The ACEP voting members include the Assistant Secretary of Commerce for Export Administration, and Assistant Secretary-level representatives from the Departments of State, Defense, Justice (for encryption exports), Energy, and the Arms Control and Disarmament Agency. The appropriate representatives of the Joint Chiefs of Staff and the Director of the Nonproliferation Center of the Central Intelligence Agency are non-voting members. The Assistant Secretary of Commerce for Export Administration is the Chair. Appropriate acting Assistant Secretary, Deputy Assistant Secretary or equivalent strength of any agency or department may serve in lieu of the Assistant Secretary of the concerned agency or department. Such representatives, regardless of rank, will speak and vote on behalf of their agencies or departments. The ACEP may invite Assistant Secretary-level representatives of other Government agencies or departments (other than those identified above) to participate in the activities of the ACEP when matters of interest to such agencies or departments are under consideration. Decisions are made by majority vote.

*AES.* See “Automated Export System.”

*“Agricultural commodities”.* Agricultural commodities include food (including processed food); feed; fish; shellfish and fish products; beer, wine and spirits; livestock; fiber including cotton, wool and other fibers; tobacco and tobacco products; wood and wood products; seeds; fertilizer and organic fertilizer; reproductive materials such as fertilized eggs, embryos and semen. For the purposes of the EAR, agricultural commodities do *not* include furniture made from wood; clothing manufactured from plant or animal materials; agricultural equipment (whether hand tools or motorized equipment);

pesticides, insecticides, or herbicides; or cosmetics (unless derived entirely from plant materials).

**NOTE 1:** *This definition of agricultural commodities includes fertilizer and organic fertilizer, as listed in section 775 of the 2001 Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act (Act) (Public Law 106-387) and commodities listed in section 102 of the Agricultural Trade Act of 1978 (7 U.S.C. 5602) as incorporated in section 902 of the Act, as well as commodities determined by the Department of Agriculture to fall within the scope of section 102 of the 1978 Agricultural Trade Act.*

**NOTE 2:** *For purposes of License Exception AGR (see §740.18 of the EAR), agricultural commodities also include vitamins, minerals, food additives and dietary supplements, and bottled water. These items do not fall within the scope of section 102 of the 1978 Agricultural Trade Act, but are treated as agricultural commodities for the purposes of License Exception AGR.*

**NOTE 3:** *For purposes of License Exception AGR and export license applications to Iran and Sudan under the licensing procedures set forth in the appropriate regulations promulgated and administered by Treasury’s Office of Foreign Assets Control, agricultural commodities only include those that are classified as EAR99.*

*“Aircraft”.* (Cat 1, 6, 7, and 9)--A fixed wing, swivelwing, rotary wing (helicopter), tilt rotor or tilt-wing airborne vehicle. (see *also* “civil aircraft”.)

*Airline.* Any person engaged primarily in the transport of persons or property by aircraft for compensation or hire, pursuant to authorization by the U.S. Government or a foreign government.

*“Airship”.* (Cat 2 and 9) A power-driven airborne vehicle that is kept buoyant by a body

of gas (usually helium, formerly hydrogen) which is lighter than air.

“*All compensations available*”. (Cat 2) means after all feasible measures available to the manufacturer to minimize all systematic positioning errors for the particular machine-tool model or measuring errors for the particular coordinate measuring machine are considered.

“*Allocated by the ITU*”. (Cat 3 and Cat 5 part 1) -- The allocation of frequency bands according to the current edition of the ITU Radio Regulations for primary, permitted and secondary services.

**N.B.** *Additional and alternative allocations are not included.*

“*Angle random walk*”. (Cat 7) The angular error buildup with time that is due to white noise in angular rate. (IEEE STD 528-2001)

“*Angular position deviation*”. (Cat 2)--The maximum difference between angular position and the actual, very accurately measured angular position after the workpiece mount of the table has been turned out of its initial position. (Reference: VDI/VDE 2617, Draft: ‘Rotary tables on coordinate measuring machines’).

“*APP*” See “Adjusted Peak Performance.” This term may also appear without quotation marks.

*Applicant*. The person who applies for an export or reexport license, and who has the authority of a principal party in interest to determine and control the export or reexport of items. See §748.4 of the EAR and definition for “exporter” in this part of the EAR.

“*Asymmetric algorithm*”. (Cat 5) means a cryptographic algorithm using different, mathematically-related keys for encryption and decryption.

**TECHNICAL NOTE:** *A common use of “asymmetric algorithms” is key management.*

*Attachments*. These are associated items for any “component,” “end item,” or “system,” and which are not necessary for their operation, but which enhance their usefulness or effectiveness. For example, for a riding lawnmower, “accessories” and “attachments” will include the bag to capture the cut grass, and a canopy to protect the operator from the sun and rain. For purposes of this definition, “attachments” and “accessories” are the same.

*Australia Group*. *The countries participating in the Australia Group have agreed to adopt harmonized controls on certain dual-use chemicals (i.e., precursor chemicals), biological agents, related manufacturing facilities and equipment, and related technology in order to ensure that exports of these items do not contribute to the proliferation of chemical or biological weapons. Countries participating in the Australia Group as of November 1, 2013, include: Argentina, Australia, Austria, Belgium, Bulgaria, Canada, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, India, Iceland, Ireland, Italy, Japan, Korea (South), Latvia, Lithuania, Luxembourg, Malta, Mexico, the Netherlands, New Zealand, Norway, Poland, Portugal, Romania, Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Turkey, Ukraine, the United Kingdom, and the United States. See also §742.2 of the EAR.*

“*Authentication*”. (Cat 5P2) Verifying the identity of a user, process or device, often as a prerequisite to allowing access to resources in an information system. This includes verifying the origin or content of a message or other information, and all aspects of access control where there is no encryption of files or text except as directly related to the protection of passwords, Personal Identification Numbers (PINs) or similar data to prevent unauthorized access.

*Automated Export System (AES)*. AES is a nationwide system operational at all ports and for

all methods of transportation through which export shipment data required by multiple agencies is filed electronically to U.S. Customs and Border Protection, using the efficiencies of Electronic Data Interchange (EDI). AES allows the export information to be collected electronically and edited immediately. For more information about AES, visit the Bureau of Census Web site at: <http://www.census.gov/foreign-trade/aes/index.html> or see 15 CFR Part 30 the Foreign Trade Regulations.

*“Average Output Power”*. (Cat 6) The average output power is the total “laser” output energy, in joules, divided by the period over which a series of consecutive pulses is emitted, in seconds. For a series of uniformly spaced pulses it is equal to the total “laser” output energy in a single pulse, in joules, multiplied by the pulse frequency of the “laser”, in Hertz.

*Bank*. Means any of the following:

(a) bank, savings association, credit union, bank holding company, bank or savings association service corporation, Edge Act corporation, Agreement corporation, or any insured depository institution, which is organized under the laws of the United States or any State and regulated or supervised by a Federal banking agency or a State bank supervisor; or

(b) a company organized under the laws of a foreign country and regulated or supervised by a foreign bank regulatory or supervisory authority which engages in the business of banking, including without limitation, foreign commercial banks, foreign merchant banks and other foreign institutions that engage in banking activities usual in connection with the business of banking in the countries where such foreign institutions are organized or operating; or

(c) an entity engaged in the business of providing clearing or settlement services, that is, or whose members are, regulated or supervised

by a Federal banking agency, a State bank supervisor, or a foreign bank regulatory or supervisory authority; or

(d) a branch or affiliate of any of the entities listed in paragraphs (a), (b), or (c) of this definition, regulated or supervised by a Federal banking agency, a State bank supervisor or a foreign bank regulatory or supervisory authority; or

(e) an affiliate of any of the entities listed in paragraph (a), (b), (c), or (d) of this definition, engaged solely in the business of providing data processing services to a bank or financial institution, or a branch of such an affiliate.

*“Basic gate propagation delay time”*. (Cat 3) The propagation delay time value corresponding to the basic gate used in a “monolithic integrated circuit.” For a ‘family’ of “monolithic integrated circuits”, this may be specified either as the propagation delay time per typical gate within the given ‘family’ or as the typical propagation delay time per gate within the given ‘family’.

#### **TECHNICAL NOTES:**

1. *“Basic gate propagation delay time” is not to be confused with the input/output delay time of a complex “monolithic integrated circuit.”*

2. *‘Family’ consists of all integrated circuits to which all of the following are applied as their manufacturing methodology and specifications except their respective functions:*

a. *The common hardware and software architecture;*

b. *The common design and process technology; and*

c. *The common basic characteristics.*

*“Basic Scientific Research”*. (GTN)--Experimental or theoretical work undertaken principally to acquire new knowledge of the fundamental principles of phenomena or observable facts, not primarily directed towards a specific practical aim or objective.

*“Bias”*. (*accelerometer*) (Cat 7)--The average over a specified time of accelerometer output measured at specified operating conditions, that has no correlation with input acceleration or rotation. “Bias” is expressed in g or in meters per second<sup>2</sup> (g or m/s<sup>2</sup>) (IEEE Std 528-2001) (Micro g equals 1x10<sup>-6</sup> g).

*“Bias”*. (*gyro*) (Cat 7) The average over a specified time of gyro output measured at specified operating conditions that has no correlation with input rotation or acceleration. “Bias” is typically expressed in degrees per hour (deg/hr). (IEEE Std 528 2001).

*Bill of Lading*. The contract of carriage and receipt for items, issued by the carrier. It includes an air waybill, but does not include an inland bill of lading or a domestic air waybill covering movement to port only.

*Build-to-Print technology*.

**(1)** This is “production” “technology” that is sufficient for an inherently capable end user to produce or repair a commodity from engineering drawings without any of the following:

**(i)** Revealing “development” “technology,” such as design methodology, engineering analysis, detailed process or manufacturing know-how;

**(ii)** Revealing the production engineering or process improvement aspect of the “technology;” or

**(iii)** Requiring assistance from the provider of the technology to produce or repair the commodity.

**(2)** Acceptance, test, or inspection criteria pertaining to the commodity at issue is included within the scope of “build-to-print technology” only if it is necessary to verify that the commodity is acceptable.

*Business Unit*. As applied to encryption items, means a unit of a business which, whether or not separately incorporated, has:

**(a)** a distinct organizational structure which does not overlap with other business units of the same business;

**(b)** a distinct set of accounts; and

**(c)** separate facilities for purchase, sale, delivery, and production of goods and services.  
CCL. See Commerce Control List.

*CCL Group*. The Commerce Control List (CCL) is divided into 10 categories. Each category is subdivided into five groups, designated by the letters A through E: (A) Equipment, assemblies and components; (B) Test, inspection and production equipment; (C) Materials; (D) Software; and (E) Technology. See §738.2(b) of the EAR.

*“Camming”*. (axial displacement) (Cat 2)--Axial displacement in one revolution of the main spindle measured in a plane perpendicular to the spindle faceplate, at a point next to the circumference of the spindle faceplate (Ref.: ISO 230 Part 1-1986, paragraph 5.63).

*Canadian airline*. Any citizen of Canada who is authorized by the Canadian Government to engage in business as an airline. For purposes of this definition, a Canadian citizen is:

**(a)** A natural person who is a citizen of Canada; or

**(b)** A partnership of which each member is such an individual; or

(c) A Canadian firm incorporated or otherwise organized under the laws of Canada or any Canadian province, having a total foreign stock interest not greater than 40 percent and having the Chairman or Acting Chairman and at least two-thirds of the Directors thereof Canadian citizens.

“Capable of”. (MTCR context)--See “usable in”.

*Category.* The Commerce Control List (CCL) is divided into ten categories: (0) Nuclear Materials, Facilities and Equipment, and Miscellaneous; (1) Materials, Chemicals, “Microorganisms”, and Toxins; (2) Materials Processing; (3) Electronics Design, Development and Production; (4) Computers; (5) Telecommunications and Information Security; (6) Sensors; (7) Navigation and Avionics; (8) Marine; (9) Propulsion Systems, Space Vehicles, and Related Equipment. See §738.2(a) of the EAR.

“Chemical laser”. (Cat 6)--A “laser” in which the excited species is produced by the output energy from a chemical reaction.

*Chemical Weapons Convention (CWC).* Means “The Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction”, opened for signature on January 13, 1993.

“Circular Error Probable” (“CEP”). (Cat 7) In a circular normal distribution, the radius of the circle containing 50% of the individual measurements being made, or the radius of the circle within which there is a 50% probability of being located.

“Circulation-controlled, anti-torque or circulation-controlled direction control systems” (Cat 7)--Control systems using air blown over aerodynamic surfaces to increase or control the forces generated by the surfaces.

“Civil aircraft”. (Cat 1, 3, 4, 7 and 9) Those “aircraft” listed by designation in published airworthiness certification lists by civil aviation authorities of one or more Wassenaar Arrangement Participating States to fly commercial civil internal and external routes or for legitimate civil, private or business use. (see also “aircraft”)

*COCOM (Coordinating Committee on Multilateral Export Controls).* A multilateral organization that cooperated in restricting strategic exports to controlled countries. COCOM was officially disbanded on March 31, 1994. COCOM members included: Australia, Belgium, Canada, Denmark, France, Germany, Greece, Italy, Japan, Luxembourg, Netherlands, Norway, Portugal, Spain, Turkey, United Kingdom, and United States.

*Commerce Control List (CCL).* A list of items under the export control jurisdiction of the Bureau of Industry and Security, U.S. Department of Commerce. Note that certain additional items described in part 732 of the EAR are also subject to the EAR. The CCL is found in Supplement No. 1 to part 774 of the EAR.

“Communications Channel Controller”. (Cat 4) - The physical interface which controls the flow of synchronous or asynchronous digital information. It is an assembly that can be integrated into computer or telecommunications equipment to provide communications access.

*Commodity.* Any article, material, or supply except technology and software.

“Compensation systems”. (Cat 6) Consist of the primary scalar sensor, one or more reference sensors (e.g., vector “magnetometers”) together with software that permit reduction of rigid body rotation noise of the platform.

*Complete breech mechanisms.* The mechanism for opening and closing the breech of a breech-

loading firearm, especially of a heavy-caliber weapon.

*Component.* This is an item that is useful only when used in conjunction with an “end item.” “Components” are also commonly referred to as assemblies. For purposes of this definition an assembly and a “component” are the same. There are two types of “components”: “major components” and “minor components.” A “major component” includes any assembled element which forms a portion of an “end item” without which the “end item” is inoperable. For example, for an automobile, “components” will include the engine, transmission, and battery. If you do not have all those items, the automobile will not function, or function as effectively. A “minor component” includes any assembled element of a “major component.” “Components” consist of “parts.” References in the CCL to “components” include both “major components” and “minor components.”

*“Composite”.* (Cat 1, 2, 6, 8, and 9)--A “matrix” and an additional phase or additional phases consisting of particles, whiskers, fibers or any combination thereof, present for a specific purpose or purposes.

*“III/V compounds”.* (Cat 3 and 6) Polycrystalline or binary or complex monocrystalline products consisting of elements of groups IIIA and VA of Mendeleev's periodic classification table (e.g., gallium arsenide, gallium-aluminum arsenide, indium phosphide).

*“Contouring control”.* (Cat 2)--Two or more “numerically controlled” motions operating in accordance with instructions that specify the next required position and the required feed rates to that position. These feed rates are varied in relation to each other so that a desired contour is generated (Ref. ISO/DIS 2806--1980).

*Controlled country.* Countries designated controlled for national security purposes under authority delegated to the Secretary of Commerce

by Executive Order 12214 of May 2, 1980 pursuant to section 5(b) of the EAA. The controlled countries are: Albania, Armenia, Azerbaijan, Belarus, Cambodia, Cuba, the People's Republic of China, Georgia, Iraq, Kazakhstan, Kyrgyzstan, Laos, Macau, Moldova, Mongolia, North Korea, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan, and Vietnam. All of the controlled countries except Cuba are listed in Country Group D:1 of the EAR. Cuba is listed in Country Group E:2. This definition does not apply to part 768 of the EAR (Foreign Availability), which provides a dedicated definition.

*Countries supporting international terrorism.* In accordance with §6(j) of the Export Administration Act of 1979, as amended (EAA), the Secretary of State has determined that the following countries' governments have repeatedly provided support for acts of international terrorism: Iran, North Korea, Sudan, and Syria.

*Country Chart.* A chart, found in Supplement No. 1 to part 738 of the EAR, that contains certain licensing requirements based on destination and reason for control. In combination with the CCL, the Country Chart indicates when a license is required for any item on the CCL to any country in the world under General Prohibition One (Exports and Reexports in the Form Received), General Prohibition Two (Parts and Components Reexports), and General Prohibition Three (Foreign Produced Direct Product Reexports). See part 736 of the EAR.

*Country Groups.* For export control purposes, foreign countries are separated into five country groups designated by the symbols A, B, C, D, and E. (see Supplement No. 1 to part 740 of the EAR for a list of countries in each Country Group.)

*“Critical temperature”.* (Cat 1, 3, 5P1, and 6)--The “critical temperature” (sometimes referred to as the transition temperature) of a specific “superconductive” material is the

temperature at which the material loses all resistance to the flow of direct electrical current.

*“Crude oil.”* A mixture of hydrocarbons that existed in liquid phase in underground reservoirs, remains liquid at atmospheric pressure (after passing through surface separating facilities), and has not been processed through a crude oil distillation tower. Crude oil includes reconstituted crude petroleum, lease condensate, and liquid hydrocarbons produced from tar sands, gilsonite, and oil shale. Drip gases are also included, but topped crude oil, residual oil, and other finished and unfinished oils are excluded.

*“Cryptanalytic items”* (Cat 5P2) Systems, equipment or components designed or modified to perform ‘cryptanalytic functions’, software having the characteristics of cryptanalytic hardware or performing ‘cryptanalytic functions’, or technology for the development, production or use of cryptanalytic commodities or software.

**NOTES:**

1. *‘Cryptanalytic functions’ are functions designed to defeat cryptographic mechanisms in order to derive confidential variables or sensitive data, including clear text, passwords or cryptographic keys. These functions may include ‘cryptanalysis,’ which is the analysis of a cryptographic system or its inputs and outputs to derive confidential variables or sensitive data, including clear text. (ISO 7498-2-1988 (E), paragraph 3.3.18).*

2. *Functions specially designed and limited to protect against malicious computer damage or unauthorized system intrusion (e.g., viruses, worms and trojan horses) are not construed to be ‘cryptanalytic functions.’.*

*“Cryptographic activation”.* (Cat 5P2) Any technique that specifically activates or enables cryptographic capability of an item, by means of a mechanism implemented by the manufacturer

of the item, where this mechanism is uniquely bound to any of the following:

1. A single instance of the item; or
2. One customer, for multiple instances of the item.

**Technical Notes to definition of “Cryptographic activation”:**

1. *“Cryptographic activation” techniques and mechanisms may be implemented as hardware, “software” or “technology”.*

2. *Mechanisms for “cryptographic activation” can, for example, be serial number-based license keys or authentication instruments such as digitally signed certificates.*

*“Cryptography”* (Cat 5P2)-- The discipline that embodies principles, means and methods for the transformation of data in order to hide its information content, prevent its undetected modification or prevent its unauthorized use. “Cryptography” is limited to the transformation of information using one or more ‘secret parameters’ (e.g., crypto variables) and/or associated key management.

**Notes:**

1. *“Cryptography” does not include ‘fixed’ data compression or coding techniques.*
2. *“Cryptography” includes decryption.*

**Technical Notes:**

1. *‘Secret parameter’: a constant or key kept from the knowledge of others or shared only within a group.*

2. *‘Fixed’: the coding or compression algorithm cannot accept externally supplied parameters (e.g., cryptographic or key variables) and cannot be modified by the user.*

*Customs officer.* The Customs officers in the U.S. Customs Service and postmasters unless the context indicates otherwise.

*“CW Laser”.* (Cat 6) A CW (Continuous Wave) laser is defined as a laser that produces a nominally constant output energy for greater than 0.25 seconds.

*“Data-Based Referenced Navigation” (“DBRN”) Systems.* (Cat 7) Systems which use various sources of previously measured geo-mapping data integrated to provide accurate navigation information under dynamic conditions. Data sources include bathymetric maps, stellar maps, gravity maps, magnetic maps or 3-D digital terrain maps.

*“Data signaling rate”.* (Cat 5) means the rate, as defined in ITU Recommendation 53-36, taking into account that, for non-binary modulation, baud and bit per second are not equal. Bits for coding, checking and synchronization functions are to be included.

**NOTE:** *When determining the “data signaling rate”, servicing and administrative channels shall be excluded.*

**TECHNICAL NOTE:** *It is the maximum one-way rate, i.e., the maximum rate in either transmission or reception.*

*“Depleted uranium”.* (Cat 0) means uranium depleted in the isotope 235 below that occurring in nature.

*“Designed or modified”.* (MTCR context)--Equipment, parts, components, or “software” that, as a result of “development”, or modification, have specified properties that make them fit for a particular application. “Designed or modified” equipment, parts, components or “software” can be used for other applications. For example, a titanium coated pump designed for a

“missile” may be used with corrosive fluids other than propellants.

*“Development”.* (General Technology Note)--“Development” is related to all stages prior to serial production, such as: design, design research, design analyses, design concepts, assembly and testing of prototypes, pilot production schemes, design data, process of transforming design data into a product, configuration design, integration design, layouts.

*Diffusion bonding.* (Cat 1, 2, and 9)—A solid state joining of at least two separate pieces of metals into a single piece with a joint strength equivalent to that of the weakest material, wherein the principal mechanism is interdiffusion of atoms across the interface.

*Digital computer.* (Cat 4 and 5)--Equipment that can, in the form of one or more discrete variables, perform all of the following:

- (a) Accept data;
- (b) Store data or instructions in fixed or alterable (writable) storage devices;
- (c) Process data by means of a stored sequence of instructions that is modifiable; and
- (d) Provide output of data.

**NOTE:** *Modifications of a stored sequence of instructions include replacement of fixed storage devices, but not a physical change in wiring or interconnections.*

*“Digital transfer rate”.* (Cat 5)--The total bit rate of the information that is directly transferred on any type of medium. (see also “total digital transfer rate”)

*Directorate of Defense Trade Controls (DDTC).* The office at the Department of State, formerly known as the Office of Defense Trade Controls and before that as the Office of Munitions

Control, responsible for reviewing applications to export and reexport items on the U.S. Munitions List. (see 22 CFR parts 120 through 130.)

*Dual use.* Items that have both commercial and military or proliferation applications. While this term is used informally to describe items that are subject to the EAR, purely commercial items and certain munitions items listed on the Wassenaar Arrangement Munitions List (WAML) or the Missile Technology Control Regime Annex are also subject to the EAR (see § 734.2(a) of the EAR).

*“Dynamic adaptive routing”.* (Cat 5)--Automatic rerouting of traffic based on sensing and analysis of current actual network conditions.

**NOTE:** *This does not include cases of routing decisions taken on predefined information.*

*Effective control.* You maintain effective control over an item when you either retain physical possession of the item, or secure the item in such an environment as a hotel safe, a bonded warehouse, or a locked or guarded exhibition facility. Retention of effective control over an item is a condition of certain temporary exports and reexports.

*“Electronic assembly”.* (Cat 4) means a number of electronic components (i.e., ‘circuit elements’, ‘discrete components’, integrated circuits, etc.) connected together to perform (a) specific function(s), replaceable as an entity and normally capable of being disassembled.

**Technical Notes:**

1. *‘Circuit element’:* a single active or passive functional part of an electronic circuit, such as one diode, one transistor, one resistor, one capacitor, etc.

2. *‘Discrete component’:* a separately packaged ‘circuit element’ with its own external connections.

*“Encryption Component”.* Any encryption commodity or software (except source code), including encryption chips, integrated circuits, application specific encryption toolkits, or executable or linkable modules that alone are incapable of performing complete cryptographic functions, and is designed or intended for use in or the production of another encryption item.

*Encryption items.* The phrase encryption items includes all encryption commodities, software, and technology that contain encryption features and are subject to the EAR. This does not include encryption items specifically designed, developed, configured, adapted or modified for military applications ( including command, control and intelligence applications) which are controlled by the Department of State on the U.S. Munitions List.

*Encryption licensing arrangement.* A license that allows the export of specified products to specified destinations in unlimited quantities. In certain cases, exports are limited to specified end-users for specified end-uses. Generally, reporting of all sales of the specified products is required at six month intervals. This includes sales made under distribution arrangements and distribution and warehousing agreements that were previously issued by the Department of State for encryption items.

*Encryption object code.* Computer programs containing an encryption source code that has been compiled into a form of code that can be directly executed by a computer to perform an encryption function.

*Encryption software.* Computer programs that provide capability of encryption functions or confidentiality of information or information systems. Such software includes source code, object code, applications software, or system software.

*Encryption source code.* A precise set of operating instructions to a computer that, when compiled, allows for the execution of an encryption function on a computer.

*“End-effectors”.* (Cat 2) Grippers, ‘active tooling units’ and any other tooling that is attached to the baseplate on the end of a “robot” manipulator arm.

**Technical Note:** ‘Active tooling unit’: a device for applying motive power, process energy or sensing to the workpiece.

*End item.* This is a system, equipment or assembled commodity ready for its intended use. Only ammunition, fuel or other energy source is required to place it in an operating state. Examples of end items include ships, aircraft, computers, firearms, and milling machines.

*End-user.* The person abroad that receives and ultimately uses the exported or reexported items. The end-user is not a forwarding agent or intermediary, but may be the purchaser or ultimate consignee.

*Energetic materials.* (Cat 1) Substances or mixtures that react chemically to release energy required for their intended application. “Explosives”, “pyrotechnics” and “propellants” are subclasses of energetic materials.

*Equipment.* This is a combination of parts, components, accessories, attachments, firmware, or software that operate together to perform a function of, as, or for an end item or system. Equipment may be a subset of “end items” based on the characteristics of the equipment. Equipment that meets the definition of an end-item is an end-item. Equipment that does not meet the definition of an end-item is a part, component, accessory, attachment, firmware, or software.

*“Equivalent Density”.* (Cat 6)--The mass of an optic per unit optical area projected onto the optical surface.

*“Explosives”.* (Cat 1) - see Annex “List of Explosives” located at the end of Category 1 of Supplement No. 1 to Part 774 “Commerce Control List”.

*Export.* See § 734.13 of the EAR.

*Export Administration Act (EAA).* Export Administration Act of 1979, as amended, effective October 1, 1979.

*Export Administration Regulations (EAR).* Regulations set forth in parts 730-774, inclusive, of Title 15 of the Code of Federal Regulations.

*Export Administration Review Board (EARB).* The body authorized by Executive Order 12002 as amended by Executive Orders 12755 and 13268. The Export Administration Review Board’s role in export license application review is in accordance with Executive Order 12981 as amended by Executive Orders 13020, 13026 and 13117.

*Export Control Classification Number (ECCN).* The numbers used in Supplement No. 1 to part 774 of the EAR and throughout the EAR. The Export Control Classification Number consists of a set of digits and a letter. Reference §738.2(c) of the EAR for a complete description of each ECCN’s composition.

*Export control document.* A license; application for license; any and all documents submitted in accordance with the requirements of the EAR in support of, or in relation to, a license application; application for International Import Certificate; Delivery Verification Certificate or similar evidence of delivery; Electronic Export Information (EEI) on the Automated Export System (AES) presented in connection with shipments to any country; a Dock Receipt or bill of lading issued by any carrier in connection with any export subject to the EAR and any and all documents prepared and submitted by exporters and agents pursuant to the export clearance

requirements of Part 758 of the EAR; a U.S. exporter's report of request received for information, certification, or other action indicating a restrictive trade practice or boycott imposed by a foreign country against a country friendly to the United States, submitted to the U.S. Department of Commerce in accordance with the provisions of Part 760 of the EAR; Customs Form 7512, Transportation Entry and Manifest of Goods, Subject to Customs Inspection and Permit, when used for Transportation and Exportation (T.& E.) or Immediate Exportation (I.E.); and any other document issued by a U.S. Government agency as evidence of the existence of a license for the purpose of loading onto an exporting carrier or otherwise facilitating or effecting an export from the United States or any reexport of any item requiring a license.

*Exporter.* The person in the United States who has the authority of a principal party in interest to determine and control the sending of items out of the United States.

*Exporting carrier.* Any instrumentality of water, land, or air transportation by which an export is effected, including any domestic air carrier on which any cargo for export is laden or carried.

*Facilities.* This means a building or outdoor area in which people use an item that is built, installed, produced, or developed for a particular purpose.

*“FADEC systems”.* See “full authority digital engine control systems.”

*“FMU”.* See “flexible manufacturing unit”

*“Fibrous or filamentary materials”.* “(Cat 1, 2, 8 and 9)--The term “fibrous and filamentary materials” includes:

- (a) Continuous monofilaments;
- (b) Continuous yarns and rovings;

(c) Tapes, fabrics, random mats and braids;

(d) Chopped fibers, staple fibers and coherent fiber blankets;

(e) Whiskers, either monocrystalline or polycrystalline, of any length;

(f) Aromatic polyimide pulp.

*“Film type integrated circuit”.* (Cat 3)--An array of “circuit elements” and metallic interconnections formed by deposition of a thick or thin film on an insulating “substrate”.

*NOTE: “Circuit element”:* a single active or passive functional part of an electronic circuit, such as one diode, one transistor, one resistor, one capacitor, etc.

*Financial Institution.* As applied to encryption items, means any of the following:

(a) A broker, dealer, government securities broker or dealer, self-regulatory organization, investment company or investment adviser, which is regulated or supervised by the Securities and Exchange Commission or a self-regulatory organization that is registered with the Securities and Exchange Commission; or

(b) A broker, dealer, government securities broker or dealer, investment company, investment adviser, or entity that engages in securities activities that, if conducted in the United States, would be described by the definition of the term “self-regulatory organization” in the Securities Exchange Act of 1934, which is organized under the laws of a foreign country and regulated or supervised by a foreign securities authority; or

(c) A U.S. board of trade that is designated as a contract market by the Commodity Futures Trading Commission or a futures commission merchant that is regulated or supervised by the

Commodity Futures Trading Commission; or

and

(d) A U.S. entity engaged primarily in the business of issuing a general purpose charge, debit, or stored value card, or a branch of, or affiliate controlled by, such an entity; or

(b) Two or more of the following:

(1) A machine tool described in 2B001.c;

(e) A branch or affiliate of any of the entities listed in paragraphs (a), (b), or (c) of this definition regulated or supervised by the Securities and Exchange Commission, the Commodity Futures Trading Commission, or a foreign securities authority; or

(2) A dimensional inspection machine described in Category 2, or another digitally controlled measuring machine controlled by an entry in Category 2;

(3) A “robot” controlled by an entry in Category 2 or 8;

(f) An affiliate of any of the entities listed in paragraph (a), (b), (c), or (e), of this definition engaged solely in the business of providing data processing services to one or more bank or financial institutions, or a branch of such an affiliate; or

(4) Digitally controlled equipment controlled by 1B003, 2B003, or 9B001;

(5) “Stored program controlled” equipment controlled by 3B001;

(g) A company organized and regulated under the laws of any of the United States and its branches and affiliates whose primary and predominant business activity is the writing of insurance or the reinsuring of risks; or a company organized and regulated under the laws of a foreign country and its branches and affiliates whose primary and predominant business activity is the writing of insurance or the reinsuring of risks.

(6) Digitally controlled equipment controlled by 1B001;

(7) Digitally controlled electronic equipment controlled by 3A002.

*Firm.* A corporation, partnership, limited partnership, association, company, trust, or any other kind of organization or body corporate, situated, residing, or doing business in the United States or any foreign country, including any government or agency thereof.

*“Fly-by-light system”.* (Cat 7) is a primary digital flight control system employing feedback to control the “aircraft” during flight, where the commands to the effectors/actuators are optical signals.

*“Flexible manufacturing unit”.* (FMU), (sometimes also referred to as ‘flexible manufacturing system’ (FMS) or ‘flexible manufacturing cell’ (FMC)) (Cat 2)--An entity that includes a combination of at least:

*“Fly-by-wire system”.* (Cat 7) is a primary digital flight control system employing feedback to control the “aircraft” during flight, where the commands to the effectors/actuators are electrical signals.

(a) A “digital computer” including its own “main storage” and its own “related equipment”;

*“Focal plane array”.* (Cat 6 and 8)--A linear or two-dimensional planar layer, or combination of planar layers, of individual detector elements, with or without readout electronics, that work in the focal plane.

*N.B.* This definition does not include a stack of single detector elements or any two, three, or four element detectors provided time delay and

*integration is not performed within the element.*

*Food.* Specific to exports and reexports to North Korea, Syria and Crimea region of Ukraine, food means items that are consumed by and provide nutrition to humans and animals, and seeds, with the exception of castor bean seeds, that germinate into items that will be consumed by and provide nutrition to humans and animals. (Food does not include alcoholic beverages.)

*Foreign government agency.* For the purposes of exemption from support documentation (see §748.9 of the EAR), a foreign government agency is defined as follows:

(a) National governmental departments operated by government-paid personnel performing governmental administrative functions; e.g. Finance Ministry, Ministry of Defense, Ministry of Health, etc. (municipal or other local government entities must submit required support documentation); or

(b) National government-owned public service entities; e.g., nationally owned railway, postal, telephone, telegraph, broadcasting, and power systems, etc. The term “foreign government agency” does not include government corporations, quasi-government agencies, and state enterprises engaged in commercial, industrial, and manufacturing activities, such as petroleum refineries, mines, steel mills, retail stores, automobile manufacturing plants, airlines, or steamship lines that operate between two or more countries, etc.

*Foreign person.* Any natural person who is not a lawful permanent resident of the United States, citizen of the United States, or any other protected individual as defined by 8 U.S.C. 1324b(a)(3). It also means any corporation, business association, partnership, trust, society or any other entity or group that is not incorporated in the United States or organized to do business in the United States, as well as international

organizations, foreign governments and any agency or subdivision of a foreign government (e.g., diplomatic mission). “Foreign person” is synonymous with “foreign national,” as used in the EAR, and “foreign person” as used in the International Traffic in Arms Regulations (22 CFR 120.16). This definition does not apply to part 760 of the EAR (Restrictive Trade Practices or Boycotts).

*Foreign policy control.* A control imposed under the EAR for any and all of the following reasons: chemical and biological weapons, nuclear nonproliferation, missile technology, regional stability, crime control, anti-terrorism, United Nations sanctions, and any other reason for control implemented under section 6 of the EAA or other similar authority.

*Foreign Terrorist Organizations (FTO).* Any organization that is determined by the Secretary of the Treasury to be a foreign terrorist organization under notices or regulations issued by the Office of Foreign Assets Control (see 31 CFR chapter V).

*Forwarding agent.* The person in the United States who is authorized by a principal party in interest to perform the services required to facilitate the export of the items from the United States. This may include air couriers or carriers. In routed export transactions, the forwarding agent and the exporter may be the same for compliance purposes under the EAR.

*“Fractional bandwidth”.* (Cat 3, 5P1, 5P2) -- The “instantaneous bandwidth” divided by the center frequency, expressed as a percentage.

*“Frequency hopping”.* “(Cat 5P1, 5P2 and 6) -- A form of “spread spectrum” in which the transmission frequency of a single communication channel is made to change by a random or pseudo-random sequence of discrete steps.

*“Frequency switching time.”* (Cat 3) The time

(i.e., delay) taken by a signal when switched from an initial specified output frequency, to arrive at or within any of the following:

- (1)  $\pm 100$  Hz of a final specified output frequency of less than 1 GHz; *or*
- (2)  $\pm 0.1$  part per million of a final specified output frequency equal to or greater than 1 GHz.

*Fuel cell.* (Cat 8) An electrochemical device that converts chemical energy directly into Direct Current (DC) electricity by consuming fuel from an external source.

*“Full Authority Digital Engine Control Systems” (“FADEC Systems”)* (Cat 9) A digital electronic control system for a gas turbine engine that is able to autonomously control the engine throughout its whole operating range from demanded engine start until demanded engine shut down, in both normal and fault conditions.

*Fundamental research.* See § 734.8 of the EAR.

*“Fusible”.* (Cat 1) -- Capable of being cross-linked or polymerized further (cured) by the use of heat, radiation, catalysts, etc., or that can be melted without pyrolysis (charring).

*General prohibitions.* The 10 prohibitions found in part 736 of the EAR that prohibit certain exports, reexports, and other conduct, subject to the EAR, absent a license, license exception, or determination that no license is required (“NLR”).

*“Government end-user” (as applied to encryption items).* A government end user is any foreign central, regional or local government department, agency, or other entity performing governmental functions; including governmental research institutions, governmental corporations or their separate business units (as defined in part 772 of the EAR) which are engaged in the manufacture or distribution of items or services

controlled on the Wassenaar Munitions List, and international governmental organizations. This term does not include: utilities (including telecommunications companies and Internet service providers); banks and financial institutions; transportation; broadcast or entertainment; educational organizations (except public schools and universities); civil health and medical organizations (including public civilian hospitals); retail or wholesale firms; and manufacturing or industrial entities not engaged in the manufacture or distribution of items or services controlled on the Wassenaar Munitions List.

*Hard selectors.* (Cat 5P1) Data or set of data, related to an individual (e.g., family name, given name, e-mail, street address, phone number or group affiliations).

*Hold Without Action (HWA).* License applications may be held without action only in the limited circumstances described in §750.4(b) of the EAR. Encryption review requests may be placed on hold without action status as provided in §740.17(d)(2) and §742.15(b)(2) of the EAR.

*“Hybrid computer”.* (Cat 4)--Equipment that can:

- (a) Accept data;
- (b) Process data, in both analog and digital representation; and
- (c) Provide output of data.

*“Hybrid integrated circuit”.* (Cat 3)--Any combination of integrated circuit(s), or integrated circuit with “circuit elements” or “discrete components” connected together to perform (a) specific function(s), and having all of the following criteria:

- (a) Containing at least one unencapsulated device;

(b) Connected together using typical IC-production methods;

(c) Replaceable as an entity; and

(d) Not normally capable of being disassembled.

**NOTES:**

1. “Circuit element”: a single active or passive functional part of an electronic circuit, such as one diode, one transistor, one resistor, one capacitor, etc.

2. “Discrete component”: a separately packaged “circuit element” with its own external connections.

“Image enhancement”. (Cat 4)--The processing of externally derived information-bearing images by algorithms such as time compression, filtering, extraction, selection, correlation, convolution or transformations between domains (e.g., fast Fourier transform or Walsh transform). This does not include algorithms using only linear or rotational transformation of a single image, such as translation, feature extraction, registration or false coloration.

“Information security”. (Cat 5P2, GSIN, GSN) All the means and functions ensuring the accessibility, confidentiality or integrity of information or communications, excluding the means and functions intended to safeguard against malfunctions. This includes “cryptography,” “cryptographic activation,” ‘cryptanalysis,’ protection against compromising emanations and computer security.

**Technical Note to definition of “Information security”:** ‘Cryptanalysis’: the analysis of a cryptographic system or its inputs and outputs to derive confidential variables or sensitive data, including clear text. (ISO 7498–2–1988 (E), paragraph 3.3.18)

“Instantaneous bandwidth”. (Cat 3 and 5)--The bandwidth over which output power remains constant within 3 dB without adjustment of other operating parameters.

“Instrumented range”. (Cat 6)--The specified unambiguous display range of a radar.

*Intent to Deny (ITD) letter.* A letter informing the applicant:

(a) Of the reason for BIS's decision to deny a license application; and

(b) That the application will be denied 45 days from the date of the ITD letter, unless the applicant provides, and BIS accepts, a reason why the application should not be denied for the stated reason. See §750.6 of the EAR.

“Interleaved Analog-to-Digital Converter (ADC)”. (Cat 3) Devices that have multiple ADC units that sample the same analog input at different times such that when the outputs are aggregated, the analog input has been effectively sampled and converted at a higher sampling rate.

*Intermediate consignee.* The person that acts as an agent for a principal party in interest for the purpose of effecting delivery of items to the ultimate consignee. The intermediate consignee may be a bank, forwarding agent, or other person who acts as an agent for a principal party in interest.

“Intrinsic Magnetic Gradiometer”. (Cat 6)--A single magnetic field gradient sensing element and associated electronics the output of which is a measure of magnetic field gradient. (See also “Magnetic Gradiometer”)

*Intrusion software.* (5P2) “Software” specially designed or modified to avoid detection by ‘monitoring tools’, or to defeat ‘protective countermeasures’, of a computer or network-capable device, and performing any of the following:

(1) The extraction of data or information, from a computer or network-capable device, or the modification of system or user data; or

(2) The modification of the standard execution path of a program or process in order to allow the execution of externally provided instructions.

**NOTE 1 TO “INTRUSION SOFTWARE” DEFINITION:** *“Intrusion software” does not include any of the following: Hypervisors, debuggers or Software Reverse Engineering (SRE) tools; Digital Rights Management (DRM) “software”; or “Software” designed to be installed by manufacturers, administrators or users, for the purposes of asset tracking or recovery.*

**NOTE 2 TO “INTRUSION SOFTWARE” DEFINITION:** *Network-capable devices include mobile devices and smart meters.*

**TECHNICAL NOTE 1 TO “INTRUSION SOFTWARE” DEFINITION:** *‘Monitoring tools’: “software” or hardware devices, that monitor system behaviors or processes running on a device. This includes antivirus (AV) products, end point security products, Personal Security Products (PSP), Intrusion Detection Systems (IDS), Intrusion Prevention Systems (IPS) or firewalls.*

**TECHNICAL NOTE 2 TO “INTRUSION SOFTWARE” DEFINITION:** *‘Protective countermeasures’: techniques designed to ensure the safe execution of code, such as Data Execution Prevention (DEP), Address Space Layout Randomization (ASLR) or sandboxing.*

*“Isostatic presses”.* (Cat 2)--Equipment capable of pressurizing a closed cavity through various media (gas, liquid, solid particles, etc.) to create equal pressure in all directions within the cavity upon a workpiece or material.

*Item.* “Item” means “commodities, software, and technology.” When the EAR intend to refer specifically to commodities, software, or technology, the text will use the specific reference.

*Know.* See “knowledge.”

*Knowledge.* Knowledge of a circumstance (the term may be a variant, such as “know,” “reason to know,” or “reason to believe”) includes not only positive knowledge that the circumstance exists or is substantially certain to occur, but also an awareness of a high probability of its existence or future occurrence. Such awareness is inferred from evidence of the conscious disregard of facts known to a person and is also inferred from a person's willful avoidance of facts. This definition does not apply to part 760 of the EAR (Restrictive Trade Practices or Boycotts).

*“Laser.”* (Cat 1, 2, 3, 5P1, 6, 7, 8 and 9)--An item that produces spatially and temporally coherent light through amplification by stimulated emission of radiation. See also: “Chemical laser;” “Super High Power Laser;” and “Transfer laser.”

*Law or regulation relating to export control.* Any statute, proclamation, executive order, regulation, rule, license, or order applicable to any conduct involving an export transaction shall be deemed to be a “law or regulation relating to export control.”

*Legible or legibility.* Legible and legibility mean the quality of a letter or numeral that enables the observer to identify it positively and quickly to the exclusion of all other letters or numerals.

*Less sensitive government end users (as applied to encryption items).* The following “government end users” (as defined in this Section of the EAR) are considered “less sensitive” for the purposes of License Exception ENC (§ 740.17 of the EAR):

(1) Local/state/provincial "government end users" (departments, agencies and entities), including local/state/provincial executive, legislative, judicial, police, fire, rescue and public safety agencies.

boards, councils and development authorities (including national information center, and Information Communications Technology (ICT) / telecommunications infrastructure / spectrum planning, policy, regulation and testing);

(2) National/federal/royal "government end users" (departments, agencies and entities) providing the following civil government functions and services:

- (i) Census and statistics services;
- (ii) Civil public works infrastructure services (construction, maintenance, repair, regulation and administration) as follows: buildings, public transportation, roads and highways, trucking;
- (iii) Civil service administration and regulation, including human resources and personnel/labor management;
- (iv) Clean water infrastructure services (treatment, supply and testing);
- (v) Economic (trade/commerce/investment), business and industrial development, promotion, regulation and administration, excluding the following end users/end uses:
  - (A) Agencies, departments, boards and councils for science and technology;
  - (B) Research, development and national laboratories (other than as specified in paragraphs (2)(xi) (measurements and standards services) and (2)(xii) (meteorology/weather/atmospheric services) of this definition (below));
  - (C) National telecommunications and information technology agencies,

- (vi) Elections, balloting and polling services;
- (vii) Energy regulation and administration, including oil, gas and mining sectors;
- (viii) Environmental/natural resources regulation, administration and protection, including wildlife, fisheries and national parks;
- (ix) Food/agriculture regulation and administration;
- (x) Labor/community/social services planning, regulation and administration, including: housing and urban development, municipality and rural affairs;
- (xi) Measurements and standards services;
- (xii) Meteorology (weather, atmospheric) services;
- (xiii) National archives/museums;
- (xiv) Patents;
- (xv) Pilgrimage and religious affairs;
- (xvi) Postal services;
- (xvii) Public and higher education (excluding government research institutions and any agency, institution or affiliate engaged in the manufacture or

distribution of items or services controlled on the Wassenaar Munitions List);

(xviii) Public health and medicine/pharmaceutical regulation and administration;

(xix) Public libraries;

(xx) Sports/culture (includes film, commercial broadcasting and the arts) promotion, regulation and administration;

(xxi) Travel/tourism promotion, regulation and administration.

*“Library”* (Cat 1) (parametric technical database) A collection of technical information, reference to which may enhance the performance of the relevant systems, equipment or components.

*License.* Authority issued by the Bureau of Industry and Security authorizing an export, reexport, or other regulated activity. The term “license” does not include authority represented by a “License Exception.”

*License application; application for license.* License application and similar wording mean an application to BIS requesting the issuance of a license to the applicant.

*License Exception.* An authorization described in part 740 of the EAR that allows you to export or reexport, under stated conditions, items subject to the EAR that otherwise would require a license. Unless otherwise indicated, these License Exceptions are not applicable to exports under the licensing jurisdiction of agencies other than the Department of Commerce.

*Licensee.* The person to whom a license has been issued by BIS. See §750.7(c) of the EAR for a complete definition and identification of a

licensee's responsibilities.

*“Lighter-than-air vehicles”.* (Cat 2 and 9) Balloons and “airships” that rely on hot air or on lighter-than-air gases such as helium or hydrogen for their lift.

*“Local area network”.* (Cat 4 and 5 Part 1)--A data communication system that:

(a) Allows an arbitrary number of independent ‘data devices’ to communicate directly with each other; and

(b) Is confined to a geographical area of moderate size (e.g., office building, plant, campus, warehouse).

**Technical Note:** ‘Data device’ means equipment capable of transmitting or receiving sequences of digital information.

*“MBTR”.*--See “maximum bit transfer rate”.

*“MMIC”.* (Cat 3 and 5) See “Monolithic Microwave Integrated Circuit”

*MTCR.* See Missile Technology Control Regime.

*MTEC.* See Missile Technology Export Control Group.

*“Magnetic Gradiometers”.* (Cat 6)--Are designed to detect the spatial variation of magnetic fields from sources external to the instrument. They consist of multiple “magnetometers” and associated electronics the output of which is a measure of magnetic field gradient. (See also “Intrinsic Magnetic Gradiometer”.)

*“Magnetometers”.* (Cat 6)--Are designed to detect magnetic fields from sources external to the instrument. They consist of a single magnetic field sensing element and associated electronics the output of which is a measure of the magnetic

field.

*Material.* This is any list-specified crude or processed matter that is not clearly identifiable as any of the types of items defined in § 772.1 under the defined terms, “end item,” “component,” “accessories,” “attachments,” “part,” “software,” “system,” “equipment,” or “facilities.” The exclusion from the definition of material for clearly identifiable items defined in § 772.1, such as for “parts” and “components,” does not apply to the following ECCNs: 1C233, 1C234, 1C235, 1C236, 1C237, 1C239, 1C350, 1C395, 1C991, 1C992, and 1C995.

*“Matrix”.* (Cat 1, 2, 8, and 9)--A substantially continuous phase that fills the space between particles, whiskers or fibers.

*“Maximum bit transfer rate”.* (MBTR) (Cat 4)--Of solid state storage equipment: the number of data bits per second transferred between the equipment and its controller. Of a disk drive: the internal data transfer rate calculated as follows:

“MBTR” (bits per second) = B x R x T, where:

B = Maximum number of data bits per track available to read or write in a single revolution;

R = Revolutions per second;

T = Number of tracks that can be used or written simultaneously.

*“Measurement uncertainty”.* (Cat 2)-- The characteristic parameter that specifies in what range around the output value the correct value of the measurable variable lies with a confidence level of 95%. It includes the uncorrected systematic deviations, the uncorrected backlash, and the random deviations (Ref.: ISO 10360-2).

*“Media access unit”.* (Cat 5)--Equipment that contains one or more communication interfaces (“network access controller”, “communications channel controller”, modem or computer bus) to

connect terminal equipment to a network.

*Medical devices.* For purposes of the EAR, medical devices are “devices” as defined in section 201 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321) including medical supplies, instruments, equipment, equipped ambulances, institutional washing machines for sterilization, and vehicles with medical testing equipment. Note that certain component parts and spares to be exported for incorporation into medical devices are on the Commerce Control List. Only items meeting the definition of “medical device” and that are classified as EAR99 are eligible for export to Iran and Sudan under the licensing procedures set forth in the appropriate regulations promulgated and administered by Treasury’s Office of Foreign Assets Control.

*Medicines.* Medicines means “drug” as defined in section 201 of the Federal Food, Drug and Cosmetic Act (21 U.S.C. 321). For purposes of the EAR, medicines includes prescription and over the counter medicines for humans and animals. Note that certain medicines, such as vaccines and immunotoxins, are on the Commerce Control List. Only items meeting the definition of “medicine” and that are classified as EAR99 are eligible for export to Iran and Sudan under the licensing procedures set forth in the appropriate regulations promulgated and administered by Treasury’s Office of Foreign Assets Control.

*Metal embrittlement agents.* (Cat. 0)—Non-lethal weapon substances that alter the crystal structure of metals within a short time span. Metal embrittlement agents severely weaken metals by chemically changing their molecular structure. These agents are compounded in various substances to include adhesives, liquids, aerosols, foams, and lubricants.

*“Microcomputer microcircuit”.* (Cat 3) means a “monolithic integrated circuit” or “multichip integrated circuit” containing an arithmetic logic

unit (ALU) capable of executing a series of general purpose instructions from an internal storage, on data contained in the internal storage.

**TECHNICAL NOTE 1:** *The “microprocessor microcircuit” normally does not contain integral user-accessible storage, although storage present on-the-chip may be used in performing its logic function.*

**TECHNICAL NOTE 2:** *The internal storage may be augmented by an external storage.*

**NOTE:** *This definition includes chip sets which are designed to operate together to provide the function of a “microprocessor microcircuit.”*

“Microorganisms”. (Cat 1 and 2) means bacteria, viruses, mycoplasmas, rickettsiae, chlamydiae or fungi, whether natural, enhanced or modified, either in the form of isolated live cultures or as material including living material which has been deliberately inoculated or contaminated with such cultures.

“Microprocessor microcircuit”. (Cat 3)--A “monolithic integrated circuit” or “multichip integrated circuit” containing an arithmetic logic unit (ALU) capable of executing a series of general purpose instructions from an external storage.

**N.B. 1:** *The “microprocessor microcircuit” normally does not contain integral user-accessible storage, although storage present on-the-chip may be used in performing its logic function.*

**N.B. 2:** *This definition includes chip sets that are designed to operate together to provide the function of a “microprocessor microcircuit”.*

“Microprogram”. (Cat 4 and 5)--A sequence of elementary instructions, maintained in a special storage, the execution of which is initiated by the introduction of its reference instruction into an instruction register.

*Military commodity.* As used in § 734.4(a)(5), Supplement No. 1 to part 738 (footnote No. 3), §§ 740.2(a)(11), 740.16(a)(2), 740.16(b)(2), 742.6(a)(3), 744.9(a)(2), 744.9(b), ECCN 0A919 and (Related Controls) in “600 series” ECCNs, “military commodity” or “military commodities” means an article, material, or supply that is described on the U.S. Munitions List (22 CFR Part 121) or on the Munitions List that is published by the Wassenaar Arrangement on Export Controls for Conventional Arms and Dual-Use Goods and Technologies, but does not include software, technology and any item listed in any ECCN for which the last three numerals are 018 or any item in the “600 series.”

*Missile Technology Control Regime (MTCR).* The United States and other nations in this multilateral control regime have agreed to guidelines for restricting the export and reexport of dual-use items that may contribute to the development of missiles. The MTCR Annex lists missile-related equipment and technology controlled either by the Department of Commerce’s Bureau of Industry and Security – Export Administration Regulations (15 CFR Parts 730 through 799) or by the Department of State’s Directorate of Defense Trade Controls - International Traffic in Arms Regulations (22 CFR Parts 120 through 130).

*Missile Technology Export Control Group (MTEC).* Chaired by the Department of State, the MTEC primarily reviews applications involving items controlled for Missile Technology (MT) reasons. The MTEC also reviews applications involving items not controlled for MT reasons, but destined for a country and/or end-use/end-user of concern.

“Missiles”. (All)--Rocket systems (including ballistic missiles, space launch vehicles, and sounding rockets) and unmanned aerial vehicle systems (including cruise missiles, target drones, and reconnaissance drones) “capable of” delivering at least 500 kilograms payload to a

range of at least 300 kilometers. See § 746.3 for definition of a “ballistic missile” to be exported or reexported to Iraq or transferred within Iraq.

“*Monolithic integrated circuit*”. (Cat 3)--A combination of passive or active “circuit elements” or both that:

(a) Are formed by means of diffusion processes, implantation processes or deposition processes in or on a single semiconducting piece of material, a so-called ‘chip’;

(b) Can be considered as indivisibly associated; and

(c) Perform the function(s) of a circuit.

**NOTE:** “*Circuit element*”: a single active or passive functional part of an electronic circuit, such as one diode, one transistor, one resistor, one capacitor, etc.

“*Monolithic Microwave Integrated Circuit*” (“*MMIC*”). (Cat 3, 5P1 and 9) is a “monolithic integrated circuit” that operates at microwave or millimeter wave frequencies.

“*Monospectral imaging sensors*”. (Cat 6) are capable of acquisition of imaging data from one discrete spectral band.

*More sensitive government end users (as applied to encryption items).* The following national/federal/royal (departments, agencies and entities) “government end users” (as defined in this section of the EAR) providing the following government functions and services, are considered “more sensitive:”

(1) Agencies, departments, boards and councils for science and technology (including research, development and state / national laboratories, but not including measurements and standards);

(2) Currency and monetary authorities

(including departments and offices of the national / federal / royal reserve);

(3) Executive agents of state (including offices of president / vice president / prime minister, royal courts, national security councils, cabinet / council of ministers / supreme councils / executive councils, crown princes and other deputies of the rulers, departments and offices of political / constitutional / mainland affairs);

(4) Legislative bodies responsible for the enactment of laws;

(5) Import/export control, customs and immigration agencies and entities;

(6) Intelligence agencies and entities;

(7) Judiciary (including supreme courts and other national / federal / regional / royal high courts and tribunals);

(8) Maritime, port, railway and airport authorities;

(9) Military and armed services (including national guard, coast guard, security bureaus and paramilitary);

(10) Ministries, departments and garrisons of defense (including defense technology agencies);

(11) Ministries and departments of finance and taxation (including national / federal / royal budget and revenue authorities);

(12) Ministries and departments of foreign affairs / foreign relations / consulates / embassies;

(13) Ministries of interior, internal / home / mainland affairs, and homeland security;

(14) State / national telecommunications and information technology agencies, boards, councils and development authorities

(including national information / critical infrastructure data centers, and Information and Communications Technology (ICT) /telecommunications infrastructure / spectrum planning, policy, regulation and testing);

(15) Police, investigation and other law enforcement agencies and entities (including digital crime / cybercrime / computer forensics, counter narcotics / counter terrorism / counter proliferation agencies);

(16) Prisons;

(17) Public safety agencies and entities (including national / federal / royal agencies and departments of civil defense, emergency management, and first responders).

*“Motion control board”*. (Cat 2)--An electronic “assembly” specially designed to provide a computer system with the capability to coordinate simultaneously the motion of axes of machine tools for “contouring control”.

*“Multichip integrated circuit”*. (Cat 3)--Two or more “monolithic integrated circuits” bonded to a common “substrate”.

*“Multi-data-stream processing”*. (Cat 4)--The “microprogram” or equipment architecture technique that permits simultaneous processing of two or more data sequences under the control of one or more instruction sequences by means such as:

(a) Single Instruction Multiple Data (SIMD) architectures such as vector or array processors;

(b) Multiple Single Instruction Multiple Data (MSIMD) architectures;

(c) Multiple Instruction Multiple Data (MIMD) architectures, including those that are tightly coupled, closely coupled or loosely coupled; or

(d) Structured arrays of processing elements,

including systolic arrays.

*“Multiple channel Analog-to-Digital Converter (ADC)”*. (Cat 3) Devices that integrate more than one ADC, designed so that each ADC has a separate analog input.

*“Multispectral Imaging Sensors”*. (Cat 6)--Are capable of simultaneous or serial acquisition of imaging data from two or more discrete spectral bands. Sensors having more than twenty discrete spectral bands are sometimes referred to as hyperspectral imaging sensors.

*“N.E.S”*. N.E.S or n.e.s. is an abbreviation meaning “not elsewhere specified”.

*NATO (North Atlantic Treaty Organization)*. A strategic defensive organization that consists of the following member nations: Albania, Belgium, Bulgaria, Canada, Croatia, Czech Republic, Denmark, Estonia, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Turkey, the United Kingdom, and the United States.

*NLR*. NLR (“no license required”) is a symbol entered on the Electronic Export Information filing on the Automated Export System certifying that no license is required.

*MSG*. See Nuclear Suppliers Group.

*“Natural uranium”*. (Cat 0) means uranium containing the mixtures of isotopes occurring in nature.

*Net value*. The actual selling price, less shipping charges or current market price, whichever is the larger, to the same type of purchaser in the United States.

*“Network Access Controller”*. (Cat 4) - A physical interface to a distributed switching network. It uses a common medium which

operates throughout at the same “digital transfer rate” using arbitration (e.g., token or carrier sense) for transmission. Independently from any other, it selects data packets or data groups (e.g., IEEE 802) addressed to it. It is an assembly that can be integrated into computer or telecommunications equipment to provide communications access.

*Non-standard cryptography.* Means any implementation of “cryptography” involving the incorporation or use of proprietary or unpublished cryptographic functionality, including encryption algorithms or protocols that have not been adopted or approved by a duly recognized international standards body (e.g., IEEE, IETF, ISO, ITU, ETSI, 3GPP, TIA, and GSMA) and have not otherwise been published.

*“Nuclear reactor”.* (Cat 0 and 2) includes the items within or attached directly to the reactor vessel, the equipment which controls the level of power in the core, and the components which normally contain, come into direct contact with or control the primary coolant of the reactor core.

*Nuclear Suppliers Group (NSG).* The United States and other nations in this multilateral control regime have agreed to guidelines for restricting the export or reexport of items with nuclear applications. Members include: Argentina, Australia, Austria, Belarus, Belgium, Brazil, Bulgaria, Canada, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Kazakhstan, Latvia, Lithuania, Luxembourg, Malta, Mexico, the Netherlands, New Zealand, Norway, People’s Republic of China, Poland, Portugal, Republic of Korea, Romania, Russia, Serbia, Slovak Republic, Slovenia, South Africa, Spain, Sweden, Switzerland, Turkey, Ukraine, the United Kingdom, and the United States. See also §742.3 of the EAR.

*“Numerical control”.* (Cat 2)--The automatic control of a process performed by a device that

makes use of numeric data usually introduced as the operation is in progress (Ref. ISO 2382).

*“OAM”* – see *“Operations, Administration or Maintenance”*

*“Object code”.* (or object language) (GSN)--An equipment executable form of a convenient expression of one or more processes (“source code” (or source language)) that has been compiled by a programming system. (See also “source code”)

*Office of Foreign Assets Control (FAC) or (OFAC).* The office at the Department of the Treasury responsible for blocking assets of foreign countries subject to economic sanctions, controlling participation by U.S. persons, including foreign subsidiaries, in transactions with specific countries or nationals of such countries, and administering embargoes on certain countries or areas of countries. (see 31 CFR parts 500 through 590.)

*“Open cryptographic interface”.* A mechanism which is designed to allow a customer or other party to insert cryptographic functionality without the intervention, help or assistance of the manufacturer or its agents, e.g., manufacturer’s signing of cryptographic code or proprietary interfaces. If the cryptographic interface implements a fixed set of cryptographic algorithms, key lengths or key exchange management systems, that cannot be changed, it will not be considered an “open” cryptographic interface. All general application programming interfaces (e.g., those that accept either a cryptographic or non-cryptographic interface but do not themselves maintain any cryptographic functionality) will not be considered “open” cryptographic interfaces.

*“Operate autonomously”.* (Cat 8)--Fully submerged, without snorkel, all systems working and cruising at minimum speed at which the submersible can safely control its depth dynamically by using its depth planes only, with

no need for a support vessel or support base on the surface, sea-bed or shore, and containing a propulsion system for submerged or surface use.

*Operating Committee (OC).* The OC voting members include representatives of appropriate agencies in the Departments of Commerce, State, Defense, Justice (for encryption exports), and Energy and the Arms Control and Disarmament Agency. The appropriate representatives of the Joint Chiefs of Staff and the Director of the Nonproliferation Center of the Central Intelligence Agency are non-voting members. The Department of Commerce representative, appointed by the Secretary, is the Chair of the OC and serves as the Executive Secretary of the Advisory Committee on Export Policy. The OC may invite representatives of other Government agencies or departments (other than those identified in this definition) to participate in the activities of the OC when matters of interest to such agencies or departments are under consideration.

*“Operations, Administration or Maintenance” (“OAM”)* (Cat 5P2) Means performing one or more of the following tasks:

- a. Establishing or managing any of the following:
  - 1. Accounts or privileges of users or administrators;
  - 2. Settings of an item; or
  - 3. Authentication data in support of the tasks described in paragraphs a.1 or a.2;
- b. Monitoring or managing the operating condition or performance of an item; or
- c. Managing logs or audit data in support of any of the tasks described in paragraphs a. or b.

*Note: “OAM” does not include any of the following tasks or their associated key*

*management functions:*

*a. Provisioning or upgrading any cryptographic functionality that is not directly related to establishing or managing authentication data in support of the tasks described in paragraphs a.1 or a.2 above; or*

*b. Performing any cryptographic functionality on the forwarding or data plane of an item.*

*“Optical integrated circuit”.* (Cat 3)--A “monolithic integrated circuit” or a “hybrid integrated circuit”, containing one or more parts designed to function as photosensor or photoemitter or to perform (an) optical or (an) electro-optical function(s).

*“Optical switching”.* (Cat 5)--The routing of or switching of signals in optical form without conversion to electrical signals.

*Order Party.* The person in the United States who conducted the direct negotiations or correspondence with the foreign purchaser or ultimate consignee and who, as a result of these negotiations, received the order from the foreign purchaser or ultimate consignee.

*Organization for the Prohibition of Chemical Weapons (OPCW).* Means the international organization, located in The Hague, Netherlands, that administers the Chemical Weapons Convention.

*Other party authorized to receive license.* The person authorized by the applicant to receive the license. If a person and address is listed in Block 15 of the application, the Bureau of Industry and Security will send the license to that person instead of the applicant. Designation of another party to receive the license does not alter the responsibilities of the applicant, licensee or exporter.

*“Overall current density”.* (Cat 3)--The total

number of ampere-turns in the coil (i.e., the sum of the number of turns multiplied by the maximum current carried by each turn) divided by the total cross-section of the coil (comprising the superconducting filaments, the metallic matrix in which the superconducting filaments are embedded, the encapsulating material, any cooling channels, etc.).

*Part.* This is any single unassembled element of a “component,” “accessory,” or “attachment” which is not normally subject to disassembly without the destruction or the impairment of design use. Examples include threaded fasteners (e.g., screws, bolts, nuts, nut plates, studs, inserts), other fasteners (e.g., clips, rivets, pins), common hardware (e.g., washers, spacers, insulators, grommets, bushings), springs and wire.

“*Part program*”. (Cat. 2)--An ordered set of instructions that is in a language and in a format required to cause operations to be effected under automatic control and that is either written in the form of a machine program on an input medium or prepared as input data for processing in a computer to obtain a machine program (Ref. ISO 2806-1980).

“*Payload*”. (MTCR context) – The total mass that can be carried or delivered by the specified rocket system or unmanned aerial vehicle (UAV) system that is not used to maintain flight.

**NOTE:** *The particular equipment, subsystems, or components to be included in the “payload” depends on the type and configuration of the vehicle under construction.*

**TECHNICAL NOTES:**

a. *Ballistic Missiles*

1. “*Payload*” for systems with separating re-entry vehicles (RVs) includes:

i. *The RVs, including:*

A. *Dedicated guidance, navigation, and control equipment;*

B. *Dedicated countermeasures equipment;*

ii. *Munitions of any type (e.g., explosive or non-explosive);*

iii. *Supporting structures and deployment mechanisms for the munitions (e.g. hardware used to attach to, or separate the RV from, the bus/post-boost vehicle) that can be removed without violating the structural integrity of the vehicle;*

iv. *Mechanisms and devices for safing, arming, fuzing, or firing;*

v. *Any other countermeasures equipment (e.g., decoys, jammers, or chaff dispensers) that separate from the RV bus/post-boost vehicle;*

vi. *The bus/post-boost vehicle or attitude control/velocity trim module not including systems/subsystems essential to the operation of other stages.*

2. “*Payload*” for systems with non-separating re-entry vehicles includes:

i. *Munitions of any type (e.g., explosive or non-explosive);*

ii. *Supporting structures and deployment mechanisms for the munitions that can be removed without violating the structural integrity of the vehicle;*

iii. *Mechanisms and devices for safing, arming, fuzing or firing;*

iv. *Any countermeasures equipment (e.g., decoys, jammers, or chaff dispensers) that can be removed without violating the structural integrity of the vehicle.*

*b. Space Launch Vehicles - “Payload” includes:*

- 1. Spacecraft (single or multiple), including satellites;*
- 2. Spacecraft-to-launch vehicle adapters including, if applicable, apogee/perigee kick motors or similar maneuvering systems and separation systems;*

*c. Sounding Rockets - “Payload” includes:*

- 1. Equipment required for a mission, such as data gathering, recording or transmitting devices for mission-specific data;*
- 2. Recovery equipment (e.g., parachutes) that can be removed without violating the structural integrity of the vehicle.*

*d. Cruise Missiles - “Payload” includes:*

- 1. Munitions of any type (e.g., explosive or non-explosive);*
- 2. Supporting structures and mechanisms for the munitions that can be removed without violating the structural integrity of the vehicle;*
- 3. Mechanisms and devices for safing, arming, fuzing or firing;*
- 4. Countermeasures equipment (e.g., decoys, jammers or chaff dispensers) that can be removed without violating the structural integrity of the vehicle;*
- 5. Signature alteration equipment that can be removed without violating the structural integrity of the vehicle;*

*e. Other UAVs - “Payload” includes:*

- 1. Munitions of any type (e.g., explosive or non-explosive);*

- 2. Mechanisms and devices for safing, arming, fuzing or firing;*
- 3. Countermeasures equipment (e.g., decoys, jammers or chaff dispensers) that can be removed without violating the structural integrity of the vehicle;*
- 4. Signature alteration equipment that can be removed without violating the structural integrity of the vehicle;*
- 5. Equipment required for a mission such as data gathering, recording or transmitting devices for mission-specific data and supporting structures that can be removed without violating the structural integrity of the vehicle;*
- 6. Recovery equipment (e.g., parachutes) that can be removed without violating the structural integrity of the vehicle;*
- 7. Munitions supporting structures and deployment mechanisms that can be removed without violating the structural integrity of the vehicle.*

“Peak power”. (Cat 6)-- The highest power attained in the “pulse duration”.

*Person.* A natural person, including a citizen or national of the United States or of any foreign country; any firm; any government, government agency, government department, or government commission; any labor union; any fraternal or social organization; and any other association or organization whether or not organized for profit. This definition does not apply to part 760 of the EAR (Restrictive Trade Practices or Boycotts).

“Personal area network” (Cat 5 Part 2) -- A data communication system having all of the following characteristics:

- (a) Allows an arbitrary number of

independent or interconnected ‘data devices’ to communicate directly with each other; and

(b) Is confined to the communication between devices within the immediate vicinity of an individual person or device controller (e.g., single room, office, or automobile, and their nearby surrounding spaces).

**TECHNICAL NOTE:** ‘Data device’ means equipment capable of transmitting or receiving sequences of digital information.

*Port of export.* The port where the cargo to be shipped abroad is laden aboard the exporting carrier. It includes, in the case of an export by mail, the place of mailing.

*“Principal element”.* (Cat 4)--An element is a “principal element” when its replacement value is more than 35% of the total value of the system of which it is an element. Element value is the price paid for the element by the manufacturer of the system, or by the system integrator. Total value is the normal international selling price to unrelated parties at the point of manufacture or consolidation of shipment.

*Principal parties in interest.* Those persons in a transaction that receive the primary benefit, monetary or otherwise, of the transaction. Generally, the principals in a transaction are the seller and the buyer. In most cases, the forwarding or other agent is not a principal party in interest.

*“Production”.* (General Technology Note) (All Categories)-- Means all production stages, such as: product engineering, manufacture, integration, assembly (mounting), inspection, testing, quality assurance.

*“Production equipment”.* (MTCR context) -- Tooling, templates, jigs, mandrels, moulds, dies, fixtures, alignment mechanisms, test equipment, other machinery and components therefor, limited to those specially designed or modified

for “development” or for one or more phases of “production”.

*“Production Facilities”.* (MTCR Context only). (Cat 7 and 9) – Means “production equipment” and specially designed “software” therefor integrated into installations for “development” or for one or more phases of “production”.

*“Program”.* (Cat 2, 4, and 6)--A sequence of instructions to carry out a process in, or convertible into, a form executable by an electronic computer.

*“Proof test”.* (Cat 5)--On-line or off-line production screen testing that dynamically applies a prescribed tensile stress over a 0.5 to 3 m length of fiber at a running rate of 2 to 5 m/s while passing between capstans approximately 150 mm in diameter. The ambient temperature is a nominal 293 K (20° C) and relative humidity 40%.

**NOTE:** Equivalent national standards for executing the “proof test” may be used.

*Proscribed person.* A person who is prohibited from receiving the items at issue or participating in a transaction that is subject to the EAR without authorization under the EAR, such as persons on the Entity List or denied persons.

*Publicly available encryption software.* See § 742.15(b) of the EAR.

*Published.* See § 734.7 of the EAR.

*“Pulse compression”.* (Cat 6)--The coding and processing of a radar signal pulse of long time duration to one of short time duration, while maintaining the benefits of high pulse energy.

*“Pulse duration”.* (Cat 6)-- Duration of a “laser” pulse is the time between the half-power points on the leading edge and trailing edge of an individual pulse.

“*Pulsed Laser*”. (Cat 6)--A “laser” having a “pulse duration” that is less than or equal to 0.25 seconds.

*Purchaser*. The person abroad who has entered into a transaction to purchase an item for delivery to the ultimate consignee. In most cases, the purchaser is not a bank, forwarding agent, or intermediary. The purchaser and ultimate consignee may be the same entity.

“*Pyrotechnic(s)*” (Cat 1) Mixtures of solid or liquid fuels and oxidizers which, when ignited, undergo an energetic chemical reaction at a controlled rate intended to produce specific time delays, or quantities of heat, noise, smoke, visible light or infrared radiation. Pyrophorics are a subclass of pyrotechnics, which contain no oxidizers but ignite spontaneously on contact with air.

“*Quantum cryptography*” (Cat 5P2) A family of techniques for the establishment of a shared key for “cryptography” by measuring the quantum-mechanical properties of a physical system (including those physical properties explicitly governed by quantum optics, quantum field theory, or quantum electrodynamics).

*RWA*. See Return Without Action.

“*Radar frequency agility*”. (Cat 6)--Any technique that changes, in a pseudo-random sequence, the carrier frequency of a pulsed radar transmitter between pulses or between groups of pulses by an amount equal to or larger than the pulse bandwidth.

“*Radar spread spectrum*”. (Cat 6)--Any modulation technique for spreading energy originating from a signal with a relatively narrow frequency band, over a much a wider band of frequencies, by using random or pseudo-random coding.

“*Radiant sensitivity*” (Cat 6)—Radiant sensitivity (mA/W) = 0.807 × (wavelength in nm)

× ‘Quantum Efficiency (QE)’.

**TECHNICAL NOTE:** ‘QE’ is usually expressed as a percentage; however, for the purposes of this formula ‘QE’ is expressed as a decimal number less than one, e.g., 78% is 0.78.

“*Range*”. (Cat 8)--Half the maximum distance a submersible vehicle can cover.

“*Range*”. (MTCR context) – The maximum distance that the specified rocket system or unmanned aerial vehicle (UAV) system is capable of traveling in the mode of stable flight as measured by the projection of its trajectory over the surface of the Earth.

**TECHNICAL NOTES:**

a. The maximum capability based on the design characteristics of the system, when fully loaded with fuel or propellant, will be taken into consideration in determining “range”.

b. The “range” for both rocket systems and UAV systems will be determined independently of any external factors such as operational restrictions, limitations imposed by telemetry, data links or other external constraints.

c. For rocket systems, the “range” will be determined using the trajectory that maximizes “range”, assuming ICAO standard atmosphere with zero wind.

d. For UAV systems, the “range” will be determined for a one-way distance using the most fuel-efficient flight profile (e.g. cruise speed and altitude), assuming ICAO standard atmosphere with zero wind.

*Readable or readability*. Readable and readability mean the quality of a group of letters or numerals being recognized as complete words or numbers.

“*Real-time Processing*”. (Cat 2, 4, and 6) The processing of data by a computer system

providing a required level of service, as a function of available resources, within a guaranteed response time, regardless of the load of the system, when stimulated by an external event.

*Reasons for Control.* Reasons for Control are: Anti-Terrorism (AT), Chemical & Biological Weapons (CB), Chemical Weapons Convention (CW), Crime Control (CC), Encryption Items (EI), Firearms Convention (FC), Missile Technology (MT), National Security (NS), Nuclear Nonproliferation (NP), Regional Stability (RS), Short Supply (SS), Significant Items (SI), Surreptitious Listening (SL) and United Nations sanctions (UN). Items controlled within a particular ECCN may be controlled for more than one reason.

*Recoverable commodities and software.* As applied to encryption items, means any of the following:

(a) A stored data product containing a recovery feature that, when activated, allows recovery of the plaintext of encrypted data without the assistance of the end-user; or

(b) A product or system designed such that a network administrator or other authorized persons who are removed from the end-user can provide law enforcement access to plaintext without the knowledge or assistance of the end-user. This includes, for example, products or systems where plaintext exists and is accessible at intermediate points in a network or infrastructure system, enterprise-controlled recovery systems, and products which permit recovery of plaintext at the server where a system administrator controls or can provide recovery of plaintext across an enterprise.

**NOTE TO THIS DEFINITION:** *“Plaintext” indicates that data that is initially received by or presented to the recoverable product before encryption takes place.*

*Reexport.* See § 734.14 of the EAR.

*Release.* See § 734.15 of the EAR.

*“Repeatability”.* (Cat 7) The closeness of agreement among repeated measurements of the same variable under the same operating conditions when changes in conditions or non-operating periods occur between measurements. (Reference: IEEE STD 528-2001 (one sigma standard deviation))

*“Repeatability”.* (MTCR Context only) (Cat 7) – According to IEEE Standard for Inertial Sensor Terminology 528-2001 in the Definitions section paragraph 2.214 titled repeatability (gyro, accelerometer) as follows: “The closeness of agreement among repeated measurements of the same variable under the same operating conditions when changes in conditions or non-operating periods occur between measurements.”

*Replacement license.* An authorization by the Bureau of Industry and Security revising the information, conditions, or riders stated on a license issued by BIS. See § 750.7 of the EAR.

*Required.* (General Technology Note) --As applied to “technology” or “software,” refers to only that portion of “technology” or “software” which is peculiarly responsible for achieving or exceeding the controlled performance levels, characteristics or functions. Such “required” “technology” or “software” may be shared by different products. For example, assume product “X” is controlled on the CCL if it operates at or above 400 MHz and is not controlled if it operates below 400 MHz. If production technologies “A,” “B,” and “C” allow production at no more than 399 MHz, then technologies “A,” “B,” and “C” are not “required” to produce the controlled product “X”. If technologies “A,” “B,” “C,” “D,” and “E” are used together, a manufacturer can produce product “X” that operates at or above 400 MHz. In this example, technologies “D” and “E” are peculiarly responsible for making the controlled product and are thus “required” technology under

the General Technology Note. (See the General Technology Note.)

**NOTE 1 TO THE DEFINITION OF Required:** *The ITAR and the EAR often divide within each set of regulations or between each set of regulations:*

(a) *Controls on parts, components, accessories, attachments, and software; and*

(b) *Controls on the end items, systems, equipment, or other items into which those parts, components, accessories, attachments, and software are to be installed or incorporated.*

**NOTE 2 TO THE DEFINITION OF Required:** *The references to “characteristics” and “functions” are not limited to entries on the CCL that use specific technical parameters to describe the scope of what is controlled. The “characteristics” and “functions” of an item listed are, absent a specific regulatory definition, a standard dictionary’s definition of the item. For example, ECCN 9A610.a controls military aircraft specially designed for a military use that are not enumerated in USML paragraph VIII(a). No performance level is identified in the entry, but the control characteristic of the aircraft is that it is specially designed “for military use.” Thus, any technology, regardless of significance, peculiar to making an aircraft “for military use” as opposed to, for example, an aircraft controlled under ECCN 9A991.a, would be technical data “required” for an aircraft specially designed for military use thus controlled under ECCN 9E610.*

**NOTE 3 TO THE DEFINITION OF Required:** *Unclassified technology not specifically enumerated on the USML is “subject to the EAR” if it is “required” for the “development,” “production,” “use,” operation, installation, maintenance, repair, overhaul, or refurbishing (or other terms specified in ECCNs on the CCL that control “technology”) of a commodity or software that is subject to the EAR. Thus, for example, if unclassified technology not*

*specifically enumerated on the USML is “required” for the development or production of a 9A610.x aircraft component that is to be integrated or installed in a USML VIII(a) aircraft, then the “technology” is controlled under ECCN 9E610, not USML VIII(i). Conversely, technical data directly related to, for example, the development or production of a component subject to the ITAR does not become subject to the EAR merely because it is developed or produced with equipment subject to the EAR.*

*Return Without Action (RWA).* An application may be RWA'd for one of the following reasons:

(a) The applicant has requested the application be returned;

(b) A License Exception applies;

(c) The items are not under Department of Commerce jurisdiction;

(d) Required documentation has not been submitted with the application; or

(e) The applicant cannot be reached after several attempts to request additional information necessary for processing of the application.

*“Robot”.* (Cat 2 and 8)--A manipulation mechanism, which may be of the continuous path or of the point-to-point variety, may use “sensors”, and has all the following characteristics:

(a) Is multifunctional;

(b) Is capable of positioning or orienting material, parts, tools or special devices through variable movements in a three dimensional space;

(c) Incorporates three or more closed or open loop servo-devices that may include stepping motors; and

(d) Has “user-accessible programmability” by

means of teach/playback method or by means of an electronic computer that may be a programmable logic controller, i.e., without mechanical intervention.

**NOTE:** This definition does not include the following devices:

(a) Manipulation mechanisms that are only manually/teleoperator controllable;

(b) Fixed sequence manipulation mechanisms that are automated moving devices, operating according to mechanically fixed programmed motions. The program is mechanically limited by fixed stops, such as pins or cams. The sequence of motions and the selection of paths or angles are not variable or changeable by mechanical, electronic or electrical means;

(c) Mechanically controlled variable sequence manipulation mechanisms that are automated moving devices, operating according to mechanically fixed programmed motions. The program is mechanically limited by fixed, but adjustable stops, such as pins or cams. The sequence of motions and the selection of paths or angles are variable within the fixed program pattern. Variations or modifications of the program pattern (e.g., changes of pins or exchanges of cams) in one or more motion axes are accomplished only through mechanical operations;

(d) Non-servo-controlled variable sequence manipulation mechanisms that are automated moving devices, operating according to mechanically fixed programmed motions. The program is variable, but the sequence proceeds only by the binary signal from mechanically fixed electrical binary devices or adjustable stops;

(e) Stacker cranes defined as Cartesian coordinate manipulator systems manufactured as an integral part of a vertical array of storage bins and designed to access the contents of those bins

for storage or retrieval.

*Routed export transaction.* A transaction where the foreign principal party in interest authorizes a U.S. forwarding or other agent to facilitate export of items from the United States.

“Run-out”. (out-of-true running) (Cat 2)--Radial displacement in one revolution of the main spindle measured in a plane perpendicular to the spindle axis at a point on the external or internal revolving surface to be tested (Ref.: ISO 230 Part 1-1986, paragraph 5.61).

“SHPL”. (Cat 6) is equivalent to “Super High Power Laser”, see definition for “super high power laser.”

SNEC. See Subgroup on Nuclear Export Coordination.

“Sample rate”. (Cat 3) For an Analog-to-Digital Converter (ADC) the maximum number of samples that are measured at the analog input over a period of one second, except for oversampling ADCs. For oversampling ADCs the “sample rate” is taken to be its output word rate. “Sample rate” may also be referred to as sampling rate, usually specified in Mega Samples Per Second (MSPS) or Giga Samples Per Second (GSPS), or conversion rate, usually specified in Hertz (Hz).

“Satellite navigation system” (Cat 5P2, 7)-- A system consisting of ground stations, a constellation of satellites, and receivers, that enables receiver locations to be calculated on the basis of signals received from the satellites. It includes Global Navigation Satellite Systems (GNSS) and Regional Navigation Satellite Systems (RNSS).

“Scale factor”. (gyro or accelerometer) (Cat 7)--The ratio of change in output to a change in the input intended to be measured. Scale factor is generally evaluated as the slope of the straight line that can be fitted by the method of least

squares to input-output data obtained by varying the input cyclically over the input range.

*Schedule B numbers.* The commodity numbers appearing in the current edition of the Bureau of the Census publication, Schedule B Statistical Classification of Domestic and Foreign Commodities Exported from the United States. (see part 758 of the EAR for information on use of Schedule B numbers.)

*Shield.* Chaired by the Department of State, the Shield primarily reviews applications involving items controlled for Chemical and Biological Weapons (CBW) reasons. The Shield also reviews applications involving items not controlled for CBW reasons, but destined for a country and/or end-use/end-user of concern. See §750.4 of the EAR.

*“Signal analyzers”.* (Cat 3)--Apparatus capable of measuring and displaying basic properties of the single-frequency components of multi-frequency signals.

*“Signal processing”.* (Cat 3, 4, 5, and 6)--The processing of externally derived information-bearing signals by algorithms such as time compression, filtering, extraction, selection, correlation, convolution or transformations between domains (e.g., fast Fourier transform or Walsh transform).

*Single shipment.* All items moving at the same time from one exporter to one consignee or intermediate consignee on the same exporting carrier, even if these items will be forwarded to one or more ultimate consignees. Items being transported in this manner shall be treated as a single shipment even if the items represent more than one order or are in separate containers.

*“Software”.* (Cat: all)--A collection of one or more “programs” or “microprograms” fixed in any tangible medium of expression.

*“Source code”.* (or source language) (Cat 1, 4,

5P2, 6, 7, and 9)--A convenient expression of one or more processes that may be turned by a programming system into equipment executable form (“object code” (or object language)).

*“Spacecraft”.* (Cat 9)--Active and passive satellites and space probes.

*“Spacecraft bus”* (Cat 9) Equipment that provides the support infrastructure of the “spacecraft” and location for the “spacecraft payload”.

*“Spacecraft payload”* (Cat 9) Equipment, attached to the “spacecraft bus”, designed to perform a mission in space (e.g., communications, observation, science).

*“Space-qualified”.* (Cat 3, 6, and 7) Designed, manufactured, or qualified through successful testing, for operation at altitudes greater than 100 km above the surface of the Earth.

**NOTE 1:** *A determination that a specific item is “space-qualified” by virtue of testing does not mean that other items in the same production run or model series are “space-qualified” if not individually tested.*

**NOTE 2:** *The terms ‘designed’ and ‘manufactured’ in this definition are synonymous with “specially designed.” Thus, for example, an item that is “specially designed” for a spacecraft is deemed to be ‘designed’ or ‘manufactured’ for operation at altitudes greater than 100 km and an item that is not “specially designed” for a spacecraft is not deemed to have been so ‘designed’ or ‘manufactured.’*

*“Special fissile material”.* (Cat 0) means plutonium-239, uranium-233, “uranium enriched in the isotopes 235 or 233”, and any material containing the foregoing.

**NOTE:** *As defined by 10 CFR 110.2 of the Nuclear Regulatory Commission Regulations, “Special fissile material” means: plutonium,*

*uranium-233 or uranium enriched above 0.711 percent by weight in the isotope uranium-235.*

*Specially Designated National (SDN).* Any person who is determined by the Secretary of the Treasury to be a specially designated national for any reason under regulations issued by the Office of Foreign Assets Control (see 31 CFR parts 500 through 590).

*Specially Designated Terrorist (SDT).* Any person who is determined by the Secretary of the Treasury to be a specially designated terrorist under notices or regulations issued by the Office of Foreign Assets Control (see 31 CFR chapter V).

**\*\*Specially designed.** When applying this definition, follow this sequential analysis set forth below. (For additional guidance on the order of review of “specially designed,” including how the review of the term relates to the larger CCL, see Supplement No. 4 to Part 774 of the EAR – Commerce Control List Order of Review.)

**(a) Except for items described in (b), an “item” is “specially designed” if it:**

**(1)** As a result of “development” has properties peculiarly responsible for achieving or exceeding the performance levels, characteristics, or functions in the relevant ECCN or U.S. Munitions List (USML) paragraph; *or*

**(2)** Is a “part,” “component,” “accessory,” “attachment,” or “software” for use in or with a commodity or defense article ‘enumerated’ or otherwise described on the CCL or the USML.

**(b) A “part,” “component,” “accessory,” “attachment,” or “software” that would be controlled by paragraph (a) is not “specially designed” if it:**

**(1)** Has been identified to be in an ECCN paragraph that does not contain “specially

designed” as a control parameter or as an EAR99 item in a commodity jurisdiction (CJ) determination or interagency-cleared commodity classification (CCATS) pursuant to § 748.3(e);

**(2)** Is, regardless of ‘form’ or ‘fit,’ a fastener (*e.g.*, screw, bolt, nut, nut plate, stud, insert, clip, rivet, pin), washer, spacer, insulator, grommet, bushing, spring, wire, solder;

**(3)** Has the same function, performance capabilities, and the same or ‘equivalent’ form and fit, as a commodity or software used in or with an item that:

**(i)** Is or was in “production” (*i.e.*, not in “development”); *and*

**(ii)** Is either not ‘enumerated’ on the CCL or USML, or is described in an ECCN controlled only for Anti-Terrorism (AT) reasons;

**(4)** Was or is being developed with “knowledge” that it would be for use in or with commodities or software (i) described in an ECCN *and* (ii) also commodities or software either not ‘enumerated’ on the CCL or the USML (*e.g.*, EAR99 commodities or software) or commodities or software described in an ECCN controlled only for Anti-Terrorism (AT) reasons;

**(5)** Was or is being developed as a general purpose commodity or software, *i.e.*, with no “knowledge” for use in or with a particular commodity (*e.g.*, an F/A-18 or HMMWV) or type of commodity (*e.g.*, an aircraft or machine tool); *or*

**(6)** Was or is being developed with “knowledge” that it would be for use in or with commodities or software described (i) in an ECCN controlled for AT-only reasons and also EAR99 commodities or software; or (ii) exclusively for use in or with EAR99 commodities or software.

**NOTE 1:** ‘Enumerated’ refers to any item (i) on either the USML or CCL not controlled in a

'catch-all' paragraph and (ii) when on the CCL, controlled by an ECCN for more than Anti-Terrorism (AT) reasons only. An example of an 'enumerated' ECCN is 2A226, which controls valves with the following three characteristics: a "nominal size" of 5 mm or greater; having a bellows seal; and wholly made of or lined with aluminum, aluminum alloy, nickel, or nickel alloy containing more than 60% nickel by weight. The CCL also contains notes excluding from control "parts" and "components" "specially designed" for uncontrolled items. Such uncontrolled items are merely 'described' and are not 'enumerated.' Note 2 to ECCN 1A002 is an example of items excluded from control based on being "specially designed" for a 'described' item. Commodities or software in an ECCN controlled only for AT reasons are other examples of items 'described' on the CCL. ECCN 2B996, which controls dimensional inspection or measuring systems or equipment not controlled by 2B006, is an example of a commodity 'described' in an ECCN controlled only for AT reasons. For purposes of "specially designed," ECCNs 0B505.c, 0B999, 0D999, 1B999, 1C992, 1C995, 1C997, 1C999, 6A998 (except for .b), and 9A991 are treated as ECCNs controlled exclusively for AT reasons.

**NOTE 2:** A 'catch-all' paragraph is one that does not refer to specific types of "parts," "components," "accessories," or "attachments" but rather controls non-specific "parts," "components," "accessories," or "attachments" because they were "specially designed" for an enumerated item. For example, ECCN paragraph 9A610.x is a catch-all, because it controls "parts," "components," "accessories," and "attachments" "specially designed" for military aircraft, but does not identify specific types of "parts," "components," "accessories," or "attachments" within its control. Another example of a 'catch-all' is the heading of 7A102, which controls "specially designed" components for the gyros enumerated in 7A102, but does not identify the specific types of "components" within its control.

**NOTE TO PARAGRAPH (a)(1):** Items that as a result of "development" have properties peculiarly responsible for achieving or exceeding the performance levels, 'functions' or characteristics in a relevant ECCN paragraph may have properties shared by different products. For example, ECCN 1A007 controls equipment and devices, specially designed to initiate charges and devices containing energetic materials, by electrical means. An example of equipment not meeting the peculiarly responsible standard under paragraph (a)(1) is a garage door opener, that as a result of "development" has properties that enable the garage door opener to send an encoded signal to another piece of equipment to perform an action (i.e., the opening of a garage door). The garage door opener is not "specially designed" for purposes of 1A007 because although the garage door opener could be used to send a signal by electrical means to charges or devices containing energetic materials, the garage door opener does not have properties peculiarly responsible for achieving or exceeding the performance levels, 'functions' or characteristics in 1A007. For example, the garage door opener is designed to only perform at a limited range and the level of encoding is not as advanced as the encoding usually required in equipment and devices used to initiate charges and devices containing energetic materials, by electrical means. Conversely, another piece of equipment that, as a result of "development," has the properties (e.g., sending a signal at a longer range, having signals with advanced encoding to prevent interference, and having signals that are specific to detonating blasting caps) needed for equipment used to initiate charges and devices containing energetic materials, would be peculiarly responsible because the equipment has a direct and proximate causal relationship that is central or special for achieving or exceeding the performance levels, 'functions' or characteristics identified in 1A007.

**NOTE 1 TO PARAGRAPH (b)(3):** Commodities in "production" that are

subsequently subject to “development” activities, such as those that would result in enhancements or improvements only in the reliability or maintainability of the commodity (e.g., an increased mean time between failure (MTBF)), including those pertaining to quality improvements, cost reductions, or feature enhancements, remain in “production.” However, any new models or versions of such commodities developed from such efforts that change the basic performance or capability of the commodity are in “development” until and unless they enter into “production.”

**NOTE 2 TO PARAGRAPH (b)(3):** With respect to a commodity, ‘equivalent’ means that its form has been modified solely for ‘fit’ purposes.

**NOTE 3 TO PARAGRAPH (b)(3):** The ‘form’ of a commodity is defined by its configuration (including the geometrically measured configuration), material, and material properties that uniquely characterize it. The ‘fit’ of a commodity is defined by its ability to physically interface or interconnect with or become an integral part of another item. The ‘function’ of the item is the action or actions it is designed to perform. ‘Performance capability’ is the measure of a commodity’s effectiveness to perform a designated function in a given environment (e.g., measured in terms of speed, durability, reliability, pressure, accuracy, efficiency). For software, ‘form’ means the design, logic flow, and algorithms. ‘Fit’ means the ability to interface or connect with an item subject to the EAR. The ‘function’ means the action or actions it performs directly to an item subject to the EAR or as a stand-alone application. ‘Performance capability’ means the measure of software’s effectiveness to perform a designated function.

**NOTE TO PARAGRAPHS (b)(3) AND (b)(4):** ECCNs controlled for AT-only reasons that use “specially designed” are eligible for paragraphs (b)(3) and (b)(4). However, the criteria for

release under (b)(3) or (b)(4) must be met by another ECCN controlled for AT-only reasons or an EAR99 item in addition to the AT-only ECCN being reviewed for release from “specially designed.” For example, if a single gasket is used in ECCN 9A990 tractors (9A990 includes a control on “specially designed” “parts”) and also pick-up trucks designated as EAR99 that are in “production”, the single gasket would be released from “specially designed” on the basis of paragraph (b)(3). Or if the single gasket is or was used in 9A990 tractors and also 9A991.b aircraft (another AT-only controlled ECCN), that are in “production,” the gasket would be released from “specially designed” on the basis of paragraph (b)(3). Alternatively, if the single gasket is or was only used in ECCN 9A990 tractors that are in “production,” then paragraph (b)(3) would not be available. This same concept applies for paragraph (b)(4).

**NOTE TO PARAGRAPHS (b)(4), (b)(5) AND (b)(6):** For a commodity or software to be not “specially designed” on the basis of paragraphs (b)(4), (b)(5) or (b)(6), documents contemporaneous with its “development,” in their totality, must establish the elements of paragraphs (b)(4), (b)(5) or (b)(6). Such documents may include concept design information, marketing plans, declarations in patent applications, or contracts. Absent such documents, the “commodity” may not be excluded from being “specially designed” by paragraphs (b)(4), (b)(5) or (b)(6).

“Specific modulus”. (Cat 1)--Young’s modulus in pascals, equivalent to  $N/m^2$ , divided by specific weight in  $N/m^3$ , measured at a temperature of  $(296 \pm 2) K$  ( $(23 \pm 2)^\circ C$ ) and a relative humidity of  $(50 \pm 5)\%$ .

“Specific tensile strength”. (Cat 1)--Ultimate tensile strength in pascals, equivalent to  $N/m^2$ , divided by specific weight in  $N/m^3$ , measured at a temperature of  $(296 \pm 2) K$  ( $(23 \pm 2)^\circ C$ ) and relative humidity of  $(50 \pm 5)\%$ .

“*Spectral efficiency*”. (Cat 5)--A figure of merit parametrized to characterize the efficiency of transmission system that uses complex modulation schemes such as QAM (quadrature amplitude modulation), Trellis coding, QSPK (Q-phased shift key), etc. It is defined as follows:

$$\text{“Spectral efficiency”} = \frac{\text{Digital transfer rate “ (bits/second) ”}}{\text{6 dB spectrum bandwidth (Hz).}}$$

“*Spinning mass gyros*”. (Cat 7) “Spinning mass gyros” are gyros which use a continually rotating mass to sense angular motion.

“*Spread spectrum*”. (Cat 5)--The technique whereby energy in a relatively narrow-band communication channel is spread over a much wider energy spectrum.

“*Spread spectrum radar*”. (Cat 6)--(see “Radar spread spectrum”)

“*Stability*”. (Cat 7) Standard deviation (1 sigma) of the variation of a particular parameter from its calibrated value measured under stable temperature conditions. This can be expressed as a function of time.

**Note to the Definition of “Stability”:** For gyroscopes and accelerometers, “stability” can be estimated by determining the Allan variance noise-analysis value at the integration period (i.e., sample time) consistent with the stated measurement period, which may include extrapolating the Allan variance noise analysis beyond the instability point into the rate/acceleration random walk or rate/acceleration ramp regions to an integration period consistent with the stated measurement period (Reference: IEEE Std. 952-1997 [R2008] or IEEE Std 1293-1998 [R2008]).

*Standard.* This term is equivalent to “standard” or “technical standard” as defined in Office of Management and Budget Circular A-119 (Rev.

2016) (81 FR 4673 (Jan. 27, 2016)), “Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities” section 2.a, available at [https://www.nist.gov/system/files/revise/circular\\_a-119\\_as\\_of\\_01-22-2016.pdf](https://www.nist.gov/system/files/revise/circular_a-119_as_of_01-22-2016.pdf).

*Standards organization.* This term is equivalent to “voluntary consensus standards body,” as defined in Office of Management and Budget Circular A-119 (Rev. 2016) (81 FR 4673 (Jan. 27, 2016)), “Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities” section 2.e, available at [https://www.nist.gov/system/files/revise/circular\\_a-119\\_as\\_of\\_01-22-2016.pdf](https://www.nist.gov/system/files/revise/circular_a-119_as_of_01-22-2016.pdf).

“*Steady State Mode*”. (Cat 9) The term ‘steady state mode’ defines engine operation conditions, where the engine parameters, such as thrust/power, rpm and others, have no appreciable fluctuations, when the ambient air temperature and pressure at the engine inlet are constant.

“*Stored program controlled*”. (Cat 2, 3, and 5)--A control using instructions stored in an electronic storage that a processor can execute in order to direct the performance of predetermined functions.

**NOTE:** Equipment may be “stored program controlled” whether the electronic storage is internal or external to the equipment.

“*Sub-orbital craft*”. (Cat 9) A craft having an enclosure designed for the transport of people or cargo, which is designed to:

- (1) Operate above the stratosphere;
- (2) Perform a non-orbital trajectory; and
- (3) Land back on Earth with the people or cargo intact.

*Subgroup on Nuclear Export Coordination*

(SNEC). Chaired by the Department of State, the SNEC primarily reviews applications involving items controlled for nuclear nonproliferation (NP) reasons. The SNEC also reviews applications involving items not controlled for NP reasons, but destined for a country and/or end-use/end-user of NP concern.

*Subject to the EAR.* A term used in the EAR to describe those commodities, software, technology, and activities over which the Bureau of Industry and Security (BIS) exercises regulatory jurisdiction under the EAR (see §734.2(a) of the EAR).

*Subject to the ITAR.* A term used in the EAR to describe those commodities, software, technology (e.g., technical data) and defense services over which the U.S. Department of State, Directorate of Defense Trade Controls (DDTC) exercises regulatory jurisdiction under the International Traffic in Arms Regulations (ITAR) (see 22 CFR parts 120 through 130).

*“Substrate”.* (Cat 3)--A sheet of base material with or without an interconnection pattern and on which or within which “discrete components” or integrated circuits or both can be located.

**NOTE:** *“Discrete component”:* a separately packaged “circuit element” with its own external connections.

*“Substrate blanks”.* (Cat 3 and 6)--Monolithic compounds with dimensions suitable for the production of optical elements such as mirrors or optical windows.

*“Superalloy”.* (Cat 2 and 9)--Nickel-, cobalt-, or iron-base alloys having strengths superior to any alloys in the AISI 300 series at temperatures over 922 K (649°C) under severe environmental and operating conditions.

*“Superconductive”.* (Cat 1, 3, 5P1, 6, and 8)-- Materials, i.e., metals, alloys, or compounds that can lose all electrical resistance, i.e., that can

attain infinite electrical conductivity and carry very large electrical currents without Joule heating.

**NOTE:** *The “superconductive” state of a material is individually characterized by a “critical temperature”, a critical magnetic field that is a function of temperature, and a critical current density that is a function of both magnetic field and temperature.*

*“Super High Power Laser” (SHPL)* (Cat 6)--A “laser” capable of delivering (the total or any portion of) the output energy exceeding 1 kJ within 50 ms or having an average or CW power exceeding 20 kW.

*“Superplastic forming”.* (Cat 1 and 2)--A deformation process using heat for metals that are normally characterized by low elongation (less than 20%) at the breaking point as determined at room temperature by conventional tensile strength testing, in order to achieve elongations during processing that are at least 2 times those values.

*“Symmetric algorithm”.* (Cat 5, part II) A cryptographic algorithm using an identical key for both encryption and decryption. A common use of “symmetric algorithms” is confidentiality of data.

*System.* This is any combination of “end items,” “equipment,” “parts,” “components,” “accessories,” “attachments,” firmware, or “software” that operate together to perform a function.

**NOTE:** *The industrial standards established by INCOSE and NASA provide examples for when commodities and software operate together to perform a function as a system. References to these standards are included in this note to provide additional examples for when commodities or software operate together to perform a function as a system. See the INCOSE standards for what constitutes a system at*

(<http://g2sebok.incose.org/app/mss/asset.cfm?ID=INCOSE%20G2SEBOK%202.00&ST=F>), and in the (INCOSE SE Handbook v3.1 2007; ISO/IEC 15288:2008). Also see the NASA standards for examples of what constitutes a system in the (NASA SE Handbook SP-2007-6105 Rev 1).

“*Technology*”. Technology means: Information necessary for the “development,” “production,” “use,” operation, installation, maintenance, repair, overhaul, or refurbishing (or other terms specified in ECCNs on the CCL that control “technology”) of an item.

*N.B.:* Controlled “technology” is defined in the General Technology Note and in the Commerce Control List (Supplement No. 1 to part 774 of the EAR).

**NOTE 1 TO DEFINITION OF Technology:** “technology” may be in any tangible or intangible form, such as written or oral communications, blueprints, drawings, photographs, plans, diagrams, models, formulae, tables, engineering designs and specifications, computer-aided design files, manuals or documentation, electronic media or information revealed through visual inspection;

**NOTE 2 TO DEFINITION OF Technology:** The modification of the design of an existing item creates a new item and technology for the modified design is technology for the development or production of the new item.

“*Terminal interface equipment*”. (Cat 4)-- Equipment at which information enters or leaves the telecommunication systems, e.g., telephone, data device, computer, facsimile device.

“*Three dimensional integrated circuit*”. (Cat 3) A collection of semiconductor dies or active device layers, integrated together, and having through semiconductor via connections passing completely through an interposer, substrate, die

or layer to establish interconnections between the device layers. An interposer is an interface that enables electrical connections.

“*Tilting spindle*”. (Cat 2)--A tool-handling spindle that alters, during the machining process, the angular position of its center line with respect to any other axis.

“*Time constant*”. (Cat 6)--The time taken from the application of a light stimulus for the current increment to reach a value of 1-1/e times the final value (i.e., 63% of the final value).

“*Tip shroud*” (Cat 9)—A stationary ring component (solid or segmented) attached to the inner surface of the engine turbine casing or a feature at the outer tip of the turbine blade, which primarily provides a gas seal between the stationary and rotating components.

“*Total control of flight*”. (Cat 7) means an automated control of “aircraft” state variables and flight path to meet mission objectives responding to real time changes in data regarding objectives, hazards or other “aircraft.”

“*Total digital transfer rate*”. (Cat 5)--The number of bits, including line coding, overhead and so forth per unit time passing between corresponding equipment in a digital transmission system. (see also “digital transfer rate”).

“*Toxins*”. (Cat 1 and 2) means toxins in the form of deliberately isolated preparations or mixtures, no matter how produced, other than toxins present as contaminants of other materials such as pathological specimens, crops, foodstuffs or seed stocks of “microorganisms.”

*Transfer*. A shipment, transmission, or release of items subject to the EAR either within the United States or outside the United States. For *In-country transfer / Transfer (in-country)*, see § 734.16 of the EAR.

**NOTE TO DEFINITION OF Transfer:** *This definition of “transfer” does not apply to § 750.10 of the EAR or Supplement No. 8 to part 760 of the EAR. The term “transfer” may also be included on licenses issued by BIS. In that regard, the changes that can be made to a BIS license are the non-material changes described in § 750.7(c) of the EAR. Any other change to a BIS license without authorization is a violation of the EAR. See § 750.7(c) and 764.2(e) of the EAR.*

“Tunable”. (Cat 6)--The ability of a “laser” to produce a continuous output at all wavelengths over a range of several “laser” transitions. A line selectable “laser” produces discrete wavelengths within one “laser” transition and is not considered “tunable”.

**U.S. person.**

(a) For purposes of §§740.21(e)(1), 744.6, 744.10, 744.11, 744.12, 744.13, and 744.14 of the EAR, the term U.S. person includes:

(1) Any individual who is a citizen of the United States, a permanent resident alien of the United States, or a protected individual as defined by 8 U.S.C. 1324b(a)(3);

(2) Any juridical person organized under the laws of the United States or any jurisdiction within the United States, including foreign branches; and

(3) Any person in the United States.

(b) See also §§ 740.9, 740.14, and 740.21(f)(2) and parts 746 and 760 of the EAR for definitions of “U.S. person” that are specific to those sections and parts.

*U.S. subsidiary.* As applied to encryption items, means:

(a) A foreign branch of a U.S. company; or

(b) A foreign subsidiary or entity of a U.S. entity in which:

(1) The U.S. entity beneficially owns or controls (whether directly or indirectly) 25 percent or more of the voting securities of the foreign subsidiary or entity, if no other persons owns or controls (whether directly or indirectly) an equal or larger percentage; or

(2) The foreign entity is operated by the U.S. entity pursuant to the provisions of an exclusive management contract; or

(3) A majority of the members of the board of directors of the foreign subsidiary or entity also are members of the comparable governing body of the U.S. entity; or

(4) The U.S. entity has the authority to appoint the majority of the members of the board of directors of the foreign subsidiary or entity; or

(5) The U.S. entity has the authority to appoint the chief operating officer of the foreign subsidiary or entity.

*Ultimate consignee.* The principal party in interest located abroad who receives the exported or reexported items. The ultimate consignee is not a forwarding agent or other intermediary, but may be the end-user.

“*Unidirectional positioning repeatability*” (Cat 2) The smaller of values  $R_{\uparrow}$  and  $R_{\downarrow}$  (forward and backward), as defined by 3.21 of ISO 230-2:2014 or national equivalents, of an individual machine tool axis.

*United States.* Unless otherwise stated, the 50 States, including offshore areas within their jurisdiction pursuant to section 3 of the Submerged Lands Act (43 U.S.C. 1311), the District of Columbia, Puerto Rico, and all territories, dependencies, and possessions of the United States, including foreign trade zones established pursuant to 19 U.S.C. 81A-81U, and also including the outer continental shelf, as

defined in section 2(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1331(a)).

*United States airline.* Any citizen of the United States who is authorized by the U.S. Government to engage in business as an airline. For purposes of this definition, a U.S. citizen is:

(a) An individual who is a citizen of the United States or one of its possessions; or

(b) A partnership of which each member is such an individual; or

(c) A corporation or association created or organized under the laws of the United States, or of any State, Territory, or possession of the United States, of which the president and two-thirds of the board of directors and other managing officers thereof are such individuals and in which at least 75 percent of the voting interest is owned or controlled by persons who are citizens of the United States or of one of its possessions.

*“Unmanned aerial vehicle” (“UAV”).* (Cat 9) Any “aircraft” capable of initiating flight and sustaining controlled flight and navigation without any human presence on board.

**Note to definition of “Unmanned aerial vehicle” (“UAV”):** For the purposes of § 744.3 of the EAR, unmanned air vehicles, which are the same as “unmanned aerial vehicles,” include, but are not limited to, cruise missiles, target drones and reconnaissance drones.

*“Usable in”, “usable for”, “usable as” or “capable of”.* (MTCR context)--Equipment, parts, components, materials or “software” which are suitable for a particular purpose. There is no need for the equipment, parts, components, materials or “software” to have been configured, modified or specified for the particular purpose. For example, any military specification memory circuit would be “capable of” operation in a

guidance system.

*“Use”.* (All categories and General Technology Note)--Operation, installation (including on-site installation), maintenance (checking), repair, overhaul and refurbishing.

**NOTE:** *If an ECCN specifies one or more of the six elements of “use” in the heading or control text, only those elements specified are classified under that ECCN.*

*“User-accessible programmability”.* (Cat 4, 5, and 6)--The facility allowing a user to insert, modify, or replace “programs” by means other than:

(a) A physical change in wiring or interconnections; or

(b) The setting of function controls including entry of parameters.

*Utilization facility.* (a) As defined by 10 CFR 110.2 of the Nuclear Regulatory Commission Regulations, utilization facility means a nuclear reactor, other than one that is a production facility, any of the following major components of a nuclear reactor: Pressure vessels designed to contain the core of a nuclear reactor, other than one that is a production facility, and the following major components of a nuclear reactor:

(1) Primary coolant pumps;

(2) Fuel charging or discharging machines; and

(3) **Control rods.** Utilization facility does not include the steam turbine generator portion of a nuclear power plant.

(b) Utilization facility does not include the steam turbine generator portion of a nuclear power plant.

*“Vacuum electronic devices”.* (Cat 3) Electronic

devices based on the interaction of an electron beam with an electromagnetic wave propagating in a vacuum circuit or interacting with radio-frequency vacuum cavity resonators. “Vacuum electronic devices” include klystrons, travelling-wave tubes, and their derivatives.

“*Vector Rate*”. (Cat 4)--See: “Two dimensional Vector Rate”; “Three dimensional Vector Rate”.

*You.* Any person, including a natural person, including a citizen of the United States or any foreign country; any firm; any government, government agency, government department, or government commission; any labor union; any fraternal or social organization; and any other association or organization whether or not organized for profit.

**§ 774.1 INTRODUCTION**

**(a) Scope of the control list**

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. The Bureau of Industry and Security (BIS) maintains the Commerce Control List (CCL) that includes “items” -- i.e., “commodities,” “software,” and “technology” -- subject to the authority of BIS. The CCL does not include items exclusively controlled for export by another department or agency of the U.S. Government, though in

instances where other agencies administer controls over related items, entries in the CCL may contain a reference to such controls. In addition, those items “subject to the EAR” but not identified on the CCL are identified by the designator “EAR99.” See § 734.2(a) of the EAR for items that are “subject to the EAR.” EAR Part 738 contains an explanation of the organization of the CCL and its relationship to the Country Chart.

**(b) (1) ECCN cross-references for items subject to exclusive jurisdiction of another agency.** Prior to October 15, 2013, the CCL contained certain ECCNs that were only included as cross references to items subject to the export control regulations administered by the Nuclear Regulatory Commission.

(2) ECCNs formerly listed on the CCL that, as of October 15, 2013 were subject to the export licensing authority of the Nuclear Regulatory Commission at 10 CFR part 110 are: 0A001, 0B001, 0B002, 0B003, 0B004, 0B005, 0B006, 0C001, 0C002, 0C004, 0C005, 0C006, 0C201 and 1C012.

(3) The following multilateral export control regime reference is provided, as an additional point of historical reference: 0C201 - INFCIRC 254 Part 1, 5.3.1(b).

*Note to paragraph (b): ECCNs 0D001 and 0E001 are “subject to the ITAR” (see 22 CFR parts 120 through 130). These ECCNs are retained on the CCL as cross references to the ITAR, although the former cross references to export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110) for ECCN 0D001, and to the Department of Energy (see 10 CFR part 810) for 0E001 were removed from the Control(s) paragraph in the License Requirements section of these two ECCNs and added as a more general jurisdictional cross reference in a heading note added to these two ECCNs as of June 5, 2014.*

**(c) *Where to find the CCL?***

The CCL is contained in Supplement No. 1 to this part, and Supplement No. 2 to this part contains the General Technology and Software Notes relevant to entries contained in the CCL.

**(d) *Conventions related to the use of quotation marks on the CCL***

The use of double quotation marks on the CCL is intended to be an aid to alert you to terms used on the CCL that are defined in part 772 (Definitions of Terms), or for purposes of ECCNs, where a definition is provided in the “related definitions” paragraph in the License Requirements section of ECCNs or sometimes in Notes and Technical Notes for particular ECCNs and that definition is specific to that particular ECCN. In this sense the quotes are helpful both in the use of single and double quotes, but a good compliance practice is to familiarize yourself with the defined terms in part 772, and when reviewing a control parameter on the CCL that uses a term that is not in quotes to be aware it may be defined in part 772. It is also a useful compliance practice to review the “Related Definitions” paragraph and Notes and Technical Notes to determine if the term is defined for purposes of a particular ECCN.

**(1) Use of double quotes.** If a term on the CCL uses double quotes it means there is a defined term in part 772. However, the absence of double quotes does not mean that a term used on the CCL is not defined in part 772. Because the CCL includes many terms that are defined in part 772, BIS’s practice is to use double quotes for certain

key terms and to use double quotes when needed for consistency with multilateral export control regime based entries, such as many derived from control lists, in particular for the Wassenaar Arrangement that also uses the double quotes convention. However, because of the large number of defined terms used on the CCL and a desire to avoid hindering readability by placing quotes around too many words used in particular ECCNs, BIS’s practice is to not add double quotes around certain terms, such as items and commodities. This convention also applies to the use of double quotes within the Definition of Terms section under part 772.

**(2) Use of single quotes.** The CCL also includes a convention regarding the use of single quotes. Single quotes on the CCL identify a term as a defined term in the context of a particular ECCN. This convention also applies to the use of single quotes within the Definition of Terms section under part 772.

**(e) *Chemicals identified by Chemical Abstracts Service (CAS) number***

In some instances chemicals are listed by name and CAS number. The list applies to chemicals of the same structural formula (including hydrates) regardless of name or CAS number. CAS numbers are shown to assist in identifying a particular chemical or mixture, irrespective of nomenclature. CAS numbers cannot be used as unique identifiers because some forms of the listed chemical have different CAS numbers, and mixtures containing a listed chemical may also have different CAS numbers.

**§774.2 [RESERVED]**

**THE COMMERCE CONTROL LIST**

**CATEGORY 0 - NUCLEAR MATERIALS, FACILITIES, AND EQUIPMENT [AND MISCELLANEOUS ITEMS]**

UN applies to entire entry	See § 746.1 of the EAR for UN controls
AT applies to entire entry	AT Column 1

**A. "END ITEMS," "EQUIPMENT," "ACCESSORIES," "ATTACHMENTS," "PARTS," "COMPONENTS," AND "SYSTEMS"**

**License Requirement Note:** In addition to using the Commerce Country Chart to determine license requirements, a license is required for exports and reexports of ECCN 0A501.y.7 firearms to the People’s Republic of China.

**\*\*0A002** Power generating or propulsion equipment “specially designed” for use with space, marine or mobile “nuclear reactors”. (These items are “subject to the ITAR.” See 22 CFR parts 120 through 130.)

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$500 for 0A501.c, .d, and .x. \$500 for 0A501.c, .d, .e, and .x if the ultimate destination is Canada.  
*GBS:* N/A

**\*\*0A018** Items on the Wassenaar Munitions List (see List of Items Controlled).

**Special conditions for STA**

*STA:* Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in this entry.

No items currently are in this ECCN. See ECCN 0A505 for “parts” and “components” for ammunition that, immediately prior to March 9, 2020, were classified under 0A018.b.

0A018.d used to be "Military \*\*helmets, except...". Now moved to 1A613.

**List of Items Controlled**

**Related Controls:** (1) Firearms that are fully automatic, and magazines with a capacity of greater than 50 rounds, are “subject to the ITAR.” (2) See ECCN 0A502 for shotguns and their “parts” and “components” that are subject to the EAR. Also see ECCN 0A502 for shot-pistols. (3) See ECCN 0A504 and USML Category XII for controls on optical sighting devices.

**\*\*0A501** Firearms (except 0A502 shotguns) and related commodities as follows (see List of Items controlled).

**Related Definitions:** N/A  
**Items:**

**License Requirements**

*Reason for Control:* NS, RS, FC, UN, AT

a. Non-automatic and semi-automatic firearms equal to .50 caliber (12.7 mm) or less.

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry except 0A501.y	NS Column 1
RS applies to entire entry except 0A501.y	RS Column 1
FC applies to entire entry except 0A501.y	FC Column 1

**Note 1 to paragraph 0A501.a:** ‘Combination pistols’ are controlled under ECCN 0A501.a. A ‘combination pistol’ (a.k.a., a combination gun)

*has at least one rifled barrel and at least one smoothbore barrel (generally a shotgun style barrel).*

b. Non-automatic and non-semi-automatic rifles, carbines, revolvers or pistols with a caliber greater than .50 inches (12.7 mm) but less than or equal to .72 inches (18.0 mm).

c. The following types of “parts” and “components” if “specially designed” for a commodity controlled by paragraph .a or .b of this entry, or USML Category I (unless listed in USML Category I(g) or (h)): barrels, cylinders, barrel extensions, mounting blocks (trunnions), bolts, bolt carriers, operating rods, gas pistons, trigger housings, triggers, hammers, sears, disconnectors, pistol grips that contain fire control “parts” or “components” (e.g., triggers, hammers, sears, disconnectors) and buttstocks that contain fire control “parts” or “components.”

d. Detachable magazines with a capacity of greater than 16 rounds “specially designed” for a commodity controlled by paragraph .a or .b of this entry.

*Note 2 to paragraph 0A501.d: Magazines with a capacity of 16 rounds or less are controlled under 0A501.x.*

e. Receivers (frames) and “complete breech mechanisms,” including castings, forgings stampings, or machined items thereof, “specially designed” for a commodity controlled by paragraph .a or .b of this entry.

f. through w. [Reserved]

x. “Parts” and “components” that are “specially designed” for a commodity classified under paragraphs .a through .c of this entry or the USML and not elsewhere specified on the USML or CCL.

y. Specific “parts,” “components,” “accessories” and “attachments” “specially designed” for a commodity subject to control in

this ECCN or common to a defense article in USML Category I and not elsewhere specified in the USML or CCL as follows, and “parts,” “components,” “accessories,” and “attachments” “specially designed” therefor.

y.1. Stocks or grips, that do not contain any fire control “parts” or “components” (e.g., triggers, hammers, sears, disconnectors);”

y.2. Scope mounts or accessory rails;

y.3. Iron sights;

y.4. Sling swivels;

y.5. Butt plates or recoil pads;

y.6. Bayonets; and

y.7. Firearms manufactured from 1890 to 1898 and reproductions thereof.

*Technical Note 1 to 0A501: The controls on “parts” and “components” in ECCN 0A501 include those “parts” and “components” that are common to firearms described in ECCN 0A501 and to those firearms “subject to the ITAR.”*

*Note 3 to 0A501: Antique firearms (i.e., those manufactured before 1890) and reproductions thereof, muzzle loading black powder firearms except those designs based on centerfire weapons of a post 1937 design, BB guns, pellet rifles, paint ball, and all other air rifles are EAR99 commodities.*

*Note 4 to 0A501: Muzzle loading (black powder) firearms with a caliber less than 20 mm that were manufactured later than 1937 that are used for hunting or sporting purposes that were not “specially designed” for military use and are not “subject to the ITAR” nor controlled as shotguns under ECCN 0A502 are EAR99 commodities.*

**\*\*0A502** Shotguns; shotguns “parts” and “components,” consisting of complete trigger mechanisms; magazines and magazine extension tubes; “complete breech mechanisms;” except equipment used exclusively to treat or tranquilize animals, and except arms designed solely for signal, flare, or saluting use.

**License Requirements**

*Reason for Control:* RS, CC, FC, UN, AT, NS

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to shotguns with a barrel length less than 18 inches (45.72 cm)	NS Column 1
RS applies to shotguns with a barrel length less than 18 inches (45.72 cm)	RS Column 1
FC applies to entire entry	FC Column 1
CC applies to shotguns with a barrel length less than 24 in. (60.96 cm) and shotgun “components” controlled by this entry regardless of end user	CC Column 1
CC applies to shotguns with a barrel length greater than or equal to 24 in. (60.96 cm), regardless of end user	CC Column 2
CC applies to shotguns with a barrel length greater than or equal to 24 in. (60.96 cm) if for sale or resale to police or law enforcement	CC Column 3
UN applies to entire entry	See § 746.1(b) of the EAR for UN controls
AT applies to shotguns with a barrel length less than 18 inches (45.72 cm)	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$500 for 0A502 shotgun “parts” and “components,” consisting of complete trigger mechanisms; magazines and magazine extension tubes. \$500 for 0A502 shotgun “parts” and “components,” consisting of complete trigger mechanisms; magazines and magazine extension tubes, “complete breech mechanisms” if the ultimate destination is Canada.  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* Shotguns that are fully automatic are “subject to the ITAR.”

*Related Definitions:* N/A

*Items:* The list of items controlled is contained in the ECCN heading.

*Note 1 to 0A502:* Shotguns made in or before 1898 are considered antique shotguns and designated as EAR99.

*Technical Note:* Shot pistols or shotguns that have had the shoulder stock removed and a pistol grip attached are controlled by ECCN 0A502. Slug guns are also controlled under ECCN 0A502.

**\*\*0A503** Discharge type arms; non-lethal or less-lethal grenades and projectiles, and “specially designed” “parts” and “components” of those projectiles; and devices to administer electric shock, for example, stun guns, shock batons, shock shields, electric cattle prods, immobilization guns and projectiles; except equipment used exclusively to treat or tranquilize animals, and except arms designed solely for signal, flare, or saluting use; and “specially designed” “parts” and “components,” n.e.s.

**License Requirements**

*Reason for Control:* CC, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
CC applies to entire entry	A license is required for ALL destinations, except Canada, regardless of end use. Accordingly, a column specific to this control does not appear on the Commerce Country Chart. (See part 742 of the EAR for additional information).
UN applies to entire entry	See § 746.1(b) of the EAR for UN controls

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* Law enforcement restraint devices that administer an electric shock are controlled under ECCN 0A982. Electronic devices that monitor and report a person’s location to enforce restrictions on movement for law enforcement or penal reasons are controlled under ECCN 3A981.

*Related Definitions:* N/A  
*Items:* The list of items controlled is contained in the ECCN heading.

**\*\*0A504 Optical sighting devices for firearms (including shotguns controlled by 0A502); and**

**“components” as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* FC, RS, CC, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
RS applies to paragraph .i	RS Column 1
FC applies to paragraphs .a, .b, .c, d, .e, .g, and .i of this entry	FC Column 1
CC applies to entire entry	CC Column 1
UN applies to entire entry	See §746.1(b) of the EAR for UN controls

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$500 for 0A504.g.  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See USML Category XII(c) for sighting devices using second generation image intensifier tubes having luminous sensitivity greater than 350 μA/lm, or third generation or higher image intensifier tubes, that are “subject to the ITAR.” (2) See USML Category XII(b) for laser aiming or laser illumination systems “subject to the ITAR.” (3) Section 744.9 of the EAR imposes a license requirement on certain commodities described in 0A504 if being exported, reexported, or transferred (in-country) for use by a military end-user or for incorporation into an item controlled by ECCN 0A919.

*Related Definitions:* N/A  
*Items:*

- a. Telescopic sights.

- b. Holographic sights.
- c. Reflex or “red dot” sights.
- d. Reticle sights.
- e. Other sighting devices that contain optical elements.
- f. Laser aiming devices or laser illuminators “specially designed” for use on firearms, and having an operational wavelength exceeding 400 nm but not exceeding 710 nm.

*Note 1 to 0A504.f: 0A504.f does not control laser boresighting devices that must be placed in the bore or chamber to provide a reference for aligning the firearms sights.*

- g. Lenses, other optical elements and adjustment mechanisms for articles in paragraphs .a, .b, .c, .d, .e, or .i.
- h. [Reserved]
- i. Riflescopes that were not “subject to the EAR” as of March 8, 2020 and are “specially designed” for use in firearms that are “subject to the ITAR.”

*Note 2 to paragraph i:* For purpose of the application of “specially designed” for the riflescopes controlled under 0A504.i, paragraph (a)(1) of the definition of “specially designed” in § 772.1 of the EAR is what is used to determine whether the riflescope is “specially designed.”

**\*\*0A505 Ammunition as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, RS, CC, FC, UN, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to 0A505.a and .x	NS Column 1
RS applies to 0A505.a and .x	RS Column 1
CC applies to 0A505.b	CC Column 1
FC applies to entire entry except 0A505.d	FC Column 1
UN applies to entire entry	See § 746.1 of the EAR for UN controls
AT applies to 0A505.a, .d, and .x	AT Column 1
AT applies to 0A505.c	A license is required for items controlled by paragraph .c of this entry to North Korea for anti-terrorism reasons. The Commerce Country Chart is not designed to determine AT licensing requirements for this entry. See §742.19 of the EAR for additional information.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$500 for items in 0A505.x, except \$3,000 for items in 0A505.x that, immediately prior to March 9, 2020, were classified under 0A018.b. (*i.e.*, “Specially designed” components and parts for ammunition, except cartridge cases, powder bags, bullets, jackets, cores, shells, projectiles, boosters, fuses and components, primers, and other detonating devices and ammunition belting and linking machines (all of which are “subject to the ITAR”). (See 22 CFR parts 120 through 130))

*GBS:* N/A

**Special conditions for STA**

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 0A505.

control in this ECCN or a defense article in USML Category III and not elsewhere specified on the USML, the CCL or paragraph .d of this entry.

### List of Items Controlled

*Related Controls:* (1) Ammunition for modern heavy weapons such as howitzers, artillery, cannon, mortars and recoilless rifles as well as inherently military ammunition types such as ammunition preassembled into links or belts, caseless ammunition, tracer ammunition, ammunition with a depleted uranium projectile or a projectile with a hardened tip or core and ammunition with an explosive projectile are “subject to the ITAR.” (2) Percussion caps, and lead balls and bullets, for use with muzzle-loading firearms are EAR99 items.

*Note 2 to 0A505.x:* The controls on “parts” and “components” in this entry include Berdan and boxer primers, metallic cartridge cases, and standard metallic projectiles such as full metal jacket, lead core, and copper projectiles.

*Note 3 to 0A505.x:* The controls on “parts” and “components” in this entry include those “parts” and “components” that are common to ammunition and ordnance described in this entry and to those enumerated in USML Category III.

*Related Definitions:* N/A

*Items:*

*Note 4 to 0A505:* Lead shot smaller than No. 4 Buckshot, empty and unprimed shotgun shells, shotgun wads, smokeless gunpowder, ‘Dummy rounds’ and blank rounds (unless linked or belted), not incorporating a lethal or non-lethal projectile(s) are designated EAR99. A ‘dummy round or drill round’ is a round that is completely inert, i.e., contains no primer, propellant, or explosive charge. It is typically used to check weapon function and for crew training.

a. Ammunition for firearms controlled by ECCN 0A501 or USML Category I and not enumerated in paragraph .b, .c, or .d of this entry or in USML Category III.

b. Buckshot (No. 4 .24” diameter and larger) shotgun shells.

c. Shotgun shells (including less than lethal rounds) that do not contain buckshot; and “specially designed” “parts” and “components” of shotgun shells.

*Note 1 to 0A505.c:* Shotgun shells that contain only chemical irritants are controlled under ECCN 1A984.

d. Blank ammunition for firearms controlled by ECCN 0A501 and not enumerated in USML Category III.

e. through w. [Reserved]

x. “Parts” and “components” that are “specially designed” for a commodity subject to

**\*\*0A521** Any commodity subject to the EAR that is not listed elsewhere in the CCL, but which is controlled for export because it provides at least a significant military or intelligence advantage to the United States or for foreign policy reasons.

0A521 commodities are subject to RS1 controls with no license exception eligibility other than License Exception GOV for U.S. Government personnel and agencies under §740.11(b)(2)(ii) of the EAR, or an item-specific license exception identified in Supplement No. 5 to part 774 particular to an item covered under ECCN 0A521. The list of commodities determined to be classified under ECCN 0A521 controls is published in Supplement No. 5 to part

774. The license requirements and licensing policy relating to ECCN 0A521 are set forth in § 742.6(a)(8) of the EAR.

**\*\*0A602 Guns and Armament as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, RS, UN, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
RS applies to entire entry	RS Column 1
UN applies to entire entry	See § 746.1 of the EAR for UN controls
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: \$500  
GBS: N/A

**Special conditions for STA**

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 0A602.

**List of Items Controlled**

*Related Controls:* (1) Modern heavy weapons such as howitzers, artillery, cannon, mortars, and recoilless rifles are “subject to the ITAR.” (2) See ECCN 0A919 for foreign-made “military commodities” that incorporate more than a *de minimis* amount of U.S.-origin “600 series” items. (3) See ECCN 0A606 for engines that are “specially designed” for a self-propelled gun or howitzer subject to control under paragraph .a of this ECCN or USML Category VII.

*Related Definitions:* N/A

*Items:*

a. Guns and armament manufactured between 1890 and 1919.

b. Military flame throwers with an effective range less than 20 meters.

c. through w. [Reserved]

x. “Parts” and “components” that are “specially designed” for a commodity subject to control in paragraphs .a or .b of this ECCN or a defense article in USML Category II and not elsewhere specified on the USML or the CCL.

*Note 1 to 0A602.x:* Engines that are “specially designed” for a self-propelled gun or howitzer subject to control under paragraph .a of this ECCN or a defense article in USML Category VII are controlled under ECCN 0A606.x.

*Note 2 to 0A602:* “Parts,” “components,” “accessories,” and “attachments” specified in USML subcategory II(j) are subject to the controls of that paragraph.

*Note 3 to 0A602:* Black powder guns and armament manufactured in or prior to 1890 and replicas thereof designed for use with black powder propellants are designated EAR99.

**\*\*0A604 Commodities related to military explosive devices and charges (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>

NS applies to entire entry	NS Column 1
RS applies to entire entry	RS Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**Special Conditions for STA**

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in this ECCN 0A604.

**List of Items Controlled**

*Related Controls:* (1) Torpedoes, bombs, and mines are “subject to the ITAR” (see 22 CFR § 121.1, USML Category IV). (2) Smoke bombs, non-irritant smoke flares, canisters, grenades and charges, and other pyrotechnical articles having both military and commercial applications are controlled by ECCN 1A984. (3) Certain explosive detonator firing sets, electrically driven explosive detonators, and detonators and multipoint initiation systems are controlled by ECCN 1A007 or ECCN 3A232. (4) See ECCN 0A919 for foreign-made “military commodities” that incorporate more than a *de minimis* amount of U.S.-origin “600 series” controlled content.

*Related Definitions:* N/A  
*Items:*

- a. Demolition blocks, and detonators designed, modified, or adapted therefor.
- b. Military explosive excavating devices.

*Note to 0A604.a and .b:* This entry does not control the detonators and other items described in ECCN 1A007 or ECCN 3A232.

c. Smoke hand grenades and stun hand grenades (e.g., “flashbangs”) not controlled by ECCN 1A984.

d. through w. [Reserved]

x. “Parts,” “components,” “accessories,” and “attachments” that are “specially designed” for a commodity subject to control in paragraphs .a through .c of this ECCN, or for a defense article controlled under USML Category IV, and not specified elsewhere on the USML.

*Note to 0A604.x:* “Parts,” “components,” “accessories,” and “attachments” specified in USML Category IV(h) are subject to the controls of that paragraph.

**\*\*0A606 Ground vehicles and related commodities, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, RS, AT, UN

Control(s)	Country Chart (See Supp. No. 1 to part 738)

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: \$1500

GBS: N/A

**Special Conditions for STA**

STA: (1) Paragraph (c)(1) of License Exception STA (§ 740.20(c)(1) of the EAR) may not be used for any item in 0A606.a, unless determined by BIS to be eligible for License Exception STA in accordance with §740.20(g) (License Exception STA eligibility requests for 9x515 and “600 series” items). (2) Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 0A606.

**List of Items Controlled**

*Related Controls:* (1) The ground vehicles, other articles, technical data (including software) and services described in 22 CFR part 121, Category VII are subject to the jurisdiction of the International Traffic in Arms Regulations. (2) See ECCN 0A919 for foreign-made “military commodities” that incorporate more than a de minimis amount of U.S.-origin “600 series” controlled content.

*Related Definitions:* N/A

*Items:*

a. Ground vehicles, whether manned or unmanned, “specially designed” for a military use and not enumerated or otherwise described in USML Category VII.

**Note 1 to paragraph .a:** For purposes of paragraph .a, “ground vehicles” include (i) tanks and armored vehicles manufactured prior to 1956 that have not been modified since 1955 and that do not contain a functional weapon or a

*weapon capable of becoming functional through repair; (ii) military railway trains except those that are armed or are “specially designed” to launch missiles; (iii) unarmored military recovery and other support vehicles; (iv) unarmored, unarmed vehicles with mounts or hard points for firearms of .50 caliber or less; and (v) trailers “specially designed” for use with other ground vehicles enumerated in USML Category VII or ECCN 0A606.a, and not separately enumerated or otherwise described in USML Category VII. For purposes of this note, the term “modified” does not include incorporation of safety features required by law, cosmetic changes (e.g., different paint or repositioning of bolt holes) or addition of “parts” or “components” available prior to 1956.*

**Note 2 to paragraph .a:** A ground vehicle’s being “specially designed” for military use for purposes of determining controls under paragraph .a. entails a structural, electrical or mechanical feature involving one or more “components” that are “specially designed” for military use. Such “components” include:

- a. Pneumatic tire casings of a kind “specially designed” to be bullet-proof;
- b. Armored protection of vital “parts” (e.g., fuel tanks or vehicle cabs);
- c. Special reinforcements or mountings for weapons;
- d. Black-out lighting.

b. Other ground vehicles, “parts” and “components,” as follows:

b.1. Unarmed vehicles that are derived from civilian vehicles and that have all of the following:

b.1.a. Manufactured or fitted with materials or “components” other than reactive or electromagnetic armor to provide ballistic protection to level III (National Institute of Justice standard 0108.01, September 1985) or better;

b.1.b. A transmission to provide drive to both front and rear wheels simultaneously, including those vehicles having additional wheels for load bearing purposes whether driven or not;

b.1.c. Gross vehicle weight rating (GVWR) greater than 4,500 kg; *and*

b.1.d. Designed or modified for off-road use.

b.2. “Parts” and “components” having all of the following:

b.2.a. “Specially designed” for vehicles specified in paragraph .b.1 of this entry; *and*

b.2.b. Providing ballistic protection to level III (National Institute of Justice standard 0108.01, September 1985) or better.

**Note 1 to paragraph b:** *Ground vehicles otherwise controlled by 0A606.b.1 that contain reactive or electromagnetic armor are subject to the controls of USML Category VII.*

**Note 2 to paragraph b:** *ECCN 0A606.b.1 does not control civilian vehicles “specially designed” for transporting money or valuables.*

**Note 3 to paragraph b:** *“Unarmed” means not having installed weapons, installed mountings for weapons, or special reinforcements for mounts for weapons.*

c. Air-cooled diesel engines and engine blocks for armored vehicles that weigh more than 40 tons.

d. Fully automatic continuously variable transmissions for tracked combat vehicles.

e. Deep water fording kits “specially designed” for ground vehicles controlled by ECCN 0A606.a or USML Category VII.

f. Self-launching bridge “components” not enumerated in USML Category VII(g) “specially designed” for deployment by ground vehicles enumerated in USML Category VII or this ECCN.

g. through w. [Reserved]

x. “Parts,” “components,” “accessories,” and “attachments” that are “specially designed” for a commodity enumerated or otherwise described in ECCN 0A606 (other than 0A606.b or 0A606.y) or a defense article enumerated in USML Category VII and not elsewhere specified on the USML or in 0A606.y.

**Note 1:** *Forgings, castings, and other unfinished products, such as extrusions and machined bodies, that have reached a stage in manufacture where they are clearly identifiable by mechanical properties, material composition, geometry, or function as commodities controlled by ECCN 0A606.x are controlled by ECCN 0A606.x.*

**Note 2:** *“Parts,” “components,” “accessories” and “attachments” enumerated in USML paragraph VII(g) are subject to the controls of that paragraph. “Parts,” “components,” “accessories” and “attachments” described in ECCN 0A606.y are subject to the controls of that paragraph.*

y. Specific “parts,” “components,” “accessories,” and “attachments” “specially designed” for a commodity enumerated or otherwise described in this ECCN (other than ECCN 0A606.b) or for a defense article in USML Category VII and not elsewhere specified on the USML or the CCL, as follows, and “parts,” “components,” “accessories,” and “attachments” “specially designed” therefor:

y.1. Brake discs, rotors, drums, calipers, cylinders, pads, shoes, lines, hoses, vacuum boosters, and parts therefor;

- y.2. Alternators and generators;
- y.3. Axles;
- y.4. Batteries;
- y.5. Bearings (*e.g.*, ball, roller, wheel);
- y.6. Cables, cable assemblies, and connectors;
- y.7. Cooling system hoses;
- y.8. Hydraulic, fuel, oil, and air filters, not controlled by ECCN 1A004;
- y.9. Gaskets and o-rings;
- y.10. Hydraulic system hoses, fittings, couplings, adapters, and valves;
- y.11. Latches and hinges;
- y.12. Lighting systems, fuses, and “components;”
- y.13. Pneumatic hoses, fittings, adapters, couplings, and valves;
- y.14. Seats, seat assemblies, seat supports, and harnesses;
- y.15. Tires, except run flat; and
- y.16. Windows, except those for armored vehicles.

**\*\*0A614** Military training “equipment,” as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>

**Special Conditions for STA**

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 0A617.

**List of Items Controlled**

*Related Controls:* (1) Defense articles, such as materials made from classified information, that are controlled by USML Category XIII, and technical data (including software) directly related thereto, are subject to the ITAR. (2) See ECCN 0A919 for foreign-made “military commodities” that incorporate more than a *de minimis* amount of U.S.-origin “600 series” controlled content. (3) For controls on self-contained diving and underwater swimming apparatus and related commodities, see ECCN 8A620.f. (4) For controls on robots, robot controllers, and robot end-effectors, see USML Category VII and ECCNs 0A606 and 2B007. (5) “Libraries,” *i.e.*, parametric technical databases, “specially designed” for military use with equipment controlled by the USML or a “600 series” ECCN are controlled by the technical data and technology controls pertaining to such items. (6) For controls on nuclear power generating equipment or propulsion equipment, including “nuclear reactors,” “specially designed” for military use, and “parts” and “components” “specially designed” therefor, see USML Categories VI, XIII, XV, and XX. (7) Simulators “specially designed” for military “nuclear reactors” are controlled by USML Category IX(b). (8) See USML

Categories X, XI and XII for “laser” protection equipment (e.g., eye and sensor protection) “specially designed” for military use. (9) “Fuel cells” “specially designed” for a defense article on the USML or a commodity controlled by a “600 series” ECCN are controlled according to the corresponding “600 series” ECCN for such end items. (10) See USML Category XV for controls on fuel cells “specially designed” for satellite or spacecraft.

*Related Definitions:* N/A

*Items:*

- a. [Reserved]
- b. Concealment and deception equipment “specially designed” for military application, including special paints, decoys, smoke or obsuration equipment and simulators, and “parts,” “components,” “accessories,” and “attachments” “specially designed” therefor, not controlled by USML Category XIII.
- c. Ferries, bridges not described in ECCN 0A606 or USML Category VII, and pontoons, “specially designed” for military use.
- d. Test models “specially designed” for the “development” of defense articles controlled by USML Categories IV, VI, VII and VIII.
- e. [Reserved]
- f. “Metal embrittlement agents.”
- g. through x. [Reserved]
- y. Other commodities as follows, and “parts,” “components,” “accessories,” and “attachments” “specially designed” therefore:

y.1. Construction equipment “specially designed” for military use, including such

equipment “specially designed” for transport in aircraft controlled by USML VIII(a) or ECCN 9A610.a.

y.2. “Parts,” “components,” “accessories,” and “attachments” “specially designed” for commodities in paragraph .y.1 of this entry, including crew protection kits used as protective cabs.

y.3. ISO intermodal containers or demountable vehicle bodies (i.e., swap bodies), n.e.s., “specially designed” or ‘modified’ for shipping or packing defense articles or items controlled by a “600 series” ECCN.

**Technical Note:** For the purpose of 0A617.y.3, ‘modified’ means any structural, electrical, mechanical, or other change that provides a non-military item with military capabilities equivalent to an item which is “specially designed” for military use.

y.4. Field generators “specially designed” for military use.

y.5. Power controlled searchlights and control units therefor, “specially designed” for military use, and “equipment” mounting such units.

**\*\*0A919** “Military commodities” located and produced outside the United States as follows (see list of items controlled).

**List of Items Controlled**

*Related Controls:* (1) “Military commodities” are subject to the export licensing jurisdiction of the Department of State if they incorporate items that are subject to the International Traffic in Arms Regulations (ITAR) (22 CFR Parts 120 - 130). (2) “Military commodities” described in this paragraph are subject to the export licensing jurisdiction of the Department of State if such commodities are described on the U.S. Munitions List (22 CFR Part 121) and are in the United States. (3) The furnishing of assistance (including training) to foreign persons, whether in the United States or abroad, in the design, development, engineering, manufacture, production, assembly, testing, repair, maintenance, modification, operation, demilitarization, destruction, processing, or use of defense articles that are subject to the ITAR; or the furnishing to foreign persons of any technical data controlled under 22 CFR 121.1 whether in the United States or abroad are under the licensing jurisdiction of the Department of State. (4) Brokering activities (as defined in 22 CFR 129) of “military commodities” that are subject to the ITAR are under the licensing jurisdiction of the Department of State.

*Related Definitions:* “Military commodity” or “military commodities” means an article, material or supply that is described on the U.S. Munitions List (22 CFR Part 121) or on the Munitions List that is published by the Wassenaar Arrangement on Export Controls for Conventional Arms and Dual-Use Goods

and Technologies (i.e., the Wassenaar Arrangement Munitions List (WAML)), but does not include software, technology, any item listed in any ECCN for which the last three numerals are 018, or any item in the “600 series.”

*Items:*

a. “Military commodities” produced and located outside the United States that are not subject to the International Traffic in Arms Regulations (22 CFR parts 120-130) and having any of the following characteristics:

a.1. Incorporate more than a *de minimis* amount of U.S.-origin controlled content classified under ECCNs 6A002, 6A003, or 6A993.a (having a maximum frame rate equal to or less than 9 Hz and thus meeting the criterion of Note 3.a to 6A003.b.4);

a.2. Incorporate more than a *de minimis* amount of U.S.-origin “600 series” controlled content (see §734.4 of the EAR); *or*

a.3. Are direct products of U.S.-origin “600 series” technology or software (see § 736.2(b)(3) of the EAR).

b. [Reserved]

**\*\*0A977 Water cannon systems for riot or crowd control, and “parts” and “components” “specially designed” therefor.**

**License Requirements**

*Reason for Control:* CC 1

	<b>Country Chart (See Supp. No. 1 to part 738)</b>
CC applies to entire entry	CC Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**Special Conditions for STA**

STA: License Exception STA may not be used for 0A977.

**List of Items Controlled**

Related Controls: N/A  
 Related Definitions: N/A

Items: The list of items controlled is contained in the ECCN heading.

**Note:** 0A977 water cannon systems include, for example: vehicles or fixed stations equipped with remotely operated water cannon that are designed to protect the operator from an outside riot with features such as armor, shatter resistant windows, metal screens, bull-bars, or run-flat tires. Components “specially designed” for water cannons may include, for example: deck gun water nozzles, pumps, reservoirs, cameras, and lights that are hardened or shielded against projectiles, elevating masts for those items, and teleoperation systems for those items.

**\*\*0A978 Law enforcement striking weapons, including saps, police batons, side handle batons, tonfas, sjamboks, and whips.**

**License Requirements**

Reason for Control: CC

Control(s)	Country Chart (See Supp. No. 1 to part 738)
CC applies to entire entry	CC Column 1

**List of Items Controlled**

Related Controls: N/A  
 Related Definitions: N/A  
 Items:

The list of items controlled is contained in the ECCN heading.

**\*\*0A980 Horses by sea.**

**License Requirements**

Reason for Control: SS

Control(s)

SS applies to entire entry. For licensing requirements (and possible License Exceptions) proceed directly to part 754 of the EAR. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for SS reasons.

### List of Items Controlled

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*0A981** Equipment designed for the execution of human beings as follows (see List of Items Controlled).

### License Requirements

*Reason for Control:* CC

*Control(s)*

CC applies to entire entry. A license is required for ALL destinations regardless of end-use. Accordingly, a column specific to this control does not appear on the Commerce Country Chart. (See §742.7 of the EAR for additional information.)

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

### List of Items Controlled

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

a. Gallows and guillotines.

b. Electric chairs for the purpose of executing human beings.

c. Air tight vaults designed for the execution of human beings by the administration of a lethal gas or substance.

d. Automatic drug injection systems designed for the execution of human beings by administration of a lethal substance.

**\*\*0A982** Law enforcement restraint devices, including leg irons, shackles, and handcuffs; straight jackets; stun cuffs; shock belts; shock sleeves; multipoint restraint devices such as restraint chairs; and “specially designed” “parts,” “components” and “accessories,” n.e.s.

### License Requirements

*Reason for Control:* CC

*Control(s)*

CC applies to entire entry. A license is required for ALL destinations, except Canada, regardless of end-use. Accordingly, a column specific to this control does not appear on the Commerce Country Chart. (See part 742 of the EAR for additional information.)

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

### List of Items Controlled

*Related Controls:* Thumbcuffs and handcuffs are classified under ECCN [0A983](#), “specially designed” implements of torture. Restraint devices that electronically monitor or report the location of confined persons for law enforcement or penal reasons are controlled under ECCN [3A981](#).

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**Note to ECCN 0A982.** *This ECCN applies to restraint devices used in law enforcement activities. It does not apply to medical devices that are equipped to restrain patient movement during medical procedures. It does not apply to devices that confine memory impaired patients to appropriate medical facilities. It does not apply to safety equipment such as safety belts or child automobile safety seats.*

**\*\*0A983** “Specially designed” implements of torture, including thumbscrews, thumbcuffs, fingercuffs, spiked batons, and “specially designed” “parts,” “components” and “accessories,” n.e.s.

#### License Requirements

*Reason for Control:* CC

*Control(s)*

CC applies to entire entry. A license is required for ALL destinations, regardless of end-use. Accordingly, a column specific to this control does not appear on the Commerce Country Chart. (See part 742 of the EAR for additional information.)

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

#### List of Items Controlled

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**Note to ECCN 0A983.** *In this ECCN, “torture” has the meaning set forth in Section 2340(1) of Title 18, United States Code.*

#### 0A988 Conventional military steel helmets.

No items currently are in this ECCN. See ECCN 1A613.y.1 for conventional steel helmets that, immediately prior to July 1, 2014, were classified under 0A988.

**\*\*0A998** Oil and gas exploration equipment, software, and data, as follows (see List of Items Controlled).

#### License Requirements

*Reason for Control:* Foreign policy

*Control(s)*

Russian industry sector sanction applies to entire entry. See § 746.5 for specific license requirements and license review policy.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

#### List of Items Controlled

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

a. Oil and gas exploration data, e.g., seismic analysis data.

b. Hydraulic fracturing items, as follows:

b.1. Hydraulic fracturing design and analysis software and data.

b.2. Hydraulic fracturing ‘proppant,’ ‘fracking fluid,’ and chemical additives therefor.

*Technical Note:* A ‘proppant’ is a solid material, typically treated sand or man-made ceramic materials, designed to keep an induced hydraulic fracture open, during or following a fracturing treatment. It is added to a ‘fracking fluid’ which may vary in composition depending on the type of fracturing used, and can be gel, foam or slickwater-based.

b.3. High pressure pumps.

**\*\*0A999** Specific processing equipment, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* AT

*Control(s)*

AT applies to entire entry. A license is required for items controlled by this entry to North Korea for anti-terrorism reasons. The Commerce Country Chart is not designed to determine AT licensing requirements for this entry. See §742.19 of the EAR for additional information.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A

- a. Ring Magnets;
- b. [Reserved]

**B. TEST, INSPECTION AND “PRODUCTION EQUIPMENT”**

**\*\*0B501** Test, inspection, and production “equipment” and related commodities for the “development” or “production” of commodities enumerated or otherwise described in ECCN 0A501 or USML Category I as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, RS, UN, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry except equipment for ECCN 0A501.y	NS Column 1
RS applies to entire entry except equipment for ECCN 0A501.y	RS Column 1
UN applies to entire entry	See § 746.1 of the EAR for UN controls
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$3000  
*GBS:* N/A

**Special conditions for STA**

*STA:* Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used to ship any item in this entry.

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

- a. Small arms chambering machines.
- b. Small arms deep hole drilling machines and drills therefor.
- c. Small arms rifling machines.
- d. Small arms spill boring machines.
- e. Production equipment (including dies, fixtures, and other tooling) “specially designed” for the “production” of the items controlled in 0A501.a through .x. or USML Category I.

**\*\*0B505** Test, inspection, and production “equipment” and related commodities “specially designed” for the “development” or “production” of commodities enumerated or otherwise described in ECCN 0A505 or USML Category III, except equipment for the hand loading of cartridges and shotgun shells, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, RS, UN, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to paragraphs .a and .x	NS Column 1
RS applies to paragraphs .a and .x	RS Column 1
UN applies to entire entry	See § 746.1 of the EAR for UN controls
AT applies to paragraphs .a, .d, and .x	AT Column 1
AT applies to paragraph .c	A license is required for export or reexport of these items to North Korea for anti-terrorism reasons.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$3000  
*GBS:* N/A

**Special conditions for STA**

*STA:* Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 0B505.

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

- a. Production equipment (including tooling, templates, jigs, mandrels, molds, dies, fixtures, alignment mechanisms, and test equipment), not enumerated in USML Category III that are “specially designed” for the “production” of commodities controlled by ECCN 0A505.a or .x or USML Category III.
- b. Equipment “specially designed” for the “production” of commodities in ECCN 0A505.b.
- c. Equipment “specially designed” for the “production” of commodities in ECCN 0A505.c.
- d. Equipment “specially designed” for the “production” of commodities in ECCN 0A505.d.
- e. through .w [Reserved]
- x. “Parts” and “components” “specially designed” for a commodity subject to control in paragraph .a of this entry.

**\*\*0B521** Any commodity subject to the EAR that is not listed elsewhere in the CCL, but which is controlled for export because it provides at least a significant military or intelligence

**advantage to the United States or for foreign policy reasons.**

0B521 commodities are subject to RS1 controls with no license exception eligibility other than License Exception GOV for U.S. Government personnel and agencies under §740.11(b)(2)(ii) of the EAR, or an item-specific license exception identified in Supplement No. 5 to part 774 particular to an item covered under ECCN 0B521. The list of commodities determined to be classified under ECCN 0B521 controls is published in Supplement No. 5 to part 774. The license requirements and licensing policy relating to ECCN 0B521 are set forth in §742.6(a)(8) of the EAR.

**\*\*0B602** Test, inspection, and production “equipment” and related commodities “specially designed” for the “development” or “production” of commodities enumerated or otherwise described in ECCN 0A602 or USML Category II as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, RS, UN, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
RS applies to entire entry	RS Column 1

LVS: \$3000

GBS: N/A

**Special conditions for STA**

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 0B602.

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

a. The following commodities if “specially designed” for the “development” or “production” of commodities enumerated in ECCN 0A602.a or USML Category II:

- a.1. Gun barrel rifling and broaching machines and tools therefor;
- a.2. Gun barrel rifling machines;
- a.3. Gun barrel trepanning machines;
- a.4. Gun boring and turning machines;
- a.5. Gun honing machines of 6 feet (183 cm) stroke or more;
- a.6. Gun jump screw lathes;
- a.7. Gun rifling machines; and
- a.8. Barrel straightening presses.

b. Jigs and fixtures and other metal-working implements or accessories of the kinds exclusively designed for use in the manufacture of items in ECCN 0A602 or USML Category II.

c. Other tooling and equipment, “specially designed” for the “production” of items in ECCN 0A602 or USML Category II.

d. Test and evaluation equipment and test models, including diagnostic instrumentation and physical test models, “specially designed” for items in ECCN 0A602 or USML Category II.

**\*\*0B604** Test, inspection, and production “equipment” and related commodities “specially designed” for the “development,” “production,” repair, overhaul, or refurbishing of commodities in ECCN 0A604 or related defense articles in USML Category IV (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1

*Related Definitions:* N/A

*Items:*

a. Materials, coatings and treatments for signature suppression, “specially designed” for military use to reduce detectability or observability and that are not controlled by USML Category XIII or ECCNs 1C001 or 1C101.

b. [Reserved].

**D. “SOFTWARE”**

**\*\*0D001** “Software” “specially designed” or modified for the “development,” “production,” or “use” of commodities described in 0A002. (These items are “subject to the ITAR.” See 22 CFR parts 120 through 130.)

*Heading Note:* Certain “software” for the “development,” “production,” or “use” of nuclear related commodities is subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

**License Requirements**

*Reason for Control:*

*Control(s)*

“Software” for items described in 0A002 is “subject to the ITAR” (see 22 CFR parts 120 through 130).

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

Related Controls: N/A  
 Related Definitions: N/A  
 Items:

The List of Items Controlled is contained in the ECCN heading.

**\*\*0D501** “Software” “specially designed” for the “development,” “production,” operation, or maintenance of commodities controlled by 0A501 or 0B501.

**License Requirements**

Reason for Control: NS, RS, UN, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry except “software” for commodities in ECCN 0A501.y or equipment in ECCN 0B501 for commodities in ECCN 0A501.y	NS Column 1
RS applies to entire entry except “software” for commodities in ECCN 0A501.y or equipment in ECCN 0B501 for commodities in ECCN 0A501.y	RS Column 1
UN applies to entire entry	See § 746.1 of the EAR for UN controls
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**Special conditions for STA**

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any “software” in 0D501.

**List of Items Controlled**

Related Controls: “Software” required for and directly related to articles enumerated in USML Category I is “subject to the ITAR”.

Related Definitions: N/A  
 Items: The list of items controlled is contained in this ECCN heading.

**\*\*0D505** “Software” “specially designed” for the “development,” “production,” operation, or maintenance of commodities controlled by 0A505 or 0B505.

**License Requirements**

Reason for Control: NS, RS, UN, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to “software” for commodities in ECCN 0A505.a and .x and equipment in ECCN 0B505.a .and .x	NS Column 1
RS applies to “software” for commodities in ECCN 0A505.a and .x and equipment in ECCN 0B505.a and .x	RS Column 1
UN applies to entire entry	See § 746.1 of the EAR for UN controls

AT applies to “software” for commodities in ECCN 0A505.a, .d, or .x and equipment in ECCN 0B505.a, .d, or .x	AT Column 1
--	-------------

**List Based License Exceptions (See Part 740 for a description of all license exceptions)**

TSR: N/A

**Special conditions for STA**

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any “software” in 0D505.

**List of Items Controlled**

*Related Controls:* “Software” required for and directly related to articles enumerated in USML Category III is “subject to the ITAR”.

*Related Definitions:* N/A

*Items:* The list of items controlled is contained in this ECCN heading.

**\*\*0D521** Any software subject to the EAR that is not listed elsewhere in the CCL, but which is controlled for export because it provides at least a significant military or intelligence advantage to the United States or for foreign policy reasons.

0D521 software is subject to RS1 controls with no license exception eligibility other than License Exception GOV for U.S. Government personnel and agencies under § 740.11(b)(2)(ii) of the EAR, or an item-specific license exception identified in Supplement No. 5 to part 774 particular to an item covered under ECCN 0D521. The list of software determined to be classified under ECCN 0D521 controls is published in Supplement No. 5 to part 774. The license requirements and licensing policy relating to ECCN 0D521 are set forth in § 742.6(a)(8) of the EAR.

**\*\*0D602** “Software” “specially designed” for the “development,” “production,” operation or maintenance of commodities controlled by 0A602 or 0B602 as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, RS, UN, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 1
RS applies to entire entry	RS Column 1
UN applies to entire entry	See § 746.1 of the EAR for UN controls
AT applies to entire entry	AT Column 1

**List Based License Exceptions (See Part 740 for a description of all license exceptions)**

TSR: N/A

**Special conditions for STA**

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 0D602.

**List of Items Controlled**

*Related Controls:* (1) “Software” required for and directly related to articles enumerated in USML Category II is “subject to the ITAR”. (2) See ECCN 0A919 for foreign-made “military commodities” that incorporate more than a *de minimis* amount of U.S.-origin “600 series” items.

*Related Definitions:* N/A

*Items:* “Software” “specially designed” for the “development,” “production,”

operation, or maintenance of commodities controlled by ECCN 0A602 and ECCN 0B602.

**\*\*0D604** “Software” “specially designed” for the “development,” “production,” operation, or maintenance of commodities controlled by ECCN 0A604 or 0B604 (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
RS applies to entire entry	RS Column 1
AT applies to entire entry	AT Column 1
UN applies to entire entry	See § 746.1(b) for UN controls

GBS: N/A

**Special Conditions for STA**

STA: License Exception STA may not be used for 0D977.

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:* The list of items controlled is contained in the ECCN heading.

**\*\*0D999 Specific software, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* AT, RS

*Control(s)*

AT applies to entire entry. A license is required for items controlled by this entry to North Korea for anti-terrorism reasons. The Commerce Country Chart is not designed to determine AT

license requirements for this entry. See §742.19 of the EAR for additional information.

RS applies to entire entry. A license is required for items controlled by this entry for export or reexport to Iraq or transfer within Iraq for regional stability reasons. The Commerce Country Chart is not designed to determine RS license requirements for this entry. See §§742.6 and 746.3 of the EAR for additional information.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

Related Controls: N/A  
 Related Definitions: N/A  
 Items:

- a. Software for neutronic calculations/modeling;
- b. Software for radiation transport calculations/modeling;
- c. Software for hydrodynamic calculations/modeling.

**E. “TECHNOLOGY”**

**\*\*0E001** “Technology,” according to the Nuclear Technology Note, for the “development,” “production,” or “use” of items described in 0A002, or 0D001.

*Heading Note:* “Technology” for certain items subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110) is subject to the export licensing authority of the Department of Energy (see 10 CFR part 810).

**License Requirements**

*Reason for Control:*

*Control(s)*

“Technology” for items described in 0A002 and 0D001 (applies to “software” in 0D001 for items described in 0A002 only) is subject to the export licensing authority of the U.S. Department of State, Directorate of Defense Trade Controls (see 22 CFR part 121).

*Related Definitions:* N/A  
*Items:*

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

The list of items controlled is contained in the ECCN heading.

*LVS:* N/A  
*GBS:* N/A

**Special Conditions for STA**

**EAR99 Items subject to the EAR that are *not* elsewhere specified in this CCL Category or in any other category in the CCL are designated by the number EAR99.**

*STA:* License Exception STA may not be used for 0E977.

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A

*Items:* The list of items controlled is contained in the ECCN heading.

**\*\*0E982** “Technology” exclusively for the “development” or “production” of equipment controlled by 0A982 or 0A503.

**License Requirements**

*Reason for Control:* CC

*Control(s)*

CC applies to “technology” for items controlled by 0A982 or 0A503. A license is required for ALL destinations, except Canada, regardless of end-use. Accordingly, a column specific to this

**CATEGORY 1 - SPECIAL MATERIALS AND RELATED EQUIPMENT, CHEMICALS, "MICROORGANISMS," AND "TOXINS"**

*Note:* The Food and Drug Administration (FDA) and the Drug Enforcement Administration (DEA) may control exports of items subject to the EAR and on the Commerce Control List. BIS provides cross references to these other agency controls for convenience only. Therefore, please consult relevant FDA and DEA regulations for guidance related to the item you wish to export and do not rely solely on the EAR for information about other agency export control requirements. See Supplement No. 3 to part 730 (Other U.S. Government Departments and Agencies with Export Control Responsibilities) for more information.

**A. "END ITEMS," "EQUIPMENT," "ACCESSORIES," "ATTACHMENTS," "PARTS," "COMPONENTS," AND "SYSTEMS"**

**\*\*1A001** "Parts" and "components" made from fluorinated compounds, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: \$5000  
GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) Items "specially designed" or modified for missiles or for items on the U.S. Munitions List are "subject

to the ITAR" (see 22 CFR parts 120 through 130, including USML Category XXI). (2) See also [1C009](#).

*Related Definitions:* N/A

*Items:*

- a. Seals, gaskets, sealants or fuel bladders, "specially designed" for "aircraft" or aerospace use, made from more than 50% by weight of any of the materials controlled by 1C009.b or 1C009.c;

BIS in 11-4-2015 telecon says 1A002 stuff specially designed for commercial aircraft will typically form a part that is 9A991. Says very few parts remain under 1A002, and those can be things like reentry heat shields.

- b. [Reserved]

**\*\*1A002** "Composite" structures or laminates, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
NP applies to 1A002.b.1 in the form of tubes with an inside diameter between 75 mm and 400 mm	NP Column 1
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: \$1,500; N/A for NP; N/A for "composite" structures or laminates controlled by 1A002.a, having an organic "matrix" and made from materials controlled by 1C010.c or 1C010.d.

GBS: N/A

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship any item in this entry to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

*Note 1:* 1A002 does not control “composite” structures or laminates made from epoxy resin impregnated carbon “fibrous or filamentary materials”, for the repair of “civil aircraft” structures or laminates, having all of the following:

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry. (2) Also see ECCNs [1A202](#), [1C010](#), [1C210](#), 9A010, and 9A110. (3) “Composite” structures “specially designed” for missile applications (including “specially designed” subsystems, “parts,” and “components”) are controlled by ECCN 9A110. (4) “Composite” structures or laminates “specially designed” or prepared for use in separating uranium isotopes are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*Items:*

## a. Made from any of the following:

a.1. An organic “matrix” and “fibrous or filamentary materials” specified by 1C010.c or 1C010.d; *or*

a.2. Prepregs or preforms specified by 1C010.e;

## b. Made from a metal or carbon “matrix”, and any of the following:

b.1. Carbon “fibrous or filamentary materials” having all of the following:

b.1.a. A “specific modulus” exceeding  $10.15 \times 10^6$  m; *and*

b.1.b. A “specific tensile strength” exceeding  $17.7 \times 10^4$  m; *or*

b.2. Materials controlled by 1C010.c.

a. An area not exceeding  $1 \text{ m}^2$ ;

b. A length not exceeding 2.5 m; *and*

c. A width exceeding 15 mm.

*Note 2:* 1A002 does not control semi-finished items, “specially designed” for civilian applications as follows:

a. Sporting goods;

b. Automotive industry;

c. Machine tool industry;

d. Medical applications.

*Note 3:* 1A002.b.1 does not apply to semi-finished items containing a maximum of two dimensions of interwoven filaments and “specially designed” for applications as follows:

a. Metal heat-treatment furnaces for tempering metals;

b. Silicon boule production equipment.

*Note 4:* 1A002 does not apply to finished items “specially designed” for a specific application.

**\*\*1A003** Manufactures of non-“fusible” aromatic polyimides in film, sheet, tape or ribbon form having any of the following (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$200  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* This entry does not control manufactures when coated or laminated with copper and designed for the production of electronic printed circuit boards. For “fusible” aromatic polyimides in any form, see [1C008.a.3](#).

*Related Definitions:* N/A

*Items:*

- a. A thickness exceeding 0.254 mm; *or*
- b. Coated or laminated with carbon, graphite, metals or magnetic substances.

**\*\*1A004 Protective and detection equipment and “components”, not “specially designed” for military use, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, CB, RS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
CB applies to chemical detection systems and dedicated detectors therefor, in 1A004.c, that also have the technical characteristic	CB Column 2

RS apply to 1A004.d	RS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* Yes for 1A004.a, .b, and .c.2.

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [1A995](#), 2B351, and 2B352. (2) See ECCN [1D003](#) for “software” “specially designed” or modified to enable equipment to perform the functions of equipment controlled under section [1A004.c](#) (Nuclear, biological and chemical (NBC) detection systems). (3) See ECCN [1E002.g](#) for control libraries (parametric technical databases) “specially designed” or modified to enable equipment to perform the functions of equipment controlled under [1A004.c](#) (Nuclear, biological and chemical (NBC) detection systems). (4) Chemical and biological protective and detection equipment specifically designed, developed, modified, configured, or adapted for military applications is “subject to the ITAR” (see 22 CFR parts 120 through 130, including USML Category XIV(f)), as is commercial equipment that incorporates “parts” or “components” controlled under that category except for domestic preparedness devices for individual protection that integrate “components” and “parts” identified in USML Category XIV(f)(4) when such “parts” or “components” are: 1) integral to the device; 2) inseparable from the device; and 3) incapable of replacement without compromising the effectiveness of the device, in which case the equipment is subject to the export licensing jurisdiction of the Department of Commerce under ECCN [1A004](#). (5) This entry does not control radionuclides incorporated in equipment listed in this entry - such materials are subject to the licensing jurisdiction of the Nuclear Regulatory Commission (See 10 CFR part 110).

*Related Definitions:* 1) ‘Biological agents’ means: pathogens or toxins, selected or

modified (such as altering purity, shelf life, virulence, dissemination characteristics, or resistance to UV radiation) to produce casualties in humans or animals, degrade equipment or damage crops or the environment. 2) ‘Riot control agents’ are substances which, under the expected conditions of use for riot control purposes, produce rapidly in humans sensory irritation or disabling physical effects which disappear within a short time following termination of exposure. (Tear gases are a subset of ‘riot control agents.’)

*Items:*

a. Full face masks, filter canisters and decontamination equipment therefor, designed or modified for defense against any of the following, and “specially designed” “components” therefor:

*Note: IA004.a includes Powered Air Purifying Respirators (PAPR) that are designed or modified for defense against agents or materials, listed in IA004.a.*

**Technical Notes:** For the purpose of IA004.a:

1. Full face masks are also known as gas masks.

2. Filter canisters include filter cartridges.

a.1. ‘Biological agents’;

a.2. ‘Radioactive materials’;

a.3. Chemical warfare (CW) agents; *or*

a.4. ‘Riot control agents’, as follows:

a.4.a.  $\alpha$ -Bromobenzeneacetonitrile, (Bromobenzyl cyanide) (CA) (CAS 5798-79-8);

a.4.b. [(2-chlorophenyl) methylene] propanedinitrile, (o-Chlorobenzylidenemalononitrile) (CS) (CAS 2698-41-1);

a.4.c. 2-Chloro-1-phenylethanone, Phenylacyl chloride ( $\omega$ -chloroacetophenone) (CN) (CAS 532-27-4);

a.4.d. Dibenz-(b,f)-1,4-oxazepine, (CR) (CAS 257-07-8);

a.4.e. 10-Chloro-5, 10-dihydrophenarsazine, (Phenarsazine chloride), (Adamsite), (DM) (CAS 578-94-9);

a.4.f. N-Nonanoylmorpholine, (MPA) (CAS 5299-64-9);

b. Protective suits, gloves and shoes, “specially designed” or modified for defense against any of the following:

b.1. ‘Biological agents’;

b.2. ‘Radioactive materials’; *or*

b.3. Chemical warfare (CW) agents;

c. Detection systems, “specially designed” or modified for detection or identification of any of the following, and “specially designed” “components” therefor:

c.1. ‘Biological agents’;

c.2. ‘Radioactive materials’; *or*

c.3. Chemical warfare (CW) agents;

d. Electronic equipment designed for automatically detecting or identifying the presence of “explosives” (as listed in the annex at the end of Category 1) residues and utilizing ‘trace detection’ techniques (*e.g.*, surface acoustic wave, ion mobility spectrometry, differential mobility spectrometry, mass spectrometry).

**Technical Note:** ‘Trace detection’ is defined as the capability to detect less than 1 ppm vapor, or 1 mg solid or liquid.

**Note 1:** IA004.d does not apply to equipment “specially designed” for laboratory use.

*Note 2: 1A004.d does not apply to non-contact walk-through security portals.*

*Note: 1A004 does not control:*

*a. Personal radiation monitoring dosimeters;*

*b. Occupational health or safety equipment limited by design or function to protect against hazards specific to residential safety or civil industries, including:*

- 1. Mining;*
- 2. Quarrying;*
- 3. Agriculture;*
- 4. Pharmaceutical;*
- 5. Medical;*
- 6. Veterinary;*
- 7. Environmental;*
- 8. Waste management;*
- 9. Food industry.*

**Technical Notes:**

*1. 1A004 includes equipment, “components” that have been ‘identified,’ successfully tested to national standards or otherwise proven effective, for the detection of or defense against ‘radioactive materials’ ‘biological agents,’ chemical warfare agents, ‘simulants’ or “riot control agents,” even if such equipment or “components” are used in civil industries such as mining, quarrying, agriculture, pharmaceuticals, medical, veterinary, environmental, waste management, or the food industry.*

*2. ‘Simulant’: A substance or material that is used in place of toxic agent (chemical or biological) in training, research, testing or evaluation.*

*3. For the purposes of 1A004, ‘radioactive materials’ are those selected or modified to increase their effectiveness in producing casualties in humans or animals, degrading equipment or damaging crops or the environment.*

**\*\*1A005** Body armor and “specially designed” “components” therefor, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, UN, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
UN applies to entire entry	See § 746.1(b) for UN controls.
AT applies to entire entry	AT Column 1

**License Requirements Notes:** 1. Soft body armor not manufactured to military standards or specifications must provide ballistic protection equal to or less than NIJ level III (NIJ 0101.06, July 2008) to be controlled under 1A005.a. 2. For purposes of 1A005.a, military standards and specifications include, at a minimum, specifications for fragmentation protection.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* Yes, except UN

**List of Items Controlled**

*Related Controls:* (1) Bulletproof and bullet resistant vests (body armor) providing NIJ Type IV protection or greater are “subject to the ITAR” (see 22 CFR 121.1 Category X(a)). (2) Soft body armor and protective garments manufactured to military standards or specifications that provide protection equal to NIJ level III or less are classified under ECCN 1A613.d.1. (3) Hard armor plates providing NIJ level III ballistic protection are classified under ECCN 1A613.d.2. (4) Police helmets and shields are classified under ECCN 0A979. (5) Other personal protective “equipment”

“specially designed” for military applications not controlled by the USML or elsewhere in the CCL is classified under ECCN 1A613.e. (6) For “fibrous or filamentary materials” used in the manufacture of body armor, see ECCN 1C010.

*Related Definitions:* N/A  
*Items:*

- a. Soft body armor not manufactured to military standards or specifications, or to their equivalents, and “specially designed” “components” therefor;
- b. Hard body armor plates that provide ballistic protection less than NIJ level III (NIJ 0101.06, July 2008) or national equivalents.

**Notes to ECCN 1A005:**

- 1. This entry does not control body armor when accompanying its user for the user’s own personal protection.
- 2. This entry does not control body armor designed to provide frontal protection only from both fragment and blast from non-military explosive devices.
- 3. This entry does not apply to body armor designed to provide protection only from knife, spike, needle or blunt trauma.

**\*\*1A006** Equipment, “specially designed” or modified for the disposal of improvised explosive devices, as follows (see List of Items Controlled), and “specially designed” “components” and “accessories” therefor.

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2

AT applies to entire entry	AT Column 1
----------------------------	-------------

**License Requirement Note:** 1A006 does not apply to equipment when accompanying its operator.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**List of Items Controlled**

*Related Controls:* Equipment “specially designed” for military use for the disposal of improvised explosive devices is “subject to the ITAR” (see 22 CFR parts 120 through 130, including USML Category IV).

*Related Definitions:* ‘Disruptors’ - Devices “specially designed” for the purpose of preventing the operation of an explosive device by projecting a liquid, solid or frangible projectile.

*Items:*

- a. Remotely operated vehicles;
- b. ‘Disruptors’.

**\*\*1A007** Equipment and devices, “specially designed” to initiate charges and devices containing “energetic materials,” by electrical means, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
NP applies to 1A007.b, as well as 1A007.a when the detonator	NP Column 1

firing set meets or exceeds the parameters of 3A229.	
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* High explosives and related equipment “specially designed” for military use are “subject to the ITAR” (see 22 CFR parts 120 through 130). This entry does not control detonators using only primary explosives, such as lead azide. See also ECCNs 0A604, 3A229, and 3A232. See 1E001 for “development” and “production” technology controls, and 1E201 for “use” technology controls.

*Related Definitions:* N/A

*Items:*

- a. Explosive detonator firing sets designed to drive explosive detonators specified by 1A007.b;
- b. Electrically driven explosive detonators as follows:

- b.1. Exploding bridge (EB);
- b.2. Exploding bridge wire (EBW);
- b.3. Slapper;
- b.4. Exploding foil initiators (EFI).

**Technical Notes:**

1. The word *initiator* or *igniter* is sometimes used in place of the word *detonator*.

2. For the purpose of 1A007.b the detonators of concern all utilize a small electrical conductor (bridge, bridge wire, or foil) that explosively vaporizes when a fast, high-current

*electrical pulse is passed through it. In non slapper types, the exploding conductor starts a chemical detonation in a contacting high explosive material such as PETN (pentaerythritoltetranitrate). In slapper detonators, the explosive vaporization of the electrical conductor drives a flyer or slapper across a gap, and the impact of the slapper on an explosive starts a chemical detonation. The slapper in some designs is driven by magnetic force. The term exploding foil detonator may refer to either an EB or a slapper-type detonator.*

**\*\*1A008 Charges, devices and “components”, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, UN, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1
UN applies to entire entry	See § 746.1(b) for UN controls.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: \$3,000 for .a through .c;  
\$6,000 for .d.

GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) All of the following are “subject to the ITAR” (see 22 CFR parts 120 through 130):

- a. High explosives and related equipment “specially designed” for military use;

b. Explosive devices or charges in this entry that utilize USML controlled energetic materials (See 22 CFR 121.1 Category V), if they have been specifically designed, developed, configured, adapted, or modified for a military application;

c. Shaped charges that have all of the following a uniform shaped conical liner with an included angle of 90 degrees or less, more than 2.0 kg of controlled materials, and a diameter exceeding 4.5 inches;

d. Detonating cord containing greater than 0.1 kg per meter (470 grains per foot) of controlled materials;

e. Cutters and severing tools containing greater than 10 kg of controlled materials;

f. With the exception of cutters and severing tools, devices or charges controlled by this entry where the USML controlled materials can be easily extracted without destroying the device or charge; *and*

g. Individual USML controlled energetic materials in this entry, even when compounded with other materials, when not incorporated into explosive devices or charges controlled by this entry or 1C992.

(2) See also ECCNs [1C011](#), [1C018](#), [1C111](#), [1C239](#), and [1C608](#) for additional controlled energetic materials. See ECCN [1E001](#) for the “development” or “production” “technology” for the commodities controlled by ECCN 1A008, but not for explosives or commodities that are “subject to the ITAR” (see 22 CFR parts 120 through 130).

*Related Definitions:* N/A

*Items:*

a. ‘Shaped charges’ having all of the following:

a.1. Net Explosive Quantity (NEQ) greater than 90 g; *and*

a.2. Outer casing diameter equal to or greater than 75 mm;

b. Linear shaped cutting charges having all of the following, and “specially designed” “components” therefor:

b.1. An explosive load greater than 40 g/m; *and*

b.2. A width of 10 mm or more;

c. Detonating cord with explosive core load greater than 64 g/m;

d. Cutters, not specified by 1A008.b, and severing tools, having a NEQ greater than 3.5 kg.

**Technical Note:** ‘Shaped charges’ are explosive charges shaped to focus the effects of the explosive blast.

**Note:** The only charges and devices specified in 1A008 are those containing “explosives” (see list of explosives in the Annex at the end of Category 1) and mixtures thereof.

**\*\*1A101** Devices for reduced observables such as radar reflectivity, ultraviolet/infrared signatures and acoustic signatures, for applications usable in rockets, missiles, or unmanned aerial vehicles capable of achieving a “range” equal to or greater than 300 km or their complete subsystems.

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

LVS: N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See also [1C101](#). (2) For commodities that meet the definition of defense articles under 22 CFR 120.3 of the International Traffic in Arms Regulations (ITAR), describes similar commodities “subject to the ITAR” (See 22 CFR parts 120 through 130, including USML Category XIII).

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1A102** Resaturated pyrolyzed carbon-carbon “parts” and “components” designed for rockets, missiles, or unmanned aerial vehicles capable of achieving a “range” equal to or greater than 300km. (These items are “subject to the ITAR.” See 22 CFR parts 120 through 130).

**\*\*1A202** Composite structures, other than those controlled by 1A002, in the form of tubes and having both of the following characteristics (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [1E201](#) (“use”) and [1E202](#) (“development” and “production”) for technology for items controlled by this entry. (2) Also see ECCNs [1A002](#), [1C010](#), [1C210](#), 9A010, and 9A110. (3) “Composite” structures “specially designed” or prepared for use in separating uranium isotopes are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*Items:*

- a. An inside diameter of between 75 mm and 400 mm; *and*
- b. Made with any of the “fibrous or filamentary materials” specified in 1C010.a or .b or 1C210.a or with carbon prepreg materials specified in 1C210.c.

**\*\*1A225** Platinized catalysts “specially designed” or prepared for promoting the hydrogen isotope exchange reaction between hydrogen and water for the recovery of tritium from heavy water or for the production of heavy water.

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [1E201](#) (“use”) and [1E202](#) (“development” and “production”) for technology for items controlled by this entry. (2) Equipment “specially designed” or prepared for the production of heavy water is subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1A226** Specialized packings, which may be used in separating heavy water from ordinary water, having both of the following characteristics (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [1E201](#) (“use”) and [1E202](#) (“development” and “production”) for technology for items controlled by this entry. (2) Equipment “specially designed” or prepared for the

production of heavy water is subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*Items:*

- a. Made of phosphor bronze mesh chemically treated to improve wettability; *and*
- b. Designed to be used in vacuum distillation towers.

**\*\*1A227** High-density (lead glass or other) radiation shielding windows, having all of the following characteristics (see List of Items Controlled), and “specially designed” frames therefor.

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [1E201](#) (“use”) and [1E202](#) (“development” and “production”) for technology for items controlled by this entry. (2) Equipment “specially designed” or prepared for nuclear reactors and reprocessing facilities is subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* In 1A227.a, the term “cold area” means the viewing area of the window exposed to the lowest level of radiation in the design application.

*Items:*

- a. A “cold area” greater than 0.09 m<sup>2</sup>;
- b. A density greater than 3 g/cm<sup>3</sup>; and
- c. A thickness of 100 mm or greater.

**\*\*1A231** Target assemblies and components for the production of tritium as follows (See List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a Description of All License Exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See ECCNs 1E001 (“production”) and 1E201 (“use”) for technology for items controlled by this entry.

*Related Definitions:* N/A

*Items:*

- a. Target assemblies made of or containing lithium enriched in the lithium-6 isotope “specially designed” for the “production” of tritium through irradiation, including insertion in a nuclear reactor;

- b. Components “specially designed” for the target assemblies specified in item a.

*Technical Note to ECCN 1A231.b.:* Components “specially designed” for target assemblies for the “production” of tritium may include lithium pellets, tritium getters, and specially-coated cladding.

**\*\*1A290** Depleted uranium (any uranium containing less than 0.711% of the isotope U-235) in shipments of more than 1,000 kilograms in the form of shielding contained in X-ray units, radiographic exposure or teletherapy devices, radioactive thermoelectric generators, or packaging for the transportation of radioactive materials.

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) This entry does not control depleted uranium in fabricated forms for use in munitions. See 22 CFR part 121 for depleted uranium “subject to the ITAR” (2) Depleted uranium that is not fabricated for use in munitions or fabricated into commodities solely to take advantage of its high density (e.g., aircraft, ship, or other counterweights) or in the forms listed in this entry are subject to the export licensing authority of the Nuclear Regulatory

Commission. (See 10 CFR part 110.) (3) “Natural uranium” or “depleted uranium” or thorium in the form of metal, alloy, chemical compound or concentrate and any other material containing one or more of the foregoing are subject to the export licensing authority of the Nuclear Regulatory Commission. (See 10 CFR part 110.)

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1A607 Military dissemination “equipment” for riot control agents, military detection and protection “equipment” for toxicological agents (including chemical, biological, and riot control agents), and related commodities (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
RS applies to entire entry	RS Column 1
AT applies to entire entry	AT Column 1
UN applies to entire entry	See § 746.1(b) for UN controls

**List Based License Exceptions (See Part 740 for a description of all license exceptions)**

*LVS:* N/A

*GBS:* N/A

**Special Conditions for STA**

*STA:* Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the

EAR) may not be used for any item in 1A607.

**List of Items Controlled**

*Related Controls:* (1) Vaccines identified in ECCN 1C991 are not controlled by this ECCN. (2) See 22 CFR § 121.1 (USML), Category XIV(h), for vaccines that are subject to the ITAR. (3) Protection and detection equipment and related items identified in ECCN 1A004, 1A995, or 2B351 are not controlled by this ECCN. (4) See 22 CFR § 121.1 (USML), Category XIV(f), for dissemination, detection and protection equipment that is subject to the ITAR. (5) See ECCN 0A919 for “military commodities” located and produced outside the United States that incorporate more than a *de minimis* amount of US-origin “600 series” controlled content.

*Related Definitions:* N/A

*Items:*

a. through d. [Reserved]

e. “Equipment” “specially designed” for military use and for the dissemination of any of the riot control agents controlled in ECCN 1C607.a.

f. Protection “equipment” (including air conditioning units, protective coatings, and protective clothing):

f.1. Not controlled by USML Category XIV(f); *and*

f.2. “Specially designed” for military use and for defense against:

f.2.a. Materials specified by USML Category XIV (a) or (b); *or*

f.2.b. Riot control agents controlled in 1C607.a.

g. Decontamination “equipment”:

g.1. Not controlled by USML Category XIV(f); *and*

g.2. “Specially designed” for military use and for decontamination of objects contaminated with materials controlled by USML Category XIV(a) or (b).

h. “Equipment”:

h.1. Not controlled by USML Category XIV(f); *and*

h.2. “Specially designed” for military use and for the detection or identification of:

h.2.a. Materials specified by USML Category XIV(a) or (b); *or*

h.2.b. Riot control agents controlled by ECCN 1C607.a.

i. [Reserved]

j. “Equipment” “specially designed” to:

j.1. Interface with a detector, shelter, vehicle, vessel, or aircraft controlled by the USML or a “600 series” ECCN; *and*

j.2. Collect and process samples of articles controlled in USML Category XIV(a) or (b).

k. Medical countermeasures that are “specially designed” for military use (including pre- and post-treatments, antidotes, and medical diagnostics) and “specially designed” to counter chemical agents controlled by the USML Category XIV(a).

*Note: Examples of “equipment” controlled by this entry are barrier and non-barrier creams and filled autoinjectors (e.g., combopens where one injector contains 2-PAM and the other atropine) if “specially designed” to counter such agents.*

l. through w. [Reserved]

x. “Parts,” “components,” “accessories,” and

“attachments” that are “specially designed” for a commodity controlled by ECCN 1A607.e, .f, .g, .h, or .j or for a defense article controlled by USML Category XIV(f) and that are not enumerated or otherwise described elsewhere in the USML.

**\*\*1A613 Armored and protective “equipment” and related commodities, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry except 1A613.y	NS Column 1
RS applies to entire entry except 1A613.y	RS Column 1
RS applies 1A613.y	China, Russia, or Venezuela (see § 724.6(a)(7))
AT applies to entire entry	AT Column 1
UN applies to entire entry, except 1A613.y	See § 746.1(b) for UN controls

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: \$1500  
 GBS: N/A

**Special Conditions for STA**

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 1A613.

**List of Items Controlled**

*Related Controls:* (1) Defense articles, such as materials made from classified information, that are controlled by USML Category X or XIII of the ITAR, and technical data (including software)

directly related thereto, are “subject to the ITAR.” (2) See ECCN 0A919 for foreign-made “military commodities” that incorporate more than a *de minimis* amount of US-origin “600 series” controlled content. (3) See ECCN 9A610.g for anti-gravity suits (“G-suits”) and pressure suits capable of operating at altitudes higher than 55,000 feet above sea level.

*Related Definitions:* References to “NIJ Type” protection are to the National Institute of Justice Classification guide at NIJ Standard 0101.06, Ballistic Resistance of Body Armor, and NIJ Standard 0108.01, Ballistic Resistant Protective Materials.

*Items:*

- a. Metallic or non-metallic armored plate “specially designed” for military use and not controlled by the USML.

*Note to paragraph a:* For controls on body armor plates, see ECCN 1A613.d.2 and USML Category X(a)(1).

- b. Shelters “specially designed” to:

b.1. Provide ballistic protection for military systems; *or*

b.2. Protect against nuclear, biological, or chemical contamination.

- c. Military helmets (other than helmets controlled under 1A613.y.1) providing less than NIJ Type IV protection and “specially designed” helmet shells, liners, or comfort pads therefor.

*Note 1:* See ECCN 0A979 for controls on police helmets.

*Note 2:* See USML Category X(a)(5) and (a)(6) for controls on other military helmets.

- d. Body armor and protective garments, as follows:

d.1. Soft body armor and protective garments manufactured to military standards or specifications, or to their equivalents, that provide ballistic protection equal to or less than NIJ level III (NIJ 0101.06, July 2008); *or*

*Note:* For 1A613.d.1, military standards or specifications include, at a minimum, specifications for fragmentation protection.

d.2. Hard body armor plates that provide ballistic protection equal to NIJ level III (NIJ 0101.06, July 2008) or national equivalents.

*Note:* See ECCN 1A005 for controls on soft body armor not manufactured to military standards or specifications and hard body armor plates providing less than NIJ level III protection. For body armor providing NIJ Type IV protection or greater, see USML Category X(a)(1).

e. Atmospheric diving suits “specially designed” for rescue operations for submarines controlled by the USML or the CCL.

f. Other personal protective “equipment” “specially designed” for military applications not controlled by the USML, not elsewhere controlled on the CCL.

g. to w. [Reserved]

x. “Parts,” “components,” “accessories,” and “attachments” that are “specially designed” for a commodity controlled by ECCN 1A613 (except for 1A613.y) or an article enumerated in USML Category X, and not controlled elsewhere in the USML.

*Note:* Forgings, castings, and other unfinished products, such as extrusions and machined bodies, that have reached a stage in manufacturing where they are clearly identifiable by mechanical properties, material composition, geometry, or function as commodities controlled by ECCN 1A613.x are controlled by ECCN 1A613.x.

y. Other commodities as follows:

y.1 Conventional military steel helmets.

*N.B. to paragraph y.1: For other military helmet “components” or “accessories,” see the relevant ECCN in the CCL or USML Entry.*

y.2 [Reserved]

**\*\*1A984** Chemical agents, including tear gas formulation containing 1 percent or less of orthochlorobenzalmalonitrile (CS), or 1 percent or less of chloroacetophenone (CN), except in individual containers with a net weight of 20 grams or less; liquid pepper except when packaged in individual containers with a net weight of 3 ounces (85.05 grams) or less; smoke bombs; non-irritant smoke flares, canisters, grenades and charges; and other pyrotechnic articles (excluding shotgun shells, unless the shotgun shells contain only chemical irritants having dual military and commercial use, and "parts" and "components" "specially designed" therefor, n.e.s.

LVS: N/A  
GBS: N/A

**List of Items Controlled**

*Related Controls:* See ECCNs [1A004](#), 2B351, and 2B352.  
*Related Definitions:* N/A  
*Items:*

- a. Personal radiation monitoring dosimeters;
- b. Equipment limited by design or function to protect against hazards specific to civil industries, such as mining, quarrying, agriculture, pharmaceuticals, medical, veterinary, environmental, waste management, or to the food industry.

*Note: This entry (1A995) does not control items for protection against chemical or biological agents that are consumer goods, packaged for retail sale or personal use, or medical products, such as latex exam gloves, latex surgical gloves, liquid disinfectant soap, disposable surgical drapes, surgical gowns, surgical foot covers, and surgical masks. Such items are classified as EAR99.*

**\*\*1A999** Specific processing equipment, n.e.s., as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* AT

*Control(s)*

AT applies to entire entry. A license is required for items controlled by this entry to North Korea

for anti-terrorism reasons. The Commerce Country Chart is not designed to determine AT licensing requirements for this entry. See §742.19 of the EAR for additional information.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

- a. Radiation detection, monitoring and measurement equipment, n.e.s.;
- b. Radiographic detection equipment such as x-ray converters, and storage phosphor image plates.

**B. TEST, INSPECTION AND “PRODUCTION EQUIPMENT”**

**\*\*1B001** Equipment for the production or inspection of “composite” structures or laminates controlled by 1A002 or “fibrous or filamentary materials” controlled by 1C010, as follows (see List of Items Controlled), and “specially designed” “components” and “accessories” therefor.

**License Requirements**

*Reason for Control:* NS, MT, NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
MT applies to entire entry, except 1B001.d.4, e and f.	MT Column 1

<b>Note:</b> <i>MT applies to equipment in 1B001.d that meet or exceed the parameters of 1B101.</i>	
NP applies to filament winding machines described in 1B001.a that are capable of winding cylindrical rotors having a diameter between 75 mm (3 in) and 400 mm (16 in) and lengths of 600 mm (24 in) or greater; AND coordinating and programming controls and precision mandrels for these filament winding machines	NP Column 1
AT applies to entire entry	AT Column 1

**Technical Note:** For the purposes of 1B001.b, ‘tape-laying machines’ have the ability to lay one or more ‘filament bands’ limited to widths greater than 25.4 mm and less than or equal to 304.8 mm, and to cut and restart individual ‘filament band’ courses during the laying process.

c. Multidirectional, multidimensional weaving machines or interlacing machines, including adapters and modification kits, “specially designed” or modified for weaving, interlacing or braiding fibers for “composite” structures;

**Technical Note:** For the purposes of 1B001.c the technique of interlacing includes knitting.

d. Equipment “specially designed” or adapted for the production of reinforcement fibers, as follows:

d.1. Equipment for converting polymeric fibers (such as polyacrylonitrile, rayon, pitch or polycarbosilane) into carbon fibers or silicon carbide fibers, including special equipment to strain the fiber during heating;

d.2. Equipment for the chemical vapor deposition of elements or compounds, on heated filamentary substrates, to manufacture silicon carbide fibers;

d.3. Equipment for the wet-spinning of refractory ceramics (such as aluminum oxide);

d.4. Equipment for converting aluminum containing precursor fibers into alumina fibers by heat treatment;

e. Equipment for producing prepregs controlled by 1C010.e by the hot melt method;

f. Non-destructive inspection equipment “specially designed” for “composite” materials, as follows:

f.1. X-ray tomography systems for three dimensional defect inspection;

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A for MT and for 1B001.a;  
\$5000 for all other items

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCN [1D001](#) for software for items controlled by this entry and see ECCNs [1E001](#) (“development” and “production”) and [1E101](#) (“use”) for technology for items controlled by this entry. (2) Also see ECCNs [1B101](#) and [1B201](#).

*Related Definitions:* N/A

*Items:*

a. Filament winding machines, of which the motions for positioning, wrapping and winding fibers are coordinated and programmed in three or more ‘primary servo positioning’ axes, “specially designed” for the manufacture of “composite” structures or laminates, from “fibrous or filamentary materials”;

b. ‘Tape laying machines’, of which the motions for positioning and laying tape are coordinated and programmed in five or more ‘primary servo positioning’ axes, “specially designed” for the manufacture of “composite” airframe or missile structures;

f.2. Numerically controlled ultrasonic testing machines of which the motions for positioning transmitters or receivers are simultaneously coordinated and programmed in four or more axes to follow the three dimensional contours of the “part” or “component” under inspection;

g. Tow-placement machines, of which the motions for positioning and laying tows are coordinated and programmed in two or more ‘primary servo positioning’ axes, “specially designed” for the manufacture of “composite” airframe or missile structures.

*Technical Note to 1B001.g: For the purposes of 1B001.g, ‘tow-placement machines’ have the ability to place one or more ‘filament bands’ having widths less than or equal to 25.4 mm, and to cut and restart individual ‘filament band’ courses during the placement process..*

**Technical Notes for 1B001:**

1. For the purpose of 1B001, ‘primary servo positioning’ axes control, under computer program direction, the position of the end effector (i.e., head) in space relative to the work piece at the correct orientation and direction to achieve the desired process.

2. For the purposes of 1B001, a ‘filament band’ is a single continuous width of fully or partially resin-impregnated tape, tow or fiber. Fully or partially resin-impregnated ‘filament bands’ include those coated with dry powder that tacks upon heating.

**\*\*1B002** Equipment for producing metal alloys, metal alloy powder or alloyed materials, “specially designed” to avoid contamination and “specially designed” for use in one of the processes specified in 1C002.c.2.

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See ECCN 1B608.a, .b, and .x for items that, immediately prior to July 1, 2014, were classified under 1B018.a.

*Related Definitions:* N/A

*Items:*

- a. [Reserved]
- b. [Reserved]

**\*\*1B101** Equipment, other than that controlled by 1B001, for the “production” of structural composites, fibers, prepregs or preforms, usable for rockets, missiles, or unmanned aerial vehicles capable of achieving a “range” equal to or greater than 300 km and their subsystems, as follows (see List of Items Controlled); and “specially designed” “parts,” “components” and “accessories” therefor.

**License Requirements**

*Reason for Control:* MT, NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
NP applies to filament winding machines described in 1B101.a that are capable of winding cylindrical rotors having a diameter between 75 mm (3 in.) and 400 mm (16 in.) and lengths of 600 mm (24 in.) or greater AND to coordinating and programming controls and precision mandrels for these filament winding machines	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

GBS: N/A

### List of Items Controlled

*Related Controls:* See ECCN [1D101](#) for software for items controlled by this entry and see ECCNs [1E001](#) (“development” and “production”) and [1E101](#) (“use”) for technology for items controlled by this entry. Also see [1B201](#).

*Related Definitions:* Examples of “parts,” “components” and “accessories” for the machines controlled by this entry are molds, mandrels, dies, fixtures and tooling for the preform pressing, curing, casting, sintering or bonding of composite structures, laminates and manufactures thereof.

*Items:*

a. Filament winding machines or ‘fiber/tow-placement machines,’ of which the motions for positioning, wrapping and winding fibers can be coordinated and programmed in three or more axes, designed to fabricate composite structures or laminates from fibrous or filamentary materials, and coordinating and programming controls;

b. ‘Tape-laying machines’ of which the motions for positioning and laying tape can be coordinated and programmed in two or more axes, designed for the manufacture of composite airframe and missile structures;

**Technical Notes for paragraphs a and b:** For the purposes of 1B101.a. and 1B101.b., the following definitions apply:

1. ‘Fiber/tow-placement machines’ and ‘tape-laying machines’ are machines that perform similar processes that use computer-guided heads to lay one or several ‘filament bands’ onto a mold to create a part or a structure. These machines have the ability to cut and restart individual ‘filament band’ courses during the laying process.

2. A ‘filament band’ is a single continuous width of fully or partially resin-impregnated tape, tow, or fiber. Fully or

partially resin-impregnated ‘filament bands’ include those coated with dry powder that tacks upon heating.

3. ‘Fiber/tow-placement machines’ have the ability to place one or more ‘filament bands’ having widths less than or equal to 25.4 mm. This refers to the minimum width of material the machine can place, regardless of the upper capability of the machine.

4. ‘Tape-laying machines’ have the ability to place one or more ‘filament bands’ having widths less than or equal to 304.8 mm, but cannot place ‘filament bands’ with a width equal to or less than 25.4 mm. This refers to the minimum width of material the machine can place, regardless of the upper capability of the machine.

c. Equipment designed or modified for the “production” of “fibrous or filamentary materials” as follows:

c.1. Equipment for converting polymeric fibers (such as polyacrylonitrile, rayon or polycarbosilane) including special provision to strain the fiber during heating;

c.2. Equipment for the vapor deposition of elements or compounds on heated filament substrates; and

c.3. Equipment for the wet-spinning of refractory ceramics (such as aluminum oxide);

d. Equipment designed or modified for special fiber surface treatment or for producing prepregs and preforms controlled by 9A110.

**Note:** Equipment covered in 1B101.d includes but is not limited to, rollers, tension stretchers, coating equipment, cutting equipment and clicker dies.

**\*\*1B102** Metal powder “production equipment,” other than that specified in 1B002, and “parts” and “components” as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See also [1B115.b](#).

*Related Definitions:* N/A

*Items:*

a. Metal powder “production equipment” usable for the “production”, in a controlled environment, of spherical, spheroidal or atomized materials specified in 1C011.a., 1C011.b., 1C111.a.1., 1C111.a.2., or controlled for MT reasons in Category V of the USML.

b. “Specially designed” “parts” and “components” for “production equipment” specified in 1B002 or 1B102.a.

*Note:* 1B102 includes:

a. *Plasma generators (high frequency arc-jet) usable for obtaining sputtered or spherical metallic powders with organization of the process in an argon-water environment;*

b. *Electroburst equipment usable for obtaining sputtered or spherical metallic powders with organization of the process in an argon-water environment;*

c. *Equipment usable for the “production” of spherical aluminum powders by powdering a melt in an inert medium (e.g., nitrogen).*

**\*\*1B115** Equipment, other than that controlled in 1B002 or 1B102, for the “production” of propellant or propellant constituents (see List of Items Controlled), and “specially designed” “parts” and “components” therefor.

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* For the control of batch mixers, continuous mixers and fluid energy mills, see [1B117](#), [1B118](#) and [1B119](#).

*Related Definitions:* N/A

*Items:*

a. “Production equipment” for the “production”, handling or acceptance testing of liquid propellants or propellant constituents controlled by 1C011.a, 1C011.b, 1C111 or on the U.S. Munitions List;

b. “Production equipment,” for the production, handling, mixing, curing, casting, pressing, machining, extruding or acceptance testing of solid propellants or propellant constituents described in 1C011.a, 1C011.b or 1C111, or on the U.S. Munitions List.

*Note:* 1B115.b does not control batch mixers, continuous mixers or fluid energy mills. For the control of batch mixers, continuous mixers and fluid energy mills see 1B117, 1B118, and 1B119.

*Note 1:* [Reserved]

*Note 2:* 1B115 does not control equipment for the “production,” handling and acceptance testing of boron carbide.

**\*\*1B116** “Specially designed” nozzles for producing pyrolytically derived materials formed on a mold, mandrel or other substrate from precursor gases which decompose in the 1,573 K (1,300 °C) to 3,173 K (2,900 °C) temperature range at pressures of 130 Pa to 20 kPa.

**License Requirements**

*Reason for Control:* MT, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1B117** Batch mixers having all of the following (see List of Items Controlled), and “specially designed” “parts” and “components” therefor.

**License Requirements**

*Reason for Control:* MT, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See 1B115, [1B118](#), and [1B119](#).

*Related Definitions:* N/A

*Items:*

- a. Capable of mixing under vacuum in the range from zero to 13.326 kPa;
- b. Capable of controlling the temperature of the mixing chamber;
- c. A total volumetric capacity of 110 liters (30 gallons) or more; *and*
- d. At least one ‘mixing/kneading shaft’ mounted off center.

*Note to paragraph d:* In 1B117.d. the term ‘mixing/kneading shaft’ does not refer to deagglomerators or knife-spindles.

**\*\*1B118** Continuous mixers having all of the following (see List of Items Controlled), and

“specially designed” “parts” and “components” therefor.

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1B201** Filament winding machines (other than those controlled by ECCN 1B001 or 1B101) and related equipment, as described in this ECCN (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* See ECCN [1D201](#) for software for items controlled by this entry and see ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry. Also see ECCN [1E203](#) for technology for the “development” of software controlled by ECCN [1D201](#).

*Related Definitions:* N/A

*Items:*

a. Filament winding machines having all of the following characteristics:

a.1. Having motions for positioning, wrapping, and winding fibers coordinated and programmed in two or more axes;

a.2. “Specially designed” to fabricate composite structures or laminates from “fibrous or filamentary materials”; *and*

a.3. Capable of winding cylindrical tubes with an internal diameter between 75 mm and 650 mm and lengths of 300 mm or greater;

b. Coordinating and programming controls for filament winding machines controlled by 1B201.a;

c. Precision mandrels for filament winding machines controlled by 1B201.a.

**\*\*1B225 Electrolytic cells for fluorine production with a production capacity greater than 250 g of fluorine per hour.**

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>

NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry. (2) See ECCN [1B999](#) for specific processing equipment, n.e.s.

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1B226 Electromagnetic isotope separators, designed for, or equipped with, single or multiple ion sources capable of providing a total ion beam current of 50 mA or greater.**

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) Electromagnetic isotope separators “specially designed” or prepared for use in separating uranium isotopes are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110). (2) See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry.

*Related Definitions:* N/A

*ECCN Controls:* This entry includes separators capable of enriching stable isotopes and separators with the ion sources and collectors both in the magnetic field and those configurations in which they are external to the field.

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1B228 Hydrogen cryogenic distillation columns having all of the characteristics described in this ECCN (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) Equipment “specially designed” or prepared for the production of

heavy water is subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110). (2) See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry.

*Related Definitions:* (1) The term “fine grain stainless steels,” for purposes of this ECCN, means fine grain austenitic stainless steels with an ASTM (or equivalent standard) grain size number of 5 or greater. (2) The term “effective length,” for purposes of this ECCN, means the active height of packing material in a packed-type column, or the active height of internal contactor plates in a plate-type column.

*Items:*

- a. Designed to operate with internal temperatures of 35 K (-238 °C) or less;
- b. Designed to operate at an internal pressure of 0.5 to 5 MPa (5 to 50 atmospheres);
- c. Constructed of “fine-grain stainless steels” of the 300 series with low sulphur content or equivalent cryogenic and H<sub>2</sub>-compatible materials; *and*
- d. With internal diameters of 30 cm or greater and “effective lengths” of 4 m or greater.

**\*\*1B229 Water-hydrogen sulfide exchange tray columns and internal contactors, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) Equipment “specially designed” or prepared for the production of heavy water is subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110). (2) See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry.

*Related Definitions:* The “internal contactors” controlled by [1B229.b](#) are segmented trays that have an effective assembled diameter of 1.8 m (6 ft.) or greater, are designed to facilitate countercurrent contacting, and are constructed of stainless steels with a carbon content of 0.03% or less. These may be sieve trays, valve trays, bubble cap trays, or turbogrid trays.

*Items:*

a. Water-hydrogen sulfide exchange tray columns, having all of the following characteristics:

a.1. Can operate at pressures of 2 MPa or greater;

a.2. Constructed of carbon steel having an austenitic ASTM (or equivalent standard) grain size number of 5 or greater; *and*

a.3. With a diameter of 1.8 m (6 ft.) or greater;

b. “Internal contactors” for the water-hydrogen sulfide exchange tray columns controlled by 1B229.a.

**\*\*1B230** Pumps capable of circulating solutions of concentrated or dilute potassium amide catalyst in liquid ammonia (KNH<sub>2</sub>/NH<sub>3</sub>), having all of the following characteristics (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) Equipment “specially designed” or prepared for the production of heavy water is subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110). (2) See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry.

*Related Definitions:* N/A

*Items:*

a. Airtight (i.e., hermetically sealed);

b. A capacity greater than 8.5 m<sup>3</sup>/h; *and*

c. Either of the following characteristics:

c.1. For concentrated potassium amide solutions (1% or greater), an operating pressure of 1.5 to 60 MPa (15-600 atmospheres); *or*

c.2. For dilute potassium amide solutions (less than 1%), an operating pressure of 20 to 60 MPa (200-600 atmospheres).

**\*\*1B231** Tritium facilities or plants, and equipment therefor, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) Tritium, tritium compounds, and mixtures containing tritium are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110). (2) See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry.

*Related Definitions:* N/A  
*Items:*

- a. Facilities or plant for the production, recovery, extraction, concentration, or handling of tritium;
- b. Equipment for tritium facilities or plant, as follows:
  - b.1. Hydrogen or helium refrigeration units capable of cooling to 23 K (-250 °C) or less, with heat removal capacity greater than 150 watts; *or*
  - b.2. Hydrogen isotope storage and purification systems using metal hydrides as the storage, or purification medium.

**\*\*1B232 Turboexpanders or turboexpander-compressor sets having both of the following characteristics (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) Equipment “specially designed” or prepared for the production of heavy water is subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110). (2) See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry.

*Related Definitions:* N/A  
*Items:*

- a. Designed for operation with an outlet temperature of 35 K (-238 °C) or less; *and*
- b. Designed for a throughput of hydrogen gas of 1,000 kg/h or greater.

**\*\*1B233 Lithium isotope separation facilities or plants, and systems and equipment therefor (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
-------------------	--

NP applies to 1B233.b	NP Column 1
AT applies to 1B233.b	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCN [1E001](#) (“development” and “production”) and ECCN [1E201](#) (“use”) for technology for items described in this entry. (2) Facilities and plants described in 1B233.a are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110). (3) Certain lithium isotope separation equipment and components for the plasma separation process (PSP) that are described in 1B233.b through .d are also directly applicable to uranium isotope separation and are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*Items:*

- a. Facilities or plants for the separation of lithium isotopes;
- b. Equipment for the separation of lithium isotopes based on the lithium-mercury amalgam process, as follows:
  - b.1. Packed liquid-liquid exchange columns “specially designed” for lithium amalgams;
  - b.2. Mercury and/or lithium amalgam pumps;
  - b.3. Lithium amalgam electrolysis cells;
  - b.4. Evaporators for concentrated lithium hydroxide solution.
- c. Ion exchange systems “specially designed” for lithium isotope separation, and “specially designed” component parts therefor;

d. Chemical exchange systems (employing crown ethers, cryptands, or lariat ethers) “specially designed” for lithium isotope separation, and “specially designed” component parts therefor.

**\*\*1B234** High explosive containment vessels, chambers, containers, and other similar containment devices, not enumerated in ECCN 1B608 or in USML Category IV or V of the ITAR, designed for the testing of high explosives or explosive devices and having both of the characteristics described in this ECCN (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) Devices “specially designed” for the handling, control, activation, monitoring, detection, protection, discharge, or detonation of the articles enumerated in USML Category IV(a) and (b) are controlled by USML Category IV(c) of the ITAR (see 22 CFR parts 120 through 130). (2) See USML Category V of the ITAR (22 CFR parts 120 through 130) for devices identified therein that are “specially designed” to fully contain explosives

enumerated in USML Category V. (3) Also see ECCN 1B608 for “equipment” “specially designed” for the “development,” “production,” repair, overhaul, or refurbishing of items controlled by ECCN 1C608 or USML Category V and not elsewhere specified on the USML.

*Related Definitions:* N/A

*Items:*

- a. Designed to fully contain an explosion equivalent to 2 kg of TNT or greater; *and*
- b. Having design elements or features enabling real time or delayed transfer of diagnostic or measurement information.

**\*\*1B607** Military test, inspection, and production “equipment” and related commodities “specially designed” for the “development,” “production,” repair, overhaul, or refurbishing of commodities identified in ECCN 1A607 or 1C607, or defense articles enumerated or otherwise described in USML Category XIV (see List of Items Controlled).

**License Requirements**

**List Based License Exceptions (See Part 740 for a description of all license exceptions)**

LVS: \$1500  
GBS: N/A

**Special Conditions for STA**

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 1B607.

**List of Items Controlled**

*Related Controls:* (1) See ECCN 2B350 for controls on certain incinerators. (2) See ECCN 0A919 for “military commodities” located and produced outside the United States that incorporate more than a *de minimis* amount of US-origin “600 series” controlled content.

*Related Definitions:* N/A

*Items:*

- a. “Equipment” “specially designed” for the destruction of the chemical agents controlled by USML Category XIV(a).

*Note to 1B607.a:* ECCN 1B607.a includes controls over facilities “specially designed” for destruction operations. This paragraph .a does not control incinerators and “specially designed” handling facilities or “specially designed” waste supply systems therefor.

- b. Test facilities and “equipment” “specially designed” for military certification, qualification, or testing of commodities controlled by ECCN 1A607.e, .f, .g, .h, or .j or by USML Category XIV(f), except for XIV(f)(1).

- c. Tooling and “equipment” “specially designed” for the “development,” “production,” repair, overhaul, or refurbishing of commodities controlled by ECCN 1A607.e, .f, .g, .h, or .j or USML Category XIV(f).

- d. through w. [Reserved]

- x. “Parts,” “components,” “accessories,” and “attachments” that are “specially designed” for a commodity controlled by ECCN 1B607.b or .c, or for a defense article controlled by USML Category XIV(f), and that are not enumerated or otherwise described elsewhere in the USML.

**\*\*1B608** Test, inspection, and production “equipment” and related commodities “specially designed” for the “development,” “production,” repair, overhaul, or refurbishing of commodities enumerated in ECCN 1C608 or USML Category V (see List of Items Controlled).

ECCN 1B115 for controls on “production equipment,” not controlled by this ECCN 1B608, for propellants or propellant constituents described in ECCN 1C011.a, 1C011.b, or 1C111 or in USML Category V.

*Related Definitions:* N/A

*Items:*

**License Requirements**

*Reason for Control:* NS, RS, MT, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>

*Items:*

- a. Electrolytic cells for fluorine production, n.e.s.;
- b. Particle accelerators;
- c. Industrial process control hardware/systems designed for power industries, n.e.s.;
- d. Freon and chilled water cooling systems capable of continuous cooling duties of 100,000 BTU/hr (29.3 kW) or greater;

e. Equipment for the production of structural composites, fibers, prepregs and preforms, n.e.s.

**C. “MATERIALS”**

**Technical Note:**

*Metals and alloys: Unless provision to the contrary is made, the words “metals” and “alloys” in 1C001 to 1C011 cover crude and semi-fabricated forms, as follows:*

*Crude forms: Anodes, balls, bars (including notched bars and wire bars), billets, blocks, blooms, brickets, cakes, cathodes, crystals, cubes, dice, grains, granules, ingots, lumps, pellets, pigs, powder, rondelles, shot, slabs, slugs, sponge, sticks;*

*Semi-fabricated forms (whether or not coated, plated, drilled or punched):*

*a. Wrought or worked materials fabricated by rolling, drawing, extruding, forging, impact extruding, pressing, graining, atomizing, and grinding, i.e.: angles, channels, circles, discs, dust, flakes, foils and leaf, forging, plate, powder, pressings and stampings, ribbons, rings, rods (including bare welding rods, wire rods, and rolled wire), sections, shapes, sheets, strip, pipe and tubes (including tube rounds, squares, and hollows), drawn or extruded wire;*

*b. Cast material produced by casting in sand, die, metal, plaster or other types of molds, including high pressure castings, sintered forms, and forms made by powder metallurgy.*

*The object of the control should not be defeated by the export of non-listed forms alleged to be finished products but representing in reality crude forms or semi-fabricated forms.*

**\*\*1C001 Materials “specially designed” for absorbing electromagnetic radiation, or**

**intrinsically conductive polymers, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship any item in this entry to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* See also [1C101](#)  
*Related Definitions:* N/A  
*Items:*

a. Materials for absorbing frequencies exceeding  $2 \times 10^8$  Hz but less than  $3 \times 10^{12}$  Hz.

*Note 1:* 1C001.a does not control:

*a. Hair type absorbers, constructed of natural or synthetic fibers, with non-magnetic loading to provide absorption;*

b. Absorbers having no magnetic loss and whose incident surface is non-planar in shape, including pyramids, cones, wedges and convoluted surfaces;

c. Planar absorbers, having all of the following:

1. Made from any of the following:

a. Plastic foam materials (flexible or non-flexible) with carbon-loading, or organic materials, including binders, providing more than 5% echo compared with metal over a bandwidth exceeding  $\pm 15\%$  of the center frequency of the incident energy, and not capable of withstanding temperatures exceeding 450 K (177 °C); or

b. Ceramic materials providing more than 20% echo compared with metal over a bandwidth exceeding  $\pm 15\%$  of the center frequency of the incident energy, and not capable of withstanding temperatures exceeding 800 K (527 °C);

**Technical Note:** Absorption test samples for 1C001.a. Note 1.c.1 should be a square at least 5 wavelengths of the center frequency on a side and positioned in the far field of the radiating element.

2. Tensile strength less than  $7 \times 10^6$  N/m<sup>2</sup>; and

3. Compressive strength less than  $14 \times 10^6$  N/m<sup>2</sup>;

d. Planar absorbers made of sintered ferrite, having all of the following:

1. A specific gravity exceeding 4.4; and

2. A maximum operating temperature of 548 K (275 °C);

e. Planar absorbers having no magnetic loss and fabricated from 'open-cell foams' plastic material with a density of 0.15 grams/cm<sup>3</sup> or less.

**Technical Note:** 'Open-cell foams' are flexible and porous materials, having an inner structure open to the atmosphere. 'Open-cell foams' are also known as reticulated foams.

**Note 2:** Nothing in Note 1 releases magnetic materials to provide absorption when contained in paint.

b. Materials not transparent to visible light and specially designed for absorbing near-infrared radiation having a wavelength exceeding 810 nm but less than 2,000 nm (frequencies exceeding 150 THz but less than 370 THz);

**Note:** 1C001.b does not apply to materials, "specially designed" or formulated for any of the following applications:

a. "Laser" marking of polymers; or

b. "Laser" welding of polymers.

c. Intrinsically conductive polymeric materials with a 'bulk electrical conductivity' exceeding 10,000 S/m (Siemens per meter) or a 'sheet (surface) resistivity' of less than 100 ohms/square, based on any of the following polymers:

c.1. Polyaniline;

c.2. Polypyrrole;

c.3. Polythiophene;

c.4. Poly phenylene-vinylene; or

c.5. Poly thienylene-vinylene.

**Note:** 1C001.c does not apply to materials in a liquid form.

**Technical Note:** 'Bulk electrical conductivity' and 'sheet (surface) resistivity' should be determined using ASTM D-257 or national equivalents.

**\*\*1C002** Metal alloys, metal alloy powder and alloyed materials, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
NP applies to 1C002.b.3 or b.4 if they exceed the parameters stated in 1C202	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$3000; N/A for NP  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry. (2) Also see ECCN [1C202](#). (3) Aluminum alloys and titanium alloys in physical forms and finished products “specially designed” or prepared for use in separating uranium isotopes are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definition:* N/A

*Items:*

**Note:** 1C002 does not control metal alloys, metal alloy powder and alloyed materials, specially formulated for coating purposes.

**Technical Note 1:** The metal alloys in 1C002 are those containing a higher percentage by weight of the stated metal than of any other element.

**Technical Note 2:** ‘Stress-rupture life’ should be measured in accordance with ASTM standard E-139 or national equivalents.

**Technical Note 3:** ‘Low cycle fatigue life’ should be measured in accordance with ASTM Standard E-606 ‘Recommended Practice for Constant-Amplitude Low-Cycle Fatigue Testing’ or national equivalents. Testing should be axial with an average stress ratio equal to 1 and a stress-concentration factor ( $K_t$ ) equal to 1. The average stress is defined as maximum stress minus minimum stress divided by maximum stress.

a. Aluminides, as follows:

a.1. Nickel aluminides containing a minimum of 15% by weight aluminum, a maximum of 38% by weight aluminum and at least one additional alloying element;

a.2. Titanium aluminides containing 10% by weight or more aluminum and at least one additional alloying element;

b. Metal alloys, as follows, made from the powder or particulate material controlled by 1C002.c:

b.1. Nickel alloys having any of the following:

b.1.a. A ‘stress-rupture life’ of 10,000 hours or longer at 923 K (650 °C) at a stress of 676 MPa; *or*

b.1.b. A ‘low cycle fatigue life’ of 10,000 cycles or more at 823 K (550 °C) at a maximum stress of 1,095 MPa;

b.2. Niobium alloys having any of the following:

b.2.a. A ‘stress-rupture life’ of 10,000 hours or longer at 1,073 K (800 °C) at a stress of 400 MPa; *or*

b.2.b. A ‘low cycle fatigue life’ of 10,000 cycles or more at 973 K (700 °C) at a maximum stress of 700 MPa;

b.3. Titanium alloys having any of the following:

b.3.a. A ‘stress-rupture life’ of 10,000 hours or longer at 723 K (450 °C) at a stress of 200 MPa; *or*

b.3.b. A ‘low cycle fatigue life’ of 10,000 cycles or more at 723 K (450 °C) at a maximum stress of 400 MPa;

b.4 Aluminum alloys having any of the following:

b.4.a. A tensile strength of 240 MPa or more at 473 K (200 °C); *or*

b.4.b. A tensile strength of 415 MPa or more at 298 K (25 °C);

b.5. Magnesium alloys having all the following:

b.5.a. A tensile strength of 345 MPa or more; and

b.5.b. A corrosion rate of less than 1 mm/year in 3% sodium chloride aqueous solution measured in accordance with ASTM standard G-31 or national equivalents;

c. Metal alloy powder or particulate material, having all of the following:

c.1. Made from any of the following composition systems:

**Technical Note:** *X in the following equals one or more alloying elements.*

c.1.a. Nickel alloys (Ni-Al-X, Ni-X-Al) qualified for turbine engine “parts” or “components,” i.e. with less than 3 non-metallic particles (introduced during the manufacturing process) larger than 100 µm in 10<sup>9</sup> alloy particles;

c.1.b. Niobium alloys (Nb-Al-X or Nb-X-Al, Nb-Si-X or Nb-X-Si, Nb-Ti-X or Nb-X-Ti);

c.1.c. Titanium alloys (Ti-Al-X or Ti-X-Al);

c.1.d. Aluminum alloys (Al-Mg-X or Al-X-Mg, Al-Zn-X or Al-X-Zn, Al-Fe-X or Al-X-Fe); *or*

c.1.e. Magnesium alloys (Mg-Al-X or Mg-X-Al);

c.2. Made in a controlled environment by any of the following processes:

c.2.a. ‘Vacuum atomization’;

c.2.b. ‘Gas atomization’;

c.2.c. ‘Rotary atomization’;

c.2.d. ‘Splat quenching’;

c.2.e. ‘Melt spinning’ and ‘comminution’;

c.2.f. ‘Melt extraction’ and ‘comminution’;

c.2.g. ‘Mechanical alloying’; *or*

c.2.h. ‘Plasma atomization’; *and*

c.3. Capable of forming materials controlled by 1C002.a or 1C002.b;

d. Alloyed materials, having all the following:

d.1. Made from any of the composition systems specified by 1C002.c.1;

d.2. In the form of uncomminuted flakes, ribbons or thin rods; *and*

d.3. Produced in a controlled environment by any of the following:

d.3.a. ‘Splat quenching’;

d.3.b. ‘Melt spinning’; or

d.3.c. ‘Melt extraction’.

**Technical Notes:**

1. ‘Vacuum atomization’ is a process to reduce a molten stream of metal to droplets of a diameter of 500 µm or less by the rapid evolution of a dissolved gas upon exposure to a vacuum.

2. ‘Gas atomization’ is a process to reduce a molten stream of metal alloy to droplets of 500 µm diameter or less by a high pressure gas stream.

3. ‘Rotary atomization’ is a process to reduce a stream or pool of molten metal to droplets of a diameter of 500 µm or less by centrifugal force.

4. ‘Splat quenching’ is a process to ‘solidify rapidly’ a molten metal stream impinging upon a chilled block, forming a flake-like product.

5. ‘Melt spinning’ is a process to ‘solidify rapidly’ a molten metal stream impinging upon a rotating chilled block, forming a flake, ribbon or rod-like product.

6. ‘Comminution’ is a process to reduce a material to particles by crushing or grinding.

7. ‘Melt extraction’ is a process to ‘solidify rapidly’ and extract a ribbon-like alloy product by the insertion of a short segment of a rotating chilled block into a bath of a molten metal alloy.

8. ‘Mechanical alloying’ is an alloying process resulting from the bonding, fracturing and rebonding of elemental and master alloy powders by mechanical impact. Non-metallic particles may be incorporated in the alloy by addition of the appropriate powders.

9. ‘Plasma atomization’ is a process to reduce a molten stream or solid metal to droplets of 500 µm diameter or less, using plasma torches in an inert gas environment.

10. ‘Solidify rapidly’ is a process involving the solidification of molten material at cooling rates exceeding 1000 K/sec.

**\*\*1C003** Magnetic metals, of all types and of whatever form, having any of the following (see List of Items Controlled).

**License Requirements**

Reason for Control: NS, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: \$3000  
GBS: N/A

**List of Items Controlled**

Related Controls: N/A  
Related Definitions: N/A  
Items:

a. Initial relative permeability of 120,000 or more and a thickness of 0.05 mm or less;

**Technical Note:** Measurement of initial relative permeability must be performed on fully annealed materials.

b. Magnetostrictive alloys having any of the following:

b.1. A saturation magnetostriction of more than  $5 \times 10^{-4}$ ; or

b.2. A magnetomechanical coupling factor (k) of more than 0.8; *or*

c. Amorphous or ‘nanocrystalline’ alloy strips, having all of the following:

c.1. A composition having a minimum of 75% by weight of iron, cobalt or nickel;

c.2. A saturation magnetic induction (B<sub>s</sub>) of 1.6 T or more; *and*

c.3. Any of the following:

c.3.a. A strip thickness of 0.02 mm or less; *or*

c.3.b. An electrical resistivity of  $2 \times 10^{-4}$  ohm cm or more.

**Technical Note:** ‘Nanocrystalline’ materials in 1C003.c are those materials having a crystal grain size of 50 nm or less, as determined by X-ray diffraction.

**\*\*1C004** Uranium titanium alloys or tungsten alloys with a “matrix” based on iron, nickel or copper, having all of the following (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: \$3000  
GBS: N/A

**List of Items Controlled**

*Related Controls:* See also [1C117](#) and [1C226](#).

*Related Definitions:* N/A

*Items:*

- a. A density exceeding 17.5 g/cm<sup>3</sup>;
- b. An elastic limit exceeding 880 MPa;
- c. An ultimate tensile strength exceeding 1,270 MPa; *and*
- d. An elongation exceeding 8%.

**\*\*1C005** “Superconductive” “composite” conductors in lengths exceeding 100 m or with a mass exceeding 100 g, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: \$1500  
GBS: N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

- a. “Superconductive” “composite” conductors containing one or more niobium-titanium ‘filaments’, having all of the following:
  - a.1. Embedded in a “matrix” other than a copper or copper-based mixed “matrix”; *and*

a.2. Having a cross-section area less than  $0.28 \times 10^{-4} \text{ mm}^2$  (6  $\mu\text{m}$  in diameter for circular ‘filaments’);

b. “Superconductive” “composite” conductors consisting of one or more “superconductive” ‘filaments’ other than niobium-titanium, having all of the following:

b.1. A “critical temperature” at zero magnetic induction exceeding 9.85 K (-263.31 °C); and

b.2. Remaining in the “superconductive” state at a temperature of 4.2 K (-268.96°C) when exposed to a magnetic field oriented in any direction perpendicular to the longitudinal axis of conductor and corresponding to a magnetic induction of 12 T with critical current density exceeding 1750 A/mm<sup>2</sup> on overall cross-section of the conductor.

c. “Superconductive” “composite” conductors consisting of one or more “superconductive” ‘filaments’ which remain “superconductive” above 115 K (-158.16°C).

**Technical Note:** For the purpose of 1C005, ‘filaments’ may be in wire, cylinder, film, tape or ribbon form.

**\*\*1C006 Fluids and lubricating materials, as follows (see List of Items Controlled).**

**License Requirements**

Reason for Control: NS, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: \$3000  
 GBS: Yes for 1C006.d

**List of Items Controlled**

Related Controls: See also [1C996](#).

Related Definitions: N/A

Items:

a. [Reserved]

b. Lubricating materials containing, as their principal ingredients, any of the following:

b.1. Phenylene or alkylphenylene ethers or thio-ethers, or their mixtures, containing more than two ether or thio-ether functions or mixtures thereof; *or*

b.2. Fluorinated silicone fluids with a kinematic viscosity of less than 5,000 mm<sup>2</sup>/s (5,000 centistokes) measured at 298 K (25 °C);

c. Damping or flotation fluids having all of the following:

c.1. Purity exceeding 99.8%;

c.2. Containing less than 25 particles of 200  $\mu\text{m}$  or larger in size per 100 ml; *and*

c.3. Made from at least 85% of any of the following:

c.3.a. Dibromotetrafluoroethane (CAS 25497-30-7, 124-73-2, 27336-23-8);

c.3.b. Polychlorotrifluoroethylene (oily and waxy modifications only); *or*

c.3.c. Polybromotrifluoroethylene;

d. Fluorocarbon electronic cooling fluids having all of the following:

d.1. Containing 85% by weight or more of any of the following, or mixtures thereof:

d.1.a. Monomeric forms of perfluoropolyalkylether-triazines or perfluoroaliphatic-ethers;

- d.1.b. Perfluoroalkylamines;
- d.1.c. Perfluorocycloalkanes; *or*
- d.1.d. Perfluoroalkanes;
- d.2. Density at 298 K (25 °C) of 1.5 g/ml or more;
- d.3. In a liquid state at 273 K (0 °C); *and*
- d.4. Containing 60% or more by weight of fluorine.

*Note:* 1C006.d does not apply to materials specified and packaged as medical products.

**\*\*1C007** Ceramic powders, ceramic-“matrix” “composite” materials and ‘precursor materials,’ as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, MT, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 2
MT applies to items in 1C007.c when the dielectric constant is less than 6 at any frequency from 100 MHz to 100 GHz for use in “missile” radomes	MT Column 1
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$5,000, except N/A for MT and for 1C007.e  
*GBS:* N/A

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship any item in 1C007.c entry to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* See also [1C107](#)

*Related Definitions:* N/A

*Items:*

a. Ceramic powders of titanium diboride (TiB<sub>2</sub>) (CAS 12045-63-5) having total metallic impurities, excluding intentional additions, of less than 5,000 ppm, an average particle size equal to or less than 5 µm and no more than 10% of the particles larger than 10 µm;

b. [Reserved]

c. Ceramic-”matrix” “composite” materials as follows:

c.1. Ceramic-ceramic “composite” materials with a glass or oxide-“matrix” and reinforced with any of the following:

c.1.a. Continuous fibers made from any of the following materials:

c.1.a.1. Al<sub>2</sub>O<sub>3</sub> (CAS 1344-28-1); *or*

c.1.a.2. Si-C-N; *or*

*Note:* 1C007.c.1.a does not apply to “composites” containing fibers with a tensile strength of less than 700 MPa at 1,273 K (1,000°C) or tensile creep resistance of more than 1% creep strain at 100 MPa load and 1,273 K (1,000°C) for 100 hours.

c.1.b. Fibers being all of the following:

c.1.b.1. Made from any of the following materials:

c.1.b.1.a. Si-N;

c.1.b.1.b. Si-C;

c.1.b.1.c. Si-Al-O-N; *or*

c.1.b.1.d. Si-O-N; *and*

c.1.b.2. Having a “specific tensile strength” exceeding  $12.7 \times 10^3$  m;

c.2. Ceramic-”matrix” “composite” materials with a “matrix” formed of carbides or nitrides of silicon, zirconium or boron;

*N.B.:* For items previously specified by 1C007.c see 1C007.c.1.b.

d. [Reserved]

*N.B.:* For items previously specified by 1C007.d see 1C007.c.2.

e. ‘Precursor materials’ “specially designed” for the “production” of materials controlled by 1C007.c, as follows:

e.1. Polydiorganosilanes;

e.2. Polysilazanes;

e.3. Polycarbosilazanes;

**Technical Note:** For the purposes of 1C007, ‘precursor materials’ are special purpose polymeric or metallo-organic materials used for the “production” of silicon carbide, silicon nitride, or ceramics with silicon, carbon and nitrogen.

f. [Reserved]

*N.B.:* For items previously specified by 1C007.f see 1C007.c.1.a.

**\*\*1C008 Non-fluorinated polymeric substances as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$200

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See also [1A003](#).

*Related Definitions:* N/A

*Items:*

a. Imides as follows:

a.1. Bismaleimides;

a.2. Aromatic polyamide-imides (PAI) having a ‘glass transition temperature (Tg)’ exceeding 563 K (290°C);

a.3. Aromatic polyimides having a ‘glass transition temperature (Tg)’ exceeding 505 K (232°C);

a.4. Aromatic polyetherimides having a ‘glass transition temperature (Tg)’ exceeding 563 K (290°C);

*Note:* 1C008.a controls the substances in liquid or solid “fusible” form, including resin, powder, pellet, film, sheet, tape, or ribbon.

*N.B.:* For non-“fusible” aromatic polyimides in film, sheet, tape, or ribbon form, see ECCN 1A003.

b. [RESERVED]

c. [RESERVED]

d. Polyarylene ketones;

e. Polyarylene sulfides, where the arylene group is biphenylene, triphenylene or combinations thereof;

f. Polybiphenylenethersulphone having a ‘glass transition temperature (Tg)’ exceeding 563 K (290° C).

**Technical Notes:**

1. The ‘glass transition temperature (Tg)’ for 1C008.a.2 thermoplastic materials, 1C008.a.4 materials and 1C008.f materials is determined using the method described in ISO 11357-2 (1999) or national equivalents.

2. The ‘glass transition temperature (Tg)’ for 1C008.a.2 thermosetting materials and 1C008.a.3 materials is determined using the 3-point bend method described in ASTM D 7028-07 or equivalent national standard. The test is to be performed using a dry test specimen which has attained a minimum of 90% degree of cure as specified by ASTM E 2160-04 or equivalent national standard, and was cured using the combination of standard- and post-cure processes that yield the highest Tg.

**\*\*1C009 Unprocessed fluorinated compounds as follows (see List of Items Controlled).**

**License Requirements**

GBS: N/A

### Special Conditions for STA

**STA:** License Exception STA may not be used to ship any item in 1C010.c to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

### List of Items Controlled

**Related Controls:** (1) See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry. (2) Also see ECCNs [1C210](#) and [1C990](#). (3) See also 9C110 for material not controlled by [1C010.e](#), as defined by notes 1 or 2.

**Related Definitions:** 1.) “Specific modulus”: Young’s modulus in pascals, equivalent to N/m<sup>2</sup> divided by specific weight in N/m<sup>3</sup>, measured at a temperature of (296±2) K ((23±2) °C) and a relative humidity of (50±5)%. 2.) “Specific tensile strength”: ultimate tensile strength in pascals, equivalent to N/m<sup>2</sup> divided by specific weight in N/m<sup>3</sup>, measured at a temperature of (296±2) K ((23±2) °C) and a relative humidity of (50±5)%.

**Items:**

### Technical Notes:

**1.** For the purpose of calculating “specific tensile strength”, “specific modulus” or specific weight of “fibrous or filamentary materials” in 1C010.a, 1C010.b or 1C010.c, the tensile strength and modulus should be determined by using Method A described in ISO 10618 (2004) or national equivalents.

**2.** Assessing the “specific tensile strength”, “specific modulus” or specific weight of non-unidirectional “fibrous or filamentary materials” (e.g., fabrics, random mats or braids) in 1C010 is to be based on the mechanical

*properties of the constituent unidirectional monofilaments (e.g., monofilaments, yarns, rovings or tows) prior to processing into the non-unidirectional “fibrous or filamentary materials”.*

a. Organic “fibrous or filamentary materials”, having all of the following:

a.1. “Specific modulus” exceeding  $12.7 \times 10^6$  m; and

a.2. “Specific tensile strength” exceeding  $23.5 \times 10^4$  m;

**Note:** 1C010.a does not control polyethylene.

b. Carbon “fibrous or filamentary materials”, having all of the following:

b.1. “Specific modulus” exceeding  $14.65 \times 10^6$  m; and

b.2. “Specific tensile strength” exceeding  $26.82 \times 10^4$  m;

**Note:** 1C010.b does not control:

a. “Fibrous or filamentary materials”, for the repair of “civil aircraft” structures or laminates, having all of the following:

1. An area not exceeding 1 m<sup>2</sup>;
2. A length not exceeding 2.5 m; and
3. A width exceeding 15 mm.

b. Mechanically chopped, milled or cut carbon “fibrous or filamentary materials” 25.0 mm or less in length.

c. Inorganic “fibrous or filamentary materials”, having all of the following:

c.1. “Specific modulus” exceeding  $2.54 \times 10^6$  m; and

c.2. Melting, softening, decomposition or sublimation point exceeding 1,922 K (1,649 °C) in an inert environment;

**Note:** 1C010.c does not control:

a. Discontinuous, multiphase, polycrystalline alumina fibers in chopped fiber or random mat form, containing 3% by weight or more silica, with a “specific modulus” of less than  $10 \times 10^6$  m;

b. Molybdenum and molybdenum alloy fibers;

c. Boron fibers;

d. Discontinuous ceramic fibers with a melting, softening, decomposition or sublimation point lower than 2,043 K (1,770°C) in an inert environment.

d. “Fibrous or filamentary materials”, having any of the following:

d.1. Composed of any of the following:

d.1.a. Polyetherimides controlled by 1C008.a; or

d.1.b. Materials controlled by 1C008.b to 1C008.f; or

d.2. Composed of materials controlled by 1C010.d.1.a or 1C010.d.1.b and ‘commingled’ with other fibers controlled by 1C010.a, 1C010.b or 1C010.c;

**Technical Note:** ‘Commingled’ is filament to filament blending of thermoplastic fibers and reinforcement fibers in order to produce a fiber reinforcement “matrix” mix in total fiber form.

e. Fully or partially resin impregnated or pitch impregnated “fibrous or filamentary materials” (prepregs), metal or carbon coated “fibrous or filamentary materials” (preforms) or ‘carbon fiber preforms’, having all of the following:

e.1. Having any of the following:

e.1.a. Inorganic “fibrous or filamentary materials” controlled by 1C010.c; or

e.1.b. Organic or carbon “fibrous or filamentary materials”, having all of the following:

e.1.b.1. “Specific modulus” exceeding  $10.15 \times 10^6$  m; and

e.1.b.2. “Specific tensile strength” exceeding  $17.7 \times 10^4$  m; and

e.2. Having any of the following:

e.2.a. Resin or pitch, controlled by 1C008 or 1C009.b;

e.2.b. ‘Dynamic Mechanical Analysis glass transition temperature (DMA T<sub>g</sub>)’ equal to or exceeding 453 K (180°C) and having a phenolic resin; or

e.2.c. ‘Dynamic Mechanical Analysis glass transition temperature (DMA T<sub>g</sub>)’ equal to or exceeding 505 K (232°C) and having a resin or pitch, not specified by 1C008 or 1C009.b, and not being a phenolic resin;

**Note 1:** Metal or carbon coated “fibrous or filamentary materials” (preforms) or ‘carbon fiber preforms’, not impregnated with resin or pitch, are specified by “fibrous or filamentary materials” in 1C010.a, 1C010.b or 1C010.c.

**Note 2:** 1C010.e does not apply to:

a. Epoxy resin “matrix” impregnated carbon “fibrous or filamentary materials” (prepregs) for the repair of “civil aircraft” structures or laminates, having all of the following:

1. An area not exceeding  $1 \text{ m}^2$ ;
2. A length not exceeding 2.5 m; and
3. A width exceeding 15 mm;

b. Fully or partially resin-impregnated or pitch-impregnated mechanically chopped, milled or cut carbon “fibrous or filamentary materials” 25.0 mm or less in length when using a resin or pitch other than those specified by 1C008 or 1C009.b.

**Technical Notes:**

1. ‘Carbon fiber preforms’ are an ordered arrangement of uncoated or coated fibers intended to constitute a framework of a part before the “matrix” is introduced to form a “composite”.

2. The ‘Dynamic Mechanical Analysis glass transition temperature (DMA  $T_g$ )’ for materials controlled by 1C010.e is determined using the method described in ASTM D 7028 -07, or equivalent national standard, on a dry test specimen. In the case of thermoset materials, degree of cure of a dry test specimen shall be a minimum of 90% as defined by ASTM E 2160 04 or equivalent national standard.

flaked or ground, manufactured from material consisting of 99 percent or more of items controlled by 1C011.b; and b) Metal powders mixed with other substances to form a mixture formulated for military purposes.

*Related Definitions:* N/A

*Items:*

a. Metals in particle sizes of less than 60  $\mu$ m whether spherical, atomized, spheroidal, flaked or ground, manufactured from material consisting of 99% or more of zirconium, magnesium and alloys thereof;

**Technical Note:** The natural content of hafnium in the zirconium (typically 2% to 7%) is counted with the zirconium.

**Note:** The metals or alloys specified by 1C011.a also refer to metals or alloys encapsulated in aluminum, magnesium, zirconium or beryllium.

**\*\*1C011 Metals and compounds, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, MT, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 2
MT applies to 1C011.a and .b for items that meet or exceed the parameters in 1C111.	MT Column 1
AT applies to entire entry	AT Column 1

b. Boron or boron alloys, with a particle size of 60  $\mu$ m or less, as follows:

b.1. Boron with a purity of 85% by weight or more;

b.2. Boron alloys with a boron content of 85% by weight or more;

**Note:** The metals or alloys specified by 1C011.b also refer to metals or alloys encapsulated in aluminum, magnesium, zirconium or beryllium.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

**List of Items Controlled**

*Related Controls:* (1) Materials controlled by this entry include structural materials and coatings (including paints), “specially designed” for reduced or tailored reflectivity or emissivity in the microwave, infrared or ultraviolet spectra. (2) This entry does not control coatings (including paints) when specially used for the thermal control of satellites. (3) For commodities that meet the definition of defense articles under 22 CFR 120.3 of the International Traffic in Arms Regulations (ITAR), which describes similar

**List of Items Controlled**

*Related Controls:* (1) See also [1C004](#), [1C007](#), and [1C298](#). (2) For commodities that meet the definition of defense articles under 22 CFR 120.3 of the ITAR, which describes similar commodities “subject to the ITAR” (See 22 CFR parts 120 through 130, including USML Category XIII). (3) “Special fissile materials” and “other fissile

materials”; except, four “effective grams” or less when contained in a sensing component in instruments are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*Items:*

a. Fine grain graphites with a bulk density of 1.72 g/cm<sup>3</sup> or greater, measured at 15 °C, and having a grain size of 100 micrometers or less, usable for rocket nozzles and reentry vehicle nose tips as follows:

a.1. Cylinders having a diameter of 120 mm or greater and a length of 50 mm or greater;

a.2. Tubes having an inner diameter of 65 mm or greater and a wall thickness of 25 mm or greater and a length of 50 mm or greater;

a.3. Blocks having a size of 120 mm x 120 mm x 50 mm or greater.

b. Pyrolytic or fibrous reinforced graphites, usable for rocket nozzles and reentry vehicle nose tips;

c. Ceramic composite materials (dielectric constant is less than 6 at any frequency from 100 MHz to 100 GHz) for use in radomes useable in rockets, missiles, and unmanned aerial vehicles capable of achieving a “range” equal to or greater than 300 km; *or*

d. High-temperature ceramic materials, useable in rockets, missiles, and unmanned aerial vehicles capable of achieving a “range” equal to or greater than 300 km, as follows:

d.1. Bulk machinable silicon-carbide reinforced unfired ceramic, usable for nose tips.

d.2. Reinforced silicon-carbide ceramic composites usable for nose tips, re-entry vehicles, nozzle flaps.

d.3. Bulk machinable ceramic composite materials consisting of an ‘Ultra High Temperature Ceramic (UHTC)’ matrix with a

melting point equal to or greater than 3000°C and reinforced with fibers or filaments, usable for missile components (such as nose tips, re-entry vehicles, leading edges, jet vanes, control surfaces, or rocket motor throat inserts).

*Note:* ECCN 1C107.d.3. does not control ‘Ultra High Temperature Ceramic (UHTC)’ materials in non-composite form.

*Technical Note:* ‘Ultra High Temperature Ceramics (UHTC)’ includes: titanium diboride (TiB<sub>2</sub>), zirconium diboride (ZrB<sub>2</sub>), niobium diboride (NbB<sub>2</sub>), hafnium diboride (HfB<sub>2</sub>), tantalum diboride (TaB<sub>2</sub>), titanium carbide (TiC), zirconium carbide (ZrC), niobium carbide (NbC), hafnium carbide (HfC), tantalum carbide (TaC).

**\*\*1C111 Propellants and constituent chemicals for propellants, other than those specified in 1C011, as follows (see List of Items Controlled).**

**License Requirements**

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See USML Category V(e)(7) for controls on HTPB (hydroxyl terminated polybutadiene) with a hydroxyl functionality equal to or greater than 2.2 and less than or equal to 2.4, a hydroxyl value of

less than 0.77 meq/g, and a viscosity at 30 °C of less than 47 poise (CAS # 69102-90-5). (2) See USML Category V(f)(3) for controls on ferrocene derivatives, including butacene. (3) See ECCN 1C608 for controls on oxidizers that are composed of fluorine and also other halogens, oxygen, or nitrogen, except for chlorine trifluoride, which is controlled under this ECCN 1C111.a.3.f. (4) See ECCN 1C011.b for controls on boron and boron alloys not controlled under this ECCN 1C111.a.2.b. (5) See USML Category V(d)(10) for controls on Inhibited Red Fuming Nitric Acid (IRFNA) (CAS 8007-58-7).

*Related Definitions:* Particle size is the mean particle diameter on a weight or volume basis. Best industrial practices must be used in sampling, and in determining particle size, and the controls may not be undermined by the addition of larger or smaller sized material to shift the mean diameter.

*Items:*

a. Propulsive substances:

a.1. Spherical or spheroidal aluminum powder (C.A.S. 7429-90-5) in particle size of less than  $200 \times 10^{-6}$  m (200 µm) and an aluminum content of 97% by weight or more, if at least 10 % of the total weight is made up of particles of less than 63 µm, according to ISO 2591-1:1988 or national equivalents.

**Technical Note:** A particle size of 63 µm (ISO R-565) corresponds to 250 mesh (Tyler) or 230 mesh (ASTM standard E-11).

a.2. Metal powders and alloys where at least 90% of the total particles by particle volume or weight are made up of particles of less than 60 µ (determined by measurement techniques such as using a sieve, laser diffraction or optical scanning), whether spherical, atomized, spheroidal, flaked or ground, as follows:

a.2.a. Consisting of 97% by weight or more of any of the following:

a.2.a.1. Zirconium (C.A.S. # 7440-67-7);

a.2.a.2. Beryllium (C.A.S. # 7440-41-7); or

a.2.a.3. Magnesium (C.A.S. # 7439-95-4);

a.2.b. Boron or boron alloys with a boron content of 85 % or more by weight.

**Technical Note:** The natural content of hafnium in the zirconium (typically 2% to 7%) is counted with the zirconium.

**Note:** In a multimodal particle distribution (*e.g.*, mixtures of different grain sizes) in which one or more modes are controlled, the entire powder mixture is controlled.

a.3. Oxidizer substances usable in liquid propellant rocket engines, as follows:

a.3.a. Dinitrogen trioxide (CAS 10544-73-7);

a.3.b. Nitrogen dioxide (CAS 10102-44-0) / dinitrogen tetroxide (CAS 10544-72-6);

a.3.c. Dinitrogen pentoxide (CAS 10102-03-1);

a.3.d. Mixed oxides of nitrogen (MON);

a.3.e. [Reserved];

a.3.f. Chlorine trifluoride (ClF<sub>3</sub>).

**Technical Note:** Mixed oxides of nitrogen (MON) are solutions of nitric oxide (NO) in dinitrogen tetroxide/nitrogen dioxide (N<sub>2</sub>O<sub>4</sub>/NO<sub>2</sub>) that can be used in missile systems. There are a range of compositions that can be denoted as MON<sub>i</sub> or MON<sub>ij</sub>, where *i* and *j* are integers representing the percentage of nitric oxide in the mixture (*e.g.*, MON<sub>3</sub> contains 3% nitric oxide,

MON25 25% nitric oxide. An upper limit is MON40, 40% by weight).

b. Polymeric substances:

b.1. Carboxy-terminated polybutadiene (including carboxyl-terminated polybutadiene) (CTPB);

b.2. Hydroxy-terminated polybutadiene (including hydroxyl-terminated polybutadiene) (HTPB) (CAS 69102-90-5), except for hydroxyl-terminated polybutadiene as specified in USML Category V (see 22 CFR 121.1) (also see Related Controls Note #1 for this ECCN);

b.3. Polybutadiene acrylic acid (PBAA);

b.4. Polybutadiene acrylic acid acrylonitrile (PBAN) (CAS 25265-19-4 / CAS 68891-50-9);

b.5. Polytetrahydrofuran polyethylene glycol (TPEG).

**Technical Note:** Polytetrahydrofuran polyethylene glycol (TPEG) is a block copolymer of poly 1,4-Butanediol (CAS 110-63-4) and polyethylene glycol (PEG) (CAS 25322-68-3).

c. Other propellant energetic materials, additives, or agents:

c.1. [Reserved]

c.2. Triethylene glycol dinitrate (TEGDN);

c.3. 2 Nitrodiphenylamine (2-NDPA);

c.4. Trimethylolethane trinitrate (TMETN);

c.5. Diethylene glycol dinitrate (DEGDN).

d. Hydrazine and derivatives as follows:

d.1. Hydrazine (C.A.S. # 302-01-2) in concentrations of 70% or more;

d.2. Monomethyl hydrazine (MMH) (C.A.S. # 60-34-4);

d.3. Symmetrical dimethyl hydrazine (SDMH) (C.A.S. # 540-73-8);

d.4. Unsymmetrical dimethyl hydrazine (UDMH) (C.A.S. # 57-14-7);

d.5. Trimethylhydrazine (C.A.S. # 1741-01-1);

d.6. Tetramethylhydrazine (C.A.S. # 6415-12-9);

d.7. N,N diallylhydrazine (CAS 5164-11-4);

d.8. Allylhydrazine (C.A.S. # 7422-78-8);

d.9. Ethylene dihydrazine (CAS 6068-98-0);

d.10. Monomethylhydrazine dinitrate;

d.11. Unsymmetrical dimethylhydrazine nitrate;

d.12. 1,1-Dimethylhydrazinium azide (CAS 227955-52-4) / 1,2-Dimethylhydrazinium azide (CAS 299177-50-7);

d.13. Hydrazinium azide (C.A.S. # 14546-44-2);

d.14. Hydrazinium dinitrate (CAS 13464-98-7);

d.15. Diimido oxalic acid dihydrazine (C.A.S. # 3457-37-2);

d.16. 2-hydroxyethylhydrazine nitrate (HEHN);

d.17. Hydrazinium diperchlorate (C.A.S. # 13812-39-0);

d.18. Methylhydrazine nitrate (MHN) (CAS 29674-96-2);

d.19. 1,1-Diethylhydrazine nitrate (DEHN) / 1,2-Diethylhydrazine nitrate (DEHN) (CAS 363453-17-2);

d.20. 3,6-dihydrazino tetrazine nitrate (DHTN), also referred to as 1,4-dihydrazine nitrate.

**\*\*1C116 Maraging steels having both of the following (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* MT, NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [1E001](#) (“development” and “production”) and [1E101](#) (“use”) for technology for items controlled by this entry. (2) Also see ECCN [1C216](#). (3) Maraging steel, in physical forms and finished products and “specially designed” or prepared for use in separating uranium isotopes, is subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*Items:*

a. Having an ultimate tensile strength, measured at 20°C, equal to or greater than:

a.1. 0.9 GPa in the solution annealed stage; *or*

a.2. 1.5 GPa in the precipitation hardened stage; *and*

b. Any of the following forms:

b.1. Sheet, plate or tubing with a wall or plate thickness equal to or less than 5.0 mm; *or*

b.2. Tubular forms with a wall thickness equal to or less than 50 mm and having an inner diameter equal to or greater than 270 mm.

**Technical Note:**

*Maraging steels are iron alloys that are generally:*

a. *Characterized by high nickel, very low carbon content and use substitutional elements or precipitates to produce strengthening and age-hardening of the alloy; and*

b. *Subjected to heat treatment cycles to facilitate the martensitic transformation process (solution annealed stage) and subsequently age hardened (precipitation hardened stage).*

**\*\*1C117 Materials for the fabrication of missile “parts” or “components” for rockets or missiles capable of achieving a “range” equal to or greater than 300 km, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry. (2) Also see ECCNs [1C010](#) and [1C990](#).

*Related Definitions:* For the purpose of this entry, the term “fibrous or filamentary materials” is restricted to continuous “monofilaments”, “yarns”, “rovings”, “tows”, or “tapes”.

*Definitions for other terms used in this entry:* *Filament or Monofilament* is the smallest increment of fiber, usually several μm in diameter.

*Strand* is a bundle of filaments (typically over 200) arranged approximately parallel.

*Roving* is a bundle (typically 12-120) of approximately parallel strands.

*Yarn* is a bundle of twisted strands.

*Tow* is a bundle of filaments, usually approximately parallel.

*Tape* is a material constructed of interlaced or unidirectional filaments, strands, rovings, tows or yarns, etc., usually preimpregnated with resin.

*Specific modulus* is the Young's modulus in  $N/m^2$  divided by the specific weight in  $N/m^3$ , measured at a temperature of  $(296 \pm 2)$  K ( $(23 \pm 2)$  °C) and a relative humidity of  $50 \pm 5$  percent.

*Specific tensile strength* is the ultimate tensile strength in  $N/m^2$  divided by specific weight in  $N/m^3$ , measured at a temperature of  $(296 \pm 2)$  K ( $(23 \pm 2)$  °C) and a relative humidity of  $50 \pm 5$  percent.

*Items:*

- a. Carbon or aramid “fibrous or filamentary materials” having a “specific modulus” of  $12.7 \times 10^6$  m or greater or a “specific tensile strength” of  $235 \times 10^3$  m or greater *except* Aramid “fibrous or filamentary materials” having 0.25 percent or more by weight of an ester based fiber surface modifier;
- b. Glass “fibrous or filamentary materials” having a “specific modulus” of  $3.18 \times 10^6$  m or greater and a “specific tensile strength” of  $76.2 \times 10^3$  m or greater; *or*
- c. Thermoset resin impregnated continuous “yarns”, “rovings”, “tows” or “tapes” with a width no greater than 15 mm (prepregs), made from carbon or glass “fibrous or filamentary materials” controlled by 1C210.a or .b.

**Technical Note:** *The resin forms the matrix of the composite.*

**\*\*1C216** Maraging steel, other than that controlled by 1C116, “capable of” an ultimate tensile strength of 1,950 MPa or more, at 293 K (20 °C).

### License Requirements

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

### List of Items Controlled

*Related Controls:* (1) See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry. (2) Also see ECCN [1C116](#). (3) Maraging steel, in physical form and finished products “specially designed” or prepared for use in separating uranium isotopes, is subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* The phrase “capable of” in the ECCN heading refers to maraging steel either before or after heat treatment.

*ECCN Controls:* This entry does not control forms in which all linear dimensions are 75 mm or less.

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1C225** Boron enriched in the boron-10 ( $^{10}\text{B}$ ) isotope to greater than its natural isotopic abundance, as follows: elemental boron, compounds, mixtures containing boron, manufactures thereof, waste or scrap of any of the foregoing.

### License Requirements

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry.

*Related Definitions:* In this entry, mixtures containing boron include boron-loaded materials.

*Items:*

The list of items controlled is contained in the ECCN heading.

**Technical Note:** *The natural isotopic abundance of boron-10 is approximately 18.5 weight percent (20 atom percent).*

**\*\*1C226 Tungsten, tungsten carbide, and alloys containing more than 90% tungsten by weight, having both of the following characteristics (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry.

*Related Definitions:* N/A

*ECCN Controls:* This entry does not control manufactures “specially designed” as weights or gamma-ray collimators.

*Items:*

- a. In forms with a hollow cylindrical symmetry (including cylinder segments) with an inside diameter between 100 and 300 mm; *and*
- b. A mass greater than 20 kg.

**\*\*1C227 Calcium having both of the following characteristics (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See ECCNs [1E001](#) (“development” and “production”) and

[1E201](#) (“use”) for technology for items controlled by this entry.

*Related Definitions:* N/A

*Items:*

- a. Containing less than 1,000 parts per million by weight of metallic impurities other than magnesium; *and*
- b. Containing less than 10 parts per million by weight of boron.

**\*\*1C228** Magnesium having both of the following characteristics (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry.

*Related Definitions:* N/A

*Items:*

- a. Containing less than 200 parts per million by weight of metallic impurities other than calcium; *and*
- b. Containing less than 10 parts per million by weight of boron.

**\*\*1C229** Bismuth having both of the following characteristics (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry.

*Related Definitions:* N/A

*Items:*

- a. A purity of 99.99% or greater by weight; *and*
- b. Containing less than 10 parts per million by weight of silver.

**\*\*1C230** Beryllium metal, alloys containing more than 50% beryllium by weight, beryllium compounds, manufactures thereof, and waste or scrap of any of the foregoing.

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry.

*Related Definitions:* N/A

*ECCN Controls:* This entry does not control the following:

- a. Metal windows for X-ray machines, or for bore-hole logging devices;
- b. Oxide shapes in fabricated or semi-fabricated forms “specially designed” for electronic component parts or as substrates for electronic circuits;
- c. Beryl (silicate of beryllium and aluminum) in the form of emeralds or aquamarines.

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1C231 Hafnium metal, hafnium alloys and compounds containing more than 60% hafnium by weight, manufactures thereof, and waste or scrap of any of the foregoing.**

**License Requirements**

*Reason for Control:* NP, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry.

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1C232 Helium-3 (<sup>3</sup>He), mixtures containing helium-3, and products or devices containing any of the foregoing.**

**License Requirements**

*Reason for Control:* NP, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry.

*Related Definitions:* N/A

*ECCN Controls:* This entry does not control a product or device containing less than 1 g of helium-3.

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1C233** Lithium enriched in the lithium-6 (<sup>6</sup>Li) isotope to greater than its natural isotopic abundance, and products or devices containing enriched lithium, as follows: elemental lithium, alloys, compounds, mixtures containing lithium, manufactures thereof, and waste or scrap of any of the foregoing.

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry. (2) See ECCN [1B233](#) for lithium isotope separation facilities or plants, and equipment therefor. (3) Certain facilities or plants for the separation of lithium isotopes are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* The natural isotopic abundance of lithium-6 is approximately 6.5 weight percent (7.5 atom percent).

*ECCN Controls:* This entry does not control thermoluminescent dosimeters.

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1C234** Zirconium with a hafnium content of less than 1 part hafnium to 500 parts zirconium by weight, as follows: metal, alloys containing more than 50% zirconium by weight, compounds, manufactures thereof, and waste or scrap of any of the foregoing.

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry. (2) Zirconium metal and alloys in the form of tubes or assemblies of tubes, “specially designed” or prepared for use in a reactor, are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*ECCN Controls:* This entry does not control zirconium in the form of foil having a thickness of 0.10 mm (0.004 in.) or less.

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1C235** Tritium, tritium compounds, mixtures containing tritium in which the ratio of tritium to hydrogen atoms exceeds 1 part in 1,000, and products or devices containing any of the foregoing.

**License Requirements**

*Reason for Control:* NP, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry. (2) Also see ECCN [1B231](#). (3) Tritium that is byproduct material (e.g., produced in a nuclear reactor) is subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*ECCN Controls:* (1) This entry does not control tritium, tritium compounds, and mixtures that are byproduct material (e.g., produced in a nuclear reactor) – such materials are subject to the licensing jurisdiction of the Nuclear Regulatory Commission (see Related Controls paragraph for this entry). (2) This entry does not control a product or device containing less than 1.48 x 10<sup>3</sup> GBq (40 Ci) of tritium.

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1C236 Radionuclides appropriate for making neutron sources based on alpha-n reaction and products or devices containing such radionuclides (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NP, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry. (2) Certain alpha-emitting radionuclides are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*ECCN Controls:* This entry does not control a product or device containing less than 3.7 GBq (100 millicuries) of activity.

*Items:*

a. Radionuclides identified in 1C236.a.1 in any of the forms described in 1C236.a.2:

a.1. Radionuclides, as follows, appropriate for making neutron sources based on alpha-n reactions:

- a.1.a. Actinium 225;
- a.1.b. Actinium 227;
- a.1.c. Californium 253;
- a.1.d. Curium 240;
- a.1.e. Curium 241;
- a.1.f. Curium 242;

- a.1.g. Curium 243;
- a.1.h. Curium 244;
- a.1.i. Einsteinium 253;
- a.1.j. Einsteinium 254;
- a.1.k. Gadolinium 148;
- a.1.l. Plutonium 236;
- a.1.m. Plutonium 238;
- a.1.n. Polonium 208;
- a.1.o. Polonium 209;
- a.1.p. Polonium 210;
- a.1.q. Radium 223;
- a.1.r. Thorium 227;
- a.1.s. Thorium 228;
- a.1.t. Uranium 230;
- a.1.u. Uranium 232; and
- a.2. In any of the following forms:
  - a.2.a. Elemental;
  - a.2.b. Compounds having a total activity of 37 GBq (1 curie) per kg or greater; *or*
  - a.2.c. Mixtures having a total activity of 37 GBq (1 curie) per kg or greater.
- b. Products or devices containing radionuclides identified in 1C236.a.1 in any of the forms described in 1C236.a.2.

**\*\*1C237 Radium-226 (<sup>226</sup>Ra), radium-226 alloys, radium-226 compounds, mixtures containing radium-226, manufactures thereof,**

**and products or devices containing any of the foregoing.**

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry.

*Related Definitions:* N/A

*ECCN Controls:* This entry does not control the following:

- a. Medical applicators;
  - b. A product or device containing less than 0.37 GBq (10 millicuries) of radium-226.
- Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1C239 High explosives, other than those controlled by the U.S. Munitions List, or substances or mixtures containing more than 2% by weight thereof, with a crystal density greater than 1.8 g/cm<sup>3</sup> and having a detonation velocity greater than 8,000 m/s.**

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part</i>
-------------------	---

	738)
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry. (2) See ECCNs 1C608 (energetic materials and related commodities on the Wassenaar Arrangement Munitions List) and 1C992 (commercial charges and devices containing energetic materials, n.e.s and nitrogen trifluoride in a gaseous state). (3) High explosives for military use are “subject to the ITAR” (see 22 CFR part 121.1).

*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1C240** Nickel powder or porous nickel metal, specially prepared for the manufacture of gaseous diffusion barriers subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110), as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [1E001](#) (“development” and “production”) and [1E201](#) (“use”) for technology for items controlled by this entry. (2) Nickel powder and porous nickel metal, “specially designed” or prepared for use in separating uranium isotopes, are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A  
*ECCN Controls:* This entry does not control the following:

- a. Filamentary nickel powders;
- b. Single porous nickel sheets with an area of 1,000 cm<sup>2</sup> per sheet or less.

*Items:*

- a. Nickel powder having both of the following characteristics:
  - a.1. A nickel purity content of 99.0% or greater by weight; and
  - a.2. A mean particle size of less than 10 micrometers measured by American Society for Testing and Materials (ASTM) B330 standard;
- b. Porous nickel metal produced from materials controlled by 1C240.a.

**Technical Note:** 1C240.b refers to porous metal formed by compacting and sintering the materials in 1C240.a to form a metal material with fine pores interconnected throughout the structure.

**1C241 Rhenium and alloys containing**

**\*\*1C241** Rhenium and alloys containing rhenium (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

a. Rhenium and alloys containing rhenium, as follows, having both of the characteristics described in 1C241.b:

a.1. Alloys containing 90% by weight or more of rhenium;

a.2. Alloys containing 90% by weight or more of any combination of rhenium and tungsten; *and*

b. Having both of the following characteristics:

b.1. In forms with a hollow cylindrical symmetry (including cylinder segments) with an inside diameter between 100 mm and 300 mm; *and*

b.2. A mass greater than 20 kg.

**\*\*1C298** Graphite with a boron content of less than 5 parts per million and a density greater than 1.5 grams per cubic centimeter that is

intended for use other than in a nuclear reactor.

**License Requirements**

*Reason for Control:* NP

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 2

**License Requirement Note:** Some graphite intended for use in a nuclear reactor is subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See also [1C107](#). (2) Graphite having a purity level of less than 5 parts per million “boron equivalent” as measured according to ASTM standard C-1233-98 and intended for use in a nuclear reactor is subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR 110).

*Related Definitions:* For the purpose of this entry, graphite with a purity level better than 5 parts per million boron equivalent is determined according to ASTM standard C1233-98. In applying ASTM standard C1233-98, the boron equivalence of the element carbon is not included in the boron equivalence calculation, since carbon is not considered an impurity.

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1C350** Chemicals that may be used as precursors for toxic chemical agents (see List of Items Controlled).

### License Requirements:

*Reason for Control:* CB, CW, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
CB applies to entire entry	CB Column 2

CW applies to 1C350 .b, and .c. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for CW reasons. A license is required, for CW reasons, to export or reexport Schedule 2 chemicals and mixtures identified in 1C350.b to States not Party to the CWC (destinations not listed in Supplement No. 2 to part 745 of the EAR). A license is required, for CW reasons, to export Schedule 3 chemicals and mixtures identified in 1C350.c to States not Party to the CWC, unless an End-Use Certificate issued by the government of the importing country has been obtained by the exporter prior to export. A license is required, for CW reasons, to reexport Schedule 3 chemicals and mixtures identified in 1C350.c from a State not Party to the CWC to any other State not Party to the CWC. (See §742.18 of the EAR for license requirements and policies for toxic and precursor chemicals controlled for CW reasons. See §745.2 of the EAR for End-Use Certificate requirements that apply to exports of Schedule 3 chemicals to countries not listed in Supplement No. 2 to part 745 of the EAR.)

AT applies to entire entry. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for AT reasons in 1C350. A license is required, for AT reasons, to export or reexport items controlled by 1C350 to a country in Country Group E:1 of Supplement No. 1 to part 740 of the EAR. (See part 742 of the EAR for additional information on the AT controls that apply to Iran, North Korea, Sudan, and Syria. See part 746 of the EAR for additional information on sanctions that apply to Iran, North Korea, and Syria.)

### License Requirement Notes:

1. *SAMPLE SHIPMENTS:* Subject to the following requirements and restrictions, a license is not required for sample shipments when the cumulative total of these shipments does not exceed a 55-gallon container or 200 kg of a single chemical to any one consignee during a calendar year. A consignee that receives a sample shipment under this exclusion may not resell, transfer, or reexport the sample shipment, but may use the sample shipment for any other legal purpose unrelated to chemical weapons.

#### a. Chemicals Not Eligible:

A. [Reserved]

B. CWC Schedule 2 chemicals (States not Party to the CWC). No CWC Schedule 2 chemical or mixture identified in 1C350.b is eligible for sample shipment to States not Party to the CWC (destinations not listed in Supplement No. 2 to part 745 of the EAR) without a license.

b. *Countries Not Eligible:* Countries in Country Group E:1 of Supplement No. 1 to part 740 of the EAR are not eligible to receive sample shipments of any chemicals controlled by this ECCN without a license.

c. *Sample shipments that require an End-Use Certificate for CW reasons:* No CWC Schedule 3 chemical or mixture identified in 1C350.c is eligible for sample shipment to States not Party to the CWC (destinations not listed in Supplement No. 2 to part 745 of the EAR) without a license, unless an End-Use Certificate issued by the government of the importing country is obtained by the exporter prior to export (see §745.2 of the EAR for End-Use Certificate requirements).

d. *Sample shipments that require a license for reasons set forth elsewhere in the EAR:* Sample shipments, as described in this Note 1, may require a license for reasons set forth elsewhere in the EAR. See, in particular, the

*end-use/end-user restrictions in part 744 of the EAR, and the restrictions that apply to embargoed countries in part 746 of the EAR.*

*e. Annual report requirement. The exporter is required to submit an annual written report for shipments of samples made under this Note 1. The report must be on company letterhead stationery (titled “Report of Sample Shipments of Chemical Precursors” at the top of the first page) and identify the chemical(s), Chemical Abstract Service Registry (C.A.S.) number(s), quantity(ies), the ultimate consignee's name and address, and the date of export for all sample shipments that were made during the previous calendar year. The report must be submitted no later than February 28 of the year following the calendar year in which the sample shipments were made, to: U.S. Department of Commerce, Bureau of Industry and Security, 14th Street and Pennsylvania Ave., NW., Room 2099B, Washington, DC 20230, Attn: “Report of Sample Shipments of Chemical Precursors.”*

## **2. MIXTURES:**

*a. Mixtures that contain precursor chemicals identified in ECCN 1C350, in concentrations that are below the levels indicated in 1C350.b through .d, are controlled by ECCN 1C395 or 1C995 and are subject to the licensing requirements specified in those ECCNs.*

*b. A license is not required under this ECCN for a mixture, when the controlled chemical in the mixture is a normal ingredient in consumer goods packaged for retail sale for personal use. Such consumer goods are designated EAR99. However, a license may be required for reasons set forth elsewhere in the EAR.*

**Note to Mixtures:** Calculation of concentrations of AG-controlled chemicals:

*a. Exclusion. No chemical may be added to the mixture (solution) for the sole purpose of circumventing the Export Administration Regulations;*

*b. Percent Weight Calculation. When calculating the percentage, by weight, of ingredients in a chemical mixture, include all ingredients of the mixture, including those that act as solvents.*

**3. COMPOUNDS.** *Compounds created with any chemicals identified in this ECCN 1C350 may be shipped NLR (No License Required), without obtaining an End-Use Certificate, unless those compounds are also identified in this entry or require a license for reasons set forth elsewhere in the EAR.*

**4. TESTING KITS:** *Certain medical, analytical, diagnostic, and food testing kits containing small quantities of chemicals identified in this ECCN 1C350, are excluded from the scope of this ECCN and are controlled under ECCN 1C395 or 1C995. (Note that replacement reagents for such kits are controlled by this ECCN 1C350 if the reagents contain one or more of the precursor chemicals identified in 1C350 in concentrations equal to or greater than the control levels for mixtures indicated in 1C350.)*

### **Technical Notes:**

*1. For purposes of this entry, a “mixture” is defined as a solid, liquid or gaseous product made up of two or more ingredients that do not react together under normal storage conditions.*

*2. The scope of this control applicable to Hydrogen Fluoride (see 1C350.d.14 in the List of Items Controlled) includes its liquid, gaseous, and aqueous phases, and hydrates.*

*3. Precursor chemicals in ECCN 1C350 are listed by name, Chemical Abstract Service (CAS) number and CWC Schedule (where applicable). Precursor chemicals of the same structural formula (e.g., hydrates) are controlled by ECCN 1C350, regardless of name or CAS number. CAS numbers are shown to assist in identifying whether a particular precursor chemical or mixture is controlled under ECCN 1C350, irrespective of nomenclature. However, CAS numbers cannot be used as unique identifiers in all situations because some forms of the listed*

*precursor chemical have different CAS numbers, and mixtures containing a precursor chemical listed in ECCN 1C350 may also have different CAS numbers.*

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* See USML Category XIV(c) for related chemicals “subject to the ITAR” (see 22 CFR parts 120 through 130).

*Related Definitions:* See §770.2(k) of the EAR for synonyms for the chemicals listed in this entry.

*Items:*

a. [Reserved]

b. Australia Group-controlled precursor chemicals also identified as Schedule 2 chemicals under the CWC, as follows, and mixtures in which at least one of the following chemicals constitutes 30 percent or more of the weight of the mixture:

b.1. (C.A.S. #7784-34-1) Arsenic trichloride;

b.2. (C.A.S. #76-93-7) Benzilic acid;

b.3. (C.A.S. #78-38-6) Diethyl ethylphosphonate;

b.4. (C.A.S. #683-08-9) Diethyl methylphosphonate;

b.5. (C.A.S. #15715-41-0) Diethyl methylphosphonite;

b.6. (C.A.S.#2404-03-7) Diethyl-N,N-dimethylphosphoramidate;

b.7. (C.A.S.# 41480-75-5) N,N-Diisopropylaminoethanethiol hydrochloride;

b.8. (C.A.S. #5842-07-9) N,N-Diisopropyl-beta-aminoethane thiol;

b.9. (C.A.S. #96-80-0) N,N-Diisopropyl-beta-aminoethanol;

b.10. (C.A.S. #96-79-7), N,N-Diisopropyl-beta-aminoethyl chloride;

b.11. (C.A.S. #4261-68-1) N,N-Diisopropyl-beta-aminoethyl chloride hydrochloride;

b.12. (C.A.S. #6163-75-3) Dimethyl ethylphosphonate;

b.13. (C.A.S. #756-79-6) Dimethyl methylphosphonate;

b.14. (C.A.S. #677-43-0) N,N-dimethylamino-phosphoryl dichloride;

b.15. (C.A.S. #1498-40-4) Ethyl phosphonous dichloride [Ethyl phosphinyl dichloride];

b.16. (C.A.S. #430-78-4) Ethyl phosphonus difluoride [Ethyl phosphinyl difluoride];

b.17. (C.A.S. #1066-50-8) Ethyl phosphonyl dichloride;

b.18. (C.A.S. #993-13-5) Methylphosphonic acid;

b.19. (C.A.S. #676-98-2) Methylphosphonothioic dichloride.

b.20. (C.A.S. #464-07-3) Pinacolyl alcohol;

b.21. (C.A.S. #1619-34-7) 3-Quinuclidinol;

b.22. (C.A.S. #111-48-8) Thiodiglycol.

c. Australia Group-controlled precursor chemicals also identified as Schedule 3 chemicals under the CWC, as follows, and mixtures in which at least one of the following chemicals

constitutes 30 percent or more of the weight of the mixture:

- c.1. (C.A.S. #762-04-9) Diethyl phosphite;
- c.2. (C.A.S. #868-85-9) Dimethyl phosphite (dimethyl hydrogen phosphite);
- c.3. (C.A.S. #139-87-7)  
Ethyl-diethanolamine;
- c.4. (C.A.S. #10025-87-3) Phosphorus oxychloride;
- c.5. (C.A.S. #10026-13-8) Phosphorus pentachloride;
- c.6. (C.A.S. #7719-12-2) Phosphorus trichloride;
- c.7. (C.A.S. #10545-99-0) Sulfur dichloride;
- c.8. (C.A.S. #10025-67-9) Sulfur monochloride;
- c.9. (C.A.S. #7719-09-7) Thionyl chloride;
- c.10. (C.A.S. #102-71-6) Triethanolamine;
- c.11. (C.A.S. #122-52-1) Triethyl phosphite;
- c.12. (C.A.S. #121-45-9) Trimethyl phosphite.

d. Other Australia Group-controlled precursor chemicals not also identified as Schedule 1, 2, or 3 chemicals under the CWC, as follows, and mixtures in which at least one of the following chemicals constitutes 30 percent or more of the weight of the mixture:

- d.1. (C.A.S. #1341-49-7) Ammonium hydrogen fluoride;
- d.2. (C.A.S. #107-07-3) 2-Chloroethanol;
- d.3. (C.A.S. #109-89-7) Diethylamine;

- d.4. (C.A.S. #100-37-8) N,N-Diethylaminoethanol;
- d.5. (C.A.S. #589-57-1) Diethyl chlorophosphite;
- d.6. (C.A.S. #298-06-6) O,O-Diethyl phosphorodithioate;
- d.7. (C.A.S. #2465-65-8) O,O-Diethyl phosphorothioate;
- d.8. (C.A.S. #108-18-9) Di-isopropylamine;
- d.9. (C.A.S. #124-40-3) Dimethylamine;
- d.10. (C.A.S. #506-59-2) Dimethylamine hydrochloride;
- d.11. (C.A.S. #762-77-6) Ethyl chlorofluorophosphate;
- d.12. (C.A.S. #1498-51-7) Ethyl dichlorophosphate;
- d.13. (C.A.S. #460-52-6) Ethyl difluorophosphate;
- d.14. (C.A.S. #7664-39-3) Hydrogen fluoride;
- d.15. (C.A.S. #3554-74-3) 3-Hydroxyl-1-methylpiperidine;
- d.16. (C.A.S. #76-89-1) Methyl benzilate;
- d.17. (C.A.S. #754-01-8) Methyl chlorofluorophosphate;
- d.18. (C.A.S. #677-24-7) Methyl dichlorophosphate;
- d.19. (C.A.S. #22382-13-4) Methyl difluorophosphate;
- d.20. (C.A.S. #14277-06-6) N,N-Diethylacetamide;
- d.21. (C.A.S. #53510-30-8) N,N-Diethylbutanamide;

- d.22. (C.A.S. #90324-67-7) N,N-Diethylformamidine;
- d.23. (C.A.S. #1342789-47-2) N,N-Diethylisobutanamidine;
- d.24. (C.A.S. #84764-73-8) N,N-Diethylpropanamidine;
- d.25. (C.A.S. #1315467-17-4) N,N-Diisopropylbutanamidine;
- d.26. (C.A.S. #857522-08-8) N,N-Diisopropylformamidine;
- d.27. (C.A.S. #2909-14-0) N,N-Dimethylacetamidine;
- d.28. (C.A.S. #1340437-35-5) N,N-Dimethylbutanamidine;
- d.29. (C.A.S. #44205-42-7) N,N-Dimethylformamidine;
- d.30. (C.A.S. #321881-25-8) N,N-Dimethylisobutanamidine;
- d.31. (C.A.S. #56776-14-8) N,N-Dimethylpropanamidine;
- d.32. (C.A.S. #1339586-99-0) N,N-Dipropylacetamidine;
- d.33. C.A.S. #1342422-35-8) N,N-Dipropylbutanamidine;
- d.34. (C.A.S. #48044-20-8) N,N-Dipropylformamidine;
- d.35. (C.A.S. #1342700-45-1) N,N-Dipropylisobutanamidine;
- d.36. (C.A.S. #1341496-89-6) N,N-Dipropylpropanamidine;
- d.37. (C.A.S. #1314-80-3) Phosphorus pentasulfide;
- d.38. (C.A.S. #75-97-8) Pinacolone;

- d.39. (C.A.S. #7789-29-9) Potassium bifluoride;
- d.40. (C.A.S. #151-50-8) Potassium cyanide;
- d.41. (C.A.S. #7789-23-3) Potassium fluoride;
- d.42. (C.A.S. #3731-38-2) 3-Quinuclidone;
- d.43. (C.A.S. #1333-83-1) Sodium bifluoride;
- d.44. (C.A.S. #143-33-9) Sodium cyanide;
- d.45. (C.A.S. #7681-49-4) Sodium fluoride;
- d.46. (C.A.S. #16893-85-9) Sodium hexafluorosilicate;
- d.47. (C.A.S. #1313-82-2) Sodium sulfide;
- d.48. (C.A.S. #637-39-8) Triethanolamine hydrochloride;
- d.49. (C.A.S. #116-17-6) Tri-isopropyl phosphite.

**\*\*1C351 Human and animal pathogens and “toxins”, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* CB, CW, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
CB applies to entire entry	CB Column 1

CW applies to 1C351.d.11 and d.12 and a license is required for CW reasons for all destinations, including Canada, as follows: CW applies to 1C351.d.11 for ricin in the form of (1) Ricinus Communis AgglutininII (RCAII), also known as ricin D or Ricinus Communis LectinIII (RCLIII) and (2) Ricinus Communis LectinIV (RCLIV),

also known as ricin E. CW applies to 1C351.d.12 for saxitoxin identified by C.A.S. #35523-89-8. See §742.18 of the EAR for licensing information pertaining to chemicals subject to restriction pursuant to the Chemical Weapons Convention (CWC). The Commerce Country Chart is not designed to determine licensing requirements for items controlled for CW reasons.

Control(s)	Country Chart (See Supp. No. 1 to part 738)
AT applies to entire entry	AT Column 1

**License Requirement Notes:**

1. All vaccines and “immunotoxins” are excluded from the scope of this entry. Certain medical products and diagnostic and food testing kits that contain biological toxins controlled under paragraph (d) of this entry, with the exception of toxins controlled for CW reasons under d.11 and d.12, are excluded from the scope of this entry. Vaccines, “immunotoxins”, certain medical products, and diagnostic and food testing kits excluded from the scope of this entry are controlled under ECCN 1C991.

2. For the purposes of this entry, only saxitoxin is controlled under paragraph d.12; other members of the paralytic shellfish poison family (e.g., neosaxitoxin) are designated EAR99.

3. *Clostridium perfringens* strains, other than the epsilon toxin-producing strains of *Clostridium perfringens* described in c.12, are excluded from the scope of this entry, since they may be used as positive control cultures for food testing and quality control.

4. Unless specified elsewhere in this ECCN 1C351 (e.g., in License Requirement Notes 1-3), this ECCN controls all biological agents and “toxins,” regardless of quantity or attenuation, that are identified in the List of Items Controlled for this ECCN, including small quantities or attenuated strains of select biological agents or “toxins” that are excluded from the lists of select

biological agents or “toxins” by the Animal and Plant Health Inspection Service (APHIS), U.S. Department of Agriculture, or the Centers for Disease Control and Prevention (CDC), U.S. Department of Health and Human Services, in accordance with their regulations in 9 CFR part 121 and 42 CFR part 73, respectively.

5. Biological agents and pathogens are controlled under this ECCN 1C351 when they are an isolated live culture of a pathogen agent, or a preparation of a toxin agent that has been isolated or extracted from any source or material, including living material that has been deliberately inoculated or contaminated with the agent. Isolated live cultures of a pathogen agent include live cultures in dormant form or in dried preparations, whether the agent is natural, enhanced or modified.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**Special Conditions for STA**

STA: (1) Paragraph (c)(1) of License Exception STA (§740.20(c)(1)) may be used for items in 1C351.d.1 through 1C351.d.10 and 1C351.d.13 through 1C351.d.19. See §740.20(b)(2)(vi) for restrictions on the quantity of any one toxin that may be exported in a single shipment and the number of shipments that may be made to any one end user in a single calendar year. Also see the Automated Export System (AES) requirements in §758.1(b)(4) of the EAR.

(2) Paragraph (c)(2) of License Exception STA (§740.20(c)(2) of the EAR) may not be used for any items in 1C351

**List of Items Controlled**

*Related Controls:* (1) Certain forms of ricin and saxitoxin in 1C351.d.11. and d.12 are CWC Schedule 1 chemicals (see §742.18 of the EAR). The U.S. Government must provide advance notification and annual reports to the OPCW of all exports of Schedule 1 chemicals. See §745.1 of the EAR for notification procedures. See 22 CFR part 121, Category XIV and §121.7 for CWC Schedule 1 chemicals that are “subject to the ITAR.” (2) The Animal and Plant Health Inspection Service (APHIS), U.S. Department of Agriculture, and the Centers for Disease Control and Prevention (CDC), U.S. Department of Health and Human Services, maintain controls on the possession, use, and transfer within the United States of certain items controlled by this ECCN (for APHIS, see 7 CFR 331.3(b), 9 CFR 121.3(b), and 9 CFR 121.4(b); for CDC, see 42 CFR 73.3(b) and 42 CFR 73.4(b)). (3) See 22 CFR part 121, Category XIV(b), for modified biological agents and biologically derived substances that are “subject to the ITAR.”

*Related Definitions:* (1) For the purposes of this entry “immunotoxin” is defined as an antibody-toxin conjugate intended to destroy specific target cells (e.g., tumor cells) that bear antigens homologous to the antibody. (2) For the purposes of this entry “subunit” is defined as a portion of the “toxin”.

*Items:*

a. Viruses identified on the Australia Group (AG) “List of Human and Animal Pathogens and Toxins for Export Control,” as follows:

- a.1. African horse sickness virus;
- a.2. African swine fever virus;
- a.3. Andes virus;
- a.4. Avian influenza (AI) viruses identified as having high pathogenicity (HP), as follows:

- a.4.a. AI viruses that have an intravenous pathogenicity index (IVPI) in 6-week-old chickens greater than 1.2; or

- a.4.b. AI viruses that cause at least 75% mortality in 4- to 8-week-old chickens infected intravenously.

*Note:* Avian influenza (AI) viruses of the H5 or H7 subtype that do not have either of the characteristics described in 1C351.a.4 (specifically, 1C351.a.4.a or a.4.b) should be sequenced to determine whether multiple basic amino acids are present at the cleavage site of the haemagglutinin molecule (HA0). If the amino acid motif is similar to that observed for other HPAI isolates, then the isolate being tested should be considered as HPAI and the virus is controlled under 1C351.a.4.

- a.5. Bluetongue virus;

- a.6. Chapare virus;

- a.7. Chikungunya virus;

- a.8. Choclo virus;

- a.9. Classical swine fever virus (Hog cholera virus);

- a.10. Crimean-Congo hemorrhagic fever virus;

- a.11. Dobrava-Belgrade virus;

- a.12. Eastern equine encephalitis virus;

- a.13. Ebolavirus (includes all members of the Ebolavirus genus);

- a.14. Foot-and-mouth disease virus;

- a.15. Goatpox virus;

- a.16. Guanarito virus;

- a.17. Hantaan virus;

- a.18. Hendra virus (Equine morbillivirus);

- a.19. Japanese encephalitis virus;
- a.20. Junin virus;
- a.21. Kyasanur Forest disease virus;
- a.22. Laguna Negra virus;
- a.23. Lassa virus;
- a.24. Louping ill virus;
- a.25. Lujo virus;
- a.26. Lumpy skin disease virus;
- a.27. Lymphocytic choriomeningitis virus;
- a.28. Machupo virus;
- a.29. Marburgvirus (includes all members of the Marburgvirus genus);
- a.30. Middle East respiratory syndrome-related coronavirus (MERS-related coronavirus);
- a.31. Monkeypox virus;
- a.32. Murray Valley encephalitis virus;
- a.33. Newcastle disease virus;
- a.34. Nipah virus;
- a.35. Omsk hemorrhagic fever virus;
- a.36. Oropouche virus;
- a.37. Peste-des-petits ruminants virus;
- a.38. Porcine Teschovirus;
- a.39. Powassan virus;
- a.40. Rabies virus and all other members of the Lyssavirus genus;
- a.41. Reconstructed 1918 influenza virus;
- Technical Note: 1C351.a.41 includes reconstructed replication competent forms of the 1918 pandemic influenza virus containing any portion of the coding regions of all eight gene segments.*
- a.42. Rift Valley fever virus;
- a.43. Rinderpest virus;
- a.44. Rocio virus;
- a.45. Sabia virus;
- a.46. Seoul virus;
- a.47. Severe acute respiratory syndrome-related coronavirus (SARS-related coronavirus);
- a.48. Sheeppox virus;
- a.49. Sin Nombre virus;
- a.50. St. Louis encephalitis virus;
- a.51. Suid herpesvirus 1 (Pseudorabies virus; Aujeszky's disease);
- a.52. Swine vesicular disease virus;
- a.53. Tick-borne encephalitis virus (Far Eastern subtype, formerly known as Russian Spring-Summer encephalitis virus—see 1C351.b.3 for Siberian subtype);
- a.54. Variola virus;
- a.55. Venezuelan equine encephalitis virus;
- a.56. Vesicular stomatitis virus;
- a.57. Western equine encephalitis virus; or
- a.58. Yellow fever virus.
- b. Viruses identified on the APHIS/CDC “select agents” lists (see Related Controls paragraph #2 for this ECCN), but not identified on the Australia Group (AG) “List of Human and Animal

Pathogens and Toxins for Export Control,” as follows:

- b.1. [Reserved];
  - b.2. [Reserved]; *or*
  - b.3. Tick-borne encephalitis virus (Siberian subtype, formerly West Siberian virus—see 1C351.a.53 for Far Eastern subtype).
- c. Bacteria identified on the Australia Group (AG) “List of Human and Animal Pathogens and Toxins for Export Control,” as follows:
- c.1. *Bacillus anthracis*;
  - c.2. *Brucella abortus*;
  - c.3. *Brucella melitensis*;
  - c.4. *Brucella suis*;
  - c.5. *Burkholderia mallei* (*Pseudomonas mallei*);
  - c.6. *Burkholderia pseudomallei* (*Pseudomonas pseudomallei*);
  - c.7. *Chlamydia psittaci* (*Chlamydochlamydia psittaci*);
  - c.8. *Clostridium argentinense* (formerly known as *Clostridium botulinum* Type G), botulinum neurotoxin producing strains;
  - c.9. *Clostridium baratii*, botulinum neurotoxin producing strains;
  - c.10. *Clostridium botulinum*;
  - c.11. *Clostridium butyricum*, botulinum neurotoxin producing strains;
  - c.12. *Clostridium perfringens*, epsilon toxin producing types;
  - c.13. *Coxiella burnetii*;
  - c.14. *Francisella tularensis*;
  - c.15. *Mycoplasma capricolum* subspecies *capripneumoniae* (“strain F38”);
  - c.16. *Mycoplasma mycoides* subspecies *mycoides* SC (small colony) (a.k.a. contagious bovine pleuropneumonia);
  - c.17. *Rickettsia prowazekii*;
  - c.18. *Salmonella enterica* subspecies *enterica* serovar Typhi (*Salmonella typhi*);
  - c.19. Shiga toxin producing *Escherichia coli* (STEC) of serogroups O26, O45, O103, O104, O111, O121, O145, O157, and other shiga toxin producing serogroups;  
*Note: Shiga toxin producing Escherichia coli (STEC) includes, inter alia, enterohaemorrhagic E. coli (EHEC), verotoxin producing E. coli (VTEC) or verocytotoxin producing E. coli (VTEC).*
  - c.20. *Shigella dysenteriae*;
  - c.21. *Vibrio cholerae*; *or*
  - c.22. *Yersinia pestis*.
- d. “Toxins” identified on the Australia Group (AG) “List of Human and Animal Pathogens and Toxins for Export Control,” as follows, and “subunits” thereof:
- d.1. Abrin;
  - d.2. Aflatoxins;
  - d.3. Botulinum toxins;
  - d.4. Cholera toxin;
  - d.5. *Clostridium perfringens* alpha, beta 1, beta 2, epsilon and iota toxins;
  - d.6. Conotoxins;
  - d.7. Diacetoxyscirpenol;

- d.8. HT-2 toxin;
- d.9. Microcystins (Cyanginosins);
- d.10. Modeccin;
- d.11. Ricin;
- d.12. Saxitoxin;
- d.13. Shiga toxins (shiga-like toxins, verotoxins, and verocytotoxins);
- d.14. Staphylococcus aureus enterotoxins, hemolysin alpha toxin, and toxic shock syndrome toxin (formerly known as Staphylococcus enterotoxin F);
- d.15. T-2 toxin;
- d.16. Tetrodotoxin;
- d.17. Viscumin (Viscum album lectin 1); or
- d.18. Volkensin.
- e. “Fungi”, as follows:
  - e.1. Coccidioides immitis; or
  - e.2. Coccidioides posadasii.

**\*\*1C353 Genetic elements and genetically-modified organisms, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* CB, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
CB applies to entire entry	CB Column 1
AT applies to entire entry	AT Column 1

**License Requirement Notes:**

1. Vaccines that contain genetic elements or genetically modified organisms identified in this ECCN are controlled by ECCN 1C991.

2. Unless specified elsewhere in this ECCN 1C353 (e.g., in License Requirement Note 1), this ECCN controls genetic elements or genetically modified organisms for all biological agents and “toxins,” regardless of quantity or attenuation, that are identified in the List of Items Controlled for this ECCN, including genetic elements or genetically modified organisms for attenuated strains of select biological agents or “toxins” that are excluded from the lists of select biological agents or “toxins” by the Animal and Plant Health Inspection Service (APHIS), U.S. Department of Agriculture, or the Centers for Disease Control and Prevention (CDC), U.S. Department of Health and Human Services, in accordance with the APHIS regulations in 7 CFR part 331 and 9 CFR part 121 and the CDC regulations in 42 CFR part 73.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) The Animal and Plant Health Inspection Service (APHIS), U.S. Department of Agriculture, and the Centers for Disease Control and Prevention (CDC), U.S. Department of Health and Human Services, maintain controls on the possession, use, and transfer within the United States of certain items controlled by this ECCN, including (but not limited to) certain genetic elements, recombinant nucleic acids, and recombinant organisms associated with the agents or toxins in ECCN 1C351 or 1C354 (for APHIS, see 7 CFR 331.3(c), 9 CFR 121.3(c), and 9 CFR 121.4(c); for CDC, see 42 CFR 73.3(c) and 42 CFR 73.4(c)). (2) See 22 CFR part 121, Category XIV(b), for modified biological agents and biologically derived substances that are subject to the export licensing jurisdiction of the U.S. Department

of State, Directorate of Defense Trade Controls.

*Related Definition:* N/A

*Items:*

a. Any genetically modified organism that contains, or any genetic element that codes for, any of the following:

a.1. Any gene or genes specific to any virus controlled by 1C351.a or .b or 1C354.c;

a.2. Any gene or genes specific to any bacterium controlled by 1C351.c or 1C354.a, or any fungus controlled by 1C351.e or 1C354.b, and which:

a.2.a. In itself or through its transcribed or translated products represents a significant hazard to human, animal or plant health; *or*

a.2.b. Could endow or enhance pathogenicity; *or*

a.3. Any toxins, or their subunits, controlled by 1C351.d.

b. [Reserved].

*Technical Notes:*

1. *Genetically modified organisms include organisms in which the nucleic acid sequences have been created or altered by deliberate molecular manipulation.*

2. *“Genetic elements” include, inter alia, chromosomes, genomes, plasmids, transposons, vectors, and inactivated organisms containing recoverable nucleic acid fragments, whether genetically modified or unmodified, or chemically synthesized in whole or in part. For the purposes of this ECCN 1C353, nucleic acids from an inactivated organism, virus, or sample are considered to be ‘recoverable’ if the inactivation and preparation of the material is intended or known to facilitate isolation, purification, amplification, detection, or identification of nucleic acids.*

3. *This ECCN does not control nucleic acid sequences of shiga toxin producing Escherichia coli of serogroups O26, O45, O103, O104, O111, O121, O145, O157, and other shiga toxin producing serogroups, other than those genetic elements coding for shiga toxin, or for its subunits.*

4. *‘Endow or enhance pathogenicity’ is defined as when the insertion or integration of the nucleic acid sequence or sequences is/are likely to enable or increase a recipient organism’s ability to be used to deliberately cause disease or death. This might include alterations to, inter alia: virulence, transmissibility, stability, route of infection, host range, reproducibility, ability to evade or suppress host immunity, resistance to medical countermeasures, or detectability.*

**\*\*1C354 Plant pathogens, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* CB, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
CB applies to entire entry	CB Column 1
AT applies to entire entry	AT Column 1

**License Requirement Note:**

1. *All vaccines are excluded from the scope of this ECCN. See ECCN 1C991 for vaccines.*

2. *Unless specified elsewhere in this ECCN 1C354 (e.g., in License Requirement Note 1), this ECCN controls all biological agents, regardless of quantity or attenuation, that are identified in the List of Items Controlled for this ECCN, including small quantities or attenuated strains of select biological agents that are excluded from the list of PPQ select agents and “toxins” by the Animal and Plant Health Inspection Service (APHIS), U.S. Department of Agriculture, in accordance with their regulations in 7 CFR part 331.*

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) The Animal and Plant Health Inspection Service (APHIS), U.S. Department of Agriculture, maintains controls on the possession, use, and transfer within the United States of certain items controlled by this ECCN (see 7 CFR 331.3(c), 9 CFR 121.3(c), and 9 CFR 121.4(c)).

(2) See 22 CFR part 121, Category XIV(b), for modified biological agents and biologically derived substances that are subject to the export licensing jurisdiction of the U.S. Department of State, Directorate of Defense Trade Controls.

*Related Definitions:* N/A

*Items:*

a. Bacteria, as follows:

a.1. *Xanthomonas albilineans*;

a.2. *Xanthomonas axonopodis* pv. *citri* (*Xanthomonas campestris* pv. *citri* A) (*Xanthomonas campestris* pv. *citri*);

a.3. *Xanthomonas oryzae* [this species of proteobacteria is identified on the APHIS “select agents” list (see Related Controls paragraph for this ECCN), but only the *pathovar Xanthomonas oryzae* pv. *oryzae* (syn. *Pseudomonas campestris* pv. *oryzae*) is identified on the Australia Group (AG) “List of Plant Pathogens for Export Control”];

a.4. *Clavibacter michiganensis* subspecies *sepedonicus* (syn. *Corynebacterium michiganensis* subspecies *sepedonicum* or *Corynebacterium sepedonicum*);

a.5. *Ralstonia solanacearum*, race 3, biovar 2;

a.6. *Raythayibactor toxicus* [this bacterium is identified on the APHIS “select agents” list (see the Related Controls paragraph for this ECCN), but is not identified on the Australia Group (AG) “List of Plant Pathogens for Export Control”].

b. Fungi, as follows:

b.1. *Colletotrichum kahawae* (*Colletotrichum coffeanum* var. *virulans*);

b.2. *Cochliobolus miyabeanus* (*Helminthosporium oryzae*);

b.3. *Microcyclus ulei* (syn. *Dothidella ulei*);

b.4. *Puccinnia graminis* ssp. *graminis* var. *graminis* / *Puccinia graminis* ssp. *graminis* var. *stakmanii* (*Puccinia graminis* [syn. *Puccinia graminis* f. sp. *tritici*]);

b.5. *Puccinia striiformis* (syn. *Puccinia glumarum*);

b.6. *Magnaporthe oryzae* (*Pyricularia oryzae*);

b.7. *Peronosclerospora philippinensis* (*Peronosclerospora sacchari*);

b.8. *Sclerophthora rayssiae* var. *zeae*;

b.9. *Synchytrium endobioticum*;

b.10. *Tilletia indica*;

b.11. *Thecaphora solani*;

b.12. *Phoma glycinicola* (formerly *Pyrenochaeta glycines*) [this fungus is identified on the APHIS “select agents” list (see the Related Controls paragraph for this ECCN), but is not identified on the Australia Group (AG) “List of Plant Pathogens for Export Control”].

c. Viruses, as follows:

c.1. Andean potato latent virus (Potato Andean latent tymovirus);

c.2. Potato spindle tuber viroid.

**\*\*1C355** **Chemical Weapons Convention (CWC) Schedule 2 and 3 chemicals and families of chemicals not controlled by ECCN 1C350 or “subject to the ITAR” (see 22 CFR parts ) (see List of Items Controlled).**

### License Requirements

*Reason for Control:* CW, AT

*Control(s)*

CW applies to entire entry. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for CW reasons. A license is required to export or reexport CWC Schedule 2 chemicals and mixtures identified in 1C355.a to States not Party to the CWC (destinations not listed in Supplement No. 2 to part 745 of the EAR). A license is required to export CWC Schedule 3 chemicals and mixtures identified in 1C355.b to States not Party to the CWC, unless an End Use Certificate issued by the government of the importing country is obtained by the exporter, prior to export. A license is required to reexport CWC Schedule 3 chemicals and mixtures identified in 1C355.b from a State not Party to the CWC to any other State not Party to the CWC. (See §742.18 of the EAR for license requirements and policies for toxic and precursor chemicals controlled for CW reasons.)

AT applies to entire entry. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for AT reasons in 1C350. A license is required, for AT reasons, to export or reexport items controlled by 1C350 to a country in Country Group E:1 of Supplement No. 1 to part 740 of the EAR. (See part 742 of the EAR for additional information on the AT controls that apply to Iran, North Korea, Sudan, and Syria. See part 746 of the EAR for

additional information on sanctions that apply to Iran, North Korea, and Syria.)

### License Requirements Notes:

#### 1. MIXTURES:

a. *Mixtures containing toxic and precursor chemicals identified in ECCN 1C355, in concentrations that are below the control levels indicated in 1C355.a and .b, are controlled by ECCN 1C995 and are subject to the license requirements specified in that ECCN.*

b. *Mixtures containing chemicals identified in this entry are not controlled by ECCN 1C355 when the controlled chemical is a normal ingredient in consumer goods packaged for retail sale for personal use or packaged for individual use. Such consumer goods are classified as EAR99.*

**Note to mixtures:** *Calculation of concentrations of CW-controlled chemicals:*

a. *Exclusion. No chemical may be added to the mixture (solution) for the sole purpose of circumventing the Export Administration Regulations;*

b. *Percent Weight Calculation. When calculating the percentage, by weight, of ingredients in a chemical mixture, include all ingredients of the mixture, including those that act as solvents.*

2. **COMPOUNDS:** *Compounds created with any chemicals identified in this ECCN 1C355 may be shipped NLR (No License Required), without obtaining an End-Use Certificate, unless those compounds are also identified in this entry or require a license for reasons set forth elsewhere in the EAR.*

**Technical Notes:** *For purposes of this entry, a “mixture” is defined as a solid, liquid or gaseous product made up of two or more ingredients that do not react together under normal storage conditions.*

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**List of Items Controlled**

*Related Controls:* See also ECCNs [1C350](#), [1C351](#), [1C395](#), and [1C995](#). See §§742.18 and 745.2 of the EAR for End-Use Certification requirements.

*Related Definitions:* N/A

*Items:*

a. CWC Schedule 2 chemicals and mixtures containing Schedule 2 chemicals:

a.1. Toxic chemicals, as follows, and mixtures containing toxic chemicals:

a.1.a. PFIB: 1,1,3,3,3-Pentafluoro-2-(trifluoromethyl)-1-propene (C.A.S. 382-21-8) and mixtures in which PFIB constitutes more than 1 percent of the weight of the mixture;

a.1.b. [Reserved]

a.2. Precursor chemicals, as follows, and mixtures in which at least one of the following precursor chemicals constitutes more than 10 percent of the weight of the mixture:

a.2.a. Chemicals, except for those listed in Schedule 1, containing a phosphorus atom to which is bonded one methyl, ethyl, or propyl (normal or iso) group but not further carbon atoms.

*Note:* 1C355.a.2.a does not control Fonofos: *O-Ethyl S-phenyl ethylphosphonothiolothionate* (C.A.S. 944-22-9).

a.2.b. FAMILY: N,N-Dialkyl (Me, Et, n-Pr or i-Pr) phosphoramidic dihalides;

a.2.c. FAMILY: Dialkyl (Me, Et, n-Pr or i-Pr) N,N-dialkyl (Me, Et, n-Pr, or i-Pr)-phosphoramidates;

a.2.d. FAMILY: N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethyl-2-chlorides and corresponding protonated salts;

a.2.e. FAMILY: N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethane-2-ols and corresponding protonated salts;

*Note:* 1C355.a.2.e. does not control *N,N-Dimethylaminoethanol* and corresponding protonated salts (C.A.S. 108-01-0) or *N,N-Diethylaminoethanol* and corresponding protonated salts (C.A.S. 100-37-8).

a.2.f. FAMILY: N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethane-2-thiols and corresponding protonated salts.

b. CWC Schedule 3 chemicals and mixtures containing Schedule 3 chemicals:

b.1. Toxic chemicals, as follows, and mixtures in which at least one of the following toxic chemicals constitutes 30 percent or more of the weight of the mixture:

b.1.a. Phosgene: Carbonyl dichloride (C.A.S. 75-44-5);

b.1.b. Cyanogen chloride (C.A.S. 506-77-4);

b.1.c. Hydrogen cyanide (C.A.S. 74-90-8);

b.1.d. Chloropicrin: Trichloronitromethane (CAS 76-06-2).

b.2. Precursor chemicals, as follows, and mixtures in which at least one of the following precursor chemicals constitutes 30 percent or more of the weight of the mixture:

b.2.a. [Reserved];

b.2.b. Methyl-diethanolamine (C.A.S. 105-59-9).

**\*\*1C395** Mixtures and medical, analytical, diagnostic, and food testing kits not controlled by ECCN 1C350, as follows (See List of Items Controlled).

### License Requirements

*Reason for Control:* CB, CW, AT

#### *Control(s)*

CB applies to entire entry. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for CB reasons in 1C395. A license is required, for CB reasons, to export or reexport mixtures controlled by 1C395.a and test kits controlled by 1C395.b to States not Party to the CWC (destinations not listed in Supplement No. 2 to part 745 of the EAR).

CW applies to entire entry. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for CW reasons. A license is required for CW reasons, as follows, to States not Party to the CWC (destinations not listed in Supplement No. 2 to part 745 of the EAR): (1) exports and reexports of mixtures controlled by 1C395.a, (2) exports and reexports of test kits controlled by 1C395.b that contain CWC Schedule 2 chemicals controlled by ECCN 1C350, (3) exports of test kits controlled by 1C395.b that contain CWC Schedule 3 chemicals controlled by ECCN 1C350, except that a license is not required, for CW reasons, to export test kits containing CWC Schedule 3 chemicals if an End Use Certificate issued by the government of the importing country is obtained by the exporter prior to export, and (4) reexports from States not Party to the CWC of test kits controlled by 1C395.b that contain CWC Schedule 3 chemicals. (See §742.18 of the EAR for license requirements and policies for toxic and precursor chemicals controlled for CW reasons.)

AT applies to entire entry. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for AT reasons in 1C395. A license is required, for

AT reasons, to export or reexport items controlled by 1C395 to a country in Country Group E:1 of Supplement No. 1 to part 740 of the EAR. (See part 742 of the EAR for additional information on the AT controls that apply to Iran, North Korea, Sudan, and Syria. See part 746 of the EAR for additional information on sanctions that apply to Iran, North Korea, and Syria.)

### *License Requirements Notes*

1. 1C395.b does not control mixtures that contain precursor chemicals identified in ECCN 1C350.b or .c in concentrations below the control levels for mixtures indicated in 1C350.b or .c. 1C395.a and 1C995.a.1 and a.2.a control such mixtures, unless they are consumer goods, as described in License Requirements Note 2 of this ECCN.

2. This ECCN does not control mixtures when the controlled chemicals are normal ingredients in consumer goods packaged for retail sale for personal use. Such consumer goods are classified as EAR99.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

### **List of Items Controlled**

*Related Controls:* 1. ECCN [1C350](#) controls mixtures containing 30 percent or higher concentrations, by weight, of any single CWC Schedule 2 chemical identified in ECCN [1C350.b](#); ECCN [1C995](#) controls such mixtures containing concentrations of 10 percent or less. 2. ECCN [1C995](#) controls “medical, analytical, diagnostic, and food testing kits” (as defined in the Related Definitions paragraph of this ECCN) that contain precursor chemicals listed in ECCN [1C350.d](#). ECCN [1C350](#) controls any such kits in which the amount of any single chemical listed in [1C350.b](#), [.c](#), or [.d](#) exceeds 300 grams by weight.

*Related Definitions:* For the purpose of this entry, “medical, analytical, diagnostic, and food testing kits” are pre-packaged materials of defined composition that are specifically developed, packaged and marketed for medical, analytical, diagnostic, or public health purposes. Replacement reagents for medical, analytical, diagnostic, and food testing kits described in 1C395.b are controlled by ECCN 1C350 if the reagents contain at least one of the precursor chemicals identified in that ECCN in concentrations equal to or greater than the control levels for mixtures indicated in 1C350.b or .c.

*Items:*

- a. Mixtures containing more than 10 percent, but less than 30 percent, by weight of any single CWC Schedule 2 chemical identified in ECCN 1C350.b. (For controls on other mixtures containing these chemicals, see Note 1 in the Related Controls paragraph of this ECCN.)
- b. “Medical, analytical, diagnostic, and food testing kits” (as defined in the Related Definitions for this ECCN) that contain CWC Schedule 2 or 3 chemicals controlled by ECCN 1C350.b or .c in an amount *not* exceeding 300 grams per chemical. (For controls on other such test kits containing these and other controlled chemicals, see Note 2 in the Related Controls paragraph of this ECCN.)

**\*\*1C607 Tear Gases, Riot Control Agents and materials for the detection and decontamination of chemical warfare agents (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry, except 1C607.a.10, .a.11, .a.12, and .a.14	NS Column 1

RS applies to entire entry	RS Column 1
AT applies to entire entry	AT Column 1
UN applies to entire entry	See § 746.1(b) for UN controls

**List Based License Exceptions (See Part 740 for a description of all license exceptions)**

LVS: N/A  
 GBS: N/A

**Special Conditions for STA**

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 1C607.

**List of Items Controlled**

*Related Controls:* (1) See ECCN 1A984 for controls on other riot control agents. (2) See 22 CFR § 121.1 (USML), Category XIV(b), for modified biological agents and biologically derived substances that are subject to the ITAR. (3) See 22 CFR § 121.1 (USML), Category XIV(g), for ITAR controls on antibodies, recombinant protective antigens, polynucleotides, biopolymers or biocatalysts (including the expression vectors, viruses, plasmids, or cultures of specific cells used to produce them) that are “specially designed” for use with articles controlled under USML Category XIV(f). (4) See ECCN 0A919 for “military commodities” located and produced outside the United States that incorporate more than a *de minimis* amount of US-origin “600 series” controlled content.

*Related Definitions:* N/A  
*Items:*

- a. Tear gases and riot control agents including:
  - a.1. CA (Bromobenzyl cyanide) (CAS 5798–79–8);
  - a.2. CS (o-Chlorobenzylidenemalononitrile or o-Chlorobenzalmalononitrile) (CAS 2698–41–1);
  - a.3. CN (Phenylacetyl chloride or w-

Chloroacetophenone) (CAS 532–27-4);

a.4. CR (Dibenz-(b,f)-1,4-oxazepine) (CAS 257–07–8);

a.5. Adamsite (Diphenylamine chloroarsine or DM) (CAS 578–94–9);

a.6. N-Nonanoylmorpholine, (MPA) (CAS 5299-64-9);

a.7. Dibromodimethyl ether (CAS 4497–29–4);

a.8. Dichlorodimethyl ether (CICi) (CAS 542–88–1);

a.9. Ethyldibromoarsine (CAS 683–43–2);

a.10. Bromo acetone (CAS 598-31-2);

a.11. Bromo methylethylketone (CAS 816-40-0);

a.12. Iodo acetone (CAS 3019-04-3);

a.13. Phenylcarbylamine chloride (CAS 622-44-6);

a.14. Ethyl iodoacetate (CAS 623-48-3);

*Note to 1C607.a:* ECCN 1C607.a. does not control the following: formulations containing 1% or less of CN or CS; individually packaged tear gases or riot control agents for personal self-defense purposes that are controlled by ECCN 1A984; or active constituent chemicals, and combinations thereof, identified and packaged for food production or medical purposes.

b. “Biopolymers,” not controlled by USML Category XIV(g) “specially designed” or processed for the detection or identification of chemical warfare agents specified by USML Category XIV(a), and the cultures of specific cells used to produce them.

c. “Biocatalysts,” and biological systems therefor, not controlled by USML Category XIV(g) “specially designed” for the

decontamination or degradation of chemical warfare agents controlled in USML Category XIV (a), as follows:

c.1. “Biocatalysts” “specially designed” for the decontamination or degradation of chemical warfare agents controlled in USML Category XIV(a) resulting from directed laboratory selection or genetic manipulation of biological systems;

c.2. Biological systems containing the genetic information specific to the production of “biocatalysts” specified by 1C607.c.1, as follows:

c.2.a. “Expression vectors;”

c.2.b. Viruses; or

c.2.c. Cultures of cells.

*Note to 1C607.b and .c:* The cultures of cells and biological systems are exclusive and these sub-items do not apply to cells or biological systems for civil purposes, such as agricultural, pharmaceutical, medical, veterinary, environmental, waste management, or in the food industry.

d. Chemical mixtures not controlled by USML Category XIV(f) “specially designed” for military use for the decontamination of objects contaminated with materials specified by USML Category XIV(a) or (b).

**\*\*1C608 “Energetic materials” and related commodities (see List of Items Controlled).**

LVS: \$1500

GBS: N/A

### Special Conditions for STA

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 1C608.

### List of Items Controlled

*Related Controls:* (1) The EAR does not control devices or charges containing materials controlled by USML subparagraphs V(c)(6), V(h), or V(i). The USML controls devices containing such materials. (2) The USML in Categories III, IV, or V controls devices and charges in this entry if they contain materials controlled by Category V (other than slurries) and such materials can be easily extracted without destroying the device or charge. (3) See also explosives and other items enumerated in ECCNs 1A006, 1A007, 1A008, 1C011, 1C111, 1C239, and 1C992. (4) See ECCN 0A919 for foreign-made “military commodities” that incorporate more than a *de minimis* amount of US-origin “600 series” controlled content.

*Related Definitions:* (1) For purposes of this entry, the term ‘controlled materials’ means controlled energetic materials enumerated in ECCNs 1C011, 1C111, 1C239, 1C608, or USML Category V. (2) For the purposes of this entry, the term ‘propellants’ means substances or mixtures that react chemically to produce large volumes of hot gases at controlled rates to perform mechanical work.

*Items:*

a. ‘Single base,’ ‘double base,’ and ‘triple base’ ‘propellants’ having nitrocellulose with nitrogen content greater than 12.6% in the form of either:

a.1. ‘Sheetstock’ or ‘carpet rolls;’ or

a.2. Grains with diameter greater than 0.10 inches.

*Note:* This entry does not control ‘propellant’ grains used in shotgun shells, small arms cartridges, or rifle cartridges.

#### Technical Notes:

1. ‘Sheetstock’ is ‘propellant’ that has been manufactured in the form of a sheet suitable for further processing.

2. A ‘carpet roll’ is ‘propellant’ that has been manufactured as a sheet, often cut to a desired width, and subsequently rolled up (like a carpet).

3. ‘Single base’ is ‘propellant’ which consists mostly of nitrocellulose.

4. ‘Double base’ ‘propellant’ consist mostly of nitrocellulose and nitroglycerine.

5. ‘Triple base’ consists mostly of nitrocellulose, nitroglycerine, and nitroguanidine. Such ‘propellants’ contain other materials, such as resins or stabilizers, that could include carbon, salts, burn rate modifiers, nitrodiphenylamine, wax, polyethylene glycol (PEG), polyglycol adipate (PGA).

b. Shock tubes containing greater than 0.064 kg per meter (300 grains per foot), but not more than 0.1 kg per meter (470 grains per foot) of ‘controlled materials.’

c. Cartridge power devices containing greater than 0.70 kg, but not more than 1.0 kg of ‘controlled materials.’

d. Detonators (electric or nonelectric) and “specially designed” assemblies therefor containing greater than 0.01 kg, but not more than 0.1 kg of ‘controlled materials.’

e. Igniters not controlled by USML Categories III or IV that contain greater than 0.01 kg, but not more than 0.1 kg of ‘controlled materials.’

f. Oil well cartridges containing greater than 0.015 kg, but not more than 0.1 kg of ‘controlled materials.’

g. Commercial cast or pressed boosters containing greater than 1.0 kg, but not more than 5.0 kg of ‘controlled materials.’

h. Commercial prefabricated slurries and emulsions containing greater than 10 kg and less than or equal to thirty-five percent by weight of USML ‘controlled materials.’

i. [Reserved]

j. “Pyrotechnic” devices “specially designed” for commercial purposes (e.g., theatrical stages, motion picture special effects, and fireworks displays), and containing greater than 3.0 kg, but not more than 5.0 kg of ‘controlled materials.’

k. Other commercial explosive devices or charges “specially designed” for commercial applications, not controlled by 1C608.c through .g above, containing greater than 1.0 kg, but not more than 5.0 kg of ‘controlled materials.’

l. Propyleneimine (2 methylaziridine) (C.A.S. #75-55-8).

m. Any oxidizer or ‘mixture’ thereof that is a compound composed of fluorine and any of the following: other halogens, oxygen, or nitrogen.

*Note 1 to 1C608.m: Nitrogen trifluoride (NF<sub>3</sub>)(CAS 7783-54-2) in a gaseous state is controlled under ECCN 1C992 and not under ECCN 1C608.m.*

*Note 2 to 1C608.m: Chlorine trifluoride (ClF<sub>3</sub>)(CAS 7790-91-2) is controlled under ECCN 1C111.a.3.f and not under ECCN 1C608.m.*

*Note 3 to 1C608.m: Oxygen difluoride (OF<sub>2</sub>) is controlled under USML Category V.d.10 (see 22 CFR 121.1) and not under ECCN 1C608.m.*

*Note to 1C608.l and m: If a chemical in ECCN 1C608.l or .m is incorporated into a commercial charge or device described in ECCN 1C608.c through .k or in ECCN 1C992, the classification of the commercial charge or device applies to the item.*

*Technical Note to 1C608.m: ‘Mixture’ refers to a composition of two or more substances with at least one substance being enumerated in 1C011, 1C111, 1C239, 1C608, USML Category V, or elsewhere on the USML.*

n. Any explosives, ‘propellants,’ oxidizers, “pyrotechnics,” fuels, binders, or additives that are “specially designed” for military application and not enumerated or otherwise described in USML Category V or elsewhere on the USML.

*Note 1: 1C608.n does not apply to the following “aircraft” fuels: JP-4, JP-5, and JP-8.*

*Note 2: “Aircraft” fuels specified by 1C608.n, Note 1 are finished products, not their constituents.*

**\*\*1C980** Inorganic chemicals listed in Supplement No. 1 to part 754 of the EAR that were produced or derived from the Naval Petroleum Reserves (NPR) or became available for export as a result of an exchange of any NPR produced or derived commodities.

### License Requirements

*Reason for Control:* SS

*Control(s)*

SS applies to entire entry. For licensing requirements (and possible License Exceptions) proceed directly to part 754 of the EAR. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for SS reasons.

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1C982** Other petroleum products listed in Supplement No. 1 to part 754 of the EAR that were produced or derived from the Naval Petroleum Reserves (NPR) or became available for export as a result of an exchange of any NPR produced or derived commodities.

**License Requirements**

*Reason for Control:* SS

*Control(s)*

SS applies to entire entry. For licensing requirements (and possible License Exceptions) proceed directly to part 754 of the EAR. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for SS reasons.

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1C983** Natural gas liquids and other natural gas derivatives listed in Supplement No. 1 to part 754 of the EAR that were produced or derived from the Naval Petroleum Reserves (NPR) or became available for export as a result of an exchange of any NPR produced or derived commodities.

**License Requirements**

*Reason for Control:* SS

*Control(s)*

SS applies to entire entry. For licensing requirements (and possible License Exceptions) proceed directly to part 754 of the EAR. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for SS reasons.

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1C984** Manufactured gas and synthetic natural gas (except when commingled with natural gas and thus subject to export authorization from the Department of Energy) listed in Supplement No. 1 to part 754 of the EAR that were produced or derived from the Naval Petroleum Reserves (NPR) or became available for export as a result of an exchange of any NPR produced or derived commodities.

**License Requirements**

*Reason for Control:* SS

*Control(s)*

SS applies to entire entry. For licensing requirements (and possible License Exceptions) proceed directly to part 754 of the EAR. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for SS reasons.

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1C988 Unprocessed western red cedar (*Thuja plicata*) logs and timber, and rough, dressed and worked lumber containing wane, as described in § 754.4 of the EAR.**

**License Requirements**

*Reason for Control:* SS

*Control(s)*

SS applies to entire entry. For licensing requirements (and possible License Exceptions) proceed directly to part 754 of the EAR. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for SS reasons.

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* For a non-exhaustive list of 10-digit Harmonized System-based Schedule B commodity numbers that may apply to unprocessed Western Red Cedar products subject to § 754.4 and related definitions, see Supplement No. 2 to part 754 of the EAR.

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1C990 Fibrous and filamentary materials, not controlled by 1C010 or 1C210, for use in “composite” structures and with a specific modulus of 3.18 x 10<sup>6</sup> m or greater and a specific tensile strength of 7.62 x 10<sup>4</sup> m or greater.**

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1C991 Vaccines, immunotoxins, medical products, diagnostic and food testing kits, as follows (see List of Items controlled).**

**License Requirements**

*Reason for Control:* CB, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
CB applies to 1C991.d	CB Column 3
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) Medical products containing ricin or saxitoxin, as follows, are controlled for CW reasons under ECCN [1C351](#):

(a) Ricinus Communis Agglutinin<sub>II</sub> (RCA<sub>II</sub>), also known as ricin D, or Ricinus Communis Lectin<sub>III</sub> (RCL<sub>III</sub>);

(b) Ricinus Communis Lectin<sub>IV</sub> (RCL<sub>IV</sub>), also known as ricin E; or

(c) Saxitoxin identified by C.A.S. #35523-89-8.

(2) The export of a “medical product” that is an “Investigational New Drug” (IND), as defined in 21 CFR §312.3, is subject to certain U.S. Food and Drug Administration (FDA) requirements that are independent of the export requirements specified in this ECCN or elsewhere in the EAR. These FDA requirements are described in 21 CFR §312.110 and must be satisfied in addition to any requirements specified in the EAR.

(3) Also see 21 CFR §314.410 for FDA requirements concerning exports of new drugs and new drug substances.

*Related Definitions:* For the purpose of this entry, “immunotoxin” is defined as an antibody-toxin conjugate intended to destroy specific target cells (e.g., tumor cells) that bear antigens homologous to the antibody. For the purpose of this entry, “medical products” are: (1) pharmaceutical formulations designed for testing and human administration in the treatment of medical conditions, (2) prepackaged for distribution as clinical or medical products, and (3) approved by the U.S. Food and Drug Administration either to be marketed as clinical or medical products or for use as an “Investigational New Drug” (IND) (see 21 CFR Part 312). For the purpose of this entry, “diagnostic and food testing kits” are specifically developed, packaged and marketed for diagnostic or public health purposes. Biological toxins in any other configuration, including bulk shipments, or for any other end-uses are controlled by ECCN 1C351. For the purpose of this entry, “vaccine” is defined as a medicinal (or veterinary) product in a pharmaceutical formulation, approved by the U.S. Food and Drug Administration or the U.S. Department

of Agriculture to be marketed as a medical (or veterinary) product or for use in clinical trials, that is intended to stimulate a protective immunological response in humans or animals in order to prevent disease in those to whom or to which it is administered.

*Items:*

a. Vaccines against items controlled by ECCN ECCN 1C351, 1C353 or 1C354;

b. Immunotoxins containing items controlled by 1C351.d;

c. Medical products containing botulinum toxins controlled by ECCN 1C351.d.3 or conotoxins controlled by ECCN 1C351.d.6;

d. Medical products containing items controlled by ECCN 1C351.d (except botulinum toxins controlled by ECCN 1C351.d.3, conotoxins controlled by ECCN 1C351.d.6, and items controlled for CW reasons under 1C351.d.11 or .d.12);

e. Diagnostic and food testing kits containing items controlled by ECCN 1C351.d (except items controlled for CW reasons under ECCN 1C351.d.11 or .d.12).

**\*\*1C992 Commercial charges and devices containing energetic materials, n.e.s. and nitrogen trifluoride in a gaseous state (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* AT, RS, Foreign policy

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1.
RS applies to entire entry.	A license is required for items controlled by this entry for export or reexport to Iraq and transfer within Iraq for regional stability reasons.

	The Commerce Country Chart is not designed to determine RS license requirements for this entry. See §§ 742.6 and 746.3 of the EAR for additional information.
Russian industry sector sanctions apply to entire entry.	See § 746.5 for specific license requirements and license review policy.

(see 22 CFR 121.12) (such as ammonium pictrate, black powder, etc.) contained in commercial explosive devices and in the charges are omitted when determining the total mass of controlled material.

*Items:*

- a. Shaped charges “specially designed” for oil well operations, utilizing one charge functioning along a single axis, that upon detonation produce a hole, and
  - a.1. Contain any formulation of controlled materials;
  - a.2. Have only a uniform shaped conical liner with an included angle of 90 degrees or less;
  - a.3. Contain more than 0.010 kg but less than or equal to 0.090 kg of controlled materials; and
  - a.4. Have a diameter not exceeding 4.5 inches;
- b. Shaped charges “specially designed” for oil well operations containing less than or equal to 0.010 kg of controlled materials;
- c. Detonation cord or shock tubes containing less than or equal to 0.064 kg per meter (300 grains per foot) of controlled materials;
- d. Cartridge power devices, that contain less than or equal to 0.70 kg of controlled materials in the deflagration material;
- e. Detonators (electric or nonelectric) and assemblies thereof, that contain less than or equal to 0.01 kg of controlled materials;
- f. Igniters, that contain less than or equal to 0.01 kg of controlled materials;
- g. Oil well cartridges, that contain less than or equal to 0.015 kg of controlled energetic materials;

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) Commercial charges and devices containing USML controlled energetic materials that exceed the quantities noted or that are not covered by this entry are controlled under [ECCN 1C608](#). (2) Nitrogen trifluoride when not in a gaseous state is controlled under ECCN 1C608.

*Related Definitions:* (1) Items controlled by this entry 1C992 are those materials not controlled by ECCN 1C608 and not “subject to the ITAR” (see 22 CFR parts 120 through 130). (2) For purposes of this entry, the term “controlled materials” means controlled energetic materials (see ECCNs 1C011, 1C111, 1C239 and 1C608; see also 22 CFR 121.1 Category V). (3) The individual USML controlled energetic materials, even when compounded with other materials, remain “subject to the ITAR” when not incorporated into explosive devices or charges controlled by this entry. (4) Commercial prefabricated slurries and emulsions containing greater than 35% of USML controlled energetic materials are “subject to the ITAR” (see 22 CFR parts 120 through 130). (5) For purposes of this entry, the mass of aluminum powder, potassium perchlorate, and any of the substances listed in the note to the USML

- h. Commercial cast or pressed boosters containing less than or equal to 1.0 kg of controlled materials;
- i. Commercial prefabricated slurries and emulsions containing less than or equal to 10.0 kg and less than or equal to thirty-five percent by weight of USML controlled materials;
- j. Cutters and severing tools containing less than or equal to 3.5 kg of controlled materials;
- k. Pyrotechnic devices when designed exclusively for commercial purposes (e.g., theatrical stages, motion picture special effects, and fireworks displays) and containing less than or equal to 3.0 kg of controlled materials; or
- l. Other commercial explosive devices and charges not controlled by 1C992.a through .k containing less than or equal to 1.0 kg of controlled materials.

*Note: 1C992.l includes automotive safety devices; extinguishing systems; cartridges for riveting guns; explosive charges for agricultural, oil and gas operations, sporting goods, commercial mining, or public works purposes; and delay tubes used in the assembly of commercial explosive devices.*

- m. Nitrogen trifluoride (NF<sub>3</sub>) in a gaseous state.

**\*\*1C995** Mixtures not controlled by ECCN 1C350, ECCN 1C355 or ECCN 1C395 that contain chemicals controlled by ECCN 1C350 or ECCN 1C355 and medical, analytical, diagnostic, and food testing kits not controlled by ECCN 1C350 or ECCN 1C395 that contain chemicals controlled by ECCN 1C350.d, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* AT, RS

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
-------------------	--

AT applies to entire entry	AT Column 1
RS applies to entire entry	A license is required for items controlled by this entry for export or reexport to Iraq or transfer within Iraq for regional stability reasons. The Commerce Country Chart is not designed to determine RS license requirements for this entry. See §§742.6 and 746.3 of the EAR for additional information.

**License Requirement Notes:**

1. *This ECCN does not control mixtures containing less than 0.5% of any single toxic or precursor chemical controlled by ECCN 1C350.b, .c, or .d or ECCN 1C355 as unavoidable by-products or impurities. Such mixtures are classified as EAR99.*

2. *1C995.c does not control mixtures that contain precursor chemicals identified in 1C350.d in concentrations below the levels for mixtures indicated in 1C350.d. 1C995.a.2.b controls such mixtures, unless they are consumer goods as described in License Requirements Note 3 of this ECCN.*

3. *This ECCN does not control mixtures when the controlled chemicals are normal ingredients in consumer goods packaged for retail sale for personal use. Such consumer goods are classified as EAR99.*

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**List of Items Controlled**

*Related Controls:* 1. ECCN [1C350](#) controls mixtures containing 30 percent or higher concentrations of any single CWC Schedule

2 chemical identified in ECCN [1C350.b](#). ECCN [1C395](#) controls mixtures containing concentrations of more than 10 percent, but less than 30 percent, of any single CWC Schedule 2 chemical identified in ECCN [1C350.b](#). 2. ECCN [1C350](#) controls mixtures containing chemicals identified in ECCN [1C350.c](#) or [.d](#) that exceed the concentration levels indicated in [1C995.a.2](#). 3. ECCN [1C355](#) controls mixtures containing chemicals identified in ECCN [1C355](#) that exceed the concentration levels indicated in [1C995.b](#). 4. ECCN [1C395](#) controls “medical, analytical, diagnostic, and food testing kits” (as defined in the Related Controls paragraph of this ECCN) that contain CWC Schedule 2 or 3 chemicals listed in [1C350.b](#) or [.c](#). ECCN [1C350](#) controls any such testing kits in which the amount of any single chemical listed in [1C350.b](#), [.c](#), or [.d](#) exceeds 300 grams by weight.

*Related Definitions:* For the purpose of this entry, “medical, analytical, diagnostic, and food testing kits” are pre-packaged materials of defined composition that are specifically developed, packaged and marketed for medical, analytical, diagnostic, or public health purposes. Replacement reagents for medical, analytical, diagnostic, and food testing kits described in [1C995.c](#) are controlled by ECCN [1C350](#) if the reagents contain at least one of the precursor chemicals identified in that ECCN in concentrations equal to or greater than the control levels for mixtures indicated in [1C350.d](#).

*Items:*

a. Mixtures containing the following concentrations of precursor chemicals controlled by ECCN [1C350](#) (For controls on other mixtures containing these chemicals, see Notes 1 and 2 in the Related Controls paragraph of this ECCN.):

a.1. Mixtures containing 10 percent or less, by weight, of any single CWC Schedule 2 chemical controlled by ECCN [1C350.b](#);

a.2. Mixtures containing less than 30 percent, by weight, of:

a.2.a. Any single CWC Schedule 3 chemical controlled by ECCN [1C350.c](#); or

a.2.b. Any single precursor chemical controlled by ECCN [1C350.d](#).

b. Mixtures containing the following concentrations of toxic or precursor chemicals controlled by ECCN [1C355](#) (For controls on other mixtures containing these chemicals, see Note 3 in the Related Controls paragraph of this ECCN.):

b.1. Mixtures containing the following concentrations of CWC Schedule 2 chemicals controlled by ECCN [1C355.a](#):

b.1.a. Mixtures containing 1 percent or less, by weight, of any single CWC Schedule 2 chemical controlled by ECCN [1C355.a.1](#) (i.e., mixtures containing PFIB); or

b.1.b. Mixtures containing 10 percent or less, by weight, of any single CWC Schedule 2 chemical controlled by [1C355.a.2](#);

b.2. Mixtures containing less than 30 percent, by weight, of any single CWC Schedule 3 chemical controlled by ECCN [1C355.b](#).

c. “Medical, analytical, diagnostic, and food testing kits” (as defined in the Related Definitions for this ECCN) that contain precursor chemicals controlled by ECCN [1C350.d](#) in an amount *not* exceeding 300 grams per chemical. (For controls on other such test kits containing these and other controlled chemicals, see Note 4 in the Related Controls paragraph of this ECCN.)

**\*\*1C996** Hydraulic fluids containing synthetic hydrocarbon oils, not controlled by [1C006](#), having all the following characteristics (see List of Items Controlled).

**License Requirements**

*Reason for Control:* CB, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
CB applies to entire entry	CB Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* See Section 772.1 of the EAR for the definitions of “software,” “program,” and “microprogram.”

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1D607** “Software” “specially designed” for the “development,” “production,” operation, or maintenance of items controlled by 1A607, 1B607 or 1C607 (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry, except “software” for 1C607.a.10, .a.11, .a.12, and .a.14	NS Column 1
RS applies to entire entry	RS Column 1
AT applies to entire entry	AT Column 1
UN applies to entire entry	See § 746.1(b) for UN controls

**List Based License Exceptions (See Part 740 for a description of all license exceptions)**

TSR: N/A

**Special Conditions for STA**

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 1D607.

**List of Items Controlled**

*Related Controls:* (1) “Software” directly related to articles enumerated or otherwise described in USML Category XIV is subject to the ITAR (see 22 CFR § 121.1, Category XIV(m)). “Software” controlled by USML Category XIV(m) includes “software” directly related to any equipment containing reagents, algorithms, coefficients, software, libraries, spectral databases, or alarm set point levels developed under U.S. Department of Defense contract or funding for the detection, identification, warning or monitoring of items controlled in paragraphs (a) or (b) of USML Category XIV, or for chemical or biological agents specified by U.S. Department of Defense funding or contract. (2) See ECCN 0A919 for “military commodities” located and produced outside the United States that incorporate more than a *de minimis* amount of US-origin “600 series” controlled content.

*Related Definitions:* N/A  
*Items:*

a. “Software” “specially designed” for the “development,” “production,” operation, or maintenance of commodities controlled by ECCN 1A607, 1B607, or 1C607.

b. [Reserved]

**\*\*1D608 “Software” “specially designed” for the “development,” “production,” operation, or maintenance of commodities controlled by 1B608 or 1C608 (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, RS, MT, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
RS applies to entire entry	RS Column 1
MT applies to “software” “specially designed” for the “use” of 1B608 equipment in the “production” and handling of materials controlled by 1C608.m or MT articles in USML Category V	MT Column 1
AT applies to entire entry	AT Column 1
UN applies to entire entry	See § 746.1(b) for UN controls

**List Based License Exceptions (See Part 740 for a description of all license exceptions)**

TSR: N/A

**Special Conditions for STA**

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 1D608.

**List of Items Controlled**

*Related Controls:* (1) Software directly related to articles enumerated or otherwise described in USML Categories III, IV or V is subject to the controls of those USML Categories, respectively. (2) See ECCN 0A919 for foreign-made “military commodities” that incorporate more than a *de minimis* amount of U.S.-origin “600 series” items.

*Related Definitions:* N/A

*Items:*

a. “Software” “specially designed” for the “development,” “production,” operation, or maintenance of commodities controlled by ECCN 1B608 or 1C608.

b. [Reserved]

**\*\*1D613** “Software” “specially designed” for the “development,” “production,” operation, or maintenance of commodities controlled by 1A613 or 1B613, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry except 1D613.y	NS Column 1
RS applies to entire entry except 1D613.y	RS Column 1
RS applies 1D613.y	China, Russia, or Venezuela (see § 724.6(a)(7))
AT applies to entire entry	AT Column 1
UN applies to entire entry, except 1D613.y	See § 746.1(b) for UN controls

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* N/A

**Special Conditions for STA**

*STA:* Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any “software” in 1D613.

**List of Items Controlled**

*Related Controls:* (1) “Software” directly related to articles controlled by USML Category X is subject to the control of USML paragraph X(e) of the ITAR. (2) See ECCN 0A919 for foreign-made “military commodities” that incorporate more than a *de minimis* amount of US-origin “600 series” controlled content.

*Related Definitions:* N/A

*Items:*

a. “Software” (other than “software” controlled in paragraph .y of this entry) “specially designed” for the “development,” “production,” operation, or maintenance of commodities controlled by ECCNs 1A613 (except 1A613.y) or 1B613 (except 1B613.y).

b. to x. [Reserved]

y. Specific “software” “specially designed” for the “production,” “development,” operation, or maintenance of commodities controlled by ECCN 1A613.y.

**\*\*1D993** “Software” “specially designed” for the “development,” “production” or “use” of equipment or materials controlled by 1C210.b, or 1C990.

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1D999** Specific software, n.e.s., as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* AT

*Control(s)*

AT applies to entire entry. A license is required for items controlled by this entry to North Korea for anti-terrorism reasons. The Commerce Country Chart is not designed to determine AT licensing requirements for this entry. See §742.19 of the EAR for additional information.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

*Related Controls:* See also [1B999](#)  
*Related Definitions:* N/A  
*Items:*

- a. Software “specially designed” for industrial process control hardware/systems controlled by 1B999, n.e.s.;
- b. Software “specially designed” for equipment for the production of structural composites, fibers, prepregs and preforms controlled by 1B999, n.e.s.

**E. “TECHNOLOGY”**

**\*\*1E001** “Technology” according to the General Technology Note for the “development” or “production” of items controlled by 1A002, 1A003, 1A004, 1A005, 1A006.b, 1A007, 1A008 1A101, 1A231, 1B (except 1B608, 1B613 or 1B999), or 1C (except 1C355, 1C608, 1C980 to 1C984, 1C988, 1C990, 1C991, 1C995 to 1C999).

**License Requirements**

*Reason for Control:* NS, MT, NP, CB, RS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to “technology” for items controlled by 1A002, 1A003, 1A005, 1A006.b, 1A007, 1B001 to 1B003, 1B018, 1C001 to 1C011, or 1C018	NS Column 1.
NS applies to “technology” for items controlled by 1A004	NS Column 2.
MT applies to “technology” for items controlled by 1A101, 1B001, 1B101, 1B102, 1B115 to 1B119, 1C001, 1C007, 1C011, 1C101, 1C102, 1C107, 1C111, 1C116, 1C117, or 1C118 for MT reasons	MT Column 1.
NP applies to “technology” for items controlled by 1A002, 1A007, 1A231, 1B001, 1B101, 1B201, 1B225, 1B226, 1B228 to 1B234, 1C002, 1C010, 1C111, 1C116, 1C202, 1C210, 1C216, 1C225 to 1C237, or 1C239 to 1C241 for NP reasons	NP Column 1.
CB applies to “technology” for items controlled by 1C351, 1C353, or 1C354	CB Column 1.
CB applies to “technology” for materials controlled by 1C350 and for chemical detection systems and	CB Column 2.

dedicated detectors therefor, in 1A004.c, that also have the technical characteristics described in 2B351.a	
RS applies to technology for equipment controlled in 1A004.d	RS Column 2.
AT applies to entire entry	AT Column 1.

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

- TSR:* Yes, except for the following:
- 1) Items controlled for MT reasons; or
  - 2) Exports and reexports to destinations outside of those countries listed in Country Group A:5 (See Supplement No. 1 to part 740 of the EAR) of “technology” for the “development” or production” of the following:
    - (a) Items controlled by 1C001; or
    - (b) Items controlled by 1A002.a which are composite structures or laminates having an organic “matrix” and being made from materials listed under 1C010.c or 1C010.d.

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship or transmit “technology” according to the General Technology Note for the “development” or “production” of equipment and materials specified by ECCNs [1A002](#), [1C001](#), [1C007.c](#), [1C010.c](#) or [1C012](#) to any of the destinations listed in Country Group A:6 (See

Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls* (1) Also see ECCNs 1E101, 1E201, and 1E202. (2) See ECCN 1E608 for “technology” for items classified under ECCN 1B608 or 1C608 that, immediately prior to July 1, 2014, were classified under ECCN 1B018.a or 1C018.b through .m (note that ECCN 1E001 controls “development” and “production” “technology” for chlorine trifluoride controlled by ECCN 1C111.a.3.f – see ECCN 1E101 for controls on “use” “technology” for chlorine trifluoride). (3) See ECCN 1E002.g for control libraries (parametric technical databases) “specially designed” or modified to enable equipment to perform the functions of equipment controlled under ECCN 1A004.c (Nuclear, biological and chemical (NBC) detection systems) or ECCN 1A004.d (Equipment for detecting or identifying explosives residues). (4) “Technology” for lithium isotope separation (see related ECCN 1B233) and “technology” for items described in ECCN 1C012 are subject to the export licensing authority of the Department of Energy (see 10 CFR part 810). (5) “Technology” for items described in ECCN 1A102 is “subject to the ITAR” (see 22 CFR parts 120 through 130).

*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1E002 Other “technology” as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, MT, NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry, except 1E002.g	NS Column 1
NS applies to 1E002.g	NS Column 2
MT applies to 1E002.e	MT Column 1
NP applies to “technology” for items controlled by 1A002 for NP reasons.	NP Column 1
AT applies to entire entry	AT Column 1

### Reporting Requirements

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* Yes, except for 1E002.e and .f.

**License Exceptions Note:** License Exception TSU is not applicable for the repair “technology” controlled by 1E002.e or .f, see Supplement No. 2 to part 774.

### Special Conditions for STA

*STA:* License Exception STA may not be used to ship or transmit any item in 1E002.e or .f to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

### List of Items Controlled

*Related Controls:* See also [1E001](#), [1E101](#), [1E102](#), [1E202](#), and [1E994](#) for “technology” related to [1E002.e](#) or [.f](#).

*Related Definitions:* N/A  
*Items:*

a. “Technology” for the “development” or “production” of polybenzothiazoles or polybenzoxazoles;

b. “Technology” for the “development” or “production” of fluoroelastomer compounds containing at least one vinyl ether monomer;

c. “Technology” for the design or “production” of the following ceramic powders or non-“composite” ceramic materials:

c.1. Ceramic powders having all of the following:

c.1.a Any of the following compositions:

c.1.a.1. Single or complex oxides of zirconium and complex oxides of silicon or aluminum;

c.1.a.2. Single nitrides of boron (cubic crystalline forms);

c.1.a.3. Single or complex carbides of silicon or boron; or

c.1.a.4. Single or complex nitrides of silicon;

c.1.b. Any of the following total metallic impurities (excluding intentional additions):

c.1.b.1. Less than 1,000 ppm for single oxides or carbides; or

c.1.b.2. Less than 5,000 ppm for complex compounds or single nitrides; and

c.1.c. Being any of the following:

c.1.c.1. Zirconia (CAS 1314-23-4) with an average particle size equal to or less than 1 µm and no more than 10% of the particles larger than 5 µm; *or*

c.1.c.2. Other ceramic powders with an average particle size equal to or less than 5 µm and no more than 10% of the particles larger than 10 µm;

c.2. Non-“composite” ceramic materials composed of the materials described in 1E002.c.1;

*Note:* 1E002.c.2 does not control “technology” for abrasives.

d. [Reserved]

e. “Technology” for the installation, maintenance or repair of materials controlled by 1C001;

f. “Technology” for the repair of “composite” structures, laminates or materials controlled by 1A002 or 1C007.c;

*Note:* 1E002.f does not control “technology” for the repair of “civil aircraft” structures using carbon “fibrous or filamentary materials” and epoxy resins, contained in “aircraft” manufacturers’ manuals.

g. “Libraries” “specially designed” or modified to enable equipment to perform the functions of equipment controlled under 1A004.c or 1A004.d.

**\*\*1E101** “Technology”, in accordance with the General Technology Note, for the “use” of commodities and “software” controlled by 1A101, 1A102, 1B001, 1B101, 1B102, 1B115 to 1B119, 1C001, 1C007, 1C011, 1C101, 1C107, 1C111, 1C116, 1C117, 1C118, 1D001, 1D101, or 1D103.

**License Requirements**

*Reason for Control:* MT, NP, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
MT applies to “technology” for commodities and software controlled by 1A101, 1A102, 1B001, 1B101, 1B102, 1B115 to 1B119, 1C001, 1C007, 1C011, 1C101, 1C107,	MT Column 1

1C111, 1C116, 1C117, 1C118, 1D001, 1D101, or 1D103 for MT reasons	
NP applies to “technology” for items controlled by 1B001, 1B101, 1C111, 1C116, 1D001, or 1D101 for NP reasons	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

*Related Controls:* “Technology” for items controlled by [1A102](#) is “subject to the ITAR” (see 22 CFR parts 120 through 130).

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1E102** “Technology” according to the General Technology Note for the “development” of software controlled by 1D001, 1D101 or 1D103.

**License Requirements**

*Reason for Control:* MT, NP, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
MT applies to entire entry	MT Column 1
NP applies to “technology” for items controlled by 1D001 and 1D101 for NP reasons	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

*Related Controls:* This entry includes databases “specially designed” for analysis of signature reduction.

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1E103** “Technical data” (including processing conditions) and procedures for the regulation of temperature, pressure or atmosphere in autoclaves or hydroclaves, when used for the “production” of “composites” or partially processed “composites”, usable for equipment or materials specified in 1C007, 1C102, 1C107, 1C116, 1C117, 1C118, 9A110, and 9C110.

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

*Related Controls:* See also [1E203](#)

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1E104** “Technology” for the “production” of pyrolytically derived materials formed on a mold, mandrel or other substrate from precursor gases which decompose in the 1,573 K (1,300 °C) to 3,173 K (2,900 °C) temperature range at pressures of 130 Pa (1 mm Hg) to 20 kPa (150 mm Hg), including “technology” for the composition of precursor gases, flow-rates and process control schedules and parameters.

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1E201** “Technology” according to the General Technology Note for the “use” of items controlled by 1A002, 1A007, 1A202, 1A225 to 1A227, 1A231, 1B201, 1B225, 1B226, 1B228 to 1B232, 1B233.b, 1B234, 1C002.b.3 and b.4, 1C010.a, 1C010.b, 1C010.e.1, 1C202, 1C210, 1C216, 1C225 to 1C237, 1C239 to 1C241 or 1D201.

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry, for items controlled for NP reasons.	NP Column 1

The list of items controlled is contained in the ECCN heading.

**\*\*1E355** Technology for the production of Chemical Weapons Convention (CWC) Schedule 2 and 3 chemicals, as follows (see List of Items Controlled):

**License Requirements**

*Reason for Control:* CW, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
CW applies to entire entry.	A license is required for CW reasons to CWC non-States Parties (destinations not listed in Supplement No. 2 to part 745), except for Israel and Taiwan. See §742.18 of the EAR. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for CW reasons.
AT applies to the entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

a. Technology for the production of the following CWC Schedule 2 toxic chemicals:

a.1. PFIB: 1,1,3,3,3-Pentafluoro-2-(trifluoromethyl)-1-propene (382-21-8);

a.2. [Reserved]

b. Technology for the production of the following CWC Schedule 3 toxic chemicals:

b.1. Phosgene: Carbonyl dichloride (75-44-5);

b.2. Cyanogen chloride (506-77-4);

b.3. Hydrogen cyanide (74-90-8).

**\*\*1E607** “Technology” “required” for the “development,” “production,” operation, installation, maintenance, repair, overhaul, or refurbishing of items controlled by ECCN 1A607, 1B607, 1C607, or 1D607 (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry, except “technology” for 1C607.a.10, .a.11, .a.12, and .a.14 and for 1D607 “software” therefor	NS Column 1
RS applies to entire entry	RS Column 1
AT applies to entire entry	AT Column 1
UN applies to entire entry	See § 746.1(b) for UN controls

**List Based License Exceptions (See Part 740 for a description of all license exceptions)**

*TSR:* N/A

**Special Conditions for STA**

*STA:* Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 1E607.

**List of Items Controlled**

*Related Controls:* Technical data directly related to defense articles enumerated or otherwise described in USML Category XIV are subject to the ITAR (see 22 CFR § 121.1, Category XIV(m)). Technical data controlled by USML Category XIV(m) include technical data directly related to any equipment containing reagents, algorithms, coefficients, software, libraries, spectral databases, or alarm set point levels developed under U.S. Department of Defense contract or funding for the detection, identification, warning or monitoring of items controlled in paragraphs (a) or (b) of USML Category XIV, or for chemical or biological agents specified by U.S. Department of Defense funding or contract.

*Related Definitions:* N/A

*Items:*

a. “Technology” “required” for the “development,” “production,” operation, installation, maintenance, repair, overhaul, or refurbishing of items controlled by ECCN 1A607, 1B607, 1C607 or 1D607.

*Note to 1E607.a:* ECCN 1E607.a includes “technology” “required” exclusively for the incorporation of “biocatalysts” controlled by ECCN 1C607.c.1 into military carrier substances or military material.

b. [Reserved]

**\*\*1E608** “Technology” “required” for the “development,” “production,” operation, installation, maintenance, repair, overhaul, or refurbishing of equipment controlled in 1B608 or materials controlled by 1C608 (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, RS, MT, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
RS applies to entire entry	RS Column 1
MT applies to “technology” “required” for 1C608.m	MT Column 1
AT applies to entire entry	AT Column 1
UN applies to entire entry	See § 746.1(b) for UN controls

**List Based License Exceptions (See Part 740 for a description of all license exceptions)**

*TSR:* N/A

**Special Conditions for STA**

*STA:* Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 1E608.

**List of Items Controlled**

*Related Controls:* (1) Technical data directly related to articles enumerated or otherwise described in USML Categories III, IV, or V are subject to the controls of those USML Categories, respectively.

(2) “Technology” for chlorine trifluoride is controlled under ECCN 1E001 (“development” and “production”) and ECCN 1E101 (“use”).

*Related Definitions:* N/A

*Items:*

a. “Technology” “required” for the “development,” “production,” operation, installation, maintenance, repair, overhaul, or refurbishing of equipment controlled by ECCN 1B608 or materials controlled by ECCN 1C608.

b. “Technology” “required” for the

“development” or “production” of nitrocellulose with nitrogen content over 12.6% and at rates greater than 2000 pounds per hour.

c. “Technology” “required” for the “development” or “production” of nitrate esters (e.g., nitroglycerine) at rates greater than 2000 pounds per hour.

**\*\*1E613** “Technology” “required” for the “development,” “production,” operation, installation, maintenance, repair, overhaul, or refurbishing of commodities controlled by 1A613 or 1B613 or “software” controlled by 1D613, as follows (see list of items controlled).

**License Requirements**

*Reason for Control:* NS, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry except 1E613.y	NS Column 1
RS applies to entire entry except 1E613.y	RS Column 1
RS applies 1E613.y	China, Russia, or Venezuela (see § 724.6(a)(7))
AT applies to entire entry	AT Column 1
UN applies to entire entry, except 1E613.y	See § 746.1(b) for UN controls

**List Based License Exceptions (See Part 740 for a description of all license exceptions)**

*TSR:* N/A

**Special Conditions for STA**

*STA:* Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any “technology” in 1E613.

**List of Items Controlled**

*Related Controls:* Technical data directly

related to articles controlled by USML Category X are subject to the control of USML paragraph X(e) of the ITAR.

*Related Definitions:* N/A

*Items:*

a. “Technology” (other than “technology” controlled by paragraph .y of this entry) “required” for the “development,” “production,” operation, installation, maintenance, repair, overhaul, or refurbishing of commodities or “software” controlled by ECCNs 1A613 (except 1A613.y), 1B613 or 1D613 (except 1D613.y).

b. through x. [Reserved]

y. Specific “technology” “required” for the “production,” “development,” operation, installation, maintenance, repair, overhaul, or refurbishing of commodities or software controlled by ECCN 1A613.y or 1D613.y.

**\*\*1E994** “Technology” for the “development”, “production”, or “use” of fibrous and filamentary materials controlled by 1C990.

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*1E998** “Technology” for the “development” or “production” of processing equipment controlled by 1B999, and materials controlled by 1C996, 1C997, 1C998, or 1C999.

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**EAR99** Items subject to the EAR that are *not* elsewhere specified in this CCL Category or in any other category in the CCL are designated by the number **EAR99**.

**ANNEX to Category 1**

**List of Explosives (See ECCNs 1A004 and 1A008)**

- ADNBF (aminodinitrobenzofuroxan or 7-amino-4,6-dinitrobenzofurazane-1-oxide) (CAS 97096-78-1);
- BNCP (cis-bis (5-nitrotetrazolato) tetra amine-cobalt (III) perchlorate) (CAS 117412-28-9);

3. CL-14 (diamino dinitrobenzofuroxan or 5,7-diamino-4,6-dinitrobenzofurazane-1-oxide) (CAS 117907-74-1);
4. CL-20 (HNIW or Hexanitrohexaazaisowurtzitane) (CAS 135285-90-4); chlathrates of CL-20;
5. CP (2-(5-cyanotetrazolato) penta amine-cobalt (III) perchlorate) (CAS 70247-32-4);
6. DADE (1,1-diamino-2,2-dinitroethylene, FOX-7) (CAS 145250-81-3);
7. DATB (diaminotrinitrobenzene) (CAS 1630-08-6);
8. DDFP (1,4-dinitrodifurazanopiperazine);
9. DDPO (2,6-diamino-3,5-dinitropyrazine-1-oxide, PZO) (CAS 194486-77-6);
10. DIPAM (3,3'-diamino-2,2',4,4',6,6'-hexanitrobiphenyl or dipicramide) (CAS 17215-44-0);
11. DNGU (DINGU or dinitroglycoluril) (CAS 55510-04-8);
12. Furazans as follows:
- DAAOF (diaminoazoxyfurazan);
  - DAAzF (diaminoazofurazan) (CAS 78644-90-3);
13. HMX and derivatives, as follows:
- HMX (Cyclotetramethylenetetranitramine, octahydro-1,3,5,7-tetranitro-1,3,5,7-tetrazine, 1,3,5,7-tetranitro-1,3,5,7-tetraza-cyclooctane, octogen or octogene) (CAS 2691-41-0);
  - difluoroaminated analogs of HMX;
  - K-55 (2,4,6,8-tetranitro-2,4,6,8-tetraazabicyclo [3,3,0]-octanone-3, tetranitrosemiglycouril or keto-bicyclic HMX) (CAS 130256-72-3);
14. HNAD (hexanitroadamantane) (CAS 143850-71-9);
15. HNS (hexanitrostilbene) (CAS 20062-22-0);
16. Imidazoles as follows:
- BNNII (Octahydro-2,5-bis(nitroimino)imidazo [4,5-d]imidazole);
  - DNI (2,4-dinitroimidazole) (CAS 5213-49-0);
  - FDIA (1-fluoro-2,4-dinitroimidazole);
  - NTDNIA (N-(2-nitrotriazolo)-2,4-dinitroimidazole);
  - PTIA (1-picryl-2,4,5-trinitroimidazole);
17. NTNMH (1-(2-nitrotriazolo)-2-dinitromethylene hydrazine);
18. NTO (ONTA or 3-nitro-1,2,4-triazol-5-one) (CAS 932-64-9);
19. Polynitrocubanes with more than four nitro groups;
20. PYX (2,6-Bis(picrylamino)-3,5-dinitropyridine) (CAS 38082-89-2);
21. RDX and derivatives, as follows:
- RDX (cyclotrimethylenetrinitramine, cyclonite, T4, hexahydro-1,3,5-trinitro-1,3,5-triazine, 1,3,5-trinitro-1,3,5-triaza-cyclohexane, hexogen or hexogene) (CAS 121-82-4);
  - Keto-RDX (K-6 or 2,4,6-trinitro-2,4,6-triazacyclohexanone) (CAS 115029-35-1);

22. TAGN (triaminoguanidinenitrate) (CAS 4000-16-2);
23. TATB (triaminotrinitrobenzene) (CAS 3058-38-6);
24. TEDDZ (3,3,7,7-tetrakis(difluoroamine) octahydro-1,5-dinitro-1,5-diazocine);
25. Tetrazoles as follows:
- a. NTAT (nitrotriazol aminotetrazole);
  - b. NTNT (1-N-(2-nitrotriazolo)-4-nitrotetrazole);
26. Tetryl (trinitrophenylmethylnitramine) (CAS 479-45-8);
27. TNAD (1,4,5,8-tetranitro-1,4,5,8-tetraazadecalin) (CAS 135877-16-6);
28. TNAZ (1,3,3-trinitroazetidine) (CAS 97645-24-4);
29. TNGU (SORGUYL or tetranitroglycoluril) (CAS 55510-03-7);
30. TNP (1,4,5,8-tetranitro-pyridazino[4,5-d]pyridazine) (CAS 229176-04-9);
31. Triazines as follows:
- a. DNAM (2-oxy-4,6-dinitroamino-s-triazine) (CAS 19899-80-0);
  - b. NNHT (2-nitroimino-5-nitro-hexahydro-1,3,5-triazine) (CAS 130400-13-4);
32. Triazoles as follows:
- a. 5-azido-2-nitrotriazole;
  - b. ADHTDN (4-amino-3,5-dihydrazino-1,2,4-triazole dinitramide) (CAS 1614-08-0);
- c. ADNT (1-amino-3,5-dinitro-1,2,4-triazole);
  - d. BDNTA ((bis-dinitrotriazole)amine);
  - e. DBT (3,3'-dinitro-5,5-bi-1,2,4-triazole) (CAS 30003-46-4);
  - f. DNBT (dinitrobistriazole) (CAS 70890-46-9);
  - g. [Reserved]
  - h. NTDNT (1-N-(2-nitrotriazolo) 3,5-dinitrotriazole);
  - i. PDNT (1-picryl-3,5-dinitrotriazole);
  - j. TACOT (tetranitrobenzotriazolobenzotriazole) (CAS 25243-36-1);
33. "Explosives" not listed elsewhere in this list having a detonation velocity exceeding 8,700 m/s, at maximum density, or a detonation pressure exceeding 34 GPa (340 kbar);
34. [Reserved]
35. Nitrocellulose (containing more than 12.5% nitrogen) (CAS 9004-70-0);
36. Nitroglycol (CAS 628-96-6);
37. Pentaerythritol tetranitrate (PETN) (CAS 78-11-5);
38. Picryl chloride (CAS 88-88-0);
39. 2,4,6 Trinitrotoluene (TNT) (CAS 118-96-7);
40. Nitroglycerine (NG) (CAS 55-63-0);
41. Triacetone Triperoxide (TATP) (CAS 17088-37-8);
42. Guanidine nitrate (CAS 506-93-4);

43. Nitroguanidine (NQ) (CAS 556-88-7);
44. DNAN (2,4-dinitroanisole) (CAS 119-27-7);
45. TEX (4,10-Dinitro-2,6,8,12-tetraoxa-4,10-diazaisowurtzitane);
46. GUDN (Guanylurea dinitramide) FOX-12 (CAS 217464-38-5);
47. Tetrazines as follows:
- a. BTAT (Bis(2,2,2-trinitroethyl)-3,6-diaminotetrazine);
- b. LAX-112 (3,6-diamino-1,2,4,5-tetrazine-1,4-dioxide);
48. Energetic ionic materials melting between 343 K (70°C) and 373 K (100°C) and with detonation velocity exceeding 6,800 m/s or detonation pressure exceeding 18 GPa (180 kbar);
49. BTNEN (Bis(2,2,2-trinitroethyl)-nitramine) (CAS 19836-28-3);
50. FTDO (5,6-(3',4'-furazano)-1,2,3,4-tetrazine-1,3-dioxide).

**CATEGORY 2 - MATERIALS PROCESSING**

*Note:* For quiet running bearings, see the U.S. Munitions List.

**A. "END ITEMS," "EQUIPMENT," "ACCESSORIES," "ATTACHMENTS," "PARTS," "COMPONENTS," AND "SYSTEMS"**

**\*\*2A001** Anti-friction bearings and bearing systems, as follows, (see List of Items Controlled) and "components" therefor.

**License Requirements**

*Reason for Control:* NS, MT, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 2
MT applies to radial ball bearings having all tolerances specified in accordance with ISO 492 Tolerance Class 2 (or ANSI/ABMA Std 20 Tolerance Class ABEC-9, or other national equivalents) or better and having all the following characteristics: an inner ring bore diameter between 12 and 50 mm; an outer ring outside diameter between 25 and 100 mm; and a width between 10 and 20 mm.	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$3000, N/A for MT  
*GBS:* Yes, for 2A001.a, N/A for MT

**List of Items Controlled**

*Related Controls:* (1) See also [2A991](#). (2) Quiet running bearings are "subject to the ITAR" (see 22 CFR parts 120 through 130.)

*Related Definitions:* Annular Bearing Engineers Committee (ABEC).

*Items:*

*Note 1:* 2A001.a includes ball bearing and roller elements "specially designed" for the items specified therein.

*Note 2:* 2A001 does not control balls with tolerances specified by the manufacturer in accordance with ISO 3290:2001 as grade G5 (or national equivalents) or worse.

a. Ball bearings and solid roller bearings, having all tolerances specified by the manufacturer in accordance with ISO 492 Tolerance Class 2 or Class 4 (or national equivalents), or better, and having both 'rings' and 'rolling elements', made from monel or beryllium;

*Note:* 2A001.a does not control tapered roller bearings.

**Technical Notes:**

1. 'Ring' - annular part of a radial rolling bearing incorporating one or more raceways (ISO 5593:1997).

2. 'Rolling element'- ball or roller which rolls between raceways (ISO 5593:1997).

b. [Reserved]

c. Active magnetic bearing systems using any of the following:

c.1. Materials with flux densities of 2.0 T or greater and yield strengths greater than 414 MPa;

c.2. All-electromagnetic 3D homopolar bias designs for actuators; *or*

c.3. High temperature (450 K (177°C) and above) position sensors.

**\*\*2A101** Radial ball bearings having all tolerances specified in accordance with ISO 492 Tolerance Class 2 (or ANSI/ABMA Std 20 Tolerance Class ABEC-9 or other national equivalents), or better and having all the following characteristics (see List of Items Controlled).

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See ECCN 2A001.

*Related Definitions:* N/A

*Items:*

a. An inner ring bore diameter between 12 and 50 mm;

b. An outer ring outside diameter between 25 and 100 mm; *and*

c. A width between 10 and 20 mm.

**\*\*2A225** Crucibles made of materials resistant to liquid actinide metals (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E201](#) (“use”) for technology for items controlled under this entry.

*Related Definitions:* N/A

*Items:*

a. Crucibles having both of the following characteristics:

a.1. A volume of between 150 cm<sup>3</sup> (150 ml) and 8,000 cm<sup>3</sup> (8 liters); *and*

a.2. Made of, or coated with, any of the following materials, or combination of the following materials, having an overall impurity level of 2% or less by weight:

a.2.a. Calcium fluoride (CaF<sub>2</sub>);

- a.2.b. Calcium zirconate (metazirconate) (CaZrO<sub>3</sub>);
- a.2.c. Cerium sulfide (Ce<sub>2</sub>S<sub>3</sub>);
- a.2.d. Erbium oxide (erbia) (Er<sub>2</sub>O<sub>3</sub>);
- a.2.e. Hafnium oxide (hafnia) (HfO<sub>2</sub>);
- a.2.f. Magnesium oxide (MgO);
- a.2.g. Nitrided niobium-titanium-tungsten alloy (approximately 50% Nb, 30% Ti, 20% W);
- a.2.h. Yttrium oxide (yttria) (Y<sub>2</sub>O<sub>3</sub>); *or*
- a.2.i. Zirconium oxide (zirconia) (ZrO<sub>2</sub>);

b. Crucibles having both of the following characteristics:

b.1. A volume of between 50 cm<sup>3</sup> and 2,000 cm<sup>3</sup> (2 liters); *and*

b.2. Made of or lined with tantalum, having a purity of 99.9% or greater by weight;

c. Crucibles having all of the following characteristics:

c.1. A volume of between 50 cm<sup>3</sup> and 2,000 cm<sup>3</sup> (2 liters);

c.2. Made of or lined with tantalum, having a purity of 98% or greater by weight; *and*

c.3. Coated with tantalum carbide, nitride, boride, or any combination thereof.

**\*\*2A226** Valves having all of the following characteristics (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, CB, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
CB applies to valves that meet or exceed the technical parameters in 2B350.g.	CB Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E201](#) (“use”) for technology for items controlled under this entry. (2) Also see ECCNs [2A992](#), [2B350.g](#) and [2B999](#). (3) Valves “specially designed” or prepared for certain nuclear uses are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* For valves with different inlet and outlet diameters, the “nominal size” in 2A226 refers to the smallest diameter.

*Items:*

a. A “nominal size” of 5 mm or greater;

b. Having a bellows seal; *and*

c. Wholly made of or lined with aluminum, aluminum alloy, nickel, or nickel alloy containing more than 60% nickel by weight.

**\*\*2A290** Generators and other equipment “specially designed,” prepared, or intended for use with nuclear plants.

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCN [2D290](#) for software for items controlled under this entry. (2) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E290](#) (“use”) for technology for items controlled under this entry. (3) Also see ECCN [2A291](#). (4) Certain nuclear equipment “specially designed” or prepared for use in nuclear plants is subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*Items:*

- a. Generators, turbine-generator sets, steam turbines, heat exchangers, and heat exchanger type condensers designed or intended for use in a nuclear reactor;
- b. Process control systems intended for use with the equipment controlled by 2A290.a.

**\*\*2A291** Equipment, except items controlled by 2A290, related to nuclear material handling and processing and to nuclear reactors, and “parts” and “components” and “accessories” therefor.

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCN [2D290](#) for software for items controlled under this entry. (2) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E290](#) (“use”) for technology for items controlled under this entry. (3) Also see ECCN [2A290](#). (4) Certain equipment “specially designed” or prepared for use in a nuclear reactor or in nuclear material handling is subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110). (5) Nuclear radiation detection and measurement devices “specially designed” or modified for military purposes are “subject to the ITAR” (see 22 CFR Parts 120 through 130).

*Related Definitions:* N/A

*Items:*

- a. Process control systems intended for use with nuclear reactors.

b. Simulators “specially designed” for “nuclear reactors”.

c. Casks that are “specially designed” for transportation of high-level radioactive material and that weigh more than 1,000 kg.

d. Commodities, “parts,” “components” and “accessories” “specially designed” or prepared for use with nuclear plants (e.g., snubbers, airlocks, pumps, reactor fuel charging and discharging equipment, containment equipment such as hydrogen recombiner and penetration seals, and reactor and fuel inspection equipment, including ultrasonic or eddy current test equipment).

e. Radiation detectors and monitors “specially designed” for detecting or measuring “special nuclear material” (as defined in 10 CFR Part 110) or for nuclear reactors.

**Technical Notes:**

1. 2A291.e does not control neutron flux detectors and monitors. These are subject to the export licensing authority of the Nuclear Regulatory Commission, pursuant to 10 CFR Part 110.

2. 2A291.e does not control general purpose radiation detection equipment, such as geiger counters and dosimeters. These items are controlled by ECCN 1A999.

**\*\*2A983** Explosives or detonator detection equipment, both bulk and trace based, consisting of an automated device, or combination of devices for automated decision making to detect the presence of different types of explosives, explosive residue, or detonators; and “parts” and “components,” n.e.s.

**License Requirements**

*Reason for Control:* RS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
RS applies to entire entry	RS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* Also see 1A004 and 1A995.

*Related Definitions:* 1) For the purpose of this entry, automated decision making is the ability of the equipment to detect explosives or detonators at the design or operator-selected level of sensitivity and provide an automated alarm when explosives or detonators at or above the sensitivity level are detected. This entry does not control equipment that depends on operator interpretation of indicators such as inorganic/organic color mapping of the items(s) being scanned. 2) Explosives and detonators include commercial charges and devices controlled by 1C018 and 1C992 and energetic materials controlled by ECCNs 1C011, 1C111, 1C239 and 22 CFR 121.1 Category V.

*Items:*

*Note:* Explosives or detonation detection equipment in 2A983 includes equipment for screening people, documents, baggage, other personal effects, cargo and/or mail.

a. Explosives detection equipment for automated decision making to detect and identify bulk explosives utilizing, but not limited to, x-ray (e.g., computed tomography, dual energy, or coherent scattering), nuclear (e.g., thermal neutron analysis, pulse fast neutron analysis, pulse fast neutron transmission spectroscopy, and gamma resonance absorption), or electromagnetic techniques (e.g., quadropole resonance and dielectrometry).

b.[RESERVED]

c. Detonator detection equipment for automated decision making to detect and identify initiation devices (e.g. detonators, blasting caps) utilizing, but not limited to, x-ray (e.g. dual energy or computed tomography) or electromagnetic techniques.

**\*\*2A984** Concealed object detection equipment operating in the frequency range from 30 GHz to 3000 GHz and having a spatial resolution of 0.1 milliradian up to and including 1 milliradian at a standoff distance of 100 meters; and “parts” and “components,” n.e.s.

**License Requirements**

*Reason for Control:* RS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
RS applies to entire entry	RS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) Concealed object detection equipment operating in the frequency range from 30 GHz to 3000 GHz and having a spatial resolution less than 0.1 milliradian (a lower milliradian number means a more accurate image resolution) at a standoff distance of 100 meters is “subject to the ITAR” under USML Category XII(c). (2) Concealed object detection equipment operating in the frequency range from 30 GHz to 3000 GHz and having a spatial resolution greater than 1 milliradian (a higher milliradian number means a less accurate image resolution) at a standoff distance of 100 meters is designated as EAR99. (3) See ECCNs [2D984](#) and [2E984](#) for related software and technology controls.

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

*Note:* Concealed object detection equipment includes but is not limited to equipment for screening people, documents, baggage, other personal effects, cargo and/or mail.

**Technical Note:** The range of frequencies span what is generally considered as the millimeter-wave, submillimeter-wave and terahertz frequency regions.

**\*\*2A991** Bearings and bearing systems not controlled by 2A001 (see List of Items Controlled).

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) This entry does not control balls with tolerance specified by the manufacturer in accordance with ISO 3290 as grade 5 or worse. (2) Quiet running bearings are “subject to the ITAR” (see 22 CFR parts 120 through 130).

*Related Definitions:* (1) (a) DN is the product of the bearing bore diameter in mm and the bearing rotational velocity in rpm. (b) Operating temperatures include those temperatures obtained when a gas turbine engine has stopped after operation. (2) Annular Bearing Engineers Committee (ABEC); American National Standards Institute (ANSI); Anti-Friction Bearing Manufacturers Association (AFBMA)

*Items:*

a. Ball bearings or Solid ball bearings, having tolerances specified by the manufacturer in accordance with ABEC 7, ABEC 7P, or ABEC 7T or ISO Standard Class 4 or better (or equivalents) and having any of the following characteristics.

a.1. Manufactured for use at operating temperatures above 573 K (300 °C) either by using special materials or by special heat treatment; *or*

a.2. With lubricating elements or “part” or “component” modifications that, according to the

manufacturer's specifications, are “specially designed” to enable the bearings to operate at speeds exceeding 2.3 million DN.

b. Solid tapered roller bearings, having tolerances specified by the manufacturer in accordance with ANSI/AFBMA Class 00 (inch) or Class A (metric) or better (or equivalents) and having either of the following characteristics.

b.1. With lubricating elements or “part” or “component” modifications that, according to the manufacturer's specifications, are “specially designed” to enable the bearings to operate at speeds exceeding 2.3 million DN; *or*

b.2. Manufactured for use at operating temperatures below 219 K (-54 °C) or above 423 K (150 °C).

c. Gas-lubricated foil bearing manufactured for use at operating temperatures of 561 K (288 °C) or higher and a unit load capacity exceeding 1 MPa.

d. Active magnetic bearing systems.

e. Fabric-lined self-aligning or fabric-lined journal sliding bearings manufactured for use at operating temperatures below 219 K(-54 °C) or above 423 K (150 °C).

**\*\*2A992 Piping, fittings and valves made of, or lined with stainless, copper-nickel alloy or other alloy steel containing 10% or more nickel and/or chromium.**

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCN 2D993 for software for items controlled under this entry. (2) See ECCNs 2E001 (“development”), 2E002 (“production”), and 2E993 (“use”) for technology for items controlled under this entry. (3) Also see ECCNs 2A226, 2B350 and 2B999.

*Related Definitions:* N/A

*Items:*

- a. Pressure tube, pipe, and fittings of 200 mm (8 in.) or more inside diameter, and suitable for operation at pressures of 3.4 MPa (500 psi) or greater;
- b. Pipe valves having all of the following characteristics that are not controlled by ECCN 2B350.g:
  - b.1. A pipe size connection of 200 mm (8 in.) or more inside diameter; *and*
  - b.2. Rated at 10.3 MPa (1,500 psi) or more.

**\*\*2A993 Pumps designed to move molten metals by electromagnetic forces.**

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

*Related Controls:* See also [2A226](#), [2B350](#)

*Related Definitions:* N/A

*Items:*

a. Bellows sealed valves;

b. [RESERVED].

### B. “TEST,” “INSPECTION” AND “PRODUCTION EQUIPMENT”

#### **TECHNICAL NOTES FOR 2B001 TO 2B009, 2B201, AND 2B991 TO 2B999:**

1. *Secondary parallel contouring axes, (e.g., the w-axis on horizontal boring mills or a secondary rotary axis the center line of which is parallel to the primary rotary axis) are not counted in the total number of contouring axes. Rotary axes need not rotate over 360°. A rotary axis can be driven by a linear device (e.g., a screw or a rack-and-pinion).*

2. *The number of axes which can be coordinated simultaneously for “contouring control” is the number of axes along or around which, during processing of the workpiece, simultaneous and interrelated motions are performed between the workpiece and a tool. This does not include any additional axes along or around which other relative motions within the machine are performed, such as:*

2.a. *Wheel-dressing systems in grinding machines;*

2.b. *Parallel rotary axes designed for mounting of separate workpieces;*

2.c. *Co-linear rotary axes designed for manipulating the same workpiece by holding it in*

a chuck from different ends.

3. Axis nomenclature shall be in accordance with International Standard ISO 841:2001, Industrial automation systems and integration - Numerical control of machines - Coordinate system and motion nomenclature.

4. A “tilting spindle” is counted as a rotary axis.

5. ‘Stated “unidirectional positioning repeatability”’ may be used for each specific machine model as an alternative to individual machine tests, and is determined as follows:

5.a. Select five machines of a model to be evaluated;

5.b. Measure the linear axis repeatability ( $R_{\uparrow}, R_{\downarrow}$ ) according to ISO 230-2:2014 and evaluate “unidirectional positioning repeatability” for each axis of each of the five machines;

5.c. Determine the arithmetic mean value of the “unidirectional positioning repeatability”-values for each axis of all five machines together. These arithmetic mean values “unidirectional positioning repeatability” ( $\overline{UPR}$ ) become the stated value of each axis for the model(=)( $\overline{UPR}_x, \overline{UPR}_y, \dots$ );

5.d. Since the Category 2 list refers to each linear axis there will be as many ‘stated “unidirectional positioning repeatability”’ values as there are linear axes;

5.e. If any axis of a machine model not controlled by 2B001.a. to 2B001.c. has a ‘stated “unidirectional positioning repeatability”’ equal to or less than the specified “unidirectional positioning repeatability” of each machine tool model plus 0.7  $\mu\text{m}$ , the builder should be required to reaffirm the accuracy level once every eighteen months.

6. For the purpose of 2B, measurement uncertainty for the “unidirectional positioning repeatability” of machine tools, as defined in the International Standard ISO 230-2:2014, shall not be considered.

7. For the purpose of 2B, the measurement of axes shall be made according to test procedures in 5.3.2. of ISO 230-2:2014. Tests for axes longer than 2 meters shall be made over 2 m segments. Axes longer than 4 m require multiple tests (e.g., two tests for axes longer than 4 m and up to 8 m, three tests for axes longer than 8 m and up to 12 m), each over 2 m segments and distributed in equal intervals over the axis length. Test segments are equally spaced along the full axis length, with any excess length equally divided at the beginning, in between, and at the end of the test segments. The smallest “unidirectional positioning repeatability”-value of all test segments is to be reported.

**\*\*2B001** Machine tools and any combination thereof, for removing (or cutting) metals, ceramics or “composites”, which, according to the manufacturer's technical specifications, can be equipped with electronic devices for “numerical control”; as follows (see List of Items Controlled).

LICENSE REQUIREMENTS

Reason for Control: NS, NP, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 2
NP applies to 2B001.a, .b, .c, and .d, EXCEPT: (1) turning machines under 2B001.a with a capacity no greater than 35 mm diameter; (2) bar	NP Column 1

<p>machines (Swissturn), limited to machining only bar feed through, if maximum bar diameter is equal to or less than 42 mm and there is no capability of mounting chucks. (Machines may have drilling and/or milling capabilities for machining “parts” or “components” with diameters less than 42 mm); or                  (3) milling machines under 2B001.b with x-axis travel greater than two meters and overall positioning accuracy according to ISO 230/2 (2006) on the x-axis more (worse) than 22.5 µm.</p>	
<p>AT applies to entire entry</p>	<p>AT Column 1</p>

*Note 1:* 2B001 does not control special purpose machine tools limited to the manufacture of gears. For such machines, see 2B003.

*Note 2:* 2B001 does not control special purpose machine tools limited to the manufacture of any of the following:

- a. Crank shafts or cam shafts;
  - b. Tools or cutters;
  - c. Extruder worms;
  - d. Engraved or faceted jewelry parts;
- or
- e. Dental prostheses.

*Note 3:* A machine tool having at least two of the three turning, milling or grinding capabilities (e.g., a turning machine with milling capability), must be evaluated against each applicable entry 2B001.a, .b or .c.

*Note 4:* A machine tool having an additive manufacturing capability in addition to a turning, milling or grinding capability must be evaluated against each applicable entry 2B001.a, .b or .c.

LIST BASED LICENSE EXCEPTIONS (SEE PART 740 FOR A DESCRIPTION OF ALL LICENSE EXCEPTIONS)

LVS: N/A  
 GBS: N/A

LIST OF ITEMS CONTROLLED

*Related Controls:* (1) See ECCN [2B002](#) for optical finishing machines. (2) See ECCNs [2D001](#) and [2D002](#) for software for items controlled under this entry. (3) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E201](#) (“use”) for technology for items controlled under this entry. (4) Also see ECCNs [2B201](#) and [2B991](#).

*Related Definitions:* N/A  
*Items:*

a. Machine tools for turning having two or more axes which can be coordinated simultaneously for “contouring control” having any of the following:

- a.1. "Unidirectional positioning repeatability" equal to or less (better) than 0.9 µm along one or more linear axis with a travel length less than 1.0 m; or
- a.2. “Unidirectional positioning repeatability” equal to or less (better) than 1.1 µm along one or more linear axis with a travel length equal to or greater than 1.0 m;

**Note 1:** *2B001.a does not control turning machines “specially designed” for producing contact lenses, having all of the following:*

*a. Machine controller limited to using ophthalmic based “software” for part programming data input; and*

*b. No vacuum chucking.*

**Note 2:** *2B001.a does not apply to bar machines (Swissturn), limited to machining only bar feed thru, if maximum bar diameter is equal to or less than 42 mm and there is no capability of mounting chucks. Machines may have drilling or milling capabilities for machining parts with diameters less than 42 mm.*

b. Machine tools for milling having any of the following:

b.1. Three linear axes plus one rotary axis which can be coordinated simultaneously for “contouring control” having any of the following:

b.1.a. “Unidirectional positioning repeatability” equal to or less (better) than 0.9  $\mu\text{m}$  along one or more linear axis with a travel length less than 1.0 m; *or*

b.1.b. “Unidirectional positioning repeatability” equal to or less (better) than 1.1  $\mu\text{m}$  along one or more linear axis with a travel length equal to or greater than 1.0 m;

b.2. Five or more axes which can be coordinated simultaneously for “contouring control” having any of the following:

b.2.a. “Unidirectional positioning repeatability” equal to or less (better) than 0.9  $\mu\text{m}$  along one or more linear axis with a travel length less than 1.0 m;

b.2.b. “Unidirectional positioning repeatability” equal to or less (better) than 1.4  $\mu\text{m}$

along one or more linear axis with a travel length equal to or greater than 1 m and less than 4 m; *or*

b.2.c. “Unidirectional positioning repeatability” equal to or less (better) than 6.0  $\mu\text{m}$  along one or more linear axis with a travel length equal to or greater than 4 m;

b.3. A “unidirectional positioning repeatability” for jig boring machines, equal to or less (better) than 1.1  $\mu\text{m}$  along one or more linear axis; *or*

b.4. Fly cutting machines having all of the following:

b.4.a. Spindle “run-out” and “camming” less (better) than 0.0004 mm TIR; *and*

b.4.b. Angular deviation of slide movement (yaw, pitch and roll) less (better) than 2 seconds of arc, TIR, over 300 mm of travel;

c. Machine tools for grinding having any of the following:

c.1. Having all of the following:

c.1.a. “Unidirectional positioning repeatability” equal to or less (better) than 1.1  $\mu\text{m}$  along one or more linear axis; *and*

c.1.b. Three or four axes which can be coordinated simultaneously for “contouring control”; *or*

c.2. Five or more axes which can be coordinated simultaneously for “contouring control” having any of the following:

c.2.a. “Unidirectional positioning repeatability” equal to or less (better) than 1.1  $\mu\text{m}$  along one or more linear axis with a travel length less than 1m;

c.2.b. “Unidirectional positioning repeatability” equal to or less (better) than 1.4  $\mu\text{m}$

along one or more linear axis with a travel length equal to or greater than 1 m and less than 4 m; *or*

c.2.c. “Unidirectional positioning repeatability” equal to or less (better) than 6.0 µm along one or more linear axis with a travel length equal to or greater than 4 m.

*Notes: 2B001.c does not control grinding machines as follows:*

a. *Cylindrical external, internal, and external-internal grinding machines, having all of the following:*

a.1. *Limited to cylindrical grinding; and*

a.2. *Limited to a maximum workpiece capacity of 150 mm outside diameter or length.*

b. *Machines designed specifically as jig grinders that do not have a z-axis or a w-axis, with a “unidirectional positioning repeatability” less (better) than 1.1 µm.*

c. *Surface grinders.*

d. Electrical discharge machines (EDM) of the non-wire type which have two or more rotary axes which can be coordinated simultaneously for “contouring control”;

e. Machine tools for removing metals, ceramics or “composites”, having all of the following:

e.1. Removing material by means of any of the following:

e.1.a. Water or other liquid jets, including those employing abrasive additives;

e.1.b. Electron beam; or

e.1.c. “Laser” beam; and

e.2. At least two rotary axes having all of the following:

e.2.a. Can be coordinated simultaneously for “contouring control”; *and*

e.2.b. A positioning “accuracy” of less (better) than 0.003°;

f. Deep-hole-drilling machines and turning machines modified for deep-hole-drilling, having a maximum depth-of-bore capability exceeding 5m.

**\*\*2B002 Numerically controlled optical finishing machine tools equipped for selective material removal to produce non-spherical optical surfaces having all of the following characteristics (See List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See also [2B001](#).

*Related Definitions:* For the purposes of 2B002, ‘MRF’ is a material removal process using an abrasive magnetic fluid whose viscosity is controlled by a magnetic field. ‘ERF’ is a removal process using an abrasive

fluid whose viscosity is controlled by an electric field. 'Energetic particle beam finishing' uses Reactive Atom Plasmas (RAP) or ion-beams to selectively remove material. 'Inflatable membrane tool finishing' is a process that uses a pressurized membrane that deforms to contact the workpiece over a small area. 'Fluid jet finishing' makes use of a fluid stream for material removal.

*Items:*

- a. Finishing the form to less (better) than 1.0 µm;
- b. Finishing to a roughness less (better) than 100 nm rms;
- c. Four or more axes which can be coordinated simultaneously for “contouring control”; *and*
- d. Using any of the following processes;
  - d.1. ‘Magnetorheological finishing (MRF)’;
  - d.2. ‘Electrorheological finishing (ERF)’;
  - d.3 ‘Energetic particle beam finishing’;
  - d.4. ‘Inflatable membrane tool finishing’; *or*
  - d.5. ‘Fluid jet finishing’.

**\*\*2B003** “Numerically controlled” machine tools, “specially designed” for the shaving, finishing, grinding or honing of hardened ( $R_c = 40$  or more) spur, helical and double-helical gears having all of the following.

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$5000  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See also [2B993](#)  
*Related Definitions:* N/A  
*Items:*

- a. A pitch diameter exceeding 1,250 mm;
- b. A face width of 15% of pitch diameter or larger; *and*
- c. A finished quality of AGMA 14 or better (equivalent to ISO 1328 class 3).

**\*\*2B004** Hot “isostatic presses” having all of the characteristics described in the List of Items Controlled, and “specially designed” “components” and “accessories” therefor.

**License Requirements**

*Reason for Control:* NS, MT NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2

MT applies to entire entry	MT Column 1
NP applies to entire entry, except 2B004.b.3 and presses with maximum working pressures below 69 MPa.	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCN [2D001](#) for software for items controlled under this entry. (2) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E101](#) (“use”) for technology for items controlled under this entry. (3) For “specially designed” dies, molds and tooling, see ECCNs 0B501, 0B602, 0B606, 1B003, 9B004, and 9B009.(4) For additional controls on dies, molds and tooling, see ECCNs 1B101.d, [2B104](#) and [2B204](#). (5) Also see ECCNs [2B117](#) and [2B999.a](#).

*Related Definitions:* N/A  
*Items:*

- a. A controlled thermal environment within the closed cavity and possessing a chamber cavity with an inside diameter of 406 mm or more; *and*
- b. Having any of the following:
  - b.1. A maximum working pressure exceeding 207 MPa;
  - b.2. A controlled thermal environment exceeding 1,773 K (1,500 °C); *or*

b.3. A facility for hydrocarbon impregnation and removal of resultant gaseous degradation products.

**Technical Note:** *The inside chamber dimension is that of the chamber in which both the working temperature and the working pressure are achieved and does not include fixtures. That dimension will be the smaller of either the inside diameter of the pressure chamber or the inside diameter of the insulated furnace chamber, depending on which of the two chambers is located inside the other.*

**\*\*2B005** Equipment “specially designed” for the deposition, processing and in-process control of inorganic overlays, coatings and surface modifications, as follows, for substrates specified in column 2, by processes shown in column 1 in the “Materials Processing Table; Deposition Techniques” following 2E003.f (see List of Items Controlled), and “specially designed” automated handling, positioning, manipulation and control “components” therefor.

**License Requirements**

 GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) This entry does not control chemical vapor deposition, cathodic arc, sputter deposition, ion plating or ion implantation equipment, “specially designed” for cutting or machining tools. (2) Vapor deposition equipment for the production of filamentary materials are controlled by 1B001 or 1B101. (3) Chemical Vapor Deposition furnaces designed or modified for densification of carbon-carbon composites are controlled by [2B105](#). (4) See also [2B999.i](#).

*Related Definitions:* N/A

*Items:*

a. Chemical vapor deposition (CVD) production equipment having all of the following:

a.1. A process modified for one of the following:

a.1.a. Pulsating CVD;

a.1.b. Controlled nucleation thermal deposition (CNTD); *or*

a.1.c. Plasma enhanced or plasma assisted CVD; *and*

a.2. Having any of the following:

a.2.a. Incorporating high vacuum (equal to or less than 0.01 Pa) rotating seals; *or*

a.2.b. Incorporating in situ coating thickness control;

b. Ion implantation production equipment having beam currents of 5 mA or more;

c. Electron beam physical vapor deposition (EB-PVD) production equipment incorporating power systems rated for over 80 kW and having any of the following:

c.1. A liquid pool level “laser” control system which regulates precisely the ingots feed rate; *or*

c.2. A computer controlled rate monitor operating on the principle of photo-luminescence of the ionized atoms in the evaporant stream to control the deposition rate of a coating containing two or more elements;

d. Plasma spraying production equipment having any of the following:

d.1. Operating at reduced pressure controlled atmosphere (equal or less than 10 kPa measured above and within 300 mm of the gun nozzle exit) in a vacuum chamber capable of evacuation down to 0.01 Pa prior to the spraying process; *or*

d.2. Incorporating in situ coating thickness control;

e. Sputter deposition production equipment capable of current densities of 0.1 mA/mm<sup>2</sup> or higher at a deposition rate 15 μm/h or more;

f. Cathodic arc deposition production equipment incorporating a grid of electromagnets for steering control of the arc spot on the cathode;

g. Ion plating production equipment capable of in situ measurement of any of the following:

g.1. Coating thickness on the substrate and rate control; *or*

g.2. Optical characteristics.

**\*\*2B006 Dimensional inspection or measuring systems, equipment, position feedback units and “electronic assemblies”, as follows (see List of Items Controlled).**

**License Requirements**

Reason for Control: NS, NP, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)

 Items:

a. Computer controlled or “numerically controlled” Coordinate Measuring Machines (CMM), having a three dimensional length (volumetric) maximum permissible error of length measurement ( $E_{0,MPE}$ ) at any point within the operating range of the machine (*i.e.*, within the length of axes) equal to or less (better) than  $(1.7 + L/1,000) \mu\text{m}$  (L is the measured length in

mm) according to ISO 10360-2 (2009);

**Technical Note:** The  $E_{0,MPE}$  of the most accurate configuration of the CMM specified by the manufacturer (e.g., best of the following: Probe, stylus length, motion parameters, environment) and with “all compensations available” shall be compared to the  $1.7 + L/1,000 \mu\text{m}$  threshold.

b. Linear displacement measuring instruments or systems, linear position feedback units, and “electronic assemblies”, as follows:

**Note:** Interferometer and optical-encoder measuring systems containing a “laser” are only specified by 2B006.b.3.

b.1. ‘Non-contact type measuring systems’ with a ‘resolution’ equal to or less (better) than  $0.2 \mu\text{m}$  within 0 to 0.2 mm of the ‘measuring range’;

**Technical Notes:**

1. For the purposes of 2B006.b.1, ‘non-contact type measuring systems’ are designed to measure the distance between the probe and measured object along a single vector, where the probe or measured object is in motion.

2. For the purposes of 2B006.b.1, ‘measuring range’ means the distance between the minimum and maximum working distance.

b.2. Linear position feedback units “specially designed” for machine tools and having an overall “accuracy” less (better) than  $(800 + (600 \times L/1,000)) \text{ nm}$  (L equals effective length in mm);

b.3. Measuring systems having all of the following:

b.3.a. Containing a “laser”;

b.3.b. A ‘resolution’ over their full scale of

0.200 nm or less (better); *and*

b.3.c. Capable of achieving a “measurement uncertainty” equal to or less (better) than  $(1.6 + L/2,000)$  nm (L is the measured length in mm) at any point within a measuring range, when compensated for the refractive index of air and measured over a period of 30 seconds at a temperature of  $20 \pm 0.01^\circ\text{C}$ ; *or*

**Technical Note:** For the purposes of 2B006.b, ‘resolution’ is the least increment of a measuring device; on digital instruments, the least significant bit.

b.4. “Electronic assemblies” “specially designed” to provide feedback capability in systems controlled by 2B006.b.3;

c. Rotary position feedback units “specially designed” for machine tools or angular displacement measuring instruments, having an angular position “accuracy” equal to or less (better) than 0.9 second of arc;

**Note:** 2B006.c does not control optical instruments, such as autocollimators, using collimated light (e.g., “laser” light) to detect angular displacement of a mirror.

d. Equipment for measuring surface roughness (including surface defects), by measuring optical scatter with a sensitivity of 0.5 nm or less (better).

**Note:** 2B006 includes machine tools, other than those specified by 2B001, that can be used as measuring machines, if they meet or exceed the criteria specified for the measuring machine function.

**\*\*2B007 “Robots” having any of the following characteristics described in the List of Items**

**Controlled and “specially designed” controllers and “end-effectors” therefor.**

**License Requirements**

*Reason for Control:* NS, NP, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 2
NP applies to equipment that meets or exceeds the criteria in ECCNs 2B207	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$5000, except 2B007.b and .c  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCN [2D001](#) for “software” for items controlled under this entry. (2) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E201](#) (“use”) for technology for items controlled under this entry. (3) Also see ECCNs [2B207](#), [2B225](#) and [2B997](#).

*Related Definitions:* N/A

*Items:*

a. [Reserved]

b. “Specially designed” to comply with national safety standards applicable to potentially explosive munitions environments;

**Note:** 2B007.b does not apply to “robots” “specially designed” for paint-spraying booths.

c. “Specially designed” or rated as radiation-hardened to withstand a total radiation dose

greater than  $5 \times 10^3$  Gy (silicon) without operational degradation; *or*

**Technical Note:** *The term Gy (silicon) refers to the energy in Joules per kilogram absorbed by an unshielded silicon sample when exposed to ionizing radiation.*

d. “Specially designed” to operate at altitudes exceeding 30,000 m.

**\*\*2B008** ‘Compound rotary tables’ and “tilting spindles”, “specially designed” for machine tools, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See also [2B998](#)  
*Related Definition:* N/A  
*Items:*

- a. [Reserved]
- b. [Reserved]
- c. ‘Compound rotary tables’ having all of the following:

c.1. Designed for machine tools for turning, milling or grinding; *and*

c.2. Two rotary axes designed to be coordinated simultaneously for “contouring control”.

**Technical Note:** *A ‘compound rotary table’ is a table allowing the workpiece to rotate and tilt about two non-parallel axes.*

d. “Tilting spindles” having all of the following:

d.1. Designed for machine tools for turning, milling or grinding; *and*

d.2. Designed to be coordinated simultaneously for “contouring control”.

**\*\*2B009** Spin-forming machines and flow-forming machines, which, according to the manufacturer's technical specifications, can be equipped with “numerical control” units or a computer control and having all of the following characteristics (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, MT, NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
MT applies to: spin-forming machines combining the functions of spin-forming and flow-forming; and flow-forming machines that meet or exceed the parameters of 2B009.a and 2B109	MT Column 1
NP applies to flow-forming	NP Column 1

machines, and spin-forming machines capable of flow-forming functions, that meet or exceed the parameters of 2B209	
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCN [2D001](#) for “software” for items controlled under this entry. (2) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E101](#) (“use”) for technology for items controlled under this entry. (3) Also see ECCNs [2B109](#) and [2B209](#) for additional flow-forming machines for MT and NP reasons.

*Related Definitions:* N/A

*Items:*

- a. Three or more axes which can be coordinated simultaneously for “contouring control”; and
- b. A roller force more than 60 kN.

**Technical Note:** For the purpose of 2B009, machines combining the function of spin-forming and flow-forming are regarded as flow-forming machines.

**\*\*2B018 Equipment on the Wassenaar Arrangement Munitions List.**

No commodities currently are controlled by this entry. Commodities formerly controlled by paragraphs .a through .d, .m, and .s of this entry are controlled in ECCN 0B606. Commodities formerly controlled by paragraphs .e through .l of

this entry are controlled by ECCN 0B602. Commodities formerly controlled by paragraphs .o through .r of this entry are controlled by ECCN 0B501. Commodities formerly controlled by paragraph .n of this entry are controlled in ECCN 0B501 if they are “specially designed” for the “production” of the items controlled in ECCN 0A501.a through .x or USML Category I and controlled in ECCN 0B602 if they are of the kind exclusively designed for use in the manufacture of items in ECCN 0A602 or USML Category II.

**\*\*2B104 “Isostatic presses”, other than those controlled by 2B004, having all of the following characteristics (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* MT, NP, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
MT applies to entire entry	MT Column 1
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCN [2D101](#) for “software” for items controlled under this entry. (2) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E101](#) (“use”) for technology for items

controlled under this entry. (3) Also see ECCNs [2B004](#), [2B204](#), and [2B117](#).

*Related Definitions:* The inside chamber dimension is that of the chamber in which both the working temperature and the working pressure are achieved and does not include fixtures. That dimension will be the smaller of either the inside diameter of the pressure chamber or the inside diameter of the insulated chamber, depending on which of the two chambers is located inside the other.

*Items:*

- a. Maximum working pressure equal to or greater than 69 MPa;
- b. Designed to achieve and maintain a controlled thermal environment of 873 K (600 °C) or greater; *and*
- c. Possessing a chamber cavity with an inside diameter of 254 mm or greater.

**\*\*2B105** Chemical vapor deposition (CVD) furnaces, other than those controlled by 2B005.a, designed or modified for the densification of carbon-carbon composites.

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCN [2D101](#) for “software” for items controlled under this entry. (2) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E101](#) (“use”) for technology for items controlled under this entry. (3) Also see ECCNs [2B005](#), [2B117](#), [2B226](#), and [2B227](#).

*Related Definitions:* N/A

*Items:*

The list of items controlled in contained in the ECCN heading.

**\*\*2B109** Flow forming machines, other than those controlled by 2B009, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* MT, NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
NP applies to items controlled by this entry that meet or exceed the technical parameters in 2B209	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCN [2D101](#) for “software” for items controlled under this entry. (2) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E101](#) (“use”) for technology for items controlled under this entry. (3) Also see ECCNs [2B009](#) and [2B209](#).

*Related Definitions:* N/A  
*Items:*

a. Flow-forming machines, usable in the “production” of propulsion components and equipment (e.g., motor cases and interstages) for “missiles”, having all of the following:

a.1. Equipped with, or according to the manufacturer’s technical specification are capable of being equipped with, “numerical control” units or a computer control, even when not equipped with such units at delivery; *and*

a.2. More than two axes which can be coordinated simultaneously for “contouring control.”

b. “Specially designed” “parts” and “components” for flow-forming machines controlled in 2B009 for MT reasons or 2B109.a.

**Technical Note:** 1. *Machines combining the function of spin forming and flow forming are for the purpose of 2B109 regarded as flow forming machines.*

**\*\*2B116** Vibration test systems and equipment, usable for rockets, missiles, or unmanned aerial vehicles capable of achieving a “range” equal to or greater than 300 km and their subsystems, and “parts” and “components” therefor, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* MT, NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
NP applies to vibration test systems in 2B116.a and to all items in 2B116.b, .c, and .d..	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCN [2D101](#) for “software” for items controlled under this entry. (2) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E101](#) (“use”) for technology for items controlled under this entry. (3) Also see ECCNs 9B106 and 9B990.

*Related Definitions:* Vibration test systems incorporating a digital controller are those systems, the functions of which are, partly or entirely, automatically controlled by stored and digitally coded electrical signals.

*Items:*

a. Vibration test systems employing feedback or closed loop techniques and incorporating a digital controller, capable of vibrating a system at an acceleration equal to or greater than 10 g rms between 20 Hz to 2,000 Hz while imparting forces equal to or greater than 50 kN (11,250 lbs.), measured ‘bare table’;

b. Digital controllers, combined with “specially designed” vibration test “software”, with a ‘real-time control bandwidth’ greater than 5 kHz and designed for use with vibration test systems described in 2B116.a;

c. Vibration thrusters (shaker units), with or without associated amplifiers, capable of imparting a force equal to or greater than 50 kN (11,250 lbs.), measured ‘bare table’, and usable in vibration test systems described in 2B116.a;

d. Test piece support structures and electronic units designed to combine multiple shaker units into a complete shaker system capable of providing an effective combined force equal to or greater than 50 kN, measured ‘bare table’, and usable in vibration test systems described in 2B116.a.

**Technical Notes:**

(1) ‘Bare table’ means a flat table, or surface, with no fixture or fitting.

(2) ‘Real-time control bandwidth’ is defined as the maximum rate at which a controller can execute complete cycles of sampling, processing data and transmitting control signals.

**\*\*2B117** Equipment and process controls, other than those controlled by 2B004, 2B005.a, 2B104 or 2B105, designed or modified for the densification and pyrolysis of structural composite rocket nozzles and reentry vehicle nose tips.

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
-------------------	--

MT applies to entire entry	MT Column 1

*LVS:* N/A

GBS: N/A

**List of Items Controlled:**

*Related Controls:* See also 7B101.

*Related Definitions:* N/A

*Items:*

a. Balancing machines having all the following characteristics:

a.1. Not capable of balancing rotors/assemblies having a mass greater than 3 kg;

a.2. Capable of balancing rotors/assemblies at speeds greater than 12,500 rpm;

a.3. Capable of correcting unbalance in two planes or more; and

a.4. Capable of balancing to a residual specific unbalance of 0.2 g mm per kg of rotor mass.

*Note:* 2B119.a. does not control balancing machines designed or modified for dental or other medical equipment.

b. Indicator heads designed or modified for use with machines specified in 2B119.a.

*Note:* Indicator heads are sometimes known as balancing instrumentation.

**\*\*2B120 Motion simulators or rate tables (equipment capable of simulating motion), having all of the following characteristics (see List of Items Controlled).**

**License Requirements:**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled:**

*Related Controls:* (1) Rate tables not controlled by [2B120](#) and providing the characteristics of a positioning table are to be evaluated according to [2B121](#). (2) Equipment that has the characteristics specified in [2B121](#), which also meets the characteristics of [2B120](#) will be treated as equipment specified in [2B120](#). (3) See also [2B008](#), [2B121](#), 7B101 and 7B994.

*Related Definitions:* N/A

*Items:*

a. Two or more axes;

b. Designed or modified to incorporate slip rings or integrated non-contact devices capable of transferring electrical power, signal information, or both; and

c. Having any of the following characteristics:

c.1. For any single axis having all of the following:

c.1.a. Capable of rates of rotation of 400 degrees/s or more, or 30 degrees/s or less; and

c.1.b. A rate resolution equal to or less than 6 degrees/s and an accuracy equal to or less than 0.6 degrees/s; or

c.2. Having a worst-case rate stability equal to or better (less) than plus or minus 0.05% averaged over 10 degrees or more; *or*

c.3. A positioning “accuracy” equal to or better than 5 arc-second.

*Note:* 2B120 does not control rotary tables designed or modified for machine tools or for medical equipment. For controls on machine tool rotary tables see 2B008.

**\*\*2B121** Positioning tables (equipment capable of precise rotary position in any axis), other than those controlled in 2B120, having all the following characteristics (See List of Items Controlled).

**License Requirements:**

*Reason for Control:* MT, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled:**

*Related Controls:* (1) Equipment that has the characteristics specified in [2B121](#), which also meets the characteristics of [2B120](#) will be treated as equipment specified in [2B120](#).

(2) See also [2B008](#), [2B120](#), 7B101 and 7B994.

*Related Definitions:* N/A

*Items:*

a. Two or more axes; *and*

b. A positioning “accuracy” equal to or better than 5 arc-second.

*Note:* 2B121 does not control rotary tables designed or modified for machine tools or for medical equipment. For controls on machine tool rotary tables see 2B008.

**\*\*2B122** Centrifuges capable of imparting accelerations greater than 100 g and designed or modified to incorporate slip rings or integrated non-contact devices capable of transferring electrical power, signal information, or both.

**License Requirements:**

*Reason for Control:* MT, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See also 7B101.

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*2B201** Machine tools, and any combination thereof, other than those controlled by 2B001, for removing or cutting metals, ceramics or “composites,” which, according to manufacturer’s technical specifications, can be equipped with electronic devices for simultaneous “contouring control” in two or more axes.

- a. Gears;
- b. Crank shafts or cam shafts;
- c. Tools or cutters;
- d. Extruder worms;

**Technical Note:** The identified positioning accuracy values in this entry are based on ISO 230/2(2006), which equates to the values based on ISO 230/2 (1988) that are used by the Nuclear Supplier’s Group (NSG). In 2B201.a and .b.1, this results in a change from 6 µm to 4.5 µm. In paragraph .b of the Note to 2B201.b, the resulting change is from 30 µm to 22.5 µm, In 2B201.c, the resulting change is from 4 µm to 3 µm.

**License Requirements**

Reason for Control: NP, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

a. Machine tools for turning, that have positioning accuracies according to ISO 230/2 (2006) with all compensations available better (less) than 4.5 µm along any linear axis (overall positioning) for machines capable of machining diameters greater than 35 mm;

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**Note to 2B201.a:** 2B201.a. does not control bar machines (Swissturn), limited to machining only bar feed thru, if maximum bar diameter is equal to or less than 42 mm and there is no capability of mounting chucks. Machines may have drilling and/or milling capabilities for machining “parts” with diameters less than 42 mm.

**List of Items Controlled**

**Related Controls:** (1) See ECCNs [2D002](#) and [2D202](#) for “software” for items controlled by this entry. “Numerical control” units are controlled by their associated “software”. (2) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E201](#) (“use”) for technology for items controlled under this entry. (3) Also see ECCNs [2B001](#) and [2B991](#).

b. Machine tools for milling, having any of the following characteristics:

**Related Definitions:** N/A  
**Items:**

b.1. Positioning accuracies according to ISO 230/2 (2006) with “all compensations available” equal to or less (better) than 4.5 µm along any linear axis (overall positioning);

b.2. Two or more contouring rotary axes; or

**Note:** 2B201 does not control special purpose machine tools limited to the manufacture of any of the following parts:

b.3. Five or more axes which can be coordinated simultaneously for “contouring control.”

**Note to 2B201.b:** 2B201.b does not control milling machines having the following characteristics:

a. X-axis travel greater than 2 m; and

b. Overall positioning accuracy according to ISO 230/2 (2006) on the x-axis more (worse) than 22.5 µm.

c. Machine tools for grinding, having any of the following characteristics:

c.1. Positioning accuracies according to ISO 230/2 (2006) with “all compensations available” equal to or less (better) than 3 µm along any linear axis (overall positioning);

c.2. Two or more contouring rotary axes;  
or

c.3. Five or more axes which can be coordinated simultaneously for “contouring control.”

**Note to 2B201.c:** 2B201.c does not control the following grinding machines:

a. Cylindrical external, internal, and external-internal grinding machines having all of the following characteristics:

1. Limited to a maximum workpiece capacity of 150 mm outside diameter or length; and

2. Axes limited to x, z and c.

b. Jig grinders that do not have a z-axis or a w-axis with an overall positioning accuracy less (better) than 3 microns. Positioning accuracy is according to ISO 230/2 (2006).

**Technical Note:** 2B201.b.3 and c.3 include

machines based on a parallel linear kinematic design (e.g. hexapods) that have 5 or more axes none of which are rotary axes.

**\*\*2B204** “Isostatic presses”, other than those controlled by 2B004 or 2B104, and related equipment, as follows (see List of Items Controlled).

**License Requirements**

Reason for Control: NP, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)

**Related Definitions:** The inside chamber dimension is that of the chamber in which both the working temperature and working pressure are achieved and does not include fixtures. That dimension will be the smaller of either the inside diameter of the pressure chamber or the inside diameter of the insulated chamber, depending on which of the two chambers is located inside the other.

*Items:*

a. “Isostatic presses” having both of the following characteristics:

a.1. Capable of achieving a maximum working pressure of 69 MPa or greater; *and*

a.2. A chamber cavity with an inside diameter in excess of 152 mm;

b. Dies, molds and controls, “specially designed” for “isostatic presses” controlled by 2B204.a.

**\*\*2B206** Dimensional inspection machines, instruments or systems, other than those described in 2B006, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1

*Items:*

**Control Notes to ECCN 2B206:**

(1) Machine tools that can be used as measuring machines are controlled by ECCN 2B206 if they meet or exceed the control parameters specified in this entry for the measuring machine function.

(2) The machines described in ECCN 2B206 are controlled by this entry if they exceed the specified control threshold anywhere in their operating range.

**Technical Note to ECCN 2B206:** All parameters of measurement values in this entry represent plus/minus, i.e., not total band.

a. Computer controlled or numerically controlled coordinate measuring machines (CMM) with either of the following characteristics:

a.1. Having only two axes with a maximum permissible error of length measurement along any axis (one dimension), identified as any combination of  $E_{0x}$  MPE,  $E_{0y}$  MPE or  $E_{0z}$  MPE, equal to or less (better) than  $(1.25 + L/1000)$   $\mu\text{m}$  (where L is the measured length in mm) at any point within the operating range of the machine (i.e., within the length of the axis), according to ISO 10360-2 (2009); *or*

a.2. Having three or more axes with a three dimensional (volumetric) maximum permissible error of length measurement, identified as  $E_0$ , MPE, equal to or less (better) than  $(1.7 + L/800)$   $\mu\text{m}$  (where L is the measured length in mm) at any point within the operating range of the machine (i.e., within the length of the axis), according to ISO 10360-2 (2009).

**Technical Note to 2B206.a.2:** The  $E_0$ , MPE of the most accurate configuration of the CMM

*specified according to ISO 10360-2 (2009) by the manufacturer (e.g., best of the following: Probe, stylus length, motion parameters, environment) and with all compensations available shall be compared to the  $1.7 + L/800 \mu\text{m}$  threshold.*

b. Systems for simultaneous linear-angular inspection of hemishells, having both of the following characteristics:

b.1. “Measurement uncertainty” along any linear axis equal to or less (better) than  $3.5 \mu\text{m}$  per 5 mm; *and*

b.2. “Angular position deviation” equal to or less than  $0.02^\circ$ .

c. Linear displacement measuring systems having both of the following characteristics:

c.1. Containing a “laser;” *and*

c.2. Capable of maintaining, for at least 12 hours over a temperature range of  $\pm 1 \text{ K}$  around a standard temperature and a standard pressure, both:

c.2.a. A “resolution” over their full scale of  $0.1 \mu\text{m}$  or better; *and*

c.2.b. A “measurement uncertainty” equal to or better (less) than  $(0.2 + L/2000) \mu\text{m}$  (L is the measured length in millimeters).

**Control Note to 2B206.c:** *2B206.c does not control measuring interferometer systems, without closed or open loop feedback, containing a “laser” to measure slide movement errors of machine tools, dimensional inspection machines, or similar equipment.*

**Technical Note to 2B206.c:** *In 2B206.c, “linear displacement” means the change of distance between the measuring probe and the measured object.*

d. Linear Variable Differential Transformer (LVDT) systems having all of the following:

d.1. Having any of the following:

d.1.a. “Linearity” equal to or less (better) than 0.1% measured from 0 to the full operating range, for LVDTs with a full operating range up to and including  $\pm 5 \text{ mm}$ ; *or*

d.1.b. “Linearity” equal to or less (better) than 0.1% measured from 0 to 5 mm for LVDTs with a ‘full operating range’ greater than  $\pm 5 \text{ mm}$ ; *and*

d.2. Drift equal to or less (better) than 0.1% per day at a standard ambient test room temperature  $\pm 1 \text{ K}$ .

**\*\*2B207 “Robots,” “end-effectors” and control units, other than those controlled by 2B007, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCN [2D201](#) for “software” for items controlled under this

entry. (2) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E201](#) (“use”) for technology for items controlled under this entry. (3) Also see ECCNs [2B007](#), [2B225](#), and [2B997](#).

*Related Definitions:* N/A

*ECCN Controls:* This entry does not control “robots” “specially designed” for non-nuclear industrial applications, such as automobile paint-spraying booths.

*Items:*

- a. “Robots” or “end-effectors” “specially designed” to comply with national safety standards applicable to handling high explosives (for example, meeting electrical code ratings for high explosives);
- b. Control units “specially designed” for any of the “robots” or “end-effectors” controlled by 2B207.a.

**\*\*2B209** Flow forming machines, spin forming machines capable of flow forming functions, other than those controlled by 2B009 or 2B109, and mandrels, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCN [2D201](#) for “software” for items controlled under this entry. (2) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E201](#) (“use”) for technology for items controlled under this entry. (3) Also see ECCNs [2B009](#) and [2B109](#).

*Related Definitions:* N/A

*Items:*

- a. Machines having both of the following characteristics:
  - a.1. Three or more rollers (active or guiding); *and*
  - a.2. According to the manufacturer’s technical specifications, can be equipped with “numerical control” units or a computer control;

*Note:* 2B209.a includes machines that have only a single roller designed to deform metal, plus two auxiliary rollers that support the mandrel, but do not participate directly in the deformation process.

- b. Rotor-forming mandrels designed to form cylindrical rotors of inside diameter between 75 mm and 400 mm.

**\*\*2B225** Remote manipulators that can be used to provide remote actions in radiochemical separation operations or hot cells, having either of the following characteristics (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E201](#) (“use”) for technology for items controlled under this entry. (2) Also see ECCNs [2B007](#) and [2B207](#). (3) Remote manipulators “specially designed” or prepared for use in fuel reprocessing or for use in a reactor are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A  
*Items:*

- a. A capability of penetrating 0.6 m or more of hot cell wall (through-the-wall operation); *or*
- b. A capability of bridging over the top of a hot cell wall with a thickness of 0.6 m or more (over-the-wall operation).

**Technical Note:** *Remote manipulators provide translation of human operator actions to a remote operating arm and terminal fixture. They may be of “master/slave” type or operated by joystick or keypad.*

**\*\*2B226** **Controlled atmosphere (vacuum or inert gas) induction furnaces, and power supplies therefor, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E201](#) (“use”) for technology for items controlled under this entry. (2) Also see ECCN 2B227 and Category 3B.

*Related Definitions:* N/A

*ECCN Controls:* 2B226.a does not control furnaces designed for the processing of semiconductor wafers.

*Items:*

- a. Furnaces having all of the following characteristics:
  - a.1. Capable of operation above 1,123 K (850 °C);
  - a.2. Induction coils 600 mm or less in diameter; *and*
  - a.3. Designed for power inputs of 5 kW or more;

b. Power supplies, with a specified power output of 5 kW or more, “specially designed” for furnaces controlled by 2B226.a.

**\*\*2B227** Vacuum or other controlled atmosphere metallurgical melting and casting furnaces and related equipment, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCN [2D201](#) for “software” for items controlled under this entry. (2) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E201](#) (“use”) for technology for items controlled under this entry. (2) Also see ECCN [2B226](#).

*Related Definitions:* N/A

*Items:*

a. Arc remelt and casting furnaces having both of the following characteristics:

a.1. Consumable electrode capabilities between 1,000 cm<sup>3</sup> and 20,000 cm<sup>3</sup>; *and*

a.2. Capable of operating with melting

temperatures above 1,973 K (1,700 °C);

b. Electron beam melting furnaces and plasma atomization and melting furnaces, having both of the following characteristics:

b.1. A power of 50 kW or greater; *and*

b.2. Capable of operating with melting temperatures above 1,473 K (1,200 °C);

c. Computer control and monitoring systems specially configured for any of the furnaces controlled by 2B227.a or .b.

**\*\*2B228** Rotor fabrication and assembly equipment, rotor straightening equipment, bellows-forming mandrels and dies, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E201](#) (“use”) for technology for items controlled under this entry.

*Related Definitions:* N/A

*Items:*

a. Rotor assembly equipment for assembly of gas centrifuge rotor tube sections, baffles, and end-caps;

*Note:* 2B228.a includes precision mandrels, clamps, and shrink fit machines.

b. Rotor straightening equipment for alignment of gas centrifuge rotor tube sections to a common axis;

*Technical Note:* The rotor straightening equipment in 2B228.b normally consists of precision measuring probes linked to a computer that subsequently controls the action of, for example, pneumatic rams used for aligning the rotor tube sections.

c. Bellows-forming mandrels and dies for producing single-convolution bellows.

*Technical Note:* In 2B228.c, the bellows have all of the following characteristics:

1. Inside diameter between 75 mm and 400 mm;
2. Length equal to or greater than 12.7 mm;
3. Single convolution depth greater than 2 mm; and
4. Made of high-strength aluminum alloys, maraging steel or high strength “fibrous or filamentary materials”.

**\*\*2B229** Centrifugal multiplane balancing machines, fixed or portable, horizontal or vertical, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCN [2D201](#) for “software” for items controlled under this entry. (2) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E201](#) (“use”) for technology for items controlled under this entry.

*Related Definitions:* N/A

*Items:*

a. Centrifugal balancing machines designed for balancing flexible rotors having a length of 600 mm or more and having all of the following characteristics:

- a.1. Swing or journal diameter greater than 75 mm;
- a.2. Mass capability of from 0.9 to 23 kg; and
- a.3. Capable of balancing speed of revolution greater than 5,000 r.p.m.;

b. Centrifugal balancing machines designed for balancing hollow cylindrical rotor “parts” or “components” and having all of the following characteristics:

- b.1. Journal diameter greater than 75 mm;
- b.2. Mass capability of from 0.9 to 23 kg;
- b.3. A minimum achievable residual specific unbalance equal to or less than 10 g-mm/kg per plane; *and*
- b.4. Belt drive type.

**\*\*2B230** All types of “pressure transducers” capable of measuring absolute pressures and having all of the characteristics described in this ECCN (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E201](#) (“use”) for technology for items controlled under this entry.

*Related Definitions:* (1) For purposes of this entry, “pressure transducers” are devices that convert pressure measurements into a signal. (2) For purposes of this entry, “accuracy” includes non-linearity, hysteresis and repeatability at ambient temperature.

*Items:*

- a. Pressure sensing elements made of or protected by aluminum, aluminum alloy, aluminum oxide (alumina or sapphire), nickel, nickel alloy with more than 60% nickel by weight, or fully fluorinated hydrocarbon polymers;
- b. Seals, if any, essential for sealing the pressure sensing element, and in direct contact with the process medium, made of or protected by aluminum, aluminum alloy, aluminum oxide (alumina or sapphire), nickel, nickel alloy with more than 60% nickel by weight, or fully fluorinated hydrocarbon polymers; *and*
- c. Either of the following characteristics:

- c.1. A full scale of less 13 kPa and an “accuracy” of better than ± 1% of full scale; *or*
- c.2. A full scale of 13 kPa or greater and an “accuracy” of better than ± 130 Pa when measuring at 13 kPa.

**\*\*2B231** Vacuum pumps having all of the characteristics described in this ECCN (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E201](#) (“use”) for technology for items controlled under this entry. (2) Also see bellows-sealed scroll-type compressors and bellows-sealed scroll-type vacuum pumps controlled under ECCN 2B233. (3) Vacuum pumps “specially designed” or prepared for the separation of uranium isotopes are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* (1) The pumping speed is determined at the measurement point with nitrogen gas or air. (2) The ultimate vacuum is determined at the input of the pump with the input of the pump blocked off.

*Items:*

- a. Input throat size equal to or greater than 380 mm;
- b. Pumping speed equal to or greater than 15 m<sup>3</sup>/s; and
- c. Capable of producing an ultimate vacuum better than 13.3 mPa.

**\*\*2B232 High-velocity gun systems (propellant, gas, coil, electromagnetic, and electrothermal types, and other advanced systems) capable of accelerating projectiles to 1.5 km/s or greater.**

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**List of Items Controlled**

*Related Controls:* See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E201](#) (“use”) for technology for items controlled under this entry.

*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*2B233 Bellows-sealed scroll-type compressors and bellows-sealed scroll-type vacuum pumps having all of the characteristics described in this ECCN (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* See ECCNs [2E001](#) (“development”), [2E002](#) (“production”), and [2E201](#) (“use”) for technology for items controlled under this entry. (2) Also see vacuum pumps controlled under ECCN 2B231. (3) Vacuum pumps “specially designed” or prepared for the separation of uranium isotopes are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*Items:*

- a. Capable of an inlet volume flow rate of 50 m<sup>3</sup>/h or greater;
- b. Capable of a pressure ratio of 2:1 or greater; *and*
- c. Having all surfaces that come in contact with the process gas made from any of the following:
  - c.1. Aluminum or aluminum alloy;
  - c.2. Aluminum oxide;
  - c.3. Stainless steel;
  - c.4. Nickel or nickel alloy;
  - c.5. Phosphor bronze; *or*
  - c.6. Fluoropolymers.

**Technical Notes:**

*1. In a scroll compressor or vacuum pump, crescent-shaped pockets of gas are trapped between one or more pairs of intermeshed spiral*

*vanes, or scrolls, one of which moves while the other remains stationary. The moving scroll orbits the stationary scroll; it does not rotate. As the moving scroll orbits the stationary scroll, the gas pockets diminish in size (i.e., they are compressed) as they move toward the outlet port of the machine.*

*2. In a bellows-sealed scroll compressor or vacuum pump, the process gas is totally isolated from the lubricated parts of the pump and from the external atmosphere by a metal bellows. One end of the bellows is attached to the moving scroll and the other end is attached to the stationary housing of the pump.*

*3. Fluoropolymers include, but are not limited to, the following materials:*

- a. Polytetrafluoroethylene (PTFE);*
- b. Fluorinated Ethylene Propylene (FEP);*
- c. Perfluoroalkoxy (PFA);*
- d. Polychlorotrifluoroethylene (PCTFE);*  
*and*
- e. Vinylidene fluoride-hexafluoropropylene copolymer.*

**\*\*2B350 Chemical manufacturing facilities and equipment, except valves controlled by 2A226, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* CB, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
CB applies to entire entry	CB Column 2

AT applies to entire entry	AT Column 1
----------------------------	-------------

**License Requirement Note:** *This ECCN does not control equipment that is both: (1) “specially designed” for use in civil applications (e.g., food processing, pulp and paper processing, or water purification) and (2) inappropriate, by the nature of its design, for use in storing, processing, producing or conducting and controlling the flow of the chemical weapons precursors controlled by 1C350.*

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

**LVS:** \$2,000 for all Country Group B destinations, except those also listed under Country Group D:3 (see Supplement No. 1 to part 740 of the EAR).

**GBS:** N/A

### List of Items Controlled

**Related Controls:** See also ECCNs [2A226](#), [2A992](#), [2A993](#), [2B231](#) and [2B999](#).

**Related Definitions:** For purposes of this entry the term ‘chemical warfare agents’ includes those agents “subject to the ITAR” (see 22 CFR parts 120 through 130).

**Items:**

a. Reaction vessels, reactors and prefabricated repair assemblies therefor, as follows:

a.1. Reaction vessels or reactors, with or without agitators, with total internal (geometric) volume greater than 0.1 m<sup>3</sup> (100 liters) and less than 20 m<sup>3</sup> (20,000 liters), where all surfaces that come in direct contact with the chemical(s) being processed or contained are made from any of the following materials:

a.1.a Alloys with more than 25% nickel and 20% chromium by weight;

a.1.b. Nickel or alloys with more than 40% nickel by weight;

a.1.c. Fluoropolymers (polymeric or elastomeric materials with more than 35% fluorine by weight);

a.1.d. Glass (including vitrified or enameled coating or glass lining);

a.1.e. Tantalum or tantalum alloys;

a.1.f. Titanium or titanium alloys;

a.1.g. Zirconium or zirconium alloys; *or*

a.1.h. Niobium (columbium) or niobium alloys;

a.2. Prefabricated repair assemblies, and their specially designed components, that:

a.2.a. Are designed for mechanical attachment to glass-lined reaction vessels or reactors described in 2B350.a.1; *and*

a.2.b. Have metallic surfaces that are made from tantalum or tantalum alloys and come in direct contact with the chemical(s) being processed.

b. Agitators designed for use in reaction vessels or reactors described in 2B350.a, and impellers, blades or shafts designed for such agitators, where all surfaces that come in direct contact with the chemical(s) being processed or contained are made from any of the following materials:

b.1. Alloys with more than 25% nickel and 20% chromium by weight;

b.2. Nickel or alloys with more than 40% nickel by weight;

b.3. Fluoropolymers (polymeric or elastomeric materials with more than 35% fluorine by weight);

b.4. Glass (including vitrified or enameled coatings or glass lining);

b.5. Tantalum or tantalum alloys;

b.6. Titanium or titanium alloys;

b.7. Zirconium or zirconium alloys; *or*

b.8. Niobium (columbium) or niobium alloys.

c. Storage tanks, containers, receivers and prefabricated repair assemblies therefor, as follows:

c.1. Storage tanks, containers or receivers with a total internal (geometric) volume greater than 0.1 m<sup>3</sup> (100 liters) where all surfaces that come in direct contact with the chemical(s) being processed or contained are made from any of the following materials:

c.1.a. Alloys with more than 25% nickel and 20% chromium by weight;

c.1.b. Nickel or alloys with more than 40% nickel by weight;

c.1.c. Fluoropolymers (polymeric or elastomeric materials with more than 35% fluorine by weight);

c.1.d. Glass (including vitrified or enameled coatings or glass lining);

c.1.e. Tantalum or tantalum alloys;

c.1.f. Titanium or titanium alloys;

c.1.g. Zirconium or zirconium alloys; *or*

c.1.h. Niobium (columbium) or niobium alloys;

c.2. Prefabricated repair assemblies, and their specially designed components, that:

c.2.a. Are designed for mechanical attachment to glass-lined storage tanks, containers or receivers described in 2B350.c.1; *and*

c.2.b. Have metallic surfaces that are made from tantalum or tantalum alloys and come in direct contact with the chemical(s) being processed.

d. Heat exchangers or condensers with a heat transfer surface area of less than 20 m<sup>2</sup>, but greater than 0.15 m<sup>2</sup>, and tubes, plates, coils or blocks (cores) designed for such heat exchangers or condensers, where all surfaces that come in direct contact with the chemical(s) being processed are made from any of the following materials:

d.1. Alloys with more than 25% nickel and 20% chromium by weight;

d.2. Nickel or alloys with more than 40% nickel by weight;

d.3. Fluoropolymers (polymeric or elastomeric materials with more than 35% fluorine by weight);

d.4. Glass (including vitrified or enameled coatings or glass lining);

d.5. Tantalum or tantalum alloys;

d.6. Titanium or titanium alloys;

- d.7. Zirconium or zirconium alloys;
- d.8. Niobium (columbium) or niobium alloys.
- d.9. Graphite or carbon-graphite;
- d.10. Silicon carbide; *or*
- d.11. Titanium carbide.
- e. Distillation or absorption columns of internal diameter greater than 0.1 m, and liquid distributors, vapor distributors or liquid collectors designed for such distillation or absorption columns, where all surfaces that come in direct contact with the chemical(s) being processed are made from any of the following materials:
- e.1. Alloys with more than 25% nickel and 20% chromium by weight;
- e.2. Nickel or alloys with more than 40% nickel by weight;
- e.3. Fluoropolymers (polymeric or elastomeric materials with more than 35% fluorine by weight);
- e.4. Glass (including vitrified or enameled coatings or glass lining);
- e.5. Tantalum or tantalum alloys;
- e.6. Titanium or titanium alloys;
- e.7. Zirconium or zirconium alloys;
- e.8. Niobium (columbium) or niobium alloys; *or*
- e.9. Graphite or carbon-graphite.
- f. Remotely operated filling equipment in which all surfaces that come in direct contact with the chemical(s) being processed are made from any of the following materials:
- f.1. Alloys with more than 25% nickel and 20% chromium by weight; *or*
- f.2. Nickel or alloys with more than 40% nickel by weight.
- g. Valves, as follows:
- g.1. Valves having both of the following characteristics:
- g.1.a. A nominal size greater than 1.0 cm (3/8 in.); *and*
- g.1.b. All surfaces that come in direct contact with the chemical(s) being produced, processed, or contained are made from materials identified in Technical Note 1 to 2B350.g.
- g.2. Valves, except for valves controlled by 2B350.g.1, having all of the following characteristics:
- g.2.a. A nominal size equal to or greater than 2.54 cm (1 inch) and equal to or less than 10.16 cm (4 inches);
- g.2.b. Casings (valve bodies) or preformed casing liners controlled by 2B350.g.3, in which all surfaces that come in direct contact with the chemical(s) being produced, processed, or contained are made from materials identified in Technical Note 1 to 2B350.g; *and*
- g.2.c. A closure element designed to be interchangeable.
- g.3. Casings (valve bodies) and preformed casing liners having both of the following characteristics:

g.3.a. Designed for valves in 2B350.g.1 or .g.2; and

g.3.b. All surfaces that come in direct contact with the chemical(s) being produced, processed, or contained are made from materials identified in Technical Note 1 to 2B350.g.

**Technical Note 1 to 2B350.g:** *All surfaces of the valves controlled by 2B350.g.1, and the casings (valve bodies) and preformed casing liners controlled by 2B350.g.3, that come in direct contact with the chemical(s) being produced, processed, or contained are made from the following materials:*

a. *Alloys with more than 25% nickel and 20% chromium by weight;*

b. *Nickel or alloys with more than 40% nickel by weight;*

c. *Fluoropolymers (polymeric or elastomeric materials with more than 35% fluorine by weight);*

d. *Glass (including vitrified or enameled coating or glass lining);*

e. *Tantalum or tantalum alloys;*

f. *Titanium or titanium alloys;*

g. *Zirconium or zirconium alloys;*

h. *Niobium (columbium) or niobium alloys;*  
or

i. *Ceramic materials, as follows:*

i.1. *Silicon carbide with a purity of 80% or more by weight;*

i.2. *Aluminum oxide (alumina) with a*

*purity of 99.9% or more by weight; or*

i.3. *Zirconium oxide (zirconia).*

**Technical Note 2 to 2B350.g:** *The 'nominal size' is defined as the smaller of the inlet and outlet port diameters.*

h. Multi-walled piping incorporating a leak detection port, in which all surfaces that come in direct contact with the chemical(s) being processed or contained are made from any of the following materials:

h.1. Alloys with more than 25% nickel and 20% chromium by weight;

h.2. Nickel or alloys with more than 40% nickel by weight;

h.3. Fluoropolymers (polymeric or elastomeric materials with more than 35% fluorine by weight);

h.4. Glass (including vitrified or enameled coatings or glass lining);

h.5. Tantalum or tantalum alloys;

h.6. Titanium or titanium alloys;

h.7. Zirconium or zirconium alloys;

h.8. Niobium (columbium) or niobium alloys; or

h.9. Graphite or carbon-graphite.

i. Multiple-seal and seal-less pumps with manufacturer's specified maximum flow-rate greater than 0.6 m<sup>3</sup> /hour (600 liters/hour), or vacuum pumps with manufacturer's specified maximum flow-rate greater than 5 m<sup>3</sup> /hour (5000 liters/hour) (under standard temperature (273 K (0 °C)) and pressure (101.3 kPa) conditions), and

casings (pump bodies), preformed casing liners, impellers, rotors or jet pump nozzles designed for such pumps, in which all surfaces that come into direct contact with the chemical(s) being processed are made from any of the following materials:

i.1. Alloys with more than 25% nickel and 20% chromium by weight;

i.2. Nickel or alloys with more than 40% nickel by weight;

i.3. Fluoropolymers (polymeric or elastomeric materials with more than 35% fluorine by weight);

i.4. Glass (including vitrified or enameled coatings or glass lining);

i.5. Tantalum or tantalum alloys;

i.6. Titanium or titanium alloys;

i.7. Zirconium or zirconium alloys;

i.8. Niobium (columbium) or niobium alloys.

i.9. Graphite or carbon-graphite;

i.10. Ceramics; or

i.11. Ferrosilicon (high silicon iron alloys).

**Technical Note to 2B350.i:** *The seals referred to in 2B350.i come into direct contact with the chemical(s) being processed (or are designed to do so), and provide a sealing function where a rotary or reciprocating drive shaft passes through a pump body.*

j. Incinerators designed to destroy chemical warfare agents, chemical weapons precursors

controlled by 1C350, or chemical munitions having “specially designed” waste supply systems, special handling facilities and an average combustion chamber temperature greater than 1000° C in which all surfaces in the waste supply system that come into direct contact with the waste products are made from or lined with any of the following materials:

j.1. Alloys with more than 25% nickel and 20% chromium by weight;

j.2. Nickel or alloys with more than 40% nickel by weight; or

j.3. Ceramics.

**Technical Note 1:** *Carbon-graphite is a composition consisting primarily of graphite and amorphous carbon, in which the graphite is 8 percent or more by weight of the composition.*

**Technical Note 2:** *For the items listed in 2B350, the term ‘alloy,’ when not accompanied by a specific elemental concentration, is understood as identifying those alloys where the identified metal is present in a higher percentage by weight than any other element.*

**Technical Note 3:** *The materials used for gaskets, packing, seals, screws or washers, or other materials performing a sealing function, do not determine the control status of the items in this ECCN, provided that such components are designed to be interchangeable.*

**Note:** *See Categories V and XIV of the United States Munitions List for all chemicals that are “subject to the ITAR” (see 22 CFR parts 120 through 130).*

**\*\*2B351 Toxic gas monitors and monitoring systems, and their dedicated detecting “parts” and “components” (i.e., detectors, sensor**

devices, and replaceable sensor cartridges), as follows, except those systems and detectors controlled by ECCN 1A004.c (see List of Items Controlled).

### License Requirements

*Reason for Control:* CB, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
CB applies to entire entry	CB Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

### List of Items Controlled

*Related Controls:* See ECCN [2D351](#) for “software” for toxic gas monitors and monitoring systems and their dedicated detecting “parts” and “components” controlled by this ECCN. Also see ECCN [1A004](#), which controls chemical detection systems and “specially designed” “parts” and “components” therefor that are “specially designed” or modified for detection or identification of chemical warfare agents, but not “specially designed” for military use, and ECCN [1A995](#), which controls certain detection equipment, “parts” and “components” not controlled by ECCN 1A004 or by this ECCN.

*Related Definitions:* (1) For the purposes of this entry, the term “*dedicated*” means committed entirely to a single purpose or device. (2) For the purposes of this entry, the term “*continuous operation*” describes the capability of the equipment to operate on

line without human intervention. The intent of this entry is to control toxic gas monitors and monitoring systems capable of collection and detection of samples in environments such as chemical plants, rather than those used for batch-mode operation in laboratories.

*Items:*

- a. Designed for continuous operation and usable for the detection of chemical warfare agents or chemicals controlled by 1C350 at concentrations of less than 0.3mg/m<sup>3</sup>; *or*
- b. Designed for the detection of cholinesterase-inhibiting activity.

**\*\*2B352** Equipment capable of use in handling biological materials, as follows (see List of Items Controlled).

### License Requirements

*Reason for Control:* CB, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
CB applies to entire entry	CB Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

### List of Items Controlled

*Related Controls:* See ECCNs 1A004 and 1A995 for protective equipment that is not covered by this entry. Also see ECCN 9A120 for controls on certain “UAV”

systems designed or modified to dispense an aerosol and capable of carrying elements of a payload in the form of a particulate or liquid, other than fuel “parts” or “components” of such vehicles, of a volume greater than 20 liters.

*Related Definitions:* (1) “Lighter than air vehicles” – balloons and airships that rely on hot air or on lighter-than-air gases, such as helium or hydrogen, for their lift. (2) “UAVs” – Unmanned Aerial Vehicles. (3) ‘VMD’ – Volume Median Diameter.

*Items:*

a. Containment facilities and related equipment, as follows:

a.1. Complete containment facilities at P3 or P4 containment level.

***Technical Note to 2B352.a.1:*** P3 or P4 (BL3, BL4, L3, L4) containment levels are as specified in the WHO Laboratory Biosafety Manual (3rd edition, Geneva, 2004).

a.2. Equipment designed for fixed installation in containment facilities specified in paragraph a.1 of this ECCN, as follows:

a.2.a. Double-door pass-through decontamination autoclaves;

a.2.b. Breathing air suit decontamination showers;

a.2.c. Mechanical-seal or inflatable-seal walkthrough doors.

b. Fermenters and components as follows:

b.1. Fermenters capable of cultivation of micro-organisms or of live cells for the production of viruses or toxins, without the

propagation of aerosols, having a total internal volume of 20 liters or greater.

b.2. Components designed for such fermenters, as follows:

b.2.a. Cultivation chambers designed to be sterilized or disinfected in situ;

b.2.b. Cultivation chamber holding devices; *or*

b.2.c. Process control units capable of simultaneously monitoring and controlling two or more fermentation system parameters (e.g., temperature, pH, nutrients, agitation, dissolved oxygen, air flow, foam control).

***Technical Notes to 2B352.b: 1. Fermenters include bioreactors (including single-use (disposable) bioreactors), chemostats and continuous-flow systems.***

***2. Cultivation chamber holding devices controlled by 2B352.b.2.b include single-use cultivation chambers with rigid walls.***

c. Centrifugal separators capable of the continuous separation of pathogenic microorganisms, without the propagation of aerosols, and having all of the following characteristics:

c.1. One or more sealing joints within the steam containment area;

c.2. A flow rate greater than 100 liters per hour;

c.3. “Parts” or “components” of polished stainless steel or titanium; *and*

c.4. Capable of in-situ steam sterilization in a closed state.

**Technical Note to 2B352.c:** *Centrifugal separators include decanters.*

d. Cross (tangential) flow filtration equipment and “accessories,” as follows:

d.1. Cross (tangential) flow filtration equipment capable of separation of microorganisms, viruses, toxins or cell cultures having all of the following characteristics:

d.1.a. A total filtration area equal to or greater than 1 square meter (1 m<sup>2</sup>); *and*

d.1.b. Having any of the following characteristics:

d.1.b.1. Capable of being sterilized or disinfected in-situ; *or*

d.1.b.2. Using disposable or single-use filtration “parts” or “components”.

**N.B.:** *2B352.d.1 does not control reverse osmosis and hemodialysis equipment, as specified by the manufacturer.*

d.2. Cross (tangential) flow filtration “parts” or “components” (e.g., modules, elements, cassettes, cartridges, units or plates) with filtration area equal to or greater than 0.2 square meters (0.2 m<sup>2</sup>) for each component and designed for use in cross (tangential) flow filtration equipment controlled by 2B352.d.1.

**Technical Note:** *In this ECCN, “sterilized” denotes the elimination of all viable microbes from the equipment through the use of either physical (e.g., steam) or chemical agents. “Disinfected” denotes the destruction of potential microbial infectivity in the equipment through the use of chemical agents with a germicidal effect. “Disinfection” and “sterilization” are distinct from “sanitization”, the latter referring to cleaning procedures*

*designed to lower the microbial content of equipment without necessarily achieving elimination of all microbial infectivity or viability.*

e. Steam, gas or vapor sterilizable freeze-drying equipment with a condenser capacity of 10 kg of ice or greater in 24 hours (10 liters of water or greater in 24 hours) and less than 1000 kg of ice in 24 hours (less than 1,000 liters of water in 24 hours).

f. Spray-drying equipment capable of drying toxins or pathogenic microorganisms having all of the following characteristics:

f.1. A water evaporation capacity of  $\geq 0.4$  kg/h and  $\leq 400$  kg/h;

f.2. The ability to generate a typical mean product particle size of  $\leq 10$  micrometers with existing fittings or by minimal modification of the spray-dryer with atomization nozzles enabling generation of the required particle size; and

f.3. Capable of being sterilized or disinfected in situ.

g. Protective and containment equipment, as follows:

g.1. Protective full or half suits, or hoods dependent upon a tethered external air supply and operating under positive pressure;

**Technical Note to 2B352.g.1:** *2B352.g.1 does not control suits designed to be worn with self-contained breathing apparatus.*

g.2. Biocontainment chambers, isolators, or biological safety cabinets having all of the following characteristics, for normal operation:

g.2.a. Fully enclosed workspace where

the operator is separated from the work by a physical barrier;

g.2.b. Able to operate at negative pressure;

g.2.c. Means to safely manipulate items in the workspace; *and*

g.2.d. Supply and exhaust air to and from the workspace is high-efficiency particulate air (HEPA) filtered.

**Note 1 to 2B352.g.2:** *2B352.g.2 controls class III biosafety cabinets, as specified in the WHO Laboratory Biosafety Manual (3rd edition, Geneva, 2004) or constructed in accordance with national standards, regulations or guidance.*

**Note 2 to 2B352.g.2:** *2B352.g.2 does not control isolators “specially designed” for barrier nursing or transportation of infected patients.*

h. Aerosol inhalation equipment designed for aerosol challenge testing with microorganisms, viruses or toxins, as follows:

h.1. Whole-body exposure chambers having a capacity of 1 cubic meter or greater.

h.2. Nose-only exposure apparatus utilizing directed aerosol flow and having a capacity for the exposure of 12 or more rodents, or two or more animals other than rodents, and closed animal restraint tubes designed for use with such apparatus.

i. Spraying or fogging systems and “parts” and “components” therefor, as follows:

i.1. Complete spraying or fogging systems, “specially designed” or modified for fitting to “aircraft,” “lighter than air vehicles,” or “UAVs,” capable of delivering, from a liquid suspension, an initial droplet ‘VMD’ of less than 50 microns

at a flow rate of greater than 2 liters per minute;

i.2. Spray booms or arrays of ‘aerosol generating units’, “specially designed” or modified for fitting to “aircraft,” “lighter than air vehicles,” or “UAVs,” capable of delivering, from a liquid suspension, an initial droplet ‘VMD’ of less than 50 microns at a flow rate of greater than 2 liters per minute;

i.3. ‘Aerosol generating units’ “specially designed” for fitting to the systems specified in paragraphs i.1 and i.2 of this ECCN.

**Technical Notes to 2B352.i:**

1. ‘Aerosol generating units’ are devices “specially designed” or modified for fitting to “aircraft” and include nozzles, rotary drum atomizers and similar devices..

2. This ECCN does not control spraying or fogging systems, “parts” and “components,” as specified in 2B352.i, that are demonstrated not to be capable of delivering biological agents in the form of infectious aerosols.

3. Volume Median Diameter ‘VMD’ for droplets produced by spray equipment or nozzles “specially designed” for use on “aircraft” or “UAVs” should be measured using either of the following methods (pending the adoption of internationally accepted standards):

a. Doppler “laser” method

b. Forward “laser” diffraction method.

j. Nucleic acid assemblers and synthesizers that are both:

j.1 Partly or entirely automated; *and*

j.2. Designed to generate continuous nucleic acids greater than 1.5 kilobases in length with

error rates less than 5% in a single run.

**\*\*2B991 Numerical control units for machine tools and “numerically controlled” machine tools, n.e.s. (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* Also see ECCNs [2B001](#) and [2B201](#).

*Related Definitions:* N/A

*Items:*

- a. “Numerical control” units for machine tools:
  - a.1. Having four interpolating axes that can be coordinated simultaneously for “contouring control”; *or*
  - a.2. Having two or more axes that can be coordinated simultaneously for “contouring control” and a minimum programmable increment better (less) than 0.001 mm;
  - a.3. “Numerical control” units for machine tools having two, three or four interpolating axes that can be coordinated simultaneously for “contouring control”, and capable of receiving directly (on-line) and processing

computer-aided-design (CAD) data for internal preparation of machine instructions; *or*

b. “Motion control boards” “specially designed” for machine tools and having any of the following characteristics:

b.1. Interpolation in more than four axes;

b.2. Capable of “real-time processing” of data to modify tool path, feed rate and spindle data, during the machining operation, by any of the following:

b.2.a. Automatic calculation and modification of part program data for machining in two or more axes by means of measuring cycles and access to source data; *or*

b.2.b. “Adaptive control” with more than one physical variable measured and processed by means of a computing model (strategy) to change one or more machining instructions to optimize the process.

b.3. Capable of receiving and processing CAD data for internal preparation of machine instructions; *or*

c. “Numerically controlled” machine tools that, according to the manufacturer's technical specifications, can be equipped with electronic devices for simultaneous “contouring control” in two or more axes and that have both of the following characteristics:

c.1. Two or more axes that can be coordinated simultaneously for contouring control; *and*

c.2. Positioning accuracies according to ISO 230/2 (2006), with all compensations available:

c.2.a. Better than 15 µm along any

linear axis (overall positioning) for grinding machines;

c.2.b. Better than 15 µm along any linear axis (overall positioning) for milling machines; *or*

c.2.c. Better than 15 µm along any linear axis (overall positioning) for turning machines; *or*

d. Machine tools, as follows, for removing or cutting metals, ceramics or composites, that, according to the manufacturer's technical specifications, can be equipped with electronic devices for simultaneous “contouring control” in two or more axes:

d.1. Machine tools for turning, grinding, milling or any combination thereof, having two or more axes that can be coordinated simultaneously for “contouring control” and having any of the following characteristics:

d.1.a. One or more contouring “tilting spindles”;

*Note: 2B991.d.1.a. applies to machine tools for grinding or milling only.*

d.1.b. “Camming” (axial displacement) in one revolution of the spindle less (better) than 0.0006 mm total indicator reading (TIR);

*Note: 2B991.d.1.b. applies to machine tools for turning only.*

d.1.c. “Run out” (out-of-true running) in one revolution of the spindle less (better) than 0.0006 mm total indicator reading (TIR);

d.1.d. The “positioning accuracies”, with all compensations available, are less (better) than: 0.001° on any rotary axis;

d.2. Electrical discharge machines (EDM) of the wire feed type that have five or more axes that can be coordinated simultaneously for “contouring control”.

**\*\*2B992 Non-"numerically controlled" machine tools for generating optical quality surfaces, (see List of Items Controlled) and "specially designed" "parts" and "components" therefor.**

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

a. Turning machines using a single point cutting tool and having all of the following characteristics:

a.1. Slide positioning accuracy less (better) than 0.0005 mm per 300 mm of travel;

a.2. Bidirectional slide positioning repeatability less (better) than 0.00025 mm per 300 mm of travel;

a.3. Spindle “run out” and “camming” less (better) than 0.0004 mm total indicator reading (TIR);

a.4. Angular deviation of the slide movement (yaw, pitch and roll) less (better) than 2 seconds of arc, TIR, over full travel; *and*

a.5. Slide perpendicularity less (better) than 0.001 mm per 300 mm of travel;

**Technical Note:** *The bidirectional slide positioning repeatability (R) of an axis is the maximum value of the repeatability of positioning at any position along or around the axis determined using the procedure and under the conditions specified in part 2.11 of ISO 230/2: 1988.*

b. Fly cutting machines having all of the following characteristics:

b.1. Spindle “run out” and “camming” less (better) than 0.0004 mm TIR; *and*

b.2. Angular deviation of slide movement (yaw, pitch and roll) less (better) than 2 seconds of arc, TIR, over full travel.

**\*\*2B993 Gearmaking and/or finishing machinery not controlled by 2B003 capable of producing gears to a quality level of better than AGMA 11.**

**List of Items Controlled**

*Related Controls:* This entry does not control measuring interferometer systems, without closed or open loop feedback, containing a laser to measure slide movement errors of machine-tools, dimensional inspection machines or similar equipment.

*Related Definition:* N/A

*Items:*

- a. Spindle assemblies, consisting of spindles and bearings as a minimal assembly, with radial (“run out”) or axial (“camming”) axis motion in one revolution of the spindle less (better) than 0.0006 mm total indicator reading (TIR);
- b. Single point diamond cutting tool inserts, having all of the following characteristics:
  - b.1. Flawless and chip-free cutting edge when magnified 400 times in any direction;
  - b.2. Cutting radius from 0.1 to 5 mm inclusive; *and*
  - b.3. Cutting radius out-of-roundness less (better) than 0.002 mm TIR.
- c. “Specially designed” printed circuit boards

with mounted “parts” or “components” capable of upgrading, according to the manufacturer's specifications, “numerical control” units, machine tools or feed-back devices to or above the levels specified in ECCNs 2B991, 2B993, 2B996, 2B997, or 2B998.

**\*\*2B999 Specific processing equipment, n.e.s., as follows (see List of Items Controlled).**

### License Requirements

*Reason for Control:* AT

### *Control(s)*

AT applies to entire entry. A license is required for items controlled by this entry to North Korea for anti-terrorism reasons. The Commerce Country Chart is not designed to determine AT licensing requirements for this entry. See §742.19 of the EAR for additional information.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

### List of Items Controlled

*Related Controls:* (1) See also 1B233, 2A992, 2A993, 2B001.f, 2B004, 2B009, 2B104, 2B109, 2B204, 2B209, 2B228, 2B229, 2B231, and 2B350. (2) Certain nuclear related processing equipment is subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*Items:*

a. Isostatic presses, n.e.s.;

b. Bellows manufacturing equipment, including hydraulic forming equipment and bellows forming dies;

c. Laser welding machines;

d. MIG welders;

e. E-beam welders;

f. Monel equipment, including valves, piping, tanks and vessels;

g. 304 and 316 stainless steel valves, piping, tanks and vessels;

*Note:* Fittings are considered part of “piping” for purposes of 2B999.g.

h. Mining and drilling equipment, as follows:

h.1. Large boring equipment capable of drilling holes greater than two feet in diameter;

h.2. Large earth-moving equipment used in the mining industry;

i. Electroplating equipment designed for coating parts with nickel or aluminum;

j. Pumps designed for industrial service and for use with an electrical motor of 5 HP or greater;

k. Vacuum valves, piping, flanges, gaskets and related equipment “specially designed” for use in high-vacuum service, n.e.s.;

l. Spin forming and flow forming machines, n.e.s.;

m. Centrifugal multiplane balancing machines, n.e.s.;

n. Austenitic stainless steel plate, valves, piping, tanks and vessels.

TSR: Yes, except N/A for MT

**C. “MATERIALS” [RESERVED]**

**D. “SOFTWARE”**

**\*\*2D001** “Software”, other than that controlled by 2D002, as follows (See list of Items Controlled).

**License Requirements**

*Reason for Control:* NS, MT, NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
MT applies to “software” for equipment controlled by 2B004 and 2B009 for MT reasons.	MT Column 1
NP applies to specially designed or modified “software” for equipment controlled by 2B001 for NP reasons, and to “specially designed” “software” for equipment controlled by 2B004, 2B006, 2B007, or 2B009 for NP reasons.	NP Column 1
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship or transmit “software”, other than that specified by ECCN 2D002, “specially designed” for the “development” or “production” of equipment as follows: ECCN 2B001 entire entry; or “Numerically controlled” or manual machine tools as specified in 2B003 to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [2E001](#) (“development”) and [2E101](#) (“use”) for technology for “software” controlled under this entry. (2) Also see ECCNs [2D101](#) and [2D201](#).

*Related Definitions:* N/A

*Items:*

a. “Software” “specially designed” or modified for the “development” or “production” of equipment controlled by 2A001 or 2B001 to 2B009;

b. “Software” “specially designed” or modified for the “use” of equipment specified by 2A001.c., 2B001, or 2B003 to 2B009.

*Note:* 2D001 does not apply to part programming “software” that generates “numerical control” codes for machining various parts.

**\*\*2D002** “Software” for electronic devices, even when residing in an electronic device or system, enabling such devices or systems to

function as a “numerical control” unit, capable of coordinating simultaneously more than 4 axes for “contouring control”.

**License Requirements**

*Reason for Control:* NS, NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* Yes

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [2E001](#) (“development”) and [2E201](#) (“use”) for technology for “software” controlled under this entry. (2) Also see ECCN [2D202](#).

*Related Definitions:* N/A

*Items:*

**Note 1:** 2D002 does not control “software” “specially designed” or modified for the operation of items not specified by Category 2.

**Note 2:** 2D002 does not control “software” for items specified by 2B002. See 2D001 and 2D003 for “software” for items specified by 2B002.

**Note 3:** 2D002 does not apply to “software” that is exported with, and the minimum necessary for the operation of, items not specified by Category 2.

The list of items controlled is contained in the ECCN heading.

**\*\*2D003** “Software”, designed or modified for the operation of equipment specified by 2B002, that converts optical design, workpiece measurements and material removal functions into “numerical control” commands to achieve the desired workpiece form.

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* Yes

**List of Items Controlled**

*Related Controls:* See ECCN [2E001](#) (“development”) for technology for “software” controlled under this entry.

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*2D018** “Software” for the “development”, “production” or “use” of equipment controlled by 2B018.

No software is currently controlled under this entry. See ECCNs 0D501, 0D602, and 0D606 for software formerly controlled under this entry.

**\*\*2D101** “Software” “specially designed” or modified for the “use” of equipment controlled by 2B104, 2B105, 2B109, 2B116, 2B117, or 2B119 to 2B122.

**License Requirements**

*Reason for Control:* MT, NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
NP applies to “software” “specially designed” for the “use” of items controlled by 2B104, 2B109, or 2B116 for NP reasons.	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [2E001](#) (“development”) and [2E101](#) (“use”) for technology for “software” controlled under this entry. (2) Also see ECCN 9D004.

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*2D201** “Software” “specially designed” or modified for the “use” of equipment controlled

by 2B204, 2B206, 2B207, 2B209, 2B227, or 2B229.

**License Requirements**

*Reason for Control:* NP, AT

*TSR:* N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

a. “Software” to provide “adaptive control” and having both of the following characteristics:

a.1. For “flexible manufacturing units” (FMUs) which consist at least of equipment described in b.1 and b.2 of the definition of “flexible manufacturing unit” contained in part 772 of the EAR; *and*

a.2. Capable of generating or modifying, in “real-time processing”, programs or data by using the signals obtained simultaneously by means of at least two detection techniques, such as:

a.2.a. Machine vision (optical ranging);

a.2.b. Infrared imaging;

a.2.c. Acoustical imaging (acoustical ranging);

a.2.d. Tactile measurement;

a.2.e. Inertial positioning;

a.2.f. Force measurement; *and*

a.2.g. Torque measurement.

**Note:** 2D992.a does not control “software” which only provides rescheduling of functionally identical equipment within “flexible manufacturing units” using pre-stored part programs and a pre-stored strategy for the distribution of the part programs.

b. [RESERVED].

**\*\*2D993** “Software” “specially designed” or modified for the “development,” “production,” or “use” of items controlled by 2A992 or 2A993.

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

CB applies to “technology” for equipment Controlled by 2B350 to 2B352 and for valves controlled by 2A226 having the characteristics of those controlled by 2B350.g	CB Column 2
AT applies to entire entry	AT Column 1

740 of the EAR).

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*2E003** Other “technology”, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, AT

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* Yes, except N/A for MT

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* Yes, except 2E003.b, .e and .f

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship or transmit “technology” according to the General Technology Note for the “production” of equipment as follows: ECCN 2B001 entire entry; or “Numerically controlled” or manual machine tools as specified in 2B003 to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part

**List of Items Controlled**

*Related Controls:* See [2E001](#), [2E002](#), and [2E101](#) for “development” and “use” technology for equipment that are designed or modified for densification of carbon-carbon composites, structural composite rocket nozzles and reentry vehicle nose tips.  
*Related Definitions:* N/A  
*Items:*

- a. [Reserved]
- b. “Technology” for metal-working

manufacturing processes, as follows:

b.1. “Technology” for the design of tools, dies or fixtures “specially designed” for any of the following processes:

b.1.a. “Superplastic forming”;

b.1.b. “Diffusion bonding”; *or*

b.1.c. ‘Direct-acting hydraulic pressing’;

b.2. Technical data consisting of process methods or parameters as listed below used to control:

b.2.a. “Superplastic forming” of aluminum alloys, titanium alloys or “superalloys”:

b.2.a.1. Surface preparation;

b.2.a.2. Strain rate;

b.2.a.3. Temperature;

b.2.a.4. Pressure;

b.2.b. “Diffusion bonding” of “superalloys” or titanium alloys:

b.2.b.1. Surface preparation;

b.2.b.2. Temperature;

b.2.b.3. Pressure;

b.2.c. ‘Direct-acting hydraulic pressing’ of aluminum alloys or titanium alloys:

b.2.c.1. Pressure;

b.2.c.2. Cycle time;

b.2.d. ‘Hot isostatic densification’ of

titanium alloys, aluminum alloys or “superalloys”:

b.2.d.1. Temperature;

b.2.d.2. Pressure;

b.2.d.3. Cycle time;

**Technical Notes:**

1. ‘Direct-acting hydraulic pressing’ is a deformation process which uses a fluid-filled flexible bladder in direct contact with the workpiece.

2. ‘Hot isostatic densification’ is a process of pressurizing a casting at temperatures exceeding 375 K (102°C) in a closed cavity through various media (gas, liquid, solid particles, etc.) to create equal force in all directions to reduce or eliminate internal voids in the casting.

c. “Technology” for the “development” or “production” of hydraulic stretch-forming machines and dies therefor, for the manufacture of airframe structures;

d. [Reserved]

e. “Technology” for the “development” of integration “software” for incorporation of expert systems for advanced decision support of shop floor operations into “numerical control” units;

f. “Technology” for the application of inorganic overlay coatings or inorganic surface modification coatings (specified in column 3 of the following table) to non-electronic substrates (specified in column 2 of the following table), by processes specified in column 1 of the following table and defined in the Technical Note.

*N.B. This table should be read to control the*

*technology of a particular ‘Coating Process’ only when the resultant coating in column 3 is in a paragraph directly across from the relevant ‘Substrate’ under column 2. For example, Chemical Vapor Deposition (CVD) ‘coating process’ control the “technology” for a particular application of ‘silicides’ to ‘Carbon-carbon, Ceramic and Metal “matrix” “composites” substrates, but are not controlled*

*for the application of ‘silicides’ to ‘Cemented tungsten carbide (16), Silicon carbide (18)’ substrates. In the second case, the resultant coating is not listed in the paragraph under column 3 directly across from the paragraph under column 2 listing ‘Cemented tungsten carbide (16), Silicon carbide (18)’.*

**Category 2E - Materials Processing Table; Deposition Techniques**

1. Coating Process (1) <sup>1</sup>	2. Substrate	3. Resultant Coating
A. Chemical Vapor Deposition (CVD)	“Superalloys”	Aluminides for internal passages
	Ceramics (19) and Low-expansion glasses(14)	Silicides Carbides Dielectric layers (15) Diamond Diamond-like carbon (17)
	Carbon-carbon, Ceramic, and Metal “matrix” “composites”	Silicides Carbides Refractory metals Mixtures thereof (4) Dielectric layers (15) Aluminides Alloyed aluminides (2) Boron nitride
	Cemented tungsten carbide (16), Silicon carbide (18)	Carbides Tungsten Mixtures thereof (4) Dielectric layers (15)
	Molybdenum and Molybdenum alloys	Dielectric layers (15)
	Beryllium and Beryllium alloys	Dielectric layers (15) Diamond Diamond-like carbon (17)

<sup>1</sup> The numbers in parenthesis refer to the Notes following this Table.

1. <i>Coating Process</i> (1) <sup>1</sup>	2. <i>Substrate</i>	3. <i>Resultant Coating</i>
	Sensor window materials (9)	Dielectric layers (15) Diamond Diamond-like carbon (17)
B. Thermal-Evaporation Physical Vapor		
1. Physical Vapor Deposition (PVD): Deposition (TE-PVD) Electron-Beam (EB-PVD)	“Superalloys”	Alloyed silicides Alloyed aluminides (2) MCrAlX (5) Modified zirconia (12) Silicides Aluminides Mixtures thereof (4)
	Ceramics (19) and Low-expansion glasses (14)	Dielectric layers (15)
	Corrosion resistant steel (7)	MCrAlX (5) Modified zirconia (12) Mixtures thereof (4)
	Carbon-carbon, Ceramic and Metal “matrix” “composites”	Silicides Carbides Refractory metals Mixtures thereof (4) Dielectric layers (15) Boron nitride
	Cemented tungsten carbide (16), Silicon carbide (18)	Carbides Tungsten Mixtures thereof (4) Dielectric layers (15)
	Molybdenum and Molybdenum alloys	Dielectric layers (15)
	Beryllium and Beryllium alloys	Dielectric layers (15) Borides Beryllium
	Sensor window materials (9)	Dielectric layers (15)

1. Coating Process (1) <sup>1</sup>	2. Substrate	3. Resultant Coating
	Titanium alloys (13)	Borides Nitrides
2. Ion assisted resistive heating Physical Vapor Deposition (PVD)(Ion Plating)	Ceramics (19) and Low-expansion glasses (14)	Dielectric layers (15) Diamond-like carbon (17)
	Carbon-carbon, Ceramic and Metal “matrix” “composites”	Dielectric layers (15)
	Cemented tungsten carbide (16) Silicon carbide	Dielectric layers (15)
	Molybdenum and Molybdenum alloys	Dielectric layers (15)
	Beryllium and Beryllium alloys	Dielectric layers (15)
	Sensor window materials (9)	Dielectric Layers (15) Diamond-like carbon (17)
3. Physical Vapor Deposition (PVD): “Laser” Vaporization	Ceramics (19) and Low-expansion glasses (14)	Silicides Dielectric layers (15) Diamond-like carbon (17)
	Carbon-carbon,Ceramic and Metal “matrix” “composites”	Dielectric layers (15)
	Cemented tungsten carbide (16), Silicon carbide	Dielectric Layers (15)
	Molybdenum and Molybdenum alloys	Dielectric layers (15)
	Beryllium and Beryllium alloys	Dielectric layers (15)
	Sensor window materials (9)	Dielectric layers (15) Diamond-like carbon
4. Physical Vapor Deposition (PVD): Cathodic Arc Discharge.	“Superalloys”	Alloyed silicides Alloyed Aluminides (2) MCrAlX (5)

1. <i>Coating Process</i> (1) <sup>1</sup>	2. <i>Substrate</i>	3. <i>Resultant Coating</i>
	Polymers (11) and Organic “matrix” “composites”	Borides Carbides Nitrides Diamond-like carbon (17)
C. Pack cementation (see A above for out-of-pack cementation) (10)	Carbon-carbon, Ceramic and Metal “matrix” “composites”	Silicides Carbides Mixtures thereof (4)
	Titanium alloys (13)	Silicides Aluminides Alloyed aluminides (2)
	Refractory metals and alloys (8)	Silicides Oxides
D. Plasma spraying	“Superalloys”	MCrAlX (5) Modified zirconia (12) Mixtures thereof (4) Abradable Nickel-Graphite Abradable materials containing Ni-Cr-Al Abradable Al-Si-Polyester Alloyed aluminides (2)
	Aluminum alloys (6)	MCrAlX (5) Modified zirconia (12) Silicides Mixtures thereof (4)
	Refractory metals and alloys (8), Carbides, Corrosion resistant steel (7)	Aluminides Silicides MCrAlX (5) Modified zirconia (12) Mixtures thereof (4)
D. Plasma spraying (continued)	Titanium alloys (13)	Carbides Aluminides Silicides Alloyed aluminides (2)

1. <i>Coating Process</i> (1) <sup>1</sup>	2. <i>Substrate</i>	3. <i>Resultant Coating</i>
	Abradable Nickel Graphite	Abradable materials containing Ni-Cr-Al Abradable Al-Si-Polyester
E. Slurry Deposition	Refractory metals and alloys (8)	Fused silicides Fused aluminides except for resistance heating elements
	Carbon-carbon, Ceramic and Metal “matrix” “composites”	Silicides Carbides Mixtures thereof (4)
F. Sputter Deposition	“Superalloys”	Alloyed silicides Alloyed aluminides (2) Noble metal modified aluminides (3) MCrAlX (5) Modified zirconia (12) Platinum Mixtures thereof (4)
	Ceramics and Low-expansion glasses (14)	Silicides Platinum Mixtures thereof (4) Dielectric layers (15) Diamond-like carbon (17)

G. Ion Implantation	High temperature bearing steels	Additions of Chromium, Tantalum, or Niobium (Columbium)
	Titanium alloys (13)	Borides Nitrides
	Beryllium and Beryllium alloys	Borides
	Cemented tungsten carbide (16)	Carbides Nitrides

**Notes to Table on Deposition Techniques:**

1. The term “coating process” includes coating repair and refurbishing as well as original coating.

2. The term “alloyed aluminide coating” includes single or multiple-step coatings in which an element or elements are deposited prior to or during application of the aluminide coating, even if these elements are deposited by another

coating process. It does not, however, include the multiple use of single-step pack cementation processes to achieve alloyed aluminides.

3. The term “noble metal modified aluminide” coating includes multiple-step coatings in which the noble metal or noble metals are laid down by some other coating process prior to application of the aluminide coating.

4. The term “mixtures thereof” includes

*infiltrated material, graded compositions, co-deposits and multilayer deposits and are obtained by one or more of the coating processes specified in the Table.*

5. *MCrAlX refers to a coating alloy where M equals cobalt, iron, nickel or combinations thereof and X equals hafnium, yttrium, silicon, tantalum in any amount or other intentional additions over 0.01% by weight in various proportions and combinations, except:*

a. *CoCrAlY coatings which contain less than 22% by weight of chromium, less than 7% by weight of aluminum and less than 2% by weight of yttrium;*

b. *CoCrAlY coatings which contain 22 to 24% by weight of chromium, 10 to 12% by weight of aluminum and 0.5 to 0.7% by weight of yttrium; or*

c. *NiCrAlY coatings which contain 21 to 23% by weight of chromium, 10 to 12% by weight of aluminum and 0.9 to 1.1% by weight of yttrium.*

6. *The term “aluminum alloys” refers to alloys having an ultimate tensile strength of 190 MPa or more measured at 293 K (20 °C).*

7. *The term “corrosion resistant steel” refers to AISI (American Iron and Steel Institute) 300 series or equivalent national standard steels.*

8. *“Refractory metals and alloys” include the following metals and their alloys: niobium (columbium), molybdenum, tungsten and tantalum.*

9. *“Sensor window materials”, as follows: alumina, silicon, germanium, zinc sulphide, zinc selenide, gallium arsenide, diamond, gallium phosphide, sapphire and the following metal halides: sensor window materials of more than 40 mm diameter for zirconium fluoride and*

*hafnium fluoride.*

10. *Category 2 does not include “technology” for single-step pack cementation of solid airfoils.*

11. *“Polymers”, as follows: polyimide, polyester, polysulfide, polycarbonates and polyurethanes.*

12. *“Modified zirconia” refers to additions of other metal oxides, (e.g., calcia, magnesia, yttria, hafnia, rare earth oxides) to zirconia in order to stabilize certain crystallographic phases and phase compositions. Thermal barrier coatings made of zirconia, modified with calcia or magnesia by mixing or fusion, are not controlled.*

13. *“Titanium alloys” refers only to aerospace alloys having an ultimate tensile strength of 900 MPa or more measured at 293 K (20 °C).*

14. *“Low-expansion glasses” refers to glasses which have a coefficient of thermal expansion of  $1 \times 10^{-7} \text{ K}^{-1}$  or less measured at 293 K (20 °C).*

15. *“Dielectric layers” are coatings constructed of multi-layers of insulator materials in which the interference properties of a design composed of materials of various refractive indices are used to reflect, transmit or absorb various wavelength bands. Dielectric layers refers to more than four dielectric layers or dielectric/metal “composite” layers.*

16. *“Cemented tungsten carbide” does not include cutting and forming tool materials consisting of tungsten carbide/(cobalt, nickel), titanium carbide/(cobalt, nickel), chromium carbide/nickel-chromium and chromium carbide/nickel.*

17. *“Technology” for depositing diamond-*

like carbon on any of the following is not controlled: magnetic disk drives and heads, equipment for the manufacture of disposables, valves for faucets, acoustic diaphragms for speakers, engine parts for automobiles, cutting tools, punching-pressing dies, office automation equipment, microphones, medical devices or molds, for casting or molding of plastics, manufactured from alloys containing less than 5% beryllium.

18. "Silicon carbide" does not include cutting and forming tool materials.

19. Ceramic substrates, as used in this entry, does not include ceramic materials containing 5% by weight, or greater, clay or cement content, either as separate constituents or in combination.

**Technical Note to Table on Deposition Techniques:** Processes specified in Column 1 of the Table are defined as follows:

a. Chemical Vapor Deposition (CVD) is an overlay coating or surface modification coating process wherein a metal, alloy, "composite", dielectric or ceramic is deposited upon a heated substrate. Gaseous reactants are decomposed or combined in the vicinity of a substrate resulting in the deposition of the desired elemental, alloy or compound material on the substrate. Energy for this decomposition or chemical reaction process may be provided by the heat of the substrate, a glow discharge plasma, or "laser" irradiation.

**Note 1:** CVD includes the following processes: directed gas flow out-of-pack deposition, pulsating CVD, controlled nucleation thermal decomposition (CNTD), plasma enhanced or plasma assisted CVD processes.

**Note 2:** Pack denotes a substrate immersed in a powder mixture.

**Note 3:** The gaseous reactants used in the out-of-pack process are produced using the same basic reactions and parameters as the pack cementation process, except that the substrate to be coated is not in contact with the powder mixture.

b. Thermal Evaporation-Physical Vapor Deposition (TE-PVD) is an overlay coating process conducted in a vacuum with a pressure less than 0.1 Pa wherein a source of thermal energy is used to vaporize the coating material. This process results in the condensation, or deposition, of the evaporated species onto appropriately positioned substrates. The addition of gases to the vacuum chamber during the coating process to synthesize compound coatings is an ordinary modification of the process. The use of ion or electron beams, or plasma, to activate or assist the coating's deposition is also a common modification in this technique. The use of monitors to provide in-process measurement of optical characteristics and thickness of coatings can be a feature of these processes. Specific TE-PVD processes are as follows:

1. Electron Beam PVD uses an electron beam to heat and evaporate the material which forms the coating;

2. Ion Assisted Resistive Heating PVD employs electrically resistive heating sources in combination with impinging ion beam(s) to produce a controlled and uniform flux of evaporated coating species;

3. "Laser" Vaporization uses either pulsed or continuous wave "laser" beams to vaporize the material which forms the coating;

4. Cathodic Arc Deposition employs a consumable cathode of the material which forms the coating and has an arc discharge established

on the surface by a momentary contact of a ground trigger. Controlled motion of arcing erodes the cathode surface creating a highly ionized plasma. The anode can be either a cone attached to the periphery of the cathode, through an insulator, or the chamber. Substrate biasing is used for non line-of-sight deposition;

**Note:** This definition does not include random cathodic arc deposition with non-biased substrates.

5. Ion Plating is a special modification of a general TE-PVD process in which a plasma or an ion source is used to ionize the species to be deposited, and a negative bias is applied to the substrate in order to facilitate the extraction of the species from the plasma. The introduction of reactive species, evaporation of solids within the process chamber, and the use of monitors to provide in-process measurement of optical characteristics and thicknesses of coatings are ordinary modifications of the process.

c. Pack Cementation is a surface modification coating or overlay coating process wherein a substrate is immersed in a powder mixture (a pack), that consists of:

1. The metallic powders that are to be deposited (usually aluminum, chromium, silicon or combinations thereof);

2. An activator (normally a halide salt); and

3. An inert powder, most frequently alumina.

**Note:** The substrate and powder mixture is contained within a retort which is heated to between 1,030 K (757 °C) to 1,375 K (1,102 °C) for sufficient time to deposit the coating.

d. Plasma Spraying is an overlay coating

process wherein a gun (spray torch) which produces and controls a plasma accepts powder or wire coating materials, melts them and propels them towards a substrate, whereon an integrally bonded coating is formed. Plasma spraying constitutes either low pressure plasma spraying or high velocity plasma spraying.

**Note 1:** Low pressure means less than ambient atmospheric pressure.

**Note 2:** High velocity refers to nozzle-exit gas velocity exceeding 750 m/s calculated at 293 K (20 °C) at 0.1 MPa.

e. Slurry Deposition is a surface modification coating or overlay coating process wherein a metallic or ceramic powder with an organic binder is suspended in a liquid and is applied to a substrate by either spraying, dipping or painting, subsequent air or oven drying, and heat treatment to obtain the desired coating.

f. Sputter Deposition is an overlay coating process based on a momentum transfer phenomenon, wherein positive ions are accelerated by an electric field towards the surface of a target (coating material). The kinetic energy of the impacting ions is sufficient to cause target surface atoms to be released and deposited on an appropriately positioned substrate.

**Note 1:** The Table refers only to triode, magnetron or reactive sputter deposition which is used to increase adhesion of the coating and rate of deposition and to radio frequency (RF) augmented sputter deposition used to permit vaporization of non-metallic coating materials.

**Note 2:** Low-energy ion beams (less than 5 keV) can be used to activate the deposition.

g. Ion Implantation is a surface modification coating process in which the element to be

*alloyed is ionized, accelerated through a potential gradient and implanted into the surface region of the substrate. This includes processes in which ion implantation is performed simultaneously with electron beam physical vapor deposition or sputter deposition.*

***Accompanying Technical Information to Table on Deposition Techniques:***

*1. Technical information for pretreatments of the substrates listed in the Table, as follows:*

*a. Chemical stripping and cleaning bath cycle parameters, as follows:*

*1. Bath composition;*

*a. For the removal of old or defective coatings corrosion product or foreign deposits;*

*b. For preparation of virgin substrates;*

*2. Time in bath;*

*3. Temperature of bath;*

*4. Number and sequences of wash cycles;*

*b. Visual and macroscopic criteria for acceptance of the cleaned part;*

*c. Heat treatment cycle parameters, as follows:*

*1. Atmosphere parameters, as follows:*

*a. Composition of the atmosphere;*

*b. Pressure of the atmosphere;*

*2. Temperature for heat treatment;*

*3. Time of heat treatment;*

*d. Substrate surface preparation parameters, as follows:*

*1. Grit blasting parameters, as follows:*

*a. Grit composition;*

*b. Grit size and shape;*

*c. Grit velocity;*

*2. Time and sequence of cleaning cycle after grit blast;*

*3. Surface finish parameters;*

*4. Application of binders to promote adhesion;*

*e. Masking technique parameters, as follows:*

*1. Material of mask;*

*2. Location of mask;*

*2. Technical information for in situ quality assurance techniques for evaluation of the coating processes listed in the Table, as follows:*

*a. Atmosphere parameters, as follows:*

*1. Composition of the atmosphere;*

*2. Pressure of the atmosphere;*

*b. Time parameters;*

*c. Temperature parameters;*

*d. Thickness parameters;*

*e. Index of refraction parameters;*

*f. Control of composition;*

3. *Technical information for post deposition treatments of the coated substrates listed in the Table, as follows:*

a. *Shot peening parameters, as follows:*

1. *Shot composition;*
2. *Shot size;*
3. *Shot velocity;*

b. *Post shot peening cleaning parameters;*

c. *Heat treatment cycle parameters, as follows:*

1. *Atmosphere parameters, as follows:*

- a. *Composition of the atmosphere;*
- b. *Pressure of the atmosphere;*

2. *Time-temperature cycles;*

d. *Post heat treatment visual and macroscopic criteria for acceptance of the coated substrates;*

4. *Technical information for quality assurance techniques for the evaluation of the coated substrates listed in the Table, as follows:*

a. *Statistical sampling criteria;*

b. *Microscopic criteria for:*

1. *Magnification;*
2. *Coating thickness, uniformity;*
3. *Coating integrity;*
4. *Coating composition;*

5. *Coating and substrates bonding;*

6. *Microstructural uniformity.*

c. *Criteria for optical properties assessment (measured as a function of wavelength):*

1. *Reflectance;*
2. *Transmission;*
3. *Absorption;*
4. *Scatter;*

5. *Technical information and parameters related to specific coating and surface modification processes listed in the Table, as follows:*

a. *For Chemical Vapor Deposition (CVD):*

1. *Coating source composition and formulation;*
2. *Carrier gas composition;*
3. *Substrate temperature;*
4. *Time-temperature-pressure cycles;*
5. *Gas control and part manipulation;*

b. *For Thermal Evaporation-Physical Vapor Deposition (PVD):*

1. *Ingot or coating material source composition;*
2. *Substrate temperature;*
3. *Reactive gas composition;*
4. *Ingot feed rate or material vaporization rate;*

5. *Time-temperature-pressure cycles;*
6. *Beam and part manipulation;*
7. *“Laser” parameters, as follows:*
  - a. *Wave length;*
  - b. *Power density;*
  - c. *Pulse length;*
  - d. *Repetition ratio;*
  - e. *Source;*
- c. *For Pack Cementation:*
  1. *Pack composition and formulation;*
  2. *Carrier gas composition;*
  3. *Time-temperature-pressure cycles;*
- d. *For Plasma Spraying:*
  1. *Powder composition, preparation and size distributions;*
  2. *Feed gas composition and parameters;*
  3. *Substrate temperature;*
  4. *Gun power parameters;*
  5. *Spray distance;*
  6. *Spray angle;*
  7. *Cover gas composition, pressure and flow rates;*
  8. *Gun control and part manipulation;*
- e. *For Sputter Deposition:*
  1. *Target composition and fabrication;*
  2. *Geometrical positioning of part and target;*
  3. *Reactive gas composition;*
  4. *Electrical bias;*
  5. *Time-temperature-pressure cycles;*
  6. *Triode power;*
  7. *Part manipulation;*
- f. *For Ion Implantation:*
  1. *Beam control and part manipulation;*
  2. *Ion source design details;*
  3. *Control techniques for ion beam and deposition rate parameters;*
  4. *Time-temperature-pressure cycles.*
- g. *For Ion Plating:*
  1. *Beam control and part manipulation;*
  2. *Ion source design details;*
  3. *Control techniques for ion beam and deposition rate parameters;*
  4. *Time-temperature-pressure cycles;*
  5. *Coating material feed rate and vaporization rate;*
  6. *Substrate temperature;*
  7. *Substrate bias parameters.*

**CATEGORY 3 - ELECTRONICS**

**A. “END ITEMS,” “EQUIPMENT,” “ACCESSORIES,” “ATTACHMENTS,” “PARTS,” “COMPONENTS,” AND “SYSTEMS”**

**Note 1:** *The control status of equipment and “components” described in 3A001 or 3A002, other than those described in 3A001.a.3 to 3A001.a.10, or 3A001.a.12 to 3A001.a.14, which are “specially designed” for or which have the same functional characteristics as other equipment is determined by the control status of the other equipment.*

**Note 2:** *The control status of integrated circuits described in 3A001.a.3 to 3A001.a.9, or 3A001.a.12 to 3A001.a.14 that are unalterably programmed or designed for a specific function for other equipment is determined by the control status of the other equipment.*

**N.B.:** *When the manufacturer or applicant cannot determine the control status of the other equipment, the control status of the integrated circuits is determined in 3A001.a.3 to 3A001.a.9, or 3A001.a.12 to 3A001.a.14.*

**Note 3:** *The status of wafers (finished or unfinished), in which the function has been determined, is to be evaluated against the parameters of 3A001.a, 3A001.b, 3A001.d, 3A001.e.4, 3A001.g, 3A001.h, or 3A001.i.*

**\*\*3A001** Electronic items as follows (see List of Items Controlled).

**Reason for Control:** NS, RS, MT, NP, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
------------	---

NS applies to “Monolithic Microwave Integrated Circuit” (“MMIC”) amplifiers in 3A001.b.2 and discrete microwave transistors in 3A001.b.3, except those 3A001.b.2 and b.3 items being exported or reexported for use in civil telecommunications applications	NS Column 1
NS applies to entire entry	NS Column 2
RS applies “Monolithic Microwave Integrated Circuit” (“MMIC”) amplifiers in 3A001.b.2 and discrete microwave transistors in 3A001.b.3, except those 3A001.b.2 and b.3 items being exported or reexported for use in civil telecommunications applications	RS Column 1
MT applies to 3A001.a.1.a when usable in “missiles”; and to 3A001.a.5.a when “designed or modified” for military use, hermetically sealed and rated for operation in the temperature range from below -54°C to above +125°C	MT Column 1
NP applies to pulse discharge capacitors	NP Column 1

<p>in 3A001.e.2 and superconducting solenoidal electromagnets in 3A001.e.3 that meet or exceed the technical parameters in 3A201.a and 3A201.b, respectively</p>	
<p>AT applies to entire entry</p>	<p>AT Column 1</p>

**Reporting Requirements:** See §743.1 of the EAR for reporting requirements for exports under 3A001.b.2 or b.3 under License Exceptions, and Validated End-User authorizations.

**License Requirements Note:** See § 744.17 of the EAR for additional license requirements for microprocessors having a processing speed of 5 GFLOPS or more and an arithmetic logic unit with an access width of 32 bit or more, including those incorporating “information security” functionality, and associated “software” and “technology” for the “production” or “development” of such microprocessors.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

**LVS:** N/A for MT or NP; N/A for “Monolithic Microwave Integrated Circuit” (“MMIC”) amplifiers in 3A001.b.2 and discrete microwave transistors in 3A001.b.3, except those that are being exported or reexported for use in civil telecommunications applications

Yes for:

\$1500: 3A001.c

\$3000: 3A001.b.1, b.2 (exported or reexported for use in civil telecommunications applications), b.3 (exported or reexported for use in civil telecommunications applications), b.9, .d, .e, .f, and .g.

\$5000: 3A001.a (except a.1.a and a.5.a when controlled for MT), .b.4 to b.7, and b.12.

**GBS:** Yes for 3A001.a.1.b, a.2 to a.14 (except .a.5.a when controlled for MT), b.2 (exported or reexported for use in civil telecommunications applications), b.8 (except for “vacuum electronic devices” exceeding 18 GHz), b.9., b.10, .g, and .h, and .i.

**Special Conditions for STA**

**STA:** License Exception STA may not be used to ship any item in 3A001.b.2 or b.3, except those that are being exported or reexported for use in civil telecommunications applications, to any of the destinations listed in Country Group A:5 or A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

**Related Controls:** (1) See Category XV of the USML for certain “space-qualified” electronics and Category XI of the USML for certain ASICs, ‘transmit/receive modules,’ or ‘transmit modules’ “subject to the ITAR” (see 22 CFR parts 120 through 130). (2) See also [3A101](#), [3A201](#), [3A611](#), [3A991](#), and 9A515.

**Related Definitions:** ‘Microcircuit’ means a device in which a number of passive or active elements are considered as indivisibly associated on or within a continuous structure to perform the function of a circuit. For the purposes of integrated circuits in 3A001.a.1,  $5 \times 10^3 \text{ Gy(Si)} = 5 \times 10^5 \text{ Rads (Si)}$ ;  $5 \times 10^6 \text{ Gy (Si)/s} = 5 \times 10^8 \text{ Rads (Si)/s}$ .

**Items:**

a. General purpose integrated circuits, as follows:

**Note 1:** *Integrated circuits include the following types:*

- “Monolithic integrated circuits”;
- “Hybrid integrated circuits”;
- “Multichip integrated circuits”;
- Film type integrated circuits, including silicon-on-sapphire integrated circuits”;
- “Optical integrated circuits”;
- “Three dimensional integrated circuits”;
- “Monolithic Microwave Integrated Circuits” (“MMICs”).

a.1. Integrated circuits designed or rated as radiation hardened to withstand any of the following:

a.1.a. A total dose of  $5 \times 10^3$  Gy (Si), or higher;

a.1.b. A dose rate upset of  $5 \times 10^6$  Gy (Si)/s, or higher; *or*

a.1.c. A fluence (integrated flux) of neutrons (1 MeV equivalent) of  $5 \times 10^{13}$  n/cm<sup>2</sup> or higher on silicon, or its equivalent for other materials;

**Note:** 3A001.a.1.c does not apply to Metal Insulator Semiconductors (MIS).

a.2. “Microprocessor microcircuits,” “microcomputer microcircuits,” microcontroller microcircuits, storage integrated circuits manufactured from a compound semiconductor, analog-to-digital converters, integrated circuits that contain analog-to-digital converters and store or process the digitized data, digital-to-analog converters, electro-optical or “optical integrated circuits” designed for “signal processing”, field programmable logic devices, custom integrated circuits for which either the function is unknown or the control status of the equipment in which the integrated circuit will be used is unknown, Fast Fourier Transform (FFT) processors, Static Random-Access Memories (SRAMs), or ‘non-volatile memories,’ having any of the following:

**Technical Note:** ‘Non-volatile memories’ are memories with data retention over a period of time after a power shutdown.

a.2.a. Rated for operation at an ambient temperature above 398 K (+125°C);

a.2.b. Rated for operation at an ambient temperature below 218 K (-55°C); *or*

a.2.c. Rated for operation over the entire ambient temperature range from 218 K (-55°C) to 398 K (+125°C);

**Note:** 3A001.a.2 does not apply to integrated circuits designed for civil automobile or railway train applications.

a.3. “Microprocessor microcircuits”, “microcomputer microcircuits” and microcontroller microcircuits, manufactured from a compound semiconductor and operating at a clock frequency exceeding 40 MHz;

**Note:** 3A001.a.3 includes digital signal processors, digital array processors and digital coprocessors.

a.4. [Reserved]

a.5. Analog-to-Digital Converter (ADC) and Digital-to-Analog Converter (DAC) integrated circuits, as follows:

a.5.a. ADCs having any of the following:

a.5.a.1. A resolution of 8 bit or more, but less than 10 bit, with a “sample rate” greater than 1.3 Giga Samples Per Second (GSPS);

a.5.a.2. A resolution of 10 bit or more, but less than 12 bit, with a “sample rate” greater than 600 Mega Samples Per Second (MSPS);

a.5.a.3. A resolution of 12 bit or more, but less than 14 bit, with a “sample rate” greater than 400 MSPS;

a.5.a.4. A resolution of 14 bit or more, but less than 16 bit, with a “sample rate” greater than 250 MSPS; *or*

a.5.a.5. A resolution of 16 bit or more with a “sample rate” greater than 65 MSPS;

*N.B.: For integrated circuits that contain analog-to-digital converters and store or process the digitized data see 3A001.a.14.*

**Technical Notes:**

1. A resolution of  $n$  bit corresponds to a quantization of  $2^n$  levels.

2. The resolution of the ADC is the number of bits of the digital output that represents the measured analog input. Effective Number of Bits (ENOB) is not used to determine the resolution of the ADC.

3. For “multiple channel ADCs”, the “sample rate” is not aggregated and the “sample rate” is the maximum rate of any single channel.

4. For “interleaved ADCs” or for “multiple channel ADCs” that are specified to have an interleaved mode of operation, the “sample rates” are aggregated and the “sample rate” is the maximum combined total rate of all of the interleaved channels.

a.5.b. Digital-to-Analog Converters (DAC) having any of the following:

a.5.b.1. A resolution of 10-bit or more but less than 12-bit, with an ‘adjusted update rate’ of exceeding 3,500 MSPS; or

a.5.b.2. A resolution of 12-bit or more and having any of the following:

a.5.b.2.a. An ‘adjusted update rate’ exceeding 1,250 MSPS but not exceeding 3,500 MSPS, and having any of the following:

a.5.b.2.a.1. A settling time less than 9 ns to arrive at or within 0.024 % of full scale from a full scale step; or

a.5.b.2.a.2. A ‘Spurious Free Dynamic Range’ (SFDR) greater than 68 dBc (carrier) when synthesizing a full scale analog signal of 100 MHz or the highest full scale analog signal frequency specified below 100 MHz; or

a.5.b.2.b. An ‘adjusted update rate’ exceeding 3,500 MSPS;

**Technical Notes:**

1. ‘Spurious Free Dynamic Range’ (SFDR) is defined as the ratio of the RMS value of the carrier frequency (maximum signal component) at the input of the DAC to the RMS value of the next largest noise or harmonic distortion component at its output.

2. SFDR is determined directly from the specification table or from the characterization plots of SFDR versus frequency.

3. A signal is defined to be full scale when its amplitude is greater than -3 dBfs (full scale).

4. ‘Adjusted update rate’ for DACs is:

a. For conventional (non-interpolating) DACs, the ‘adjusted update rate’ is the rate at which the digital signal is converted to an analog signal and the output analog values are changed by the DAC. For DACs where the interpolation mode may be bypassed (interpolation factor of one), the DAC should be considered as a conventional (non-interpolating) DAC.

b. For interpolating DACs (oversampling DACs), the ‘adjusted update rate’ is defined as the DAC update rate divided by the smallest interpolating factor. For interpolating DACs, the ‘adjusted update rate’ may be referred to by different terms including:

- input data rate
- input word rate
- input sample rate
- maximum total input bus rate
- maximum DAC clock rate for DAC clock input.

a.6. Electro-optical and “optical integrated circuits”, designed for “signal processing” and having all of the following:

a.6.a. One or more than one internal “laser” diode;

a.6.b. One or more than one internal light detecting element; *and*

a.6.c. Optical waveguides;

a.7. ‘Field programmable logic devices’ having any of the following:

a.7.a. A maximum number of single-ended digital input/outputs of greater than 700; *or*

a.7.b. An ‘aggregate one-way peak serial transceiver data rate’ of 500 Gb/s or greater;

**Note:** 3A001.a.7 includes:

-Complex Programmable Logic Devices (CPLDs);

-Field Programmable Gate Arrays (FPGAs);

-Field Programmable Logic Arrays (FPLAs);

-Field Programmable Interconnects (FPICs).

**N.B.:** For integrated circuits having field programmable logic devices that are combined with an analog-to-digital converter, see 3A001.a.14.

**Technical Notes:**

1. Maximum number of digital input/outputs in 3A001.a.7.a is also referred to as maximum user input/outputs or maximum available input/outputs, whether the integrated circuit is packaged or bare die.

2. ‘Aggregate one-way peak serial transceiver data rate’ is the product of the peak

*serial one-way transceiver data rate times the number of transceivers on the FPGA.*

a.8. [Reserved]

a.9. Neural network integrated circuits;

a.10. Custom integrated circuits for which the function is unknown, or the control status of the equipment in which the integrated circuits will be used is unknown to the manufacturer, having any of the following:

a.10.a. More than 1,500 terminals;

a.10.b. A typical “basic gate propagation delay time” of less than 0.02 ns; *or*

a.10.c. An operating frequency exceeding 3 GHz;

a.11. Digital integrated circuits, other than those described in 3A001.a.3 to 3A001.a.10 and 3A001.a.12, based upon any compound semiconductor and having any of the following:

a.11.a. An equivalent gate count of more than 3,000 (2 input gates); *or*

a.11.b. A toggle frequency exceeding 1.2 GHz;

a.12. Fast Fourier Transform (FFT) processors having a rated execution time for an N-point complex FFT of less than  $(N \log_2 N)/20,480$  ms, where N is the number of points;

**Technical Note:** When N is equal to 1,024 points, the formula in 3A001.a.12 gives an execution time of 500  $\mu$ s.

a.13. Direct Digital Synthesizer (DDS) integrated circuits having any of the following:

a.13.a. A Digital-to-Analog Converter (DAC) clock frequency of 3.5 GHz or more and a DAC resolution of 10 bit or more, but less than 12 bit; *or*

a.13.b. A DAC clock frequency of 1.25 GHz or more and a DAC resolution of 12 bit or more;

**Technical Note:** *The DAC clock frequency may be specified as the master clock frequency or the input clock frequency.*

a.14. Integrated circuits that perform or are programmable to perform all of the following:

a.14.a. Analog-to-digital conversions meeting any of the following:

a.14.a.1. A resolution of 8 bit or more, but less than 10 bit, with a “sample rate” greater than 1.3 Giga Samples Per Second (GSPS);

a.14.a.2. A resolution of 10 bit or more, but less than 12 bit, with a “sample rate” greater than 1.0 GSPS;

a.14.a.3. A resolution of 12 bit or more, but less than 14 bit, with a “sample rate” greater than 1.0 GSPS;

a.14.a.4. A resolution of 14 bit or more, but less than 16 bit, with a “sample rate” greater than 400 Mega Samples Per Second (MSPS); *or*

a.14.a.5. A resolution of 16 bit or more with a “sample rate” greater than 180 MSPS; *and*

a.14.b. Any of the following:

a.14.b.1. Storage of digitized data; *or*

a.14.b.2. Processing of digitized data;

**N.B. 1:** *For analog-to-digital converter integrated circuits see 3A001.a.5.a.*

**N.B. 2:** *For field programmable logic devices see 3A001.a.7.*

**Technical Notes:**

1. *A resolution of  $n$  bit corresponds to a quantization of  $2^n$  levels.*

2. *The resolution of the ADC is the number of bits of the digital output of the ADC that represents the measured analog input. Effective Number of Bits (ENOB) is not used to determine the resolution of the ADC.*

3. *For integrated circuits with non-interleaving “multiple channel ADCs”, the “sample rate” is not aggregated and the “sample rate” is the maximum rate of any single channel.*

4. *For integrated circuits with “interleaved ADCs” or with “multiple channel ADCs” that are specified to have an interleaved mode of operation, the “sample rates” are aggregated and the “sample rate” is the maximum combined total rate of all of the interleaved channels.*

b. Microwave or millimeter wave items, as follows:

**Technical Note:** *For purposes of 3A001.b, the parameter peak saturated power output may also be referred to on product data sheets as output power, saturated power output, maximum power output, peak power output, or peak envelope power output.*

b.1. “Vacuum electronic devices” and cathodes, as follows:

**Note 1:** *3A001.b.1 does not control “vacuum electronic devices” designed or rated for operation in any frequency band and having all of the following:*

*a. Does not exceed 31.8 GHz; and*

*b. Is “allocated by the ITU” for radio-communications services, but not for radio-determination.*

**Note 2:** 3A001.b.1 does not control non-“space-qualified” “vacuum electronic devices” having all the following:

a. An average output power equal to or less than 50 W; and

b. Designed or rated for operation in any frequency band and having all of the following:

1. Exceeds 31.8 GHz but does not exceed 43.5 GHz; and

2. Is “allocated by the ITU” for radio-communications services, but not for radio-determination.

b.1.a. Traveling-wave “vacuum electronic devices,” pulsed or continuous wave, as follows:

b.1.a.1. Devices operating at frequencies exceeding 31.8 GHz;

b.1.a.2. Devices having a cathode heater with a turn on time to rated RF power of less than 3 seconds;

b.1.a.3. Coupled cavity devices, or derivatives thereof, with a “fractional bandwidth” of more than 7% or a peak power exceeding 2.5 kW;

b.1.a.4. Devices based on helix, folded waveguide, or serpentine waveguide circuits, or derivatives thereof, having any of the following:

b.1.a.4.a. An “instantaneous bandwidth” of more than one octave, and average power (expressed in kW) times frequency (expressed in GHz) of more than 0.5;

b.1.a.4.b. An “instantaneous bandwidth” of one octave or less, and average power (expressed in kW) times frequency (expressed in GHz) of more than 1;

b.1.a.4.c. Being “space-qualified”; *or*

b.1.a.4.d. Having a gridded electron gun;

b.1.a.5. Devices with a “fractional bandwidth” greater than or equal to 10%, with any of the following:

b.1.a.5.a. An annular electron beam;

b.1.a.5.b. A non-axisymmetric electron beam; *or*

b.1.a.5.c. Multiple electron beams;

b.1.b. Crossed-field amplifier “vacuum electronic devices” with a gain of more than 17 dB;

b.1.c. Thermionic cathodes, designed for “vacuum electronic devices,” producing an emission current density at rated operating conditions exceeding 5 A/cm<sup>2</sup> or a pulsed (non-continuous) current density at rated operating conditions exceeding 10 A/cm<sup>2</sup>;

b.1.d. “Vacuum electronic devices” with the capability to operate in a ‘dual mode.’

**Technical Note:** ‘Dual mode’ means the “vacuum electronic device” beam current can be intentionally changed between continuous-wave and pulsed mode operation by use of a grid and produces a peak pulse output power greater than the continuous-wave output power.

b.2. “Monolithic Microwave Integrated Circuit” (“MMIC”) amplifiers that are any of the following:

**N.B.:** For “MMIC” amplifiers that have an integrated phase shifter see 3A001.b.12.

b.2.a. Rated for operation at frequencies exceeding 2.7 GHz up to and including 6.8 GHz with a “fractional bandwidth” greater than 15%, and having any of the following:

b.2.a.1. A peak saturated power output greater than 75 W (48.75 dBm) at any frequency exceeding 2.7 GHz up to and including 2.9 GHz;

b.2.a.2. A peak saturated power output greater than 55 W (47.4 dBm) at any frequency exceeding 2.9 GHz up to and including 3.2 GHz;

b.2.a.3. A peak saturated power output greater than 40 W (46 dBm) at any frequency exceeding 3.2 GHz up to and including 3.7 GHz;  
*or*

b.2.a.4. A peak saturated power output greater than 20 W (43 dBm) at any frequency exceeding 3.7 GHz up to and including 6.8 GHz;

b.2.b. Rated for operation at frequencies exceeding 6.8 GHz up to and including 16 GHz with a “fractional bandwidth” greater than 10%, and having any of the following:

b.2.b.1. A peak saturated power output greater than 10 W (40 dBm) at any frequency exceeding 6.8 GHz up to and including 8.5 GHz;  
*or*

b.2.b.2. A peak saturated power output greater than 5 W (37 dBm) at any frequency exceeding 8.5 GHz up to and including 16 GHz;

b.2.c. Rated for operation with a peak saturated power output greater than 3 W (34.77 dBm) at any frequency exceeding 16 GHz up to and including 31.8 GHz, and with a “fractional bandwidth” of greater than 10%;

b.2.d. Rated for operation with a peak saturated power output greater than 0.1 nW (-70 dBm) at any frequency exceeding 31.8 GHz up to and including 37 GHz;

b.2.e. Rated for operation with a peak saturated power output greater than 1 W (30 dBm) at any frequency exceeding 37 GHz up to and including 43.5 GHz, and with a “fractional bandwidth” of greater than 10%;

b.2.f. Rated for operation with a peak saturated power output greater than 31.62 mW (15 dBm) at any frequency exceeding 43.5 GHz up to and including 75 GHz, and with a “fractional bandwidth” of greater than 10%;

b.2.g. Rated for operation with a peak saturated power output greater than 10 mW (10 dBm) at any frequency exceeding 75 GHz up to and including 90 GHz, and with a “fractional bandwidth” of greater than 5%; *or*

b.2.h. Rated for operation with a peak saturated power output greater than 0.1 nW (-70 dBm) at any frequency exceeding 90 GHz;

**Note 1:** *[Reserved]*

**Note 2:** *The control status of the “MMIC” whose rated operating frequency includes frequencies listed in more than one frequency range, as defined by 3A001.b.2.a through 3A001.b.2.h, is determined by the lowest peak saturated power output control threshold.*

**Note 3:** *Notes 1 and 2 following the Category 3 heading for product group A. Systems, Equipment, and Components mean that 3A001.b.2 does not control “MMICs” if they are “specially designed” for other applications, e.g., telecommunications, radar, automobiles.*

b.3. Discrete microwave transistors that are any of the following:

b.3.a. Rated for operation at frequencies exceeding 2.7 GHz up to and including 6.8 GHz and having any of the following:

b.3.a.1. A peak saturated power output greater than 400 W (56 dBm) at any frequency exceeding 2.7 GHz up to and including 2.9 GHz;

b.3.a.2. A peak saturated power output greater than 205 W (53.12 dBm) at any frequency exceeding 2.9 GHz up to and including 3.2 GHz;

b.3.a.3. A peak saturated power output greater than 115 W (50.61 dBm ) at any frequency exceeding 3.2 GHz up to and including 3.7 GHz; *or*

b.3.a.4. A peak saturated power output greater than 60 W (47.78 dBm) at any frequency exceeding 3.7 GHz up to and including 6.8 GHz;

b.3.b. Rated for operation at frequencies exceeding 6.8 GHz up to and including 31.8 GHz and having any of the following:

b.3.b.1. A peak saturated power output greater than 50 W (47 dBm) at any frequency exceeding 6.8 GHz up to and including 8.5 GHz;

b.3.b.2. A peak saturated power output greater than 15 W (41.76 dBm) at any frequency exceeding 8.5 GHz up to and including 12 GHz;

b.3.b.3. A peak saturated power output greater than 40 W (46 dBm) at any frequency exceeding 12 GHz up to and including 16 GHz; *or*

b.3.b.4. A peak saturated power output greater than 7 W (38.45 dBm) at any frequency exceeding 16 GHz up to and including 31.8 GHz;

b.3.c. Rated for operation with a peak saturated power output greater than 0.5 W (27 dBm) at any frequency exceeding 31.8 GHz up to and including 37 GHz;

b.3.d. Rated for operation with a peak saturated power output greater than 1 W (30 dBm) at any frequency exceeding 37 GHz up to and including 43.5 GHz;

b.3.e. Rated for operation with a peak saturated power output greater than 0.1 nW (-70 dBm) at any frequency exceeding 43.5 GHz; *or*

b.3.f. Other than those specified by 3A001.b.3.a to 3A001.b.3.e and rated for operation with a peak saturated power output

greater than 5 W (37.0 dBm) at all frequencies exceeding 8.5 GHz up to and including 31.8 GHz;

**Note 1:** *The control status of a transistor in 3A001.b.3.a through 3A001.b.3.e, whose rated operating frequency includes frequencies listed in more than one frequency range, as defined by 3A001.b.3.a through 3A001.b.3.e, is determined by the lowest peak saturated power output control threshold.*

**Note 2:** *3A001.b.3 includes bare dice, dice mounted on carriers, or dice mounted in packages. Some discrete transistors may also be referred to as power amplifiers, but the status of these discrete transistors is determined by 3A001.b.3.*

b.4. Microwave solid state amplifiers and microwave assemblies/modules containing microwave solid state amplifiers, that are any of the following:

b.4.a. Rated for operation at frequencies exceeding 2.7 GHz up to and including 6.8 GHz with a “fractional bandwidth” greater than 15%, and having any of the following:

b.4.a.1. A peak saturated power output greater than 500 W (57 dBm) at any frequency exceeding 2.7 GHz up to and including 2.9 GHz;

b.4.a.2. A peak saturated power output greater than 270 W (54.3 dBm) at any frequency exceeding 2.9 GHz up to and including 3.2 GHz;

b.4.a.3. A peak saturated power output greater than 200 W (53 dBm) at any frequency exceeding 3.2 GHz up to and including 3.7 GHz; *or*

b.4.a.4. A peak saturated power output greater than 90 W (49.54 dBm) at any frequency exceeding 3.7 GHz up to and including 6.8 GHz;

b.4.b. Rated for operation at frequencies exceeding 6.8 GHz up to and including 31.8 GHz with a “fractional

bandwidth” greater than 10%, and having any of the following:

b.4.b.1. A peak saturated power output greater than 70 W (48.54 dBm) at any frequency exceeding 6.8 GHz up to and including 8.5 GHz;

b.4.b.2. A peak saturated power output greater than 50 W (47 dBm) at any frequency exceeding 8.5 GHz up to and including 12 GHz;

b.4.b.3. A peak saturated power output greater than 30 W (44.77 dBm) at any frequency exceeding 12 GHz up to and including 16 GHz;  
*or*

b.4.b.4. A peak saturated power output greater than 20 W (43 dBm) at any frequency exceeding 16 GHz up to and including 31.8 GHz;

b.4.c. Rated for operation with a peak saturated power output greater than 0.5 W (27 dBm) at any frequency exceeding 31.8 GHz up to and including 37 GHz;

b.4.d. Rated for operation with a peak saturated power output greater than 2 W (33 dBm) at any frequency exceeding 37 GHz up to and including 43.5 GHz, and with a “fractional bandwidth” of greater than 10%;

b.4.e. Rated for operation at frequencies exceeding 43.5 GHz and having any of the following:

b.4.e.1. A peak saturated power output greater than 0.2 W (23 dBm) at any frequency exceeding 43.5 GHz up to and including 75 GHz, and with a “fractional bandwidth” of greater than 10%;

b.4.e.2. A peak saturated power output greater than 20 mW (13 dBm) at any frequency exceeding 75 GHz up to and including 90 GHz, and with a “fractional bandwidth” of greater than 5%; *or*

b.4.e.3. A peak saturated power output greater than 0.1 nW (-70 dBm) at any frequency exceeding 90 GHz; *or*

b.4.f. [Reserved]

***N.B.:***

1. For “*MMIC*” *amplifiers* see 3A001.b.2.

2. For ‘*transmit/receive modules*’ and ‘*transmit modules*’ see 3A001.b.12.

3. For *converters and harmonic mixers, designed to extend the operating or frequency range of signal analyzers, signal generators, network analyzers or microwave test receivers, see 3A001.b.7.*

***Note 1:*** [Reserved]

***Note 2:*** *The control status of an item whose rated operating frequency includes frequencies listed in more than one frequency range, as defined by 3A001.b.4.a through 3A001.b.4.e, is determined by the lowest peak saturated power output control threshold.*

b.5. Electronically or magnetically tunable band-pass or band-stop filters, having more than 5 tunable resonators capable of tuning across a 1.5:1 frequency band ( $f_{\max}/f_{\min}$ ) in less than 10  $\mu$ s and having any of the following:

b.5.a. A band-pass bandwidth of more than 0.5% of center frequency; *or*

b.5.b. A band-stop bandwidth of less than 0.5% of center frequency;

b.6. [Reserved]

b.7. Converters and harmonic mixers, that are any of the following:

b.7.a. Designed to extend the frequency range of “*signal analyzers*” beyond 90 GHz;

b.7.b. Designed to extend the operating range of signal generators as follows:

b.7.b.1. Beyond 90 GHz;

b.7.b.2. To an output power greater than 100 mW (20 dBm) anywhere within the frequency range exceeding 43.5 GHz but not exceeding 90 GHz;

b.7.c. Designed to extend the operating range of network analyzers as follows:

b.7.c.1. Beyond 110 GHz;

b.7.c.2. To an output power greater than 31.62 mW (15 dBm) anywhere within the frequency range exceeding 43.5 GHz but not exceeding 90 GHz;

b.7.c.3. To an output power greater than 1 mW (0 dBm) anywhere within the frequency range exceeding 90 GHz but not exceeding 110 GHz; *or*

b.7.d. Designed to extend the frequency range of microwave test receivers beyond 110 GHz;

b.8. Microwave power amplifiers containing “vacuum electronic devices” controlled by 3A001.b.1 and having all of the following:

b.8.a. Operating frequencies above 3 GHz;

b.8.b. An average output power to mass ratio exceeding 80 W/kg; *and*

b.8.c. A volume of less than 400 cm<sup>3</sup>;

**Note:** 3A001.b.8 does not control equipment designed or rated for operation in any frequency band which is “allocated by the ITU” for radio-communications services, but not for radio-determination.

b.9. Microwave Power Modules (MPM) consisting of, at least, a traveling-wave “vacuum

electronic device,” a “Monolithic Microwave Integrated Circuit” (“MMIC”) and an integrated electronic power conditioner and having all of the following:

b.9.a. A ‘turn-on time’ from off to fully operational in less than 10 seconds;

b.9.b. A volume less than the maximum rated power in Watts multiplied by 10 cm<sup>3</sup>/W; *and*

b.9.c. An “instantaneous bandwidth” greater than 1 octave ( $f_{\max} > 2f_{\min}$ ) and having any of the following:

b.9.c.1. For frequencies equal to or less than 18 GHz, an RF output power greater than 100 W; *or*

b.9.c.2. A frequency greater than 18 GHz;

**Technical Notes:**

1. To calculate the volume in 3A001.b.9.b, the following example is provided: for a maximum rated power of 20 W, the volume would be:  $20\text{ W} \times 10\text{ cm}^3/\text{W} = 200\text{ cm}^3$ .

2. The ‘turn-on time’ in 3A001.b.9.a refers to the time from fully-off to fully operational, i.e., it includes the warm-up time of the MPM.

b.10. Oscillators or oscillator assemblies, specified to operate with a single sideband (SSB) phase noise, in dBc/Hz, less (better) than  $-(126 + 20\log_{10}F - 20\log_{10}f)$  anywhere within the range of  $10\text{ Hz} \leq F \leq 10\text{ kHz}$ ;

**Technical Note:** In 3A001.b.10,  $F$  is the offset from the operating frequency in Hz and  $f$  is the operating frequency in MHz.

b.11. ‘Frequency synthesizer’ “electronic assemblies” having a “frequency switching time” as specified by any of the following:

b.11.a. Less than 143 ps;

b.11.b. Less than 100  $\mu\text{s}$  for any frequency change exceeding 2.2 GHz within the synthesized frequency range exceeding 4.8 GHz but not exceeding 31.8 GHz;

b.11.c. [Reserved]

b.11.d. Less than 500  $\mu\text{s}$  for any frequency change exceeding 550 MHz within the synthesized frequency range exceeding 31.8 GHz but not exceeding 37 GHz;

b.11.e. Less than 100  $\mu\text{s}$  for any frequency change exceeding 2.2 GHz within the synthesized frequency range exceeding 37 GHz but not exceeding 90 GHz; *or*

b.11.f. [Reserved]

b.11.g. Less than 1 ms within the synthesized frequency range exceeding 90 GHz;

**Technical Note:** A ‘frequency synthesizer’ is any kind of frequency source, regardless of the actual technique used, providing a multiplicity of simultaneous or alternative output frequencies, from one or more outputs, controlled by, derived from or disciplined by a lesser number of standard (or master) frequencies.

**N.B.:** For general purpose “signal analyzers”, signal generators, network analyzers and microwave test receivers, see 3A002.c, 3A002.d, 3A002.e and 3A002.f, respectively.

b.12. ‘Transmit/receive modules,’ ‘transmit/receive MMICs,’ ‘transmit modules,’ and ‘transmit MMICs,’ rated for operation at frequencies above 2.7 GHz and having all of the following:

b.12.a. A peak saturated power output (in watts),  $P_{\text{sat}}$ , greater than 505.62 divided by the maximum operating frequency (in GHz) squared [ $P_{\text{sat}} > 505.62 \text{ W} \cdot \text{GHz}^2 / f_{\text{GHz}}^2$ ] for any channel;

b.12.b. A “fractional bandwidth” of 5% or greater for any channel;

b.12.c. Any planar side with length  $d$  (in cm) equal to or less than 15 divided by the lowest operating frequency in GHz [ $d \leq 15 \text{ cm} \cdot \text{GHz} \cdot N / f_{\text{GHz}}$ ] where  $N$  is the number of transmit or transmit/receive channels; *and*

b.12.d. An electronically variable phase shifter per channel.

**Technical Notes:**

1. A ‘transmit/receive module’ is a multifunction “electronic assembly” that provides bi-directional amplitude and phase control for transmission and reception of signals.

2. A ‘transmit module’ is an “electronic assembly” that provides amplitude and phase control for transmission of signals.

3. A ‘transmit/receive MMIC’ is a multifunction “MMIC” that provides bi-directional amplitude and phase control for transmission and reception of signals.

4. A ‘transmit MMIC’ is a “MMIC” that provides amplitude and phase control for transmission of signals.

5. 2.7 GHz should be used as the lowest operating frequency ( $f_{\text{GHz}}$ ) in the formula in 3A001.b.12.c for transmit/receive or transmit modules that have a rated operation range extending downward to 2.7 GHz and below [ $d \leq 15 \text{ cm} \cdot \text{GHz} \cdot N / 2.7 \text{ GHz}$ ].

6. 3A001.b.12 applies to ‘transmit/receive modules’ or ‘transmit modules’ with or without a heat sink. The value of  $d$  in 3A001.b.12.c does not include any portion of the ‘transmit/receive module’ or ‘transmit module’ that functions as a heat sink.

7. ‘Transmit/receive modules’ or ‘transmit modules,’ ‘transmit/receive MMICs’ or ‘transmit MMICs’ may or may not have  $N$  integrated

*radiating antenna elements where N is the number of transmit or transmit/receive channels.*

c. Acoustic wave devices as follows and “specially designed” “components” therefor:

c.1. Surface acoustic wave and surface skimming (shallow bulk) acoustic wave devices, having any of the following:

c.1.a. A carrier frequency exceeding 6 GHz;

c.1.b. A carrier frequency exceeding 1 GHz, but not exceeding 6 GHz and having any of the following:

c.1.b.1. A ‘frequency side-lobe rejection’ exceeding 65 dB;

c.1.b.2. A product of the maximum delay time and the bandwidth (time in  $\mu\text{s}$  and bandwidth in MHz) of more than 100;

c.1.b.3. A bandwidth greater than 250 MHz;  
*or*

c.1.b.4. A dispersive delay of more than 10  $\mu\text{s}$ ; *or*

c.1.c. A carrier frequency of 1 GHz or less and having any of the following:

c.1.c.1. A product of the maximum delay time and the bandwidth (time in  $\mu\text{s}$  and bandwidth in MHz) of more than 100;

c.1.c.2. A dispersive delay of more than 10  $\mu\text{s}$ ; *or*

c.1.c.3. A ‘frequency side-lobe rejection’ exceeding 65 dB and a bandwidth greater than 100 MHz;

**Technical Note:** *‘Frequency side-lobe rejection’ is the maximum rejection value specified in data sheet.*

c.2. Bulk (volume) acoustic wave devices that permit the direct processing of signals at frequencies exceeding 6 GHz;

c.3. Acoustic-optic “signal processing” devices employing interaction between acoustic waves (bulk wave or surface wave) and light waves that permit the direct processing of signals or images, including spectral analysis, correlation or convolution;

**Note:** *3A001.c does not control acoustic wave devices that are limited to a single band pass, low pass, high pass or notch filtering, or resonating function.*

d. Electronic devices and circuits containing “components,” manufactured from “superconductive” materials, “specially designed” for operation at temperatures below the “critical temperature” of at least one of the “superconductive” constituents and having any of the following:

d.1. Current switching for digital circuits using “superconductive” gates with a product of delay time per gate (in seconds) and power dissipation per gate (in watts) of less than  $10^{-14}$  J; *or*

d.2. Frequency selection at all frequencies using resonant circuits with Q-values exceeding 10,000;

e. High energy devices as follows:

e.1. ‘Cells’ as follows:

e.1.a ‘Primary cells’ having any of the following at 20°C:

e.1.a.1. ‘Energy density’ exceeding 550 Wh/kg and a ‘continuous power density’ exceeding 50 W/kg; *or*

e.1.a.2. ‘Energy density’ exceeding 50 Wh/kg and a ‘continuous power density’ exceeding 350 W/kg;

e.1.b. ‘Secondary cells’ having an ‘energy density’ exceeding 350 Wh/kg at 20°C;

**Technical Notes:**

1. For the purpose of 3A001.e.1, ‘energy density’ (Wh/kg) is calculated from the nominal voltage multiplied by the nominal capacity in ampere-hours (Ah) divided by the mass in kilograms. If the nominal capacity is not stated, energy density is calculated from the nominal voltage squared then multiplied by the discharge duration in hours divided by the discharge load in Ohms and the mass in kilograms.

2. For the purpose of 3A001.e.1, a ‘cell’ is defined as an electrochemical device, which has positive and negative electrodes, an electrolyte, and is a source of electrical energy. It is the basic building block of a battery.

3. For the purpose of 3A001.e.1.a, a ‘primary cell’ is a ‘cell’ that is not designed to be charged by any other source.

4. For the purpose of 3A001.e.1.b, a ‘secondary cell’ is a ‘cell’ that is designed to be charged by an external electrical source.

5. For the purpose of 3A001.e.1.a, ‘continuous power density’ (W/kg) is calculated from the nominal voltage multiplied by the specified maximum continuous discharge current in ampere (A) divided by the mass in kilograms. ‘Continuous power density’ is also referred to as specific power.

**Note:** 3A001.e does not control batteries, including single-cell batteries.

e.2. High energy storage capacitors as follows:

e.2.a. Capacitors with a repetition rate of less than 10 Hz (single shot capacitors) and having all of the following:

e.2.a.1. A voltage rating equal to or more than 5 kV;

e.2.a.2. An energy density equal to or more than 250 J/kg; and

e.2.a.3. A total energy equal to or more than 25 kJ;

e.2.b. Capacitors with a repetition rate of 10 Hz or more (repetition rated capacitors) and having all of the following:

e.2.b.1. A voltage rating equal to or more than 5 kV;

e.2.b.2. An energy density equal to or more than 50 J/kg;

e.2.b.3. A total energy equal to or more than 100 J; and

e.2.b.4. A charge/discharge cycle life equal to or more than 10,000;

e.3. “Superconductive” electromagnets and solenoids, “specially designed” to be fully charged or discharged in less than one second and having all of the following:

**Note:** 3A001.e.3 does not control “superconductive” electromagnets or solenoids “specially designed” for Magnetic Resonance Imaging (MRI) medical equipment.

e.3.a. Energy delivered during the discharge exceeding 10 kJ in the first second;

e.3.b. Inner diameter of the current carrying windings of more than 250 mm; and

e.3.c. Rated for a magnetic induction of more than 8 T or “overall current density” in the winding of more than 300 A/mm<sup>2</sup>;

**e.4. Solar cells, cell-interconnect-coverglass (CIC) assemblies, solar panels, and solar arrays, which are “space-qualified,” having a minimum average efficiency exceeding 20% at an operating temperature of 301 K (28°C) under simulated**

'AMO' illumination with an irradiance of 1,367 Watts per square meter ( $W/m^2$ );

**Technical Note:** 'AMO', or 'Air Mass Zero', refers to the spectral irradiance of sun light in the earth's outer atmosphere when the distance between the earth and sun is one astronomical unit (AU).

f. Rotary input type absolute position encoders having an "accuracy" equal to or less (better) than 1.0 second of arc and "specially designed" encoder rings, discs or scales therefor;

g. Solid-state pulsed power switching thyristor devices and 'thyristor modules', using either electrically, optically, or electron radiation controlled switch methods and having any of the following:

g.1. A maximum turn-on current rate of rise ( $di/dt$ ) greater than 30,000 A/ $\mu s$  and off-state voltage greater than 1,100 V; *or*

g.2. A maximum turn-on current rate of rise ( $di/dt$ ) greater than 2,000 A/ $\mu s$  and having all of the following:

g.2.a. An off-state peak voltage equal to or greater than 3,000 V; *and*

g.2.b. A peak (surge) current equal to or greater than 3,000 A;

**Note 1:** 3A001.g. includes:

- Silicon Controlled Rectifiers (SCRs)
- Electrical Triggering Thyristors (ETTs)
- Light Triggering Thyristors (LTTs)
- Integrated Gate Commutated Thyristors (IGCTs)
- Gate Turn-off Thyristors (GTOs)
- MOS Controlled Thyristors (MCTs)

Note: See definition of "AMO".

- Solidtrons

**Note 2:** 3A001.g does not control thyristor devices and 'thyristor modules' incorporated into equipment designed for civil railway or "civil aircraft" applications.

**Technical Note:** For the purposes of 3A001.g, a 'thyristor module' contains one or more thyristor devices.

h. Solid-state power semiconductor switches, diodes, or 'modules', having all of the following:

h.1. Rated for a maximum operating junction temperature greater than 488 K (215°C);

h.2. Repetitive peak off-state voltage (blocking voltage) exceeding 300 V; *and*

h.3. Continuous current greater than 1 A.

**Technical Note:** For the purposes of 3A001.h, 'modules' contain one or more solid-state power semiconductor switches or diodes.

**Note 1:** Repetitive peak off-state voltage in 3A001.h includes drain to source voltage, collector to emitter voltage, repetitive peak reverse voltage and peak repetitive off-state blocking voltage.

**Note 2:** 3A001.h includes:

- Junction Field Effect Transistors (JFETs)
- Vertical Junction Field Effect Transistors (VJFETs)
- Metal Oxide Semiconductor Field Effect Transistors (MOSFETs)
- Double Diffused Metal Oxide Semiconductor Field Effect Transistor (DMOSFET)
- Insulated Gate Bipolar Transistor (IGBT)

- High Electron Mobility Transistors (HEMTs)
- Bipolar Junction Transistors (BJTs)
- Thyristors and Silicon Controlled Rectifiers (SCRs)
- Gate Turn-Off Thyristors (GTOs)
- Emitter Turn-Off Thyristors (ETOs)
- PiN Diodes
- Schottky Diodes

**Note 3:** 3A001.h does not apply to switches, diodes, or ‘modules’, incorporated into equipment designed for civil automobile, civil railway, or “civil aircraft” applications.

i. Intensity, amplitude, or phase electro-optic modulators, designed for analog signals and having any of the following:

i.1. A maximum operating frequency of more than 10 GHz but less than 20 GHz, an optical insertion loss equal to or less than 3 dB and having any of the following:

i.1.a. A ‘half-wave voltage’ ( $V\pi$ ) less than 2.7 V when measured at a frequency of 1 GHz or below; or

i.1.b. A  $V\pi$  of less than 4 V when measured at a frequency of more than 1 GHz; or

i.2. A maximum operating frequency equal to or greater than 20 GHz, an optical insertion loss equal to or less than 3 dB and having any of the following:

i.2.a. A  $V\pi$  less than 3.3 V when measured at a frequency of 1 GHz or below; or

i.2.b. A  $V\pi$  less than 5 V when measured at a frequency of more than 1 GHz.

**Note:** 3A001.i includes electro-optic modulators having optical input and output connectors (e.g., fiber-optic pigtails).

**Technical Note:** For the purposes of 3A001.i, a ‘half-wave voltage’ ( $V\pi$ ) is the applied voltage necessary to make a phase change of 180 degrees in the wavelength of light propagating through the optical modulator.

**\*\*3A002** General purpose “electronic assemblies,” modules and equipment, as follows (see List of Items Controlled).

**License Requirements**

**Reason for Control:** NS, MT, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 2
MT applies to 3A002.h when the parameters in 3A101.a.2.b are met or exceeded	MT Column 1
AT applies to entire entry	AT Column 1

**Reporting Requirements:** See §743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

- LVS: \$3000: 3A002.a, .e, .f, and .g  
\$5000: 3A002.c to .d, and .h (unless controlled for MT);
- GBS: Yes, for 3A002.h (unless controlled for MT)

**Special Conditions for STA**

STA: License Exception STA may not be used to ship any item in 3A002.g.1 to any of the destinations listed in Country

Group A:6 (See Supplement No.1 to part 740 of the EAR).

### List of Items Controlled

*Related Controls:* See Category XV(e)(9) of the USML for certain “space-qualified” atomic frequency standards “subject to the ITAR” (see 22 CFR parts 120 through 130). See also [3A101](#), [3A992](#) and 9A515.x.

*Related Definitions:* Constant percentage bandwidth filters are also known as octave or fractional octave filters.

*Items:*

a. Recording equipment and oscilloscopes, as follows:

a.1. to a.5. [Reserved]

**N.B.:** For waveform digitizers and transient recorders, see 3A002.h.

a.6. Digital data recorders having all of the following:

a.6.a. A sustained ‘continuous throughput’ of more than 6.4 Gbit/s to disk or solid-state drive memory; *and*

a.6.b. “Signal processing” of the radio frequency signal data while it is being recorded;

#### **Technical Notes:**

1. For recorders with a parallel bus architecture, the ‘continuous throughput’ rate is the highest word rate multiplied by the number of bits in a word.

2. ‘Continuous throughput’ is the fastest data rate the instrument can record to disk or solid-state drive memory without the loss of any information while sustaining the input digital data rate or digitizer conversion rate.

a.7. Real-time oscilloscopes having a vertical root-mean-square (rms) noise voltage of less than 2% of full-scale at the vertical scale setting that provides the lowest noise value for any input 3dB bandwidth of 60 GHz or greater per channel;

*Note:* 3A002.a.7 does not apply to equivalent-time sampling oscilloscopes.

b. [Reserved]

c. “Signal analyzers” as follows:

c.1. “Signal analyzers” having a 3 dB resolution bandwidth (RBW) exceeding 40 MHz anywhere within the frequency range exceeding 31.8 GHz but not exceeding 37 GHz;

c.2. “Signal analyzers” having Displayed Average Noise Level (DANL) less (better) than -150 dBm/Hz anywhere within the frequency range exceeding 43.5 GHz but not exceeding 90 GHz;

c.3. “Signal analyzers” having a frequency exceeding 90 GHz;

c.4. “Signal analyzers” having all of the following:

c.4.a. ‘Real-time bandwidth’ exceeding 170 MHz; *and*

c.4.b. Having any of the following:

c.4.b.1. 100% probability of discovery, with less than a 3 dB reduction from full amplitude due to gaps or windowing effects, of signals having a duration of 15 μs or less; *or*

c.4.b.2. A ‘frequency mask trigger’ function, with 100% probability of trigger (capture) for signals having a duration of 15 μs or less;

#### **Technical Notes:**

1. ‘Real-time bandwidth’ is the widest

*frequency range for which the analyzer can continuously transform time-domain data entirely into frequency-domain results, using a Fourier or other discrete time transform that processes every incoming time point, without a reduction of measured amplitude of more than 3 dB below the actual signal amplitude caused by gaps or windowing effects, while outputting or displaying the transformed data.*

*2. Probability of discovery in 3A002.c.4.b.1 is also referred to as probability of intercept or probability of capture.*

*3. For the purposes of 3A002.c.4.b.1, the duration for 100% probability of discovery is equivalent to the minimum signal duration necessary for the specified level measurement uncertainty.*

*4. A 'frequency mask trigger' is a mechanism where the trigger function is able to select a frequency range to be triggered on as a subset of the acquisition bandwidth while ignoring other signals that may also be present within the same acquisition bandwidth. A 'frequency mask trigger' may contain more than one independent set of limits.*

*Note: 3A002.c.4 does not apply to those "signal analyzers" using only constant percentage bandwidth filters (also known as octave or fractional octave filters).*

c.5. [Reserved]

d. Signal generators having any of the following:

d.1. Specified to generate pulse-modulated signals having all of the following, anywhere within the frequency range exceeding 31.8 GHz but not exceeding 37 GHz:

d.1.a. 'Pulse duration' of less than 25 ns;  
and

d.1.b. On/off ratio equal to or exceeding 65 dB;

d.2. An output power exceeding 100 mW (20 dBm) anywhere within the frequency range exceeding 43.5 GHz but not exceeding 90 GHz;

d.3. A "frequency switching time" as specified by any of the following:

d.3.a. [Reserved]

d.3.b. Less than 100  $\mu$ s for any frequency change exceeding 2.2 GHz within the frequency range exceeding 4.8 GHz but not exceeding 31.8 GHz;

d.3.c. [Reserved]

d.3.d. Less than 500  $\mu$ s for any frequency change exceeding 550 MHz within the frequency range exceeding 31.8 GHz but not exceeding 37 GHz; or

d.3.e. Less than 100  $\mu$ s for any frequency change exceeding 2.2 GHz within the frequency range exceeding 37 GHz but not exceeding 90 GHz;

d.3.f. [Reserved]

d.4. Single sideband (SSB) phase noise, in dBc/Hz, specified as being any of the following:

d.4.a. Less (better) than  $-(126 + 20 \log_{10} F - 20 \log_{10} f)$  for anywhere within the range of 10 Hz  $\leq F \leq$  10 kHz anywhere within the frequency range exceeding 3.2 GHz but not exceeding 90 GHz; or

d.4.b. Less (better) than  $-(206 - 20 \log_{10} f)$  for anywhere within the range of 10 kHz  $< F \leq$  100 kHz anywhere within the frequency range exceeding 3.2 GHz but not exceeding 90 GHz;

**Technical Note:** In 3A002.d.4,  $F$  is the offset from the operating frequency in Hz and  $f$  is the operating frequency in MHz.

d.5. An 'RF modulation bandwidth' of digital

baseband signals as specified by any of the following:

d.5.a. Exceeding 2.2 GHz within the frequency range exceeding 4.8 GHz but not exceeding 31.8 GHz;

d.5.b. Exceeding 550 MHz within the frequency range exceeding 31.8 GHz but not exceeding 37 GHz; *or*

d.5.c. Exceeding 2.2 GHz within the frequency range exceeding 37 GHz but not exceeding 90 GHz; *or*

**Technical Note:** ‘RF modulation bandwidth’ is the Radio Frequency (RF) bandwidth occupied by a digitally encoded baseband signal modulated onto an RF signal. It is also referred to as information bandwidth or vector modulation bandwidth. I/Q digital modulation is the technical method for producing a vector-modulated RF output signal, and that output signal is typically specified as having an ‘RF modulation bandwidth’.

d.6. A maximum frequency exceeding 90 GHz;

**Note 1:** For the purpose of 3A002.d, signal generators include arbitrary waveform and function generators.

**Note 2:** 3A002.d does not control equipment in which the output frequency is either produced by the addition or subtraction of two or more crystal oscillator frequencies, or by an addition or subtraction followed by a multiplication of the result.

**Technical Notes:**

1. The maximum frequency of an arbitrary waveform or function generator is calculated by dividing the sample rate, in samples/second, by a factor of 2.5.

2. For the purposes of 3A002.d.1.a, ‘pulse duration’ is defined as the time interval from the

point on the leading edge that is 50% of the pulse amplitude to the point on the trailing edge that is 50% of the pulse amplitude.

e. Network analyzers having any of the following:

e.1. An output power exceeding 31.62 mW (15 dBm) anywhere within the operating frequency range exceeding 43.5 GHz but not exceeding 90 GHz;

e.2. An output power exceeding 1 mW (0 dBm) anywhere within the operating frequency range exceeding 90 GHz but not exceeding 110 GHz;

e.3. ‘Nonlinear vector measurement functionality’ at frequencies exceeding 50 GHz but not exceeding 110 GHz; *or*

**Technical Note:** ‘Nonlinear vector measurement functionality’ is an instrument’s ability to analyze the test results of devices driven into the large-signal domain or the non-linear distortion range.

e.4. A maximum operating frequency exceeding 110 GHz;

f. Microwave test receivers having all of the following:

f.1. Maximum operating frequency exceeding 110 GHz; *and*

f.2. Being capable of measuring amplitude and phase simultaneously;

g. Atomic frequency standards being any of the following:

g.1. “Space-qualified”;

g.2. Non-rubidium and having a long-term stability less (better) than  $1 \times 10^{-11}$ /month; *or*

g.3. Non-”space-qualified” and having all of the following:

g.3.a. Being a rubidium standard;

g.3.b. Long-term stability less (better) than  $1 \times 10^{-11}$ /month; and

g.3.c. Total power consumption of less than 1 Watt.

h. “Electronic assemblies,” modules or equipment, specified to perform all of the following:

h.1. Analog-to-digital conversions meeting any of the following:

h.1.a. A resolution of 8 bit or more, but less than 10 bit, with a “sample rate” greater than 1.3 Giga Samples Per Second (GSPS);

h.1.b. A resolution of 10 bit or more, but less than 12 bit, with a “sample rate” greater than 1.0 GSPS;

h.1.c. A resolution of 12 bit or more, but less than 14 bit, with a “sample rate” greater than 1.0 GSPS;

h.1.d. A resolution of 14 bit or more but less than 16 bit, with a “sample rate” greater than 400 Mega Samples Per Second (MSPS); or

h.1.e. A resolution of 16 bit or more with a “sample rate” greater than 180 MSPS; and

h.2. Any of the following:

h.2.a. Output of digitized data;

h.2.b. Storage of digitized data; or

h.2.c. Processing of digitized data;

*N.B.:* Digital data recorders, oscilloscopes, “signal analyzers,” signal generators, network analyzers and microwave test receivers, are specified by 3A002.a.6, 3A002.a.7, 3A002.c, 3A002.d, 3A002.e and 3A002.f, respectively.

**Technical Notes:**

1. A resolution of  $n$  bit corresponds to a quantization of  $2^n$  levels.

2. The resolution of the ADC is the number of bits in of the digital output of the ADC that represents the measured analog input word. Effective Number of Bits (ENOB) is not used to determine the resolution of the ADC.

3. For non-interleaved multiple-channel “electronic assemblies”, modules, or equipment, the “sample rate” is not aggregated and the “sample rate” is the maximum rate of any single channel.

4. For interleaved channels on multiple-channel “electronic assemblies”, modules, or equipment, the “sample rates” are aggregated and the “sample rate” is the maximum combined total rate of all the interleaved channels.

**Note:** 3A002.h includes ADC cards, waveform digitizers, data acquisition cards, signal acquisition boards and transient recorders.

**\*\*3A003** Spray cooling thermal management systems employing closed loop fluid handling and reconditioning equipment in a sealed enclosure where a dielectric fluid is sprayed onto electronic “components” using “specially designed” spray nozzles that are designed to maintain electronic “components” within their operating temperature range, and “specially designed” “components” therefor.

 GBS: N/A

**List of Items Controlled**

Related Controls: See also ECCN 3A002.h for controls on analog-to-digital “electronic

assemblies,” modules or equipment.

Related Definitions: N/A  
 Items:

a. Analog-to-digital converters usable in “missiles,” and having any of the following characteristics:

a.1. “Specially designed” to meet military specifications for ruggedized equipment;

a.2. “Specially designed” for military use and being any of the following types:

a.2.a. Analog-to-digital converter microcircuits which are radiation-hardened or have all of the following characteristics:

a.2.a.1. Rated for operation in the temperature range from below -54°C to above +125°C; and

a.2.a.2. Hermetically sealed; or

a.2.b. Electrical input type analog-to-digital converter printed circuit boards or modules, having all of the following characteristics:

a.2.b.1. Rated for operation in the temperature range from below -45°C to above +80°C; and

a.2.b.2. Incorporating microcircuits identified in 3A101.a.2 .a;

b. Accelerators capable of delivering electromagnetic radiation produced by bremsstrahlung from accelerated electrons of 2 MeV or greater, and systems containing those accelerators, usable for the “missiles” or the subsystems of “missiles”.

*Note:* 3A101.b above does not include equipment “specially designed” for medical purposes.

**\*\*3A201** Electronic “parts” and “components,” other than those controlled by 3A001, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [3E001](#) (“development” and “production”) and [3E201](#) (“use”) for technology for items controlled under this entry. (2) Also see [3A001.e.2](#) (capacitors) and [3A001.e.3](#) (superconducting electromagnets). (3) Superconducting electromagnets “specially designed” or prepared for use in separating uranium isotopes are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*Items:*

a. Pulse discharge capacitors having either of the following sets of characteristics:

a.1. Voltage rating greater than 1.4 kV, energy storage greater than 10 J, capacitance greater than 0.5 μF, and series inductance less than 50 nH; *or*

a.2. Voltage rating greater than 750 V, capacitance greater than 0.25 μF, and series inductance less than 10 nH;

b. Superconducting solenoidal electromagnets having all of the following characteristics:

b.1. Capable of creating magnetic fields greater than 2 T;

b.2. A ratio of length to inner diameter greater than 2;

b.3. Inner diameter greater than 300 mm; *and*

b.4. Magnetic field uniform to better than 1% over the central 50% of the inner volume;

*Note:* 3A201.b does not control magnets “specially designed” for and exported “as parts of” medical nuclear magnetic resonance (NMR) imaging systems. The phrase “as part of” does not necessarily mean physical part in the same shipment; separate shipments from different sources are allowed, provided the related export documents clearly specify that the shipments are dispatched “as part of” the imaging systems.

c. Flash X-ray generators or pulsed electron accelerators having either of the following sets of characteristics:

c.1. An accelerator peak electron energy of 500 keV or greater, but less than 25 MeV, and with a “figure of merit” (K) of 0.25 or greater; *or*

c.2. An accelerator peak electron energy of 25 MeV or greater, and a “peak power” greater than 50 MW;

*Note:* 3A201.c does not control accelerators that are “parts” or “components” of devices designed for purposes other than electron beam or X-ray radiation (electron microscopy, for example) nor those designed for medical purposes.

**Technical Notes:**

1. The “figure of merit” K is defined as:  $K = 1.7 \times 10^3 V^{2.65} Q$ . V is the peak electron energy in

million electron volts. If the accelerator beam pulse duration is less than or equal to 1  $\mu$ s, then  $Q$  is the total accelerated charge in Coulombs. If the accelerator beam pulse duration is greater than 1  $\mu$ s, then  $Q$  is the maximum accelerated charge in 1  $\mu$ s.  $Q$  equals the intergral of  $i$  with respect to  $t$ , over the lesser of 1  $\mu$ s or the time duration of the beam pulse ( $Q = \int i dt$ ), where  $i$  is beam current in amperes and  $t$  is time in seconds.

2. "Peak power" = (peak potential in volts)  $\times$  (peak beam current in amperes).

3. In machines based on microwave accelerating cavities, the time duration of the beam pulse is the lesser of 1  $\mu$ s or the duration of the bunched beam packet resulting from one microwave modulator pulse.

4. In machines based on microwave accelerating cavities, the peak beam current is the average current in the time duration of a bunched beam packet.

**\*\*3A225** Frequency changers (a.k.a. converters or inverters) and generators, except those subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110), that are usable as a variable frequency or fixed frequency motor drive and have all of the characteristics described in this ECCN (see List of Items Controlled).

**License Requirements**

Reason for Control: NP, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCN 3D201 for "software" "specially designed" for the "use" of equipment described in this entry. (2) See ECCN 3D202 for "software" "specially designed" to enhance or release the performance characteristics of frequency changers or generators to meet or exceed the level of the performance characteristics described in this entry. (3) See ECCNs [3E001](#) ("development" and "production") and [3E201](#) ("use") for technology for items controlled under this entry. (4) Frequency changers (a.k.a. converters or inverters) "specially designed" or prepared for use in separating uranium isotopes are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*Items:*

- a. Multiphase output providing a power of 40 VA or greater;
- b. Operating at a frequency of 600 Hz or more; *and*
- c. Frequency control better (less) than 0.2%.

*Notes:*

1. This ECCN controls frequency changers intended for use in specific industrial machinery and/or consumer goods (machine tools, vehicles, etc.) only if the frequency changers can meet the performance characteristics described in this entry when removed from the machinery and/or goods. This Note does not exclude from control under this entry any frequency changer described herein that is the principal element of a non-controlled item and can feasibly be removed or used for other purposes.

2. To determine whether a particular frequency

*changer meets or exceeds the performance characteristics described in this entry, both hardware and “software” performance constraints must be considered.*

**Technical Notes:**

1. *Frequency changers controlled by this ECCN are also known as converters or inverters.*

2. *The performance characteristics described in this ECCN also may be met by certain equipment marketed as: generators, electronic test equipment, AC power supplies, variable speed motor drives, variable speed drives (VSDs), variable frequency drives (VFDs), adjustable frequency drives (AFDs), or adjustable speed drives (ASDs).*

**\*\*3A226** High-power direct current power supplies having both of the following characteristics (see List of Items Controlled) , excluding items that are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [3E001](#)

(“development” and “production”) and [3E201](#) (“use”) for technology for items controlled under this entry. (2) Also see ECCN [3A227](#). (3) Direct current power supplies “specially designed” or prepared for use in separating uranium isotopes are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*Items:*

- a. Capable of continuously producing, over a time period of 8 hours, 100 V or greater with current output of 500 A or greater; *and*
- b. Current or voltage stability better than 0.1% over a time period of 8 hours.

**\*\*3A227** High-voltage direct current power supplies, having both of the following characteristics (see List of Items Controlled) , excluding items that are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [3E001](#)

(“development” and “production”) and [3E201](#) (“use”) for technology for items controlled under this entry. (2) Also see ECCN [3A226](#). (3) Direct current power supplies “specially designed” or prepared for use in separating uranium isotopes are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*Items:*

- a. Capable of continuously producing, over a time period of 8 hours, 20 kV or greater with current output of 1 A or greater; *and*
- b. Current or voltage stability better than 0.1% over a time period of 8 hours.

**\*\*3A228** Switching devices, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [3E001](#) (“development” and “production”) and [3E201](#) (“use”) for technology for items controlled under this entry. (2) Also see ECCN [3A991.k](#).

*Related Definitions:* N/A

*Items:*

a. Cold-cathode tubes, whether gas filled or not, operating similarly to a spark gap, having all of the following characteristics:

- a.1. Containing three or more electrodes;
- a.2. Anode peak voltage rating of 2.5 kV or more;
- a.3. Anode peak current rating of 100 A or more; *and*
- a.4. Anode delay time of 10 μs or less.

**Technical Note:** 3A228.a includes gas krytron tubes and vacuum sprayon tubes.

b. Triggered spark-gaps having both of the following characteristics:

- b.1. An anode delay time of 15μs or less; *and*
- b.2. Rated for a peak current of 500 A or more.

c. Modules or assemblies with a fast switching function having all of the following characteristics:

- c.1. Anode peak voltage rating greater than 2 kV;
- c.2. Anode peak current rating of 500 A or more; *and*
- c.3. Turn-on time of 1μs or less.

**\*\*3A229** Firing sets and equivalent high-current pulse generators for detonators controlled by 3A232 (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT, Foreign policy

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1
Russian industry sector sanctions apply to entire entry.	See § 746.5 for specific license requirements and license review policy.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [3E001](#) and 1E001 (“development” and “production”) and [3E201](#) and 1E201 (“use”) for technology for items controlled under this entry. (2) See 1A007.a for explosive detonator firing sets designed to drive explosive detonators controlled by 1A007.b. (3) High explosives and related equipment for military use are “subject to the ITAR” (see 22 CFR parts 120 through 130).

*Related Definitions:* N/A

*ECCN Controls:* (1) Optically driven firing sets include both those employing laser initiation and laser charging. (2) Explosively driven firing sets include both explosive ferroelectric and explosive ferromagnetic firing set types. (3) 3A229.b includes xenon flash-lamp drivers.

*Items:*

- a. Detonator firing sets (initiation systems, firesets), including electronically-charged, explosively-driven and optically-driven firing sets designed to drive multiple controlled detonators controlled by 3A232;
- b. Modular electrical pulse generators (pulsers)

having all of the following characteristics:

- b.1. Designed for portable, mobile, or ruggedized use;
- b.2. Capable of delivering their energy in less than 15 μs into loads of less than 40 Ω (ohms);
- b.3. Having an output greater than 100 A;
- b.4. No dimension greater than 30 cm;
- b.5. Weight less than 30 kg; *and*
- b.6. Specified for use over an extended temperature range 223 K (−50 °C) to 373 K (100 °C) or specified as suitable for aerospace applications.

c. Micro-firing units having all of the following characteristics:

- c.1. No dimension greater than 35 mm;
- c.2. Voltage rating of equal to or greater than 1 kV; *and*
- c.3. Capacitance of equal to or greater than 100 nF.

**\*\*3A230 High-speed pulse generators, and pulse heads therefor, having both of the following characteristics (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for

a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [3E001](#) (“development” and “production”) and [3E201](#) (“use”) for technology for items controlled under this entry. (2) See ECCNs 3A002.d.1, [3A992.a](#) and 3A999.d.

*Related Definitions:* 1. In 3A230.b, the term “pulse transition time” is defined as the time interval between 10% and 90% voltage amplitude. 2. Pulse heads are impulse forming networks designed to accept a voltage step function and shape it into a variety of pulse forms that can include rectangular, triangular, step, impulse, exponential, or monocycle types. Pulse heads can be an integral part of the pulse generator, they can be a plug-in module to the device or they can be an externally connected device.

*Items:*

- a. Output voltage greater than 6 V into a resistive load of less than 55 ohms; *and*
- b. “Pulse transition time” less than 500 ps.

**\*\*3A231** Neutron generator systems, including tubes, having both of the characteristics described in this ECCN (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT , Foreign policy

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

Russian industry sector sanctions apply to entire entry.	See § 746.5 for specific license requirements and license review policy.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* See ECCNs [3E001](#) (“development” and “production”) and [3E201](#) (“use”) for technology for items controlled under this entry.

*Related Definitions:* N/A

*Items:*

- a. Designed for operation without an external vacuum system; *and*
- b. Utilizing electrostatic acceleration to induce:
  - b.1. A tritium-deuterium nuclear reaction; *or*
  - b.2. A deuterium-deuterium nuclear reaction and capable of an output of 3 x 10<sup>9</sup> neutrons/s or greater.

**\*\*3A232** Detonators and multipoint initiation systems, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT, Foreign policy

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).**

**License Requirements**

*Reason for Control:* NP, AT

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List of Items Controlled**

*Related Controls:* (1) See ECCNs 0A604 and 1A007 for electrically driven explosive detonators. (2) See ECCNs [3E001](#) (“development” and “production”) and [3E201](#) (“use”) for technology for items controlled under this entry. (3) High explosives and related equipment for military use are “subject to the ITAR” (see 22 CFR parts 120 through 130).

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

*Related Definitions:* N/A

*ECCN Controls:* This entry does not control detonators using only primary explosives, such as lead azide.

*Items:*

- a. [Reserved]
- b. Arrangements using single or multiple detonators designed to nearly simultaneously initiate an explosive surface over an area greater than 5,000 mm<sup>2</sup> from a single firing signal with an initiation timing spread over the surface of less than 2.5 μs.

**Technical Note:** *The word initiator is sometimes used in place of the word detonator.*

**\*\*3A233** Mass spectrometers, capable of measuring ions of 230 atomic mass units or greater and having a resolution of better than 2 parts in 230, and ion sources therefor, excluding items that are subject to the export

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [3E001](#) (“development” and “production”) and [3E201](#) (“use”) for technology for items controlled under this entry. (2) Mass spectrometers “specially designed” or prepared for analyzing on-line samples of UF<sub>6</sub> gas streams are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).  
*Related Definitions:* N/A

*Items:*

- a. Inductively coupled plasma mass spectrometers (ICP/MS);
- b. Glow discharge mass spectrometers (GDMS);
- c. Thermal ionization mass spectrometers (TIMS);
- d. Electron bombardment mass spectrometers having both of the following features:
  - d.1. A molecular beam inlet system that injects a collimated beam of analyte molecules into a region of the ion source where the molecules are

ionized by an electron beam; *and*

d.2. One or more cold traps that can be cooled to a temperature of 193 K (-80 °C) or less in order to trap analyte molecules that are not ionized by the electron beam;

e. Mass spectrometers equipped with a microfluorination ion source designed for actinides or actinide fluorides.

**Technical Notes:**

1. ECCN 3A233.d controls mass spectrometers that are typically used for isotopic analysis of UF<sub>6</sub> gas samples.

2. Electron bombardment mass spectrometers in ECCN 3A233.d are also known as electron impact mass spectrometers or electron ionization mass spectrometers.

3. In ECCN 3A233.d.2, a “cold trap” is a device that traps gas molecules by condensing or freezing them on cold surfaces. For the purposes of this ECCN, a closed-loop gaseous helium cryogenic vacuum pump is not a cold trap.

**\*\*3A234** Striplines to provide low inductance path to detonators with the following characteristics (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

LVS: N/A  
GBS: N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

- a. Voltage rating greater than 2 kV; *and*
- b. Inductance of less than 20 nH.

**\*\*3A611** Military electronics, as follows (see List of Items Controlled).

*Reason for Control:* NS, RS, AT, UN

Control(s)	Country Chart (see Supp. No. 1 to part 738)
NS applies to entire entry except 3A611.y	NS Column 1
RS applies to entire entry except 3A611.y	RS Column 1
RS applies to 3A611.y	China, Russia, or Venezuela (see § 742.6(a)(7))
AT applies to entire entry	AT Column 1
UN applies to entire entry except 3A611.y	See § 746.1(b) for UN controls

**List Based License Exceptions** (see Part 740 for a description of all license exceptions)

LVS: \$1500 for 3A611.a, .d through .h and .x; N/A for ECCN 3A611.c.  
GBS: N/A

**Special Conditions for STA**

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 3A611.

**List of Items Controlled**

*Related Controls:* (1) Electronic items that are

enumerated in USML Category XI or other USML categories, and technical data (including software) directly related thereto, are subject to the ITAR. (2) Application specific integrated circuits (ASICs) and programmable logic devices (PLD) that are programmed for defense articles that are subject to the ITAR are controlled in USML Category XI(c)(1). (3) See ECCN 3A001.a.7 for controls on unprogrammed programmable logic devices (PLD). (4) Printed circuit boards and populated circuit cards with a layout that is “specially designed” for defense articles are controlled in USML Category XI(c)(2). (5) Multichip modules for which the pattern or layout is “specially designed” for defense articles are controlled in USML Category XI(c)(3). (6) Electronic items “specially designed” for military application that are not controlled in any USML category but are within the scope of another “600 series” ECCN or a 9x515 ECCN are controlled by that “600 series” ECCN or 9x515 ECCN. For example, electronic components not enumerated on the USML or a “600 series” other than 3A611 that are “specially designed” for a military aircraft controlled by USML Category VIII or ECCN 9A610 are controlled by the catch-all control in ECCN 9A610.x. Electronic components not enumerated on the USML or another “600 series” entry that are “specially designed” for a military vehicle controlled by USML Category VII or ECCN 0A606 are controlled by ECCN 0A606.x. Electronic components not enumerated on the USML that are “specially designed” for a missile controlled by USML Category IV are controlled by ECCN 9A604.(7) Certain radiation-hardened microelectronic circuits are controlled by ECCN 9A515.d or 9A515.e, when “specially designed” for defense articles, “600 series” items, or items controlled by 9A515.

*Related Definitions:* N/A

*Items:*

a. Electronic “equipment,” “end items,” and “systems” “specially designed” for a military application that are not enumerated or otherwise described in either a USML category or another

“600 series” ECCN.

*Note to 3A611.a:* ECCN 3A611.a includes any radar, telecommunications, acoustic or computer equipment, end items, or systems “specially designed” for military application that are not enumerated or otherwise described in any USML category or controlled by another “600 series” ECCN.

b. [Reserved]

c. [Reserved]

d. [Reserved]

e. High frequency (HF) surface wave radar that maintains the positional state of maritime surface or low altitude airborne objects of interest in a received radar signal through time.

*Note to 3A611.e:* ECCN 3A611.e does not apply to systems, equipment, and assemblies “specially designed” for marine traffic control.

f. Application specific integrated circuits (ASICs) and programmable logic devices (PLD) that are not controlled by paragraph .y of this entry and that are programmed for “600 series” items.

*Note to paragraph .f:* In this paragraph, the term ‘application specific integrated circuit’ means an integrated circuit developed and produced for a specific application or function regardless of number of customers for which the integrated circuit is developed or produced.

**g.** Printed circuit boards and populated circuit card assemblies that are not controlled by paragraph .y of this entry and for which the layout is “specially designed” for “600 series” items.

**h.** Multichip modules that are not controlled by paragraph .y of this entry and for which the pattern or layout is “specially designed” for “600 series” items.

**i.** through w. [Reserved]

**x.** “Parts,” “components,” “accessories,” and “attachments” that are “specially designed” for a commodity controlled by this entry or for an article controlled by USML Category XI, and not enumerated or described in any USML category or in any paragraph other than the .x paragraph of another 600 series ECCN or in paragraph .y of this entry.

**Note 1 to ECCN 3A611.x:** ECCN 3A611.x includes “parts,” “components,” “accessories,” and “attachments” “specially designed” for a radar, telecommunications, acoustic system or equipment or computer “specially designed” for military application that are neither controlled in any USML category nor controlled in any paragraph other than the .x paragraph of another “600 series” ECCN.

**Note 2 to ECCN 3A611.x:** ECCN 3A611.x controls “parts” and “components” “specially designed” for underwater sensors or projectors controlled by USML Category XI(c)(12) containing single-crystal lead magnesium niobate lead titanate (PMN-PT) based piezoelectrics.

**Note 3 to ECCN 3A611.x:** “Parts,” “components,” “accessories,” and “attachments” subject to the EAR and within the scope of any 600 series .x entry that are of a type that are or would potentially be for use in or with multiple platforms (e.g., military electronics, military vehicles, and military aircraft) may be classified under 3A611.x.

**y.** Specific “parts,” “components,” “accessories,” and “attachments” “specially designed” for a commodity subject to control in a “600 series” ECCN or a defense article and not elsewhere specified in any paragraph other than the .y paragraph of a “600 series” ECCN or the USML as follows, and “parts,” “components,” “accessories,” and “attachments” “specially designed” therefor:

y.1. Electrical connectors;

y.2. Electric fans;

y.3. Heat sinks;

y.4. Joy sticks;

y.5. Mica paper capacitors;

y.6. Microphones;

y.7. Potentiometers;

y.8. Rheostats;

y.9. Electric connector backshells;

y.10. Solenoids;

y.11. Speakers;

y.12. Trackballs;

y.13. Electric transformers;

y.14. Application specific integrated circuits (ASICs) and programmable logic devices (PLD) that are programmed for commodities controlled in the .y paragraph of any “600 series” ECCN;

y.15. Printed circuit boards and populated circuit card assemblies for which the layout is “specially designed” for an item controlled by the .y paragraph of any “600 series” ECCN;

y.16. Multichip modules for which the pattern or layout is “specially designed” for an item in the .y paragraph of a “600 series” ECCN;

y.17. Circuit breakers;

y.18. Ground fault circuit interrupters;

y.19. Electrical contacts;

y.20. Electrical guide pins;

y.21. Filtered and unfiltered mechanical

**Note:** We classify HUD cameras and their parts as 9A610.x. Historically, HUD cameras for, say, an F-16, would be classified as ITAR on the USML's Cat. XIII(a). But USML XIII(a) is now deleted from the ITAR, so the HUD camera moves to the EAR under 9A610.x. A PCB in a HUD camera could be 3A611.g (or .h), 3A611.x, or 9A610.x. There is no difference in “Reasons for Control”, etc. For simplicity and consistency, it is best to classify a PCB or other parts/components in a 9A610.x as themselves also being 9A610.x.

**Old ITAR USML Cat. XIII(a):** “Cameras and specialized processing equipment therefor, photointerpretation, stereoscopic plotting, and photogrammetry equipment which are specifically designed, developed, modified, adapted, or configured for military purposes, and components specifically designed or modified therefor.”

**Current ITAR USML Cat. XIII(a):** “[Reserved]”

switches;

*Note to ECCN 3A981. In this ECCN, electronic monitoring restraint devices are devices used to record or report the location of confined persons for law enforcement or penal reasons. The term does not include devices that confine memory impaired patients to appropriate medical facilities.*

**\*\*3A991 Electronic devices, and “components” not controlled by 3A001.**

**License Requirements**

*Reason for Control:* AT

Control(s)	Country Chart See Supp. No. 1 to part 738)
AT applies to entire entry	AT Column 1

**License Requirements Note:** See § 744.17 of the EAR for additional license requirements for microprocessors having a processing speed of 5 GFLOPS or more and an arithmetic logic unit with an access width of 32 bit or more, including those incorporating “information security” functionality, and associated “software” and “technology” for the “production” or “development” of such microprocessors.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

a. “Microprocessor microcircuits”, “microcomputer microcircuits”, and microcontroller microcircuits having any of the following:

a.1. A performance speed of 5 GFLOPS or more and an arithmetic logic unit with an access width of 32 bit or more;

a.2. A clock frequency rate exceeding 25 MHz;  
*or*

a.3. More than one data or instruction bus or serial communication port that provides a direct external interconnection between parallel “microprocessor microcircuits” with a transfer rate of 2.5 Mbyte/s;

b. Storage integrated circuits, as follows:

b.1. Electrical erasable programmable read-only memories (EEPROMs) with a storage capacity;

b.1.a. Exceeding 16 Mbits per package for flash memory types; *or*

b.1.b. Exceeding either of the following limits for all other EEPROM types:

b.1.b.1. Exceeding 1 Mbit per package; *or*

b.1.b.2. Exceeding 256 kbit per package and a maximum access time of less than 80 ns;

b.2. Static random access memories (SRAMs) with a storage capacity:

b.2.a. Exceeding 1 Mbit per package; *or*

**\*\*multiple \*\*connections  
\*\*terminals \*\*144 terminals**

b.2.b. Exceeding 256 kbit per package and a maximum access time of less than 25 ns;

c. Analog-to-digital converters having any of the following:

c.1. A resolution of 8 bit or more, but less than 12 bit, with an output rate greater than 200 million words per second;

c.2. A resolution of 12 bit with an output rate greater than 105 million words per second;

c.3. A resolution of more than 12 bit but equal to or less than 14 bit with an output rate greater than 10 million words per second; *or*

c.4. A resolution of more than 14 bit with an output rate greater than 2.5 million words per second;

d. Field programmable logic devices having a maximum number of single-ended digital input/outputs between 200 and 700;

e. Fast Fourier Transform (FFT) processors having a rated execution time for a 1,024 point complex FFT of less than 1 ms;

f. Custom integrated circuits for which either the function is unknown, or the control status of the equipment in which the integrated circuits will be used is unknown to the manufacturer, having any of the following:

f.1. **More than 144 terminals; *or***

f.2. A typical “basic propagation delay time” of less than 0.4 ns;

g. Traveling-wave “vacuum electronic devices,” pulsed or continuous wave, as follows:

g.1. Coupled cavity devices, or derivatives thereof;

g.2. Helix devices based on helix, folded waveguide, or serpentine waveguide circuits, *or* derivatives thereof, with any of the following:

g.2.a. An “instantaneous bandwidth” of half an octave or more; *and*

g.2.b. The product of the rated average output power (expressed in kW) and the maximum operating frequency (expressed in GHz) of more than 0.2;

g.2.c. An “instantaneous bandwidth” of less than half an octave; *and*

g.2.d. The product of the rated average output power (expressed in kW) and the maximum operating frequency (expressed in GHz) of more than 0.4;

h. Flexible waveguides designed for use at frequencies exceeding 40 GHz;

i. Surface acoustic wave and surface skimming (shallow bulk) acoustic wave devices (i.e., “signal processing” devices employing elastic waves in materials), having either of the following:

i.1. A carrier frequency exceeding 1 GHz; *or*

i.2. A carrier frequency of 1 GHz or less; *and*

i.2.a. A frequency side-lobe rejection exceeding 55 Db;

i.2.b. A product of the maximum delay time and bandwidth (time in microseconds and bandwidth in MHz) of more than 100; *or*

i.2.c. A dispersive delay of more than 10 microseconds;

j. Cells as follows:

j.1. Primary cells having an energy density of 550 Wh/kg or less at 293 K (20°C);

j.2. Secondary cells having an energy density of 350 Wh/kg or less at 293 K (20°C);

*Note:* 3A991.j does not control batteries, including single cell batteries.

**Technical Notes:**

1. For the purpose of 3A991.j energy density (Wh/kg) is calculated from the nominal voltage multiplied by the nominal capacity in ampere-hours divided by the mass in kilograms. If the nominal capacity is not stated, energy density is calculated from the nominal voltage squared then multiplied by the discharge duration in hours divided by the discharge load in Ohms and the mass in kilograms.

2. For the purpose of 3A991.j, a ‘cell’ is defined as an electrochemical device, which has positive and negative electrodes, and electrolyte, and is a source of electrical energy. It is the basic building block of a battery.

3. For the purpose of 3A991.j.1, a ‘primary cell’ is a ‘cell’ that is not designed to be charged by any other source.

4. For the purpose of 3A991.j.2, a ‘secondary cell’ is a ‘cell’ that is designed to be charged by an external electrical source.

k. “Superconductive” electromagnets or solenoids “specially designed” to be fully charged or discharged in less than one minute, having all of the following:

*Note:* 3A991.k does not control “superconductive” electromagnets or solenoids designed for Magnetic Resonance Imaging (MRI) medical equipment.

k.1. Maximum energy delivered during the discharge divided by the duration of the discharge of more than 500 kJ per minute;

k.2. Inner diameter of the current carrying windings of more than 250 mm; and

k.3. Rated for a magnetic induction of more than 8T or “overall current density” in the winding of more than 300 A/mm<sup>2</sup>;

l. Circuits or systems for electromagnetic energy storage, containing “components” manufactured from “superconductive” materials “specially designed” for operation at temperatures below the “critical temperature” of at least one of their “superconductive” constituents, having all of the following:

l.1. Resonant operating frequencies exceeding 1 MHz;

l.2. A stored energy density of 1 MJ/M<sup>3</sup> or more; and

l.3. A discharge time of less than 1 ms;

m. Hydrogen/hydrogen-isotope thyratrons of ceramic-metal construction and rate for a peak current of 500 A or more;

n. Digital integrated circuits based on any compound semiconductor having an equivalent gate count of more than 300 (2 input gates);

**o. Solar cells, cell-interconnect-coverglass (CIC) assemblies, solar panels, and solar arrays, which are “space qualified” and not controlled by 3A001.e.4.** For “solar cells” also see 3A001.e.4 and 9A515.x

**\*\*3A992 General purpose electronic equipment not controlled by 3A002.**

GBS: N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

- a. Electronic test equipment, n.e.s.
- b. Digital instrumentation magnetic tape data recorders having any of the following characteristics;
  - b.1. A maximum digital interface transfer rate exceeding 60 Mbit/s and employing helical scan techniques;
  - b.2. A maximum digital interface transfer rate exceeding 120 Mbit/s and employing fixed head techniques; *or*
  - b.3. “Space qualified”;
- c. Equipment, with a maximum digital interface transfer rate exceeding 60 Mbit/s, designed to convert digital video magnetic tape recorders for use as digital instrumentation data recorders;
- d. Non-modular analog oscilloscopes having a bandwidth of 1 GHz or greater;
- e. Modular analog oscilloscope systems having either of the following characteristics:
  - e.1. A mainframe with a bandwidth of 1 GHz or greater; *or*
  - e.2. Plug-in modules with an individual bandwidth of 4 GHz or greater;
- f. Analog sampling oscilloscopes for the analysis of recurring phenomena with an effective bandwidth greater than 4 GHz;

g. Digital oscilloscopes and transient recorders, using analog-to-digital conversion techniques, capable of storing transients by sequentially sampling single-shot inputs at successive intervals of less than 1 ns (greater than 1 giga-sample per second), digitizing to 8 bits or greater resolution and storing 256 or more samples.

*Note: This ECCN controls the following “specially designed” “parts” and “components” for analog oscilloscopes:*

- 1. *Plug-in units;*
- 2. *External amplifiers;*
- 3. *Pre-amplifiers;*
- 4. *Sampling devices;*
- 5. *Cathode ray tubes.*

**\*\*3A999 Specific processing equipment, n.e.s., as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart See Supp. No. 1 to part 738)</i>
AT applies to entire entry	A license is required for items controlled by this entry to North Korea for anti-terrorism reasons. The Commerce Country Chart is not designed to determine AT licensing requirements for this entry. See §742.19 of the EAR for additional information.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See also, [3A225](#) (for frequency changes capable of operating in the

frequency range of 600 Hz and above), and [3A233](#). (2) Certain auxiliary systems, equipment, “parts” and “components” for isotope separation plants, made of or protected by UF<sub>6</sub> resistant materials are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*Items:*

- a. Frequency changers capable of operating in the frequency range from 300 up to 600 Hz, n.e.s.;
- b. Mass spectrometers n.e.s.;
- c. All flash x-ray machines, and “parts” or “components” of pulsed power systems designed thereof, including Marx generators, high power pulse shaping networks, high voltage capacitors, and triggers;
- d. Pulse amplifiers, n.e.s.;
- e. Electronic equipment for time delay generation or time interval measurement, as follows:
  - e.1. Digital time delay generators with a resolution of 50 nanoseconds or less over time intervals of 1 microsecond or greater; *or*
  - e.2. Multi-channel (three or more) or modular time interval meter and chronometry equipment with resolution of 50 nanoseconds or less over time intervals of 1 microsecond or greater;
- f. Chromatography and spectrometry analytical instruments.

**B. TEST, INSPECTION AND “PRODUCTION EQUIPMENT”**

**\*\*3B001** Equipment for the manufacturing of semiconductor devices or materials, as follows (see List of Items Controlled) and “specially designed” “components” and “accessories” therefor.

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$500

*GBS:* Yes, except a.3 (molecular beam epitaxial growth equipment using gas sources), .e (automatic loading multi-chamber central wafer handling systems *only* if connected to equipment controlled by 3B001. a.3, or .f), and .f (lithography equipment).

**List of Items Controlled**

*Related Controls:* See also [3B991](#)

*Related Definitions:* N/A

*Items:*

- a. Equipment designed for epitaxial growth as follows:
  - a.1. Equipment designed or modified to produce a layer of any material other than silicon with a thickness uniform to less than  $\pm 2.5\%$  across a distance of 75 mm or more;

*Note:* 3B001.a.1 includes atomic layer epitaxy (ALE) equipment.

- a.2. Metal Organic Chemical Vapor Deposition (MOCVD) reactors designed for compound semiconductor epitaxial growth of material having two or more of the following elements: aluminum, gallium, indium, arsenic, phosphorus, antimony, or nitrogen;

a.3. Molecular beam epitaxial growth equipment using gas or solid sources;

b. Equipment designed for ion implantation and having any of the following:

b.1. [Reserved]

b.2. Being designed and optimized to operate at a beam energy of 20 keV or more and a beam current of 10 mA or more for hydrogen, deuterium, or helium implant;

b.3. Direct write capability;

b.4. A beam energy of 65 keV or more and a beam current of 45 mA or more for high energy oxygen implant into a heated semiconductor material “substrate”; *or*

b.5. Being designed and optimized to operate at beam energy of 20 keV or more and a beam current of 10mA or more for silicon implant into a semiconductor material “substrate” heated to 600 °C or greater;

c. [Reserved]

d. [Reserved]

e. Automatic loading multi-chamber central wafer handling systems having all of the following:

e.1. Interfaces for wafer input and output, to which more than two functionally different ‘semiconductor process tools’ controlled by 3B001.a.1, 3B001.a.2, 3B001.a.3 or 3B001.b are designed to be connected; *and*

e.2. Designed to form an integrated system in a vacuum environment for ‘sequential multiple wafer processing’;

*Note:* 3B001.e does not control automatic robotic wafer handling systems “specially designed” for parallel wafer processing.

**Technical Notes:**

1. For the purpose of 3B001.e, ‘semiconductor process tools’ refers to modular tools that provide physical processes for semiconductor production that are functionally different, such as deposition, implant or thermal processing.

2. For the purpose of 3B001.e, ‘sequential multiple wafer processing’ means the capability to process each wafer in different ‘semiconductor process tools’, such as by transferring each wafer from one tool to a second tool and on to a third tool with the automatic loading multi-chamber central wafer handling systems.

f. Lithography equipment as follows:

f.1. Align and expose step and repeat (direct step on wafer) or step and scan (scanner) equipment for wafer processing using photo-optical or X-ray methods and having any of the following:

f.1.a. A light source wavelength shorter than 193 nm; *or*

f.1.b. Capable of producing a pattern with a “Minimum Resolvable Feature size” (MRF) of 45 nm or less;

**Technical Note:** The ‘Minimum Resolvable Feature size’ (MRF) is calculated by the following formula:

$$MRF = \frac{(an\ exposure\ light\ source\ wavelength\ in\ nm) \times (K\ factor)}{numerical\ aperture}$$

where the K factor = 0.35

f.2 Imprint lithography equipment capable of production features of 45 nm or less;

**Note:** 3B001.f.2 includes:

- *Micro contact printing tools*
- *Hot embossing tools*
- *Nano-imprint lithography tools*
- *Step and flash imprint lithography (S-FIL) tools*

f.3. Equipment “specially designed” for mask making having all of the following:

f.3.a. A deflected focused electron beam, ion beam or “laser” beam; *and*

f.3.b. Having any of the following:

f.3.b.1. A Full-Width Half-Maximum (FWHM) spot size smaller than 65 nm and an image placement less than 17 nm (mean + 3 sigma); *or*

f.3.b.2. [Reserved]

f.3.b.3. A second-layer overlay error of less than 23 nm (mean + 3 sigma) on the mask;

f.4. Equipment designed for device processing using direct writing methods, having all of the following:

f.4.a. A deflected focused electron beam; *and*

f.4.b. Having any of the following:

f.4.b.1. A minimum beam size equal to or smaller than 15 nm; *or*

f.4.b.2. An overlay error less than 27 nm (mean + 3 sigma);

g. Masks and reticles, designed for integrated circuits controlled by 3A001;

h. Multi-layer masks with a phase shift layer not specified by 3B001.g and designed to be used by

lithography equipment having a light source wavelength less than 245 nm;

*Note:* 3B001.h. does not control multi-layer masks with a phase shift layer designed for the fabrication of memory devices not controlled by 3A001.

i. Imprint lithography templates designed for integrated circuits by 3A001;

j. Mask “substrate blanks” with multilayer reflector structure consisting of molybdenum and silicon, and having all of the following:

j.1. “Specially designed” for ‘Extreme Ultraviolet (EUV)’ lithography; *and*

j.2. Compliant with SEMI Standard P37.

*Technical Note:* ‘Extreme Ultraviolet (EUV)’ refers to electromagnetic spectrum wavelengths greater than 5 nm and less than 124 nm.

**\*\*3B002** Test equipment “specially designed” for testing finished or unfinished semiconductor devices as follows (see List of Items Controlled) and “specially designed” “components” and “accessories” therefor.

**License Requirements**

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* ‘Sputtering’ is an

overlay coating process wherein positively charged ions are accelerated by an electric field towards the surface of a target (coating material). The kinetic energy of the impacting ions is sufficient to cause target surface atoms to be released and deposited on the substrate. (Note: Triode, magnetron or radio frequency sputtering to increase adhesion of coating and rate of deposition are ordinary modifications of the process.)

*Items:*

a. Equipment “specially designed” for the manufacture of electron tubes, optical elements and “specially designed” “parts” and “components” therefor controlled by 3A001 or 3A991;

b. Equipment “specially designed” for the manufacture of semiconductor devices, integrated circuits and “electronic assemblies”, as follows, and systems incorporating or having the characteristics of such equipment:

*Note: 3B991.b also controls equipment used or modified for use in the manufacture of other devices, such as imaging devices, electro-optical devices, acoustic-wave devices.*

b.1. Equipment for the processing of materials for the manufacture of devices, “parts” and “components” as specified in the heading of 3B991.b, as follows:

*Note: 3B991 does not control quartz furnace tubes, furnace liners, paddles, boats (except “specially designed” caged boats), bubblers, cassettes or crucibles “specially designed” for the processing equipment controlled by 3B991.b.1.*

b.1.a. Equipment for producing polycrystalline silicon and materials controlled by 3C001;

b.1.b. Equipment “specially designed” for purifying or processing III/V and II/VI

semiconductor materials controlled by 3C001, 3C002, 3C003, 3C004, or 3C005 except crystal pullers, for which see 3B991.b.1.c below;

b.1.c. Crystal pullers and furnaces, as follows:

*Note: 3B991.b.1.c does not control diffusion and oxidation furnaces.*

b.1.c.1. Annealing or recrystallizing equipment other than constant temperature furnaces employing high rates of energy transfer capable of processing wafers at a rate exceeding 0.005 m<sup>2</sup> per minute;

b.1.c.2. “Stored program controlled” crystal pullers having any of the following characteristics:

b.1.c.2.a. Rechargeable without replacing the crucible container;

b.1.c.2.b. Capable of operation at pressures above  $2.5 \times 10^5$  Pa; *or*

b.1.c.2.c. Capable of pulling crystals of a diameter exceeding 100 mm;

b.1.d. “Stored program controlled” equipment for epitaxial growth having any of the following characteristics:

b.1.d.1. Capable of producing silicon layer with a thickness uniform to less than  $\pm 2.5\%$  across a distance of 200 mm or more;

b.1.d.2. Capable of producing a layer of any material other than silicon with a thickness uniformity across the wafer of equal to or better than  $\pm 3.5\%$ ; *or*

b.1.d.3. Rotation of individual wafers during processing;

b.1.e. Molecular beam epitaxial growth equipment;

b.1.f. Magnetically enhanced ‘sputtering’

equipment with “specially designed” integral load locks capable of transferring wafers in an isolated vacuum environment;

b.1.g. Equipment “specially designed” for ion implantation, ion-enhanced or photo-enhanced diffusion, having any of the following characteristics:

b.1.g.1. Patterning capability;

b.1.g.2. Beam energy (accelerating voltage) exceeding 200 keV;

b.1.g.3 Optimized to operate at a beam energy (accelerating voltage) of less than 10 keV;  
*or*

b.1.g.4. Capable of high energy oxygen implant into a heated “substrate”;

b.1.h. “Stored program controlled” equipment for the selective removal (etching) by means of anisotropic dry methods (e.g., plasma), as follows:

b.1.h.1. Batch types having either of the following:

b.1.h.1.a. End-point detection, other than optical emission spectroscopy types; *or*

b.1.h.1.b. Reactor operational (etching) pressure of 26.66 Pa or less;

b.1.h.2. Single wafer types having any of the following:

b.1.h.2.a. End-point detection, other than optical emission spectroscopy types;

b.1.h.2.b. Reactor operational (etching) pressure of 26.66 Pa or less; *or*

b.1.h.2.c. Cassette-to-cassette and load locks wafer handling;

**Notes:** 1. “Batch types” refers to machines not

“specially designed” for production processing of single wafers. Such machines can process two or more wafers simultaneously with common process parameters, e.g., RF power, temperature, etch gas species, flow rates.

2. “Single wafer types” refers to machines “specially designed” for production processing of single wafers. These machines may use automatic wafer handling techniques to load a single wafer into the equipment for processing. The definition includes equipment that can load and process several wafers but where the etching parameters, e.g., RF power or end point, can be independently determined for each individual wafer.

b.1.i. “Chemical vapor deposition” (CVD) equipment, e.g., plasma-enhanced CVD (PECVD) or photo-enhanced CVD, for semiconductor device manufacturing, having either of the following capabilities, for deposition of oxides, nitrides, metals or polysilicon:

b.1.i.1. “Chemical vapor deposition” equipment operating below  $10^5$  Pa; *or*

b.1.i.2. PECVD equipment operating either below 60 Pa (450 millitorr) or having automatic cassette-to-cassette and load lock wafer handling;

**Note:** 3B991.b.1.i does not control low pressure “chemical vapor deposition” (LPCVD) systems or reactive “sputtering” equipment.

b.1.j. Electron beam systems “specially designed” or modified for mask making or semiconductor device processing having any of the following characteristics:

b.1.j.1. Electrostatic beam deflection;

b.1.j.2. Shaped, non-Gaussian beam profile;

b.1.j.3. Digital-to-analog conversion rate exceeding 3 MHz;

b.1.j.4. Digital-to-analog conversion

accuracy exceeding 12 bit; *or*

b.1.j.5. Target-to-beam position feedback control precision of 1 micrometer or finer;

*Note: 3B991.b.1.j does not control electron beam deposition systems or general purpose scanning electron microscopes.*

b.1.k. Surface finishing equipment for the processing of semiconductor wafers as follows:

b.1.k.1. “Specially designed” equipment for backside processing of wafers thinner than 100 micrometer and the subsequent separation thereof; *or*

b.1.k.2. “Specially designed” equipment for achieving a surface roughness of the active surface of a processed wafer with a two-sigma value of 2 micrometer or less, total indicator reading (TIR);

*Note: 3B991.b.1.k does not control single-side lapping and polishing equipment for wafer surface finishing.*

b.1.l. Interconnection equipment which includes common single or multiple vacuum chambers “specially designed” to permit the integration of any equipment controlled by 3B991 into a complete system;

b.1.m. “Stored program controlled” equipment using “lasers” for the repair or trimming of “monolithic integrated circuits” with either of the following characteristics:

b.1.m.1. Positioning accuracy less than  $\pm 1$  micrometer; *or*

b.1.m.2. Spot size (kerf width) less than 3 micrometer.

b.2. Masks, mask “substrates,” mask-making equipment and image transfer equipment for the manufacture of devices, “parts” and “components” as specified in the heading of

3B991, as follows:

*Note: The term “masks” refers to those used in electron beam lithography, X-ray lithography, and ultraviolet lithography, as well as the usual ultraviolet and visible photo-lithography.*

b.2.a. Finished masks, reticles and designs therefor, except:

b.2.a.1. Finished masks or reticles for the production of unembargoed integrated circuits; *or*

b.2.a.2. Masks or reticles, having both of the following characteristics:

b.2.a.2.a. Their design is based on geometries of 2.5 micrometer or more; *and*

b.2.a.2.b. The design does not include special features to alter the intended use by means of production equipment or “software”;

b.2.b. Mask “substrates” as follows:

b.2.b.1. Hard surface (e.g., chromium, silicon, molybdenum) coated “substrates” (e.g., glass, quartz, sapphire) for the preparation of masks having dimensions exceeding 125 mm x 125 mm; *or*

b.2.b.2. “Substrates” “specially designed” for X-ray masks;

b.2.c. Equipment, other than general purpose computers, “specially designed” for computer aided design (CAD) of semiconductor devices or integrated circuits;

b.2.d. Equipment or machines, as follows, for mask or reticle fabrication:

b.2.d.1. Photo-optical step and repeat cameras capable of producing arrays larger than 100 mm x 100 mm, or capable of producing a single exposure larger than 6 mm x 6 mm in the image (i.e., focal) plane, or capable of producing line widths of less than 2.5 micrometer in the

photoresist on the “substrate”;

b.2.d.2. Mask or reticle fabrication equipment using ion or “laser” beam lithography capable of producing line widths of less than 2.5 micrometer; *or*

b.2.d.3. Equipment or holders for altering masks or reticles or adding pellicles to remove defects;

*Note: 3B991.b.2.d.1 and b.2.d.2 do not control mask fabrication equipment using photo-optical methods which was either commercially available before the 1st January, 1980, or has a performance no better than such equipment.*

b.2.e. “Stored program controlled” equipment for the inspection of masks, reticles or pellicles with:

b.2.e.1. A resolution of 0.25 micrometer or finer; *and*

b.2.e.2. A precision of 0.75 micrometer or finer over a distance in one or two coordinates of 63.5 mm or more;

*Note: 3B991.b.2.e does not control general purpose scanning electron microscopes except when “specially designed” and instrumented for automatic pattern inspection.*

b.2.f. Align and expose equipment for wafer production using photo-optical or X-ray methods, e.g., lithography equipment, including both projection image transfer equipment and step and repeat (direct step on wafer) or step and scan (scanner) equipment, capable of performing any of the following functions:

*Note: 3B991.b.2.f does not control photo-optical contact and proximity mask align and expose equipment or contact image transfer equipment.*

b.2.f.1. Production of a pattern size of less than 2.5 micrometer;

b.2.f.2. Alignment with a precision finer than  $\pm 0.25$  micrometer (3 sigma);

b.2.f.3. Machine-to-machine overlay no better than  $\pm 0.3$  micrometer; *or*

b.2.f.4. A light source wavelength shorter than 400 nm;

b.2.g. Electron beam, ion beam or X-ray equipment for projection image transfer capable of producing patterns less than 2.5 micrometer;

*Note: For focused, deflected-beam systems (direct write systems), see 3B991.b.1.j or b.10.*

b.2.h. Equipment using “lasers” for direct write on wafers capable of producing patterns less than 2.5 micrometer.

b.3. Equipment for the assembly of integrated circuits, as follows:

b.3.a. “Stored program controlled” die bonders having all of the following characteristics:

b.3.a.1. “Specially designed” for “hybrid integrated circuits”;

b.3.a.2. X-Y stage positioning travel exceeding 37.5 x 37.5 mm; *and*

b.3.a.3. Placement accuracy in the X-Y plane of finer than  $\pm 10$  micrometer;

b.3.b. “Stored program controlled” equipment for producing multiple bonds in a single operation (e.g., beam lead bonders, chip carrier bonders, tape bonders);

b.3.c. Semi-automatic or automatic hot cap sealers, in which the cap is heated locally to a higher temperature than the body of the package, “specially designed” for ceramic microcircuit packages controlled by 3A001 and that have a throughput equal to or more than one package per

minute.

*Note:* 3B991.b.3 does not control general purpose resistance type spot welders.

b.4. Filters for clean rooms capable of providing an air environment of 10 or less particles of 0.3 micrometer or smaller per 0.02832 m<sup>3</sup> and filter materials therefor.

**\*\*3B992 Equipment not controlled by 3B002 for the inspection or testing of electronic “components” and materials, and “specially designed” “parts,” “components” and “accessories” therefor.**

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**List of Items Controlled**

*Related Controls:* See also [3A992.a](#).  
*Related Definitions:* N/A  
*Items:*

- a. Equipment “specially designed” for the inspection or testing of electron tubes, optical elements and “specially designed” “parts” and “components” therefor controlled by 3A001 or 3A991;
- b. Equipment “specially designed” for the inspection or testing of semiconductor devices, integrated circuits and “electronic assemblies”, as follows, and systems incorporating or having the

characteristics of such equipment:

*Note:* 3B992.b also controls equipment used or modified for use in the inspection or testing of other devices, such as imaging devices, electro-optical devices, acoustic-wave devices.

b.1. “Stored program controlled” inspection equipment for the automatic detection of defects, errors or contaminants of 0.6 micrometer or less in or on processed wafers, “substrates”, other than printed circuit boards or chips, using optical image acquisition techniques for pattern comparison;

*Note:* 3B992.b.1 does not control general purpose scanning electron microscopes, except when “specially designed” and instrumented for automatic pattern inspection.

b.2. “Specially designed” “stored program controlled” measuring and analysis equipment, as follows:

b.2.a. “Specially designed” for the measurement of oxygen or carbon content in semiconductor materials;

b.2.b. Equipment for line width measurement with a resolution of 1 micrometer or finer;

b.2.c. “Specially designed” flatness measurement instruments capable of measuring deviations from flatness of 10 micrometer or less with a resolution of 1 micrometer or finer.

b.3. “Stored program controlled” wafer probing equipment having any of the following characteristics:

b.3.a. Positioning accuracy finer than 3.5 micrometer;

b.3.b. Capable of testing devices having more than 68 terminals; *or*

b.3.c. Capable of testing at a frequency exceeding 1 GHz;

b.4. Test equipment as follows:

b.4.a. “Stored program controlled” equipment “specially designed” for testing discrete semiconductor devices and unencapsulated dice, capable of testing at frequencies exceeding 18 GHz;

**Technical Note:** *Discrete semiconductor devices include photocells and solar cells.*

b.4.b. “Stored program controlled” equipment “specially designed” for testing integrated circuits and “electronic assemblies” thereof, capable of functional testing:

b.4.b.1. At a ‘pattern rate’ exceeding 20 MHz; *or*

b.4.b.2. At a ‘pattern rate’ exceeding 10 MHz but not exceeding 20 MHz and capable of testing packages of more than 68 terminals.

**Notes:** *3B992.b.4.b does not control test equipment “specially designed” for testing:*

**1.** *Memories;*

**2.** *“Assemblies” or a class of “electronic assemblies” for home and entertainment applications; and*

**3.** *Electronic “parts,” “components,” “assemblies” and integrated circuits not controlled by 3A001 or 3A991 provided such test equipment does not incorporate computing facilities with “user accessible programmability”.*

**Technical Note:** *For purposes of 3B992.b.4.b, ‘pattern rate’ is defined as the maximum frequency of digital operation of a tester. It is therefore equivalent to the highest data rate that a tester can provide in non-multiplexed mode. It is also referred to as test speed, maximum digital frequency or maximum digital speed.*

b.4.c. Equipment “specially designed” for determining the performance of focal-plane arrays at wavelengths of more than 1,200 nm, using “stored program controlled” measurements or computer aided evaluation and having any of the following characteristics:

b.4.c.1. Using scanning light spot diameters of less than 0.12 mm;

b.4.c.2. Designed for measuring photosensitive performance parameters and for evaluating frequency response, modulation transfer function, uniformity of responsivity or noise; *or*

b.4.c.3. Designed for evaluating arrays capable of creating images with more than 32 x 32 line elements;

b.5. Electron beam test systems designed for operation at 3 keV or below, or “laser” beam systems, for non-contactive probing of powered-up semiconductor devices having any of the following:

b.5.a. Stroboscopic capability with either beam blanking or detector strobing;

b.5.b. An electron spectrometer for voltage measurements with a resolution of less than 0.5 V; *or*

b.5.c. Electrical tests fixtures for performance analysis of integrated circuits;

**Note:** *3B992.b.5 does not control scanning electron microscopes, except when “specially designed” and instrumented for non-contactive probing of a powered-up semiconductor device.*

b.6. “Stored program controlled” multifunctional focused ion beam systems “specially designed” for manufacturing, repairing, physical layout analysis and testing of masks or semiconductor devices and having either of the following characteristics:

b.6.a. Target-to-beam position feedback control precision of 1 micrometer or finer; *or*

b.6.b. Digital-to-analog conversion accuracy exceeding 12 bit;

b.7. Particle measuring systems employing “lasers” designed for measuring particle size and concentration in air having both of the following characteristics:

b.7.a. Capable of measuring particle sizes of 0.2 micrometer or less at a flow rate of 0.02832 m<sup>3</sup> per minute or more; *and*

b.7.b. Capable of characterizing Class 10 clean air or better.

*Related Controls:* This entry does not control equipment or material whose functionality has been unalterably disabled are not controlled.

*Related Definitions:* N/A

*Items:*

- a. Silicon (Si);
- b. Germanium (Ge);
- c. Silicon Carbide (SiC); *or*
- d. “III/V compounds” of gallium or indium.

*Note:* 3C001.d does not apply to a “substrate” having one or more P-type epitaxial layers of GaN, InGaN, AlGaN, InAlN, InAlGaN, GaP, GaAs, AlGaAs, InP, InGaP, AlInP or InGaAlP, independent of the sequence of the elements, except if the P-type epitaxial layer is between N-type layers.

**C. “MATERIALS”**

**\*\*3C001 Hetero-epitaxial materials consisting of a “substrate” having stacked epitaxially grown multiple layers of any of the following (see List of Items Controlled).**

**License Requirements**

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*3D991** “Software” “specially designed” for the “development”, “production”, or “use” of electronic devices, “parts” or “components” controlled by 3A991, general purpose electronic equipment controlled by 3A992, or manufacturing and test equipment controlled by 3B991 and 3B992; or “software” “specially designed” for the “use” of equipment controlled by 3B001.g and .h.

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**License Requirements Note:** See § 744.17 of the EAR for additional license requirements for microprocessors having a processing speed of 5 GFLOPS or more and an arithmetic logic unit with an access width of 32 bit or more, including those incorporating “information security” functionality, and associated “software” and “technology” for the “production” or

“development” of such microprocessors.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

Related Controls: N/A

Related Definitions: N/A

Items:

The list of items controlled is contained in the ECCN heading.

**E. “TECHNOLOGY”**

**\*\*3E001** “Technology” according to the General Technology Note for the “development” or “production” of equipment or materials controlled by 3A (except 3A980, 3A981, 3A991, 3A992, or 3A999), 3B (except 3B991 or 3B992) or 3C (except 3C992).

**License Requirements**

Reason for Control: NS, MT, NP, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to “technology” for items controlled by 3A001, 3A002, 3A003, 3B001, 3B002, or 3C001 to 3C006.	NS Column 1
MT applies to “technology” for equipment controlled by 3A001 or 3A101 for MT reasons	MT Column 1
NP applies to “technology” for equipment controlled by 3A001, 3A201, or 3A225 to 3A234 for NP reasons	NP Column 1
AT applies to entire entry	AT Column 1

**License Requirements Note:** See § 744.17 of the EAR for additional license requirements for microprocessors having a processing speed of 5 GFLOPS or more and an arithmetic logic unit with an access width of 32 bit or more, including those incorporating “information security” functionality, and associated “software” and “technology” for the “production” or “development” of such microprocessors.

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, Special Comprehensive Licenses, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: Yes, except N/A for MT, and “technology” for the “development” or “production” of: (a) Vacuum electronic device amplifiers described in 3A001.b.8, having operating frequencies exceeding 19 GHz; (b) solar cells, coverglass-interconnect-cells or covered-interconnect-cells (CIC) “assemblies”, solar arrays and/or solar panels described in 3A001.e.4; (c) “Monolithic Microwave Integrated Circuit” (“MMIC”) amplifiers in 3A001.b.2; and (d) discrete microwave transistors in 3A001.b.3.

**Special Conditions for STA**

STA: License Exception STA may not be used to ship or transmit “technology” according to the General Technology Note for the “development” or “production” of equipment specified by ECCNs 3A002.g.1 or 3B001.a.2 to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR). License Exception STA may not be

used to ship or transmit “technology” according to the General Technology Note for the “development” or “production” of components specified by ECCN 3A001.b.2 or b.3 to any of the destinations listed in Country Group A:5 or A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* (1)“Technology” according to the General Technology Note for the “development” or “production” of certain “space-qualified” atomic frequency standards described in Category XV(e)(9), MMICs described in Category XV(e)(14), and oscillators described in Category XV(e)(15) of the USML are “subject to the ITAR” (see 22 CFR parts 120 through 130). See also 3E101, 3E201 and 9E515. (2) “Technology” for “development” or “production” of “Microwave Monolithic Integrated Circuits” (“MMIC”) amplifiers in 3A001.b.2 is controlled in this ECCN 3E001; 5E001.d refers only to that additional “technology” “required” for telecommunications.

*Related Definition:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**Note 1:** 3E001 does not control “technology” for equipment or “components” controlled by 3A003.

**Note 2:** 3E001 does not control “technology” for integrated circuits controlled by 3A001.a.3 to a.14, having all of the following:

- a) Using “technology” at or above 0.130 μm; and
- b) Incorporating multi-layer structures with three or fewer metal layers.

**Note 3:** 3E001 does not apply to ‘Process Design Kits’ (‘PDKs’) unless they include libraries implementing functions or technologies for items specified by 3A001.

**Technical Note:** A ‘Process Design Kit’ (‘PDK’) is a software tool provided by a semiconductor manufacturer to ensure that the required design practices and rules are taken into account in order to successfully produce a specific integrated circuit design in a specific semiconductor process, in accordance with technological and manufacturing constraints (each semiconductor manufacturing process has its particular ‘PDK’).

**\*\*3E002 “Technology” according to the General Technology Note other than that controlled in 3E001 for the “development” or “production” of a “microprocessor microcircuit”, “micro-computer microcircuit” and microcontroller microcircuit core, having an arithmetic logic unit with an access width of 32 bits or more and any of the following features or characteristics (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 1
AT applies to entire entry	AT Column 1

**License Requirements Note:** See § 744.17 of the EAR for additional license requirements for microprocessors having a processing speed of 5 GFLOPS or more and an arithmetic logic unit with an access width of 32 bit or more, including those incorporating “information security” functionality, and associated “software” and “technology” for the “production” or

“development” of such microprocessors.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: Yes

**List of Items Controlled**

Related Controls: N/A

Related Definitions: N/A

Items:

a. A ‘vector processor unit’ designed to perform more than two calculations on floating-point vectors (one dimensional arrays of 32-bit or larger numbers) simultaneously;

**Technical Note:** A ‘vector processor unit’ is a processor element with built-in instructions that perform multiple calculations on floating-point vectors (one-dimensional arrays of 32-bit or larger numbers) simultaneously, having at least one vector arithmetic logic unit and vector registers of at least 32 elements each.

b. Designed to perform more than four 64-bit or larger floating-point operation results per cycle; or

c. Designed to perform more than eight 16-bit fixed-point multiply-accumulate results per cycle (e.g., digital manipulation of analog information that has been previously converted into digital form, also known as digital “signal processing”).

**Note 1:** 3E002 does not control “technology” for multimedia extensions.

**Note 2:** 3E002 does not control “technology” for microprocessor cores, having all of the following:

a. Using “technology” at or above 0.130 μm; and

b. Incorporating multi-layer structures with five or fewer metal layers.

**Note 3:** 3E002 includes “technology” for the “development” or “production” of digital signal processors and digital array processors.

**\*\*3E003** Other “technology” for the “development” or “production” of the following (see List of Items Controlled).

**License Requirements**

Reason for Control: NS, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: Yes, except .f and .g

**List of Items Controlled**

Related Controls: See 3E001 for silicon-on-insulation (SOI) technology for the “development” or “production” related to radiation hardening of integrated circuits.

Related Definitions: N/A

Items:

a. Vacuum microelectronic devices;

b. Hetero-structure semiconductor electronic devices such as high electron mobility transistors (HEMT), hetero-bipolar transistors (HBT), quantum well and super lattice devices;

**Note:** 3E003.b does not control “technology” for high electron mobility transistors (HEMT) operating at frequencies lower than 31.8 GHz

and hetero-junction bipolar transistors (HBT) operating at frequencies lower than 31.8 GHz.

- c. “Superconductive” electronic devices;
- d. Substrates of films of diamond for electronic components;
- e. Substrates of silicon-on-insulator (SOI) for integrated circuits in which the insulator is silicon dioxide;
- f. Substrates of silicon carbide for electronic components;
- g. “Vacuum electronic devices” operating at frequencies of 31.8 GHz or higher.

**\*\*3E004** “Technology” “required” for the slicing, grinding and polishing of 300 mm diameter silicon wafers to achieve a ‘Site least sQuares Range’ (‘SFQR’) less than or equal to 20 nm at any site of 26 mm x 8 mm on the front surface of the wafer and an edge exclusion less than or equal to 2 mm.

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* Yes

**LIST OF ITEMS CONTROLLED**

*Related Controls:* N/A

*Related Definitions:* For the purpose of 3E004, ‘Site Front least sQuares Range’ (‘SFQR’) is the range of maximum deviation and minimum deviation from front reference plane, calculated by least square method with all front surface data including site boundary within a site.

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*3E101** “Technology” according to the General Technology Note for the “use” of equipment or “software” controlled by 3A001.a.1 or .2, 3A101, or 3D101.

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart See Supp. No. 1 to part 738)</i>

**\*\*3E611** “Technology” “required” for military electronics, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry except 3E611.y	NS Column 1
RS applies to entire entry except 3E611.y	RS Column 1
RS applies to 3E611.y	China, Russia, or Venezuela (see § 742.6(a)(7))
AT applies to entire entry	AT Column 1
UN applies to entire entry except 3E611.y	See § 746.1(b) for UN controls

**List Based License Exceptions** (see Part 740 for a description of all license exceptions)

*TSR:* N/A

**Special Conditions for STA**

- STA:* 1. Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any “technology” in 3E611.
2. Except for “build-to-print technology,” License Exception STA is not eligible for “technology” enumerated in ECCN 3E611.b.

**List of Items Controlled**

*Related Controls:* Technical data directly related to articles enumerated in USML Category XI is controlled in USML Category XI(d).

*Related Definitions:* N/A

*Items:*

- a. “Technology” (other than that controlled by 3E611.b or 3E611.y) “required” for the “development,” “production,” operation, installation, maintenance, repair, overhaul, or refurbishing of commodities or software

controlled by ECCN 3A611, 3B611 or 3D611.

- b. “Technology” “required” for the “development,” “production,” operation, installation, maintenance, repair, overhaul, or refurbishing of the following if controlled by ECCN 3A611, including 3A611.x:

- b.1. Helix traveling wave tubes (TWTs);
- b.2. Transmit/receive or transmit modules.

c. through x. [Reserved]

- y. “Technology” “required” for the “production,” “development,” operation, installation, maintenance, repair, overhaul, or refurbishing of commodities or software enumerated in ECCNs 3A611.y or 3D611.y.

**\*\*3E980** “Technology” “specially designed” for “development”, “production”, or “use” of commodities controlled by 3A980 and 3A981.

**License Requirements**

*Reason for Control:* CC, AT

*Items:*

The list of items controlled is contained in the ECCN heading.

**CATEGORY 4 - COMPUTERS**

**Note 1:** Computers, related equipment and “software” performing telecommunications or “local area network” functions must also be evaluated against the performance characteristics of Category 5, Part 1 (Telecommunications).

**Note 2:** Control units that directly interconnect the buses or channels of central processing units, ‘main storage’ or disk controllers are not regarded as telecommunications equipment described in Category 5, Part 1 (Telecommunications).

**N.B.:** For the control status of “software” “specially designed” for packet switching, see **ECCN 5D001**. (Telecommunications).

**Technical Note:** ‘Main storage’ is the primary storage for data or instructions for rapid access by a central processing unit. It consists of the internal storage of a “digital computer” and any hierarchical extension thereto, such as cache storage or non-sequentially accessed extended storage.

**A. “END ITEMS,” “EQUIPMENT,” “ACCESSORIES,” “ATTACHMENTS,” “PARTS,” “COMPONENTS,” AND “SYSTEMS”**

**\*\*4A001** Electronic computers and related equipment, having any of the following (see List of Items Controlled), and “electronic assemblies” and “specially designed” “components” therefor.

**License Requirements**

Reason for Control: NS, MT, AT, NP

Control(s)	Country Chart (See
------------	--------------------

	Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 2
MT applies to items in 4A001.a when the parameters in 4A101 are met or exceeded	MT Column 1
AT applies to entire entry	AT Column 1
NP applies, unless a License Exception is available. See §742.3(b) of the EAR for information on applicable licensing review policies.	N/A

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: \$5000 for 4A001.a; N/A for MT.  
GBS: N/A

**Special Conditions for STA**

STA: License Exception STA may not be used to ship any commodity in 4A001.a.2 to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* See also [4A101](#) and [4A994](#). Equipment designed or rated for transient ionizing radiation is “subject to the ITAR” (see 22 CFR parts 120 through 130).  
*Related Definitions:* For the purposes of integrated circuits in 4A001.a.2, 5 x 10<sup>3</sup> Gy(Si) = 5 x 10<sup>5</sup> Rads (Si); 5 x 10<sup>6</sup> Gy (Si)/s = 5 x 10<sup>8</sup> Rads (Si)/s.  
*Items:*

a. “Specially designed” to have any of the following:

a.1. Rated for operation at an ambient temperature below 228 K (-45°C) or above 358 K (85°C); or

*Note: 4A001.a.1 does not apply to computers “specially designed” for civil automobile, railway train or “civil aircraft” applications.*

a.2. Radiation hardened to exceed any of the following specifications:

a.2.a. A total dose of  $5 \times 10^3$  Gy (Si);

a.2.b. A dose rate upset of  $5 \times 10^6$  Gy (Si)/s; or

a.2.c. Single Event Upset of  $1 \times 10^{-8}$  Error/bit/day;

*Note: 4A001.a.2 does not apply to computers “specially designed” for “civil aircraft” applications.*

b. [Reserved]

**\*\*4A003** “Digital computers”, “electronic assemblies”, and related equipment therefor, as follows (see List of Items Controlled) and “specially designed” “components” therefor.

**License Requirements**

**Reason for Control:** NS, CC, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to 4A003.b and .c	NS Column 1
NS applies to 4A003.e and .g	NS Column 2
CC applies to “digital computers” for computerized finger-print equipment	CC Column 1

AT applies to entire entry (refer to 4A994 for controls on “digital computers” with a APP > 0.0128 but ≤ 29 WT)	AT Column 1
---	-------------

*Note: : For all destinations, except those countries in Country Group E:1 or E:2 of Supplement No. 1 to part 740 of the EAR, no license is required (NLR) for computers with an “Adjusted Peak Performance” (“APP”) not exceeding 29 Weighted TeraFLOPS (WT) and for “electronic assemblies” described in 4A003.c that are not capable of exceeding an “Adjusted Peak Performance” (“APP”) exceeding 29 Weighted TeraFLOPS (WT) in aggregation, except certain transfers as set forth in § 746.3 (Iraq).*

**Reporting Requirements**

Special Post Shipment Verification reporting and recordkeeping requirements for exports of computers to destinations in Computer Tier 3 may be found in §743.2 of the EAR.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$5000; N/A for 4A003.b and .c.

*GBS:* Yes, for 4A003.g and “specially designed” “parts” and “components” therefor, exported separately or as part of a system.

*APP:* Yes, for computers controlled by 4A003.b, and “electronic assemblies” controlled by 4A003.c, to the exclusion of other technical parameters. See §740.7 of the EAR.

**List of Items Controlled**

*Related Controls:* See also [4A994](#) and [4A980](#)

*Related Definitions:* N/A

*Items:*

*Note 1:* 4A003 includes the following:

- ‘Vector processors’ (as defined in Note 7 of the “Technical Note on “Adjusted Peak Performance” (“APP”));

- Array processors;

- Digital signal processors;

- Logic processors;

- Equipment designed for “image enhancement.”

**Note 2:** The control status of the “digital computers” and related equipment described in 4A003 is determined by the control status of other equipment or systems provided:

a. The “digital computers” or related equipment are essential for the operation of the other equipment or systems;

b. The “digital computers” or related equipment are not a “principal element” of the other equipment or systems; and

**N.B. 1:** The control status of “signal processing” or “image enhancement” equipment “specially designed” for other equipment with functions limited to those required for the other equipment is determined by the control status of the other equipment even if it exceeds the “principal element” criterion.

**N.B. 2:** For the control status of “digital computers” or related equipment for telecommunications equipment, see Category 5, Part 1 (Telecommunications).

c. The “technology” for the “digital computers” and related equipment is determined by 4E.

a. [Reserved]

b. “Digital computers” having an “Adjusted Peak Performance” (“APP”) exceeding 29

Weighted TeraFLOPS (WT);

c. “Electronic assemblies” “specially designed” or modified to be capable of enhancing performance by aggregation of processors so that the “APP” of the aggregation exceeds the limit in 4A003.b.;

**Note 1:** 4A003.c applies only to “electronic assemblies” and programmable interconnections not exceeding the limit in 4A003.b when shipped as unintegrated “electronic assemblies.”

**Note 2:** 4A003.c does not control “electronic assemblies” “specially designed” for a product or family of products whose maximum configuration does not exceed the limit of 4A003.b.

d. to f. [Reserved]

**N.B.:** For “electronic assemblies,” modules or equipment, performing analog-to-digital conversions, see 3A002.h.

g. Equipment “specially designed” for aggregating the performance of “digital computers” by providing external interconnections which allow communications at unidirectional data rates exceeding 2.0 Gbyte/s per link.

**Note:** 4A003.g does not control internal interconnection equipment (e.g., backplanes, buses) passive interconnection equipment, “network access controllers” or “communication channel controllers”.

**\*\*4A004** Computers as follows (see List of Items Controlled) and “specially designed” related equipment, “electronic assemblies” and “components” therefor.

#### License Requirements

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: \$5000  
GBS: N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

- a. ‘Systolic array computers’;
- b. ‘Neural computers’;
- c. ‘Optical computers’.

**Technical Notes:**

1. ‘Systolic array computers’ are computers where the flow and modification of the data is dynamically controllable at the logic gate level by the user.

2. ‘Neural computers’ are computational devices designed or modified to mimic the behaviour of a neuron or a collection of neurons, i.e., computational devices which are distinguished by their hardware capability to modulate the weights and numbers of the interconnections of a multiplicity of computational components based on previous data.

3. ‘Optical computers’ are computers designed or modified to use light to represent data and whose computational logic elements are based on directly coupled optical devices.

**\*\*4A101** Analog computers, “digital computers” or digital differential analyzers, other than those controlled by 4A001 designed or modified for use in “missiles”, having any of the following (see List of Items Controlled).

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

*Note:* 4A980 does not control equipment limited to one finger and designed for user authentication or access control.

**\*\*4A994** Computers, “electronic assemblies” and related equipment, not controlled by 4A001 or 4A003, and “specially designed” “parts” and “components” therefor (see List of Items Controlled).

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

*Note 1:* The control status of the “digital computers” and related equipment described in 4A994 is determined by the control status of other equipment or systems provided:

a. The “digital computers” or related equipment are essential for the operation of the other equipment or systems;

b. The “digital computers” or related equipment are not a “principal element” of the other equipment or systems; and

**N.B. 1:** The control status of “signal processing” or “image enhancement” equipment “specially designed” for other equipment with functions limited to those required for the other equipment is determined by the control status of the other equipment even if it exceeds the “principal element” criterion.

**N.B. 2:** For the control status of “digital computers” or related equipment for telecommunications equipment, see Category 5, Part 1 (Telecommunications).

c. The “technology” for the “digital computers” and related equipment is determined by 4E.

a. Electronic computers and related equipment, and “electronic assemblies” and “specially designed” “parts” and “components” therefor, rated for operation at an ambient temperature above 343 K (70°C);

b. “Digital computers”, including equipment of “signal processing” or image enhancement”, having an “Adjusted Peak Performance” (“APP”) equal to or greater than 0.0128 Weighted TeraFLOPS (WT);

c. “Electronic assemblies” that are “specially designed” or modified to enhance performance by aggregation of processors, as follows:

c.1. Designed to be capable of aggregation in configurations of 16 or more processors;

c.2. [Reserved];

**Note 1:** 4A994.c applies only to “electronic assemblies” and programmable interconnections with a “APP” not exceeding the limits in 4A994.b, when shipped as unintegrated “electronic assemblies”. It does not apply to “electronic assemblies” inherently limited by nature of their design for use as related equipment controlled by 4A994.k.

**Note 2:** 4A994.c does not control any “electronic assembly” “specially designed” for a product or family of products whose maximum configuration does not exceed the limits of 4A994.b.

d. [Reserved];

e. [Reserved];

f. Equipment for “signal processing” or “image enhancement” having an “Adjusted Peak Performance” (“APP”) equal to or greater than 0.0128 Weighted TeraFLOPS WT;

g. [Reserved];

h. [Reserved];

i. Equipment containing “terminal interface equipment” exceeding the limits in 5A991;

j. Equipment “specially designed” to provide external interconnection of “digital computers” or associated equipment that allows communications at data rates exceeding 80 Mbyte/s.

**Note:** 4A994.j does not control internal interconnection equipment (e.g., backplanes, buses) passive interconnection equipment, “network access controllers” or “communication channel controllers”.

k. “Hybrid computers” and “electronic assemblies” and “specially designed” “parts” and “components” therefor containing analog-to-digital converters having all of the following characteristics:

k.1. 32 channels or more; and

k.2. A resolution of 14 bit (plus sign bit) or more with a conversion rate of 200,000 conversions/s or more.

## B. TEST, INSPECTION AND “PRODUCTION EQUIPMENT”

[Reserved]

## C. “MATERIALS”

[Reserved]

**D. “SOFTWARE”**

*Note: The control status of “software” for equipment described in other Categories is dealt with in the appropriate Category.*

**\*\*4D001 “Software” as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, CC, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
CC applies to “software” for computerized finger-print equipment controlled by 4A003 for CC reasons	CC Column 1
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

**TSR:** Yes, except for “software” for the “development” or “production” of commodities with an “Adjusted Peak Performance” (“APP”) exceeding 29 WT.

**APP:** Yes to specific countries (see §740.7 of the EAR for eligibility criteria)

**Special Conditions for STA**

**STA:** License Exception STA may not be used to ship or transmit “software” “specially designed” for the “development” or “production” of equipment specified by ECCN 4A001.a.2 or for the “development” or “production” of “digital computers” having an ‘Adjusted Peak Performance’ (‘APP’) exceeding 29 Weighted TeraFLOPS (WT) to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

a. “Software” “specially designed” or modified for the “development” or “production”, of equipment or “software” controlled by 4A001, 4A003, 4A004, or 4D (except 4D980, 4D993 or 4D994).

b. “Software”, other than that controlled by 4D001.a, “specially designed” or modified for the “development” or “production” of equipment as follows:

b.1. “Digital computers” having an “Adjusted Peak Performance” (“APP”) exceeding 15 Weighted TeraFLOPS (WT);

b.2. “Electronic assemblies” “specially designed” or modified for enhancing performance by aggregation of processors so that the “APP” of the aggregation exceeds the limit in 4D001.b.1.

**\*\*4D980 “Software” “specially designed” for the “development,” “production” or “use” of**

**commodities controlled by 4A980.**

TSR: N/A

**License Requirements**

*Reason for Control:* CC, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
CC applies to entire entry	CC Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*4D993** “Program” proof and validation “software,” “software” allowing the automatic generation of “source codes,” and operating system “software” that are “specially designed” for “real-time processing” equipment (see List of Items Controlled). **License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* “Global interrupt latency time” is the time taken by the computer system to recognize an interrupt due to the event, service the interrupt and perform a context switch to an alternate memory-resident task waiting on the interrupt.

*Items:*

- a. “Program” proof and validation “software” using mathematical and analytical techniques and designed or modified for “programs” having more than 500,000 “source code” instructions;
- b. “Software” allowing the automatic generation of “source codes” from data acquired on line from external sensors described in the Commerce Control List; *or*
- c. Operating system “software” “specially designed” for “real-time processing” equipment that guarantees a “global interrupt latency time” of less than 20 microseconds.

**\*\*4D994** “Software” other than that controlled in 4D001 “specially designed” or modified for the “development”, “production”, or “use” of equipment controlled by 4A101, 4A994.

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for

a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

Related Controls: N/A

Related Definitions: N/A

Items:

The list of items controlled is contained in the ECCN heading.

**E. “TECHNOLOGY”**

**\*\*4E001 “Technology” as follows (see List of Items Controlled).**

**License Requirements**

Reason for Control: NS, MT, CC, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 1.
MT applies to “technology” for items controlled by 4A001.a and 4A101 for MT reasons	MT Column 1.
CC applies to “software” for computerized finger-print equipment controlled by 4A003 for CC reasons	CC Column 1.
AT applies to entire entry	AT Column 1.

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: Yes, except for “technology” for the “development” or “production” of commodities with an “Adjusted Peak Performance” (“APP”) exceeding 29 WT.

APP: Yes to specific countries (see §740.7 of the EAR for eligibility criteria).

**Special Conditions for STA**

STA: License Exception STA may not be used to ship or transmit “technology” according to the General Technology Note for the “development” or “production” of any of the following equipment or “software”: a. Equipment specified by ECCN 4A001.a.2; b. “Digital computers” having an ‘Adjusted Peak Performance’ (‘APP’) exceeding 29 Weighted TeraFLOPS (WT); or c. “software” specified in the License Exception STA paragraph found in the License Exception section of ECCN 4D001 to any of the destinations listed in Country Group A:6 (See Supplement No. 1 to part 740 of the EAR).

**List of Items Controlled**

Related Controls: N/A

Related Definitions: N/A

Items:

a. “Technology” according to the General Technology Note, for the “development”, “production”, or “use” of equipment or “software” controlled by 4A (except 4A980 or 4A994) or 4D (except 4D980, 4D993, 4D994).

b. “Technology” according to the General Technology Note, other than that controlled by 4E001.a, for the “development” or “production” of equipment as follows:

b.1. “Digital computers” having an “Adjusted Peak Performance” (“APP”) exceeding 15 Weighted TeraFLOPS (WT);

b.2. “Electronic assemblies” “specially designed” or modified for enhancing performance by aggregation of processors so that the “APP” of the aggregation exceeds the limit in 4E001.b.1.

**\*\*4E980** “Technology” for the “development,” “production” or “use” of commodities controlled by 4A980.

**License Requirements**

*Reason for Control:* CC, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
CC applies to entire entry	CC Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*4E992** “Technology” other than that controlled in 4E001 for the “development,” “production,” or “use” of equipment controlled by 4A994, or “software” controlled

by 4D993 or 4D994.

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*4E993** “Technology” for the “development” or “production” of equipment designed for “multi-data-stream processing.”

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* N/A

**List of Items Controlled**

Related Controls: N/A  
 Related Definitions: N/A  
 Items:

The list of items controlled is contained in the ECCN heading.

**EAR99** Items subject to the EAR that are *not* elsewhere specified in this CCL Category or in any other category in the CCL are designated by the number **EAR99**.

-----

#### **TECHNICAL NOTE ON “ADJUSTED PEAK PERFORMANCE” (“APP”)**

“APP” is an adjusted peak rate at which “digital computers” perform 64-bit or larger floating point additions and multiplications.

##### **Abbreviations used in this Technical Note**

$n$  number of processors in the “digital computer”  
 $I$  processor number ( $i, \dots, n$ )  
 $t_i$  processor cycle time ( $t_i = 1/F_i$ )  
 $F_i$  processor frequency  
 $R_i$  peak floating point calculating rate  
 $W_i$  architecture adjustment factor

“APP” is expressed in Weighted TeraFLOPS (WT), in units of  $10^{12}$  adjusted floating point operations per second.

##### **Outline of “APP” calculation method**

1. For each processor  $i$ , determine the peak number of 64-bit or larger floating-point operations,  $FPO_i$ , performed per cycle for each processor in the “digital computer”.

**Note:** In determining  $FPO$ , include only 64-bit or larger floating point additions or multiplications. All floating point operations

must be expressed in operations per processor cycle; operations requiring multiple cycles may be expressed in fractional results per cycle. For processors not capable of performing calculations on floating-point operands of 64-bits or more the effective calculating rate  $R$  is zero.

2. Calculate the floating point rate  $R$  for each processor

$$R_i = FPO_i/t_i.$$

3. Calculate “APP” as

$$“APP” = W_1 \times R_1 + W_2 \times R_2 + \dots + W_n \times R_n.$$

4. For ‘vector processors,’  $W_i = 0.9$ . For non-‘vector processors,’  $W_i = 0.3$ .

**Note 1:** For processors that perform compound operations in a cycle, such as an addition and multiplication, each operation is counted.

**Note 2:** For a pipelined processor the effective calculating rate  $R$  is the faster of the pipelined rate, once the pipeline is full, or the non-pipelined rate.

**Note 3:** The calculating rate  $R$  of each contributing processor is to be calculated at its maximum value theoretically possible before the “APP” of the combination is derived. Simultaneous operations are assumed to exist when the computer manufacturer claims concurrent, parallel, or simultaneous operation or execution in a manual or brochure for the computer.

**Note 4:** Do not include processors that are limited to input/output and peripheral functions (e.g., disk drive, communication and video display) when calculating “APP”.

**Note 5:** “APP” values are not to be calculated for processor combinations(inter)connected by “Local Area

*Networks”, Wide Area Networks, I/O shared connections/devices, I/O controllers and any communication interconnection implemented by “software”.*

***Note 6:** “APP” values must be calculated for processor combinations containing processors “specially designed” to enhance performance by aggregation, operating simultaneously and sharing memory*

**Technical Notes**

*1. Aggregate all processors and accelerators operating simultaneously and located on the same die.*

*2. Processor combinations share memory when any processor is capable of accessing any memory location in the system through the hardware transmission of cache lines or memory words, without the involvement of any software mechanism, which may be achieved using “electronic assemblies” specified in 4A003.c.*

***Note 7:** A ‘vector processor’ is defined as a processor with built-in instructions that perform multiple calculations on floating-point vectors (one-dimensional arrays of 64-bit or larger numbers) simultaneously, having at least 2 vector functional units and at least 8 vector registers of at least 64 elements each.*

**CATEGORY 5 –  
TELECOMMUNICATIONS AND  
“INFORMATION SECURITY”  
Part 1 – TELECOMMUNICATIONS**

**Notes:**

1. The control status of “components,” test and “production” equipment, and “software” therefor which are “specially designed” for telecommunications equipment or systems is determined in Category 5, Part 1.

**N.B.:** For “lasers” “specially designed” for telecommunications equipment or systems, see ECCN 6A005.

2. “Digital computers”, related equipment “software”, when essential for the operation and support of telecommunications equipment described in this Category, are regarded as “specially designed” “components,” provided they are the standard models customarily supplied by the manufacturer. This includes operation, administration, maintenance, engineering or billing computer systems.

**A. – “END ITEMS,” “EQUIPMENT,”  
“ACCESSORIES,” “ATTACHMENTS,”  
“PARTS,” “COMPONENTS,” AND  
“SYSTEMS”**

**\*\*5A001** Telecommunications systems, equipment, “components” and “accessories,” as follows (see List of Items Controlled).

**License Requirements**

Reason for Control: NS, SL, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to 5A001.a, b.5, .e, .f.3 and .h	NS Column 1

NS applies to 5A001.b (except .b.5), .c, .d, .f (except f.3), and .g.	NS Column 2
SL applies to 5A001.f.1	A license is required for all destinations, as specified in §742.13 of the EAR. Accordingly, a column specific to this control does not appear on the Commerce Country Chart (Supplement No. 1 to Part 738 of the EAR).  <i>Note to SL paragraph: This licensing requirement does not supersede, nor does it implement, construe or limit the scope of any criminal statute, including, but not limited to the Omnibus Safe Streets Act of 1968, as amended.</i>
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

**LVS:** N/A for 5A001.a, b.5, .e, f.3 and .h; \$5000 for 5A001.b.1, .b.2, .b.3, .b.6, .d, f.2, f.4, and .g; \$3000 for 5A001.c.  
**GBS:** Yes, except 5A001.a, b.5, e, and h.

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship any commodity in 5A001.b.3, .b.5 or .h to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

### List of Items Controlled

*Related Controls:* (1) See USML Category XI for controls on direction-finding “equipment” including types of “equipment” in ECCN 5A001.e and any other military or intelligence electronic “equipment” that is “subject to the ITAR.” (2) See USML Category XI(a)(4)(iii) for controls on electronic attack and jamming “equipment” defined in 5A001.f and .h that are subject to the ITAR. (3) See also ECCNs 5A101, 5A980, and 5A991.

*Related Definitions:* N/A

*Items:*

a. Any type of telecommunications equipment having any of the following characteristics, functions or features:

a.1. “Specially designed” to withstand transitory electronic effects or electromagnetic pulse effects, both arising from a nuclear explosion;

a.2. Specially hardened to withstand gamma, neutron or ion radiation;

a.3. “Specially designed” to operate below 218 K (-55°C); *or*

a.4. “Specially designed” to operate above 397 K (124° C);

*Note:* 5A001.a.3 and 5A001.a.4 apply only to electronic equipment.

b. Telecommunication systems and equipment, and “specially designed” “components” and

“accessories” therefor, having any of the following characteristics, functions or features:

b.1 Being underwater untethered communications systems having any of the following:

b.1.a. An acoustic carrier frequency outside the range from 20 kHz to 60 kHz;

b.1.b. Using an electromagnetic carrier frequency below 30 kHz; *or*

b.1.c. Using electronic beam steering techniques; *or*

b.1.d. Using “lasers” or light-emitting diodes (LEDs), with an output wavelength greater than 400 nm and less than 700 nm, in a “local area network”;

b.2. Being radio equipment operating in the 1.5 MHz to 87.5 MHz band and having all of the following:

b.2.a. Automatically predicting and selecting frequencies and “total digital transfer rates” per channel to optimize the transmission; *and*

b.2.b. Incorporating a linear power amplifier configuration having a capability to support multiple signals simultaneously at an output power of 1 kW or more in the frequency range of 1.5 MHz or more but less than 30 MHz, or 250 W or more in the frequency range of 30 MHz or more but not exceeding 87.5 MHz, over an “instantaneous bandwidth” of one octave or more and with an output harmonic and distortion content of better than -80 dB;

b.3. Being radio equipment employing “spread spectrum” techniques, including “frequency hopping” techniques, not controlled in 5A001.b.4 and having any of the following :

b.3.a. User programmable spreading codes; *or*

b.3.b. A total transmitted bandwidth which is 100 or more times the bandwidth of any one information channel and in excess of 50 kHz;

**Note:** 5A001.b.3.b does not control radio equipment “specially designed” for use with any of the following:

a. Civil cellular radio-communications systems; *or*

b. Fixed or mobile satellite Earth stations for commercial civil telecommunications.

**Note:** 5A001.b.3 does not control equipment operating at an output power of 1 W or less.

b.4. Being radio equipment employing ultra-wideband modulation techniques, having user programmable channelizing codes, scrambling codes, or network identification codes and having any of the following:

b.4.a. A bandwidth exceeding 500 MHz; *or*

b.4.b. A “fractional bandwidth” of 20% or more;

b.5. Being digitally controlled radio receivers having all of the following:

b.5.a. More than 1,000 channels;

b.5.b. A ‘channel switching time’ of less than 1 ms;

b.5.c. Automatic searching or scanning of a part of the electromagnetic spectrum; *and*

b.5.d. Identification of the received signals or the type of transmitter; *or*

**Note:** 5A001.b.5 does not control radio equipment “specially designed” for use with civil cellular radio-communications systems.

**Technical Note:** ‘Channel switching time’: the time (i.e., delay) to change from one receiving frequency to another, to arrive at or within  $\pm 0.05\%$  of the final specified receiving frequency. Items having a specified frequency range of less than  $\pm 0.05\%$  around their center frequency are defined to be incapable of channel frequency switching.

b.6. Employing functions of digital “signal processing” to provide ‘voice coding’ output at rates of less than 700 bit/s.

**Technical Notes:**

1. For variable rate ‘voice coding’, 5A001.b.6 applies to the ‘voice coding’ output of continuous speech.

2. For the purpose of 5A001.b.6, ‘voice coding’ is defined as the technique to take samples of human voice and then convert these samples of human voice into a digital signal taking into account specific characteristics of human speech.

c. Optical fibers of more than 500 m in length and specified by the manufacturer as being capable of withstanding a ‘proof test’ tensile stress of  $2 \times 10^9$  N/m<sup>2</sup> or more;

**N.B.:** For underwater umbilical cables, see 8A002.a.3.

**Technical Note:** ‘Proof Test’: on-line or off-line production screen testing that dynamically applies a prescribed tensile stress over a 0.5 to 3 m length of fiber at a running rate of 2 to 5 m/s while passing between capstans approximately 150 mm in diameter. The ambient temperature is a nominal 293 K (20°C) and relative humidity 40%. Equivalent national standards may be used for executing the proof test.

d. “Electronically steerable phased array antennae” as follows:

d.1. Rated for operation above 31.8 GHz, but not exceeding 57 GHz, and having an Effective Radiated Power (ERP) equal to or greater than +20 dBm (22.15 dBm Effective Isotropic Radiated Power (EIRP));

d.2. Rated for operation above 57 GHz, but not exceeding 66 GHz, and having an ERP equal to or greater than +24 dBm (26.15 dBm EIRP);

d.3. Rated for operation above 66 GHz, but not exceeding 90 GHz, and having an ERP equal to or greater than +20 dBm (22.15 dBm EIRP);

d.4. Rated for operation above 90 GHz;

**Note 1:** *5A001.d does not control ‘electronically steerable phased array antennae’ for landing systems with instruments meeting ICAO standards covering Microwave Landing Systems (MLS).*

**Note 2:** *5A001.d does not apply to antennae specially designed for any of the following:*

a. *Civil cellular or WLAN radio-communications systems;*

b. *IEEE 802.15 or wireless HDMI; or*

c. *Fixed or mobile satellite earth stations for commercial civil telecommunications.*

**Technical Note:** *For the purposes of 5A001.d ‘electronically steerable phased array antenna’ is an antenna which forms a beam by means of phase coupling, (i.e., the beam direction is controlled by the complex excitation coefficients of the radiating elements) and the direction of that beam can be varied (both in transmission and reception) in azimuth or in elevation, or both, by application of an electrical signal.*

e. Radio direction finding equipment operating at frequencies above 30 MHz and having all of the following, and “specially designed” “components” therefor:

e.1. “Instantaneous bandwidth” of 10 MHz or more; and

e.2. Capable of finding a Line Of Bearing (LOB) to non-cooperating radio transmitters with a signal duration of less than 1 ms;

f. Mobile telecommunications interception or jamming equipment, and monitoring equipment therefor, as follows, and “specially designed” “components” therefor:

f.1. Interception equipment designed for the extraction of voice or data, transmitted over the air interface;

f.2. Interception equipment not specified in 5A001.f.1, designed for the extraction of client device or subscriber identifiers (e.g., IMSI, TIMSI or IMEI), signaling, or other metadata transmitted over the air interface;

f.3. Jamming equipment “specially designed” or modified to intentionally and selectively interfere with, deny, inhibit, degrade or seduce mobile telecommunication services and performing any of the following:

f.3.a. Simulate the functions of Radio Access Network (RAN) equipment;

f.3.b. Detect and exploit specific characteristics of the mobile telecommunications protocol employed (e.g., GSM); *or*

f.3.c. Exploit specific characteristics of the mobile telecommunications protocol employed (e.g., GSM);

f.4. Radio Frequency (RF) monitoring equipment designed or modified to identify the

operation of items specified in 5A001.f.1, 5A001.f.2 or 5A001.f.3.

*Note:* 5A001.f.1 and 5A001.f.2 do not apply to any of the following:

a. Equipment “specially designed” for the interception of analog Private Mobile Radio (PMR), IEEE 802.11 WLAN;

b. Equipment designed for mobile telecommunications network operators; or

c. Equipment designed for the “development” or “production” of mobile telecommunications equipment or systems.

**N.B. 1:** See also the International Traffic in Arms Regulations (ITAR) (22 CFR Parts 120-130). For items specified by 5A001.f.1 (including as previously specified by 5A001.i), see also 5A980 and the U.S. Munitions List (22 CFR part 121).

**N.B. 2:** For radio receivers see 5A001.b.5.

g. Passive Coherent Location (PCL) systems or equipment, “specially designed” for detecting and tracking moving objects by measuring reflections of ambient radio frequency emissions, supplied by non-radar transmitters.

**Technical Note:** Non-radar transmitters may include commercial radio, television or cellular telecommunications base stations.

*Note:* 5A001.g. does not control:

a. Radio-astronomical equipment; or

b. Systems or equipment, that require any radio transmission from the target.

h. Counter Improvised Explosive Device (IED) equipment and related equipment, as follows:

h.1. Radio Frequency (RF) transmitting equipment, not specified by 5A001.f, designed or modified for prematurely activating or preventing the initiation of Improvised Explosive Devices (IEDs);

h.2. Equipment using techniques designed to enable radio communications in the same frequency channels on which co-located equipment specified by 5A001.h.1 is transmitting.

**N.B.:** See also Category XI of the International Traffic in Arms Regulations (ITAR) (22 CFR Parts 120-130).

i. [Reserved]

**N.B.:** See 5A001.f.1 for items previously specified by 5A001.i.

**\*\*5A101** Telemetry and telecontrol equipment, including ground equipment, designed or modified for unmanned aerial vehicle (including cruise missiles, target drones, and reconnaissance drones) or rocket systems (including ballistic missiles, space launch vehicles, and sounding rockets) capable of a maximum “range” equal to or greater than 300 km.

**License Requirements**

*Reason for Control:* MT, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

LVS: N/A

GBS: N/A

### List of Items Controlled

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**NOTE: 5A101 does not control:**

1. *Telecontrol equipment “specially designed” to be used for remote control of recreational model planes, boats or vehicles and having an electric field strength of not more than 200 microvolts per meter at a distance of 500 meters;*

2. *Equipment designed or modified for manned aircraft or satellites;*

3. *Ground based equipment designed or modified for terrestrial or marine applications;*

4. *Equipment designed for commercial, civil, or safety of life (e.g., data integrity or flight safety) Global Navigation Satellite System services.*

**NOTE:** *ECCN 5A101 does not include items not designed or modified for unmanned aerial vehicles (including cruise missiles, target drones, and reconnaissance drones) or rocket systems (including ballistic missiles, space launch vehicles and sounding rockets) capable of a maximum “range” equal to or greater than 300km (e.g., telemetry circuit cards limited by design to reception only and designed for use in personal computers).*

**\*\*5A611** **Telecommunications equipment, and “parts,” “components,” “accessories,” and “attachments” “specially designed” therefor, “specially designed” for a military**

**application that are not enumerated in any USML category are controlled by ECCN 3A611.**

**\*\*5A980** **Devices primarily useful for the surreptitious interception of wire, oral, or electronic communications, other than those controlled under 5A001.f.1; and “parts,” “components” and “accessories” therefor.**

### License Requirements

*Reason for Control:* SL, AT

*Control(s):* SL and AT apply to entire entry. A license is required for all destinations, as specified in §742.13 of the EAR. Accordingly, a column specific to this control does not appear on the Commerce Country Chart (Supplement No. 1 to Part 738 of the EAR).

**Note:** *This licensing requirement does not supersede, nor does it implement, construe or limit the scope of any criminal statute, including, but not limited to the Omnibus Safe Streets Act of 1968, as amended.*

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

### List of Items Controlled

*Related Controls:* (1) See ECCN 5A001.f.1 for systems or equipment, “specially designed” or modified to intercept and process the air interface of 'mobile telecommunications', and “specially designed” components therefor. (2) See ECCN 5D980 for “software” for the “development”, “production” or “use” of equipment controlled by 5A980. (3) See ECCN 5E980 for the “technology” for the

“development”, “production”, and “use” of equipment controlled by 5A980.

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*5A991 Telecommunication equipment, not controlled by 5A001 (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See also 5E101 and 5E991.

*Related Definitions:* 1) ‘Asynchronous transfer mode’ (*ATM*) is a transfer mode in which the information is organized into cells; it is asynchronous in the sense that the recurrence of cells depends on the required or instantaneous bit rate. 2) ‘Bandwidth of one voice channel’ is data communication equipment designed to operate in one voice channel of 3,100 Hz, as defined in CCITT Recommendation G.151. 3) ‘Communications channel controller’ is the physical interface that controls the flow of synchronous or asynchronous digital information. It is an assembly that can be integrated into computer or telecommunications

equipment to provide communications access. 4) ‘Datagram’ is a self-contained, independent entity of data carrying sufficient information to be routed from the source to the destination data terminal equipment without reliance on earlier exchanges between this source and destination data terminal equipment and the transporting network. 5) ‘Fast select’ is a facility applicable to virtual calls that allows data terminal equipment to expand the possibility to transmit data in call set-up and clearing ‘packets’ beyond the basic capabilities of a virtual call. 6) ‘Gateway’ is the function, realized by any combination of equipment and “software”, to carry out the conversion of conventions for representing, processing or communicating information used on one system into the corresponding, but different conventions used in another system. 7) ‘Integrated Services Digital Network’ (ISDN) is a unified end-to-end digital network, in which data originating from all types of communication (*e.g.*, voice, text, data, still and moving pictures) are transmitted from one port (terminal) in the exchange (switch) over one access line to and from the subscriber. 8) ‘Packet’ is a group of binary digits including data and call control signals that is switched as a composite whole. The data, call control signals, and possible error control information are arranged in a specified format.

*Items:*

- a. Any type of telecommunications equipment, not controlled by 5A001.a, “specially designed” to operate outside the temperature range from 219 K (-54 EC) to 397 K (124 EC).
- b. Telecommunication transmission equipment and systems, and “specially designed” “parts,” “components” and “accessories” therefor, having any of the following characteristics, functions or features:

**Note:** Telecommunication transmission equipment:

a. Categorized as follows, or combinations thereof:

1. Radio equipment (e.g., transmitters, receivers and transceivers);
2. Line terminating equipment;
3. Intermediate amplifier equipment;
4. Repeater equipment;
5. Regenerator equipment;
6. Translation encoders (transcoders);
7. Multiplex equipment (statistical multiplex included);
8. Modulators/demodulators (modems);
9. Transmultiplex equipment (see CCITT Rec. G701);
10. "Stored program controlled" digital crossconnection equipment;
11. 'Gateways' and bridges;
12. "Media access units"; and

b. Designed for use in single or multi-channel communication via any of the following:

1. Wire (line);
2. Coaxial cable;
3. Optical fiber cable;
4. Electromagnetic radiation; or

5. Underwater acoustic wave propagation.

b.1. Employing digital techniques, including digital processing of analog signals, and designed to operate at a "digital transfer rate" at the highest multiplex level exceeding 45 Mbit/s or a "total digital transfer rate" exceeding 90 Mbit/s;

**Note:** 5A991.b.1 does not control equipment "specially designed" to be integrated and operated in any satellite system for civil use.

b.2. Modems using the 'bandwidth of one voice channel' with a "data signaling rate" exceeding 9,600 bits per second;

b.3. Being "stored program controlled" digital cross connect equipment with "digital transfer rate" exceeding 8.5 Mbit/s per port.

b.4. Being equipment containing any of the following:

b.4.a. 'Network access controllers' and their related common medium having a "digital transfer rate" exceeding 33 Mbit/s; or

b.4.b. "Communication channel controllers" with a digital output having a "data signaling rate" exceeding 64,000 bit/s per channel;

**Note:** If any uncontrolled equipment contains a "network access controller", it cannot have any type of telecommunications interface, except those described in, but not controlled by 5A991.b.4.

b.5. Employing a "laser" and having any of the following characteristics:

b.5.a. A transmission wavelength exceeding 1,000 nm; or

b.5.b. Employing analog techniques and having a bandwidth exceeding 45 MHz;

*Note: 5A991.b.5.b does not control commercial TV systems.*

b.5.c. Employing coherent optical transmission or coherent optical detection techniques (also called optical heterodyne or homodyne techniques);

b.5.d. Employing wavelength division multiplexing techniques; *or*

b.5.e. Performing “optical amplification”;

b.6. Radio equipment operating at input or output frequencies exceeding:

b.6.a. 31 GHz for satellite-earth station applications; *or*

b.6.b. 26.5 GHz for other applications;

*Note: 5A991.b.6. does not control equipment for civil use when conforming with an International Telecommunications Union (ITU) allocated band between 26.5 GHz and 31 GHz.*

b.7. Being radio equipment employing any of the following:

b.7.a. Quadrature-amplitude-modulation (QAM) techniques above level 4 if the “total digital transfer rate” exceeds 8.5 Mbit/s;

b.7.b. QAM techniques above level 16 if the “total digital transfer rate” is equal to or less than 8.5 Mbit/s;

b.7.c. Other digital modulation techniques and having a “spectral efficiency” exceeding 3 bit/s/Hz; *or*

b.7.d. Operating in the 1.5 MHz to 87.5 MHz band and incorporating adaptive techniques providing more than 15 dB suppression of an interfering signal.

**Notes:**

1. 5A991.b.7 does not control equipment “specially designed” to be integrated and operated in any satellite system for civil use.

2. 5A991.b.7 does not control radio relay equipment for operation in an ITU allocated band:

a. Having any of the following:

a.1. Not exceeding 960 MHz; *or*

a.2. With a “total digital transfer rate” not exceeding 8.5 Mbit/s; *and*

b. Having a “spectral efficiency” not exceeding 4 bit/s/Hz.

c. “Stored program controlled” switching equipment and related signaling systems, having any of the following characteristics, functions or features, and “specially designed” “parts,” “components” and “accessories” therefor:

*Note: Statistical multiplexers with digital input and digital output which provide switching are treated as “stored program controlled” switches.*

c.1. “Data (message) switching” equipment or systems designed for “packet-mode operation” and “parts,” electronic assemblies and “components” therefor, n.e.s.

c.2. [Reserved];

c.3. Routing or switching of ‘datagram’ packets;

c.4. [Reserved]

*Note: The restrictions in 5A991.c.3 do not apply to networks restricted to using only*

*‘network access controllers’ or to ‘network access controllers’ themselves.*

c.5. Multi-level priority and pre-emption for circuit switching;

*Note: 5A991.c.5 does not control single-level call preemption.*

c.6. Designed for automatic hand-off of cellular radio calls to other cellular switches or automatic connection to a centralized subscriber data base common to more than one switch;

c.7. Containing “stored program controlled” digital cross connect equipment with “digital transfer rate” exceeding 8.5 Mbit/s per port.

c.8. “Common channel signaling” operating in either non-associated or quasi-associated mode of operation;

c.9. ‘Dynamic adaptive routing’;

c.10. Being packet switches, circuit switches and routers with ports or lines exceeding any of the following:

c.10.a. A “data signaling rate” of 64,000 bit/s per channel for a ‘communications channel controller’; *or*

*Note: 5A991.c.10.a does not control multiplex composite links composed only of communication channels not individually controlled by 5A991.b.1.*

c.10.b. A “digital transfer rate” of 33 Mbit/s for a ‘network access controller’ and related common media;

*Note: 5A991.c.10 does not control packet switches or routers with ports or lines not exceeding the limits in 5A991.c.10.*

c.11. “Optical switching”;

c.12. Employing ‘Asynchronous Transfer Mode’ (‘ATM’) techniques.

d. Optical fibers and optical fiber cables of more than 50 m in length designed for single mode operation;

e. Centralized network control having all of the following characteristics:

e.1. Receives data from the nodes; *and*

e.2. Process these data in order to provide control of traffic not requiring operator decisions, and thereby performing ‘dynamic adaptive routing’;

*Note: 5A991.e does not preclude control of traffic as a function of predictable statistical traffic conditions.*

f. Phased array antennas, operating above 10.5 GHz, containing active elements and distributed “parts” or “components,” and designed to permit electronic control of beam shaping and pointing, except for landing systems with instruments meeting International Civil Aviation Organization (ICAO) standards (microwave landing systems (MLS)).

g. Mobile communications equipment, n.e.s., and “parts,” electronic assemblies and “components” therefor; *or*

h. Radio relay communications equipment designed for use at frequencies equal to or exceeding 19.7 GHz and “parts” and “components” therefor, n.e.s.

## B. TEST, INSPECTION AND “PRODUCTION EQUIPMENT”

**\*\*5B001** Telecommunication test, inspection and production equipment, “components” and

“accessories,” as follows (See List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$5000  
*GBS:* Yes

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship 5B001.a equipment and “specially designed” components or “accessories” therefor, “specially designed” for the “development” or “production” of equipment, functions or features specified by in ECCN 5A001.b.3, .b.5 or .h to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* See also [5B991](#).  
*Related Definition:* N/A  
*Items:*

a. Equipment and “specially designed” “components” or “accessories” therefor, “specially designed” for the “development” or “production” of equipment, functions or features, controlled by 5A001;

*Note:* 5B001.a does not apply to optical fiber characterization equipment.

b. Equipment and “specially designed” “components” or “accessories” therefor, “specially designed” for the “development” of any of the following telecommunication transmission or switching equipment:

b.1. [Reserved]

b.2. Equipment employing a “laser” and having any of the following:

b.2.a. A transmission wavelength exceeding 1750 nm; or

b.2.b. [Reserved]

b.2.c. [Reserved]

b.2.d. Employing analog techniques and having a bandwidth exceeding 2.5 GHz; or

*Note:* 5B001.b.2.d. does not include equipment “specially designed” for the “development” of commercial TV systems.

b.3. [Reserved]

b.4. Radio equipment employing Quadrature-Amplitude-Modulation (QAM) techniques above level 1,024.

**\*\*5B991 Telecommunications test equipment, n.e.s.**

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**C.="MATERIALS"**

**\*\*5C991** Preforms of glass or of any other material optimized for the manufacture of optical fibers controlled by 5A991.

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738).</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* N/A

**D. "SOFTWARE"**

**\*\*5D001** "Software" as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, SL, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No.1 to part 738)</i>
NS applies to entire entry	NS Column 1.
SL applies to the entire entry as applicable for equipment, functions, features, or characteristics controlled by 5A001.f.1	A license is required for all destinations, as specified in § 742.13 of the EAR. Accordingly, a column specific to this control does not appear on the Commerce Country Chart (Supplement No. 1 to Part 738 of the EAR).  <i>Note to SL paragraph:</i> This licensing requirement does not supersede, implement, construe or limit the scope of any criminal statute, including, but not limited to, the Omnibus Safe Streets Act of 1968, as amended.
AT applies to entire entry	AT Column 1.

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License

Exceptions and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* Yes, except for exports and reexports to destinations outside of those countries listed in Country Group A:5 (See Supplement No. 1 to part 740 of the EAR) of the following:

- (1) “Software” controlled by 5D001.a and “specially designed” for items controlled by 5A001.b.5 and 5A001.h. or
- (2) “Software” controlled by 5D001.e.

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship or transmit 5D001.a “software” “specially designed” for the “development” or “production” of equipment, functions or features, specified by ECCN 5A001.b.3, .b.5 or .h. for “software” “specially designed” or modified to support “technology” specified by the STA paragraph in the License Exception section of ECCN 5E001 to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* See also [5D980](#) and [5D991](#).

*Related Definitions:* N/A

*Items:*

a. “Software” “specially designed” or modified for the “development”, “production” or “use” of equipment, functions or features controlled by 5A001;

b. [Reserved]

c. Specific “software” “specially designed” or modified to provide characteristics, functions or features of equipment, controlled by 5A001 or 5B001;

d. “Software” “specially designed” or modified for the “development” of any of the following telecommunication transmission or switching equipment:

d.1.[Reserved]

d.2. Equipment employing a “laser” and having any of the following:

d.2.a. A transmission wavelength exceeding 1,750 nm; *or*

d.2.b. Employing analog techniques and having a bandwidth exceeding 2.5 GHz; *or*

*Note:* 5D001.d.2.b does not control “software” “specially designed” or modified for the “development” of commercial TV systems.

d.3. [Reserved]

d.4. Radio equipment employing Quadrature-Amplitude-Modulation (QAM) techniques above level 1,024;

e. “Software”, other than that specified by 5D001.a or 5D001.c, “specially designed” or modified for monitoring or analysis by law enforcement, providing all of the following:

e.1. Execution of searches on the basis of “hard selectors” of either the content of communication or metadata acquired from a communications service provider using a ‘handover interface’; *and*

**Technical Notes:**

1. For the purposes of 5D001.e, a ‘handover interface’ is a physical and logical interface, designed for use by an authorised law

enforcement authority, across which targeted interception measures are requested from a communications service provider and the results of interception are delivered from a communications service provider to the requesting authority. The ‘handover interface’ is implemented within systems or equipment (e.g., mediation devices) that receive and validate the interception request, and deliver to the requesting authority only the results of interception that fulfil the validated request.

2. ‘Handover interfaces’ may be specified by international standards (including but not limited to ETSI TS 101 331, ETSI TS 101 671, 3GPP TS 33.108) or national equivalents.

e.2. Mapping of the relational network or tracking the movement of targeted individuals based on the results of searches on content of communication or metadata or searches as described in 5D001.e.1.

*Note:* 5D001.e does not apply to “software” “specially designed” or modified for any of the following:

- a. Billing purposes;
- b. Network Quality of Service (QoS);
- c. Quality of Experience (QoE);
- d. Mediation devices; or
- e. Mobile payment or banking use.

**\*\*5D101** “Software” “specially designed” or modified for the “use” of equipment controlled by 5A101.

**License Requirements**

Accordingly, a column specific to this control does not appear on the Commerce Country Chart (Supplement No. 1 to Part 738 of the EAR).  <i>Note to SL paragraph: This licensing requirement does not supersede, implement, construe or limit the scope of any criminal statute, including, but not limited to, the Omnibus Safe Streets Act of 1968, as amended.</i>
AT applies to entire	AT Column 1.

entry	
-------	--

### Reporting Requirements

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions and Validated End-User authorizations.

### List Based License Exceptions (See Part 740 for a description of all license exceptions)

*TSR:* Yes, except for exports or reexports to destinations outside of those countries listed in Country Group A:5 (See Supplement No. 1 to part 740 of the EAR) of “technology” controlled by 5E001.a for the “development” or “production” of the following:

- (1) Items controlled by 5A001.b.5 or 5A001.h;
- (2) “Software” controlled by 5D001.a that is “specially designed” for the “development” or “production” of equipment, functions or features controlled by 5A001.b.5 or 5A001.h.; or
- (3) “Software” controlled by 5D001.e.

### Special Conditions for STA

*STA:* License Exception STA may not be used to ship or transmit “technology” according to the General Technology Note for the “development” or “production” of equipment, functions or features specified by 5A001.b.3, .b.5 or .h; or for “software” in 5D001.a that is specified in the STA paragraph in the License Exception section of ECCN 5D001 to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

### List of Items Controlled

*Related Controls:* (1) See also [5E101](#), [5E980](#) and [5E991](#). (2) “Technology” for “development” or “production” of “Monolithic Microwave Integrated Circuit” (“MMIC”) amplifiers that meet the control criteria given at 3A001.b.2 is controlled in 3E001; [5E001.d](#) refers only to that additional “technology” “required” for telecommunications.

*Related Definitions:* N/A

*Items:*

a. “Technology” according to the General Technology Note for the “development”, “production” or “use” (excluding operation) of equipment, functions or features, controlled by 5A001 or “software” controlled by 5D001.a or 5D001.e.

b. Specific “technology”, as follows:

b.1. “Technology” “required” for the “development” or “production” of telecommunications equipment “specially designed” to be used on board satellites;

b.2. “Technology” for the “development” or “use” of “laser” communication techniques with the capability of automatically acquiring and tracking signals and maintaining communications through exoatmosphere or sub-surface (water) media;

b.3. “Technology” for the “development” of digital cellular radio base station receiving equipment whose reception capabilities that allow multi-band, multi-channel, multi-mode, multi-coding algorithm or multi-protocol operation can be modified by changes in “software”;

b.4. “Technology” for the “development” of “spread spectrum” techniques, including “frequency hopping” techniques.

*Note:* 5E001.b.4 does not apply to “technology” for the “development” of any of the following:

- a. Civil cellular radio-communications systems; or
- b. Fixed or mobile satellite Earth stations for commercial civil telecommunications.

c. “Technology” according to the General Technology Note for the “development” or “production” of any of the following:

c.1. [Reserved]

c.2. Equipment employing a “laser” and having any of the following:

c.2.a. A transmission wavelength exceeding 1,750 nm;

c.2.b. [Reserved]

c.2.c. [Reserved]

c.2.d. Employing wavelength division multiplexing techniques of optical carriers at less than 100 GHz spacing; or

c.2.e. Employing analog techniques and having a bandwidth exceeding 2.5 GHz;

*Note:* 5E001.c.2.e does not control “technology” for commercial TV systems.

**N.B.:** For “technology” for the “development” or “production” of non-telecommunications equipment employing a “laser”, see Product Group E of Category 6, e.g., 6E00x

c.3. Equipment employing “optical switching” and having a switching time less than 1 ms; or

c.4. Radio equipment having any of the following:

c.4.a. Quadrature-Amplitude-Modulation (QAM) techniques above level 1,024; or

c.4.b. Operating at input or output frequencies exceeding 31.8 GHz; or

*Note:* 5E001.c.4.b does not control “technology” for equipment designed or modified for operation in any frequency band which is “allocated by the ITU” for radio-communications services, but not for radio-determination.

c.4.c. Operating in the 1.5 MHz to 87.5 MHz band and incorporating adaptive techniques providing more than 15 dB suppression of an interfering signal; or

c.5. [Reserved]

c.6. Mobile equipment having all of the following:

c.6.a. Operating at an optical wavelength greater than or equal to 200nm and less than or equal to 400nm; and

c.6.b. Operating as a “local area network”;

d. “Technology” according to the General Technology Note for the “development” or “production” of “Monolithic Microwave Integrated Circuit” (“MMIC”) amplifiers “specially designed” for telecommunications and that are any of the following:

**Technical Note:** For purposes of 5E001.d, the parameter peak saturated power output may also be referred to on product data sheets as output power, saturated power output, maximum power output, peak power output, or peak envelope power output.

d.1. Rated for operation at frequencies

exceeding 2.7 GHz up to and including 6.8 GHz with a “fractional bandwidth” greater than 15%, and having any of the following:

d.1.a. A peak saturated power output greater than 75 W (48.75 dBm) at any frequency exceeding 2.7 GHz up to and including 2.9 GHz;

d.1.b. A peak saturated power output greater than 55 W (47.4 dBm) at any frequency exceeding 2.9 GHz up to and including 3.2 GHz;

d.1.c. A peak saturated power output greater than 40 W (46 dBm) at any frequency exceeding 3.2 GHz up to and including 3.7 GHz;  
*or*

d.1.d. A peak saturated power output greater than 20 W (43 dBm) at any frequency exceeding 3.7 GHz up to and including 6.8 GHz;

d.2. Rated for operation at frequencies exceeding 6.8 GHz up to and including 16 GHz with a “fractional bandwidth” greater than 10%, and having any of the following:

d.2.a. A peak saturated power output greater than 10W (40 dBm) at any frequency exceeding 6.8 GHz up to and including 8.5 GHz;  
*or*

d.2.b. A peak saturated power output greater than 5W (37 dBm) at any frequency exceeding 8.5 GHz up to and including 16 GHz;

d.3. Rated for operation with a peak saturated power output greater than 3 W (34.77 dBm) at any frequency exceeding 16 GHz up to and including 31.8 GHz, and with a “fractional bandwidth” of greater than 10%;

d.4. Rated for operation with a peak saturated power output greater than 0.1 nW (-70 dBm) at any frequency exceeding 31.8 GHz up to and including 37 GHz;

d.5. Rated for operation with a peak saturated

power output greater than 1 W (30 dBm) at any frequency exceeding 37 GHz up to and including 43.5 GHz, and with a “fractional bandwidth” of greater than 10%;

d.6. Rated for operation with a peak saturated power output greater than 31.62 mW (15 dBm) at any frequency exceeding 43.5 GHz up to and including 75 GHz, and with a “fractional bandwidth” of greater than 10%;

d.7. Rated for operation with a peak saturated power output greater than 10 mW (10 dBm) at any frequency exceeding 75 GHz up to and including 90 GHz, and with a “fractional bandwidth” of greater than 5%; *or*

d.8. Rated for operation with a peak saturated power output greater than 0.1 nW (-70 dBm) at any frequency exceeding 90 GHz;

e. “Technology” according to the General Technology Note for the “development” or “production” of electronic devices and circuits, “specially designed” for telecommunications and containing “components” manufactured from “superconductive” materials, “specially designed” for operation at temperatures below the “critical temperature” of at least one of the “superconductive” constituents and having any of the following:

e.1. Current switching for digital circuits using “superconductive” gates with a product of delay time per gate (in seconds) and power dissipation per gate (in watts) of less than  $10^{-14}$  J; *or*

e.2. Frequency selection at all frequencies using resonant circuits with Q-values exceeding 10,000.

**\*\*5E101** “Technology” according to the General Technology Note for the “development”,

“production” or “use” of equipment or software controlled by 5A101 or 5D101.

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>

*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*5E980** “Technology”, other than that controlled by 5E001.a (for 5A001.f.1 and for 5D001.a (for 5A001.f.1)), primarily useful for the “development”, “production”, or “use” of equipment, functions or features, of equipment controlled by 5A980 or “software” controlled by 5D980.

**License Requirements**

*Reason for Control:* SL, AT

*Controls:* SL and AT apply to entire entry. A license is required for all destinations, as specified in §742.13 of the EAR. Accordingly, a column specific to this control does not appear on the Commerce Country Chart (Supplement No. 1 to Part 738 of the EAR).

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* N/A

**List of Items Controlled**

*Related Controls:* See also 5D001.a and .c (for 5A001.f.1 equipment), 5D001.b (supporting 5E001.a “technology” for 5A001.f.1 equipment, or for 5D001.a “software” (for 5A001.f.1 equipment)), and 5E001.a (for 5A001.f.1 equipment, or for 5D001.a “software” for 5A001.f.1 equipment).

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*5E991** “Technology” for the “development”, “production” or “use” of equipment controlled by 5A991 or 5B991, or “software” controlled by 5D991, and other “technologies” as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* 1) ‘Synchronous digital hierarchy’ (SDH) is a digital hierarchy

providing a means to manage, multiplex, and access various forms of digital traffic using a synchronous transmission format on different types of media. The format is based on the Synchronous Transport Module (STM) that is defined by CCITT Recommendation G.703, G.707, G.708, G.709 and others yet to be published. The first level rate of 'SDH' is 155.52 Mbits/s.

2) 'Synchronous optical network' (SONET) is a network providing a means to manage, multiplex and access various forms of digital traffic using a synchronous transmission format on fiber optics. The format is the North America version of 'SDH' and also uses the Synchronous Transport Module (STM). However, it uses the Synchronous Transport Signal (STS) as the basic transport module with a first level rate of 51.81 Mbits/s. The SONET standards are being integrated into those of 'SDH'.

*Items:*

a. Specific "technologies" as follows:

a.1. "Technology" for the processing and application of coatings to optical fiber "specially designed" to make it suitable for underwater use;

a.2. "Technology" for the "development" of equipment employing 'Synchronous Digital Hierarchy' ('SDH') or 'Synchronous Optical Network' ('SONET') techniques.

**EAR99 Items subject to the EAR that are *not* elsewhere specified in this CCL Category *or* in any other category in the CCL are designated by the number EAR99.**

**\*\*Note 3 to Category 5 Part 2 - \*\*Cryptography Note:**

So according to N.B. to Note 3 (Cryptography Note), an item can qualify as "mass market", but (if >64bit) **still** require ENC review.

**\*\*Category 5.2 = 9 ECCNs**

Commerce Control List

Supplement No. 1 to Part 774

**Category 5 - Info. Security**—page 1

**CATEGORY 5 – TELECOMMUNICATIONS  
AND “INFORMATION SECURITY”**

**Part 2 – “INFORMATION SECURITY”**

**Note 1:** [RESERVED]

**Note 2:** Category 5–Part 2, “information security” products, when accompanying their user for the user's personal use or as tools of trade, are eligible for License Exceptions TMP or BAG, subject to the terms and conditions of these license exceptions.

**Note 3:** Cryptography Note: ECCNs 5A002, 5D002.a.1, .b, and .c.1, do not control items as follows:

**a.** Items meeting all of the following:

- 1.** Generally available to the public by being sold, without restriction, from stock at retail selling points by means of any of the following:
  - a. Over-the-counter transactions;
  - b. Mail order transactions;
  - c. Electronic transactions; or
  - d. Telephone call transactions;
- 2.** The cryptographic functionality cannot be easily changed by the user;
- 3.** Designed for installation by the user without further substantial support by the supplier; and
- 4.** When necessary, details of the items are accessible and will be provided, upon request, to the appropriate authority in the exporter's country in order to ascertain compliance with conditions described in paragraphs a.1 through a.3 of this Note;

**b.** Hardware components or ‘executable software’, of existing items described in paragraph a. of this Note, that have been designed for these existing items, and meeting all of the following:

- 1.** “Information security” is not the primary function or set of functions of the component or ‘executable software’;
- 2.** The component or ‘executable software’ does not change any cryptographic functionality of the existing items, or add new cryptographic functionality to the existing items;
- 3.** The feature set of the component or ‘executable software’ is fixed and is not designed or modified to customer specification; and
- 4.** When necessary, as determined by the appropriate authority in the exporter's country, details of the component or ‘executable software’, and details of relevant end-items are accessible and will be provided to the authority upon request, in order to ascertain compliance with conditions described above.

**Technical Note:** For the purpose of the Cryptography Note, ‘executable software’ means “software” in executable form, from an existing hardware component excluded from 5A002, by the Cryptography Note.

**Note:** ‘Executable software’ does not include complete binary images of the “software” running on an end-item.

**Note to the Cryptography Note:**

- 1.** To meet paragraph a. of Note 3, all of the following must apply:
  - a. The item is of potential interest to a wide range of individuals and businesses; and

**NOTE:** Commodities and software pending mass market review are authorized by License Exception ENC under ECCNs 5A002 and 5D002. After the mass market review is complete, such commodities and software **may be exported under ECCNs 5A992 and 5D992** using No License Required (NLR).

b. The price and information about the main functionality of the item are available before purchase without the need to consult the vendor or supplier. A simple price inquiry is not considered to be a consultation.

2. In determining eligibility of paragraph a. of Note 3, BIS may take into account relevant factors such as quantity, price, required technical skill, existing sales channels, typical customers, typical use or any exclusionary practices of the supplier.

**N.B. to Note 3 (Cryptography Note):** You must submit a classification request or self-classification report to BIS for mass market encryption commodities and software eligible for the Cryptography Note employing a key length greater than 64 bits for the symmetric algorithm (or, for commodities and software not implementing any symmetric algorithms, employing a key length greater than 768 bits for asymmetric algorithms described by Technical note 2.b to 5A002.a or greater than 128 bits for elliptic curve algorithms, or any asymmetric algorithm described by Technical Note 2.c to 5A002.a) in accordance with the requirements of § 740.17(b) of the EAR in order to be released from the “EI” and “NS” controls of ECCN 5A002 or 5D002.

"Note 4 a. thru c." is now deleted; which formerly began "Category 5 - Part 2 does not apply to items incorporating or using "cryptography" and meeting all of the following.

**A. “END ITEMS,” “EQUIPMENT,”  
“ACCESSORIES,” “ATTACHMENTS,”  
“PARTS,” “COMPONENTS,” AND  
“SYSTEMS”**

**I. CRYPTOGRAPHIC  
“INFORMATION SECURITY”**

**\*\*5A002** “Information security” systems, equipment and “components,” as follows (see List of Items Controlled).

**License Requirements**

Reason for Control: **NS, AT, EI**

Note that "EI" has no country chart column. Must refer to 742.15 of the EAR.

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 1
AT applies to entire entry	AT Column 1
EI applies to entire entry	Refer to §742.15 of the EAR.

**License Requirements:** EI Control not in the country charts; must see 742.15 EAR for additional license requirements for microprocessors having a processing speed of 5 GFLOPS or more and an arithmetic logic unit with an access width of 32 bit or more, including those incorporating “information security” functionality, and associated “software” and “technology” for the “production” or “development” of such microprocessors.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

**LVS:** Yes: \$500 for “components”.  
N/A for systems and equipment.

**GBS:** N/A

**ENC:** Yes for certain EI controlled commodities, see §740.17 of the EAR for eligibility.

**List of Items Controlled**

*Related Controls:* (1) ECCN 5A002.a controls “component” providing the means or functions necessary for “information security.” All such “components” are presumptively “specially designed” and controlled by 5A002.a. (2) See USML Categories XI (including XI(b)) and XIII(b) (including XIII(b)(2)) for controls on systems, equipment, and components described in 5A002.d or .e that are subject to

the ITAR. (3) For “satellite navigation system” receiving equipment containing or employing decryption see 7A005, and for related decryption “software” and “technology” see 7D005 and 7E001. (4) Noting that items may be controlled elsewhere on the CCL, examples of items not controlled by ECCN 5A002.a.4 include the following: (a) An automobile where the only ‘cryptography for data confidentiality’ having a ‘described security algorithm’ is performed by a Category 5 – Part 2 Note 3 eligible mobile telephone that is built into the car. In this case, secure phone communications support a non-primary function of the automobile but the mobile telephone (equipment), as a standalone item, is not controlled by ECCN 5A002 because it is excluded by the Cryptography Note (Note 3) (See ECCN [5A992.c](#)). (b) An exercise bike with an embedded Category 5 – Part 2 Note 3 eligible web browser, where the only controlled cryptography is performed by the web browser. In this case, secure web browsing supports a non-primary function of the exercise bike but the web browser (“software”), as a standalone item, is not controlled by ECCN [5D002](#) because it is excluded by the Cryptography Note (Note 3) (See ECCN [5D992.c](#)). (5) After classification or self-classification in accordance with § 740.17(b) of the EAR, mass market encryption commodities that meet eligibility requirements are released from “EI” and “NS” controls. These commodities are designated [5A992.c](#).

*Related Definitions:* N/A

*Items:*

a. Designed or modified to use ‘cryptography for data confidentiality’ having a ‘described security algorithm’, where that cryptographic capability is useable, has been activated, or can be activated by means of “cryptographic activation” not employing a secure mechanism, as follows:

a.1. Items having “information security” as a primary function;

a.2. Digital communication or networking systems, equipment or components, not specified in paragraph 5A002.a.1;

a.3. Computers, other items having information storage or processing as a primary function, and components therefor, not specified in paragraphs 5A002.a.1 or .a.2;

*N.B.:* For operating systems see also [5D002.a.1](#) and [.c.1](#).

a.4. Items, not specified in paragraphs 5A002.a.1 to a.3, where the ‘cryptography for data confidentiality’ having a ‘described security algorithm’ meets all of the following:

a.4.a. It supports a non-primary function of the item; *and*

a.4.b. It is performed by incorporated equipment or “software” that would, as a standalone item, be specified by ECCNs 5A002, 5A003, 5A004, 5B002 or 5D002.

*N.B. to paragraph a.4:* See Related Control Paragraph (4) of this ECCN 5A002 for examples of items not controlled by 5A002.a.4.

**Technical Notes:**

**1.** For the purposes of 5A002.a, ‘cryptography for data confidentiality’ means “cryptography” that employs digital techniques and performs any cryptographic function other than any of the following:

**1.a.** “Authentication;”

**1.b.** Digital signature;

**1.c.** Data integrity;

*1.d. Non-repudiation;*

*1.e. Digital rights management, including the execution of copy-protected “software;”*

*1.f. Encryption or decryption in support of entertainment, mass commercial broadcasts or medical records management; or*

*1.g. Key management in support of any function described in paragraphs 1.a to 1.f of this Technical Note paragraph 1.*

*2. For the purposes of 5A002.a, ‘described security algorithm’ means any of the following:*

*2.a. A “symmetric algorithm” employing a key length in excess of 56 bits, not including parity bits;*

*2.b. An “asymmetric algorithm” where the security of the algorithm is based on any of the following:*

*2.b.1. Factorization of integers in excess of 512 bits (e.g., RSA);*

*2.b.2. Computation of discrete logarithms in a multiplicative group of a finite field of size greater than 512 bits (e.g., Diffie-Hellman over  $Z/pZ$ ); or*

*2.b.3. Discrete logarithms in a group other than mentioned in paragraph 2.b.2 of this Technical Note in excess of 112 bits (e.g., Diffie-Hellman over an elliptic curve); or*

*2.c. An “asymmetric algorithm” where the security of the algorithm is based on any of the following:*

*2.c.1. Shortest vector or closest vector problems associated with lattices (e.g., NewHope, Frodo, NTRUEncrypt, Kyber, Titanium);*

*2.c.2. Finding isogenies between Supersingular elliptic curves (e.g., Supersingular Isogeny Key Encapsulation); or*

*2.c.3. Decoding random codes (e.g., McEliece, Niederreiter).*

**Technical Note:** An algorithm described by Technical Note 2.c. may be referred to as being post-quantum, quantum-safe or quantum-resistant.

**Note 1:** Details of items must be accessible and provided upon request, in order to establish any of the following:

*a. Whether the item meets the criteria of 5A002.a.1 to a.4; or*

*b. Whether the cryptographic capability for data confidentiality specified by 5A002.a is usable without “cryptographic activation.”*

**Note 2:** 5A002.a does not control any of the following items, or specially designed “information security” components therefor:

*a. Smart cards and smart card ‘readers/writers’ as follows:*

*a.1. A smart card or an electronically readable personal document (e.g., token coin, e-passport) that meets any of the following:*

*a.1.a. The cryptographic capability meets all of the following:*

*a.1.a.1. It is restricted for use in any of the following:*

*a.1.a.1.a. Equipment or systems, not described by 5A002.a.1 to a.4;*

*a.1.a.1.b. Equipment or systems, not using ‘cryptography for data confidentiality’ having a ‘described security algorithm’; or*

**a.1.a.1.c.** Equipment or systems, excluded from 5A002.a by entries b. to f. of this Note; and

**a.1.a.2.** It cannot be reprogrammed for any other use; or

**a.1.b.** Having all of the following:

**a.1.b.1.** It is specially designed and limited to allow protection of ‘personal data’ stored within;

**a.1.b.2.** Has been, or can only be, personalized for public or commercial transactions or individual identification; and

**a.1.b.3.** Where the cryptographic capability is not user-accessible;

**Technical Note to paragraph a.1.b of Note 2:** ‘Personal data’ includes any data specific to a particular person or entity, such as the amount of money stored and data necessary for “authentication.”

**a.2.** ‘Readers/writers’ specially designed or modified, and limited, for items specified by paragraph a.1 of this Note;

**Technical Note to paragraph a.2 of Note 2:** ‘Readers/writers’ include equipment that communicates with smart cards or electronically readable documents through a network.

**b.** Cryptographic equipment specially designed and limited for banking use or ‘money transactions’;

**Technical Note to paragraph b. of Note 2:** ‘Money transactions’ in 5A002 Note 2 paragraph b. includes the collection and settlement of fares or credit functions.

**c.** Portable or mobile radiotelephones for civil use (e.g., for use with commercial civil cellular radio communication systems) that are not

capable of transmitting encrypted data directly to another radiotelephone or equipment (other than Radio Access Network (RAN) equipment), nor of passing encrypted data through RAN equipment (e.g., Radio Network Controller (RNC) or Base Station Controller (BSC));

**d.** Cordless telephone equipment not capable of end-to-end encryption where the maximum effective range of unboosted cordless operation (i.e., a single, unrelayed hop between terminal and home base station) is less than 400 meters according to the manufacturer’s specifications;

**e.** Portable or mobile radiotelephones and similar client wireless devices for civil use, that implement only published or commercial cryptographic standards (except for anti-piracy functions, which may be non-published) and also meet the provisions of paragraphs a.2 to a.4 of the Cryptography Note (Note 3 in Category 5 – Part 2), that have been customized for a specific civil industry application with features that do not affect the cryptographic functionality of these original non-customized devices;

**f.** Items, where the “information security” functionality is limited to wireless “personal area network” functionality, meeting all of the following:

**f.1.** Implement only published or commercial cryptographic standards; and

**f.2.** The cryptographic capability is limited to a nominal operating range not exceeding 30 meters according to the manufacturer’s specifications, or not exceeding 100 meters according to the manufacturer’s specifications for equipment that cannot interconnect with more than seven devices;

**g.** Mobile telecommunications Radio Access Network (RAN) equipment designed for civil use, which also meet the provisions of paragraphs a.2 to a.4 of the Cryptography Note (Note 3 in Category 5 -- Part 2), having an RF output power

limited to 0.1W (20 dBm) or less, and supporting 16 or fewer concurrent users;

**h.** Routers, switches or relays, where the “information security” functionality is limited to the tasks of “Operations, Administration or Maintenance” (“OAM”) implementing only published or commercial cryptographic standards;

**i.** General purpose computing equipment or servers, where the “information security” functionality meets all of the following:

**i.1.** Uses only published or commercial cryptographic standards; and

**i.2.** Is any of the following:

**i.2.a.** Integral to a CPU that meets the provisions of Note 3 in Category 5–Part 2;

**i.2.b.** Integral to an operating system that is not specified by 5D002; or

**i.2.c.** Limited to “OAM” of the equipment; or

**j.** Items specially designed for a ‘connected civil industry application’, meeting all of the following:

**j.1.** Being any of the following:

**j.1.a.** A network-capable endpoint device meeting any of the following:

**j.1.a.1.** The “information security” functionality is limited to securing ‘non-arbitrary data’ or the tasks of “Operations, Administration or Maintenance” (“OAM”); or

**j.1.a.2.** The device is limited to a specific ‘connected civil industry application’; or

**j.1.b.** Networking equipment meeting all of the following:

**j.1.b.1.** Being specially designed to communicate with the devices specified by paragraph j.1.a above; and

**j.1.b.2.** The “information security” functionality is limited to supporting the ‘connected civil industry application’ of devices specified by paragraph j.1.a above, or the tasks of “OAM” of this networking equipment or of other items specified by paragraph j. of this Note; and

**j.2.** Where the “information security” functionality implements only published or commercial cryptographic standards, and the cryptographic functionality cannot easily be changed by the user.

**Technical Notes:**

**1.** ‘Connected civil industry application’ means a network-connected consumer or civil industry application other than “information security”, digital communication, general purpose networking or computing.

**2.** ‘Non-arbitrary data’ means sensor or metering data directly related to the stability, performance or physical measurement of a system (e.g., temperature, pressure, flow rate, mass, volume, voltage, physical location, etc.), that cannot be changed by the user of the device.

**b.** Being a ‘cryptographic activation token’;

**Technical Note:** A ‘cryptographic activation token’ is an item designed or modified for any of the following:

**1.** Converting, by means of “cryptographic activation”, an item not specified by Category 5-Part 2 into an item specified by 5A002.a or 5D002.c.1, and not released by the Cryptography Note (Note 3 in Category 5-Part 2); or

**2.** Enabling, by means of “cryptographic

activation”, additional functionality specified by 5A002.a of an item already specified by Category 5-Part 2;

c. Designed or modified to use or perform “quantum cryptography;”

**Technical Note:** “Quantum cryptography” is also known as Quantum Key Distribution (QKD).

d. Designed or modified to use cryptographic techniques to generate channelizing codes, scrambling codes or network identification codes, for systems using ultra-wideband modulation techniques and having any of the following:

d.1. A bandwidth exceeding 500 MHz; or

d.2. A “fractional bandwidth” of 20% or more;

e. Designed or modified to use cryptographic techniques to generate the spreading code for “spread spectrum” systems, not specified by 5A002.d, including the hopping code for “frequency hopping” systems.

**\*\*5A992** Equipment not controlled by 5A002 (see List of Items Controlled).

**License Requirements**

*Reason for Control:* AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
AT applies to entire entry	AT Column 1

**License Requirements Note:** See § 744.17 of the EAR for additional license requirements for microprocessors having a processing speed of 5 GFLOPS or more and an arithmetic logic unit with an access width of 32 bit or more, including those incorporating “information security” functionality, and associated “software” and “technology” for the “production” or

“development” of such microprocessors.

N/A for systems and equipment.

GBS: N/A

ENC: Yes for certain EI controlled commodities. See §740.17 of the EAR for eligibility.

**List of Items Controlled**

Related Controls: ECCN 5A004.a controls “components” providing the means or functions necessary for “information security.” All such “components” are presumptively “specially designed” and controlled by 5A004.a.

Related Definitions: N/A

Items:

a. Designed or modified to perform ‘cryptanalytic functions.’

*Note: 5A004.a includes systems or equipment, designed or modified to perform ‘cryptanalytic functions’ by means of reverse engineering.*

*Technical Note: ‘Cryptanalytic functions’ are functions designed to defeat cryptographic mechanisms in order to derive confidential variables or sensitive data, including clear text, passwords or cryptographic keys.*

b. Items, not specified by 5A004.a, designed to

perform all of the following:

b.1. ‘Extract raw data’ from a computing or communications device; *and*

b.2. Circumvent “authentication” or authorisation controls of the device, in order to perform the function described in 5A004.b.1.

**Technical Note:** ‘Extract raw data’ from a computing or communications device means to retrieve binary data from a storage medium, e.g., RAM, flash or hard disk, of the device without interpretation by the device’s operating system or filesystem.

**Note 1:** 5A004.b does not apply to systems or equipment specially designed for the “development” or “production” of a computing or communications device.

**Note 2:** 5A004.b does not include:

- a. Debuggers, hypervisors;
- b. Items limited to logical data extraction;
- c. Data extraction items using chip-off or JTAG; or
- d. Items specially designed and limited to jail-breaking or rooting.

**B. TEST, INSPECTION AND “PRODUCTION EQUIPMENT”**

**\*\*5B002** “Information Security” test, inspection and “production” equipment, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1</i>
-------------------	---

	<i>to part 738)</i>
NS applies to entire entry	NS Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A  
*ENC:* Yes for certain EI controlled equipment, see §740.17 of the EAR for eligibility.

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

- a. Equipment “specially designed” for the “development” or “production” of equipment controlled by 5A002, 5A003, 5A004 or 5B002.b;
- b. Measuring equipment “specially designed” to evaluate and validate the “information security” functions of equipment controlled by 5A002, 5A003 or 5A004, or of “software” controlled by 5D002.a or 5D002.c.

**C. “MATERIALS” - [RESERVED]**

**D. “SOFTWARE”**

**\*\*5D002** “Software” as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, AT, EI

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
-------------------	--

NS applies to entire entry	NS Column 1
AT applies to entire entry	AT Column 1
EI applies to “software” in 5D002.a.1, a.3, .b, c.1 and c.3, for commodities or “software” controlled for EI reasons in ECCN 5A002, 5A004 or 5D002.	Refer to §742.15 of the EAR. <i>Note: Encryption software is controlled because of its functional capacity, and not because of any informational value of such software; such software is not accorded the same treatment under the EAR as other “software”; and for export licensing purposes, encryption software is treated under the EAR in the same manner as a commodity included in ECCN 5A002.</i>

classification in accordance with § 740.17(b) of the EAR, mass market encryption software that meets eligibility requirements is released from “EI” and “NS” controls. This software is designated as [5D992.c](#).

*Related Definitions:* 5D002.a controls “software” designed or modified to use “cryptography” employing digital or analog techniques to ensure “information security.”

*Items:*

a. “Software” “specially designed” or modified for the “development,” “production” or “use” of any of the following:

a.1. Equipment specified by 5A002 or “software” specified by 5D002.c.1;

a.2. Equipment specified by 5A003 or “software” specified by 5D002.c.2; or

a.3. Equipment or “software”, as follows:

a.3.a. Equipment specified by 5A004.a or “software” specified by 5D002.c.3.a;

a.3.b. Equipment specified by 5A004.b or “software” specified by 5D002.c.3.b;

b. “Software” having the characteristics of a ‘cryptographic activation token’ specified by 5A002.b;

c. “Software” having the characteristics of, or performing or simulating the functions of, any of the following:

c.1. Equipment specified by 5A002.a, .c, .d or .e;

*Note: 5D002.c.1 does not apply to “software” limited to the tasks of “OAM” implementing only published or commercial cryptographic standards.*

c.2. Equipment specified by 5A003; or

**License Requirements Note:** See § 744.17 of the EAR for additional license requirements for microprocessors having a processing speed of 5 GFLOPS or more and an arithmetic logic unit with an access width of 32 bit or more, including those incorporating “information security” functionality, and associated “software” and “technology” for the “production” or “development” of such microprocessors.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

ENC: Yes for certain EI controlled software. See §740.17 of the EAR for eligibility.

**List of Items Controlled**

*Related Controls:* After classification or self-

- c.3. Equipment, as follows:
  - c.3.a. Equipment specified by 5A004.a;
  - c.3.b. Equipment specified by 5A004.b.

*Note:* 5D002.c.3.b does not apply to “intrusion software”.

d. [Reserved]

*N.B.:* See 5D002.b for items formerly specified in 5D002.d.

**\*\*5D992** “Information Security” “software” not controlled by 5D002 as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
AT applies to entire entry	AT Column 1

**License Requirements Note:** See § 744.17 of the EAR for additional license requirements for microprocessors having a processing speed of 5 GFLOPS or more and an arithmetic logic unit with an access width of 32 bit or more, including those incorporating “information security” functionality, and associated “software” and “technology” for the “production” or “development” of such microprocessors.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

*Related Controls:* This entry does not control “software” designed or modified to protect against malicious computer damage, e.g., viruses, where the use of “cryptography” is

limited to authentication, digital signature and/or the decryption of data or files.

*Related Definitions:* N/A

*Items:*

a. [Reserved]

b. [Reserved]

c. “Software” classified as mass market encryption software in accordance with § 740.17(b) of the EAR.

**E. “TECHNOLOGY”**

**\*\*5E002** “Technology” as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, AT, EI

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 1
AT applies to entire entry	AT Column 1
EI applies to “technology” in 5E002.a for commodities or “software” controlled for EI reasons in ECCNs 5A002, 5A004 or 5D002, and to “technology” in 5E002.b.	Refer to § 742.15 of the EAR.

**License Requirements Note:**

(1) See § 744.17 of the EAR for additional license requirements for microprocessors having a processing speed of 5 GFLOPS or more and an arithmetic logic unit with an access width of 32

bit or more, including those incorporating “information security” functionality, and associated “software” and “technology” for the “production” or “development” of such microprocessors.

(2) When a person performs or provides technical assistance that incorporates, or otherwise draws upon, “technology” that was either obtained in the United States or is of U.S.-origin, then a release of the “technology” takes place. Such technical assistance, when rendered with the intent to aid in the “development” or “production” of encryption commodities or software that would be controlled for “EI” reasons under ECCN 5A002, 5A004 or 5D002, may require authorization under the EAR even if the underlying encryption algorithm to be implemented is from the public domain or is not of U.S.-origin.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A  
 ENC: Yes for certain EI controlled technology. See §740.17 of the EAR for eligibility.

**List of Items Controlled**

*Related Controls:* See also [5E992](#). This entry does not control “technology” “required” for the “use” of equipment excluded from control under the Related Controls paragraph or the Technical Notes in ECCN [5A002](#) or “technology” related to equipment excluded from control under ECCN [5A002](#).

*Related Definitions:* N/A  
*Items:*

a. “Technology” according to the General Technology Note for the “development,” “production” or “use” of equipment controlled by 5A002, 5A003, 5A004 or 5B002, or of “software” controlled by 5D002.a or 5D002.c.

**Note:** 5E002.a does not apply to “technology” for items specified by 5A004.b, 5D002.a.3.b or 5D002.c.3.b.

b. “Technology” having the characteristics of a ‘cryptographic activation token’ specified by 5A002.b.

**Note:** 5E002 includes “information security” technical data resulting from procedures carried out to evaluate or determine the implementation of functions, features or techniques specified in Category 5—Part 2.

**\*\*5E992 “Information Security” “technology” according to the General Technology Note, not controlled by 5E002, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**License Requirements Note:** See § 744.17 of the EAR for additional license requirements for microprocessors having a processing speed of 5 GFLOPS or more and an arithmetic logic unit with an access width of 32 bit or more, including those incorporating “information security” functionality, and associated “software” and “technology” for the “production” or “development” of such microprocessors.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A

*Items:*

- a. [Reserved]
- b. “Technology”, n.e.s., for the “use” of mass market commodities controlled by [5A992.c](#) or mass market “software” controlled by [5D992.c](#).

**EAR99** Items subject to the EAR that are *not* elsewhere specified in this CCL Category *or* in any other category in the CCL are designated by the number **EAR99**.

**CATEGORY 6 - SENSORS AND LASERS**

**A. "END ITEMS," "EQUIPMENT,"  
"ACCESSORIES," "ATTACHMENTS,"  
"PARTS," "COMPONENTS," AND  
"SYSTEMS"**

**\*\*6A001** Acoustic systems, equipment and "components," as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$3000; N/A for 6A001.a.1.b.1 object detection and location systems having a transmitting frequency below 5 kHz or a sound pressure level exceeding 210 dB (reference 1 µPa at 1 m) for equipment with an operating frequency in the band from 2 kHz to 30 kHz inclusive; 6A001.a.1.e, 6A001.a.2.a.1, a.2.a.2, 6A001.a.2.a.3, a.2.a.5, a.2.a.6, 6A001.a.2.b; processing equipment controlled by 6A001.a.2.c, and "specially designed" for real-time application with towed acoustic

hydrophone arrays; a.2.e.1, a.2.e.2; and bottom or bay cable systems controlled by 6A001.a.2.f and having processing equipment "specially designed" for real-time application with bottom or bay cable systems.

*GBS:* Yes for 6A001.a.1.b.4.

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship commodities in 6A001.a.1.b, 6A001.a.1.e or 6A001.a.2 (except .a.2.a.4) to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* See also [6A991](#)

*Related Definitions:* N/A

*Items:*

a. Marine acoustic systems, equipment and "specially designed" "components" therefor, as follows:

a.1. Active (transmitting or transmitting-and-receiving) systems, equipment and "specially designed" "components" therefor, as follows:

*Note:* 6A001.a.1 does not control equipment as follows:

a. Depth sounders operating vertically below the apparatus, not including a scanning function exceeding ± 20°, and limited to measuring the depth of water, the distance of submerged or buried objects or fish finding;

b. Acoustic beacons, as follows:

1. Acoustic emergency beacons;

2. Pingers "specially designed" for

*relocating or returning to an underwater position.*

a.1.a. Acoustic seabed survey equipment as follows:

a.1.a.1. Surface vessel survey equipment designed for sea bed topographic mapping and having all of the following:

a.1.a.1.a. Designed to take measurements at an angle exceeding 20° from the vertical;

a.1.a.1.b. Designed to measure seabed topography at seabed depths exceeding 600 m;

a.1.a.1.c. ‘Sounding resolution’ less than 2; and

a.1.a.1.d. ‘Enhancement’ of the depth “accuracy” through compensation for all the following:

a.1.a.1.d.1. Motion of the acoustic sensor;

a.1.a.1.d.2. In-water propagation from sensor to the seabed and back; and

a.1.a.1.d.3. Sound speed at the sensor;

**Technical Notes:**

1. ‘Sounding resolution’ is the swath width (degrees) divided by the maximum number of soundings per swath.

2. ‘Enhancement’ includes the ability to compensate by external means.

a.1.a.2. Underwater survey equipment designed for seabed topographic mapping and having any of the following:

**Technical Note:** *The acoustic sensor pressure rating determines the depth rating of the equipment specified by 6A001.a.1.a.2.*

a.1.a.2.a. Having all of the following:

a.1.a.2.a.1. Designed or modified to operate at depths exceeding 300 m; and

a.1.a.2.a.2. ‘Sounding rate’ greater than 3,800 m/s; or

**Technical Note:** *‘Sounding rate’ is the product of the maximum speed (m/s) at which the sensor can operate and the maximum number of soundings per swath assuming 100% coverage. For systems that produce soundings in two directions (3D sonars), the maximum of the ‘sounding rate’ in either direction should be used.*

a.1.a.2.b. Survey equipment, not specified by 6A001.a.1.a.2.a, having all of the following:

a.1.a.2.b.1. Designed or modified to operate at depths exceeding 100 m;

a.1.a.2.b.2. Designed to take measurements at an angle exceeding 20° from the vertical;

a.1.a.2.b.3. Having any of the following:

a.1.a.2.b.3.a. Operating frequency below 350 kHz; or

a.1.a.2.b.3.b. Designed to measure seabed topography at a range exceeding 200 m from the acoustic sensor; and

a.1.a.2.b.4. ‘Enhancement’ of the depth “accuracy” through compensation of all of the following:

a.1.a.2.b.4.a. Motion of the acoustic sensor;

a.1.a.2.b.4.b. In-water propagation from sensor to the seabed and back; *and*

a.1.a.2.b.4.c. Sound speed at the sensor.

a.1.a.3. Side Scan Sonar (SSS) or Synthetic Aperture Sonar (SAS), designed for seabed imaging and having all of the following, and specially designed transmitting and receiving acoustic arrays therefor:

a.1.a.3.a. Designed or modified to operate at depths exceeding 500 m; and

a.1.a.3.b. An 'area coverage rate' of greater than 570 m<sup>2</sup>/s while operating at the maximum range that it can operate with an 'along track resolution' of less than 15 cm; *and*

a.1.a.3.c. An 'across track resolution' of less than 15 cm;

**Technical Notes:**

1. 'Area coverage rate' (m<sup>2</sup>/s) is twice the product of the sonar range (m) and the maximum speed (m/s) at which the sensor can operate at that range.

2. 'Along track resolution' (cm), for SSS only, is the product of azimuth (horizontal) beamwidth (degrees) and sonar range (m) and 0.873.

3. 'Across track resolution' (cm) is 75 divided by the signal bandwidth (kHz).

a.1.b Systems or transmitting and receiving arrays, designed for object detection or location, having any of the following:

a.1.b.1. A transmitting frequency

below 10 kHz;

a.1.b.2. Sound pressure level exceeding 224dB (reference 1 µPa at 1 m) for equipment with an operating frequency in the band from 10 kHz to 24 kHz inclusive;

a.1.b.3. Sound pressure level exceeding 235 dB (reference 1 µPa at 1 m) for equipment with an operating frequency in the band between 24 kHz and 30 kHz;

a.1.b.4. Forming beams of less than 1° on any axis and having an operating frequency of less than 100 kHz;

a.1.b.5. Designed to operate with an unambiguous display range exceeding 5,120 m; *or*

a.1.b.6. Designed to withstand pressure during normal operation at depths exceeding 1,000 m and having transducers with any of the following:

a.1.b.6.a. Dynamic compensation for pressure; *or*

a.1.b.6.b. Incorporating other than lead zirconate titanate as the transduction element;

a.1.c. Acoustic projectors, including transducers, incorporating piezoelectric, magnetostrictive, electrostrictive, electrodynamic or hydraulic elements operating individually or in a designed combination and having any of the following:

**Notes:**

1. The control status of acoustic projectors, including transducers, "specially designed" for other equipment is determined by the control status of the other equipment.

2. 6A001.a.1.c does not control electronic

*sources that direct the sound vertically only, or mechanical (e.g., air gun or vapor-shock gun) or chemical (e.g., explosive) sources.*

3. *Piezoelectric elements specified in 6A001.a.1.c include those made from lead-magnesium-niobate/lead-titanate ( $Pb(Mg_{1/3}Nb_{2/3})O_3$ - $PbTiO_3$ , or PMN-PT) single crystals grown from solid solution or lead-indium-niobate/lead-magnesium niobate/lead-titanate ( $Pb(In_{1/2}Nb_{1/2})O_3$ - $Pb(Mg_{1/3}Nb_{2/3})O_3$ - $PbTiO_3$ , or PIN-PMN-PT) single crystals grown from solid solution.*

a.1.c.1. Operating at frequencies below 10 kHz and having any of the following:

a.1.c.1.a. Not designed for continuous operation at 100% duty cycle and having a radiated 'free-field Source Level (SLRMS)' exceeding  $(10\log(f) + 169.77)$ dB (reference 1  $\mu$ Pa at 1 m) where f is the frequency in Hertz of maximum Transmitting Voltage Response (TVR) below 10 kHz; *or*

a.1.c.1.b. Designed for continuous operation at 100% duty cycle and having a continuously radiated 'free-field Source Level (SLRMS)' at 100% duty cycle exceeding  $(10\log(f) + 159.77)$ dB (reference 1  $\mu$ Pa at 1 m) where f is the frequency in Hertz of maximum Transmitting Voltage Response (TVR) below 10 kHz; *or*

**Technical Note:** *The 'free-field Source Level ( $SL_{RMS}$ )' is defined along the maximum response axis and in the far field of the acoustic projector. It can be obtained from the Transmitting Voltage Response using the following equation:  $SL_{RMS} = (TVR + 20\log V_{RMS})$  dB (ref 1 $\mu$ Pa at 1 m), where  $SL_{RMS}$  is the source level, TVR is the Transmitting Voltage Response and  $V_{RMS}$  is the Driving Voltage of the Projector.*

a.1.c.2. [Reserved]

**N.B.** See 6A001.a.1.c.1 for items

*previously specified in 6A001.a.1.c.2.*

a.1.c.3. Side-lobe suppression exceeding 22 dB;

a.1.d. Acoustic systems and equipment, designed to determine the position of surface vessels or underwater vehicles and having all of the following, and "specially designed" "components" therefor:

a.1.d.1. Detection range exceeding 1,000 m; *and*

a.1.d.2. Determined position error of less than 10 m rms (root mean square) when measured at a range of 1,000 m;

**Note:** *6A001.a.1.d includes:*

a. *Equipment using coherent "signal processing" between two or more beacons and the hydrophone unit carried by the surface vessel or underwater vehicle;*

b. *Equipment capable of automatically correcting speed-of-sound propagation errors for calculation of a point.*

a.1.e. Active individual sonars, "specially designed" or modified to detect, locate and automatically classify swimmers or divers, having all of the following, and "specially designed" transmitting and receiving acoustic arrays therefor:

a.1.e.1. Detection range exceeding 530 m;

a.1.e.2. Determined position error of less than 15 m rms (root mean square) when measured at a range of 530 m; *and*

a.1.e.3. Transmitted pulse signal bandwidth exceeding 3 kHz;

**N.B.:** *For diver detection systems*

“specially designed” or modified for military use, see the U.S. Munitions List in the International Traffic in Arms Regulations (ITAR) (22 CFR part 121).

**Note:** For 6A001.a.1.e, where multiple detection ranges are specified for various environments, the greatest detection range is used.

a.2. Passive systems, equipment and “specially designed” “components” therefor, as follows:

**Note:** 6A001.a.2 also applies to receiving equipment, whether or not related in normal application to separate active equipment, and “specially designed” components therefor.

a.2.a. Hydrophones having any of the following:

**Note:** The control status of hydrophones “specially designed” for other equipment is determined by the control status of the other equipment.

**Technical Notes:**

1. Hydrophones consist of one or more sensing elements producing a single acoustic output channel. Those that contain multiple elements can be referred to as a hydrophone group.

2. For the purposes of 6A001.a.2.a, underwater acoustic transducers designed to operate as passive receivers are hydrophones.

a.2.a.1. Incorporating continuous flexible sensing elements;

a.2.a.2. Incorporating flexible assemblies of discrete sensing elements with either a diameter or length less than 20 mm and with a separation between elements of less than 20 mm;

a.2.a.3. Having any of the following sensing elements:

a.2.a.3.a. Optical fibers;

a.2.a.3.b. ‘Piezoelectric polymer films’ other than polyvinylidene-fluoride (PVDF) and its co-polymers {P(VDF-TrFE) and P(VDF-TFE)};

a.2.a.3.c. ‘Flexible piezoelectric composites’;

a.2.a.3.d. Lead-magnesium-niobate/lead-titanate (*i.e.*,  $\text{Pb}(\text{Mg}_{1/3}\text{Nb}_{2/3})\text{O}_3\text{-PbTiO}_3$ , or PMN-PT) piezoelectric single crystals grown from solid solution; *or*

a.2.a.3.e. Lead-indium-niobate/lead-magnesium niobate/lead-titanate (*i.e.*,  $\text{Pb}(\text{In}_{1/2}\text{Nb}_{1/2})\text{O}_3\text{-Pb}(\text{Mg}_{1/3}\text{Nb}_{2/3})\text{O}_3\text{-PbTiO}_3$ , or PIN-PMN-PT) piezoelectric single crystals grown from solid solution;

a.2.a.4. A ‘hydrophone sensitivity’ better than -180dB at any depth with no acceleration compensation;

a.2.a.5. Designed to operate at depths exceeding 35 m with acceleration compensation; *or*

a.2.a.6. Designed for operation at depths exceeding 1,000 m and having a ‘hydrophone sensitivity’ better than -230 dB below 4 kHz;

**Technical Notes:**

1. ‘Piezoelectric polymer film’ sensing elements consist of polarized polymer film that is stretched over and attached to a supporting frame or spool (mandrel).

2. ‘Flexible piezoelectric composite’ sensing elements consist of piezoelectric ceramic particles or fibers combined with an electrically insulating, acoustically transparent rubber,

polymer or epoxy compound, where the compound is an integral part of the sensing elements.

3. 'Hydrophone sensitivity' is defined as twenty times the logarithm to the base 10 of the ratio of rms output voltage to a 1 V rms reference, when the hydrophone sensor, without a pre-amplifier, is placed in a plane wave acoustic field with an rms pressure of 1  $\mu\text{Pa}$ . For example, a hydrophone of -160 dB (reference 1 V per  $\mu\text{Pa}$ ) would yield an output voltage of  $10^{-8}$  V in such a field, while one of -180 dB sensitivity would yield only  $10^{-9}$  V output. Thus, -160 dB is better than -180 dB.

a.2.b. Towed acoustic hydrophone arrays having any of the following:

**Technical Note:** Hydrophones arrays consist of a number of hydrophones providing multiple acoustic output channels.

a.2.b.1. Hydrophone group spacing of less than 12.5 m or 'able to be modified' to have hydrophone group spacing of less than 12.5 m;

a.2.b.2. Designed or 'able to be modified' to operate at depths exceeding 35m;

**Technical Note:** 'Able to be modified' in 6A001.a.2.b means having provisions to allow a change of the wiring or interconnections to alter hydrophone group spacing or operating depth limits. These provisions are: spare wiring exceeding 10% of the number of wires, hydrophone group spacing adjustment blocks or internal depth limiting devices that are adjustable or that control more than one hydrophone group.

a.2.b.3. Heading sensors controlled by 6A001.a.2.d;

a.2.b.4. Longitudinally reinforced array hoses;

a.2.b.5. An assembled array of less than 40 mm in diameter;

a.2.b.6. [Reserved];

a.2.b.7. Hydrophone characteristics controlled by 6A001.a.2.a; or

a.2.b.8. Accelerometer-based hydro-acoustic sensors specified by 6A001.a.2.g;

a.2.c. Processing equipment, "specially designed" for towed acoustic hydrophone arrays, having "user-accessible programmability" and time or frequency domain processing and correlation, including spectral analysis, digital filtering and beamforming using Fast Fourier or other transforms or processes;

a.2.d. Heading sensors having all of the following:

a.2.d.1. An "accuracy" of better than  $\pm 0.5^\circ$ ; and

a.2.d.2. Designed to operate at depths exceeding 35 m or having an adjustable or removable depth sensing device in order to operate at depths exceeding 35 m;

**N.B.:** For inertial heading systems, see 7A003.c.

a.2.e. Bottom or bay-cable hydrophone arrays having any of the following:

a.2.e.1. Incorporating hydrophones controlled by 6A001.a.2.a;

a.2.e.2. Incorporating multiplexed hydrophone group signal modules having all of the following characteristics:

a.2.e.2.a. Designed to operate at depths exceeding 35 m or having an adjustable or removal depth sensing device in order to operate at depths exceeding 35 m; and

a.2.e.2.b. Capable of being operationally interchanged with towed acoustic hydrophone array modules; *or*

a.2.e.3. Incorporating accelerometer-based hydro-acoustic sensors specified by 6A001.a.2.g;

a.2.f. Processing equipment, “specially designed” for bottom or bay cable systems, having “user-accessible programmability” and time or frequency domain processing and correlation, including spectral analysis, digital filtering and beamforming using Fast Fourier or other transforms or processes;

a.2.g. Accelerometer-based hydro-acoustic sensors having all of the following:

a.2.g.1. Composed of three accelerometers arranged along three distinct axes;

a.2.g.2. Having an overall ‘acceleration sensitivity’ better than 48 dB (reference 1,000 mV rms per 1g);

a.2.g.3. Designed to operate at depths greater than 35 meters; *and*

a.2.g.4. Operating frequency below 20 kHz;

*Note:* 6A001.a.2.g does not apply to particle velocity sensors or geophones.

**Technical Notes:**

1. Accelerometer-based hydro-acoustic sensors are also known as vector sensors.

2. ‘Acceleration sensitivity’ is defined as twenty times the logarithm to the base 10 of the ratio of rms output voltage to a 1 V rms reference,

*when the hydro-acoustic sensor, without a preamplifier, is placed in a plane wave acoustic field with an rms acceleration of 1 g (i.e., 9.81 m/s<sup>2</sup>).*

b. Correlation-velocity and Doppler-velocity sonar log equipment designed to measure the horizontal speed of the equipment carrier relative to the sea bed, as follows:

b.1. Correlation-velocity sonar log equipment having any of the following characteristics:

b.1.a. Designed to operate at distances between the carrier and the sea bed exceeding 500 m; *or*

b.1.b. Having speed “accuracy” better than 1% of speed;

b.2. Doppler-velocity sonar log equipment having speed “accuracy” better than 1% of speed;

*Note 1:* 6A001.b does not apply to depth sounders limited to any of the following:

a. Measuring the depth of water;

b. Measuring the distance of submerged or buried objects; *or*

c. Fish finding.

*Note 2:* 6A001.b does not apply to equipment “specially designed” for installation on surface vessels.

c. [Reserved]

*N.B.:* For diver deterrent acoustic systems, see 8A002.r.

**\*\*6A002** Optical sensors and equipment, and “components” therefor, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, MT, CC, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
MT applies to optical detectors in 6A002.a.1, or a.3 that are “specially designed” or modified to protect “missiles” against nuclear effects (e.g., Electromagnetic Pulse (EMP), X-rays, combined blast and thermal effects), and usable for “missiles”	MT Column 1
RS applies to 6A002.a.1, a.2, a.3 (except a.3.d.2.a and a.3.e for lead selenide based focal plane arrays (FPAs)), .c, and .f.	RS Column 1
CC applies to police-model infrared viewers in 6A002.c	CC Column 1
AT applies to entire entry	AT Column 1
UN applies to 6A002.a.1, a.2, a.3 and .c	See § 746.1(b) for UN controls

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$500 for 6A002.f.  
\$3000; except N/A for MT and for 6A002.a.1, a.2, a.3, .c, and .f.

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See USML Category XII(e) for infrared focal plane arrays, image intensifier tubes, and related parts and components, subject to the ITAR. (2) See USML Category XV(e) for space-qualified focal plane arrays subject to the ITAR. (3) See also ECCNs [6A102](#), [6A202](#), and [6A992](#). (4) See ECCN 0A919 for foreign-made military commodities that incorporate commodities described in 6A002. (5) Section 744.9 imposes a license requirement on commodities described in ECCN 6A002 if being exported, reexported, or transferred (in-country) for use by a military end-user or for incorporation into an item controlled by ECCN 0A919. (6) See USML Categories XII(e) and XV(e)(3) for read-out integrated circuits “subject to the ITAR.” (7) See [6B002](#) for masks and reticles, “specially designed” for optical sensors specified by 6A002.a.1.b or 6A002.a.1.d.

*Related Definitions:* N/A

*Items:*

a. Optical detectors as follows:

a.1. “Space-qualified” solid-state detectors as follows:

*Note:* For the purpose of 6A002.a.1, solid-state detectors include “focal plane arrays”.

a.1.a. “Space-qualified” solid-state detectors having all of the following:

a.1.a.1. A peak response in the wavelength range exceeding 10 nm but not exceeding 300 nm; *and*

a.1.a.2. A response of less than 0.1% relative to the peak response at a wavelength exceeding 400 nm;

a.1.b. “Space-qualified” solid-state

detectors having all of the following:

a.1.b.1. A peak response in the wavelength range exceeding 900 nm but not exceeding 1,200 nm; *and*

a.1.b.2. A response “time constant” of 95 ns or less;

a.1.c. “Space-qualified” solid-state detectors having a peak response in the wavelength range exceeding 1,200 nm but not exceeding 30,000 nm;

a.1.d. “Space-qualified” “focal plane arrays” having more than 2,048 elements per array and having a peak response in the wavelength range exceeding 300 nm but not exceeding 900 nm;

a.2. Image intensifier tubes and “specially designed” “components” therefor, as follows:

*Note: 6A002.a.2 does not control non-imaging photomultiplier tubes having an electron sensing device in the vacuum space limited solely to any of the following:*

*a. A single metal anode; or*

*b. Metal anodes with a center to center spacing greater than 500  $\mu\text{m}$ .*

**Technical Note:** ‘Charge multiplication’ is a form of electronic image amplification and is defined as the generation of charge carriers as a result of an impact ionization gain process. ‘Charge multiplication’ sensors may take the form of an image intensifier tube, solid state detector or “focal plane array”.

a.2.a. Image intensifier tubes having all of the following:

a.2.a.1. A peak response in the wavelength range exceeding 400 nm but not exceeding 1,050 nm;

a.2.a.2. Electron image amplification using any of the following:

a.2.a.2.a. A microchannel plate with a hole pitch (center-to-center spacing) of 12  $\mu\text{m}$  or less; *or*

a.2.a.2.b. An electron sensing device with a non-binned pixel pitch of 500  $\mu\text{m}$  or less, “specially designed” or modified to achieve ‘charge multiplication’ other than by a microchannel plate; *and*

a.2.a.3. Any of the following photocathodes:

a.2.a.3.a. Multialkali photocathodes (*e.g.*, S-20 and S-25) having a luminous sensitivity exceeding 350  $\mu\text{A}/\text{lm}$ ;

a.2.a.3.b. GaAs or GaInAs photocathodes; *or*

a.2.a.3.c. Other “III-V compound” semiconductor photocathodes having a maximum “radiant sensitivity” exceeding 10 mA/W;

a.2.b. Image intensifier tubes having all of the following:

a.2.b.1. A peak response in the wavelength range exceeding 1,050 nm but not exceeding 1,800 nm;

a.2.b.2. Electron image amplification using any of the following:

a.2.b.2.a. A microchannel plate with a hole pitch (center-to-center spacing) of 12  $\mu\text{m}$  or less; *or*

a.2.b.2.b. An electron sensing device with a non-binned pixel pitch of 500  $\mu\text{m}$  or less, “specially designed” or modified to achieve ‘charge multiplication’ other than by a microchannel plate; *and*

a.2.b.3. “III/V compound” semiconductor (e.g., GaAs or GaInAs) photocathodes and transferred electron photocathodes, having a maximum “radiant sensitivity” exceeding 15 mA/W;

a.2.c. “Specially designed” “components” as follows:

a.2.c.1. Microchannel plates having a hole pitch (center-to-center spacing) of 12  $\mu\text{m}$  or less;

a.2.c.2. An electron sensing device with a non-binned pixel pitch of 500  $\mu\text{m}$  or less, “specially designed” or modified to achieve ‘charge multiplication’ other than by a microchannel plate;

a.2.c.3. “III-V compound” semiconductor (e.g., GaAs or GaInAs) photocathodes and transferred electron photocathodes;

**Note:** 6A002.a.2.c.3 does not control compound semiconductor photocathodes designed to achieve a maximum “radiant sensitivity” of any of the following:

a. 10 mA/W or less at the peak response in the wavelength range exceeding 400 nm but not exceeding 1,050 nm; or

b. 15 mA/W or less at the peak response in the wavelength range exceeding 1,050 nm but not exceeding 1,800 nm.

a.3. Non-“space-qualified” “focal plane arrays” as follows:

**N.B.:** ‘Microbolometer’ non-“space-qualified” “focal plane arrays” are only specified by 6A002.a.3.f.

**Technical Note:** Linear or two-dimensional multi-element detector arrays are referred to as

“focal plane arrays”;

**Note 1:** 6A002.a.3 includes photoconductive arrays and photovoltaic arrays.

**Note 2:** 6A002.a.3 does not control:

a. Multi-element (not to exceed 16 elements) encapsulated photoconductive cells using either lead sulphide or lead selenide;

b. Pyroelectric detectors using any of the following:

b.1. Triglycine sulphate and variants;

b.2. Lead-lanthanum-zirconium titanate and variants;

b.3. Lithium tantalate;

b.4. Polyvinylidene fluoride and variants; or

b.5. Strontium barium niobate and variants.

c. “Focal plane arrays” “specially designed” or modified to achieve ‘charge multiplication’ and limited by design to have a maximum “radiant sensitivity” of 10 mA/W or less for wavelengths exceeding 760 nm, having all of the following:

c.1. Incorporating a response limiting mechanism designed not to be removed or modified; and

c.2. Any of the following:

c.2.a. The response limiting mechanism is integral to or combined with the detector element; or

c.2.b. The “focal plane array” is only operable with the response limiting mechanism in place.

*d. Thermopile arrays having less than 5,130 elements;*

**Technical Note:** A response limiting mechanism integral to the detector element is designed not to be removed or modified without rendering the detector inoperable.

a.3.a. Non-“space-qualified” “focal plane arrays” having all of the following:

a.3.a.1. Individual elements with a peak response within the wavelength range exceeding 900 nm but not exceeding 1,050 nm; *and*

a.3.a.2. Any of the following:

a.3.a.2.a. A response “time constant” of less than 0.5 ns; *or*

a.3.a.2.b. “Specially designed” or modified to achieve ‘charge multiplication’ and having a maximum “radiant sensitivity” exceeding 10 mA/W;

a.3.b. Non-“space-qualified” “focal plane arrays” having all of the following:

a.3.b.1. Individual elements with a peak response in the wavelength range exceeding 1,050 nm but not exceeding 1,200 nm; *and*

a.3.b.2. Any of the following:

a.3.b.2.a. A response “time constant” of 95 ns or less; *or*

a.3.b.2.b. “Specially designed” or modified to achieve ‘charge multiplication’ and having a maximum “radiant sensitivity” exceeding 10 mA/W;

a.3.c. Non-“space-qualified” non-linear (2-dimensional) “focal plane arrays” having individual elements with a peak response in the wavelength range exceeding 1,200 nm but not exceeding 30,000 nm;

**N.B.:** Silicon and other material based ‘microbolometer’ non-“space-qualified” “focal plane arrays” are only specified by 6A002.a.3.f.

a.3.d. Non-“space-qualified” linear (1-dimensional) “focal plane arrays” having all of the following:

a.3.d.1. Individual elements with a peak response in the wavelength range exceeding 1,200 nm but not exceeding 3,000 nm; *and*

a.3.d.2. Any of the following:

a.3.d.2.a. A ratio of ‘scan direction’ dimension of the detector element to the ‘cross-scan direction’ dimension of the detector element of less than 3.8; *or*

a.3.d.2.b. Signal processing in the detector elements;

**Note:** 6A002.a.3.d does not control “focal plane arrays” (not to exceed 32 elements) having detector elements limited solely to germanium material.

**Technical Note:** For the purposes of 6A002.a.3.d, ‘cross-scan direction’ is defined as the axis parallel to the linear array of detector elements and the ‘scan direction’ is defined as the axis perpendicular to the linear array of detector elements.

a.3.e. Non-“space-qualified” linear (1-dimensional) “focal plane arrays” having individual elements with a peak response in the wavelength range exceeding 3,000 nm but not exceeding 30,000 nm;

a.3.f. Non-“space-qualified” non-linear (2-dimensional) infrared “focal plane arrays” based on ‘microbolometer’ material having individual elements with an unfiltered response in the wavelength range equal to or exceeding 8,000 nm but not exceeding 14,000 nm;

**Technical Note:** For the purposes of 6A002.a.3.f, ‘microbolometer’ is defined as a thermal imaging detector that, as a result of a temperature change in the detector caused by the absorption of infrared radiation, is used to generate any usable signal.

a.3.g. Non-“space-qualified” “focal plane arrays” having all of the following:

a.3.g.1. Individual detector elements with a peak response in the wavelength range exceeding 400 nm but not exceeding 900 nm;

a.3.g.2. “Specially designed” or modified to achieve ‘charge multiplication’ and having a maximum “radiant sensitivity” exceeding 10 mA/W for wavelengths exceeding 760 nm; *and*

a.3.g.3. Greater than 32 elements;

b. “Monospectral imaging sensors” and “multispectral imaging sensors”, designed for remote sensing applications and having any of the following:

b.1. An Instantaneous-Field-Of-View (IFOV) of less than 200  $\mu$ rad (microradians); *or*

b.2. Specified for operation in the wavelength range exceeding 400 nm but not exceeding 30,000 nm and having all the following:

b.2.a. Providing output imaging data in digital format; *and*

b.2.b. Having any of the following characteristics:

b.2.b.1. “Space-qualified”; *or*

b.2.b.2. Designed for airborne operation, using other than silicon detectors, and having an IFOV of less than 2.5 mrad (milliradians);

**Note:** 6A002.b.1 does not control “monospectral imaging sensors” with a peak response in the wavelength range exceeding 300 nm but not exceeding 900 nm and only incorporating any of the following non -“space-qualified” detectors or non -“space-qualified” “focal plane arrays”:

a. Charge Coupled Devices (CCD) not designed or modified to achieve ‘charge multiplication’; or

b. Complementary Metal Oxide Semiconductor (CMOS) devices not designed or modified to achieve ‘charge multiplication’.

c. ‘Direct view’ imaging equipment incorporating any of the following:

c.1. Image intensifier tubes having the characteristics listed in 6A002.a.2.a or 6A002.a.2.b;

c.2. “Focal plane arrays” having the characteristics listed in 6A002.a.3; *or*

c.3. Solid state detectors specified by 6A002.a.1;

**Technical Note:** ‘Direct view’ refers to imaging equipment that presents a visual image to a human observer without converting the image into an electronic signal for television display, and that cannot record or store the image photographically, electronically or by any other means.

**Note:** 6A002.c does not control equipment as follows, when incorporating other than GaAs or GaInAs photocathodes:

a. Industrial or civilian intrusion alarm, traffic or industrial movement control or counting systems;

b. Medical equipment;

c. Industrial equipment used for inspection, sorting or analysis of the properties of materials;

d. Flame detectors for industrial furnaces;

e. Equipment “specially designed” for laboratory use.

d. Special support “components” for optical sensors, as follows:

d.1. “Space-qualified” cryocoolers;

d.2. Non-“space-qualified” cryocoolers having a cooling source temperature below 218 K (-55 °C), as follows:

d.2.a. Closed cycle type with a specified Mean-Time-To-Failure (MTTF) or Mean-Time-Between-Failures (MTBF), exceeding 2,500 hours;

d.2.b. Joule-Thomson (JT) self-regulating minicoolers having bore (outside) diameters of less than 8 mm;

d.3. Optical sensing fibers specially fabricated either compositionally or structurally, or modified by coating, to be acoustically, thermally, inertially, electromagnetically or nuclear radiation sensitive.

*Note: 6A002.d.3 does not apply to encapsulated optical sensing fibers “specially designed” for bore hole sensing applications.*

e. [Reserved]

f. ‘Read-Out Integrated Circuits’ (‘ROIC’) “specially designed” for “focal plane arrays” specified by 6A002.a.3.

*Note: 6A002.f does not apply to read-out integrated circuits “specially designed” for civil automotive applications.*

**Technical Note:** A ‘Read-Out Integrated Circuit’ (‘ROIC’) is an integrated circuit designed to underlie or be bonded to a “focal plane array” (‘FPA’) and used to read-out (i.e., extract and register) signals produced by the detector elements. At a minimum the ‘ROIC’ reads the charge from the detector elements by extracting the charge and applying a multiplexing function in a manner that retains the relative spatial position and orientation information of the detector elements for processing inside or outside the ‘ROIC’.

**\*\*6A003** Cameras, systems or equipment, and “components” therefor, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, NP, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
NP applies to cameras controlled by 6A003.a.3 or a.4 and to plug-ins in 6A003.a.6 for cameras controlled by 6A003.a.3 or a.4	NP Column 1
RS applies to 6A003.b.3, 6A003.b.4.a, 6A003.b.4.c and to items controlled in 6A003.b.4.b that have a frame rate greater than 60 Hz or that incorporate a focal plane array with more than 111,000 elements, or to items in 6A003.b.4.b when being exported or reexported to be embedded in a civil product. (But see § 742.6(a)(2)(iii) and (v) for certain exemptions)	RS Column 1
RS applies to items	RS Column 2

controlled in 6A003.b.4.b that have a frame rate of 60 Hz or less and that incorporate a focal plane array with not more than 111,000 elements if not being exported or reexported to be embedded in a civil product	
AT applies to entire entry	AT Column 1
UN applies to 6A003.b.3 and b.4	See § 746.1(b) for UN controls

*Related Controls:* (1) See ECCNs [6E001](#) (“development”), [6E002](#) (“production”), and [6E201](#) (“use”) for technology for items controlled under this entry. (2) Also see ECCN [6A203](#). (3) See ECCN 0A919 for foreign made military commodities that incorporate cameras described in 6A003. (4) Section 744.9 imposes a license requirement on cameras described in 6A003 if being exported, reexported, or transferred (in-country) for use by a military end-user or for incorporation into a commodity controlled by ECCN 0A919. (5) See USML Category XII(c) and (e) for cameras subject to the ITAR.

*Related Definitions:* N/A

*Items:*

- a. Instrumentation cameras and “specially designed” “components” therefor, as follows:

*Note: Instrumentation cameras, controlled by 6A003.a.3 to 6A003.a.5, with modular structures should be evaluated by their maximum capability, using plug-ins available according to the camera manufacturer's specifications.*

a.1. [Reserved]

a.2. [Reserved]

a.3. Electronic streak cameras having temporal resolution better than 50 ns;

a.4. Electronic framing cameras having a speed exceeding 1,000,000 frames/s;

a.5. Electronic cameras having all of the following:

a.5.a. An electronic shutter speed (gating capability) of less than 1µs per full frame; *and*

a.5.b. A read out time allowing a framing rate of more than 125 full frames per second;

**License Requirement Note:** Commodities that are not subject to the ITAR but are of the type described in USML Category XII(c) are controlled as cameras in ECCN 6A003 when they incorporate a camera controlled in this ECCN.

**Reporting Requirements**

See §743.3 of the EAR for thermal camera reporting for exports that are not authorized by an individually validated license of thermal imaging cameras controlled by ECCN 6A003.b.4.b to destinations in Country Group A:1 (see Supplement No. 1 to part 740 of the EAR), must be reported to BIS.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$1500, except N/A for 6A003.a.3 through a.6, b.1, b.3 and b.4

*GBS:* N/A

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship any commodity in 6A003.b.3 or b.4 to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

a.6. Plug-ins having all of the following characteristics:

a.6.a. “Specially designed” for instrumentation cameras which have modular structures and that are controlled by 6A003.a; *and*

a.6.b. Enabling these cameras to meet the characteristics specified by 6A003.a.3, 6A003.a.4 or 6A003.a.5, according to the manufacturer's specifications;

b. Imaging cameras as follows:

*Note: 6A003.b does not control television or video cameras “specially designed” for television broadcasting.*

b.1. Video cameras incorporating solid state sensors, having a peak response in the wavelength range exceeding 10 nm, but not exceeding 30,000 nm and having all of the following:

b.1.a. Having any of the following:

b.1.a.1. More than  $4 \times 10^6$  “active pixels” per solid state array for monochrome (black and white) cameras;

b.1.a.2. More than  $4 \times 10^6$  “active pixels” per solid state array for color cameras incorporating three solid state arrays; *or*

b.1.a.3. More than  $12 \times 10^6$  “active pixels” for solid state array color cameras incorporating one solid state array; *and*

b.1.b. Having any of the following:

b.1.b.1. Optical mirrors controlled by 6A004.a.;

b.1.b.2. Optical control equipment controlled by 6A004.d.; *or*

b.1.b.3. The capability for annotating

internally generated ‘camera tracking data’;

**Technical Notes:**

1. *For the purposes of this entry, digital video cameras should be evaluated by the maximum number of “active pixels” used for capturing moving images.*

2. *For the purpose of this entry, ‘camera tracking data’ is the information necessary to define camera line of sight orientation with respect to the earth. This includes: 1) the horizontal angle the camera line of sight makes with respect to the earth's magnetic field direction and; 2) the vertical angle between the camera line of sight and the earth's horizon.*

b.2. Scanning cameras and scanning camera systems, having all of the following:

b.2.a. A peak response in the wavelength range exceeding 10 nm, but not exceeding 30,000 nm;

b.2.b. Linear detector arrays with more than 8,192 elements per array; *and*

b.2.c. Mechanical scanning in one direction;

*Note: 6A003.b.2 does not apply to scanning cameras and scanning camera systems, “specially designed” for any of the following:*

*a. Industrial or civilian photocopiers;*

*b. Image scanners “specially designed” for civil, stationary, close proximity scanning applications (e.g., reproduction of images or print contained in documents, artwork or photographs); or*

*c. Medical equipment.*

b.3. Imaging cameras incorporating image intensifier tubes having the characteristics listed

in 6A002.a.2.a or 6A002.a.2.b;

b.4. Imaging cameras incorporating “focal plane arrays” having any of the following:

b.4.a. Incorporating “focal plane arrays” controlled by 6A002.a.3.a to 6A002.a.3.e;

b.4.b. Incorporating “focal plane arrays” controlled by 6A002.a.3.f; *or*

b.4.c. Incorporating “focal plane arrays” controlled by 6A002.a.3.g;

**Note 1:** *Imaging cameras described in 6A003.b.4 include “focal plane arrays” combined with sufficient “signal processing” electronics, beyond the read out integrated circuit, to enable as a minimum the output of an analog or digital signal once power is supplied.*

**Note 2:** *6A003.b.4.a does not control imaging cameras incorporating linear “focal plane arrays” with 12 elements or fewer, not employing time-delay-and-integration within the element and designed for any of the following:*

a. *Industrial or civilian intrusion alarm, traffic or industrial movement control or counting systems;*

b. *Industrial equipment used for inspection or monitoring of heat flows in buildings, equipment or industrial processes;*

c. *Industrial equipment used for inspection, sorting or analysis of the properties of materials;*

d. *Equipment “specially designed” for laboratory use; or*

e. *Medical equipment.*

**Note 3:** *6A003.b.4.b does not control imaging cameras having any of the following:*

a. *A maximum frame rate equal to or less than 9 Hz;*

b. *Having all of the following:*

1. *Having a minimum horizontal or vertical ‘Instantaneous-Field -of-View (IFOV)’ of at least 2 mrad (milliradians);*

2. *Incorporating a fixed focal-length lens that is not designed to be removed;*

3. *Not incorporating a ‘direct view’ display; and*

**Technical Note:** *‘Direct view’ refers to an imaging camera operating in the infrared spectrum that presents a visual image to a human observer using a near-to-eye micro display incorporating any light-security mechanism.*

4. *Having any of the following:*

a. *No facility to obtain a viewable image of the detected field-of-view; or*

b. *The camera is designed for a single kind of application and designed not to be user modified; or*

**Technical Note:**

*‘Instantaneous Field of View (IFOV)’ specified in Note 3.b is the lesser figure of the ‘Horizontal FOV’ or the ‘Vertical FOV’.*

*‘Horizontal IFOV’ = horizontal Field of View (FOV)/number of horizontal detector elements*

*‘Vertical IFOV’ = vertical Field of View (FOV)/number of vertical detector elements.*

c. *The camera is “specially designed” for installation into a civilian passenger land vehicle and having all of the following:*

1. *The placement and configuration*

of the camera within the vehicle are solely to assist the driver in the safe operation of the vehicle;

2. Is operable only when installed in any of the following:

a. The civilian passenger land vehicle for which it was intended and the vehicle weighs less than 4,500 kg (gross vehicle weight); or

b. A “specially designed”, authorized maintenance test facility; and

3. Incorporates an active mechanism that forces the camera not to function when it is removed from the vehicle for which it was intended.

**Note:** When necessary, details of the items will be provided, upon request, to the Bureau of Industry and Security in order to ascertain compliance with the conditions described in Note 3.b.4 and Note 3.c in this Note to 6A003.b.4.b.

**Note 4:** 6A003.b.4.c does not apply to 'imaging cameras' having any of the following characteristics:

a. Having all of the following:

1. Where the camera is “specially designed” for installation as an integrated component into indoor and wall-plug-operated systems or equipment, limited by design for a single kind of application, as follows:

a. Industrial process monitoring, quality control, or analysis of the properties of materials;

b. Laboratory equipment “specially designed” for scientific research;

c. Medical equipment;

d. Financial fraud detection equipment; and

2. Is only operable when installed in any of the following:

a. The system(s) or equipment for which it was intended; or

b. A “specially designed”, authorized maintenance facility; and

3. Incorporates an active mechanism that forces the camera not to function when it is removed from the system(s) or equipment for which it was intended;

b. Where the camera is “specially designed” for installation into a civilian passenger land vehicle or passenger and vehicle ferries and having all of the following:

1. The placement and configuration of the camera within the vehicle or ferry are solely to assist the driver or operator in the safe operation of the vehicle or ferry;

2. Is only operable when installed in any of the following:

a. The civilian passenger land vehicle for which it was intended and the vehicle weighs less than 4,500 kg (gross vehicle weight);

b. The passenger and vehicle ferry for which it was intended and having a length overall (LOA) 65 m or greater; or

c. A “specially designed”, authorized maintenance test facility; and

3. Incorporates an active mechanism that forces the camera not to function when it is removed from the vehicle for which it was intended;

c. Limited by design to have a maximum

“radiant sensitivity” of 10 mA/W or less for wavelengths exceeding 760 nm, having all of the following:

1. Incorporating a response limiting mechanism designed not to be removed or modified; and

2. Incorporates an active mechanism that forces the camera not to function when the response limiting mechanism is removed; and

3. Not “specially designed” or modified for underwater use; or

d. Having all of the following:

1. Not incorporating a ‘direct view’ or electronic image display;

2. Has no facility to output a viewable image of the detected field of view;

3. The “focal plane array” is only operable when installed in the camera for which it was intended; and

4. The “focal plane array” incorporates an active mechanism that forces it to be permanently inoperable when removed from the camera for which it was intended.

**Note:** When necessary, details of the item will be provided, upon request, to the Bureau of Industry and Security in order to ascertain compliance with the conditions described in Note 4 above.

b.5. Imaging cameras incorporating solid-state detectors specified by 6A002.a.1.

**\*\*6A004 Optical equipment and “components,” as follows (see List of Items Controlled).**

**License Requirements**

Reason for Control: NS, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: \$3000

GBS: Yes for 6A004.a.1, a.2, a.4, .b, d.2, and .f.

**Special Conditions for STA**

STA: Paragraph (c)(2) of License Exception STA may not be used to ship any commodity in 6A004.c or .d to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

**Related Controls:** (1) For optical mirrors or ‘aspheric optical elements’ “specially designed” for lithography “equipment,” see ECCN 3B001. (2) See USML Category XII(e) for gimbals “subject to the ITAR.” (3) See also 6A994.

**Related Definitions:** An ‘aspheric optical element’ is any element used in an optical system whose imaging surface or surfaces are designed to depart from the shape of an ideal sphere.

**Items:**

a. Optical mirrors (reflectors) as follows:

**Technical Note:** For the purpose of 6A004.a, Laser Induced Damage Threshold (LIDT) is measured according to ISO 21254-1:2011.

a.1. ‘Deformable mirrors’ having an active optical aperture greater than 10 mm and having any of the following, and specially designed components therefor:

a.1.a. Having all the following:

a.1.a.1. A mechanical resonant frequency of 750 Hz or more; *and*

a.1.a.2. More than 200 actuators; *or*

a.1.b. A Laser Induced Damage Threshold (LIDT) being any of the following:

a.1.b.1. Greater than 1 kW/cm<sup>2</sup> using a “CW laser”; *or*

a.1.b.2. Greater than 2 J/cm<sup>2</sup> using 20 ns “laser” pulses at 20 Hz repetition rate;

**Technical Notes:**

1. ‘Deformable mirrors’ are mirrors having any of the following:

a. A single continuous optical reflecting surface which is dynamically deformed by the application of individual torques or forces to compensate for distortions in the optical waveform incident upon the mirror; *or*

b. Multiple optical reflecting elements that can be individually and dynamically repositioned by the application of torques or forces to compensate for distortions in the optical waveform incident upon the mirror.

2. ‘Deformable mirrors’ are also known as adaptive optic mirrors.

a.2. Lightweight monolithic mirrors having an average “equivalent density” of less than 30 kg/m<sup>2</sup> and a total mass exceeding 10 kg;

a.3. Lightweight “composite” or foam mirror structures having an average “equivalent density” of less than 30 kg/m<sup>2</sup> and a total mass exceeding 2 kg;

**Note:** 6A004.a.2 and 6A004.a.3 do not apply to mirrors “specially designed” to direct solar radiation for terrestrial heliostat installations.

a.4. Mirrors specially designed for beam steering mirror stages specified in 6A004.d.2.a with a flatness of  $\lambda/10$  or better ( $\lambda$  is equal to 633 nm) and having any of the following:

a.4.a. Diameter or major axis length greater than or equal to 100 mm; *or*

a.4.b. Having all of the following:

a.4.b.1. Diameter or major axis length greater than 50 mm but less than 100 mm; *and*

a.4.b.2. A Laser Induced Damage Threshold (LIDT) being any of the following:

a.4.b.2.a. Greater than 10 kW/cm<sup>2</sup> using a “CW laser”; *or*

a.4.b.2.b. Greater than 20 J/cm<sup>2</sup> using 20 ns “laser” pulses at 20 Hz repetition rate;

**N.B.** For optical mirrors specially designed for lithography equipment, see 3B001.

b. Optical “components” made from zinc selenide (ZnSe) or zinc sulfide (ZnS) with transmission in the wavelength range exceeding 3,000 nm but not exceeding 25,000 nm and having any of the following:

- b.1. Exceeding  $100 \text{ cm}^3$  in volume; *or*
- b.2. Exceeding 80 mm in diameter or length of major axis and 20 mm in thickness (depth);
- c. “Space-qualified” “components” for optical systems, as follows:
- c.1. “Components” lightweighted to less than 20% “equivalent density” compared with a solid blank of the same aperture and thickness;
- c.2. Raw substrates, processed substrates having surface coatings (single-layer or multi-layer, metallic or dielectric, conducting, semiconducting or insulating) or having protective films;
- c.3. Segments or assemblies of mirrors designed to be assembled in space into an optical system with a collecting aperture equivalent to or larger than a single optic 1 m in diameter;
- c.4. “Components” manufactured from “composite” materials having a coefficient of linear thermal expansion equal to or less than  $5 \times 10^{-6}$  in any coordinate direction;
- d. Optical control equipment as follows:
- d.1. Equipment “specially designed” to maintain the surface figure or orientation of the “space-qualified” “components” controlled by 6A004.c.1 or 6A004.c.3;
- d.2. Steering, tracking, stabilisation and resonator alignment equipment as follows:
- d.2.a. Beam steering mirror stages designed to carry mirrors having diameter or major axis length greater than 50 mm and having all of the following, and specially designed electronic control equipment therefor:
- d.2.a.1. A maximum angular travel of  $\pm 26 \text{ mrad}$  or more;
- d.2.a.2. A mechanical resonant frequency of 500 Hz or more; *and*
- d.2.a.3. An angular “accuracy” of  $10 \text{ } \mu\text{rad}$  (microradians) or less (better);
- d.2.b. Resonator alignment equipment having bandwidths equal to or more than 100 Hz and an “accuracy” of  $10 \text{ } \mu\text{rad}$  or less (better);
- d.3. Gimbals having all of the following:
- d.3.a. A maximum slew exceeding  $5^\circ$ ;
- d.3.b. A bandwidth of 100 Hz or more;
- d.3.c. Angular pointing errors of  $200 \text{ } \mu\text{rad}$  (microradians) or less; *and*
- d.3.d. Having any of the following:
- d.3.d.1. Exceeding 0.15 m but not exceeding 1 m in diameter or major axis length and capable of angular accelerations exceeding  $2 \text{ rad (radians)}/\text{s}^2$ ; *or*
- d.3.d.2. Exceeding 1 m in diameter or major axis length and capable of angular accelerations exceeding  $0.5 \text{ rad (radians)}/\text{s}^2$ ;
- d.4. [Reserved]
- e. ‘Aspheric optical elements’ having all of the following:
- e.1. Largest dimension of the optical-aperture greater than 400 mm;
- e.2. Surface roughness less than 1 nm (rms) for sampling lengths equal to or greater than 1 mm; *and*
- e.3. Coefficient of linear thermal expansion's absolute magnitude less than  $3 \times 10^{-6}/\text{K}$  at  $25^\circ \text{ C}$ ;

**Technical Note:**

1. [See Related Definitions section of this ECCN]

2. Manufacturers are not required to measure the surface roughness listed in 6A004.e.2 unless the optical element was designed or manufactured with the intent to meet, or exceed, the control parameter.

**Note:** 6A004.e does not control ‘aspheric optical elements’ having any of the following:

a. Largest optical-aperture dimension less than 1 m and focal length to aperture ratio equal to or greater than 4.5:1;

b. Largest optical-aperture dimension equal to or greater than 1 m and focal length to aperture ratio equal to or greater than 7:1;

c. Designed as Fresnel, flyeye, stripe, prism or diffractive optical elements;

d. Fabricated from borosilicate glass having a coefficient of linear thermal expansion greater than  $2.5 \times 10^{-6}/K$  at 25 °C; or

e. An x-ray optical element having inner mirror capabilities (e.g., tube-type mirrors).

f. Dynamic wavefront measuring equipment having all of the following:

f.1. ‘Frame rates’ equal to or more than 1 kHz; and

f.2. A wavefront accuracy equal to or less (better) than  $\lambda/20$  at the designed wavelength.

**Technical Note:** For the purposes of 6A004.f, ‘frame rate’ is a frequency at which all “active pixels” in the “focal plane array” are integrated for recording images projected by the wavefront sensor optics.

**\*\*6A005** “Lasers”, “components” and optical equipment, as follows (see List of Items Controlled), excluding items that are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

**License Requirements**

Reason for Control: NS, NP, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 2
NP applies to lasers controlled by 6A005.a.2, a.3, a.4, b.2.b, b.3, b.4, b.6.c, c.1.b, c.2.b, d.2, d.3.c, or d.4.c that meet or exceed the technical parameters described in 6A205	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

**LVS:** N/A for NP items  
\$3000 for all other items

**GBS:** Neodymium-doped (other than glass) “lasers” controlled by 6A005.b.6.d.2 (except 6A005.b.6.d.2.b) that have an output wavelength exceeding 1,000 nm, but not exceeding 1,100 nm, and an average or CW output power not exceeding 2 kW, and operate in a pulse-excited, non- “Q-switched” multiple-transverse mode, or in a continuously excited, multiple-transverse mode; Dye and Liquid Lasers controlled by 6A005.c.1, c.2 and c.3, except for a pulsed single longitudinal mode oscillator having an average output

power exceeding 1 W and a repetition rate exceeding 1 kHz if the “pulse duration” is less than 100 ns; CO “lasers” controlled by 6A005.d.2 having a CW maximum rated single or multimode output power not exceeding 10 kW; CO<sub>2</sub> or CO/CO<sub>2</sub> “lasers” controlled by 6A005.d.3 having an output wavelength in the range from 9,000 to 11,000 nm and having a pulsed output not exceeding 2 J per pulse and a maximum rated average single or multimode output power not exceeding 5 kW; and CO<sub>2</sub> “lasers” controlled by 6A005.d.3 that operate in CW multiple-transverse mode, and having a CW output power not exceeding 15 kW.

### List of Items Controlled

*Related Controls* (1) See ECCN [6D001](#) for “software” for items controlled under this entry. (2) See ECCNs [6E001](#) (“development”), [6E002](#) (“production”), and [6E201](#) (“use”) for technology for items controlled under this entry. (3) Also see ECCNs [6A205](#) and [6A995](#). (4) See ECCN 3B001 for excimer “lasers” “specially designed” for lithography equipment. (5) “Lasers” “specially designed” or prepared for use in isotope separation are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110). (6) See USML Category XII(b) and (e) for laser systems or lasers subject to the ITAR. (7) See USML Category XVIII for certain laser-based directed energy weapon systems, equipment, and components subject to the ITAR.

*Related Definitions:* (1) ‘Wall-plug efficiency’ is defined as the ratio of “laser” output power (or “average output power”) to total electrical input power required to operate the “laser”, including the power supply/conditioning and thermal conditioning/heat exchanger, see

6A005.a.6.b.1 and 6A005.b.6; (2) ‘Non-repetitive pulsed’ refers to “lasers” that produce either a single output pulse or that have a time interval between pulses exceeding one minute, see Note 2 of 6A005 and 6A005.d.6.

*Items:*

*Notes:*

1. Pulsed “lasers” include those that run in a continuous wave (CW) mode with pulses superimposed.

2. Excimer, semiconductor, chemical, CO, CO<sub>2</sub>, and ‘non-repetitive pulsed’ Nd:glass “lasers” are only specified by 6A005.d.

**Technical Note:** ‘Non-repetitive pulsed’ refers to “lasers” that produce either a single output pulse or that have a time interval between pulses exceeding one minute.

3. 6A005 includes fiber “lasers”.

4. The control status of “lasers” incorporating frequency conversion (i.e., wavelength change) by means other than one “laser” pumping another “laser” is determined by applying the control parameters for both the output of the source “laser” and the frequency-converted optical output.

5. 6A005 does not control “lasers” as follows:

- a. Ruby with output energy below 20 J;
- b. Nitrogen;
- c. Krypton.

6. For the purposes of 6A005.a and 6A005.b, ‘single transverse mode’ refers to “lasers” with a beam profile having an  $M^2$ -factor of less than 1.3, while ‘multiple transverse mode’ refers to “lasers” with a beam profile having an  $M^2$ -factor of 1.3 or higher.

a. Non-“tunable” continuous wave “(CW) lasers” having any of the following:

a.1. Output wavelength less than 150 nm and output power exceeding 1W;

a.2. Output wavelength of 150 nm or more but not exceeding 510 nm and output power exceeding 30 W;

*Note:* 6A005.a.2 does not control Argon “lasers” having an output power equal to or less than 50 W.

a.3. Output wavelength exceeding 510 nm but not exceeding 540 nm and any of the following:

a.3.a. ‘Single transverse mode’ output and output power exceeding 50 W; or

a.3.b. ‘Multiple transverse mode’ output and output power exceeding 150 W;

a.4. Output wavelength exceeding 540 nm but not exceeding 800 nm and output power exceeding 30 W;

a.5. Output wavelength exceeding 800 nm but not exceeding 975 nm and any of the following:

a.5.a. ‘Single transverse mode’ output and output power exceeding 50 W; or

a.5.b. ‘Multiple transverse mode’ output and output power exceeding 80 W;

a.6. Output wavelength exceeding 975 nm but not exceeding 1,150 nm and any of the following;

a.6.a. ‘Single transverse mode’ output and any of the following:

a.6.a.1. Average output power exceeding 1,000 W; or

a.6.a.2. Having all of the following:  
a.6.a.2.a. Average output power exceeding 500 W; and

a.6.a.2.b. Spectral bandwidth less than 40 GHz; or

a.6.b. ‘Multiple transverse mode’ output and any of the following:

a.6.b.1. ‘Wall-plug efficiency’ exceeding 18% and output power exceeding 1,000 W; or

a.6.b.2. Output power exceeding 2 kW;

*Note 1:* 6A005.a.6.b does not control ‘multiple transverse mode’, industrial “lasers” with output power exceeding 2 kW and not exceeding 6 kW with a total mass greater than 1,200 kg. For the purpose of this note, total mass includes all “components” required to operate the “laser,” e.g., “laser,” power supply, heat exchanger, but excludes external optics for beam conditioning or delivery.

*Note 2:* 6A005.a.6.b does not apply to ‘multiple transverse mode’, industrial “lasers” having any of the following:

a. [Reserved];

b. Output power exceeding 1 kW but not exceeding 1.6 kW and having a BPP exceeding 1.25 mm•mrad;

c. Output power exceeding 1.6 kW but not exceeding 2.5 kW and having a BPP exceeding 1.7 mm•mrad;

d. Output power exceeding 2.5 kW but not exceeding 3.3 kW and having a BPP exceeding 2.5 mm•mrad;

e. Output power exceeding 3.3 kW but not exceeding 6 kW and having a BPP exceeding 3.5 mm•mrad;

- f. [Reserved]*
- g. [Reserved]*
- h. Output power exceeding 6 kW but not exceeding 8 kW and having a BPP exceeding 12 mm•mrad; or*
- i. Output power exceeding 8 kW but not exceeding 10 kW and having a BPP exceeding 24 mm•mrad;*
- a.7. Output wavelength exceeding 1,150 nm but not exceeding 1,555 nm and any of the following:
- a.7.a. ‘Single transverse mode’ and output power exceeding 50 W; *or*
- a.7.b. ‘Multiple transverse mode’ and output power exceeding 80 W;
- a.8. Output wavelength exceeding 1,555 nm but not exceeding 1,850 nm and output power exceeding 1 W;
- a.9. Output wavelength exceeding 1,850 nm but not exceeding 2,100 nm, and any of the following:
- a.9.a. ‘Single transverse mode’ and output power exceeding 1 W; *or*
- a.9.b. ‘Multiple transverse mode’ output and output power exceeding 120 W; *or*
- a.10. Output wavelength exceeding 2,100 nm and output power exceeding 1 W;
- b. Non-“tunable” “pulsed lasers” having any of the following:
- b.1. Output wavelength less than 150 nm and any of the following:
- b.1.a. Output energy exceeding 50 mJ per pulse and “peak power” exceeding 1 W; *or*

b.1.b. “Average output power” exceeding 1 W;

b.2. Output wavelength of 150 nm or more but not exceeding 510 nm and any of the following:

b.2.a. Output energy exceeding 1.5 J per pulse and “peak power” exceeding 30 W; *or*

b.2.b. “Average output power” exceeding 30 W;

*Note: 6A005.b.2.b does not control Argon “lasers” having an “average output power” equal to or less than 50 W.*

b.3. Output wavelength exceeding 510 nm, but not exceeding 540 nm and any of the following:

b.3.a. ‘Single transverse mode’ output and any of the following:

b.3.a.1. Output energy exceeding 1.5 J per pulse and “peak power” exceeding 50 W; *or*

b.3.a.2. “Average output power” exceeding 50 W; *or*

b.3.b. ‘Multiple transverse mode’ output and any of the following:

b.3.b.1. Output energy exceeding 1.5 J per pulse and “peak power” exceeding 150 W; *or*

b.3.b.2. “Average output power” exceeding 150 W;

b.4. Output wavelength exceeding 540 nm but not exceeding 800 nm and any of the following:

b.4.a. “Pulse duration” less than 1 ps and any of the following:

b.4.a.1. Output energy exceeding 0.005 J per pulse and “peak power” exceeding 5 GW; *or*

b.4.a.2. “Average output power” exceeding 20 W; *or*

b.4.b. “Pulse duration” equal to or exceeding 1 ps and any of the following:

b.4.b.1. Output energy exceeding 1.5 J per pulse and “peak power” exceeding 30 W; *or*

b.4.b.2. “Average output power” exceeding 30 W;

b.5. Output wavelength exceeding 800 nm but not exceeding 975 nm and any of the following:

b.5.a. “Pulse duration” less than 1ps and any of the following:

b.5.a.1. Output energy exceeding 0.005 J per pulse and “peak power” exceeding 5 GW; *or*

b.5.a.2. ‘Single transverse mode’ output and “average output power” exceeding 20 W;

b.5.b. “Pulse duration” equal to or exceeding 1 ps and not exceeding 1  $\mu$ s and any of the following:

b.5.b.1. Output energy exceeding 0.5 J per pulse and “peak power” exceeding 50 W;

b.5.b.2. ‘Single transverse mode’ output and “average output power” exceeding 20 W; *or*

b.5.b.3. ‘Multiple transverse mode’ output and “average output power” exceeding 50 W; *or*

b.5.c. “Pulse duration” exceeding 1  $\mu$ s and any of the following:

b.5.c.1. Output energy exceeding 2 J per pulse and “peak power” exceeding 50 W;

b.5.c.2. ‘Single transverse mode’ output and “average output power” exceeding 50 W; *or*

b.5.c.3. ‘Multiple transverse mode’ output and “average output power” exceeding 80 W.

b.6. Output wavelength exceeding 975 nm but not exceeding 1,150 nm and any of the following:

b.6.a. “Pulse duration” of less than 1 ps, and any of the following:

b.6.a.1. Output “peak power” exceeding 2 GW per pulse;

b.6.a.2. “Average output power” exceeding 30 W; *or*

b.6.a.3. Output energy exceeding 0.002 J per pulse;

b.6.b. “Pulse duration” equal to or exceeding 1 ps and less than 1 ns, and any of the following:

b.6.b.1. Output “peak power” exceeding 5 GW per pulse;

b.6.b.2. “Average output power” exceeding 50 W; *or*

b.6.b.3. Output energy exceeding 0.1 J per pulse;

b.6.c. “Pulse duration” equal to or exceeding 1 ns but not exceeding 1  $\mu$ s and any of the following:

b.6.c.1. ‘Single transverse mode’ output and any of the following:

b.6.c.1.a. ‘Peak power’ exceeding 100 MW;

b.6.c.1.b. ‘Average output power’ exceeding 20 W limited by design to a maximum pulse repetition frequency less than or equal to 1 kHz;

b.6.c.1.c. ‘Wall-plug efficiency’ exceeding 12%, ‘average output power’ exceeding 100 W and capable of operating at a pulse repetition frequency greater than 1 kHz;

b.6.c.1.d. ‘Average output power’ exceeding 150 W and capable of operating at a pulse repetition frequency greater than 1 kHz; *or*

b.6.c.1.e. Output energy exceeding 2 J per pulse; *or*

b.6.c.2. ‘Multiple transverse mode’ output and any of the following:

b.6.c.2.a. ‘Peak power’ exceeding 400 MW;

b.6.c.2.b. ‘Wall-plug efficiency’ exceeding 18% and ‘average output power’ exceeding 500 W;

b.6.c.2.c. ‘Average output power’ exceeding 2 kW; *or*

b.6.c.2.d. Output energy exceeding 4 J per pulse; *or*

b.6.d. ‘Pulse duration’ exceeding 1  $\mu$ s and any of the following:

b.6.d.1. ‘Single transverse mode’ output and any of the following:

b.6.d.1.a. ‘Peak power’ exceeding 500 kW;

b.6.d.1.b. ‘Wall-plug efficiency’ exceeding 12% and ‘average output power’ exceeding 100 W; *or*

b.6.d.1.c. ‘Average output power’ exceeding 150 W; *or*

b.6.d.2. ‘Multiple transverse mode’ output and any of the following:

b.6.d.2.a. ‘Peak power’ exceeding 1 MW;

b.6.d.2.b. ‘Wall-plug efficiency’ exceeding 18% and ‘average output power’ exceeding 500 W; *or*

b.6.d.2.c. ‘Average output power’ exceeding 2 kW;

b.7. Output wavelength exceeding 1,150 nm but not exceeding 1,555 nm and any of the following:

b.7.a. ‘Pulse duration’ not exceeding 1  $\mu$ s and any of the following:

b.7.a.1. Output energy exceeding 0.5 J per pulse and ‘peak power’ exceeding 50 W;

b.7.a.2. ‘Single transverse mode’ output and ‘average output power’ exceeding 20 W; *or*

b.7.a.3. ‘Multiple transverse mode’ output and ‘average output power’ exceeding 50 W; *or*

b.7.b. ‘Pulse duration’ exceeding 1  $\mu$ s and any of the following:

b.7.b.1. Output energy exceeding 2 J per pulse and ‘peak power’ exceeding 50 W;

b.7.b.2. ‘Single transverse mode’ output and “average output power” exceeding 50 W; *or*

b.7.b.3. ‘Multiple transverse mode’ output and “average output power” exceeding 80 W;

b.8. Output wavelength exceeding 1,555 nm but not exceeding 1,850 nm, and any of the following:

b.8.a. Output energy exceeding 100 mJ per pulse and “peak power” exceeding 1 W; *or*

b.8.b. “Average output power” exceeding 1 W;

b.9. Output wavelength exceeding 1,850 nm but not exceeding 2,100 nm, and any of the following:

b.9.a. ‘Single transverse mode’ and any of the following:

b.9.a.1. Output energy exceeding 100 mJ per pulse and “peak power” exceeding 1 W; *or*

b.9.a.2. “Average output power” exceeding 1 W;

b.9.b. ‘Multiple transverse mode’ and any of the following:

b.9.b.1. Output energy exceeding 100 mJ per pulse and “peak power” exceeding 10 kW; *or*

b.9.b.2. “Average output power” exceeding 120 W; *or*

b.10. Output wavelength exceeding 2,100 nm and any of the following:

b.10.a. Output energy exceeding 100 mJ per pulse and “peak power” exceeding 1 W; *or*

b.10.b. “Average output power”

exceeding 1 W;

c. “Tunable” lasers having any of the following:

c.1. Output wavelength less than 600 nm and any of the following:

c.1.a. Output energy exceeding 50 mJ per pulse and “peak power” exceeding 1 W; *or*

c.1.b. Average or CW output power exceeding 1 W;

*Note:* 6A005.c.1 does not apply to dye “lasers” or other liquid “lasers,” having a multimode output and a wavelength of 150 nm or more but not exceeding 600 nm and all of the following:

1. Output energy less than 1.5 J per pulse or a “peak power” less than 20 W; and

2. Average or CW output power less than 20 W.

c.2. Output wavelength of 600 nm or more but not exceeding 1,400 nm, and any of the following:

c.2.a. Output energy exceeding 1 J per pulse and “peak power” exceeding 20 W; *or*

c.2.b. Average or CW output power exceeding 20 W; *or*

c.3. Output wavelength exceeding 1,400 nm and any of the following:

c.3.a. Output energy exceeding 50 mJ per pulse and “peak power” exceeding 1 W; *or*

c.3.b. Average or CW output power exceeding 1 W;

d. Other “lasers”, not controlled by 6A005.a, 6A005.b, or 6A005.c as follows:

d.1. Semiconductor “lasers” as follows:

**Notes:**

1. 6A005.d.1 includes semiconductor “lasers” having optical output connectors (e.g., fiber optic pigtails).

2. The control status of semiconductor “lasers” “specially designed” for other equipment is determined by the control status of the other equipment.

d.1.a. Individual single transverse mode semiconductor “lasers” having any of the following:

d.1.a.1. Wavelength equal to or less than 1,510 nm and average or CW output power, exceeding 1.5 W; or

d.1.a.2. Wavelength greater than 1,510 nm and average or CW output power, exceeding 500 mW;

d.1.b. Individual ‘multiple-transverse mode’ semiconductor “lasers” having any of the following:

d.1.b.1. Wavelength of less than 1,400 nm and average or CW output power, exceeding 15 W;

d.1.b.2. Wavelength equal to or greater than 1,400 nm and less than 1,900 nm and average or CW output power, exceeding 2.5 W; or

d.1.b.3. Wavelength equal to or greater than 1,900 nm and average or CW output power, exceeding 1 W;

d.1.c. Individual semiconductor “laser” ‘bars’ having any of the following:

d.1.c.1. Wavelength of less than

1,400 nm and average or CW output power, exceeding 100 W;

d.1.c.2. Wavelength equal to or greater than 1,400 nm and less than 1,900 nm and average or CW output power, exceeding 25 W; or

d.1.c.3. Wavelength equal to or greater than 1,900 nm and average or CW output power, exceeding 10 W;

d.1.d. Semiconductor “laser” ‘stacked arrays’ (two dimensional arrays) having any of the following:

d.1.d.1. Wavelength less than 1,400 nm and having any of the following:

d.1.d.1.a. Average or CW total output power less than 3 kW and having average or CW output ‘power density’ greater than 500 W/cm<sup>2</sup>;

d.1.d.1.b. Average or CW total output power equal to or exceeding 3 kW but less than or equal to 5 kW, and having average or CW output ‘power density’ greater than 350W/cm<sup>2</sup>;

d.1.d.1.c. Average or CW total output power exceeding 5 kW;

d.1.d.1.d. Peak pulsed ‘power density’ exceeding 2,500 W/cm<sup>2</sup>; or

*Note: 6A005.d.1.d.1.d does not apply to epitaxially-fabricated monolithic devices.*

d.1.d.1.e. Spatially coherent average or CW total output power, greater than 150 W;

d.1.d.2. Wavelength greater than or equal to 1,400 nm but less than 1,900 nm, and having any of the following:

d.1.d.2.a. Average or CW

total output power less than 250 W and average or CW output ‘power density’ greater than 150 W/cm<sup>2</sup>;

d.1.d.2.b. Average or CW total output power equal to or exceeding 250 W but less than or equal to 500 W, and having average or CW output ‘power density’ greater than 50W/cm<sup>2</sup>;

d.1.d.2.c. Average or CW total output power exceeding 500 W;

d.1.d.2.d. Peak pulsed ‘power density’ exceeding 500 W/cm<sup>2</sup>; or

*Note: 6A005.d.1.d.2.d does not apply to epitaxially-fabricated monolithic devices.*

d.1.d.2.e. Spatially coherent average or CW total output power, exceeding 15 W;

d.1.d.3. Wavelength greater than or equal to 1,900 nm and having any of the following:

d.1.d.3.a. Average or CW output ‘power density’ greater than 50 W/cm<sup>2</sup>;

d.1.d.3.b. Average or CW output power greater than 10 W; or

d.1.d.3.c. Spatially coherent average or CW total output power, exceeding 1.5 W; or

d.1.d.4. At least one “laser” ‘bar’ specified by 6A005.d.1.c;

**Technical Note:** For the purposes of 6A005.d.1.d, ‘power density’ means the total “laser” output power divided by the emitter surface area of the ‘stacked array’.

d.1.e. Semiconductor “laser” ‘stacked

arrays’, other than those specified by 6A005.d.1.d, having all of the following:

d.1.e.1. “Specially designed” or modified to be combined with other ‘stacked arrays’ to form a larger ‘stacked array’; and

d.1.e.2. Integrated connections, common for both electronics and cooling;

**Note 1:** ‘Stacked arrays’, formed by combining semiconductor “laser” ‘stacked arrays’ specified by 6A005.d.1.e, that are not designed to be further combined or modified are specified by 6A005.d.1.d.

**Note 2:** ‘Stacked arrays’, formed by combining semiconductor “laser” ‘stacked arrays’ specified by 6A005.d.1.e, that are designed to be further combined or modified are specified by 6A005.d.1.e.

**Note 3:** 6A005.d.1.e does not apply to modular assemblies of single ‘bars’ designed to be fabricated into end to end stacked linear arrays.

**Technical Notes:**

1. Semiconductor “lasers” are commonly called “laser” diodes.

2. A ‘bar’ (also called a semiconductor “laser” ‘bar’, a “laser” diode ‘bar’ or diode ‘bar’) consists of multiple semiconductor “lasers” in a one dimensional array.

3. A ‘stacked array’ consists of multiple ‘bars’ forming a two dimensional array of semiconductor “lasers”.

d.2. Carbon monoxide (CO) “lasers” having any of the following:

d.2.a. Output energy exceeding 2 J per pulse and “peak power” exceeding 5 kW; or

d.2.b. Average or CW output power, exceeding 5 kW;

d.3. Carbon dioxide (CO<sub>2</sub>) “lasers” having any of the following:

d.3.a. CW output power exceeding 15 kW;

d.3.b. Pulsed output with “pulse duration” exceeding 10 μs and any of the following:

d.3.b.1. “Average output power” exceeding 10 kW; *or*

d.3.b.2. “Peak power” exceeding 100 kW; *or*

d.3.c. Pulsed output with a “pulse duration” equal to or less than 10 μs and any of the following:

d.3.c.1. Pulse energy exceeding 5 J per pulse; *or*

d.3.c.2. “Average output power” exceeding 2.5 kW;

d.4. Excimer “lasers” having any of the following:

d.4.a. Output wavelength not exceeding 150 nm and any of the following:

d.4.a.1. Output energy exceeding 50 mJ per pulse; *or*

d.4.a.2. “Average output power” exceeding 1 W;

d.4.b. Output wavelength exceeding 150 nm but not exceeding 190 nm and any of the following:

d.4.b.1. Output energy exceeding 1.5 J per pulse; *or*

d.4.b.2. “Average output power” exceeding 120 W;

d.4.c. Output wavelength exceeding 190 nm but not exceeding 360 nm and any of the following:

d.4.c.1. Output energy exceeding 10 J per pulse; *or*

d.4.c.2. “Average output power” exceeding 500 W; *or*

d.4.d. Output wavelength exceeding 360 nm and any of the following:

d.4.d.1. Output energy exceeding 1.5 J per pulse; *or*

d.4.d.2. “Average output power” exceeding 30 W;

*Note: For excimer “lasers” “specially designed” for lithography equipment, see 3B001.*

d.5. “Chemical lasers” as follows:

d.5.a. Hydrogen Fluoride (HF) “lasers”;

d.5.b. Deuterium Fluoride (DF) “lasers”;

d.5.c. “Transfer lasers” as follows:

d.5.c.1. Oxygen Iodine (O<sub>2</sub>-I) “lasers”;

d.5.c.2. Deuterium Fluoride-Carbon dioxide (DF-CO<sub>2</sub>) “lasers”;

*Technical Note: ‘Transfer lasers’ are “lasers” in which the lasing species are excited through the transfer of energy by collision of a non-lasing atom or molecule with a lasing atom or molecule species.*

d.6. “Non-repetitive pulsed” Neodymium (Nd) glass “lasers” having any of the following:

d.6.a. A “pulse duration” not exceeding 1  $\mu$ s and output energy exceeding 50 J per pulse; *or*

d.6.b. A “pulse duration” exceeding 1  $\mu$ s and output energy exceeding 100 J per pulse;

e. “Components” as follows:

e.1. Mirrors cooled either by ‘active cooling’ or by heat pipe cooling;

**Technical Note:** ‘Active cooling’ is a cooling technique for optical “components” using flowing fluids within the subsurface (nominally less than 1 mm below the optical surface) of the optical component to remove heat from the optic.

e.2. Optical mirrors or transmissive or partially transmissive optical or electro-optical “components,” other than fused tapered fiber combiners and Multi-Layer Dielectric gratings (MLDs), “specially designed” for use with controlled “lasers”;

**Note to 6A005.e.2:** Fiber combiners and MLDs are specified by 6A005.e.3.

e.3. Fiber “laser” “components” as follows:

e.3.a. Multimode to multimode fused tapered fiber combiners having all of the following:

e.3.a.1. An insertion loss better (less) than or equal to 0.3 dB maintained at a rated total average or CW output power (excluding output power transmitted through the single mode core if present) exceeding 1,000 W; *and*

e.3.a.2. Number of input fibers equal to or greater than 3;

e.3.b. Single mode to multimode fused tapered fiber combiners having all of the following:

e.3.b.1. An insertion loss better (less) than 0.5 dB maintained at a rated total average or CW output power exceeding 4,600 W;

e.3.b.2. Number of input fibers equal to or greater than 3; *and*

e.3.b.3. Having any of the following:

e.3.b.3.a. A Beam Parameter Product (BPP) measured at the output not exceeding 1.5 mm mrad for a number of input fibers less than or equal to 5; *or*

e.3.b.3.b. A BPP measured at the output not exceeding 2.5 mm mrad for a number of input fibers greater than 5;

e.3.c. MLDs having all of the following:

e.3.c.1. Designed for spectral or coherent beam combination of 5 or more fiber “lasers;” *and*

e.3.c.2. CW “Laser” Induced Damage Threshold (LIDT) greater than or equal to 10 kW/cm<sup>2</sup>;

f. Optical equipment as follows:

**N.B.:** For shared aperture optical elements, capable of operating in “Super-High Power Laser” (“SHPL”) applications, see the U.S. Munitions List (22 CFR part 121).

f.1. [Reserved]

**N.B.:** For items previously specified by 6A005.f.1, see 6A004.f.

f.2. “Laser” diagnostic equipment “specially designed” for dynamic measurement of “SHPL” system angular beam steering errors and having an angular “accuracy” of 10  $\mu$ rad (microradians) or less (better);

f.3. Optical equipment and “components”, “specially designed” for coherent beam combination in a phased-array “SHPL” system and having any of the following:

f.3.a. An “accuracy” of 0.1 μm or less, for wavelengths greater than 1 μm; *or*

f.3.b. An “accuracy” of λ/10 or less (better) at the designed wavelength, for wavelengths equal to or less than 1 μm;

f.4. Projection telescopes “specially designed” for use with “SHPL” systems;

g. ‘Laser acoustic detection equipment’ having all of the following:

g.1. CW “laser” output power greater than or equal to 20 mW;

g.2. “Laser” frequency stability equal to or better (less) than 10 MHz;

g.3. “Laser” wavelengths equal to or exceeding 1,000 nm but not exceeding 2,000 nm;

g.4. Optical system resolution better (less) than 1 nm; *and*

g.5. Optical Signal to Noise ratio equal or exceeding to 10<sup>3</sup>.

*Technical Note: ‘Laser acoustic detection equipment’ is sometimes referred to as a “Laser” Microphone or Particle Flow Detection Microphone.*

**\*\*6A006** “Magnetometers”, “magnetic gradiometers”, “intrinsic magnetic gradiometers”, underwater electric field sensors, “compensation systems”, and “specially designed” “components” therefor, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$1500, N/A for 6A006.a.1; “Magnetometers” and subsystems defined in 6A006.a.2 using optically pumped or nuclear precession (proton/Overhauser) having a ‘sensitivity’ lower (better) than 2 pT (rms) per square root Hz; and 6A006.d, and 6A006.e.

*GBS:* N/A

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship any commodity in: 6A006.a.1; or 6A006.a.2; or 6A006.c.1 “Magnetic gradiometers” using multiple “magnetometers” specified by 6A006.a.1 or 6A006.a.2; or 6A006.d or .e (only for underwater receivers incorporating magnetometers specified in 6A006.a.1 or 6A006.a.2) to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* See also [6A996](#). This entry does not control instruments “specially designed” for fishery applications or biomagnetic measurements for medical diagnostics.

*Related Definitions:* N/A

*Items:*

a. “Magnetometers” and subsystems, as follows:

a.1. “Magnetometers” using “superconductive” (SQUID) “technology” and having any of the following:

a.1.a. SQUID systems designed for stationary operation, without “specially designed” subsystems designed to reduce in-motion noise, and having a ‘sensitivity’ equal to or lower (better) than 50 fT (rms) per square root Hz at a frequency of 1 Hz; *or*

a.1.b. SQUID systems having an in-motion-magnetometer ‘sensitivity’ lower (better) than 20 pT (rms) per square root Hz at a frequency of 1 Hz and “specially designed” to reduce in-motion noise;

a.2. “Magnetometers” using optically pumped or nuclear precession (proton/Overhauser) “technology” having a ‘sensitivity’ lower (better) than 20 pT (rms) per square root Hz at a frequency of 1 Hz;

a.3. “Magnetometers” using fluxgate “technology” having a ‘sensitivity’ equal to or lower (better) than 10 pT (rms) per square root Hz at a frequency of 1 Hz;

a.4. Induction coil “magnetometers” having a ‘sensitivity’ lower (better) than any of the following:

a.4.a. 0.05 nT (rms)/square root Hz at frequencies of less than 1 Hz;

a.4.b.  $1 \times 10^{-3}$  nT (rms)/square root Hz at frequencies of 1 Hz or more but not exceeding 10 Hz; *or*

a.4.c.  $1 \times 10^{-4}$  nT (rms)/square root Hz at frequencies exceeding 10 Hz;

a.5. Fiber optic “magnetometers” having a ‘sensitivity’ lower (better) than 1 nT (rms) per square root Hz;

b. Underwater electric field sensors having a ‘sensitivity’ lower (better) than 8 nanovolt per meter per square root Hz when measured at 1 Hz;

c. “Magnetic gradiometers” as follows:

c.1. “Magnetic gradiometers” using multiple “magnetometers” controlled by 6A006.a;

c.2. Fiber optic “intrinsic magnetic gradiometers” having a magnetic gradient field ‘sensitivity’ lower (better) than 0.3 nT/m (rms) per square root Hz;

c.3. “Intrinsic magnetic gradiometers”, using “technology” other than fiber-optic “technology”, having a magnetic gradient field ‘sensitivity’ lower (better) than 0.015 nT/m (rms) per square root Hz;

d. “Compensation systems” for magnetic and underwater electric field sensors resulting in a performance equal to or better than the control parameters of 6A006.a, 6A006.b, and 6A006.c; and

e. Underwater electromagnetic receivers incorporating magnetic field sensors specified by 6A006.a or underwater electric field sensors specified by 6A006.b.

**Technical Note:** For the purposes of 6A006, ‘sensitivity’ (noise level) is the root mean square of the device-limited noise floor which is the lowest signal that can be measured.

**\*\*6A007 Gravity meters (gravimeters) and gravity gradiometers, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
MT applies to 6A007.b and .c when the accuracies in 6A007.b.1 and b.2 are met or exceeded.	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$3000; N/A for MT  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* Related Controls: (1) See USML Category XII(d) for certain gravity meters (gravimeters) and gravity gradiometers subject to the ITAR. (2) See also ECCNs [6A107](#), [6A997](#), and 7A611.

*Related Definitions:* N/A

*Items:*

a. Gravity meters designed or modified for ground use and having a static “accuracy” of less (better) than 10 µGal;

*Note:* 6A007.a does not control ground gravity meters of the quartz element (Worden) type.

b. Gravity meters designed for mobile platforms and having all of the following:

b.1. A static “accuracy” of less (better) than 0.7 mGal; *and*

b.2. An in-service (operational) “accuracy” of less (better) than 0.7 mGal having a ‘time-to-steady-state registration’ of less than 2 minutes under any combination of attendant corrective compensations and motional influences;

c. Gravity gradiometers.

**\*\*6A008 Radar systems, equipment and assemblies, having any of the following (see List of Items Controlled), and “specially designed” “components” therefor.**

**License Requirements**

*Reason for Control:* NS, MT, RS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
MT applies to items that are designed for airborne applications and that are usable in systems controlled for MT reasons	MT Column 1
RS applies to 6A008.j.1	RS Column 1
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS*: \$5000; N/A for MT and for 6A008.j.1.

*GBS*: Yes, for 6A008.b, .c, and l.1 only

### Special Conditions for STA

*STA*: License Exception STA may not be used to ship any commodity in 6A008.d, 6A008.h or 6A008.k to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

### List of Items Controlled

*Related Controls*: (1) See also ECCNs [6A108](#) and [6A998](#). ECCN [6A998](#) controls, inter alia, the Light Detection and Ranging (LIDAR) equipment excluded by the note to paragraph j of this ECCN ([6A008](#)). (2) See USML Category XII(b) for certain LIDAR, Laser Detection and Ranging (LADAR), or range-gated systems subject to the ITAR.

*Related Definitions*: N/A

*Items*:

*Note*: 6A008 does not control:

- Secondary surveillance radar (SSR);
- Civil Automotive Radar;
- Displays or monitors used for air traffic control (ATC);
- Meteorological (weather) radar;
- Precision Approach Radar (PAR) equipment conforming to ICAO standards and employing electronically steerable linear (1-dimensional) arrays or mechanically positioned passive antennas.

a. Operating at frequencies from 40 GHz to 230

GHz and having any of the following:

a.1. An average output power exceeding 100 mW; *or*

a.2. Locating “accuracy” of 1 m or less (better) in range and 0.2 degree or less (better) in azimuth;

b. A tunable bandwidth exceeding  $\pm 6.25\%$  of the ‘center operating frequency’;

**Technical Note:** *The ‘center operating frequency’ equals one half of the sum of the highest plus the lowest specified operating frequencies.*

c. Capable of operating simultaneously on more than two carrier frequencies;

d. Capable of operating in synthetic aperture (SAR), inverse synthetic aperture (ISAR) radar mode, or sidelooking airborne (SLAR) radar mode;

e. Incorporating electronically scanned array antennae;

**Technical Note:** *Electronically scanned array antennae are also known as electronically steerable array antennae.*

f. Capable of heightfinding non-cooperative targets;

g. “Specially designed” for airborne (balloon or airframe mounted) operation and having Doppler “signal processing” for the detection of moving targets;

h. Employing processing of radar signals and using any of the following:

h.1. “Radar spread spectrum” techniques; *or*

h.2. “Radar frequency agility” techniques;

i. Providing ground-based operation with a maximum “instrumented range” exceeding 185 km;

*Note:* 6A008.i does not control:

a. Fishing ground surveillance radar;

b. Ground radar equipment “specially designed” for en route air traffic control, and having all of the following:

1. A maximum “instrumented range” of 500 km or less;

2. Configured so that radar target data can be transmitted only one way from the radar site to one or more civil ATC centers;

3. Contains no provisions for remote control of the radar scan rate from the en route ATC center; and

4. Permanently installed;

c. Weather balloon tracking radars.

j. Being “laser” radar or Light Detection and Ranging (LIDAR) equipment and having any of the following:

j.1. “Space-qualified”;

j.2. Employing coherent heterodyne or homodyne detection techniques and having an angular resolution of less (better) than 20  $\mu$ rad (microradians); or

j.3. Designed for carrying out airborne bathymetric littoral surveys to International Hydrographic Organization (IHO) Order 1a Standard (5<sup>th</sup> Edition February 2008) for Hydrographic Surveys or better, and using one or more “lasers” with a wavelength exceeding 400 nm but not exceeding 600 nm;

*Note 1:* LIDAR equipment “specially designed” for surveying is only specified by 6A008.j.3.

*Note 2:* 6A008.j does not apply to LIDAR equipment “specially designed” for meteorological observation.

*Note 3:* Parameters in the IHO Order 1a Standard 5th Edition February 2008 are summarized as follows:

Horizontal Accuracy (95% Confidence Level) = 5 m + 5% of depth.

Depth Accuracy for Reduced Depths (95 % confidence level) =  $\pm\sqrt{a^2+(b*d)^2}$  where:

$a = 0.5$  m = constant depth error, i.e. the sum of all constant depth errors

$b = 0.013$  = factor of depth dependent error

$b*d$  = depth dependent error, i.e. the sum of all depth dependent errors

$d$  = depth

Feature Detection = Cubic features > 2 m in depths up to 40 m; 10% of depth beyond 40 m.

k. Having “signal processing” sub-systems using “pulse compression” and having any of the following:

k.1. A “pulse compression” ratio exceeding 150; or

k.2. A compressed pulse width of less than 200 ns; or

*Note:* 6A008.k.2 does not apply to two dimensional ‘marine radar’ or ‘vessel traffic service’ radar, having all of the following:

- a. “Pulse compression” ratio not exceeding 150;
- b. Compressed pulse width of greater than 30 ns;
- c. Single and rotating mechanically scanned antenna;
- d. Peak output power not exceeding 250 W; and
- e. Not capable of “frequency hopping”.

1. Having data processing sub-systems and having any of the following:

1.1. ‘Automatic target tracking’ providing, at any antenna rotation, the predicted target position beyond the time of the next antenna beam passage; or

*Note:* 6A008.1.1 does not control conflict alert capability in ATC systems, or ‘marine radar’.

**Technical Note:** ‘Automatic target tracking’ is a processing technique that automatically determines and provides as output an extrapolated value of the most probable position of the target in real time.

1.2. [Reserved]

1.3. [Reserved]

1.4. Configured to provide superposition and correlation, or fusion, of target data within six seconds from two or more ‘geographically dispersed’ radar sensors to improve the aggregate performance beyond that of any single sensor specified by 6A008.f, or 6A008.i.

**Technical Note:** Sensors are considered ‘geographically dispersed’ when each location is distant from any other more than 1,500 m in any direction. Mobile sensors are always considered ‘geographically dispersed’.

**N.B.:** See also the U.S. Munitions List (22 CFR part 121).

*Note:* 6A008.1 does not apply to systems, equipment and assemblies designed for ‘vessel traffic services’.

**Technical Notes:**

1. For the purposes of 6A008, ‘marine radar’ is a radar that is used to navigate safely at sea, inland waterways or near-shore environments.

2. For the purposes of 6A008, ‘vessel traffic service’ is a vessel traffic monitoring and control service similar to air traffic control for “aircraft.”

**\*\*6A102** Radiation hardened detectors, other than those controlled by 6A002, “specially designed” or modified for protecting against nuclear effects (e.g., Electromagnetic Pulse (EMP), X-rays, combined blast and thermal effects) and usable for “missiles”, designed or rated to withstand radiation levels which meet or exceed a total irradiation dose of 5 x 10<sup>5</sup> rads (silicon).

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* In this entry, a detector is defined as a mechanical, electrical, optical or chemical device that automatically identifies and records, or registers a stimulus such as an environmental change in pressure or temperature, an electrical or electromagnetic signal or radiation from a radioactive material.

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*6A103** Radomes designed to withstand a combined thermal shock greater than 100 cal/sq cm accompanied by a peak over pressure of greater than 50 kPa, usable in protecting “missiles” against nuclear effects (e.g., Electromagnetic Pulse (EMP), X-rays, combined blast and thermal effects), and usable for “missiles”. (These items are “subject to the ITAR.” See 22 CFR parts 120 through 130.)

**\*\*6A107** Gravity meters (gravimeters) or gravity gradiometers, other than those controlled by 6A007, designed or modified for airborne or marine use, as follows, (see List of Items Controlled) and “specially designed” “parts” and “components” therefor.

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See USML Category XII(d) for certain gravity meters (gravimeters) or gravity gradiometers subject to the ITAR. See also ECCN 7A611.

*Related Definitions:* ‘Time to steady-state registration’ (also referred to as the gravity meter’s response time) is the time over which the disturbing effects of platform-induced acceleration (high frequency noise) are reduced.

*Items:*

a. Gravity meters having all the following:

a.1. A static or operational accuracy equal to or less (better) than 0.7 milligal (mgal); *and*

a.2. A ‘time to steady-state registration’ of two minutes or less.

b. Gravity gradiometers.

**\*\*6A108** Radar systems and tracking systems, other than those controlled by 6A008, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) This entry does not control airborne civil weather radar conforming to international standards for civil weather radars provided that they do not incorporate any of the following: (a) Phased array antennas; (b) Frequency agility; (c) Spread spectrum; or (d) Signal processing “specially designed” for the tracking of vehicles. (2) Items in [6A108.a](#) that are “specially designed” or modified for “missiles” or for items on the U.S. Munitions List are “subject to the ITAR” (see 22 CFR parts 120 through 130).

*Related Definitions:* Laser radar systems are defined as those that embody specialized transmission, scanning, receiving and signal processing techniques for utilization of lasers for echo ranging, direction finding and discrimination of targets by location, radial speed and body reflection characteristics.

*Items:*

- a. Radar and laser radar systems designed or modified for use in “missiles”;

*Note:* 6A108.a includes the following:

- a. Terrain contour mapping equipment;
- b. Imaging sensor equipment;
- c. Scene mapping and correlation (both digital and analog) equipment;
- d. Doppler navigation radar equipment.

- b. Precision tracking systems, usable for rockets, missiles, or unmanned aerial vehicles capable of achieving a “range” equal to or greater than 300 km, as follows:

- b.1. Tracking systems which use a code translator installed on the rocket or unmanned aerial vehicle in conjunction with either surface or airborne references or navigation satellite systems to provide real-time measurements of in-flight position and velocity;

- b.2. Range instrumentation radars including associated optical/infrared trackers with all of the following capabilities:

- b.2.a. Angular resolution better than 1.5 milliradians;

- b.2.b. Range of 30 km or greater with a range resolution better than 10 m rms;

- b.2.c. Velocity resolution better than 3 m/s.

**\*\*6A202** Photomultiplier tubes having both of the following characteristics (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

LVS: N/A  
GBS: N/A

**List of Items Controlled**

*Related Controls:* See ECCNs [6E001](#) (“development”), [6E002](#) (“production”), and [6E201](#) (“use”) for technology for items

controlled under this entry.

*Related Definitions:* N/A

*Items:*

- a. Photocathode area of greater than 20 cm<sup>2</sup>; and
- b. Anode pulse rise time of less than 1 ns.

**\*\*6A203 High-speed cameras, imaging devices and “components” therefor, other than those controlled by 6A003 (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [6E001](#) (“development”), [6E002](#) (“production”), and [6E201](#) (“use”) for technology for items controlled under this entry. (2) Also see ECCN [6A003.a.3](#) and [a.4](#).

*Related Definitions:* N/A

*Items:*

- a. Streak cameras and “specially designed” components therefor, as follows:
  - a.1. Streak cameras with writing speeds greater than 0.5 mm/μs;

- a.2. Electronic streak cameras capable of 50 ns or less time resolution;

- a.3. Streak tubes for cameras described in 6A203.a.2;

- a.4. Plug-ins, “specially designed” for use with streak cameras having modular structures, that enable the performance characteristics described in 6A203.a.1 or .a.2;

- a.5. Synchronizing electronics units, and rotor assemblies consisting of turbines, mirrors and bearings, that are “specially designed” for cameras described in 6A203.a.1.

- b. Framing cameras and “specially designed” components therefor, as follows:

- b.1. Framing cameras with recording rates greater than 225,000 frames per second;

- b.2. Framing cameras capable of 50 ns or less frame exposure time;

- b.3. Framing tubes, and solid-state imaging devices, that have a fast image gating (shutter) time of 50 ns or less and are “specially designed” for cameras described in 6A203.b.1 or .b.2;

- b.4. Plug-ins, “specially designed” for use with framing cameras having modular structures, that enable the performance characteristics described in 6A203.b.1 or .b.2;

- b.5. Synchronizing electronic units, and rotor assemblies consisting of turbines, mirrors and bearings, that are “specially designed” for cameras described in 6A203.b.1 or .b.2.

- c. Solid-state or electron tube cameras and “specially designed” components therefor, as follows:

- c.1. Solid-state cameras, or electron tube cameras, with a fast image gating (shutter) time

of 50 ns or less;

c.2. Solid-state imaging devices, and image intensifiers tubes, that have a fast image gating (shutter) time of 50 ns or less and are “specially designed” for cameras described in 6A203.c.1;

c.3. Electro-optical shuttering devices (Kerr or Pockels cells) with a fast image gating (shutter) time of 50 ns or less;

c.4. Plug-ins, “specially designed” for use with cameras having modular structures, that enable the performance characteristics described in 6A203.c.1.

*Technical Note: High speed single frame cameras can be used alone to produce a single image of a dynamic event, or several such cameras can be combined in a sequentially-triggered system to produce multiple images of an event.*

d. Radiation-hardened TV cameras, or lenses therefor, “specially designed” or rated as radiation hardened to withstand a total radiation dose greater than  $5 \times 10^4$  Gy (silicon) without operational degradation.

*Technical Note: The term Gy (silicon) refers to the energy in Joules per kilogram absorbed by an unshielded silicon sample when exposed to ionizing radiation.*

**\*\*6A205** “Lasers,” “laser” amplifiers and oscillators, other than those controlled by 6A005 (see List of Items Controlled), excluding items that are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

**License Requirements**

Reason for Control: NP, AT

Control(s)	Country Chart
------------	---------------

	<i>(See Supp. No. 1 to part 738)</i>
NP applies to entire entry	NP Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCNs [6E001](#) (“development”), [6E002](#) (“production”), and [6E201](#) (“use”) for technology for items controlled under this entry. (2) Also see ECCNs [6A005](#) and [6A995](#). (3) See ECCN [6A005.a.2](#) for additional controls on argon ion lasers; See ECCN [6A005.b.6.c](#) for additional controls on neodymium-doped lasers. (4) “Lasers” “specially designed” or prepared for use in isotope separation are subject to the export licensing authority of the Nuclear Regulatory Commission (see 10 CFR part 110).

*Related Definitions:* N/A

*Items:*

a. Copper vapor lasers having both of the following characteristics:

a.1. Operating at wavelengths between 500 nm and 600 nm; *and*

a.2. An average output power equal to or greater than 30 W;

b. Argon ion “lasers” having both of the following characteristics:

b.1. Operating at wavelengths between 400 nm and 515 nm; *and*

b.2. An average output power greater than 40 W;

c. Neodymium-doped (other than glass) lasers with an output wavelength between 1000 nm and 1100 nm having either of the following:

c.1. Pulse-excited and Q-switched with a pulse duration equal to or greater than 1 ns, and having either of the following:

c.1.a. A single-transverse mode output with an average output power greater than 40 W;  
*or*

c.1.b. A multiple-transverse mode output with an average output power greater than 50 W;  
*or*

c.2. Incorporating frequency doubling to give an output wavelength between 500 nm and 550 nm with an average output power of greater than 40 W.

d. Tunable pulsed single-mode dye laser oscillators having all of the following characteristics:

d.1. Operating at wavelengths between 300 nm and 800 nm;

d.2. An average output greater than 1 W;

d.3. A repetition rate greater than 1 kHz; *and*

d.4. Pulse width less than 100 ns;

e. Tunable pulsed dye laser amplifiers and oscillators having all of the following characteristics:

e.1. Operating at wavelengths between 300 nm and 800 nm;

e.2. An average output greater than 30 W;

e.3. A repetition rate greater than 1 kHz; *and*

e.4. Pulse width less than 100 ns;

*Note to 6A205.e:* 6A205.e does not control single mode oscillators.

f. Alexandrite lasers having all of the following characteristics:

f.1. Operating at wavelengths between 720 nm and 800 nm;

f.2. A bandwidth of 0.005 nm or less;

f.3. A repetition rate greater than 125 Hz; *and*

f.4. An average output power greater than 30 W;

g. Pulsed carbon dioxide “lasers” having all of the following characteristics:

g.1. Operating at wavelengths between 9,000 nm and 11,000 nm;

g.2. A repetition rate greater than 250 Hz;

g.3. An average output power greater than 500 W; *and*

g.4. Pulse width of less than 200 ns;

*Note to 6A205.g:* 6A205.g does not control the higher power (typically 1 kW to 5 kW) industrial CO<sub>2</sub> lasers used in applications such as cutting and welding, as these latter lasers are either continuous wave or are pulsed with a pulse width greater than 200 ns.

h. Pulsed excimer lasers (XeF, XeCl, KrF) having all of the following characteristics:

h.1. Operating at wavelengths between 240 nm and 360 nm;

h.2. A repetition rate greater than 250 Hz; *and*

h.3. An average output power greater than 500 W;

i. Para-hydrogen Raman shifters designed to

operate at 16 micrometer output wavelength and at a repetition rate greater than 250 Hz.;

j. Pulsed carbon monoxide lasers having all of the following characteristics:

j.1. Operating at wavelengths between 5,000 and 6,000 nm;

j.2. A repetition rate greater than 250 Hz;

j.3. An average output power greater than 200 W; and

j.4. Pulse width of less than 200 ns.

*Note to ECCN 6A205.j:* 6A205.j does not control the higher power (typically 1 kW to 5 kW) industrial CO lasers used in applications such as cutting and welding, because such lasers are either continuous wave or are pulsed with a pulse width greater than 200 ns.

**\*\*6A225** Velocity interferometers for measuring velocities exceeding 1 km/s during time intervals of less than 10 microseconds.

**License Requirements**

*Reason for Control:* NP, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>

*Items:*

a. Image intensifier tubes and “specially designed” “components” therefor, as follows:

a.1. Image intensifier tubes having all the following:

a.1.a. A peak response in wavelength range exceeding 400 nm, but not exceeding 1,050 nm;

a.1.b. A microchannel plate for electron image amplification with a hole pitch (center-to-center spacing) of less than 25 micrometers; *and*

a.1.c. Having any of the following:

a.1.c.1. An S-20, S-25 or multialkali photocathode; *or*

a.1.c.2. A GaAs or GaInAs photocathode;

a.2. “Specially designed” microchannel plates having both of the following characteristics:

a.2.a. 15,000 or more hollow tubes per plate; *and*

a.2.b. Hole pitch (center-to-center spacing) of less than 25 micrometers.

b. Direct view imaging equipment operating in the visible or infrared spectrum, incorporating image intensifier tubes having the characteristics listed in 6A992.a.1.

**\*\*6A993** Cameras, not controlled by 6A003 or 6A203, as follows (see List of Items Controlled).

*Items:*

a. Optical filters:

a.1. For wavelengths longer than 250 nm, comprised of multi-layer optical coatings and having either of the following:

a.1.a. Bandwidths equal to or less than 1 nm Full Width Half Intensity (FWHI) and peak transmission of 90% or more; *or*

a.1.b. Bandwidths equal to or less than 0.1 nm FWHI and peak transmission of 50% or more;

*Note: 6A994 does not control optical filters with fixed air gaps or Lyot-type filters.*

a.2. For wavelengths longer than 250 nm, and having all of the following:

a.2.a. Tunable over a spectral range of 500 nm or more;

a.2.b. Instantaneous optical bandpass of 1.25 nm or less;

a.2.c. Wavelength resettable within 0.1 ms to an accuracy of 1 nm or better within the tunable spectral range; *and*

a.2.d. A single peak transmission of 91% or more;

a.3. Optical opacity switches (filters) with a field of view of 30° or wider and a response time equal to or less than 1 ns;

b. “Fluoride fiber” cable, or optical fibers therefor, having an attenuation of less than 4 dB/km in the wavelength range exceeding 1,000 nm but not exceeding 3,000 nm.

**6A995 “Lasers” as follows (see List of Items Controlled).**

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

a. Carbon dioxide (CO<sub>2</sub>) “lasers” having any of the following:

a.1. A CW output power exceeding 10 kW;

a.2. A pulsed output with a “pulse duration” exceeding 10 microseconds; *and*

a.2.a. An average output power exceeding 10 kW; *or*

a.2.b. A pulsed “peak power” exceeding 100 kW; *or*

a.3. A pulsed output with a “pulse duration” equal to or less than 10 microseconds; *and*

a.3.a. A pulse energy exceeding 5 J per pulse and “peak power” exceeding 2.5 kW; *or*

a.3.b. An average output power exceeding 2.5 kW;

b. Semiconductor lasers, as follows:

b.1. Individual, single-transverse mode semiconductor “lasers” having:

b.1.a. An average output power exceeding 100 mW; *or*

b.1.b. A wavelength exceeding 1,050 nm;

b.2. Individual, multiple-transverse mode semiconductor “lasers”, or arrays of individual semiconductor “lasers”, having a wavelength exceeding 1,050 nm;

c. Ruby “lasers” having an output energy exceeding 20 J per pulse;

d. Non-“tunable” “pulsed lasers” having an output wavelength exceeding 975 nm but not exceeding 1,150 nm and having any of the following:

d.1. A “pulse duration” equal to or exceeding 1 ns but not exceeding 1  $\mu$ s, and having any of the following:

d.1.a. A single transverse mode output and having any of the following:

d.1.a.1. A ‘wall-plug efficiency’ exceeding 12% and an “average output power” exceeding 10 W and capable of operating at a

pulse repetition frequency greater than 1kHz; *or*

d.1.a.2. An “average output power” exceeding 20 W; *or*

d.1.b. A multiple transverse mode output and having any of the following:

d.1.b.1. A ‘wall-plug efficiency’ exceeding 18% and an “average output power” exceeding 30W;

d.1.b.2. A “peak power” exceeding 200 MW; *or*

d.1.b.3. An “average output power” exceeding 50 W; *or*

d.2. A “pulse duration” exceeding 1  $\mu$ s and having any of the following:

d.2.a. A single transverse mode output and having any of the following:

d.2.a.1. A ‘wall-plug efficiency’ exceeding 12% and an “average output power” exceeding 10 W and capable of operating at a pulse repetition frequency greater than 1 kHz; *or*

d.2.a.2. An “average output power” exceeding 20 W; *or*

d.2.b. A multiple transverse mode output and having any of the following:

d.2.b.1. A ‘wall-plug efficiency’ exceeding 18% and an “average output power” exceeding 30 W; *or*

d.2.b.2. An “average output power” exceeding 500 W;

e. Non-“tunable” continuous wave “(CW) lasers”, having an output wavelength exceeding 975 nm but not exceeding 1,150nm and having any of the following:

e.1. A single transverse mode output and having any of the following:

e.1.a. A ‘wall-plug efficiency’ exceeding 12% and an “average output power” exceeding 10 W and capable of operating at a pulse repetition frequency greater than 1 kHz; *or*

e.1.b. An “average output power” exceeding 50 W; *or*

e.2. A multiple transverse mode output and having any of the following:

e.2.a. A ‘wall-plug efficiency’ exceeding 18% and an “average output power” exceeding 30 W; *or*

e.2.b. An “average output power” exceeding 500 W;

**Note:** 6A995.e.2.b does not control multiple transverse mode, industrial “lasers” with output power less than or equal to 2kW with a total mass greater than 1,200kg. For the purpose of this note, total mass includes all “components” required to operate the “laser,” e.g., “laser,” power supply, heat exchanger, but excludes external optics for beam conditioning and/or delivery.

f. Non-“tunable” “lasers”, having a wavelength exceeding 1,400 nm, but not exceeding 1555 nm and having any of the following:

f.1. An output energy exceeding 100 mJ per pulse and a pulsed “peak power” exceeding 1 W; *or*

f.2. An average or CW output power exceeding 1 W;

g. Free electron “lasers.”

**\*\*6A996 “Magnetometers” not controlled by ECCN 6A006, “Superconductive”**

**electromagnetic sensors, and “specially designed” “components” therefor, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

a. “Magnetometers”, n.e.s., having a ‘sensitivity’ lower (better) than 1.0 nT (rms) per square root Hz.

**Technical Note:** For the purposes of 6A996, ‘sensitivity’ (noise level) is the root mean square of the device-limited noise floor which is the lowest signal that can be measured.

b. “Superconductive” electromagnetic sensors, “components” manufactured from “superconductive” materials:

b.1. Designed for operation at temperatures below the “critical temperature” of at least one of their “superconductive” constituents (including Josephson effect devices or “superconductive” quantum interference devices (SQUIDS));

b.2. Designed for sensing electromagnetic field variations at frequencies of 1 KHz or less; *and*

b.3. Having any of the following characteristics:

b.3.a. Incorporating thin-film SQUIDS with a minimum feature size of less than 2 μm and with associated input and output coupling circuits;

b.3.b. Designed to operate with a magnetic field slew rate exceeding 1 x 10<sup>6</sup> magnetic flux quanta per second;

b.3.c. Designed to function without magnetic shielding in the earth’s ambient magnetic field; or

b.3.d. Having a temperature coefficient less (smaller) than 0.1 magnetic flux quantum/K.

**\*\*6A997 Gravity meters (gravimeters) for ground use, n.e.s., as follows (see List of Items Controlled).**

a. Airborne radar equipment, n.e.s., and “specially designed” “components” therefor.

b. “Space-qualified” “laser” radar or Light Detection and Ranging (LIDAR) equipment “specially designed” for surveying or for meteorological observation.

c. Millimeter wave enhanced vision radar imaging systems “specially designed” for rotary wing aircraft and having all of the following:

c.1. Operates at a frequency of 94 GHz;

- c.2. An average output power of less than 20 mW;
- c.3. Radar beam width of 1 degree; and
- c.4. Operating range equal to or greater than 1500 m.

**\*\*6A999** Specific processing equipment, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* RS AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
RS applies to 6A999.c	RS Column 2
AT applies to entire entry	A license is required for items controlled by this entry to North Korea for anti-terrorism reasons. The Commerce Country Chart is not designed to determine AT licensing requirements for this entry. See §742.19 of the EAR for additional information.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See also [6A203](#)  
*Related Definitions:* N/A  
*Items:*

- a. Seismic detection equipment not controlled in paragraph c.
- b. Radiation hardened TV cameras, n.e.s.
- c. Seismic intrusion detection systems that detect,

classify and determine the bearing on the source of a detected signal.

**B. TEST, INSPECTION AND “PRODUCTION EQUIPMENT”**

**\*\*6B002** Masks and reticles, “specially designed” for optical sensors specified by 6A002.a.1.b or 6A002.a.1.d.

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$5000  
*GBS:* Yes

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*6B004** Optical equipment as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: \$5000  
GBS: Yes for 6B004.b

**List of Items Controlled**

*Related Controls:* This entry does not control microscopes.  
*Related Definitions:* N/A  
*Items:*

- a. Equipment for measuring absolute reflectance to an “accuracy” of equal to or better than 0.1% of the reflectance value;
- b. Equipment other than optical surface scattering measurement equipment, having an unobscured aperture of more than 10 cm, “specially designed” for the non-contact optical measurement of a non-planar optical surface figure (profile) to an “accuracy” of 2 nm or less (better) against the required profile.

**\*\*6B007** Equipment to produce, align and calibrate land-based gravity meters with a static “accuracy” of better than 0.1 mGal.

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: \$5000  
GBS: N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*6B008** Pulse radar cross-section measurement systems having transmit pulse widths of 100 ns or less, and “specially designed” “components” therefor.

**License Requirements**

*Reason for Control:* NS, MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship any commodity in this entry to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

ECCN heading.

**List of Items Controlled**

*Related Controls:* See also [6B108](#)

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*6B108** Systems, other than those controlled by 6B008, “specially designed” for radar cross section measurement usable for rockets, missiles, or unmanned aerial vehicles capable of achieving a “range” equal to or greater than 300 km and their subsystems.

**\*\*6B619** Test, inspection, and production “equipment” and related commodities “specially designed” for the “development,” “production,” repair, overhaul, or refurbishing of commodities enumerated or otherwise described in USML Category XVIII (see List of Items Controlled)

**License Requirements**

*Reason for Control:* NS, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
RS applies to entire entry	RS Column 1
AT applies to entire entry	AT Column 1
UN applies to entire entry	See § 746.1(b) for UN controls

MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**License Exceptions**

*LVS:* \$1500

*GBS:* N/A

**Special Conditions for STA**

*STA:* Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 6B619.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the

**List of Items Controlled**

*Related Controls:* “Parts,” “components,” “accessories,” “attachments,” and associated systems or “equipment” “specially designed” for defense articles enumerated or otherwise described in paragraphs (a) or (b) of USML Category XVIII are subject to the ITAR (see 22 CFR § 121.1, Category XVIII(e)).

*Related Definitions:* N/A

*Items:*

a. Tooling, templates, jigs, mandrels, molds, dies, fixtures, alignment mechanisms, and test “equipment” not enumerated or otherwise described in USML Category XVIII and not elsewhere specified on the USML that are “specially designed” for the “development,” “production,” repair, overhaul, or refurbishing of commodities controlled by USML Category XVIII.

b. through w. [Reserved]

x. “Parts,” “components,” “accessories,” and “attachments” “specially designed” for a commodity subject to control under paragraph .a of this ECCN and not enumerated or otherwise described in USML Category XVIII and not elsewhere specified on the USML.

**\*\*6B995** Equipment, including tools, dies, fixtures or gauges, and other “specially designed” “parts,” “components” and “accessories” therefor, “specially designed” or modified for any of the following (see List of Items Controlled).

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

- a. For the manufacture or inspection of:
  - a.1. Free electron “laser” magnet wigglers;
  - a.2. Free electron “laser” photo injectors;
- b. For the adjustment, to required tolerances, of the longitudinal magnetic field of free electron “lasers”.

**C. “MATERIALS”**

**\*\*6C002** Optical sensor materials as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$3000

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* See also [6C992](#)

*Related Definitions:* N/A

*Items:*

- a. Elemental tellurium (Te) of purity levels of 99.9995% or more;
- b. Single crystals (including epitaxial wafers) of

any of the following:

b.1. Cadmium zinc telluride (CdZnTe), with zinc content less than 6% by ‘mole fraction’;

b.2. Cadmium telluride (CdTe) of any purity level; *or*

b.3. Mercury cadmium telluride (HgCdTe) of any purity level.

**Technical Note:** ‘Mole fraction’ is defined as the ratio of moles of ZnTe to the sum of the moles of CdTe and ZnTe present in the crystal.

**\*\*6C004 Optical materials as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$1500

*GBS:* Yes for 6C004.a and .e

**List of Items Controlled**

*Related Controls:* See also [6C994](#)

*Related Definitions:* N/A

*Items:*

a. Zinc selenide (ZnSe) and zinc sulfide (ZnS) “substrate blanks”, produced by the chemical vapor deposition process and having any of the following:

a.1. A volume greater than 100 cm<sup>3</sup>; *or*

a.2. A diameter greater than 80 mm and a thickness of 20 mm or more;

b. Electro-optic materials and non-linear materials, as follows:

b.1. Potassium titanyl arsenate (KTA) (CAS 59400-80-5);

b.2. Silver gallium selenide (AgGaSe<sub>2</sub>, also known as AGSE) (CAS 12002-67-4);

b.3. Thallium arsenic selenide (Tl<sub>3</sub>AsSe<sub>3</sub>, also known as TAS) (CAS 16142-89-5);

b.4. Zinc germanium phosphide (ZnGeP<sub>2</sub>, also known as ZGP, zinc germanium biphosphide or zinc germanium diphosphide); *or*

b.5. Gallium selenide (GaSe) (CAS 12024-11-2);

c. Non-linear optical materials, other than those specified by 6C004.b, having any of the following:

c.1. Having all of the following:

c.1.a. Dynamic (also known as nonstationary) third order nonlinear susceptibility ( $\chi^{(3)}$ , chi 3) of 10<sup>-6</sup> m<sup>2</sup>/V<sup>2</sup> or more; *and*

c.1.b. Response time of less than 1 ms; *or*

c.2. Second order nonlinear susceptibility ( $\chi^{(2)}$ , chi 2) of 3.3×10<sup>-11</sup> m/V or more;

d. “Substrate blanks” of silicon carbide or beryllium beryllium (Be/Be) deposited materials, exceeding 300 mm in diameter or major axis length;

e. Glass, including fused silica, phosphate glass, fluorophosphate glass, zirconium fluoride (ZrF<sub>4</sub>) (CAS 7783-64-4) and hafnium fluoride (HfF<sub>4</sub>)

(CAS 13709-52-9) and having all of the following:

- e.1. A hydroxyl ion (OH-) concentration of less than 5 ppm;
- e.2. Integrated metallic purity levels of less than 1 ppm; *and*
- e.3. High homogeneity (index of refraction variance) less than  $5 \times 10^{-6}$ ;
- f. Synthetically produced diamond material with an absorption of less than  $10^{-5} \text{ cm}^{-1}$  for wavelengths exceeding 200 nm but not exceeding 14,000 nm.

**\*\*6C005** “Laser” materials as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$1500  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

- a. Synthetic crystalline “laser” host material in unfinished form as follows:
  - a.1. Titanium doped sapphire;

a.2. [Reserved]

b. Rare-earth-metal doped double-clad fibers having any of the following:

b.1. Nominal “laser” wavelength of 975 nm to 1,150 nm and having all of the following:

b.1.a. Average core diameter equal to or greater than 25  $\mu\text{m}$ ; *and*

b.1.b. Core ‘Numerical Aperture’ (‘NA’) less than 0.065; *or*

*Note to 6C005.b.1: 6C005.b.1 does not apply to double-clad fibers having an inner glass cladding diameter exceeding 150  $\mu\text{m}$  and not exceeding 300  $\mu\text{m}$ .*

b.2. Nominal “laser” wavelength exceeding 1,530 nm and having all of the following:

b.2.a. Average core diameter equal to or greater than 20  $\mu\text{m}$ ; *and*

b.2.b. Core ‘NA’ less than 0.1.

**Technical Notes:**

1. For the purposes of 6C005, the core ‘Numerical Aperture’ (‘NA’) is measured at the emission wavelengths of the fiber.

2. 6C005.b includes fibers assembled with end caps.

**\*\*6C992** Optical sensing fibers not controlled by 6A002.d.3 that are modified structurally to have a ‘beat length’ of less than 500 mm (high birefringence) or optical sensor materials not described in 6C002.b and having a zinc content of equal to or more than 6% by ‘mole fraction.’

**License Requirements**

Reason for Control: AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled**

Related Controls: N/A

Related Definitions: ‘Mole fraction’ is defined as the ratio of moles of ZnTe to the sum of the moles of CdTe and ZnTe present in the crystal. 2) ‘Beat length’ is the distance over which two orthogonally polarized signals, initially in phase, must pass in order to achieve a 2 Pi radian(s) phase difference.

Items:

The list of items controlled is contained in the ECCN heading.

**\*\*6C994** Optical materials, as follows (see List of Items Controlled).

**License Requirements**

Reason for Control: AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled**

Related Controls: N/A

Related Definitions: 1) ‘Fluoride fibers’ are fibers manufactured from bulk fluoride compounds. 2) ‘Optical fiber preforms’ are bars, ingots, or rods of glass, plastic or other materials that have been specially processed for use in fabricating optical fibers. The characteristics of the preform determine the basic parameters of the resultant drawn optical fibers.

Items:

a. Low optical absorption materials, as follows:

a.1. Bulk fluoride compounds containing ingredients with a purity of 99.999% or better; or

*Note: 6C994.a.1 controls fluorides of zirconium or aluminum and variants.*

a.2. Bulk fluoride glass made from compounds controlled by 6C004.e.1;

b. ‘Optical fiber preforms’ made from bulk fluoride compounds containing ingredients with a purity of 99.999% or better, “specially designed” for the manufacture of ‘fluoride fibers’ controlled by 6A994.b.

**D. “SOFTWARE”**

**\*\*6D001** “Software” “specially designed” for the “development” or “production” of equipment controlled by 6A004, 6A005, 6A008 or 6B008.

**License Requirements**

Reason for Control: NS, MT, RS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to “software” for equipment controlled by 6A004, 6A005, 6A008 or 6B008.	NS Column 1
MT applies to “software” for equipment controlled by 6A008 or 6B008 for MT reasons.	MT Column 1
RS applies to “software” for equipment controlled by 6A008.j.1	RS Column 1
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* Yes, except for the following:  
 (1) Items controlled for MT reasons;  
 (2) “Software” “specially designed” for the “development” or “production” of “space qualified” “laser” radar or Light Detection and Ranging (LIDAR) equipment defined in 6A008.j.1; or  
 (3) Exports or reexports to destinations outside of those countries listed in Country Group A:5 (See Supplement No. 1 to part 740 of the EAR) of “software” “specially designed” for the “development” or “production” of equipment controlled by 6A004.c or d, 6A008.d, h, k or 6B008.

**Special Conditions for STA**

*STA:* License Exception STA may not be

used to ship or transmit “software” “specially designed” for the “development” or “production” of equipment specified by ECCNs 6A004.c, 6A004.d, 6A008.d, 6A008.h, 6A008.k, or 6B008 to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* See also 6D991, and ECCN 6E001 (“development”) for “technology” for items controlled under this entry.

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*6D002** “Software” “specially designed” for the “use” of equipment controlled by 6A002.b, 6A008 or 6B008.

**License Requirements**

*Reason for Control:* NS, MT, RS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
MT applies to “software” for equipment controlled by 6A008 or 6B008 for MT reasons.	MT Column 1
RS applies to “software” for equipment controlled by 6A008.j.1	RS Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* Yes, except N/A for the following:

- (1) Items controlled for MT reasons;
- (2) “Software” “specially designed” for the “use” of “space qualified” “laser” radar or Light Detection and Ranging (LIDAR) equipment defined in 6A008.j.1; or (3) “Software” “specially designed” for the “use” of commodities controlled by 6A002.b.

**List of Items Controlled**

*Related Controls:* (1) “Software” “specially designed” for the “use” of “space-qualified” LIDAR “equipment” “specially designed” for surveying or for meteorological observation, released from control under the note in 6A008.j, is controlled in [6D991](#). (2) See also [6D102](#), [6D991](#), and [6D992](#).

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*6D003** Other “software” as follows (see **List of Items Controlled**).

**License Requirements**

*Reason for Control:* NS, RS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
RS applies to paragraph c	RS Column 1
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* Yes, except for 6D003.c and exports or reexports to destinations outside of those countries listed in Country Group A:5 (See Supplement No. 1 to part 740 of the EAR) of “software” for items controlled by 6D003.a.

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship or transmit software in 6D003.a to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* See also ECCNs [6D103](#), [6D991](#), and [6D993](#).

*Related Definitions:* N/A

*Items:*

ACOUSTICS

a. “Software” as follows:

a.1. “Software” “specially designed” for acoustic beam forming for the “real-time processing” of acoustic data for passive reception using towed hydrophone arrays;

a.2. “Source code” for the “real-time processing” of acoustic data for passive reception using towed hydrophone arrays;

a.3. “Software” “specially designed” for acoustic beam forming for the “real-time processing” of acoustic data for passive reception using bottom or bay cable systems;

a.4. “Source code” for the “real-time processing” of acoustic data for passive reception using bottom or bay cable systems;

a.5. “Software” or “source code”, “specially designed” for all of the following:

a.5.a. “Real-time processing” of acoustic data from sonar systems controlled by 6A001.a.1.e; *and*

a.5.b. Automatically detecting, classifying and determining the location of divers or swimmers;

*N.B.: For diver detection “software” or “source code”, “specially designed” or modified for military use, see the U.S. Munitions List of the International Traffic in Arms Regulations (ITAR) (22 CFR part 121).*

b. Optical sensors. None.

#### CAMERAS

c. “Software” designed or modified for cameras incorporating “focal plane arrays” specified by 6A002.a.3.f and designed or modified to remove a frame rate restriction and allow the camera to exceed the frame rate specified in 6A003.b.4 Note 3.a;

#### OPTICS

d. “Software” specially designed to maintain the alignment and phasing of segmented mirror systems consisting of mirror segments having a diameter or major axis length equal to or larger than 1 m;

e. Lasers. None.

#### MAGNETIC AND ELECTRIC FIELD SENSORS

f. “Software” as follows:

f.1. “Software” “specially designed” for magnetic and electric field “compensation systems” for magnetic sensors designed to

operate on mobile platforms;

f.2. “Software” “specially designed” for magnetic and electric field anomaly detection on mobile platforms;

f.3. “Software” “specially designed” for “real-time processing” of electromagnetic data using underwater electromagnetic receivers specified by 6A006.e;

f.4. “Source code” for “real-time processing” of electromagnetic data using underwater electromagnetic receivers specified by 6A006.e;

#### GRAVIMETERS

g. “Software” “specially designed” to correct motional influences of gravity meters or gravity gradiometers;

#### RADAR

h. “Software” as follows:

h.1. Air Traffic Control (ATC) “software” application “programs” designed to be hosted on general purpose computers located at Air Traffic Control centers and capable of accepting radar target data from more than four primary radars;

h.2. “Software” for the design or “production” of radomes having all of the following:

h.2.a. “Specially designed” to protect the “electronically scanned array antennae” specified by 6A008.e; *and*

h.2.b. Resulting in an antenna pattern having an ‘average side lobe level’ more than 40 dB below the peak of the main beam level.

*Technical Note: ‘Average side lobe level’ in 6D003.h.2.b is measured over the entire array excluding the angular extent of the main beam and the first two side lobes on either side of the*

main beam.

**\*\*6D102** “Software” “specially designed” or modified for the “use” of equipment controlled by 6A108.

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1

TSR: N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

a. Optical fabrication technologies for serially producing optical “parts” and “components” at a rate exceeding 10 m<sup>2</sup> of surface area per year on any single spindle and having all of the following:

a.1. Area exceeding 1 m<sup>2</sup>; *and*

a.2. Surface figure exceeding  $\lambda/10$  (rms) at the designed wavelength;

b. “Technology” for optical filters with a bandwidth equal to or less than 10 nm, a field of view (FOV) exceeding 40° and a resolution exceeding 0.75 line pairs per milliradian;

c. “Technology” for the “development” or “production” of cameras controlled by 6A993;

d. “Technology” “required” for the “development” or “production” of non-triaxial fluxgate “magnetometers” or non-triaxial fluxgate “magnetometer” systems, having any of

the following:

d.1. ‘Sensitivity’ lower (better) than 0.05 nT (rms) per square root Hz at frequencies of less than 1 Hz; *or*

d.2. ‘Sensitivity’ lower (better) than  $1 \times 10^{-3}$  nT (rms) per square root Hz at frequencies of 1 Hz or more.

e. “Technology” “required” for the “development” or “production” of infrared up-conversion devices having all of the following:

e.1. A response in the wavelength range exceeding 700 nm but not exceeding 1500 nm; and

e.2. A combination of an infrared photodetector, light emitting diode (OLED), and nanocrystal to convert infrared light into visible light.

*Technical Note:* For the purposes of 6E993, ‘sensitivity’ (or noise level) is the root mean square of the device-limited noise floor which is the lowest signal that can be measured.

**EAR99** Items subject to the EAR that are *not* elsewhere specified in this CCL Category *or* in any other category in the CCL are designated by the number **EAR99**.

**CATEGORY 7 - NAVIGATION AND AVIONICS**

**A. "END ITEMS," "EQUIPMENT," "ACCESSORIES," "ATTACHMENTS," "PARTS," "COMPONENTS," AND "SYSTEMS"**

**N.B.1:** For automatic pilots for underwater vehicles, see Category 8. For radar, see Category 6.

**\*\*7A001** Accelerometers as follows (see List of Items Controlled) and "specially designed" "components" therefor.

**License Requirements**

Reason for Control: NS, MT, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 1
MT applies to commodities that meet or exceed the parameters of 7A101.	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled**

Related Controls: (1) See USML Category XII(e) for accelerometers subject to the ITAR. (2) See also ECCNs [7A101](#), [7A611](#), and [7A994](#). (3) For angular or rotational accelerometers, see ECCN [7A001.b](#). (4) MT controls do not apply to

accelerometers that are "specially designed" and developed as Measurement While Drilling (MWD) sensors for use in downhole well service applications.

Related Definitions: N/A

Items:

a. Linear accelerometers having any of the following:

a.1. Specified to function at linear acceleration levels less than or equal to 15 g and having any of the following:

a.1.a. A "bias" "stability" of less (better) than 130 micro g with respect to a fixed calibration value over a period of one year; or

a.1.b. A "scale factor" "stability" of less (better) than 130 ppm with respect to a fixed calibration value over a period of one year;

a.2. Specified to function at linear acceleration levels exceeding 15 g but less than or equal to 100 g and having all of the following:

a.2.a. A "bias" "repeatability" of less (better) than 1,250 micro g over a period of one year; and

a.2.b. A "scale factor" "repeatability" of less (better) than 1,250 ppm over a period of one year; or

a.3. Designed for use in inertial navigation or guidance systems and specified to function at linear acceleration levels exceeding 100 g;

**Note:** 7A001.a.1 and 7A001.a.2 do not apply to accelerometers limited to measurement of only vibration or shock.

b. Angular or rotational accelerometers, specified to function at linear acceleration levels exceeding 100 g.

**\*\*7A002 Gyros or angular rate sensors, having any of the following, and “specially designed” “components” therefor.**

**License Requirements**

*Reason for Control:* NS, MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
MT applies to commodities that meet or exceed the parameters of 7A102.	MT Column 1
AT applies to entire entry	AT Column 1

**License Requirement Note:** For the purpose of MT controls only, the term ‘stability’ is defined as a measure of the ability of a specific mechanism or performance coefficient to remain invariant when continuously exposed to a fixed operating condition. (This definition does not refer to dynamic or servo stability.) (IEEE STD 528-2001 paragraph 2.247)

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

NS applies to entire entry	NS Column 1
MT applies to commodities in 7A003.d that meet or exceed the parameters of 7A103	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See also ECCNs [7A103](#), [7A611](#), and [7A994](#). (2) See USML Category XII(d) for guidance or navigation systems subject to the ITAR.

*Related Definitions:* N/A

*Items:*

**Note 1:** ‘Inertial measurement equipment or systems’ incorporate accelerometers or gyroscopes to measure changes in velocity and orientation in order to determine or maintain heading or position without requiring an external reference once aligned. ‘Inertial measurement equipment or systems’ include:

- Attitude and Heading Reference Systems (AHRSSs);
- Gyrocompasses;
- Inertial Measurement Units (IMUs);
- Inertial Navigation Systems (INSs);
- Inertial Reference Systems (IRSs);
- Inertial Reference Units (IRUs).

**Note 2:** 7A003 does not apply to ‘inertial measurement equipment or systems’ which are certified for use on “civil aircraft” by civil aviation authorities of one or more Wassenaar

*Arrangement Participating States, see Supplement No. 1 to part 743 of the EAR..*

**Technical Note:** ‘Positional aiding references’ independently provide position, and include:

a. “Satellite navigation system”;

b. “Data-Based Referenced Navigation” (“DBRN”).

a. Designed for “aircraft”, land vehicles or vessels, providing position without the use of ‘positional aiding references’, and having any of the following “accuracies” subsequent to normal alignment:

a.1. 0.8 nautical miles per hour (nm/hr) “Circular Error Probable” (“CEP”) rate or less (better);

a.2. 0.5% distanced travelled “CEP” or less (better); *or*

a.3. Total drift of 1 nautical mile “CEP” or less (better) in a 24 hr period;

**Technical Note:** The performance parameters in 7A003.a.1, 7A003.a.2 and 7A003.a.3 typically apply to ‘inertia measurement equipment or systems’ designed for “aircraft”, vehicles and vessels, respectively. These parameters result from the utilization of specialized non-positional aiding references (e.g., altimeter, odometer, velocity log). As a consequence, the specified performance values cannot be readily converted between these parameters. Equipment designed for multiple platforms are evaluated against each applicable entry 7A003.a.1, 7A003.a.2, or 7A003.a.3.

b. Designed for “aircraft”, land vehicles or vessels, with an embedded ‘positional aiding reference’ and providing position after loss of all ‘positional aiding references’ for a period of up

to 4 minutes, having an “accuracy” of less (better) than 10 meters “CEP”;

*Technical Note: 7A003.b refers to systems in which ‘inertial measurement equipment or systems’ and other independent ‘positional aiding references’ are built into a single unit (i.e., embedded) in order to achieve improved performance.*

c. Designed for “aircraft”, land vehicles or vessels, providing heading or True North determination and having any of the following:

c.1. A maximum operating angular rate less (lower) than 500 deg/s and a heading “accuracy” without the use of ‘positional aiding references’ equal to or less (better) than 0.07 deg sec (Lat) (equivalent to 6 arc minutes rms at 45 degrees latitude); *or*

c.2. A maximum operating angular rate equal to or greater (higher) than 500 deg/s and a heading “accuracy” without the use of ‘positional aiding references’ equal to or less (better) than 0.2 deg sec (Lat) (equivalent to 17 arc minutes rms at 45 degrees latitude);

d. Providing acceleration measurements or angular rate measurements, in more than one dimension, and having any of the following:

d.1. Performance specified by 7A001 or 7A002 along any axis, without the use of any aiding references; *or*

d.2. Being “space-qualified” and providing angular rate measurements having an “angle random walk” along any axis of less (better) than or equal to 0.1 degree per square root hour.

*Note: 7A003.d.2 does not apply to ‘inertial measurement equipment or systems’ that contain “spinning mass gyros” as the only type of gyro.*

**\*\*7A004 ‘Star trackers’ and “components”**

therefor, as follows (see List of Items Controlled).

**List of Items Controlled**

*Related Controls:* (1) See USML Category XV for certain ‘star trackers’ that are “subject to the ITAR” (see 22 CFR parts 120 through 130). (2) See also 7A104 and 7A994.

*Related Definitions:* N/A

*Items:*

a. ‘Star trackers’ with a specified azimuth “accuracy” of equal to or less (better) than 20 seconds of arc throughout the specified lifetime of the equipment;

b. “Components” “specially designed” for equipment specified in 7A004.a as follows:

b.1. Optical heads or baffles;

b.2. Data processing units.

*Technical Note: ‘Star trackers’ are also referred to as stellar attitude sensors or gyro-astro compasses.*

**\*\*7A005** “Satellite navigation system” receiving equipment having any of the following and “specially designed” “components” therefor.

ITAR and USML Category XI(c)(10) for antennae that are subject to the ITAR. (3) Items that otherwise would be covered by ECCN 7A005.a are “subject to the ITAR” (see 22 CFR parts 120 through 130).

**License Requirements**

LVS: N/A  
 GBS: N/A

by 7A002 (see List of Items Controlled), and “specially designed” “parts” and “components” therefor.

**List of Items Controlled**

*Related Controls:* (1) See USML Category XII(e) for accelerometers subject to the ITAR. (2) See also ECCNs [7A101](#) and [7A611](#). (3) This entry does not control accelerometers that are “specially designed” and developed as MWD (Measurement While Drilling) sensors for use in downhole well service operations.

*Related Definitions:* N/A

*Items:*

a. Linear accelerometers designed for use in inertial navigation systems or in guidance systems of all types, usable in “missiles” having all of the following characteristics, and “specially designed” “parts” and “components” therefor:

a.1. ‘Scale factor’ “repeatability” less (better) than 1250 ppm; and

a.2. ‘Bias’ “repeatability” less (better) than 1250 micro g.

*Note:* The measurement of ‘bias’ and ‘scale factor’ refers to one sigma standard deviation with respect to a fixed calibration over a period of one year.

b. Accelerometers of any type, designed for use in inertial navigation systems or in guidance systems of all types, specified to function at acceleration levels greater than 100 g.

*Note to paragraph (b):* This paragraph (b) does not include accelerometers that are designed to measure vibration or shock.

**\*\*7A102 Gyros, other than those controlled**

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See USML Category XII(e) for gyros or angular rate sensors subject to the ITAR. (2) See also ECCNs [7A002](#), [7A611](#), and [7A994](#).

*Related Definitions:* 1.) Drift rate is defined as the time rate of output deviation from the desired output. It consists of random and systematic components and is expressed as an equivalent angular displacement per unit time with respect to inertial space. 2.) Stability is defined as standard deviation (1 sigma) of the variation of a particular parameter from its calibrated value measured under stable temperature conditions. This can be expressed as a function of time.

*Items:*

a. All types of gyros, usable in rockets, missiles, or unmanned aerial vehicles capable of achieving a “range” equal to or greater than 300 km, with a rated “drift rate” ‘stability’ of less than 0.5 degrees (1 sigma or rms) per hour in a 1 g environment.

b. Gyros of any type, designed for use in inertial navigation systems or in guidance systems of all types, specified to function at acceleration levels greater than 100 g.

**Technical Note:** *In this entry, the term ‘stability’ is defined as a measure of the ability of a specific mechanism or performance coefficient to remain invariant when continuously exposed to a fixed operating condition. (This definition does not refer to dynamic or servo stability.) (IEEE STD 528-2001 paragraph 2.247)*

**\*\*7A103 Instrumentation, navigation equipment and systems, other than those controlled by 7A003, and "specially designed" "parts" and "components" therefor, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See ECCN 7A003 and 7A994. (2) Inertial navigation systems and inertial equipment, and “specially designed” “parts” and “components” therefor specifically designed, modified or configured for military use are “subject to the ITAR”

(see 22 CFR parts 120 through 130).

*Related Definitions:* ‘Inertial measurement equipment or systems’ specified in 7A103.a. incorporate accelerometers or gyros to measure changes in velocity and orientation in order to determine or maintain heading or position without requiring an external reference once aligned.

*Items:*

a. ‘Inertial measurement equipment or systems’ using accelerometers or gyros controlled by 7A001, 7A002, 7A101 or 7A102, and “specially designed” “parts” and “components” therefor;

**Note 1:** *7A103.a does not control equipment containing accelerometers “specially designed” and developed as MWD (Measurement While Drilling) sensors for use in down-hole well services operations.*

**Note 2:** *7A103.a does not control inertial or other equipment using accelerometers or gyros controlled by 7A001 or 7A002 that are only NS controlled.*

**Note 3:** *7A103.a. includes Attitude and Heading Reference Systems (AHRs), gyrocompasses, Inertial Measurement Units (IMUs), Inertial Navigations Systems (INSs), Inertial Reference Systems (IRs), and Inertial Reference Units (IRUs).*

b. Integrated flight instrument systems, which include gyrostabilizers or automatic pilots, designed or modified for use in rockets, missiles, or unmanned aerial vehicles capable of achieving a “range” equal to or greater than 300 km, and “specially designed” “parts” and “components” therefor.

c. Integrated Navigation Systems, designed or modified for use in rockets, missiles, or unmanned aerial vehicles capable of achieving a “range” equal to or greater than 300 km and capable of providing a navigational accuracy of

200m Circular Error Probable (CEP) or less.

**Technical Note:** An ‘integrated navigation system’ typically incorporates the following ‘parts’ and ‘components’:

1. An inertial measurement device (e.g., an attitude and heading reference system, inertial reference unit, or inertial navigation system);
2. One or more external sensors used to update the position and/or velocity, either periodically or continuously throughout the flight (e.g., satellite navigation receiver, radar altimeter, and/or Doppler radar); and
3. Integration hardware and software.

**\*\*7A104** Gyro-astro compasses and other devices, other than those controlled by 7A004, which derive position or orientation by means of automatically tracking celestial bodies or satellites and “specially designed” “parts” and “components” therefor.

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>

*LVS:* N/A  
*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See also 7A005, 7A611 and 7A994. (2) See USML Category XII(d) for GNSS receiving equipment subject to the ITAR and USML Category XI(c)(10) for antennae that are subject to the ITAR. (3) Items that otherwise would be covered by ECCN 7A105.b.2 are “subject to the ITAR” (see 22 CFR parts 120 through 130). (4) See USML Category XII(d) for GPS receiving

equipment in 7A105.a, b.1 and b.3 that are subject to the ITAR.

*Related Definitions:* ‘Navigation satellite systems’ include Global Navigation Satellite Systems (GNSS; e.g. GPS, GLONASS, Galileo or BeiDou) and Regional Navigation Satellite Systems (RNSS; e.g. NavIC, QZSS).

*Items:*

- a. Designed or modified for use in “missiles”; *or*
- b. Designed or modified for airborne applications and having any of the following:
  - b.1. Capable of providing navigation information at speeds in excess of 600 m/s;
  - b.2. Employing decryption, designed or modified for military or governmental services, to gain access to a ‘navigation satellite system’ secure signal/data; *or*
  - b.3. Being “specially designed” to employ anti-jam features (*e.g.*, null steering antenna or electronically steerable antenna) to function in an environment of active or passive countermeasures.

*Note:* 7A105.b.2 and 7A105.b.3 do not control equipment designed for commercial, civil or Safety of Life (*e.g.*, data integrity, flight safety) ‘navigation satellite system’ services.

**\*\*7A106** Altimeters, other than those controlled by 7A006, of radar or laser radar type, designed or modified for use in “missiles”. (These items are “subject to the ITAR”. See 22 CFR parts 120 through 130.)

**\*\*7A107** Three axis magnetic heading sensors having all of the following characteristics (see List of Items Controlled), and “specially designed” “parts” and “components” therefor.

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See 9A610.r and 9A610.s for items designed or modified for military UAVs. (2) See USML Category IV for items “specially designed” for use in rockets or missiles that are “subject to the ITAR.”

*Related Definitions:* N/A

*Items:*

a. Pneumatic, hydraulic, mechanical, electro-optical, or electromechanical flight control systems (including fly-by-wire and fly-by-light systems) designed or modified for UAVs capable of delivering at least 500 kilograms of payload to a range of at least 300 km, other than those controlled by either USML paragraph VIII(a) or ECCN 9A610.a;

b. Attitude control equipment designed or modified for UAVs capable of delivering at least 500 kilograms of payload to a range of at least 300 km, other than those controlled by either USML paragraph VIII(a) or ECCN 9A610.a;

c. Flight control servo valves designed of modified for the systems in 7A116.a or 7A116.b, and designed or modified to operate in a vibration environment greater than 10 g rms over the entire range between 20Hz and 2 kHz.

*Note:* This entry includes the systems, equipment and valves designed or modified to enable operation of manned aircraft as unmanned aerial vehicles.

**\*\*7A117** “Guidance sets” capable of achieving system accuracy of 3.33% or less of the range (e.g., a “CEP” of 10 km or less at a range of 300 km). (These items are “subject to the ITAR”. See 22 CFR parts 120 through 130.)

**\*\*7A611** Military fire control, laser, imaging, and guidance equipment, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, MT, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>

LVS: N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See also [7B101](#), [7B102](#) and [7B994](#). (2) This entry does not control test, calibration or alignment equipment for ‘Maintenance level I’ or ‘Maintenance Level II’.

*Related Definition:* (1) ‘Maintenance Level I’: The failure of an inertial navigation unit is detected on the “aircraft” by indications

from the Control and Display Unit (CDU) or by the status message from the corresponding sub-system. By following the manufacturer’s manual, the cause of the failure may be localized at the level of the malfunctioning Line Replaceable Unit (LRU). The operator then removes the LRU and replaces it with a spare. (2) ‘Maintenance Level II’: The defective LRU is sent to the maintenance workshop (the manufacturer’s or that of the operator responsible for level II maintenance). At the maintenance workshop, the malfunctioning LRU is tested by various appropriate means to verify and localize the defective Shop Replaceable Assembly (SRA) module responsible for the failure. This SRA is removed and replaced by an operative spare. The defective SRA (or possibly the complete LRU) is then shipped to the manufacturer. ‘Maintenance Level II’ does not include the disassembly or repair of controlled accelerometers or gyro sensors.

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*7B002** Equipment “specially designed” to characterize mirrors for ring “laser” gyros, as follows (see List of Items Controlled).

 GBS: N/A

**List of Items Controlled**

*Related Controls:* See also [7B102](#) and [7B994](#)

*Related Definitions:* N/A

*Items:*

- a. Scatterometers having a measurement “accuracy” of 10 ppm or less (better);
- b. Profilometers having a measurement “accuracy” of 0.5 nm (5 angstrom) or less (better).

**\*\*7B003** Equipment “specially designed” for the “production” of equipment controlled by 7A (except 7A994).

**License Requirements**

*Reason for Control:* NS, MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See also [7B103](#), (this entry is “subject to the ITAR” (see 22 CFR parts 120 through 130)) and [7B994](#). (2) This entry includes: Inertial Measurement Unit (IMU module) tester;

IMU platform tester; IMU stable element handling fixture; IMU platform balance fixture; gyro tuning test station; gyro dynamic balance station; gyro run-in/motor test station; gyro evacuation and fill station; centrifuge fixtures for gyro bearings; accelerometer axis align stations; accelerometer test station; and fiber optic gyro coil winding machines.

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*7B101** “Production equipment”, and other test, calibration, and alignment equipment, other than that described in 2B119 to 2B122, 7B003, and 7B102, designed or modified to be used with equipment controlled by 7A001 to 7A004 or 7A101 to 7A104.

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
 GBS: N/A

**List of Items Controlled**

*Related Controls:*1.) See also 2B119 to 2B122, [7B003](#), [7B102](#), and [7B994](#). 2.) This entry includes: inertial measurement unit (IMU module) tester; IMU platform tester; IMU stable element handling

fixture; IMU platform balance fixture; gyro tuning test station; gyro dynamic balance stations; gyro run-in/motor test stations; gyro evacuation and filling stations; centrifuge fixtures for gyro bearings; accelerometer axis align stations; and accelerometer test stations.

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*7B102** Equipment, other than those controlled by 7B002, designed or modified to characterize mirrors, for laser gyro equipment, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

- a. Scatterometers having a threshold accuracy of 10 ppm or less (better).
- b. Reflectometers having a threshold accuracy

of 50 ppm or less (better).

- c. Prolifometers having a threshold accuracy of 0.5nm (5 angstrom) or less (better).

**\*\*7B103** “Specially designed” “production facilities” for equipment controlled by 7A117. (These items are “subject to the ITAR”. See 22 CFR parts 120 through 130.)

**\*\*7B611** Test, inspection, and production commodities “specially designed” for military fire control, laser, imaging, and guidance equipment, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, MT, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
MT applies to 7B611.a commodities “specially designed” for 7A611.a commodities controlled for MT reasons	MT Column 1
RS applies to entire entry	RS Column 1
AT applies to entire entry	AT Column 1
UN applies to entire entry	See § 746.1(b) for UN controls

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$1500

*GBS:* N/A

**Special Conditions for STA**

*STA:* Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any

item in 7B611.

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

a. Test, inspection, and production end items and equipment “specially designed” for the “development,” “production,” repair, overhaul, or refurbishing of commodities controlled in ECCN 7A611 (except 7A611.y) or commodities in USML Category XII that are not enumerated in USML Category XII or controlled by another “600 series” ECCN.

b. Environmental test facilities “specially designed” for the certification, qualification, or testing of commodities controlled in ECCN 7A611 (except 7A611.y) or guidance equipment in USML Category XII that are not enumerated in USML Category XII or controlled by another “600 series” ECCN.

c. Field test equipment “specially designed” to evaluate or calibrate the operation of systems described in USML Category XII(a), (b), or (c).

d. to w. [Reserved]

x. “Parts,” “components,” “accessories,” and “attachments” that are “specially designed” for a commodity listed in this entry and that are not enumerated on the USML or controlled by another “600 series” ECCN.

**\*\*7B994** Other equipment for the test, inspection, or “production” of navigation and avionics equipment.

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**C. “MATERIALS”  
[Reserved]**

**D. “SOFTWARE”**

**\*\*7D001** “Software” “specially designed” or modified for the “development” or “production” of equipment controlled by 7A (except 7A994) or 7B (except 7B994).

**License Requirements**

*Reason for Control:* NS, MT, RS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to software” for equipment controlled by 7A001 to 7A004, 7A006, 7A008, 7B001, 7B002 or 7B003	NS Column 1
MT applies to “software” for	MT Column 1

equipment controlled for MT reasons. MT does not apply to “software” for equipment controlled by 7A008.	
RS applies to “software” for inertial navigation systems and inertial equipment, and “components” therefor, for “9A991.b aircraft”.	RS Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

*Related Controls:* 1.) See also [7D101](#) and [7D994](#). (2) The “software” related to [7A003.b](#), [7A005](#), [7A103.b](#), [7A105](#), [7A106](#), [7A115](#), [7A116](#), [7A117](#), or [7B103](#) is “subject to the ITAR” (see 22 CFR parts 120 through 130). (3) “Software” for inertial navigation systems and inertial equipment and “parts” or “components” “specially designed” therefor that are directly related to defense articles and not “specially designed” for use on civil aircraft is “subject to the ITAR” (see 22 CFR parts 120 through 130).

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*7D002** “Source code” for the operation or maintenance of any inertial navigation equipment, including inertial equipment not controlled by 7A003 or 7A004, or Attitude and Heading Reference Systems (‘AHRS’).

**License Requirements**

*Reason for Control:* NS, MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

*Related Controls:* 1.) See also [7D102](#) and [7D994](#). 2.) This entry does not control “source code” for the operation or maintenance of gimballed ‘AHRS’.

*Related Definition:* ‘AHRS’ generally differ from Inertial Navigation Systems (INS) in that an ‘AHRS’ provides attitude and heading information and normally does not provide the acceleration, velocity and position information associated with an INS.

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*7D003** Other “software” as follows (see **List of Items Controlled**).

**License Requirements**

*Reason for Control:* NS, MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
MT applies to “software” for equipment controlled for MT reasons. MT does not apply to “software” for equipment controlled by 7A008.	MT Column 1
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**Special Conditions for STA**

STA: License Exception STA may not be used to ship or transmit software in 7D003.a or .b to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* See also [7D103](#) and [7D994](#).

*Related Definitions:* ‘Data-Based Referenced Navigation’ (‘DBRN’) systems are systems which use various sources of previously measured geo-mapping data integrated to provide accurate navigation information under dynamic conditions. Data sources include bathymetric maps, stellar maps, gravity

maps, magnetic maps or 3-D digital terrain maps.

*Items:*

a. “Software” “specially designed” or modified to improve the operational performance or reduce the navigational error of systems to the levels controlled by 7A003, 7A004 or 7A008;

b. “Source code” for hybrid integrated systems which improves the operational performance or reduces the navigational error of systems to the level controlled by 7A003 or 7A008 by continuously combining heading data with any of the following:

b.1. Doppler radar or sonar velocity data;

b.2. “Satellite navigation system” reference data; *or*

b.3. Data from ‘Data-Based Referenced Navigation’ (‘DBRN’) systems;

c. [Reserved]

d. [Reserved]

*N.B.* For flight control “source code,” see 7D004.

e. Computer-Aided-Design (CAD) “software” “specially designed” for the “development” of “active flight control systems”, helicopter multi-axis fly-by-wire or fly-by-light controllers or helicopter “circulation controlled anti-torque or circulation-controlled direction control systems”, whose “technology” is controlled by 7E004.b.1, 7E004.b.3 to b.5, 7E004.b.7 to b.8, 7E004.c.1 or 7E004.c.2.

**\*\*7D004** “Source code” incorporating “development” “technology” specified by 7E004.a.2, a.3, a.5, a.6 or 7E004.b, for any of the following: (see List of Items Controlled).  
**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* N/A

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship or transmit “software” in 7D004.a to .d and .g to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* See [7D103](#) and [7D994](#)

*Related Definitions:* N/A

*Items:*

- a. Digital flight management systems for “total control of flight”;
- b. Integrated propulsion and flight control systems;
- c. “Fly-by-wire systems” or “fly-by-light systems”;
- d. Fault-tolerant or self-reconfiguring “active flight control systems”;
- e. [Reserved];
- f. Air data systems based on surface static data;  
*or*

g. Three dimensional displays.

*Note:* 7D004 does not apply to “source code” associated with common computer elements and utilities (e.g., input signal acquisition, output signal transmission, computer program and data loading, built-in test, task scheduling mechanisms) not providing a specific flight control system function.

**\*\*7D005** “Software” “specially designed” to decrypt “Satellite navigation system” ranging signals designed for government use.

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*7D101** “Software” “specially designed” or modified for the “use” of equipment controlled for missile technology (MT) reasons by 7A001 to 7A006, 7A101 to 7A107, 7A115, 7A116, 7A117, 7B001, 7B002, 7B003, 7B101, 7B102, or 7B103.

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* N/A

**List of Items Controlled**

*Related Controls:* (1) The “software” related to [7A003.b](#), [7A005](#), [7A103.b](#), [7A105](#), [7A106](#), [7A115](#), [7A116](#), [7A117](#), or [7B103](#) is “subject to the ITAR” (see 22 CFR parts 120 through 130). (2) “Software” for inertial navigation systems and inertial equipment and “parts” and “components” “specially designed” therefor that are directly related to a defense article is “subject to the ITAR” (see 22 CFR parts 120 through 130).

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*7D102** Integration “software,” as follows (See List of Items Controlled).

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* N/A

**List of Items Controlled**

*Related Controls:* The “software” related to [7A003.b](#) or [7A103.b](#) is “subject to the ITAR” (see 22 CFR parts 120 through 130).

*Related Definitions:* N/A

*Items:*

a. Integration “software” for the equipment controlled by 7A103.b.

b. Integration “software” “specially designed” for the equipment controlled by 7A003 or 7A103.a.

**\*\*7D103** “Software” “specially designed” for modelling or simulation of the “guidance sets” controlled by 7A117 or for their design integration with “missiles”. (This entry is “subject to the ITAR”. See 22 CFR parts 120 through 130.)

**\*\*7D611** “Software” “specially designed” for commodities controlled by 7A611 or equipment controlled by 7B611, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, MT, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry except 7D611.y	NS Column 1
MT applies to 7D611.a “software” “specially designed” for 7A611.a	MT Column 1

commodities controlled for MT reasons	
RS applies to entire entry except 7D611.y	RS Column 1
RS applies to 7D611.y	China, Russia, or Venezuela (see § 724.6(a)(7))
AT applies to entire entry	AT Column 1
UN applies to entire entry except 7D611.y	See § 746.1(b) for UN controls

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**Special Conditions for STA**

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any software in 7D611.

**List of Items Controlled**

*Related Controls:* “Software” directly related to articles enumerated in USML Category XII is subject of USML paragraph XII(f).

*Related Definitions:* N/A

*Items:*

a. “Software” “specially designed” for the “development,” “production,” operation, or maintenance of commodities controlled by ECCNs 7A611 (except 7A611.y) or 7B611.

b. to x. [Reserved]

y. Specific “software” “specially designed” for the “development,” “production,” operation, or maintenance of commodities described in 7A611.y.

**\*\*7D994** “Software”, n.e.s., for the “development”, “production”, or “use” of

**navigation, airborne communication and other avionics.**

**License Requirements**

*Reason for Control:* AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**E. “TECHNOLOGY”**

**\*\*7E001** “Technology” according to the General Technology Note for the “development” of equipment or “software,” specified by 7A. (except 7A994), 7B. (except 7B994), 7D001, 7D002, 7D003 or 7D005.

**License Requirements**

*Reason for Control:* NS, MT, RS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to technology” for items controlled by 7A001 to 7A004, 7A006,	NS Column 1

7A008, 7B001 to 7B003, 7D001 to 7D005.	
MT applies to “technology” for equipment controlled for MT reasons. MT <i>does not</i> apply to “technology” for equipment controlled by 7A008. MT <i>does</i> apply to “technology” for equipment specified in 7A001, 7A002 or 7A003.d that meets or exceeds parameters of 7A101, 7A102 or 7A103.	MT Column 1
RS applies to “technology” for inertial navigation systems or inertial equipment, and “components” therefor, for 9A991.b aircraft.	RS Column 1
AT applies to entire entry	AT Column 1

7A106, 7A115, 7A116, 7A117, 7B103, software in 7D101 specified in the Related Controls paragraph of ECCN 7D101, 7D102.a, or 7D103 is “subject to the ITAR” (see 22 CFR parts 120 through 130).

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

*Note:* 7E001 includes key management “technology” exclusively for equipment specified in 7A005.a.

**\*\*7E002** “Technology” according to the General Technology Note for the “production” of equipment controlled by 7A (except 7A994) or 7B (except 7B994).

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**List of Items Controlled**

*Related Controls:* See also 7E994. This entry does not control “technology” for maintenance directly associated with calibration, removal or replacement of damaged or unserviceable LRUs and SRAs of a “civil aircraft” as described in ‘Maintenance Level I’ or ‘Maintenance Level II’.

*Related Definition:* Refer to the Related Definitions for 7B001 for ‘Maintenance Level I’ or ‘Maintenance Level II’.

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*7E004** Other “technology” as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, MT, AT

<i>Control(s)</i>	<i>Country Chart (See</i>
-------------------	---------------------------

	<i>Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
MT applies to “technology” for equipment or systems controlled for MT reasons.	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**Special Conditions for STA**

STA: (1) Paragraph (c)(1) of License Exception STA (§ 740.20(c)(1) of the EAR) may not be used for 7E004, except for 7E004.a.7. (2) Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for 7E004, except for 7E004.a.7.

**List of Items Controlled**

*Related Controls:* (1) See also 7E001, 7E002, 7E101, and 7E994. (2) In addition to the Related Controls in 7E001, 7E002, and 7E101 that include MT controls, also see the MT controls in 7E104 for design “technology” for the integration of the flight control, guidance, and propulsion data into a flight management system, designed or modified for rockets or missiles capable of achieving a “range” equal to or greater than 300 km, for optimization of rocket system trajectory; and also see 9E101 for design “technology” for integration of air vehicle fuselage, propulsion system and lifting control surfaces, designed or modified for unmanned aerial vehicles capable of achieving a “range” equal to or greater than 300 km, to optimize aerodynamic performance throughout the flight regime

of an unmanned aerial vehicle.

*Related Definitions:* “Primary flight control” means an “aircraft” stability or maneuvering control using force/moment generators, i.e., aerodynamic control surfaces or propulsive thrust vectoring.

*Items:*

a. “Technology” for the “development” or “production” of any of the following:

a.1. [Reserved]

a.2. Air data systems based on surface static data only, i.e., which dispense with conventional air data probes;

a.3. Three dimensional displays for “aircraft”;

a.4. [Reserved]

a.5. Electric actuators (i.e., electromechanical, electrohydrostatic and integrated actuator package) “specially designed” for ‘primary flight control’;

**Technical Note:** ‘Primary flight control’ is “aircraft” stability or maneuvering control using force/moment generators, i.e., aerodynamic control surfaces or propulsive thrust vectoring.

a.6. ‘Flight control optical sensor array’ “specially designed” for implementing “active flight control systems”; or

**Technical Note:** A ‘flight control optical sensor array’ is a network of distributed optical sensors, using “laser” beams, to provide real-time flight control data for on-board processing.

a.7. “DBRN” systems designed to navigate underwater, using sonar or gravity databases, that provide a positioning “accuracy” equal to or less (better) than 0.4 nautical miles;

b. “Development” “technology”, as follows, for “active flight control systems” (including “fly-by-wire systems” or “fly-by-light systems”):

b.1. Photonic-based “technology” for sensing “aircraft” or flight control component state, transferring flight control data, or commanding actuator movement, “required” for “fly-by-light systems” “active flight control systems”;

b.2. [Reserved]

b.3. Real-time algorithms to analyze component sensor information to predict and preemptively mitigate impending degradation and failures of components within an “active flight control system”;

*Note:* 7E004.b.3 does not include algorithms for purpose of off-line maintenance.

b.4. Real-time algorithms to identify component failures and reconfigure force and moment controls to mitigate “active flight control system” degradations and failures;

*Note:* 7E004.b.4 does not include algorithms for the elimination of fault effects through comparison of redundant data sources, or off-line pre-planned responses to anticipated failures.

b.5. Integration of digital flight control, navigation and propulsion control data, into a digital flight management system for “total control of flight”;

*Note:* 7E004.b.5 does not apply to:

1. “Technology” for integration of digital flight control, navigation and propulsion control data, into a digital flight management system for ‘flight path optimization’;

2. “Technology” for “aircraft” flight instrument systems integrated solely for VOR, DME, ILS or MLS navigation or approaches.

*Technical Note:* ‘Flight path optimization’ is a procedure that minimizes deviations from a four-dimensional (space and time) desired trajectory based on maximizing performance or effectiveness for mission tasks.

b.6. [Reserved]

b.7. “Technology” “required” for deriving the functional requirements for “fly-by-wire systems” having all of the following:

b.7.a. ‘Inner-loop’ airframe stability controls requiring loop closure rates of 40 Hz or greater; and

*Technical Note:* ‘Inner-loop’ refers to functions of “active flight control systems” that automate airframe stability controls.

b.7.b. Having any of the following:

b.7.b.1. Corrects an aerodynamically unstable airframe, measured at any point in the design flight envelope, that would lose recoverable control if not corrected within 0.5 seconds;

b.7.b.2. Couples controls in two or more axes while compensating for ‘abnormal changes in aircraft state’;

*Technical Note:* ‘Abnormal changes in aircraft state’ include in-flight structural damage, loss of engine thrust, disabled control surface, or destabilizing shifts in cargo load.

b.7.b.3. Performs the functions specified in 7E004.b.5; or

*Note:* 7E004.b.7.b.3 does not apply to autopilots.

b.7.b.4. Enables "aircraft" to have stable controlled flight, other than during take-off or landing, at greater than 18 degrees angle of attack, 15 degrees side slip, 15 degrees/second pitch or yaw rate, or 90 degrees/second roll rate;

b.8. "Technology" "required" for deriving the functional requirements of "fly-by-wire systems" to achieve all of the following:

b.8.a. No loss of control of the "aircraft" in the event of a consecutive sequence of any two individual faults within the "fly-by-wire system"; and

b.8.b. Probability of loss of control of the "aircraft" being less (better) than  $1 \times 10^{-9}$  failures per flight hour;

*Note: 7E004.b does not apply to "technology" associated with common computer elements and utilities (e.g., input signal acquisition, output signal transmission, computer program and data loading, built-in test, task scheduling mechanisms) not providing a specific flight control system function.*

c. "Technology" for the "development" of helicopter systems, as follows:

c.1. Multi-axis fly-by-wire or fly-by-light controllers, which combine the functions of at least two of the following into one controlling element:

- c.1.a. Collective controls;
- c.1.b. Cyclic controls;
- c.1.c. Yaw controls;

c.2. "Circulation-controlled anti-torque or circulation-controlled direction control systems";

c.3. Rotor blades incorporating 'variable

geometry airfoils', for use in systems using individual blade control.

*Technical Note: 'Variable geometry airfoils' use trailing edge flaps or tabs, or leading edge slats or pivoted nose droop, the position of which can be controlled in flight.*

**\*\*7E101** "Technology", according to the General Technology Note for the "use" of equipment controlled by 7A001 to 7A006, 7A101 to 7A107, 7A115 to 7A117, 7B001, 7B002, 7B003, 7B101, 7B102, 7B103, or 7D101 to 7D103 for MT reasons.

**License Requirements**

*Reason for Control:* MT, RS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
RS applies to "technology" required for the use of inertial navigation systems, or inertial equipment, or "specially designed" "parts" and "components" therefor, "specially designed" for 9A991.b aircraft.	RS Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* N/A

**List of Items Controlled**

*Related Controls:* The "technology" related to [7A003.b](#), [7A005](#), [7A103.b](#), [7A105](#), [7A106](#), [7A115](#), [7A116](#), [7A117](#), [7B103](#), software specified in the Related Controls

paragraph of ECCN [7D101](#), [7D102.a](#), or [7D103](#) is “subject to the ITAR” (see 22 CFR parts 120 through 130).

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*7E102** “Technology” for protection of avionics and electrical subsystems against electromagnetic pulse (EMP) and electromagnetic interference (EMI) hazards, from external sources, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: \$5000; N/A for 8A001.b and .c.1  
GBS: N/A

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship any commodity in 8A001.b, 8A001.c or 8A001.d to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* For the control status of equipment for submersible vehicles, see:

Category 6 for sensors; Categories 7 and 8 for navigation equipment; Category 8A for underwater equipment.

*Related Definitions:* N/A

*Items:*

a. Manned, tethered submersible vehicles designed to operate at depths exceeding 1,000 m;

b. Manned, untethered submersible vehicles having any of the following:

b.1. Designed to 'operate autonomously' and having a lifting capacity of all the following:

b.1.a. 10% or more of their weight in air; *and*

b.1.b. 15 kN or more;

b.2. Designed to operate at depths exceeding 1,000 m; *or*

b.3. Having all of the following:

b.3.a. Designed to continuously 'operate autonomously' for 10 hours or more; *and*

b.3.b. 'Range' of 25 nautical miles or more;

**Technical Notes:**

1. For the purposes of 8A001.b, 'operate autonomously' means fully submerged, without snorkel, all systems working and cruising at minimum speed at which the submersible can safely control its depth dynamically by using its depth planes only, with no need for a support vessel or support base on the surface, sea-bed or shore, and containing a propulsion system for submerged or surface use.

2. For the purposes of 8A001.b, 'range' means half the maximum distance a submersible vehicle can 'operate autonomously'.

c. Unmanned submersible vehicles as follows:

c.1. Unmanned submersible vehicles having any of the following:

c.1.a. Designed for deciding a course relative to any geographical reference without real-time human assistance;

c.1.b. Acoustic data or command link; or

c.1.c. Optical data or command link exceeding 1,000 m;

c.2. Unmanned, submersible vehicles, not specified in 8A001.c.1, having all of the following:

c.2.a. Designed to operate with a tether;

c.2.b. Designed to operate at depths exceeding 1,000 m; and

c.2.c. Having any of the following:

c.2.c.1. Designed for self-propelled maneuver using propulsion motors or thrusters specified by 8A002.a.2; or

c.2.c.2. Fiber optic data link;

d. [Reserved]

e. Ocean salvage systems with a lifting capacity exceeding 5 MN for salvaging objects from depths exceeding 250 m and having any of the following:

e.1. Dynamic positioning systems capable of position keeping within 20 m of a given point provided by the navigation system; *or*

e.2. Seafloor navigation and navigation integration systems, for depths exceeding 1,000 m and with positioning “accuracies” to within 10 m of a predetermined point.

**\*\*8A002 Marine systems, equipment, “parts” and “components,” as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$5000; N/A for 8A002.o.3.b

*GBS:* Yes for manipulators for civil end uses (*e.g.*, underwater oil, gas or mining operations) controlled by 8A002.i.2 and having 5 degrees of freedom of movement; and 8A002.r.

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship any commodity in 8A002.b, h, j, o.3, or p to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* (1) See also [8A992](#) and for underwater communications systems, see Category 5, Part I - Telecommunications. (2) See also [8A992](#) for self-contained

underwater breathing apparatus that is not controlled by [8A002](#) or released for control by the [8A002.q](#) Note. (3) For electronic imaging systems “specially designed” or modified for underwater use incorporating image intensifier tubes specified by 6A002.a.2.a or 6A002.a.2.b, see 6A003.b.3. (4) For electronic imaging systems “specially designed” or modified for underwater use incorporating “focal plane arrays” specified by 6A002.a.3.g, see 6A003.b.4.c. (5) Section 744.9 imposes a license requirement on commodities described in 8A002.d if being exported, reexported, or transferred (in-country) for use by a military end-user or for incorporation into an item controlled by ECCN 0A919.

*Related Definitions:* N/A

*Items:*

a. Systems, equipment, “parts” and “components,” “specially designed” or modified for submersible vehicles and designed to operate at depths exceeding 1,000 m, as follows:

a.1. Pressure housings or pressure hulls with a maximum inside chamber diameter exceeding 1.5 m;

a.2. Direct current propulsion motors or thrusters;

a.3. Umbilical cables, and connectors therefor, using optical fiber and having synthetic strength members;

a.4. “Parts” and “components” manufactured from material specified by ECCN 8C001;

**Technical Note:** *The objective of 8A002.a.4 should not be defeated by the export of ‘syntactic foam’ controlled by 8C001 when an intermediate stage of manufacture has been performed and it is not yet in its final component form.*

b. Systems “specially designed” or modified for

the automated control of the motion of submersible vehicles controlled by 8A001, using navigation data, having closed loop servo-controls and having any of the following:

b.1. Enabling a vehicle to move within 10 m of a predetermined point in the water column;

b.2. Maintaining the position of the vehicle within 10 m of a predetermined point in the water column; *or*

b.3. Maintaining the position of the vehicle within 10 m while following a cable on or under the seabed;

c. Fiber optic pressure hull penetrators;

d. Underwater vision systems having all of the following:

d.1. “Specially designed” or modified for remote operation with an underwater vehicle; and

d.2. Employing any of the following techniques to minimize the effects of back scatter:

d.2.a. Range-gated illuminators; or

d.2.b. Range-gated “laser” systems;

e. [Reserved]

f. [Reserved]

g. Light systems “specially designed” or modified for underwater use, as follows:

g.1. Stroboscopic light systems capable of a light output energy of more than 300 J per flash and a flash rate of more than 5 flashes per second;

g.2. Argon arc light systems “specially designed” for use below 1,000 m;

h. “Robots” “specially designed” for underwater use, controlled by using a dedicated computer and

having any of the following:

h.1. Systems that control the “robot” using information from sensors which measure force or torque applied to an external object, distance to an external object, or tactile sense between the “robot” and an external object; *or*

h.2. The ability to exert a force of 250 N or more or a torque of 250 Nm or more and using titanium based alloys or “composite” “fibrous or filamentary materials” in their structural members;

i. Remotely controlled articulated manipulators “specially designed” or modified for use with submersible vehicles and having any of the following:

i.1. Systems which control the manipulator using information from sensors which measure any of the following:

i.1.a. Torque or force applied to an external object; *or*

i.1.b. Tactile sense between the manipulator and an external object; *or*

i.2. Controlled by proportional master-slave techniques and having 5 degrees of ‘freedom of movement’ or more;

**Technical Note:** *Only functions having proportionally related motion control using positional feedback are counted when determining the number of degrees of ‘freedom of movement’.*

j. Air independent power systems “specially designed” for underwater use, as follows:

j.1. Brayton or Rankine cycle engine air independent power systems having any of the following:

j.1.a. Chemical scrubber or absorber

systems, “specially designed” to remove carbon dioxide, carbon monoxide and particulates from recirculated engine exhaust;

j.1.b. Systems “specially designed” to use a monoatomic gas;

j.1.c. Devices or enclosures, “specially designed” for underwater noise reduction in frequencies below 10 kHz, or special mounting devices for shock mitigation; *or*

j.1.d. Systems having all of the following:

j.1.d.1. “Specially designed” to pressurize the products of reaction or for fuel reformation;

j.1.d.2. “Specially designed” to store the products of the reaction; *and*

j.1.d.3. “Specially designed” to discharge the products of the reaction against a pressure of 100 kPa or more;

j.2. Diesel cycle engine air independent systems having all of the following:

j.2.a. Chemical scrubber or absorber systems, “specially designed” to remove carbon dioxide, carbon monoxide and particulates from recirculated engine exhaust;

j.2.b. Systems “specially designed” to use a monoatomic gas;

j.2.c. Devices or enclosures, “specially designed” for underwater noise reduction in frequencies below 10 kHz, or special mounting devices for shock mitigation; *and*

j.2.d. “Specially designed” exhaust systems that do not exhaust continuously the products of combustion;

j.3. “Fuel cell” air independent power

systems with an output exceeding 2 kW and having any of the following:

j.3.a. Devices or enclosures, “specially designed” for underwater noise reduction in frequencies below 10 kHz, or special mounting devices for shock mitigation; *or*

j.3.b. Systems having all of the following:

j.3.b.1. “Specially designed” to pressurize the products of reaction or for fuel reformation;

j.3.b.2. “Specially designed” to store the products of the reaction; *and*

j.3.b.3. “Specially designed” to discharge the products of the reaction against a pressure of 100 kPa or more;

j.4. Stirling cycle engine air independent power systems having all of the following:

j.4.a. Devices or enclosures, “specially designed” for underwater noise reduction in frequencies below 10 kHz, or special mounting devices for shock mitigation; *and*

j.4.b. “Specially designed” exhaust systems which discharge the products of combustion against a pressure of 100 kPa or more;

k. [Reserved]

l. [Reserved]

m. [Reserved]

n. [Reserved]

o. Propellers, power transmission systems, power generation systems and noise reduction systems, as follows:

o.1. [Reserved]

o.2. Water-screw propeller, power generation systems or transmission systems, designed for use on vessels, as follows:

o.2.a. Controllable-pitch propellers and hub assemblies, rated at more than 30 MW;

o.2.b. Internally liquid-cooled electric propulsion engines with a power output exceeding 2.5 MW;

o.2.c. “Superconductive” propulsion engines or permanent magnet electric propulsion engines, with a power output exceeding 0.1 MW;

o.2.d. Power transmission shaft systems incorporating “composite” material “parts” or “components” and capable of transmitting more than 2 MW;

o.2.e. Ventilated or base-ventilated propeller systems, rated at more than 2.5 MW;

o.3. Noise reduction systems designed for use on vessels of 1,000 tonnes displacement or more, as follows:

o.3.a. Systems that attenuate underwater noise at frequencies below 500 Hz and consist of compound acoustic mounts for the acoustic isolation of diesel engines, diesel generator sets, gas turbines, gas turbine generator sets, propulsion motors or propulsion reduction gears, “specially designed” for sound or vibration isolation and having an intermediate mass exceeding 30% of the equipment to be mounted;

o.3.b. ‘Active noise reduction or cancellation systems’ or magnetic bearings, “specially designed” for power transmission systems;

**Technical Note:** *‘Active noise reduction or cancellation systems’ incorporate electronic control systems capable of actively reducing*

*equipment vibration by the generation of anti-noise or anti-vibration signals directly to the source.*

p. Pumpjet propulsion systems having all of the following:

p.1. Power output exceeding 2.5 MW; *and*

p.2. Using divergent nozzle and flow conditioning vane techniques to improve propulsive efficiency or reduce propulsion-generated underwater-radiated noise;

q. Underwater swimming and diving equipment as follows;

q.1. Closed circuit rebreathers;

q.2. Semi-closed circuit rebreathers;

*Note:* 8A002.q does not control individual rebreathers for personal use when accompanying their users.

*N.B.* For equipment and devices “specially designed” for military use see ECCN 8A620.f.

r. Diver deterrent acoustic systems “specially designed” or modified to disrupt divers and having a sound pressure level equal to or exceeding 190 dB (reference 1 µPa at 1 m) at frequencies of 200 Hz and below.

*Note 1:* 8A002.r does not apply to diver deterrent systems based on under-water-explosive devices, air guns or combustible sources.

*Note 2:* 8A002.r includes diver deterrent acoustic systems that use spark gap sources, also known as plasma sound sources.

**\*\*8A018 Items on the Wassenaar Arrangement Munitions List.**

No items currently are in this ECCN. See ECCN 8A609 for engines and propulsion systems and “specially designed” “components” therefor that, immediately prior to January 6, 2014, were classified under ECCN 8A018.b.3. See ECCN 8A620 for closed and semi-closed circuit (rebreathing) apparatus, engines and propulsion systems for submersible vessels (diesel engines of 1,500 hp and over with rotary speed of 700 rpm or over “specially designed” for submarines), submarine and torpedo nets, and “specially designed” “components” therefor that, immediately prior to January 6, 2014, were classified under ECCN 8A018.a, .b.1, or .b.4, respectively. See ECCNs 8A001, 8A002 and 8A992 for controls on non-military submersible vehicles, oceanographic and associated equipment. See USML Category XX (22 CFR part 121) for electric motors “specially designed” for submarines that, immediately prior to January 6, 2014, were classified under ECCN 8A018.b.2.

**\*\*8A609 Surface vessels of war and related commodities (see List of Items Controlled).**

### Special Conditions for STA

*STA:* (1) Paragraph (c)(1) of License Exception STA (§740.20(c)(1) of the EAR) may not be used for any item in 8A609.a, unless determined by BIS to be eligible for License Exception STA in accordance with §740.20(g) (License Exception STA eligibility requests for 9x515 and “600 series” items). (2) Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 8A609.

### List of Items Controlled

*Related Controls:* (1) Surface vessels of war and special naval equipment, and technical data (including software), and services directly related thereto, described in 22 CFR part 121, Category VI, Surface Vessels of War and Special Naval Equipment, are subject to the jurisdiction of the International Traffic in Arms Regulations. (2) See ECCN 0A919 for foreign-made “military commodities” that incorporate more than a *de minimis* amount of U.S.- origin “600 series” controlled content. (3) For controls on diesel engines and electric motors that are “subject to the EAR” for surface vessels of war “subject to the EAR” or “subject to the ITAR,” see ECCN 8A992.g. For diesel engines and electric motors for surface vessels of war “subject to the ITAR,” see 22 CFR part 121, Category VI(c) for parts, components, accessories, and attachments, “specially designed” for developmental vessels funded by the Department of Defense via contract or other funding authorization. (4) For controls on military gas turbine engines

and related items for vessels of war, see ECCN 9A619. (4) For controls on military gas turbine engines and related items for vessels of war, see ECCN 9A619.

*Related Definitions:* N/A

*Items:*

a. Surface vessels of war “specially designed” for a military use and not enumerated or otherwise described in the USML.

**Note 1:** *8A609.a includes: (i) Underway replenishment ships; (ii) surface vessel and submarine tender and repair ships, except vessels that are “specially designed” to support naval nuclear propulsion plants; (iii) non-submersible submarine rescue ships; (iv) other auxiliaries (e.g., AGDS, AGF, AGM, AGOR, AGOS, AH, AP, ARL, AVB, AVM, and AVT); (v) amphibious warfare craft, except those that are armed; and (vi) unarmored and unarmed coastal, patrol, roadstead, and Coast Guard and other patrol craft with mounts or hard points for firearms of .50 caliber or less.*

**Note 2:** *For purposes of paragraph .a, surface vessels of war includes vessels “specially designed” for military use that are not identified in paragraph (a) of ITAR § 121.15, including any demilitarized vessels, regardless of origin or designation, manufactured prior to 1950 and that have not been modified since 1949. For purposes of this note, the term modified does not include incorporation of safety features required by law, cosmetic changes (e.g., different paint), or the addition of “parts” or “components” available prior to 1950.*

b. Non-magnetic diesel engines with a power output of 50 hp or more and either of the following:

b.1. Non-magnetic content exceeding 25% of total weight; *or*

b.2. Non-magnetic parts other than crankcase, block, head, pistons, covers, end plates, valve facings, gaskets, and fuel, lubrication and other supply lines.

c. through w. [Reserved]

x. “Parts,” “components,” “accessories” and “attachments” that are “specially designed” for a commodity enumerated or otherwise described in ECCN 8A609 (except for 8A609.y) or a defense article enumerated or otherwise described in USML Category VI and not specified elsewhere on the USML, in 8A609.y or 3A611.y.

*Note 1: Forgings, castings, and other unfinished products, such as extrusions and machined bodies, that have reached a stage in manufacturing where they are clearly identifiable by mechanical properties, material composition, geometry, or function as commodities controlled by ECCN 8A609.x are controlled by ECCN 8A609.x.*

*Note 2: “Parts,” “components,” “accessories” and “attachments” specified in USML subcategory VI(f) are subject to the controls of that paragraph. “Parts,” “components,” “accessories,” and “attachments” specified in ECCN 8A609.y are subject to the controls of that paragraph.*

y. Specific “parts,” “components,” “accessories” and “attachments” “specially designed” for a commodity subject to control in this ECCN or for a defense article in USML Category VI and not elsewhere specified in the USML, as follows, and “parts,” “components,” “accessories,” and “attachments” “specially designed” therefor:

y.1. Public address (PA) systems;

y.2. Filters and filter assemblies, hoses, lines, fittings, couplings, and brackets for pneumatic, hydraulic, oil and fuel systems;

y.3. Galleys;

y.4. Lavatories;

y.5. Magnetic compass, magnetic azimuth detector;

y.6. Medical facilities;

y.7. Potable water tanks, filters, valves, hoses, lines, fittings, couplings, and brackets;

y.8. Panel knobs, indicators, switches, buttons, and dials whether unfiltered or filtered for use with night vision imaging systems;

y.9. Emergency lighting;

y.10. Gauges and indicators;

y.11. Audio selector panels.

**\*\*8A620 Submersible vessels, oceanographic and associated commodities (see List of Items Controlled).**

### Special Conditions for STA

*STA:* (1) Paragraph (c)(1) of License Exception STA (§ 740.20(c)(1) of the EAR) may not be used for any item in 8A620.a or .b, unless determined by BIS to be eligible for License Exception STA in accordance with § 740.20(g) (License Exception STA eligibility requests for “600 series” end items). (2) Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 8A620.

### List of Items Controlled

*Related Controls:* (1) Submersible vessels, oceanographic and associated equipment, and technical data (including software), and services directly related thereto, described in 22 CFR part 121, Category XX, Submersible Vessels, Oceanographic and Associated Equipment, are subject to the jurisdiction of the International Traffic in Arms Regulations (ITAR). “Parts,” “components,” “accessories,” and “attachments” “specially designed” for defense articles in USML Category XX are controlled under USML sub-category XX(c). (2) See ECCN 0A919 for foreign made “military commodities” that incorporate more than a *de minimis* amount of U.S.-origin “600 series” controlled content. (3) For controls on nonmilitary submersible vehicles, oceanographic and associated equipment, see ECCNs 8A001, 8A002, and 8A992. (4) See ECCN 8A609 for controls on nonmagnetic diesel engines with a power output of 50 hp or more and either: (i) nonmagnetic content exceeding 25% of total weight; or (ii) non-magnetic

parts other than crankcase, block, head, pistons, covers, end plates, valve facings, gaskets, and fuel, lubrication and other supply lines.

*Related Definitions:* N/A

#### *Items:*

a. Submersible and semi-submersible vessels “specially designed” for a military use and not enumerated or otherwise described in the USML.

*Note:* 8A620.a includes submarine rescue vehicles and Deep Submergence Vehicles (DSV).

b. Submersible and semi-submersible vessels “specially designed” for cargo transport and “parts,” “components,” “accessories,” and “attachments” “specially designed” therefor.

c. Harbor entrance detection devices (magnetic, pressure, and acoustic) and controls therefor, not elsewhere specified on the USML or the CCL.

d. Diesel engines of 1,500 hp and over with rotary speed of 700 rpm or over “specially designed” for submarines.

*Note:* Propulsion systems not specified in ECCN 8A620.d that are “specially designed” for an article controlled by USML Category XX are controlled by USML XX(b) or (c).

e. Submarine nets and torpedo nets.

f. Diving and underwater swimming apparatus specially designed or modified for military use, as follows:

f.1. Self-contained diving rebreathers, closed or semi-closed circuit;

f.2. Underwater swimming apparatus specially designed for use with the diving apparatus specified in subparagraph f.1;

*N.B.:* See also 8A002.q.

g. through w. [Reserved]

x. “Parts,” “components,” “accessories” and “attachments” that are “specially designed” for a commodity enumerated or otherwise described in ECCN 8A620 (except for 8A620.b or 8A620.y) and not elsewhere specified on the USML, in 8A620.y or 3A611.y.

*Note 1: Forgings, castings, and other unfinished products, such as extrusions and machined bodies, that have reached a stage in manufacturing where they are clearly identifiable by mechanical properties, material composition, geometry, or function as commodities controlled by ECCN 8A620.x are controlled by ECCN 8A620.x.*

*Note 2: “Parts,” “components,” “accessories” and “attachments” specified in ECCN 8A620.y are subject to the controls of that paragraph.*

y. Specific “parts,” “components,” “accessories,” and “attachments” “specially designed” for a commodity subject to control in this ECCN, as follows, and “parts,” “components,” “accessories,” and “attachments” “specially designed” therefor:

y.1. Public address (PA) systems;

y.2. Filters and filter assemblies, hoses, lines, fittings, couplings, and brackets for pneumatic, hydraulic, oil and fuel systems;

y.3. Galleys;

y.4. Lavatories;

y.5. Magnetic compass, magnetic azimuth detector;

y.6. Medical facilities;

y.7. Potable water tanks, filters, valves, hoses, lines, fittings, couplings, and brackets;

y.8. Panel knobs, indicators, switches, buttons, and dials whether unfiltered or filtered for use with night vision imaging systems;

y.9. Emergency lighting;

y.10. Gauges and indicators;

y.11. Audio selector panels.

**\*\*8A992** Vessels, marine systems or equipment, not controlled by 8A001 or 8A002 and “specially designed” “parts” and “components” therefor, and marine boilers and “parts,” “components,” “accessories,” and “attachments” therefor (see List of Items Controlled).

**License Requirements**

*Reason for Control:* AT, Foreign policy

<i>Control(s)</i>	<i>Country chart (See Supp. No. 1 to part 738)</i>
AT applies to entire entry	AT Column 1
Russian industry sector sanctions apply to entire entry.	See § 746.5 for specific license requirements and license review policy.

*LVS:* N/A

*GBS:* N/A

**List of Items Controlled**

*Related Controls:* (1) See also [8A002](#). (2) Marine gas turbine engines are not controlled in paragraph .g of this entry. See ECCN 9A619 for possible controls on

marine gas turbine engines specially designed for a military use. See ECCN 9A002 for possible controls on marine gas turbine engines not specially designed for a military use. Marine gas turbine engines subject to the EAR that are not controlled in ECCNs 9A002 or 9A619 are designated EAR99.

*Related Definitions:* N/A

*Items:*

a. Underwater vision systems, as follows:

a.1. Television systems (comprising camera, lights, monitoring and signal transmission equipment) having a limiting resolution when measured in air of more than 500 lines and “specially designed” or modified for remote operation with a submersible vehicle; *or*

a.2. Underwater television cameras having a limiting resolution when measured in air of more than 700 lines;

*Technical Note: Limiting resolution in television is a measure of horizontal resolution usually expressed in terms of the maximum number of lines per picture height discriminated on a test chart, using IEEE Standard 208/1960 or any equivalent standard.*

b. Photographic still cameras “specially designed” or modified for underwater use, having a film format of 35 mm or larger, and having autofocus or remote focusing “specially designed” for underwater use;

c. Stroboscopic light systems, “specially designed” or modified for underwater use, capable of a light output energy of more than 300 J per flash;

d. Other underwater camera equipment, n.e.s.;

e. Other submersible systems, n.e.s.;

f. Vessels, n.e.s., including inflatable boats, and “specially designed” “parts” and “components” therefor, n.e.s.;

g. Marine engines (both inboard and outboard) and submarine engines, n.e.s.; and “specially designed” “parts” and “components” therefor, n.e.s.;

h. Other self-contained underwater breathing apparatus (scuba gear) and related equipment, n.e.s.;

i. Life jackets, inflation cartridges, compasses, wetsuits, masks, fins, weight belts, and dive computers;

j. Underwater lights and propulsion equipment;

k. Air compressors and filtration systems “specially designed” for filling air cylinders.

l. Marine boilers designed to have any of the following characteristics:

l.1. Heat release rate (at maximum rating) equal to or in excess of 190,000 BTU per hour per cubic foot of furnace volume; *or*

l.2. Ratio of steam generated in pounds per hour (at maximum rating) to the dry weight of the boiler in pounds equal to or in excess of 0.83.

m. Major “components,” “accessories,” and “attachments” for marine boilers described in 8A992.1.

## B. TEST, INSPECTION AND “PRODUCTION EQUIPMENT”

**\*\*8B001** Water tunnels designed to have a background noise of less than 100 dB (reference 1 µPa, 1 Hz) within the frequency range exceeding 0 Hz but not exceeding to 500 Hz and designed for measuring acoustic fields

generated by a hydro-flow around propulsion system models.

**License Exceptions Note:** License Exception TSU is not applicable for the repair “technology” controlled by 8E002.a or .b, see Supplement No. 2 to part 774.

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship or transmit technology in 8E002.a to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* See also [8E992](#)  
*Related Definitions:* N/A  
*Items:*

a. “Technology” for the “development”, “production”, repair, overhaul or refurbishing (re-machining) of propellers “specially designed” for underwater noise reduction;

b. “Technology” for the overhaul or refurbishing of equipment controlled by 8A001, 8A002.b, 8A002.j, 8A002.o or 8A002.p.

c. "Technology" according to the General Technology Note for the "development" or "production" of any of the following:

c.1. Surface-effect vehicles (fully skirted

variety) having all of the following:

c.1.a. Maximum design speed, fully loaded, exceeding 30 knots in a significant wave height of 1.25 m or more;

c.1.b. Cushion pressure exceeding 3,830 Pa; *and*

c.1.c. Light-ship-to-full-load displacement ratio of less than 0.70;

c.2. Surface-effect vehicles (rigid sidewalls) with a maximum design speed, fully loaded, exceeding 40 knots in a significant wave height of 3.25 m or more;

c.3. Hydrofoil vessels with active systems for automatically controlling foil systems, with a maximum design speed, fully loaded, of 40 knots or more in a significant wave height of 3.25 m or more; *or*

c.4. 'Small waterplane area vessels' having any of the following:

c.4.a. Full load displacement exceeding 500 tonnes with a maximum design speed, fully loaded, exceeding 35 knots in a significant wave height of 3.25 m or more; *or*

c.4.b. Full load displacement exceeding 1,500 tonnes with a maximum design speed, fully loaded, exceeding 25 knots in a significant wave height of 4 m or more.

**Technical Note:** A 'small waterplane area vessel' is defined by the following formula: *waterplane area at an operational design draft less than 2x (displaced volume at the operational design draft)<sup>2/3</sup>.*

**\*\*8E609** “Technology” “required” for the “development,” “production,” operation, installation, maintenance, repair, overhaul, or refurbishing of commodities controlled by

**8A609, 8B609, or 8C609, or “software” controlled by 8D609 (see List of Items Controlled).**

*Related Controls:* N/A

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**EAR99** Items subject to the EAR that are *not* elsewhere specified in this CCL Category *or* in any other category in the CCL are designated by the number *EAR99*.

**CATEGORY 9 - AEROSPACE AND PROPULSION**

**A. “END ITEMS,” “EQUIPMENT,” “ACCESSORIES,” “ATTACHMENTS,” “PARTS,” “COMPONENTS,” AND “SYSTEMS”**

**N.B.:** For propulsion systems designed or rated against neutron or transient ionizing radiation, see the U.S. Munitions List, 22 CFR part 121.

**\*\*9A001** Aero gas turbine engines having any of the following (see List of Items Controlled).

**License Requirements**

Reason for Control: NS, MT, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 1
MT applies to only to those engines that meet the characteristics listed in 9A101	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**List of Items Controlled**

Related Controls: See also [9A101](#) and [9A991](#)  
Related Definitions: N/A  
Items:

a. Incorporating any of the “technologies” controlled by 9E003.a, 9E003.h, or 9E003.i; or

*Note 1:* 9A001.a does not control aero gas

turbine engines which meet all of the following:

a. Certified by the civil aviation authority in a country listed in Supplement No. 1 to Part 743; and

b. Intended to power non-military manned “aircraft” for which any of the following has been issued by a Wassenaar Arrangement Participating State listed in Supplement No. 1 to Part 743 for the “aircraft” with this specific engine type:

b.1. A civil type certificate; or

b.2. An equivalent document recognized by the International Civil Aviation Organization (ICAO).

*Note 2:* 9A001.a does not apply to aero gas turbine engines for Auxiliary Power Units (APUs) approved by the civil aviation authority in a Wassenaar Arrangement Participating State (see Supplement No. 1 to part 743 of the EAR).

b. Designed to power an “aircraft” designed to cruise at Mach 1 or higher, for more than 30 minutes.

**\*\*9A002** ‘Marine gas turbine engines’ designed to use liquid fuel and having all of the following (see List of Items Controlled), and “specially designed” assemblies and “components” therefor.

**License Requirements**

Reason for Control: NS, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
NS applies to entire entry	NS Column 2
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: \$5000

GBS: N/A

**List of Items Controlled:**

*Related Controls:* N/A

*Related Definition:* N/A

*Items:*

a. Maximum continuous power when operating in “steady state mode” at standard reference conditions specified by ISO 3977-2:1997 (or national equivalent) of 24,245 kW or more; *and*

b. ‘Corrected specific fuel consumption’ not exceeding 0.219 kg/kWh at 35% of the maximum continuous power when using liquid fuel.

*Note: The term ‘marine gas turbine engines’ includes those industrial, or aero-derivative, gas turbine engines adapted for a ship’s electric power generation or propulsion.*

*Technical Note: For the purposes of 9A002, ‘corrected specific fuel consumption’ is the specific fuel consumption of the engine corrected to a marine distillate liquid fuel having a net specific energy (i.e., net heating value) of 42 MJ/kg (ISO 3977-2:1997).*

**\*\*9A003** “Specially designed” assemblies or “components,” incorporating any of the “technologies” controlled by 9E003.a, 9E003.h or 9E003.i, for any of the following aero gas turbine engines (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, AT

Control(s)	Country Chart
------------	---------------

LVS: \$5000

GBS: N/A

**List of Items Controlled**

*Related Controls:* N/A

*Related Definition:* N/A

*Items:*

a. Controlled by 9A001; *or*

b. Whose design or production origins are either not from a Wassenaar Participating State (see Supplement No. 1 to part 743 of the EAR) or unknown to the manufacturer.

**\*\*9A004** Space launch vehicles and “spacecraft,” “spacecraft buses”, “spacecraft payloads”, “spacecraft” on-board systems or equipment, terrestrial equipment, and air-launch platforms, as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS and AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to 9A004.g, .u, .v, .w and .x	NS Column 1
AT applies to 9A004.g, .u, .v, .w, .x and .y	AT Column 1

*License Requirement Note: 9A004.b through .f, and .h are controlled under ECCN 9A515.*

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A  
GBS: N/A

**List of Items Controlled**

*Related Controls:* (1) See also [9A104](#), [9A515](#), and [9B515](#). (2) See ECCNs [9E001](#) (“development”) and [9E002](#) (“production”) for technology for items controlled by this entry. (3) See USML Categories IV for the space launch vehicles and XV for other spacecraft that are “subject to the ITAR” (see 22 CFR parts 120 through 130).

*Related Definition:* N/A

*Items:*

- a. Space launch vehicles;
- b. “Spacecraft”;
- c. “Spacecraft buses”;
- d. “Spacecraft payloads” incorporating items specified by 3A001.b.1.a.4, 3A002.g, 5A001.a.1, 5A001.b.3, 5A002.c, 5A002.e, 6A002.a.1, 6A002.a.2, 6A002.b, 6A002.d, 6A003.b, 6A004.c, 6A004.e, 6A008.d, 6A008.e, 6A008.k, 6A008.l or 9A010.c;
- e. On-board systems or equipment, specially designed for “spacecraft” and having any of the following functions:
  - e.1. ‘Command and telemetry data handling’;

*Note:* For the purpose of 9A004.e.1, ‘command and telemetry data handling’ includes bus data management, storage, and processing.

  - e.2. ‘Payload data handling’; or

*Note:* For the purpose of 9A004.e.2, ‘payload data handling’ includes payload data management, storage, and processing.

e.3. ‘Attitude and orbit control’;

*Note:* For the purpose of 9A004.e.3, ‘attitude and orbit control’ includes sensing and actuation to determine and control the position and orientation of a “spacecraft”.

*N.B.:* Equipment specially designed for military use is “subject to the ITAR”. See 22 CFR parts 120 through 130.

f. Terrestrial equipment specially designed for “spacecraft”, as follows:

f.1. Telemetry and telecommand equipment “specially designed” for any of the following data processing functions:

f.1.a. Telemetry data processing of frame synchronization and error corrections, for monitoring of operational status (also known as health and safe status) of the “spacecraft bus”; or

f.1.b. Command data processing for formatting command data being sent to the “spacecraft” to control the “spacecraft bus”;

f.2. Simulators “specially designed” for ‘verification of operational procedures’ of “spacecraft”.

*Technical Note:* For the purposes of 9A004.f.2, ‘verification of operational procedures’ is any of the following:

1. Command sequence confirmation;
2. Operational training;
3. Operational rehearsals; or
4. Operational analysis.

g. “Aircraft” “specially designed” or modified to be air-launch platforms for space launch vehicles;

h. “Sub-orbital craft”.

i. through t. [RESERVED]

u. The James Webb Space Telescope (JWST) being developed, launched, and operated under the supervision of the U.S. National Aeronautics and Space Administration (NASA).

v. “Parts,” “components,” “accessories” and “attachments” that are “specially designed” for the James Webb Space Telescope and that are *not*:

- v.1. Enumerated or controlled in the USML;
- v.2. Microelectronic circuits;
- v.3. Described in ECCN 7A004 or 7A104; *or*
- v.4. Described in an ECCN containing “space-qualified” as a control criterion (*See* ECCN 9A515.x.4).

w. The International Space Station being developed, launched, and operated under the supervision of the U.S. National Aeronautics and Space Administration.

x. “Parts,” “components,” “accessories” and “attachments” that are “specially designed” for the International Space Station.

y. Items that would otherwise be within the scope of ECCN 9A004.v or .x but that have been identified in an interagency-cleared commodity classification (CCATS) pursuant to § 748.3(e) as warranting control in 9A004.y.

**\*\*9A005** Liquid rocket propulsion systems containing any of the systems or “components,” controlled by 9A006. (These items are “subject to the ITAR.” See 22 CFR parts 120 through 130.)

**\*\*9A006** Systems, “components,” “specially

designed” for liquid rocket propulsion systems. (These items are “subject to the ITAR.” See 22 CFR parts 120 through 130.)

**\*\*9A007** Solid rocket propulsion systems. (These items are “subject to the ITAR.” See 22 CFR parts 120 through 130.)

**\*\*9A008** “Components” “specially designed” for solid rocket propulsion systems. (These items are “subject to the ITAR.” See 22 CFR parts 120 through 130.)

**\*\*9A009** Hybrid rocket propulsion systems. (These items are “subject to the ITAR.” See 22 CFR parts 120 through 130.)

**\*\*9A010** “Specially Designed” “Parts”, “Components”, Systems and Structures, for Launch Vehicles, Launch Vehicle Propulsion Systems or “Spacecraft”. (See Related Controls paragraph.)

#### List of Items Controlled

*Related Controls:* (1) See USML Category IV of the International Traffic in Arms Regulations (ITAR) (22 CFR parts 120 through 130) and ECCN [9A604](#) for paragraphs 9A010.a, .b and .d. (2) See USML Category XV of the ITAR and ECCN [9A515](#) for paragraph 9A010.c. (3) See Supplement No. 4 to part 774, Order of Review for guidance on the process for determining classification of items.

*Related Definitions:* N/A

*Items:*

a. “Parts”, “components” and structures, each exceeding 10 kg and “specially designed” for launch vehicles manufactured using any of the following:

a.1. “Composite” materials consisting of “fibrous or filamentary materials” specified by 1C010.e and resins specified by 1C008 or 1C009.b;

a.2. Metal “matrix” “composites” reinforced by any of the following:

a.2.a. Materials specified by 1C007;

a.2.b. “Fibrous or filamentary materials” specified by 1C010; *or*

a.2.c. Aluminides specified by 1C002.a; *or*

a.3. Ceramic “matrix” “composite” materials specified by 1C007;

*Note: The weight cut-off is not relevant for nose cones.*

b. “Parts”, “components” and structures, “specially designed” for launch vehicle propulsion systems specified by 9A005 to 9A009, manufactured using any of the following:

b.1. “Fibrous or filamentary materials” specified by 1C010.e and resins specified by 1C008 or 1C009.b;

b.2. Metal “Matrix” “composites” reinforced by any of the following:

b.2.a. Materials specified by 1C007;

b.2.b. “Fibrous or filamentary materials” specified by 1C010; *or*

b.2.c. Aluminides specified by 1C002.a; *or*

b.3. Ceramic “matrix” “composite” materials specified by 1C007;

c. Structural components and isolation systems, specially designed to control actively the dynamic response or distortion of “spacecraft”

structures;

d. Pulsed liquid rocket engines with thrust-to-weight ratios equal to or more than 1 kN/kg and a ‘response time’ of less than 30 ms.

*Technical Note: For the purposes of 9A010.d, ‘response time’ means the time required to achieve 90% of total rated thrust from start-up.*

**\*\*9A011 Ramjet, scramjet or combined cycle engines, and “specially designed” “parts” and “components” therefor. (These items are “subject to the ITAR.” See 22 CFR parts 120 through 130.)**

**\*\*9A012 Non-military “Unmanned Aerial Vehicles,” (“UAVs”), unmanned “airships”, related equipment and “components”, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
MT applies to non-military Unmanned Aerial Vehicles (UAVs) and Remotely Piloted Vehicles (RPVs) that are capable of a maximum range of at least 300 kilometers (km), regardless of payload, and UAVs that meet the requirements of 9A120	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* 1) See the U.S. Munitions List Category VIII (22 CFR Part 121). 2) Also see ECCN [9A610](#) and § 744.3 of the EAR. 3) For “UAVs” that are “sub-orbital craft,” see ECCNs [9A004.h](#) and [9A515.a](#).

*Related Definitions:* N/A

*Items:*

a. “UAVs” or unmanned “airships”, designed to have controlled flight out of the direct ‘natural vision’ of the ‘operator’ and having any of the following:

a.1. Having all of the following:

a.1.a. A maximum ‘endurance’ greater than or equal to 30 minutes but less than 1 hour; and

a.1.b. Designed to take-off and have stable controlled flight in wind gusts equal to or exceeding 46.3 km/h (25 knots); *or*

a.2. A maximum ‘endurance’ of 1 hour or greater;

**Technical Notes:**

1. *For the purposes of 9A012.a, ‘operator’ is a person who initiates or commands the “UAV” or unmanned “airship” flight.*

2. *For the purposes of 9A012.a, ‘endurance’ is to be calculated for ISA conditions (ISO 2533:1975) at sea level in zero wind.*

3. *For the purposes of 9A012.a, ‘natural vision’ means unaided human sight, with or without corrective lenses.*

b. Related equipment and “components”, as follows:

b.1 [Reserved]

b.2. [Reserved]

b.3. Equipment or “components” “specially designed” to convert a manned “aircraft” or a manned “airship” to a “UAV” or unmanned “airship”, controlled by 9A012.a;

b.4. Air breathing reciprocating or rotary internal combustion type engines, “specially designed” or modified to propel “UAVs” or unmanned “airships”, at altitudes above 15,240 meters (50,000 feet).

**\*\*9A018 Equipment on the Wassenaar Arrangement Munitions List.**

(a) See ECCN 9A610 for the aircraft, refuelers, ground equipment, parachutes, harnesses, and instrument flight trainers, as well as “parts”, “accessories,” and “attachments” for the forgoing that, immediately prior to October 15, 2013, were classified under 9A018.a.1, .a.3, .c, .d, .e, or .f.

(b) See ECCN 9A619 for military trainer aircraft turbo prop engines and “parts” and “components” therefor that, immediately prior to October 15, 2013, were classified under ECCN 9A018.a.2 or .a.3.

(c) See ECCN 0A606.b for certain armored ground transport vehicles that prior to January 6, 2014 were classified under ECCN 9A018.b.

**\*\*9A101 Turbojet and turbofan engines, other than those controlled by 9A001, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
-------------------	--

MT applies to entire entry	MT Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: N/A

GBS: N/A

**List of Items Controlled**

*Related Controls:* [9A101.b](#) controls only engines for non-military unmanned aerial vehicles [UAVs] or remotely piloted vehicles [RPVs], and does not control other engines designed or modified for use in “missiles”, which are “subject to the ITAR” (see 22 CFR parts 120 through 130).

*Related Definitions:* ‘Maximum thrust value’ in 9A101.a.1 is the manufacturer’s demonstrated maximum thrust for the engine type un-installed. The civil type certified thrust value will be equal to or less than the manufacturer’s demonstrated maximum thrust for the engine type.

*Items:*

a. Engines having all of the following characteristics:

a.1. ‘Maximum thrust value’ greater than 400 N (achieved un-installed) excluding civil certified engines with a maximum thrust value greater than 8,890 N (achieved un-installed);

a.2. Specific fuel consumption of 0.15 kg N<sup>-1</sup> h<sup>-1</sup> or less (at maximum continuous power at sea level static conditions using the ICAO standard atmosphere);

a.3. ‘Dry weight’ less than 750 kg; *and*

a.4. ‘First –stage rotor diameter’ less than 1 m.

**Technical Notes:**

1. ‘Maximum thrust value’ in 9A101.a.1 is the manufacturer’s demonstrated maximum thrust for the engine type un-installed at sea level static conditions using the ICAO standard atmosphere. The civil type certified thrust value will be equal to or less than the manufacturer’s demonstrated maximum thrust for the engine type.

2. ‘Dry weight’ is the weight of the engine without fluids (fuel, hydraulic fluid, oil, etc.) and does not include the nacelle (housing).

3. ‘First-stage rotor diameter’ is the diameter of the first rotating stage of the engine, whether a fan or compressor, measured at the leading edge of the blade tips.

b. Engines designed or modified for use in “missiles” or UAVs with a range equal to or greater than 300 km, regardless of thrust, specific fuel consumption, ‘dry weight’ or ‘first-stage rotor diameter’.

**\*\*9A102** ‘Turboprop engine systems’ “specially designed” for items controlled in 9A012 for MT reasons, and “specially designed” “parts” and “components” therefor, having a maximum power greater than 10 kW (achieved uninstalled at sea level static conditions using the ICAO standard atmosphere), excluding civil certified engines.

**License Requirements**

### List of Items Controlled

*Related Controls:* See also 9A001 and 9A101.

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**Technical Note to 9A102:** For the purposes of 9A102 a ‘turboprop engine system’ incorporates all of the following:

- a. Turboshaft engine; and
- b. Power transmission system to transfer the power to a propeller.

**\*\*9A103** Liquid propellant tanks “specially designed” for the propellants controlled in ECCNs 1C011, 1C111 or other liquid propellants used in “missiles.” (These items are “subject to the ITAR.” See 22 CFR parts 120 through 130.)

**\*\*9A104** Sounding rockets, capable of a range of at least 300 km. (These items are “subject to the ITAR.” See 22 CFR parts 120 through 130.)

**\*\*9A105** Liquid propellant rocket engines. (These items are “subject to the ITAR.” See 22 CFR parts 120 through 130.)

**\*\*9A106** Systems, “parts” or “components,” other than those controlled by 9A006, usable in “missiles”, and “specially designed” for liquid rocket propulsion systems, as follows (see List of Items Controlled).

### License Requirements

### List of Items Controlled

*Related Controls:* Items described in [9A106.a](#), [.b](#), and [.c](#) are “subject to the ITAR” (see 22 CFR parts 120 through 130).

*Related Definitions:* N/A

*Items:*

- a. Ablative liners for thrust or combustion chambers;
- b. Rocket nozzles;
- c. Thrust vector control sub-systems;

**Technical Note:** Examples of methods of achieving thrust vector control controlled by 9A106.c includes:

1. Flexible nozzle;
2. Fluid or secondary gas injection;
3. Movable engine or nozzle;
4. Deflection of exhaust gas steam (jet vanes or probes); or
5. Thrust tabs.

d. Liquid, slurry and gel propellant (including oxidizers) control systems, and “specially designed” “parts” and “components” therefor, designed or modified to operate in vibration environments greater than 10 g rms between 20 Hz and 2000 Hz.

*Note: The only servo valves, pumps and gas turbines controlled by 9A106.d, are the following:*

a. Servo valves designed for flow rates equal to or greater than 24 liters per minute, at an absolute pressure equal to or greater than 7 MPa, that have an actuator response time of less than 100 ms;

b. Pumps, for liquid propellants, with shaft speeds equal to or greater than 8,000 rpm at the maximum operating mode or with discharge pressures equal to or greater than 7 Mpa; or

c. Gas turbines, for liquid propellant turbopumps, with shaft speeds equal to or greater than 8,000 rpm at the maximum operating mode.

e. Flight control servo valves designed or modified for use in “missiles” and designed or modified to operate in a vibration environment greater than 10g rms over the entire range between 20Hz and 2 kHz.

**\*\*9A107** Solid propellant rocket engines, usable in rockets with a range capability of 300 km or greater, other than those controlled by 9A007, having total impulse capacity equal to or greater than  $8.41 \times 10^5$  Ns, but less than  $1.1 \times 10^6$  Ns. (These items are “subject to the ITAR.” See 22 CFR parts 120 through 130.)

**\*\*9A108** Solid rocket propulsion “parts” and “components,” other than those controlled by 9A008, usable in rockets with a range capability of 300 km or greater. (These items are “subject to the ITAR.” See 22 CFR parts

120 through 130.)

**\*\*9A109** Hybrid rocket motors, usable in rockets with a range capability of 300 km or greater, other than those controlled by 9A009, and “specially designed” “parts” and “components” therefor. (These items are “subject to the ITAR.” See 22 CFR parts 120 through 130.)

**\*\*9A110** Composite structures, laminates and manufactures thereof “specially designed” for 9A012 items that are controlled for MT reasons.

**License Requirements**

*Reason for Control:* MT, AT

**\*\*9A116** Reentry vehicles, usable in “missiles”, and equipment designed or modified therefor. (These items are “subject to the ITAR.” See 22 CFR parts 120 through 130.)

**List of Items Controlled**

**\*\*9A117** Staging mechanisms, separation mechanisms, and interstages therefor, usable in “missiles”. (These items are “subject to the

*Related Controls:* See ECCN [9A012](#) or the U.S. Munitions List Category VIII (22 CFR part 121). Also see ECCN 2B352.i for controls on certain spraying or fogging

systems, and “parts” and “components” therefor, “specially designed” or modified for fitting to aircraft, “lighter than air vehicles,” or “UAVs.”

*Related Definitions:* N/A  
*Items:*

- a. Having any of the following:
  - a.1. An autonomous flight control and navigation capability; *or*
  - a.2. Capability of controlled-flight out of the direct vision range involving a human operator; *and*
- b. Having any of the following:
  - b.1. Incorporating an aerosol dispensing system/mechanism with a capacity greater than 20 liters; *or*
  - b.2. Designed or modified to incorporate an aerosol dispensing system/mechanism with a capacity of greater than 20 liters.

**Note:** 9A120 does not control model aircraft, “specially designed” for recreational or competition purposes.

**Technical Notes:**

1. An aerosol consists of particulate or liquids other than fuel components, by-products or additives, as part of the “payload” to be dispersed in the atmosphere. Examples of aerosols include pesticides for crop dusting and dry chemicals for cloud seeding.
2. An aerosol dispensing system/mechanism contains all above devices (mechanical, electrical, hydraulic, etc.), which are necessary for storage and dispersion of an aerosol into the atmosphere. This includes the possibility of aerosol injection into the combustion exhaust vapor and into the propeller slip stream.

**\*\*9A515 “Spacecraft” and related commodities, as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, RS, MT, AT

RS applies to 9A515.e.	RS Column 2
RS applies to 9A515.y, except to Russia for use in, with, or for the International Space Station (ISS), including launch to the ISS.	China, Russia or Venezuela (see § 742.6(a)(7)).
MT applies to microcircuits in 9A515.d and 9A515.e.2 when “usable in” “missiles” for protecting “missiles” against nuclear effects (e.g., Electromagnetic Pulse (EMP), X-rays, combined blast and thermal effects). MT also applies to 9A515.h when the total impulse capacity is equal to or greater than 8.41x10 <sup>5</sup> newton seconds.	MT Column 1
AT applies to entire entry	AT Column 1

**License Requirement Note:** The Commerce Country Chart is not used for determining license requirements for commodities classified in ECCN 9A515.a.1, .a.2, .a.3, .a.4, and .g. See § 742.6(a)(9), which

*specifies that such commodities are subject to a worldwide license requirement.*

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*LVS:* \$1500

*GBS:* N/A

### Special Conditions for STA

*STA:* (1) Paragraph (c)(1) of License Exception STA (§ 740.20(c)(1) of the EAR) may not be used for “spacecraft” in ECCNs 9A515.a.1, .a.2, .a.3, or .a.4, “sub-orbital craft,” or items in 9A515.g, unless determined by BIS to be eligible for License Exception STA in accordance with § 740.20(g) (License Exception STA eligibility requests for certain 9x515 and “600 series” items). (2) License Exception STA may not be used if the “spacecraft” controlled in ECCN 9A515.a.1, .a.2, .a.3, or .a.4 contains a separable or removable propulsion system enumerated in USML Category IV(d)(2) or USML Category XV(e)(12) and designated MT. (3) Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 9A515.

### List of Items Controlled

*Related Controls:* Spacecraft, launch vehicles and related articles that are enumerated in the USML, and technical data (including “software”) directly related thereto, and all services (including training) directly related to the integration of any satellite or spacecraft to a launch vehicle, including both planning and onsite support, or furnishing any assistance (including training) in the launch failure analysis or

investigation for items in ECCN 9A515.a, are “subject to the ITAR.” All other “spacecraft,” as enumerated below and defined in § 772.1, are subject to the controls of this ECCN. See also ECCNs 3A001, 3A002, 3A991, 3A992, 6A002, 6A004, 6A008, and 6A998 for specific “space-qualified” items, 7A004 and 7A104 for star trackers, and [9A004](#) for the International Space Station (ISS), the James Webb Space Telescope (JWST), and “specially designed” “parts” and “components” therefor. See USML Category XI(c) for controls on “Monolithic Microwave Integrated Circuit” (“MMIC”) amplifiers that are “specially designed” for defense articles. See ECCN [9A610.g](#) for pressure suits used for high altitude aircraft.

*Related Definitions:* ‘Microcircuit’ means a device in which a number of passive or active elements are considered as indivisibly associated on or within a continuous structure to perform the function of a circuit.

#### *Items:*

“Spacecraft” and other items described in ECCN 9A515 remain subject to the EAR even if exported, reexported, or transferred (in-country) with defense articles “subject to the ITAR” integrated into and included therein as integral parts of the item. In all other cases, such defense articles are subject to the ITAR. For example, a 9A515.a “spacecraft” remains “subject to the EAR” even when it is exported, reexported, or transferred (in-country) with a “hosted payload” described in USML Category XV(e)(17) incorporated therein. In all other cases, a “hosted payload” performing a function described in USML Category XV(a) always remains a USML item. The removal of the defense article subject to the ITAR from the spacecraft is a retransfer under the ITAR and would require an ITAR authorization, regardless of the CCL authorization the spacecraft is exported under. Additionally, transfer of

technical data regarding the defense article subject to the ITAR integrated into the spacecraft would require an ITAR authorization.

a. “Spacecraft,” including satellites, and space vehicles and “sub-orbital craft,” whether designated developmental, experimental, research or scientific, not enumerated in USML Category XV or described in ECCN 9A004.u or .w, that:

a.1. Have electro-optical remote sensing capabilities and having a clear aperture greater than 0.35 meters, but less than or equal to 0.50 meters;

a.2. Have remote sensing capabilities beyond NIR (*i.e.*, SWIR, MWIR, or LWIR);

a.3. Have radar remote sensing capabilities (*e.g.*, AESA, SAR, or ISAR) having a center frequency equal to or greater than 1.0 GHz, but less than 10.0 GHz and having a bandwidth equal to or greater than 100 MHz, but less than 300 MHz;

a.4. Provide space-based logistics, assembly, or servicing of another “spacecraft”; *or*

a.5. Are not described in ECCN 9A515.a.1, .a.2, .a.3 or .a.4.

*Note: ECCN 9A515.a includes commercial communications satellites, remote sensing satellites, planetary rovers, planetary and interplanetary probes, in-space habitats, and “sub-orbital craft,” not identified in ECCN 9A004 or USML Category XV(a).*

b. Ground control systems and training simulators “specially designed” for telemetry, tracking, and control of the “spacecraft” controlled in paragraphs 9A004.u or 9A515.a.

c. [Reserved]

d. Microelectronic circuits (*e.g.*, integrated circuits, microcircuits, or MOSFETs) and discrete electronic components rated, certified, or otherwise specified or described as meeting or exceeding all the following characteristics and that are “specially designed” for defense articles, “600 series” items, or items controlled by ECCNs 9A004.v or 9A515:

d.1. A total dose of  $5 \times 10^5$  Rads (Si) ( $5 \times 10^3$  Gy (Si));

d.2. A dose rate upset threshold of  $5 \times 10^8$  Rads (Si)/sec ( $5 \times 10^6$  Gy (Si)/sec);

d.3. A neutron dose of  $1 \times 10^{14}$  n/cm<sup>2</sup> (1 MeV equivalent);

d.4. An uncorrected single event upset sensitivity of  $1 \times 10^{-10}$  errors/bit/day or less, for the CRÈME-MC geosynchronous orbit, Solar Minimum Environment for heavy ion flux; and

d.5. An uncorrected single event upset sensitivity of  $1 \times 10^{-3}$  errors/part or less for a fluence of  $1 \times 10^7$  protons/cm<sup>2</sup> for proton energy greater than 50 MeV.

e. Microelectronic circuits (*e.g.*, integrated circuits, microcircuits, or MOSFETs) and discrete electronic components that are rated, certified, or otherwise specified or described as meeting or exceeding the characteristics in either paragraph e.1 or e.2, AND “specially designed” for defense articles controlled by USML Category XV or items controlled by ECCNs 9A004.u or 9A515:

e.1. A total dose  $\geq 1 \times 10^5$  Rads (Si) ( $1 \times 10^3$  Gy(Si)) and  $< 5 \times 10^5$  Rads (Si) ( $5 \times 10^3$  Gy(Si)); and a single event effect (SEE) (*i.e.*, single event latchup (SEL), single event burnout (SEB), or single event gate rupture (SEGR)) immunity to a linear energy transfer (LET)  $\geq 80$  MeV-cm<sup>2</sup>/mg; *or*

e.2. A total dose  $\geq 5 \times 10^5$  Rads (Si) ( $5 \times 10^3$  Gy (Si)) and not described in 9A515.d.

*Note 1 to 9A515.d and .e:* Application specific integrated circuits (ASICs), integrated circuits developed and produced for a specific application or function, specifically designed or modified for defense articles and not in normal commercial use are controlled by Category XI(c) of the USML regardless of characteristics.

*Note 2 to 9A515.d and .e:* See 3A001.a for controls on radiation-hardened microelectronic circuits “subject to the EAR” that are not controlled by 9A515.d or 9A515.e.

f. Pressure suits (*i.e.*, space suits) capable of operating at altitudes 55,000 feet above sea level.

g. Remote sensing components “specially designed” for “spacecraft” described in ECCNs 9A515.a.1 through 9A515.a.4 as follows:

g.1. Space-qualified optics (*i.e.*, lens, mirror, membrane having active properties (*e.g.*, adaptive, deformable)) with the largest lateral clear aperture dimension equal to or less than 0.35 meters; or with the largest clear aperture dimension greater than 0.35 meters but less than or equal to 0.50 meters;

g.2. Optical bench assemblies “specially designed” for ECCN 9A515.a.1, 9A515.a.2, 9A515.a.3, or 9A515.a.4 “spacecraft;” *or*

g.3. Primary, secondary, or hosted payloads that perform a function of ECCN 9A515.a.1, 9A515.a.2, 9A515.a.3, or 9A515.a.4 “spacecraft.”

h. Spacecraft thrusters using bi-propellants or mono-propellants that provide thrust equal to or less than 150 lbf (*i.e.*, 667.23 N) vacuum thrust.

i. through w. [RESERVED]

x. “Parts,” “components,” “accessories” and “attachments” that are “specially designed” for defense articles controlled by USML Category XV or items controlled by 9A515, and that are NOT:

x.1. Enumerated or controlled in the USML or elsewhere within ECCNs 9A515 or 9A004;

x.2. Microelectronic circuits and discrete electronic components;

x.3. Described in ECCNs 7A004 or 7A104;

x.4. Described in an ECCN containing “space-qualified” as a control criterion (*i.e.*, 3A001.b.1, 3A001.e.4, 3A002.g.1, 3A991.o, 3A992.b.3, 6A002.a.1, 6A002.b.2, 6A002.d.1, 6A004.c and .d, 6A008.j.1, 6A998.b, or 7A003.d.2);

x.5. Microwave solid state amplifiers and microwave assemblies (refer to ECCN 3A001.b.4 for controls on these items);

x.6. Travelling wave tube amplifiers (refer to ECCN 3A001.b.8 for controls on these items); *or*

x.7. Elsewhere specified in ECCN 9A515.y.

*Note to 9A515.x:* “Parts,” “components,” “accessories,” and “attachments” specified in USML subcategory XV(e) or enumerated in other USML categories are subject to the controls of that paragraph or category.

y. Items that would otherwise be within the scope of ECCN 9A515.x but that have been identified in an interagency-cleared commodity classification (CCATS) pursuant to § 748.3(e) as warranting control in 9A515.y.

y.1. Discrete electronic components not specified in 9A515.e;

y.2. Space grade or for spacecraft applications thermistors;

y.3. Space grade or for spacecraft applications RF microwave bandpass ceramic filters (Dielectric Resonator Bandpass Filters);

y.4. Space grade or for spacecraft applications hall effect sensors;

y.5. Space grade or for spacecraft applications subminiature (SMA and SMP) plugs and connectors, TNC plugs and cable and connector assemblies with SMA plugs and connectors; *and*

y.6. Space grade or for spacecraft applications flight cable assemblies.

**\*\*9A604** Commodities related to launch vehicles, missiles, and rockets (see List of Items Controlled).

GBS: N/A

**Special Conditions for STA**

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in this ECCN 9A604.

**List of Items Controlled**

*Related Controls:* (1) Launch vehicles, missiles, and rockets are subject to the ITAR (see 22 CFR § 121.1, USML Category IV). (2) See ECCN 0A919 for foreign-made “military commodities” that incorporate more than a *de minimis* amount of U.S.-origin “600 series” controlled content.

*Related Definitions:* N/A

*Items:*

a. Thermal batteries “specially designed” for systems controlled under USML Category IV capable of a range equal to or greater than 300 km.

b. Thermal batteries, except for thermal batteries controlled by 9A604.a, that are “specially designed” for systems controlled under USML Category IV.

c. “Components” “specially designed” for ramjet, scramjet, pulse jet, or combined cycle engines controlled under USML Category IV, including devices to regulate combustion in such commodities.

d. “Components” “specially designed” for hybrid rocket motors controlled under USML Category IV usable in rockets, missiles, or unmanned aerial vehicles capable of a range equal to or greater than 300 km.

e. “Components” “specially designed” for pressure gain combustion-based propulsion systems controlled under USML Category IV.

f. Composite structures, laminates and manufactures thereof “specially designed” for the following items controlled under USML

Category IV:

f.1. Systems capable of a range equal to or greater than 300 km;

f.2. Individual rocket stages usable in 9A604.f.1 systems;

f.3. Solid propellant rocket motors or hybrid rocket motors having a total impulse capacity equal to or greater than 8.41 x 10<sup>5</sup> Ns; or

f.4. Liquid propellant rocket engines integrated, or designed or modified to be integrated, into a liquid propellant propulsion system which has a total impulse capacity equal to or greater than 8.41 x 10<sup>5</sup> Ns.

f.5. Thrust vector control systems usable in rockets, space launch vehicles (SLVs), and missiles capable of delivering at least a 500 kg payload to a range of at least 300 km.

f.6. Re-entry vehicles or warhead heat shields usable in rockets, SLVs, and missiles capable of delivering at least a 500 kg payload to a range of at least 300 km.

f.7. Safing, arming, fuzing, and firing components usable in rockets, SLVs, and missiles capable of delivering at least a 500 kg payload to a range of at least 300 km.

g. through w. [Reserved]

x. "Parts," "components," "accessories," and "attachments" that are "specially designed" for a commodity subject to control in paragraphs .a through .d of this ECCN, or a defense article controlled under USML Category IV, and not specified elsewhere on the USML.

*Note to 9A604.x: "Parts," "components," "accessories," and "attachments" specified in USML Category IV(h) are subject to the controls of that paragraph.*

LVS: \$1500  
GBS: N/A

**Special Conditions for STA**

STA: (1) Paragraph (c)(1) of License

Exception STA (§ 740.20(c)(1) of the EAR) may not be used for any item in 9A610.a (i.e., “end item” military aircraft), unless determined by BIS to be eligible for License Exception STA in accordance with § 740.20(g) (License Exception STA eligibility requests for 9x515 and “600 series” items). (2) Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 9A610.

### List of Items Controlled

*Related Controls:* (1) Military aircraft and related articles that are enumerated in USML Category VIII, and technical data (including software) directly related thereto, are subject to the ITAR. (2) See ECCN 0A919 for controls on foreign-made “military commodities” that incorporate more than a *de minimis* amount of U.S.-origin “600 series” controlled content. (3) See USML Category XIX and ECCN 9A619 for controls on military aircraft gas turbine engines and related items.

*Related Definitions:* In paragraph .y of this entry, the term ‘fluid’ includes liquids and gases.

*Items:*

a. ‘Military Aircraft’ “specially designed” for a military use that are not enumerated in USML paragraph VIII(a).

*Note 1:* For purposes of paragraph .a the term ‘military aircraft’ means the LM-100J aircraft and any aircraft “specially designed” for a military use that are not enumerated in USML paragraph VIII(a). The term includes: Trainer aircraft; cargo aircraft; utility fixed wing aircraft; military helicopters; observation aircraft; military non-expansive balloons and other lighter-than-air aircraft; and unarmed military aircraft, regardless of origin or designation. Aircraft with modifications made to

incorporate safety of flight features or other FAA or NTSB modifications such as transponders and air data recorders are “unmodified” for the purposes of this paragraph .a.

*Note 2:* 9A610.a does not control ‘military aircraft’ or “lighter-than-air vehicles” that:

a. Were first manufactured before 1946;

b. Do not incorporate defense articles enumerated or otherwise described on the U.S. Munitions List, unless the items are required to meet safety or airworthiness standards of civil aviation authorities of a Wassenaar Arrangement Participating State; and

c. Do not incorporate weapons enumerated or otherwise described on the U.S. Munitions List, unless inoperable and incapable of being returned to operation.

b. L-100 aircraft manufactured prior to 2013.

c. - d. [Reserved]

e. Mobile aircraft arresting and engagement runway systems for aircraft controlled by either USML Category VIII(a) or ECCN 9A610.a.

f. Pressure refueling equipment and equipment that facilitates operations in confined areas, “specially designed” for aircraft controlled by either USML paragraph VIII(a) or ECCN 9A610.a.

g. Aircrew life support equipment, aircrew safety equipment and other devices for emergency escape from aircraft controlled by either USML paragraph VIII(a) or ECCN 9A610.a.

h. Parachutes, paragliders, complete parachute canopies, harnesses, platforms, electronic release mechanisms, “specially designed” for use with aircraft controlled by either USML paragraph VIII(a) or ECCN 9A610.a, and “equipment” “specially designed” for military high altitude

parachutists, such as suits, special helmets, breathing systems, and navigation equipment.

i. Controlled opening equipment or automatic piloting systems, designed for parachuted loads.

j. Ground effect machines (GEMS), including surface effect machines and air cushion vehicles, “specially designed” for use by a military.

k. through s. [Reserved]

t. Composite structures, laminates, and manufactures thereof “specially designed” for unmanned aerial vehicles controlled under USML Category VIII(a) with a range equal to or greater than 300 km.

*Note to paragraph .t:* Composite structures, laminates, and manufactures thereof “specially designed” for unmanned aerial vehicles controlled under USML Category VIII(a) with a maximum range less than 300 km are controlled in paragraph .x of this entry.

u. Apparatus and devices “specially designed” for the handling, control, activation and non-ship-based launching of UAVs controlled by either USML paragraph VIII(a) or ECCN 9A610.a, and capable of a range equal to or greater than 300 km.

*Note to paragraph .u:* Apparatus and devices “specially designed” for the handling, control, activation and non-ship-based launching of UAVs controlled by either USML paragraph VIII(a) or ECCN 9A610.a with a maximum range less than 300 km are controlled in paragraph .x of this entry.

v. Radar altimeters designed or modified for use in UAVs controlled by either USML paragraph VIII(a) or ECCN 9A610.a, and capable of delivering at least 500 kilograms payload to a range of at least 300 km.

*Note to paragraph .v:* Radar altimeters designed or modified for use in UAVs controlled

by either USML paragraph VIII(a) or ECCN 9A610.a that are not capable of delivering at least 500 kilograms payload to a range of at least 300 km are controlled in paragraph .x of this entry.

w.1. Pneumatic hydraulic, mechanical, electro-optical, or electromechanical flight control systems (including fly-by-wire and fly-by-light systems) and attitude control equipment designed or modified for UAVs controlled by either USML paragraph VIII(a) or ECCN 9A610.a, and capable of delivering at least 500 kilograms payload to a range of at least 300 km.

*Note to paragraph .w.1:* Pneumatic, hydraulic, mechanical, electro-optical, or electromechanical flight control systems (including fly-by-wire and fly-by-light systems) and attitude control equipment designed or modified for UAVs controlled by either USML paragraph VIII(a) or ECCN 9A610.a, not capable of delivering at least 500 kilograms payload to a range of at least 300 km are controlled in paragraph .x of this entry.

w.2. Flight control servo valves designed or modified for the systems in 9A610.w.1 and designed or modified to operate in a vibration environment greater than 10g rms over the entire range between 20Hz and 2 kHz.

*Note to paragraph .w:* Paragraphs 9A610.w.1. and 9A610.w.2. include the systems, equipment and valves designed or modified to enable operation of manned aircraft as unmanned aerial vehicles.

**x.** “Parts,” “components,” “accessories,” and “attachments” that are “specially designed” for a commodity enumerated or otherwise described in ECCN 9A610 (except for 9A610.y) or a defense article enumerated or otherwise described in USML Category VIII and not elsewhere specified on the USML or in 9A610.y, 9A619.y, or 3A611.y.

y. Specific “parts,” “components,” “accessories,” and “attachments” “specially designed” for a commodity subject to control in this entry, ECCN 9A619, or for a defense article in USML Categories VIII or XIX and not elsewhere specified in the USML or the CCL, and other aircraft commodities “specially designed” for a military use, as follows, and “parts,” “components,” “accessories,” and “attachments” “specially designed” therefor:

- y.1. Aircraft tires;
- y.2. Analog gauges and indicators;
- y.3. Audio selector panels;
- y.4. Check valves for hydraulic and pneumatic systems;
- y.5. Crew rest equipment;
- y.6. Ejection seat mounted survival aids;
- y.7. Energy dissipating pads for cargo (for pads made from paper or cardboard);
- y.8. Fluid filters and filter assemblies;
- y.9. Galleys;
- y.10. Fluid hoses, straight and unbent lines (for a commodity subject to control in this entry or defense article in USML Category VIII), and fittings, couplings, clamps (for a commodity subject to control in this entry or defense article in USML Category VIII) and brackets therefor;
- y.11. Lavatories;
- y.12. Life rafts;
- y.13. Magnetic compass, magnetic azimuth detector;
- y.14. Medical litter provisions;
- y.15. Cockpit or cabin mirrors;

- y.16. Passenger seats including palletized seats;
- y.17. Potable water storage systems;
- y.18. Public address (PA) systems;
- y.19. Steel brake wear pads (does not include sintered mix or carbon/carbon materials);
- y.20. Underwater locator beacons;
- y.21. Urine collection bags/pads/cups/pumps;
- y.22. Windshield washer and wiper systems;
- y.23. Filtered and unfiltered panel knobs, indicators, switches, buttons, and dials;
- y.24. Lead-acid and Nickel-Cadmium batteries;
- y.25. Propellers, propeller systems, and propeller blades used with reciprocating engines;
- y.26. Fire extinguishers;
- y.27. Flame and smoke/CO<sub>2</sub> detectors;
- y.28. Map cases;
- y.29. ‘Military Aircraft’ that were first manufactured from 1946 to 1955 that do not incorporate defense articles enumerated or otherwise described on the U.S. Munitions List, unless the items are required to meet safety or airworthiness standards of a Wassenaar Arrangement Participating State; and do not incorporate weapons enumerated or otherwise described on the U.S. Munitions List, unless inoperable and incapable of being returned to operation;
- y.30. “Parts,” “components,” “accessories,” and “attachments,” other than electronic items or navigation equipment, for use in or with a commodity controlled by ECCN 9A610.h;
- y.31. Identification plates and nameplates; *and*

y.32. Fluid manifolds.

**\*\*9A619 Military gas turbine engines and related commodities (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, RS, AT, UN

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>

RS applies to 9A619.y.	China, Russia or Venezuela (see § 742.6(a)(7)).
AT applies to entire entry	AT Column 1
UN applies to entire entry except 9A619.y	See § 746.1(b) for UN controls

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

LVS: \$1,500

GBS: N/A

**Special Conditions for STA**

**STA:** Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in ECCN 9A619.

**List of Items Controlled**

*Related Controls:* (1) Military gas turbine engines and related articles that are enumerated or otherwise described in USML Category XIX, and technical data (including software) directly related thereto, are subject to the jurisdiction of the

International Traffic in Arms Regulations (ITAR). (2) Gas turbine engines designated 501-D22 are controlled in ECCN 9A991.d regardless of the aircraft type into which they will be installed. (3) See ECCN 0A919 for foreign-made “military commodities” that incorporate more than a de minimis amount of U.S.-origin “600 series” controlled content. (4) “Parts,” “components,” “accessories,” and “attachments” specified in USML Category XIX(f) are subject to the controls of that paragraph. (5) “Parts,” “components,” “accessories,” and “attachments” specified in ECCN 9A619.y are subject to the controls of that paragraph.

*Related Definitions:* In paragraph .y of this entry, the term ‘fluid’ includes liquids and gases.

*Items:*

a. “Military Gas Turbine Engines” “specially designed” for a military use that are not controlled in USML Category XIX(a), (b), (c), or (d).

*Note:* For purposes of ECCN 9A619.a, the term “military gas turbine engines” means gas turbine engines “specially designed” for “end items” enumerated in USML Categories VI, VII or VIII or on the CCL under ECCNs 0A606, 8A609 or 9A610.

b. Digital engine controls (e.g., Full Authority Digital Engine Controls (FADEC) and Digital Electronic Engine Controls (DEEC)) “specially designed” for gas turbine engines controlled in this ECCN 9A619.

c. If “specially designed” for gas turbine engines controlled in 9A619.a, hot section components (i.e., combustion chambers and liners; high pressure turbine blades, vanes, disks and related cooled structure; cooled low pressure turbine blades, vanes, disks and related cooled structure; cooled augmenters; and cooled nozzles);

d. If “specially designed” for gas turbine engines controlled in 9A619.a, uncooled turbine blades, vanes, disks, and tip shrouds;

e. If “specially designed” for gas turbine engines controlled in 9A619.a, combustor cowls, diffusers, domes, and shells;

f. Engine monitoring systems (i.e., those that conduct prognostics, diagnostics, and monitor health) “specially designed” for gas turbine engines and components controlled in this ECCN 9A619.

g. through w. [RESERVED]

**x.** Parts,” “components,” “accessories,” and “attachments” that are “specially designed” for a commodity controlled by this ECCN 9A619 (other than ECCN 9A619.c) or for a defense article enumerated in USML Category XIX and not specified elsewhere on the USML or in ECCN 3A611.y, 9A610.y or 9A619.y.

*Note to paragraph .x:* “Parts,” “components,” “accessories,” and “attachments” specified in USML subcategory XIX(f) are subject to the controls of that paragraph. “Parts,” “components,” “accessories,” and “attachments” specified in ECCN 3A611.y, 9A610.y or 9A619.y are subject to the controls of that paragraph.

**y.** Specific “parts,” “components,” “accessories,” and “attachments” “specially designed” for a commodity subject to control in this entry, ECCN 9A610, or for a defense article in USML Category VIII or Category XIX and not elsewhere specified on the USML or in the CCL, and other commodities, as follows, and “parts,” “components,” “accessories,” and “attachments” “specially designed” therefor:

y.1. Oil tank and reservoirs;

y.2. Oil lines and tubes;

y.3. Fluid hoses, and lines (for a commodity subject to control in this entry or a defense article in USML Category XIX), fittings, couplings, and brackets therefor;

y.4. Fluid filters and filter assemblies;

y.5. Clamps (for a commodity subject to control in this entry or a defense article in USML Category XIX);

y.6. Shims;

y.7. Identification plates and nameplates;

y.8. Fluid manifolds; and

y.9. Check valves for fluid systems.

**\*\*9A620** Cryogenic and “superconductive” equipment, as follows (see list of items controlled).

**License Requirements**

*Reason for Control:* NS, RS, AT, UN

**List Based License Exceptions** (see Part 740 for a description of all license exceptions)

LVS: \$1500.

GBS: N/A

**Special Conditions for STA**

STA: Paragraph (c)(2) of License Exception STA (§740.20(c)(2) of the

EAR) may not be used for any item in 9A620.

**List of Items Controlled**

*Related Controls:* Electronic items that are enumerated in USML Category XI or other USML categories, and technical data (including software) directly related thereto, are subject to the ITAR.

*Related Definitions:* N/A

*Items:*

a. Equipment “specially designed” to be installed in a vehicle for military ground, marine, airborne, or space applications, and capable of operating while in motion and of producing or maintaining temperatures below 103 K (–170 °C).

*Note to 9A620.a:* ECCN 9A620.a includes mobile systems incorporating or employing “accessories” or “components” manufactured from non-metallic or non-electrical conductive materials such as plastics or epoxy-impregnated materials.

b. “Superconductive” electrical equipment (rotating machinery and transformers) “specially designed” to be installed in a vehicle for military ground, marine, airborne, or space applications, and capable of operating while in motion.

c. through w. [Reserved].

x. “Parts,” “components,” “accessories” and “attachments” that are “specially designed” for a commodity controlled by ECCN 9A620.

*Note to 9A620.b:* Forgings, castings, and other unfinished products, such as extrusions and machined bodies, that have reached a stage in manufacture where they are clearly identifiable by mechanical properties, material composition, geometry, or function as commodities controlled by ECCN 9A620.x are controlled by ECCN 9A620.x.

**\*\*9A980 Nonmilitary mobile crime science laboratories; and parts and “accessories,” n.e.s.**

*Heading Note:* In order for a vehicle to be classified as a nonmilitary mobile crime scene laboratory under ECCN 9A980, the vehicle must contain one or more analytical or laboratory items controlled for Crime Control (CC) reasons on the CCL, such as ECCNs 3A980 and 3A981.

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

a. Military aircraft, demilitarized (not specifically equipped or modified for military operation), as follows:

a.1 Cargo aircraft bearing “C” designations and numbered C-45 through C-118 inclusive, C-121 through C-125 inclusive, and C-131, using reciprocating engines only.

a.2 Trainer aircraft bearing “T” designations and using reciprocating engines or turboprop engines with less than 600 horsepower (s.h.p.).

a.3 Utility aircraft bearing “U” designations and using reciprocating engines only.

a.4 All liaison aircraft bearing an “L” designation.

a.5 All observation aircraft bearing “O” designations and using reciprocating engines.

b. Aircraft n.e.s.;

c. Aero gas turbine engines, and “parts” and “components” “specially designed” therefor.

*Note:* 9A991.c does not control aero gas turbine engines that are destined for use in civil “aircraft” and that have been in use in bona fide

civil “aircraft” for more than eight years. If they have been in use in bona fide civil “aircraft” for more than eight years, such engines are controlled under 9A991.d.

d. “Parts” and “components,” “specially designed” for “aircraft,” n.e.s.

e. Pressurized aircraft breathing equipment, n.e.s.; and “parts” and “components” “specially designed” therefor, n.e.s.

**\*\*9A992** Complete canopies, harnesses, and platforms and electronic release mechanisms therefor, except such types as are in normal sporting use.

a.1. Capable of simulating any of the following flight conditions:

a.1.a. Altitude equal to or greater than 15,000 m; or

a.1.b. Temperature range from below -50° C to above 125° C; and

a.2. Incorporating, or designed or modified to incorporate, a shaker unit or other vibration test equipment to produce vibration environments equal to or greater than 10 g rms, measured ‘bare table,’ between 20 Hz and 2 kHz while imparting forces equal to or greater than 5 kN;

**Technical Notes:**

1. *Item 9B106.a.2 describes systems that are capable of generating a vibration environment with a single wave (e.g., a sine wave) and systems capable of generating a broad band random vibration (i.e., power spectrum).*

2. *The term ‘bare table’ means a flat table, or surface, with no fixture or fittings.*

3. *In Item 9B106.a.2, designed or modified means the environmental chamber provides appropriate interfaces (e.g., sealing devices) to incorporate a shaker unit or other vibration test equipment as specified in this Item.*

b. Environmental chambers capable of simulating all of the following flight conditions:

b.1. Acoustic environments at an overall sound pressure level of 140 dB or greater (referenced to 2 x 10<sup>-5</sup> N/m<sup>2</sup>) or with a total rated acoustic power output of 4kW or greater; and

b.2. Any of the following:

b.2.a. Altitude equal to or greater than 15,000 m; or

b.2.b. Temperature range of at least -50° C to +125° C.

**\*\*9B115** “Specially designed” “production equipment” for systems, sub-systems, and “components” controlled by ECCN 9A101 or by USML Category IV(d)(2), (d)(3), (d)(4), or (h)(17).

The list of items controlled is contained in the ECCN heading.

**\*\*9D003** “Software” incorporating “technology” specified by ECCN 9E003.h and used in “FADEC Systems” for systems controlled by ECCN 9A001 to 9A003, 9A101 (except for items in 9A101.b that are “subject to the ITAR”, see 22 CFR part 121), 9A106.d or .e, or 9B (except for ECCNs 9B604, 9B610, 9B619, 9B990, and 9B991).

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**License Requirements**

*Reason for Control:* NS, MT, AT

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* N/A.

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to “software” for “use” of “FADEC systems” for equipment controlled by 9A001 to 9A003	NS Column 1
MT applies to “software” required for the “use” of “FADEC systems” for gas turbine engines controlled by 9A101, or 9A106.	MT Column 1
AT applies to entire entry	AT Column 1

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship or transmit “software” “specially designed” or modified for the “production” of equipment specified by 9B001.b to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* Yes, except N/A for MT

**List of Items Controlled**

*Related Controls:* “Software” that is “required” for the “production” of items specified in ECCNs 9A005 to 9A011, 9A101.b (except for items that are subject to the EAR), 9A103 to 9A105, 9A106.a, .b, and .c, 9A107 to 9A109, 9A110 (for items

**List of Items Controlled**

*Related Controls:* (1) See also [9D103](#). (2) “Software” “required” for the “use” of equipment specified in ECCNs 9A004 (except for items that are subject to the EAR), 9A005 to 9A011, 9A101.b (except for items that are subject to the EAR), 9A103 to 9A105, 9A106.a, .b, and .c, 9A107 to 9A109, 9A110 (for items that are “specially designed” for use in missile systems and subsystems), and 9A111 to 9A119 is “subject to the ITAR” (see 22 CFR parts 120 through 130). (3) “Software” directly related to defense articles that are “subject to the ITAR” (see 22 CFR parts 120 through 130) is also “subject to the ITAR” (see 22CFR parts 120 through 130).

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*9D004 Other “software” as follows (see List of Items Controlled).**

**License Requirements**

*Reason for Control:* NS, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
AT applies to entire entry	AT Column 1

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* N/A.

**Special Conditions for STA**

*STA:* License Exception STA may not be used to ship or transmit software in 9D004.a and 9D004.c to any of the

destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR)

**List of Items Controlled**

*Related Controls:* See also 9D104.

*Related Definitions:* N/A

*Items:*

a. 2D or 3D viscous “software”, validated with wind tunnel or flight test data required for detailed engine flow modelling;

b. “Software” for testing aero gas turbine engines, assemblies, “parts” or “components”, having all of the following:

b.1. “Specially designed” for testing any of the following:

b.1.a. Aero gas turbine engines, assemblies or components, incorporating “technology” specified by 9E003.a, 9E003.h or 9E003.i; *or*

b.1.b. Multi-stage compressors providing either bypass or core flow, specially designed for aero gas turbine engines incorporating “technology” specified by 9E003.a or 9E003.h; *and*

b.2. “Specially designed” for all of the following:

b.2.a. Acquisition and processing of data, in real time; *and*

b.2.b. Feedback control of the test article or test conditions (*e.g.*, temperature, pressure, flow rate) while the test is in progress;

*Note* 9D004.b does not specify software for operation of the test facility or operator safety (*e.g.*, overspeed shutdown, fire detection and suppression), or production, repair or maintenance acceptance-testing limited to

determining if the item has been properly assembled or repaired.

c. “Software” “specially designed” to control directional solidification or single crystal material growth in equipment specified by 9B001.a or 9B001.c;

d. [RESERVED]

e. “Software” “specially designed” or modified for the operation of items specified by 9A012;

f. “Software” “specially designed” to design the internal cooling passages of aero gas turbine engine blades, vanes and “tip shrouds”;

g. “Software” having all of the following:

g.1. “Specially designed” to predict aero thermal, aeromechanical and combustion conditions in aero gas turbine engines; *and*

g.2. Theoretical modeling predictions of the aero thermal, aeromechanical and combustion conditions, which have been validated with actual turbine engine (experimental or production) performance data.

**\*\*9D005** “Software” specially designed or modified for the operation of items specified by 9A004.e or 9A004.f. (This “software” is controlled by ECCN 9D515)

**\*\*9D018** “Software” for the “use” of equipment controlled by 9A018.

(a) See ECCN 9D610 for “software” related to aircraft, refuelers, ground equipment, parachutes, harnesses, instrument flight trainers and “parts”, “accessories,” and “attachments” for the forgoing that, immediately prior to October 15, 2013, were classified under 9A018.a.1, .a.3, .c, .d, .e, or f.

(b) See ECCN 9D619 for “software” related to

military trainer aircraft turbo prop engines and “parts” and “components” therefor that, immediately prior to October 15, 2013, were classified under ECCN 9A018.a.2 or .a.3.

(c) Software related to certain armored ground transport vehicles that prior to January 6, 2014 were classified under ECCN 9A018.b is EAR99 (See 0D606).

**\*\*9D101** “Software” “specially designed” or modified for the “use” of commodities controlled by 9B104, 9B105, 9B106, 9B116, or 9B117.

**Special Conditions for STA**

*STA:* (1) Paragraph (c)(1) of License Exception STA (§ 740.20(c)(1) of the EAR) may not be used for 9D515.b, .d, or .e. (2) Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any “software” in 9D515.

**List of Items Controlled**

*Related Controls:* “Software” directly related to articles enumerated in USML Category XV is subject to the control of USML paragraph XV(f). See also ECCNs 3D001, 6D001, 6D002, and 6D991 for controls of specific software “specially designed” for certain “space-qualified” items.

*Related Definitions:* N/A

*Items:*

a. “Software” (other than “software” controlled in paragraphs .b, .d, or .e of this entry) “specially designed” for the “development,” “production,” operation, installation, maintenance, repair, overhaul, or refurbishing of commodities controlled by ECCN 9A515 (except 9A515.d or .e) or 9B515.

b. “Source code” that:

b.1. Contains the algorithms or control principles (e.g., for clock management), precise orbit determination (e.g., for ephemeris or pseudo range analysis), signal construct (e.g., pseudo-random noise (PRN) anti-spoofing) “specially designed” for items controlled by ECCN 9A515;

b.2. Is “specially designed” for the integration, operation, or control of items controlled by ECCN 9A515;

b.3. Contains algorithms or modules “specially designed” for system, subsystem, component, part, or accessory calibration,

manipulation, or control of items controlled by ECCN 9A515;

b.4. Is “specially designed” for data assemblage, extrapolation, or manipulation of items controlled by ECCN 9A515;

b.5. Contains the algorithms or control laws “specially designed” for attitude, position, or flight control of items controlled in ECCN 9A515; or

b.6. Is “specially designed” for built-in test and diagnostics for items controlled by ECCN 9A515.

c. [Reserved]

d. “Software” “specially designed” for the “development,” “production,” operation, failure analysis or anomaly resolution of commodities controlled by ECCN 9A515.d.

e. “Software” “specially designed” for the “development,” “production,” operation, failure analysis or anomaly resolution of commodities controlled by ECCN 9A515.e.

f. through x. [Reserved]

y. Specific “software” “specially designed” for the “development,” “production,” operation, or maintenance of commodities enumerated in ECCN 9A515.y.

**\*\*9D604** “Software” “specially designed” for the “development,” “production,” operation, or maintenance of commodities controlled by ECCN 9A604 or 9B604 (see **List of Items Controlled**).

### List of Items Controlled

*Related Controls:* Software directly related to articles enumerated or otherwise described in USML Category VIII is subject to the control of USML paragraph VIII(i).

*Related Definitions:* N/A

*Items:*

a. “Software” (other than software controlled in paragraphs .b or .y of this entry) “specially designed” for the “development,” “production,” operation, or maintenance of commodities controlled by ECCN 9A610, ECCN 9B610, or ECCN 9C610.

b. “Software” “specially designed” for the “development” or “production” of any of the following:

b.1. Static structural members;

b.2. Exterior skins, removable fairings, non-removable fairings, radomes, access doors and panels, and in-flight opening doors;

b.3. Control surfaces, leading edges, trailing edges, and leading edge flap seals;

b.4. Leading edge flap actuation system commodities (i.e., power drive units, rotary geared actuators, torque tubes, asymmetry brakes, position sensors, and angle gearboxes) “specially designed” for fighter, attack, or bomber aircraft controlled in USML Category VIII;

b.5. Engine inlets and ducting;

b.6. Fatigue life monitoring systems “specially designed” to relate actual usage to the

analytical or design spectrum and to compute amount of fatigue life “specially designed” for aircraft controlled by either USML subcategory VIII(a) or ECCN 9A610.a, except for Military Commercial Derivative Aircraft;

b.7. Landing gear, and “parts” and “components” “specially designed” therefor, “specially designed” for use in aircraft weighing more than 21,000 pounds controlled by either USML subcategory VIII(a) or ECCN 9A610.a, except for Military Commercial Derivative Aircraft;

b.8. Conformal fuel tanks and “parts” and “components” “specially designed” therefor;

b.9. Electrical “equipment,” “parts,” and “components” “specially designed” for electromagnetic interference (EMI) – i.e., conducted emissions, radiated emissions, conducted susceptibility and radiated susceptibility – protection of aircraft that conform to the requirements of MIL-STD-461;

b.10. HOTAS (Hand-on Throttle and Stick) controls, HOCAS (Hands on Collective and Stick), Active Inceptor Systems (i.e., a combination of Active Side Stick Control Assembly, Active Throttle Quadrant Assembly, and Inceptor Control Unit), rudder pedal assemblies for digital flight control systems, and parts and components “specially designed” therefor;

b.11. Integrated Vehicle Health Management Systems (IVHMS), Condition Based Maintenance (CBM) Systems, and Flight Data Monitoring (FDM) systems;

b.12. Equipment “specially designed” for system prognostic and health management of aircraft;

b.13. Active Vibration Control Systems; or

b.14. Self-sealing fuel bladders “specially designed” to pass a .50 caliber or larger gunfire test (MIL-DTL-5578, MIL-DTL-27422).

c. to x. [Reserved]

y. Specific “software” “specially designed” for the “development,” “production,” operation, or maintenance of commodities enumerated in ECCN 9A610.y.

**\*\*9D619** Software “specially designed” for the “development,” “production,” operation or maintenance of military gas turbine engines and related commodities controlled by 9A619, equipment controlled by 9B619, or materials controlled by 9C619 (see List of Items Controlled).

**List of Items Controlled**

*Related Controls:* Software directly related to articles enumerated or otherwise described in USML Category XIX is subject to the control of USML paragraph XIX(g).

*Related Definitions:* N/A

*Items:*

a. “Software” (other than software controlled in paragraph .b of this entry) “specially designed” for the “development,” “production,” operation, or maintenance of commodities controlled by ECCN 9A619 (except 9A619.y), ECCN 9B619 (except 9B619.y), or ECCN 9C619.

b. “Software” “specially designed” for the “development” or “production” of any of the following:

b.1. Front, turbine center, and exhaust frames;

b.2. Low pressure compressor (i.e., fan) “components” and “parts” as follows: nose cones, casings, blades, vanes, spools, shrouds, blisks, shafts and disks;

b.3. High pressure compressor “components” and “parts” as follows: casings, blades, vanes, spools, shrouds, blisks, shafts, disks, and impellers;

b.4. Combustor “components” and “parts” as follows: casings, fuel nozzles, swirlers, swirler cups, deswirlers, valve injectors, igniters, diffusers, liners, chambers, cowlings, domes and shells;

b.5. High pressure turbine “components” and “parts” as follows: casings, shafts, disks, blades, vanes, nozzles, and tip shrouds;

b.6. Low pressure turbine “components” and “parts” as follows: casings, shafts, disks, blades, vanes, nozzles, and tip shrouds;

b.7. Augmentor “components” and “parts” as follows: casings, flame holders, spray bars, pilot burners, augmentor fuel controls, flaps (external, convergent, and divergent), guide and synchronization rings, and flame detectors and sensors;

b.8. Mechanical “components” and “parts” as follows: fuel metering units and fuel pump metering units, valves (fuel throttle, main metering, oil flow management), heat exchangers (air/air, fuel/air, fuel/oil), debris monitoring (inlet and exhaust), seals (carbon, labyrinth, brush, balance piston, and knife-edge), permanent magnetic alternator and generator, eddy current sensors;

b.9. Torquemeter assembly (i.e., housing, shaft, reference shaft, and sleeve);

b.10. Digital engine control systems (e.g., Full Authority Digital Engine Controls (FADEC) and Digital Electronic Engine Controls (DEEC)) “specially designed” for gas turbine engines controlled in this ECCN; or

b.11. Engine monitoring systems (i.e., prognostics, diagnostics, and health) “specially designed” for gas turbine engines and components controlled in this ECCN.

c. to x. [RESERVED]

y. Specific “software” “specially designed” for the “development,” “production,” operation, or maintenance of commodities enumerated in ECCN 9A619.y or 9B619.y.

*TSR:* N/A

**List of Items Controlled**

*Related Controls:* N/A  
*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**E. “TECHNOLOGY”**

*Note 1: “Development” or “production” “technology” controlled by 9E001 to 9E003 for gas turbine engines remains controlled when used for repair or overhaul. Excluded from 9E001 to 9E003 control are: technical data, drawings or documentation for maintenance activities directly associated with calibration, removal or replacement of damaged or unserviceable line replaceable units, including replacement of whole engines or engine modules.*

*Note 2: USML Category XV(f) and ECCNs 9E001, 9E002 and 9E515 do not control the data transmitted to or from a satellite or “spacecraft,” whether real or simulated, when limited to information about the health, operational status, or measurements or function of, or raw sensor output from, the “spacecraft,” “spacecraft” payload(s), or its associated subsystems or components. Such information is not within the scope of information captured within the definition of “technology” in the EAR for purposes of Category 9 Product Group E. Examples of such information, which are commonly referred to as “housekeeping data,” include (i) system, hardware, component configuration, and operation status information pertaining to temperatures, pressures, power,*

currents, voltages, and battery charges; (ii) “spacecraft” or payload orientation or position information, such as state vector or ephemeris information; (iii) payload raw mission or science output, such as images, spectra, particle measurements, or field measurements; (iv) command responses; (v) accurate timing information; and (vi) link budget data. The act of processing such telemetry data – i.e., converting raw data into engineering units or readable products – or encrypting it does not, in and of itself, cause the telemetry data to become subject to the ITAR or to ECCN 9E515 for purposes of 9A515, or to ECCNs 9E001 or 9E002 for purposes of 9A004. All classified technical data directly related to items controlled in USML Category XV or ECCNs 9A515, and defense services using the classified technical data remains subject to the ITAR. This note does not affect controls in USML XV(f), ECCN 9D515, or ECCN 9E515 on software source code or commands that control a “spacecraft,” payload, or associated subsystems for purposes of 9A515. This note also does not affect controls in ECCNs 9D001, 9D002, 9E001, or 9E002 on software source code or commands that control a “spacecraft,” payload, or associated subsystems for purposes of 9A004.

**\*\*9E001** “Technology” according to the General Technology Note for the “development” of equipment or “software”, controlled by 9A001.b, 9A004, 9A012, 9B (except for ECCNs 9B604, 9B610, 9B619, 9B990 and 9B991), or ECCN 9D001 to 9D004, 9D101, or 9D104.

**License Requirements**

Reason for Control: NS, MT, AT

Control(s)	Country Chart (See Supp. No. 1 to part 738)
------------	--

NS applies to “technology” for items controlled by 9A001.b, 9A004, 9A012, 9B001 to 9B010, 9D001 to 9D004 for NS reasons.	NS Column 1
MT applies to “technology” for items controlled by 9A012, 9B001, 9B002, 9B003, 9B004, 9B005, 9B007, 9B104, 9B105, 9B106, 9B115, 9B116, 9B117, 9D001, 9D002, 9D003, or 9D004 for MT reasons.	MT Column 1
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**Special Conditions for STA**

STA: License Exception STA may not be used to ship or transmit any technology in this entry to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR)

**List of Items Controlled**

Related Controls: (1) See also [9E101](#) and 1E002.f (for controls on “technology” for the repair of controlled structures, laminates or materials). (2) “Technology” required for the “development” of equipment described in ECCNs 9A005 to 9A011 or “software” described in ECCNs 9D103 and 9D105 is “subject to the ITAR.”

*Related Definitions:* N/A  
*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*9E002** “Technology” according to the General Technology Note for the “production” of “equipment” controlled by ECCN 9A001.b, 9A004 or 9B (except for ECCNs 9B117, 9B604, 9B610, 9B619, 9B990, and 9B991).

**License Requirements**

*Reason for Control:* NS, MT, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
MT applies to “technology” for equipment controlled by 9B001, 9B002, 9B003, 9B004, 9B005, 9B007, 9B104, 9B105, 9B106, 9B115 or 9B116 for MT reasons.	MT Column 1
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

*TSR:* N/A

**Special Conditions for STA**

*STA:* License Exception STA may not be

used to ship or transmit any technology in this entry to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* (1) See also 9E102. (2) See also 1E002.f for “technology” for the repair of controlled structures, laminates or materials. (3) “Technology” that is required for the “production” of equipment described in ECCNs 9A005 to 9A011 is “subject to the ITAR.”

*Related Definitions:* N/A

*Items:*

The list of items controlled is contained in the ECCN heading.

**\*\*9E003** Other “technology” as follows (see List of Items Controlled).

**License Requirements**

*Reason for Control:* NS, SI, AT

<i>Control(s)</i>	<i>Country Chart (See Supp. No. 1 to part 738)</i>
NS applies to entire entry	NS Column 1
SI applies to 9E003.a.1 through a.8, .h, .i, and .k.	See §742.14 of the EAR for additional information.
AT applies to entire entry	AT Column 1

**Reporting Requirements**

See § 743.1 of the EAR for reporting requirements for exports under License Exceptions, and Validated End-User authorizations.

**List Based License Exceptions** (See Part 740 for a description of all license exceptions)

TSR: N/A

**Special Conditions for STA**

STA: License Exception STA may not be used to ship or transmit any technology in 9E003.a.1, 9E003.a.2 to a.5, 9E003.a.8, or 9E003.h to any of the destinations listed in Country Group A:6 (See Supplement No.1 to part 740 of the EAR).

**List of Items Controlled**

*Related Controls:* (1) Hot section “technology” specifically designed, modified, or equipped for military uses or purposes, or developed principally with U.S. Department of Defense funding, is “subject to the ITAR” (see 22 CFR parts 120 through 130). (2) “Technology” is subject to the EAR when actually applied to a commercial “aircraft” engine program. Exporters may seek to establish commercial application either on a case-by-case basis through submission of documentation demonstrating application to a commercial program in requesting an export license from the Department of Commerce in respect to a specific export, or in the case of use for broad categories of “aircraft,” engines, “parts” or “components,” a commodity jurisdiction determination from the Department of State.

*Related Definitions:* N/A

*Items:*

a. “Technology” “required” for the “development” or “production” of any of the following gas turbine engine “parts,” “components” or systems:

a.1. Gas turbine blades, vanes or “tip shrouds”, made from Directionally Solidified (DS) or Single Crystal (SC) alloys and having (in the 001 Miller Index Direction) a stress-rupture life exceeding 400 hours at 1,273 K (1,000°C) at a stress of 200 MPa, based on the average property values;

**Technical Note:** *For the purposes of 9E003.a.1, stress-rupture life testing is typically conducted on a test specimen.*

a.2. Combustors having any of the following:

a.2.a. ‘Thermally decoupled liners’ designed to operate at ‘combustor exit temperature’ exceeding 1,883 K (1,610°C);

a.2.b. Non-metallic liners;

a.2.c. Non-metallic shells; or

a.2.d. Liners designed to operate at ‘combustor exit temperature’ exceeding 1,883 K (1,610°C) and having holes that meet the parameters specified by 9E003.c;

**Note:** *The “required” “technology” for holes in 9E003.a.2 is limited to the derivation of the geometry and location of the holes.*

**Technical Notes:**

**1.** *‘Thermally decoupled liners’ are liners that feature at least a support structure designed to carry mechanical loads and a combustion facing structure designed to protect the support structure from the heat of combustion. The combustion facing structure and support structure have independent thermal displacement (mechanical displacement due to thermal load) with respect to one another, i.e. they are thermally decoupled.*

2. 'Combustor exit temperature' is the bulk average gas path total (stagnation) temperature between the combustor exit plane and the leading edge of the turbine inlet guide vane (i.e., measured at engine station T40 as defined in SAE ARP 755A) when the engine is running in a "steady state mode" of operation at the certificated maximum continuous operating temperature.

**N.B.:** See 9E003.c for "technology" "required" for manufacturing cooling holes.

a.3. "Parts" or "components," that are any of the following:

a.3.a. Manufactured from organic "composite" materials designed to operate above 588 K (315°C);

a.3.b. Manufactured from any of the following:

a.3.b.1. Metal "matrix" "composites" reinforced by any of the following:

a.3.b.1.a. Materials controlled by 1C007;

a.3.b.1.b. "Fibrous or filamentary materials" specified by 1C010; or

a.3.b.1.c. Aluminides specified by 1C002.a; or

a.3.b.2. Ceramic "matrix" "composites" specified by 1C007; or

a.3.c. Stators, vanes, blades, tip seals (shrouds), rotating blings, rotating blisks or 'splitter ducts', that are all of the following:

a.3.c.1. Not specified in 9E003.a.3.a;

a.3.c.2. Designed for compressors or fans; and

a.3.c.3. Manufactured from material controlled by 1C010.e with resins controlled by 1C008;

**Technical Note:** A 'splitter duct' performs the initial separation of the air-mass flow between the bypass and core sections of the engine.

a.4. Uncooled turbine blades, vanes or "tip shrouds" designed to operate at a 'gas path temperature' of 1,373 K (1,100°C) or more;

a.5. Cooled turbine blades, vanes or "tip-shrouds", other than those described in 9E003.a.1, designed to operate at a 'gas path temperature' of 1,693 K (1,420°C) or more;

**Technical Note:** 'Gas path temperature' is the bulk average gas path total (stagnation) temperature at the leading edge plane of the turbine component when the engine is running in a "steady state mode" of operation at the certificated or specified maximum continuous operating temperature.

a.6. Airfoil-to-disk blade combinations using solid state joining;

a.7. [Reserved]

a.8. 'Damage tolerant' gas turbine engine rotor "parts" or "components" using powder metallurgy materials controlled by 1C002.b; or

**Technical Note:** 'Damage tolerant' "parts" and "components" are designed using methodology and substantiation to predict and limit crack growth.

a.9. [Reserved]

**N.B.:** For "FADEC systems", see 9E003.h.

a.10. [Reserved]

*N.B.:* For adjustable flow path geometry, see 9E003.i.

- a.11. Hollow fan blades;
- b. “Technology” “required” for the “development” or “production” of any of the following:
  - b.1. Wind tunnel aero-models equipped with non-intrusive sensors capable of transmitting data from the sensors to the data acquisition system; or
  - b.2. “Composite” propeller blades or prop-fans, capable of absorbing more than 2,000 kW at flight speeds exceeding Mach 0.55;
- c. “Technology” “required” for manufacturing cooling holes, in gas turbine engine “parts” or “components” incorporating any of the “technologies” specified by 9E003.a.1, 9E003.a.2 or 9E003.a.5, and having any of the following:
  - c.1. Having all of the following:
    - c.1.a. Minimum ‘cross-sectional area’ less than 0.45 mm<sup>2</sup>;
    - c.1.b. ‘Hole shape ratio’ greater than 4.52; and
    - c.1.c. ‘Incidence angle’ equal to or less than 25°; or
  - c.2. Having all of the following:
    - c.2.a. Minimum ‘cross-sectional area’ less than 0.12 mm<sup>2</sup>;
    - c.2.b. ‘Hole shape ratio’ greater than 5.65; and
    - c.2.c. ‘Incidence angle’ more than 25°;

*Note:* 9E003.c does not apply to “technology” for manufacturing constant radius cylindrical holes that are straight through and enter and exit on the external surfaces of the component.

**Technical Notes:**

1. For the purposes of 9E003.c, the ‘cross-sectional area’ is the area of the hole in the plane perpendicular to the hole axis.

2. For the purposes of 9E003.c, ‘hole shape ratio’ is the nominal length of the axis of the hole divided by the square root of its minimum ‘cross-sectional area’.

3. For the purposes of 9E003.c, ‘incidence angle’ is the acute angle measured between the plane tangential to the airfoil surface and the hole axis at the point where the hole axis enters the airfoil surface.

4. Techniques for manufacturing holes in 9E003.c include “laser” beam machining, water jet machining, Electro-Chemical Machining (ECM) or Electrical Discharge Machining (EDM).

d. “Technology” “required” for the “development” or “production” of helicopter power transfer systems or tilt rotor or tilt wing “aircraft” power transfer systems;

e. “Technology” for the “development” or “production” of reciprocating diesel engine ground vehicle propulsion systems having all of the following:

- e.1. ‘Box volume’ of 1.2 m<sup>3</sup> or less;
- e.2. An overall power output of more than 750 kW based on 80/1269/EEC, ISO 2534 or national equivalents; and
- e.3. Power density of more than 700 kW/m<sup>3</sup> of ‘box volume’;

**Technical Note:** ‘Box volume’ is the product of three perpendicular dimensions measured in the following way:

*Length:* The length of the crankshaft from front flange to flywheel face;

*Width:* The widest of any of the following:

a. The outside dimension from valve cover to valve cover;

b. The dimensions of the outside edges of the cylinder heads; or

c. The diameter of the flywheel housing;

*Height:* The largest of any of the following:

a. The dimension of the crankshaft center-line to the top plane of the valve cover (or cylinder head) plus twice the stroke; or

b. The diameter of the flywheel housing.

f. “Technology” “required” for the “production” of “specially designed” “parts” or “components” for high output diesel engines, as follows:

f.1. “Technology” “required” for the “production” of engine systems having all of the following “parts” and “components” employing ceramics materials controlled by 1C007:

f.1.a Cylinder liners;

f.1.b. Pistons;

f.1.c. Cylinder heads; *and*

f.1.d. One or more other “part” or “component” (including exhaust ports, turbochargers, valve guides, valve assemblies or insulated fuel injectors);

f.2. “Technology” “required” for the “production” of turbocharger systems with single-stage compressors and having all of the following:

f.2.a. Operating at pressure ratios of 4:1 or higher;

f.2.b. Mass flow in the range from 30 to 130 kg per minute; *and*

f.2.c. Variable flow area capability within the compressor or turbine sections;

f.3. “Technology” “required” for the “production” of fuel injection systems with a “specially designed” multifuel (*e.g.*, diesel or jet fuel) capability covering a viscosity range from diesel fuel (2.5 cSt at 310.8 K (37.8°C)) down to gasoline fuel (0.5 cSt at 310.8 K (37.8°C)) and having all of the following:

f.3.a. Injection amount in excess of 230 mm<sup>3</sup> per injection per cylinder; *and*

f.3.b. Electronic control features “specially designed” for switching governor characteristics automatically depending on fuel property to provide the same torque characteristics by using the appropriate sensors;

g. “Technology” “required” for the development” or “production” of ‘high output diesel engines’ for solid, gas phase or liquid film (or combinations thereof) cylinder wall lubrication and permitting operation to temperatures exceeding 723 K (450°C), measured on the cylinder wall at the top limit of travel of the top ring of the piston;

**Technical Note:** ‘High output diesel engines’ are diesel engines with a specified brake mean effective pressure of 1.8 MPa or more at a speed of 2,300 r.p.m., provided the rated speed is 2,300 r.p.m. or more.

h. “Technology” for gas turbine engine “FADEC systems” as follows:

h.1. “Development” “technology” for deriving the functional requirements for the “parts” or “components” necessary for the “FADEC system” to regulate engine thrust or shaft power (e.g., feedback sensor time constants and accuracies, fuel valve slew rate);

h.2. “Development” or “production” “technology” for control and diagnostic “parts” or “components” unique to the “FADEC system” and used to regulate engine thrust or shaft power;

h.3. “Development” “technology” for the control law algorithms, including “source code”, unique to the “FADEC system” and used to regulate engine thrust or shaft power;

*Note: 9E003.h does not apply to technical data related to engine-“aircraft” integration required by civil aviation authorities of one or more Wassenaar Arrangement Participating States (See Supplement No. 1 to part 743 of the EAR) to be published for general airline use (e.g., installation manuals, operating instructions, instructions for continued airworthiness) or interface functions (e.g., input/output processing, airframe thrust or shaft power demand).*

i. “Technology” for adjustable flow path systems designed to maintain engine stability for gas generator turbines, fan or power turbines, or propelling nozzles, as follows:

i.1. “Development” “technology” for deriving the functional requirements for the “parts” or “components” that maintain engine stability;

i.2. “Development” or “production” “technology” for “parts” or “components” unique to the adjustable flow path system and that maintain engine stability;

i.3. “Development” “technology” for the control law algorithms, including “source code”, unique to the adjustable flow path system and that maintain engine stability;

*Note: 9E003.i does not apply to “technology” for any of the following:*

a. Inlet guide vanes;

b. Variable pitch fans or prop-fans;

c. Variable compressor vanes;

d. Compressor bleed valves; or

e. Adjustable flow path geometry for reverse thrust.

j. “Technology” “required” for the “development” of wing-folding systems designed for fixed-wing “aircraft” powered by gas turbine engines.

*N.B.: For “technology” “required” for the “development” of wing-folding systems designed for fixed-wing “aircraft” specified in USML Category VIII (a), see USML Category VIII (i).*

k. “Technology” not otherwise controlled in 9E003.a.1 through a.8, a.10, and .h and used in the “development”, “production”, or overhaul of hot section “parts” or “components” of civil derivatives of military engines controlled on the U.S. Munitions List.

**\*\*9E018** “Technology” for the “development”, “production”, or “use” of equipment controlled by 9A018.

(a) See ECCN 9E610 for “technology” related to aircraft, refuelers, ground equipment, parachutes, harnesses, instrument flight trainers and “parts”, “accessories” and “attachments” for the forgoing that, immediately prior to October 15, 2013, were classified under 9A018.a.1, .a.3, .c, .d, .e, or .f.

(b) See ECCN 9E619 for “technology” related to military trainer aircraft turbo prop engines and “parts” and “components” thereof that,

immediately prior to October 15, 2013, were classified under ECCN 9A018.a.2 or .a.3.

(c) Technology related to certain armored ground transport vehicles that prior to January 6, 2014 were classified under ECCN 9A018.b is EAR99 (See 0E606).

“subject to the ITAR” (see 22 CFR parts 120 through 130).

**List of Items Controlled**

*Related Controls:* Technical data directly related to articles enumerated or otherwise described in USML Category VIII are subject to the control of USML paragraph VIII(i).

*Related Definitions:* N/A

*Items:*

a. “Technology” (other than technology controlled by paragraphs .b or .y of this entry) “required” for the “development,” “production,” operation, installation, maintenance, repair, overhaul, or refurbishing of commodities or software controlled by ECCN 9A610, 9B610, 9C610, or 9D610.

*Note:* “Build-to-print technology” “required” for the “production” of items described in paragraphs b.1 through b.15 of this entry is classified under 9E610.a.

b. “Technology” (other than “build-to-print technology”) “required” for the “development” or “production” of any of the following:

- b.1. Static structural members;
- b.2. Exterior skins, removable fairings, non-removable fairings, radomes, access doors and panels, and in-flight opening doors;
- b.3. Control surfaces, leading edges, trailing edges, and leading edge flap seals;
- b.4. Leading edge flap actuation system commodities (i.e., power drive units, rotary geared actuators, torque tubes, asymmetry brakes, position sensors, and angle gearboxes) “specially designed” for fighter, attack, or bomber aircraft controlled in USML Category VIII;
- b.5. Engine inlets and ducting;
- b.6. Fatigue life monitoring systems “specially designed” to relate actual usage to the analytical or design spectrum and to compute amount of fatigue life “specially designed” for aircraft controlled by either USML subcategory VIII(a) or ECCN 9A610.a, except for Military Commercial Derivative Aircraft;
- b.7. Landing gear, and “parts” and “components” “specially designed” therefor, “specially designed” for use in aircraft weighing more than 21,000 pounds controlled by either USML subcategory VIII(a) or ECCN 9A610.a, except for Military Commercial Derivative Aircraft;
- b.8. Conformal fuel tanks and “parts” and “components” “specially designed” therefor;
- b.9. Electrical “equipment,” “parts,” and “components” “specially designed” for electromagnetic interference (EMI) – i.e., conducted emissions, radiated emissions, conducted susceptibility and radiated susceptibility – protection of aircraft that conform to the requirements of MIL-STD-461;

b.10. HOTAS (Hand-on Throttle and Stick) controls, HOCAS (Hands on Collective and Stick), Active Inceptor Systems (i.e., a combination of Active Side Stick Control Assembly, Active Throttle Quadrant Assembly, and Inceptor Control Unit), rudder pedal assemblies for digital flight control systems, and parts and components “specially designed” therefor;

b.11. Integrated Vehicle Health Management Systems (IVHMS), Condition Based Maintenance (CBM) Systems, and Flight Data Monitoring (FDM) systems;

b.12. Equipment “specially designed” for system prognostic and health management of aircraft;

b.13. Active Vibration Control Systems;

b.14. Self-sealing fuel bladders “specially designed” to pass a .50 caliber or larger gunfire test (MIL-DTL-5578, MIL-DTL-27422); *or*

b.15. Technology “required” for the “development” or “production” of “parts” or “components” controlled in 9A610.x and “specially designed” for damage or failure-adaptive flight control systems controlled in Category VIII(h)(7) of the USML.

c. through x. [Reserved]

y. Specific “technology” “required” for the “production,” “development,” operation, installation, maintenance, repair, overhaul, or refurbishing of commodities or software enumerated in ECCN 9A610.y or 9D610.y.

**\*\*9E619** “Technology” “required” for the “development,” “production,” operation, installation, maintenance, repair, overhaul, or refurbishing of military gas turbine engines and related commodities controlled by 9A619, equipment controlled by 9B619, materials

**controlled by 9C619, or software controlled by 9D619 (see List of Items Controlled).**

**List of Items Controlled**

*Related Controls:* Technical data directly related to articles enumerated or otherwise described in USML Category XIX are subject to the control of USML Category XIX(g).

*Related Definitions:* N/A

*Items:*

a. “Technology” (other than “technology” controlled by paragraphs .b and .c of this entry) “required” for the “development,” “production,” operation, installation, maintenance, repair, overhaul, or refurbishment of items controlled by ECCN 9A619 (except 9A619.y), ECCN 9B619 (except 9B619.y), ECCN 9C619, or ECCN 9D619 (except 9D619.y).

*Note:* “Build-to-print technology” “required” for the “production” of items described in paragraphs b.1 through b.10 of this entry is classified under 9E619.a.

b. “Technology” (other than “build-to-print technology”) “required” for the “development” or “production” of any of the following:

b.1. Front, turbine center, and exhaust frames;

b.2. Low pressure compressor (i.e., fan) “components” and “parts” as follows: nose cones and casings;

b.3. High pressure compressor “components” and “parts” as follows: casings;

b.4. Combustor “components” and “parts” as follows: casings, fuel nozzles, swirlers, swirler cups, deswirlers, valve injectors, and igniters;

b.5. High pressure turbine “components” and “parts” as follows: casings;

b.6. Low pressure turbine “components” and “parts” as follows: casings;

b.7. Augmentor “components” and “parts” as follows: casings, flame holders, spray bars, pilot burners, augmentor fuel controls, flaps (external, convergent, and divergent), guide and synchronization rings, and flame detectors and sensors;

b.8. Mechanical “components” and “parts” as follows: fuel metering units and fuel pump metering units, valves (fuel throttle, main

metering, oil flow management), heat exchangers (air/air, fuel/air, fuel/oil), debris monitoring (inlet and exhaust), seals (carbon, labyrinth, brush, balance piston, and “knife-edge”), permanent magnetic alternator and generator, eddy current sensors;

b.9. Torquemeter assembly (i.e., housing, shaft, reference shaft, and sleeve); *or*

b.10. Materials controlled by ECCN 9C619.b.

c. “Technology” “required” for the “development” or “production” of any of the following:

c.1. Low pressure compressor (i.e., fan) “components” and “parts” as follows: blades, vanes, spools, shrouds, blisks, shafts and disks;

c.2. High pressure compressor “components” and “parts” as follows: blades, vanes, spools, shrouds, blisks, shafts, disks, and impellers;

c.3. Combustor “components” and “parts” as follows: diffusers, liners, chambers, cowlings, domes and shells;

c.4. High pressure turbine “components” and “parts” as follows: shafts and disks, blades, vanes, nozzles, tip shrouds;

c.5. Low pressure turbine “components” and “parts” as follows: shafts and disks, blades, vanes, nozzles, tip shrouds;

c.6. Digital engine control systems (e.g., Full Authority Digital Engine Controls (FADEC) and Digital Electronic Engine Controls (DEEC)) “specially designed” for gas turbine engines controlled in this ECCN; *or*

c.7. Engine monitoring systems (i.e., prognostics, diagnostics, and health) “specially designed” for gas turbine engines and components controlled in this ECCN.

d. through x. [Reserved]

y. Specific “technology” “required” for the “development,” “production,” operation, installation, maintenance, repair, overhaul, or refurbishment of commodities controlled by 9A619.y or 9B619.y, or “software” controlled by ECCN 9D619.y.

**SUPPLEMENT NO. 2 TO PART 774 – GENERAL TECHNOLOGY AND SOFTWARE NOTES**

Therefore, all ECCNs that contain the phrase "required" (with the quotation marks) by definition refer back to the General Technology Note, per Kevin Wolf on 11-25-2015. Consider this when classifying e.g. "an outline drawing"; do a close-read of the related Group E ECCNs.

**1. General Technology Note.**

The export of "technology" that is "required" for the "development", "production", or "use" of items on the Commerce Control List is controlled according to the provisions in each Category.

"Technology" "required" for the "development", "production", or "use" of a controlled product remains controlled even when applicable to a product controlled at a lower level.

License Exception TSU is available for "technology" that is the minimum necessary for the installation, operation, maintenance (checking), or repair of those products that are eligible for License Exceptions or that are exported under a license.

*N.B.:* This does not allow release under a License Exception of the repair "technology" controlled by 1E002.e, 1E002.f, 8E002.a, or 8E002.b.

*N.B.:* The 'minimum necessary' excludes "development" or "production" technology and permits "use" technology only to the extent "required" to ensure safe and efficient use of the product. Individual ECCNs may further restrict export of "minimum necessary" information.

**2. General Software Note.**

License Exception TSU (mass market software) (see § 740.13 of the EAR) is available to all destinations, except countries in Country Group E:1 of Supplement No. 1 to part 740 of the EAR, for release of "software" which is any of the following:

1. Generally available to the public by being:

a. Sold from stock at retail selling points, without restriction, by means of:

1. Over the counter transactions;
2. Mail order transactions;
3. Electronic transactions; *or*
4. Telephone call transactions; *and*

b. Designed for installation by the user without further substantial support by the supplier.

2. [RESERVED] See § 734.3(b)(3) for "publicly available technology and software."

3. The minimum necessary "object code" for the installation, operation, maintenance (checking) or repair of those items whose export has been authorized.

**Note:** Minimum necessary "object code" does not enhance or improve the performance of an item or provide new features or functionality.

**Note:** The General Software Note does not apply to "software" controlled by Category 5 - part 2 "Information Security"). For "software" controlled by Category 5, part 2, see Supplement No. 1 to part 774, Category 5, part 2, Note 3 – Cryptography Note.

**3. General "Information Security" Note.**

“Information security” items or functions should be considered against the provisions in Category 5–Part 2, even if they are components, “software” or functions of other items.

**SUPPLEMENT NO. 3 TO PART 774 – STATEMENTS OF UNDERSTANDING**

***(a) Statement of Understanding - medical equipment.***

Commodities that are ‘specially designed for medical end-use’ that ‘incorporate’ commodities or software on the Commerce Control List (Supplement No. 1 to part 774 of the EAR) that do not have a reason for control of Nuclear Nonproliferation (NP), Missile Technology (MT), or Chemical & Biological Weapons (CB) are designated by the number EAR99 (i.e., are not elsewhere specified on the Commerce Control List).

***Notes to paragraph a:***

*(1) ‘Specially designed for medical end-use’ means designed for medical treatment or the practice of medicine (does not include medical research).*

*(2) Commodities or software are considered ‘incorporated’ if the commodity or software is: Essential to the functioning of the medical equipment; customarily included in the sale of the medical equipment; and exported or reexported with the medical equipment.*

*(3) Except for such software that is made publicly available consistent with § 734.3(b)(3) of the EAR, commodities and software ‘specially designed for medical end-use’ remain subject to the EAR.*

*(4) See also § 770.2(b) interpretation 2, for other types of equipment that incorporate items on the Commerce Control List that are subject to the EAR.*

*(5) For computers used with medical equipment, see also ECCN 4A003 note 2 regarding the "principal element" rule.*

*(6) For commodities and software “specially designed” for medical end use that incorporate an encryption or other "information security" item subject to the EAR, see also section 3 (General "Information Security" Note (GISN)) to Supplement No. 2 to this part.*

***(b) Statement of Understanding - Source Code.***

For the purpose of national security controlled items, “source code” items are controlled either by “software” or by “software” and “technology” controls, except when such “source code” items are explicitly decontrolled.

***(c) Category 5 - Part 2 - Note 4 Statement of Understanding.***

All items previously described by Notes (b), (c) and (h) to 5A002 are now described by Note 4 to Category 5 - Part 2. Note (h) to 5A002 prior to June 25, 2010 stated that the following was not controlled by 5A002:

Equipment specially designed for the servicing of portable or mobile radiotelephones and similar client wireless devices that meet all the provisions of the Cryptography Note (Note 3 in Category 5, Part 2), where the servicing equipment meets all of the following:

(1) The cryptographic functionality of the servicing equipment cannot easily be changed by the user of the equipment;

(2) The servicing equipment is designed for installation without further substantial support by the supplier; and

(3) The servicing equipment cannot change the cryptographic functionality of the device being serviced.

*(d) Statement of Understanding—Used Goods.*

The specifications in the Commerce Control List apply equally to new or used goods. In the case of used goods, an evaluation by the Bureau of Industry and Security may be carried out in order to assess whether the goods are capable of meeting the relevant specifications.

**SUPPLEMENT NO. 4 TO PART 774 –  
COMMERCE CONTROL LIST  
ORDER OF REVIEW**

(a) As described in EAR § 734.3, the EAR govern only items “subject to the EAR,” e.g., items not subject to the exclusive jurisdiction of another agency. Thus, for example, if an item is described in the U.S. Munitions List (USML) (22 CFR Part 121) of the International Traffic in Arms Regulations (ITAR) (22 CFR Parts 120-130), including one of its catch-all paragraphs, then the item is a “defense article” subject to the ITAR and there is no need to review the CCL with respect to whether it describes the item. See 22 CFR § 120.6 (“Defense article means any item or technical data designated in § 121.1 of the ITAR. The policy described in § 120.3 is applicable to designations of additional items”). If an item is not described on the USML and is otherwise “subject to the EAR,” then work through each of the following steps to determine where the item is covered by the CCL or, if it is not covered by the CCL, and is therefore designated as EAR99.

**(1) Step 1.** To classify an item “subject to the EAR” against the CCL, review the general characteristics of the item. This will usually guide you to the appropriate category (0 through 9) on the CCL.

**(2) Step 2.** Once the potentially applicable CCL categories are identified, determine which product group within the CCL category or categories -- i.e., A, B, C, D, or E -- is applicable to the item.

**(3) Step 3.** The “600 series” describes military items that were once subject to the ITAR. The 9x515 ECCNs describe “spacecraft,” related items, and some radiation-hardened

microelectronic circuits that were once subject to the ITAR under USML Category XV. Just as the ITAR effectively trumps the EAR, items described in a 9x515 ECCN or “600 series” ECCN trump other ECCNs on the CCL. Thus, the next step in conducting a classification analysis of an item “subject to the EAR” is to determine whether it is described in a 9x515 ECCN or “600 series” ECCN paragraph other than a “catch-all” paragraph such as a “.x” paragraph that controls unspecified “parts” and “components” “specially designed” for items in that ECCN or the corresponding USML paragraph. If so, the item is classified under that 9x515 ECCN or “600 series” ECCN paragraph even if it would also be described in another ECCN.

**(4) Step 4.** If the item is not described in a 9x515 ECCN or “600 series” ECCN, then determine whether the item is classified under a 9x515 ECCN or “600 series” catch-all paragraph, i.e., one that controls non-specific “parts,” “components,” “accessories,” and “attachments” “specially designed” for items in that ECCN or the corresponding USML paragraph. Such items are generally in the “.x” paragraph of ECCN 9A515 or a “600 series” ECCN.

**(i) Step 4.a.** Determine whether the item would meet the criteria of either paragraphs (a)(1) or (a)(2) of the “specially designed” definition in § 772.1 of the EAR. (These are informally known as the “catch” paragraphs.) If not applicable, then the item is not within the scope of the ECCN paragraph that contains a “specially designed” control parameter. Skip to Step 5.

**(ii) Step 4.b.** If the item meets the criteria of either paragraph (a)(1) or (a)(2) of the “specially designed” definition, then determine whether any of the provisions of paragraph (b) of the “specially designed” definition would apply. (These are informally known as the “release” provisions.) If so, then the item is not within the scope of the ECCN paragraph that contains a “specially designed” control parameter.

require a license if destined for a prohibited or restricted end user, end use or destination. See paragraphs (g) through (n) of § 732.3 “Steps Regarding the Ten General Prohibitions,” or General Prohibitions Four through Ten of part 736 of the EAR for license requirements other than those imposed by the CCL.

**(b) [RESERVED].**

*Note to paragraph (a)(4): The emphasis on the word “control” in Steps 4.a and 4.b is deliberate. Some ECCNs use “specially designed” as a de-control parameter. If an item would not be classified under a particular ECCN because it falls within the scope of either subparagraph (a)(1) or (a)(2) of the “specially designed” definition, then there is no need to analyze whether any element of paragraph (b) of the definition would apply to the item. One needs only review the “release” provisions in paragraph (b) of the “specially designed” definition if paragraph (a) of the “specially designed” definition applies to the item in a “control” paragraph of an ECCN that uses the term “specially designed.”*

**(5) Step 5.** If an item is not classified by a “600 series” or in a 9x515 ECCN, then starting from the beginning of the product group analyze each ECCN to determine whether any other ECCN in that product group describes the item. If any ECCN uses the term “specially designed,” see Steps 4.a and 4.b above in paragraphs (a)(4)(i) and (a)(4)(ii) respectively. If the item is described in one of these ECCNs, then the item is classified under that ECCN.

**(6) Step 6.** If the item is not described under any ECCN of any category of the CCL, then the item is designated as EAR99. EAR99 items may

\*\*EAR99 license

**SUPPLEMENT NO. 5 TO PART 774 - ITEMS CLASSIFIED UNDER ECCNS 0A521, 0B521, 0C521, 0D521 AND 0E521**

The following table lists items subject to the EAR that are not listed elsewhere in the CCL, but which the Department of Commerce, with the concurrence of the Departments of Defense and State, has identified warrant control for export or reexport because the items provide at least a significant military or intelligence advantage to the United States or for foreign policy reasons.

<b>Item descriptor.</b>  <i>Note: The description must match by model number or a broader descriptor that does not necessarily need to be company specific.</i>	<b>Date of initial or subsequent BIS classification.</b>  (ID = initial date; SD = subsequent date)	<b>Date when the item will be designated EAR99, unless reclassified in another ECCN or the 0Y521 classification is reissued.</b>	<b>Item-specific license exception eligibility.</b>

**SUPPLEMENT NO. 6 TO PART 774 – SENSITIVE LIST**

*Note to Supplement No. 6: While the items on this list are identified by ECCN rather than by Wassenaar Arrangement numbering, the item descriptions are drawn directly from the Wassenaar Arrangement's Sensitive List. If text accompanies an ECCN below, then the Sensitive List is limited to a subset of items classified under the specific ECCN or has differing parameters.*

**(1) Category 1**

- (i) 1A002.a.1.
- (ii) 1C001.
- (iii) 1C007.c.
- (iv) 1C010.c and .d.
- (v) 1C012.
- (vi) 1D002 – “Software” for the “development” of organic “matrix”, metal “matrix”, or carbon “matrix” laminates or composites controlled under 1A002, 1C007.c, 1C010.c or 1C010.d.
- (vii) 1E001 – “Technology” according to the General Technology Note for the “development” or “production” of equipment and materials controlled under 1A002, 1C001, 1C007.c, 1C010.c, 1C010.d, or 1C012.
- (viii) 1E002.e and .f.

**(2) Category 2**

- (i) 2D001—“Software”, other than that controlled by 2D002, “specially designed” for the “development” or “production” of equipment as follows:
  - (A) Specified by 2B001.a, 2B001.b.1, or 2B001.b.2, and having a “unidirectional positioning repeatability” equal to or less (better) than 0.9  $\mu\text{m}$  along one or more linear axis;

(B) Specified by 2B001.b.3, 2B001.d, 2B001.f or 2B003.

(ii) 2E001—“Technology” according to the General Technology Note for the “development” of equipment or “software”, as follows:

(A) Equipment specified by 2B001.a, 2B001.b.1 or 2B001.b.2, and having a “unidirectional positioning repeatability” equal to or less (better) than 0.9  $\mu\text{m}$  along one or more linear axis;

(B) Equipment specified by 2B001.b.3, 2B001.d, 2B001.f or 2B003.

(C) “Software” specified by 2D001 of this Supplement;

(iii) 2E002 “Technology” according to the General Technology Note for the “production” of equipment as follows:

(A) Specified by 2B001.a, 2B001.b.1, or 2B001.b.2, and having a “unidirectional positioning repeatability” equal to or less (better) than 0.9  $\mu\text{m}$  along one or more linear axis;

(B) Specified by 2B001.b.3, 2B001.d, 2B001.f or 2B003.

### **(3) Category 3**

(i) 3A001.b.2 - "Monolithic Microwave Integrated Circuit" ("MMIC") amplifiers that are any of the following:

(A) Rated for operation at frequencies exceeding 2.7 GHz up to and including 6.8 GHz with a "fractional bandwidth" greater than 15%, and having any of the following:

(A.1.) A peak saturated power output greater than **300 W (54.8 dBm)** at any frequency exceeding 2.7 GHz up to and including 2.9 GHz;

(A.2.) A peak saturated power output greater than **300 W (54.8 dBm)** at any frequency exceeding 2.9 GHz up to and including 3.2 GHz;

(A.3.) A peak saturated power output greater than **300 W (54.8 dBm)** at any frequency exceeding 3.2 GHz up to and including 3.7 GHz; or

(A.4.) A peak saturated power output greater than **120 W (50.8 dBm)** at any frequency exceeding 3.7 GHz up to and including 6.8 GHz;

(B) Rated for operation at frequencies exceeding 6.8 GHz up to and including **12 GHz** with a "fractional bandwidth" greater than 10%, and having any of the following:

(B.1) A peak saturated power output greater than **25 W (44 dBm)** at any frequency exceeding 6.8 GHz up to and including 8.5 GHz; or

(B.2.) A peak saturated power output greater than **25 W (44 dBm)** at any frequency exceeding 8.5 GHz up to and including **12 GHz**.

(ii) 3A001.b.3 - Discrete microwave transistors that are any of the following:

(A) Rated for operation at frequencies exceeding 2.7 GHz up to and including 6.8 GHz and having any of the following:

(A.1.) A peak saturated power output greater than **600 W (57.8 dBm)** at any frequency exceeding 2.7 GHz up to and including 2.9 GHz;

(A.2.) A peak saturated power output greater than **600 W (57.8 dBm)** at any frequency exceeding 2.9 GHz up to and including 3.2 GHz;

(A.3.) A peak saturated power output greater than **600 W (57.8 dBm)** at any frequency exceeding 3.2 GHz up to and including 3.7 GHz; or

(A.4.) A peak saturated power output greater than **130 W (51.2 dBm)** at any frequency exceeding 3.7 GHz up to and including 6.8 GHz;

(B) Rated for operation at frequencies exceeding 6.8 GHz up to and including **12 GHz** and having any of the following:

(B.1.) A peak saturated power output greater than **130 W (51.2 dBm)** at any frequency exceeding 6.8 GHz up to and including 8.5 GHz;

(B.2.) A peak saturated power output greater than **60 W (47.8 dBm)** at any frequency exceeding 8.5 GHz up to and including 12 GHz.

(iii) 3A002.g.1.

(iv) 3D001 – “Software” “specially designed” for the “development” or “production” of equipment controlled under 3A001.b.2, 3A001.b.3, and 3A002.g.1.

(v) 3E001 – “Technology” according to the General Technology Note for the “development” or “production” of equipment controlled under 3A001.b.2, 3A001.b.3, and .3A002.g.1.

**(4) Category 4**

(i) 4A001.a.2.

(ii) 4D001 – “Software” “specially designed” for the “development” or “production” of equipment controlled under ECCN 4A001.a.2 or for the “development” or “production” of “digital computers” having an ‘Adjusted Peak Performance’ (‘APP’) exceeding 16 Weighted TeraFLOPS (WT).

(iii) 4E001 – “Technology” according to the General Technology Note for the “development” or “production” of any of the following equipment or “software”: equipment controlled under ECCN 4A001.a.2, “digital computers” having an ‘Adjusted Peak Performance’ (‘APP’) exceeding 16 Weighted TeraFLOPS (WT), or “software” controlled under the specific provisions of 4D001 described in this Supplement.

**(5) Category 5 – Part 1**

(i) 5A001.b.3, .b.5, and .h.

(ii) 5B001.a – Equipment and specially designed components or accessories therefor, specially designed for the “development” or “production” of equipment, functions or features controlled under 5A001.b.3, b.5, or .h.

(iii) 5D001.a – “Software” specially designed for the “development” or “production” of equipment, functions or features controlled under 5A001.b.3, b.5, or .h.

(iv) [Reserved]

(v) 5E001.a – “Technology” according to the General Technology Note for the “development” or “production” of equipment, functions or features controlled under 5A001.b.3, b.5, or .h or “software” described in this Supplement’s description of 5D001.a.

**(6) Category 6**

(i) 6A001.a.1.b – Systems or transmitting and receiving arrays, designed for object detection or location, having any of the following:

(A) A transmitting frequency below 5 kHz or a sound pressure level exceeding 224 dB (reference 1  $\mu$ Pa at 1 m) for equipment with an operating frequency in the band from 5 kHz to 10 kHz inclusive;

(B) Sound pressure level exceeding 224 dB (reference 1  $\mu$ Pa at 1 m) for equipment with an operating frequency in the band from 10 kHz to 24 kHz inclusive;

(C) Sound pressure level exceeding 235 dB (reference 1  $\mu$ Pa at 1 m) for equipment with an operating frequency in the band between 24 kHz and 30 kHz;

(D) Forming beams of less than 1° on any axis and having an operating frequency of less than 100 kHz;

(E) Designed to operate with an unambiguous display range exceeding 5,120 m; *or*

(F) Designed to withstand pressure during normal operation at depths exceeding 1,000 m and having transducers with any of the following:

(1) Dynamic compensation for pressure; or

(2) Incorporating other than lead zirconate titanate as the transduction element;

(ii) 6A001.a.1.e.

(iii) 6A001.a.2.a.1, a.2.a.2, a.2.a.3, a.2.a.5, and a.2.a.6.

(iv) 6A001.a.2.b.

(v) 6A001.a.2.c – Processing equipment, specially designed for real time application with towed acoustic hydrophone arrays, having “user-accessible programmability” and time or frequency domain processing and correlation, including spectral analysis, digital filtering and beamforming using Fast Fourier or other transforms or processes.

(vi) 6A001.a.2.d.

(vii) 6A001.a.2.e.

(viii) 6A001.a.2.f – Processing equipment, specially designed for real time application with bottom or bay cable systems, having “user-accessible programmability” and time or frequency domain processing and correlation, including spectral analysis, digital filtering and beamforming using Fast Fourier or other transforms or processes.

(ix) 6A002.a.1.a, a.1.b, and a.1.c.

(x) 6A002.a.1.d.

(xi) 6A002.a.2.a – Image intensifier tubes having all of the following:

(A) A peak response in the wavelength range exceeding 400 nm but not exceeding 1,050 nm;

(B) Electron image amplification using any of the following:

(1) A microchannel plate for electron image amplification with a hole pitch (center-to-center spacing) of 12  $\mu\text{m}$  or less; or

(2) An electron sensing device with a non-binned pixel pitch of 500  $\mu\text{m}$  or less, specially designed or modified to achieve ‘charge multiplication’ other than by a microchannel plate; and

(C) Any of the following photocathodes:

(1) Multialkali photocathodes (e.g., S-20 and S-25) having a luminous sensitivity exceeding 700  $\mu\text{A}/\text{lm}$ ;

(2) GaAs or GaInAs photocathodes; *or*

(3) Other “III-V compound” semiconductor photocathodes having a maximum “radiant sensitivity” exceeding 10 mA/W.

(xii) 6A002.a.2.b.

(xiii) 6A002.a.3 – Subject to the following additional notes:

**Note 1:** 6A002.a.3 does not apply to the following “focal plane arrays” in this Supplement:

a. Platinum Silicide (PtSi) “focal plane arrays” having less than 10,000 elements;

b. Iridium Silicide (IrSi) “focal plane arrays”.

**Note 2:** 6A002.a.3 does not apply to the following “focal plane arrays” in this Supplement:

a. Indium Antimonide (InSb) or Lead Selenide (PbSe) “focal plane arrays” having less than 256 elements;

b. Indium Arsenide (InAs) “focal plane arrays”;

c. Lead Sulfide (PbS) “focal plane arrays”;

d. Indium Gallium Arsenide (InGaAs) “focal plane arrays”.

**Note 3:** 6A002.a.3 does not apply to Mercury Cadmium Telluride (HgCdTe) “focal plane arrays” as follows in this Supplement:

a. ‘Scanning Arrays’ having any of the following:

1. 30 elements or less; or

2. *Incorporating time delay-and-integration within the element and having 2 elements or less;*

b. *'Staring Arrays' having less than 256 elements.*

**Technical Notes:**

a. *'Scanning Arrays' are defined as "focal plane arrays" designed for use with a scanning optical system that images a scene in a sequential manner to produce an image;*

b. *'Staring Arrays' are defined as "focal plane arrays" designed for use with a non-scanning optical system that images a scene.*

**Note 6:** *6A002.a.3 does not apply to the following "focal plane arrays" in this List:*

a. *Gallium Arsenide (GaAs) or Gallium Aluminum Arsenide (GaAlAs) quantum well "focal plane arrays" having less than 256 elements;*

b. *Microbolometer "focal plane arrays" having less than 8,000 elements.*

**Note 7:** *6A002.a.3.g does not apply to "focal plane arrays", "specially designed" or modified to achieve 'charge multiplication', as follows:*

a. *Linear (1-dimensional) arrays having 4,096 elements or less.*

b. *Non-linear (2-dimensional) arrays having all of the following;*

b.1. *A total of 250,000 elements or less; and*

b.2. *A maximum of 4,096 elements in each dimension.*

(xiv) 6A002.b.

(xv) 6A002.c – 'Direct view' imaging equipment incorporating any of the following:

(A) Image intensifier tubes having the characteristics listed in this Supplement's description of 6A002.a.2.a or 6A002.a.2.b;

(B) "Focal plane arrays" having the characteristics listed in this Supplement's description of 6A002.a.3; or

(C) Solid-state detectors having the characteristics listed in 6A002.a.1.

(xvi) 6A003.b.3 – Imaging cameras incorporating image intensifier tubes having the characteristics listed in this Supplement's description of 6A002.a.2.a or 6A002.a.2.b

*Note: 6A003.b.3 does not apply to imaging cameras specially designed or modified for underwater use.*

(xvii) 6A003.b.4 – Imaging cameras incorporating “focal plane arrays” having any of the following:

(A) Incorporating “focal plane arrays” specified by this Supplement’s description of 6A002.a.3.a to 6A002.a.3.e;

(B) Incorporating “focal plane arrays” specified by this Supplement’s description of 6A002.a.3.f; or

(C) Incorporating “focal plane arrays” specified by this Supplement’s description of 6A002.a.3.g.

*Note 1: ‘Imaging cameras’ described in 6A003.b.4 include “focal plane arrays” combined with sufficient “signal processing” electronics, beyond the read out integrated circuit, to enable as a minimum the output of an analog or digital signal once power is supplied.*

*Note 2: 6A003.b.4.a does not control imaging cameras incorporating linear “focal plane arrays” with twelve 12 elements or fewer, not employing time-delay-and-integration within the element, and designed for any of the following:*

*a. Industrial or civilian intrusion alarm, traffic or industrial movement control or counting systems;*

*b. Industrial equipment used for inspection or monitoring of heat flows in buildings, equipment or industrial processes;*

*c. Industrial equipment used for inspection, sorting or analysis of the properties of materials;*

*d. Equipment specially designed for laboratory use; or*

*e. Medical equipment.*

*Note 3: 6A003.b.4.b does not control imaging cameras having any of the following characteristics:*

*a. A maximum frame rate equal to or less than 9 Hz;*

*b. Having all of the following:*

*1. Having a minimum horizontal or vertical ‘Instantaneous-Field -of-View (IFOV)’ of at least 10 mrad/pixel (milliradians/pixel);*

*2. Incorporating a fixed focal-length lens that is not designed to be removed;*

3. Not incorporating a 'direct view' display; and

**Technical Note:** 'Direct view' refers to an imaging camera operating in the infrared spectrum that presents a visual image to a human observer using a near-to-eye micro display incorporating any light-security mechanism.

4. Having any of the following:

- a. No facility to obtain a viewable image of the detected field-of-view; or
- b. The camera is designed for a single kind of application and designed not to be user modified; or

**Technical Note:**

'Instantaneous Field of View (IFOV)' specified in Note 3.b is the lesser figure of the 'Horizontal FOV' or the 'Vertical FOV'.

'Horizontal IFOV' = horizontal Field of View (FOV)/number of horizontal detector elements

'Vertical IFOV' = vertical Field of View (FOV)/number of vertical detector elements.

c. Where the camera is specially designed for installation into a civilian passenger land vehicle of less than 3 tonnes three tons (gross vehicle weight) and having all of the following:

1. Is operable only when installed in any of the following:

- a. The civilian passenger land vehicle for which it was intended; or
- b. A specially designed, authorized maintenance test facility; and

2. Incorporates an active mechanism that forces the camera not to function when it is removed from the vehicle for which it was intended.

**Note:** When necessary, details of the items will be provided, upon request, to the Bureau of Industry and Security in order to ascertain compliance with the conditions described in Note 3.b.4 and Note 3.c in this Note to 6A003.b.4.b.

**Note 4:** 6A003.b.4.c does not apply to 'imaging cameras' having any of the following characteristics:

- a. Having all of the following:

1. *Where the camera is specially designed for installation as an integrated component into indoor and wall-plug-operated systems or equipment, limited by design for a single kind of application, as follows:*

a. *Industrial process monitoring, quality control, or analysis of the properties of materials;*

b. *Laboratory equipment specially designed for scientific research;*

c. *Medical equipment;*

d. *Financial fraud detection equipment; and*

2. *Is only operable when installed in any of the following:*

a. *The system(s) or equipment for which it was intended; or*

b. *A specially designed, authorized maintenance facility; and*

3. *Incorporates an active mechanism that forces the camera not to function when it is removed from the system(s) or equipment for which it was intended;*

b. *Where the camera is specially designed for installation into a civilian passenger land vehicle of less than 3 tonnes (gross vehicle weight), or passenger and vehicle ferries having a length overall (LOA) 65 m or greater, and having all of the following:*

1. *Is only operable when installed in any of the following:*

a. *The civilian passenger land vehicle or passenger and vehicle ferry for which it was intended; or*

b. *A specially designed, authorized maintenance test facility; and*

2. *Incorporates an active mechanism that forces the camera not to function when it is removed from the vehicle for which it was intended;*

c. *Limited by design to have a maximum “radiant sensitivity” of 10 mA/W or less for wavelengths exceeding 760 nm, having all of the following:*

1. *Incorporating a response limiting mechanism designed not to be removed or modified; and*

2. *Incorporates an active mechanism that forces the camera not to function when the response limiting mechanism is removed; and*

3. *Not specially designed or modified for underwater use; or*

- d. *Having all of the following:*
1. *Not incorporating a ‘direct view’ or electronic image display;*
  2. *Has no facility to output a viewable image of the detected field of view;*
  3. *The “focal plane array” is only operable when installed in the camera for which it was intended; and*
  4. *The “focal plane array” incorporates an active mechanism that forces it to be permanently inoperable when removed from the camera for which it was intended.*

**Note:** *When necessary, details of the item will be provided, upon request, to the Bureau of Industry and Security in order to ascertain compliance with the conditions described in Note 4 above.*

**Note 5:** *6A003.b.4.c does not apply to imaging cameras specially designed or modified for underwater use.*

(xviii) 6A003.b.5.

(xix) 6A004.c.

(xx) 6A004.d.

(xxi) 6A006.a.1.

(xxii) 6A006.a.2 – “Magnetometers” using optically pumped or nuclear precession (proton/Overhauser) “technology” having a ‘sensitivity’ lower (better) than 2 pT (rms) per square root Hz.

(xxiii) 6A006.c.1 – “Magnetic gradiometers” using multiple “magnetometers” specified by 6A006.a.1 or this Supplement’s description of 6A006.a.2.

(xxiv) 6A006.d – “Compensation systems” for the following:

(A) Magnetic sensors specified by 6A006.a.2 and using optically pumped or nuclear precession (proton/Overhauser) “technology” that will permit these sensors to realize a ‘sensitivity’ lower (better) than 2 pT rms per square root Hz.

(B) Underwater electric field sensors specified by 6A006.b.

(C) “Magnetic gradiometers” specified by 6A006.c. that will permit these sensors to realize a ‘sensitivity’ lower (better) than 3 pT/m rms per square root Hz.

(xxv) 6A006.e – Underwater electromagnetic receivers incorporating “magnetometers” specified by 6A006.a.1 or this Supplement’s description of 6A006.a.2.

(xxvi) 6A008.d, .h, and .k.

(xxvii) 6B008.

(xxviii) 6D001 – “Software” specially designed for the “development” or “production” of equipment specified by 6A004.c, 6A004.d, 6A008.d, 6A008.h, 6A008.k, or 6B008.

(xxix) 6D003.a.

(xxx) 6E001.

(xxxi) 6E002 – “Technology” according to the General Technology Note for the “production” of equipment specified by the 6A or 6B provisions described in this Supplement.

**(7) Category 7**

(i) 7D002.

(ii) 7D003.a.

(iii) 7D003.b.

(iv) [RESERVED]

(v) 7D004.a to .d and .g.

(vi) 7E001.

(vii) 7E002.

**(8) Category 8**

(i) 8A001.b to .c.

(ii) 8A002.b – Systems specially designed or modified for the automated control of the motion of submersible vehicles specified by 8A001.b through .c using navigation data having closed loop servo-controls and having any of the following:

(A) Enabling a vehicle to move within 10 m of a predetermined point in the water column;

(B) Maintaining the position of the vehicle within 10 m of a predetermined point in the water column; or

(C) Maintaining the position of the vehicle within 10 m while following a cable on or under the seabed.

(iii) 8A002.h and .j.

(iv) 8A002.o.3.

(v) 8A002.p.

(vi) 8D001 – “Software” specially designed for the “development” or “production” of equipment in 8A001.b to .c, 8A002.b (as described in this Supplement), 8A002.h, 8A002.j, 8A002.o.3, or 8A002.p.

(vii) 8D002.

(viii) 8E001 – “Technology” according to the General Technology Note for the “development” or “production” of equipment specified by 8A001.b to .c, 8A002.b (as described in this Supplement), 8A002.h, 8A002.j, 8A002.o.3, or 8A002.p.

(ix) 8E002.a.

### **(9) Category 9**

(i) 9A011.

(ii) 9B001.

(iii) 9D001 – “Software” specially designed or modified for the “development” of equipment or “technology”, specified by 9A011, 9B001.b, 9E003.a.1 to a.5 or 9E003.a.8 or 9E003.h.

(iv) 9D002 – “Software” specially designed or modified for the “production” of equipment specified by 9A011 or 9B001.b.

(v) 9D004.a and .c.

(vi) 9E001.

(vii) 9E002.

(viii) [Reserved]

(ix) 9E003.a.1 to a.5, a.8.

(x) 9E003.h.

**SUPPLEMENT NO. 7 TO PART 774 – VERY SENSITIVE LIST**

*Note to Supplement No. 7: While the items on this list are identified by ECCN rather than by Wassenaar Arrangement numbering, the item descriptions are drawn directly from the Wassenaar Arrangement's Very Sensitive List, which is a subset of the Wassenaar Arrangement's Sensitive List. If text accompanies an ECCN below, then the Very Sensitive List is limited to a subset of items classified under the specific ECCN or has differing parameters.*

**(1) Category 1**

- (i) 1A002.a.1.
- (ii) 1C001.
- (iii) 1C012.
- (iv) 1E001 – “Technology” according to the General Technology Note for the “development” or “production” of equipment and materials specified by 1A002.a, 1C001, or 1C012.

**(2) Category 5 – Part 1**

- (i) 5A001.b.5.
- (ii) 5A001.h.
- (iii) 5D001.a – “Software” specially designed for the “development” or “production” of equipment, functions or features specified by 5A001.b.5 or 5A001.h.
- (iv) 5E001.a – “Technology” according to the General Technology Note for the “development” or “production” of equipment, functions, features or “software” specified by 5A001.b.5, 5A001.h, or 5D001.a.

**(3) Category 6**

- (i) 6A001.a.1.b.1 – Systems or transmitting and receiving arrays, designed for object detection or location, having a sound pressure level exceeding 210 dB (reference 1  $\mu$ Pa at 1 m) and an operating frequency in the band from 30 Hz to 2 kHz.

(ii) 6A001.a.2.a.1 to a.2.a.3, a.2.a.5, or a.2.a.6.

(iii) 6A001.a.2.b.

(iv) 6A001.a.2.c – Processing equipment, specially designed for real time application with towed acoustic hydrophone arrays, having “user-accessible programmability” and time or frequency domain processing and correlation, including spectral analysis, digital filtering and beamforming using Fast Fourier or other transforms or processes.

(v) 6A001.a.2.e.

(vi) 6A001.a.2.f – Processing equipment, specially designed for real time application with bottom or bay cable systems, having “user-accessible programmability” and time or frequency domain processing and correlation, including spectral analysis, digital filtering and beamforming using Fast Fourier or other transforms or processes.

(vii) 6A002.a.1.c.

(viii) 6B008.

(ix) 6D001 – “Software” specially designed for the “development” or “production” of equipment specified by 6B008.

(x) 6D003.a.

(xi) 6E001 – “Technology” according to the General Technology Note for the “development” of equipment or “software” specified by the 6A, 6B, or 6D provisions described in this Supplement.

(xii) 6E002 – “Technology” according to the General Technology Note for the “production” of equipment specified by the 6A or 6B provisions described in this Supplement.

#### **(4) Category 7**
